Are you a tight wad?

A tight wad with your client's money, we mean. Do you make every penny count when you buy radio time? Well, in Baltimore, the station for you is WITH!

Because WITH's rates are *low*—and WITH's audience is *big*, big and responsive. Even SMALL appropriations do a BIG job for you on WITH.

Here's proof: *WITH regularly carries the advertising of twice as many local merchants as any other station in town.* For just one good reason: WITH produces *low-cost results!* Get the whole WITH story from your Forjoe man today!

TOM TINSLEY, PRESIDENT • REPRESENTED BY FORJOE & COMPANY

W-I-T-H

IN BALTIMORE

Woodrow Wilson served mankind

The Wilson Memorial at Poznan, Poland

Thomas Woodrow Wilson, distinguished Virginian and 28th president of the United States, was a practical idealist.

After leading the nation through the grueling years of World War 1 he fought tooth and nail to build the League of Nations as a worldwide Gibraltar of democracy.

His age predated commercial broadcasting by a few scant years. But we suspect that had radio and television been available he would have used them to the full. The persuasiveness of voice broadcasting, the remarkable ability of radio and TV to be of service, would have meant a great deal to Woodrow Wilson.

Havens & Martin Stations broadcast in the Wilson tradition — they broadcast to serve.

JOURNAL-EVERY EVENING

SERVICE OF THE ASSOCIATED PRESS, UNITED PRESS, AND INTERNATIONAL NEWS SERVICE

WILMINGTON, DELAWARE, WEDNESDAY, MARCH 19, 1952 — THIRTY-EIGHT PAGES

Full Future Is Foreseen For Industry Area of City

Reserve Bank Points To $500,000,000 Expansion Since War as Proof Of Prophecy; Construction Of Homes, Plants Cited

The Wilmington industrial area is "bursting at the seams" with activity, and is "vibrant with expansion," the Federal Reserve Bank of Philadelphia said today.

In a survey of Wilmington by its monthly Business Review, the Federal Reserve Bank prophesized that "Wilmington is in midstream between a proud past and a full future."

More than $500,000,000 has been spent in the city since World War II on new plants, commercial buildings, hospitals, schools, churches, and private homes, the article pointed out.

Many Plants Expanding

A number of leading concerns in the "chemical capital of the world" are expanding their plant capacities, the bank noted in its report, naming the DuPont Company, Allied Chemical and Dye, Hercules Powder, Atlas Powder, Claymont Steel, Ethyl Corporation, Continental Diamond Fibre, Pyrites Company and National Vulcanized Fibre.

The article stated that the Wilmington Chamber of Commerce had in its active files approximately 400 industrial prospects which are seeking refuge from higher-taxing neighboring states.

Leads in Chemists

The article states that Wilmington probably has more chemists per [illegible] mile than any other

March 19, 1952

and, there's a full future for advertisers on WDEL-TV WILMINGTON, DELAWARE

WDEL-TV completely covers this booming market and area—distinguished for its stability, distinguished for its sales productivity.

Wilmington is first in per family buying income among all U. S. metropolitan cities 100,000 to 250,000.

(Sales management—1951 Survey of Buying Power)

Delaware is first in per capita buying income of any state.

CLOSED CIRCUIT

IT'S NOW definite that British Broadcasting Corp., sorely in need of funds, is going to sell time, both radio and TV. Approach, to be made gingerly at start, probably will constitute watered-down spots. Emissaries in U.S., it's learned authoritatively, already observing our techniques and commercials will be smuggled to public innocuously at first. Eventual plan, it's said, is to make BBC self-sustaining which would mean transition from "British system of state monopoly" to modified American plan being used in Canada and other dominions.

ANY CONFUSION regarding meaning of FCC's oft-quoted "waiting period" following issuance of final TV report is cleared up by explanation from FCC sources: Waiting period was meant to mean that for a period of time (now believed to be 90 days) no action will be taken by Commission which would discriminate in favor of pending applicants. There was no thought of making end of that period a cutoff date. It will be recalled that Commission in March 1951 "Third Report" asked that applications be withheld until after final decision was issued, and declared that "reasonable period of time" would be provided for the filing of new applications and revisions of pending ones.

BIGGEST change in temperament of broadcasters at NARTB, it was generally noted, was that they had "gotten over their TV scare." In contrast to 1951 convention, broadcasters, instead of denouncing and fearing TV "ogre," generally sought information on when and how they could enter video field.

ASSOCIATED PRESS television news service will be announced soon. Many stations have signified their interest on basis of plans discussed privately at NARTB convention.

NBC AFFILIATES besieged network representatives at NARTB sessions in Chicago last week over failure of network to carry President Truman's sensational Jackson Day "I shall not be a candidate for re-election" speech. Network didn't pick up speech because it was classified as political and contrary to its policy in an election year. CBS, on other hand, picked it up and scooped the world, though other networks had it minutes after closing of sensational address.

THOUGH he feels he should give up chairmanship of Affiliates in 30-60 days to concentrate on operation of WTIC Hartford (story page 23), Paul W. Morency is agreeing to serve on til Radio Affiliates by-laws and constitution are prepared, system for perpetuating committee is devised, and new chairman is picked. Some members of committee have asked to be relieved, due to pressures of station operation, but most are agreed on serving for another year.

BOTH NBC and CBS found themselves confronted with clearance problems during NARTB convention. NBC met resistance from

(Continued on page 6)

BANNISTER IS V.P.; HEADS STATION RELATIONS

ELECTION of Harry Bannister as NBC vice president to head station relations department was announced by NBC President Joseph H. McConnell following monthly board meeting Friday. Move had been expected since March 12 announcement that Mr. Bannister, colorful radio figure identified with WWJ Detroit for last 20 years, was leaving WWJ general managership to join NBC in "executive capacity" on April 14 [B•T, March 24, 17]. As station relations head, he succeeds Carleton D. Smith, who becomes director of operations for NBC owned and operated stations division [B•T, March 31].

TELECAST SPORTS GAINED ATTENDANCE

ATTENDANCE at sports events in 1951 equalled pre-television year 1947—only slightly below the biggest year in history, according to figures released to RTMA today by Jerry Jordan, originator of three years' study of subject, which has been completed through cooperation of N. W. Ayer & Son Inc. [B•T, Dec. 3, 1951].

The survey indicated that hundreds more TV channels should help, not harm sports, and said "gloomy predictions" that video would cut heavily into radio and other media and threaten sports, movies and other recreation, "have not proved true."

Radio hit highest peak in history both in numbers of sets and total income, the report said. Major league clubs telecasting regularly gained 234,169 admissions over 1950 and those reducing or eliminating TV lost 1,485,070.

CBS-TV SALES UP 95.7%

CBS TELEVISION business at all time high, Fred M. Thrower vice president in charge of CBS-TV network sales, announced today (Monday). Time sales for first two months of this year were 95.7% over last year's, Mr. Thrower added. He pointed out that this does not include additional $5 million new business, including 11 quarter-hours purchased by Lever Bros. and Pillsbury Mills. Mr. Thrower made statement after widespread reports of TV sponsor cancellations.

BUSINESS BRIEFLY

DODGE CAMPAIGN ● Dodge Division of Chrysler Corp., through Ruthrauff & Ryan, New York, starts a national radio saturation spot announcement schedule ranging from two to four weeks, effective April 28. The new Dodge agency, Grant Adv., doesn't take over until August 1.

NEWS AND PARTICIPATION ● National Biscuit Co., New York (Honey Graham crackers), through McCann-Erickson, New York, lining up 5-10-15-minute news and participation programs to start in May in limited number of radio markets.

WELCH'S CAMPAIGN ● Welch's Sweet Wine, New York, using a spot announcement radio campaign for 8 weeks starting April 9 in limited market. Agency: Al Paul Lefton, New York.

DURSTINE NAMED ● Pacific Can Co., San Francisco, names Roy S. Durstine, N. Y. and S. F. to handle its advertising.

FORD ANNIVERSARY ● Ford Motor Co. expects to celebrate its 50th anniversary on June 15, 1953 with a two-hour network television show on both NBC-TV and CBS-TV,

(Continued on page 110)

WINCHELL TO BE OFF AIR INDEFINITELY

WALTER WINCHELL, who has been off the air temporarily following virus infection, has, on advice of his physicians, arranged for indefinite suspension of his Sunday evening ABC broadcasts and of his contractual relations with both network and his sponsor, Warner-Hudnut Inc. He will return to air only if his health permits. In recent weeks Mr. Winchell has been replaced by guest newscasters.

On April 13 Drew Pearson, currently 6-6:15 p.m., will take over Winchell 9-9:15 p.m. spot for Carter Products. George E. Sokolsky, currently 10:30-10:45 p.m., will be heard at former Pearson time.

P&G Renews Three Strips on CBS Radio

PROCTER & GAMBLE has renewed its three evening quarter-hour strips on CBS Radio, concluding protracted round of negotiations in which its future sponsorship of these 15 quarter-hours per week hung in balance while sponsor pressed for lower time costs [B•T, Feb. 25, et seq.].

CBS radio officials said renewals are "a big shot in the arm for radio." They are effective July 1, when present contracts expire.

Terms of contracts, which in 1951 represented more than $3.5 million in gross billings, were not divulged. There had been reports that possible expansion of CBS Radio's "transition period" rate to encompass one or all of these shows had been considered, but neither CBS Radio nor P&G officials would comment Friday after contracts were signed.

"Transition" rate applies to stations broadcasting on current New York time from 6-6:30 p.m. and to Pacific coast stations 10-10:30 p.m. and amounts to two-thirds of nighttime rate.

It was understood that P&G is considering reduction in talent costs in programming the periods involved, as means of reducing overall expenditures. Programs now are Lowell Thomas 6:45-7 p.m.; *The Beulah Show*, 7-7:15 p.m., and *The Tide Show*, 7:15-7:30 p.m., all Monday through Friday. Agency on Lowell Thomas is Compton Adv.; on *Beulah*, Dancer-Fitzgerald-Sample, and on *Tide Show*, Benton & Bowles.

CANADIAN NEGOTIATIONS GO SMOOTHLY

MEETING of FCC officials with Canadian Broadcasting Corp. executives in Chicago last week resulted in no major upheavals in proposed U.S. northern border TV allocations, it was learned Friday. It was understood that negotiations worked out final arrangements and agreed to recommend them to respective governments. Official announcements of agreement are not expected to be issued until after FCC final TV report comes out (scheduled for April 14). The U.S.-Canada allocations will be noted as temporary pending official confirmation, in the final report, it is understood. Some reassignments recommended by U.S. broadcasters in comments filed during "hearings" last 1951 quarter were accepted by Canadians, it was learned, but others were not (e.g., proposal to move VHF channel from Windsor to Detroit was opposed by Canadians).

Meanwhile, FCC prepared to meet this week to decide method of processing applications following 90-day waiting period after final report is issued. So far it still looks as if frequency-by-frequency method will be chosen.

MINORITY APPEAL PROGRAMS PRAISED

NEED for additional programs with minority appeal was underscored by Louis N. Brockway, retiring president, American Assn. of Advertising Agencies, told spring meeting at Greenbrier Hotel, White Sulphur Springs, W. Va. (early story, page 25).

Mr. Brockway, also executive vice president, Young & Rubicam, stressed necessity for enlarging this kind of programming, though, he added, pattern of TV, like that of radio, is quite properly built around commercially attractive programs.

"Our association with the industry," he said, "makes it a part of our responsibility to the future of television to cooperate in working out plans to make public service shows possible."

LEVENSON WINS

CHARGES brought against CBS-TV network and Irving Mansfield, producer of *The Sam Levenson Show*, by Society for Prevention of Cruelty to Children dismissed Friday by mid-Manhattan court Judge Charles Murphy after he had seen film of disputed Feb. 17 program. Judge ruled no criminal intent in employment of three children, aged 14, 9 and 7, who, although appearing with parents, had been denied work permits on technicality of New York laws.

STUART MACHARRIE DIES

STUART A. MACHARRIE salesman for Everett-McKinney, New York, until ill health forced his retirement last August, died Thursday in New York. He was 45. In radio sales since 1935, Mr. Macharrie had been associated with WSRR Stamford, WJZ New York, WLW Cincinnati's New York office and WDOK Cleveland before joining Everett-McKinney. He is survived by his wife, Isabella, his mother and a brother, Lindsay, radio-TV production manager of Calkins & Holden, Carlock, McClinton & Smith, New York.

In this Issue—

Broadcasters came away from NARTB's highly attended 30th convention at the Conrad Hilton Hotel, Chicago, with renewed faith in the broadcast media and a feeling of stronger unity. Outshoot of actions taken was the new Radio Affiliates, successor to the all-industry Affiliates Committee *(Page 23)*. And Broadcast Advertising Bureau is on its own *(Page 27)*. A highlight at the convention was FCC Chairman Paul A. Walker's prediction that the TV freeze has another two weeks to go which brought a comment from Sen. Ed Johnson that he would hold Mr. Walker to that promise *(Page 76, 88)*. There were the usual exhibits by heavy and light equipment manufacturers interest whetted by impending thaw *(Page 48, 52)*.

While NARTB delegates were busy assessing the future of their business, the American Assn. of Advertising Agencies meeting at Greenbrier Hotel, White Sulphur Springs, W. Va., saw TV as a non-stop growing medium and thrashed through multi-ways in getting the best use out of it for the moneys spent. And the agency executives found to their surprise there's more to radio than ever before. *Page 25.*

There's something new added to NBC:—A new director of its National Spot Sales, Thomas McFadden, of KNBH (TV) Hollywood *(Page 29)* and out at Chicago, a new affiliates group, known as NBC-TV Affiliates Assn. struck out on its own *(Page 78)*.

Today marks the anniversary of long distance television *Page 82.* But there was increased activity in Washington, D. C., on the question of height—in antenna towers. For the latest on this, and an editorial, see *Page 77.*

Former FCC Chairman Wayne Coy, now a telecaster himself, warned a group of New York educators that their greatest lift to the broadcast arts would be to help improve and develop private broadcasting. *Page 89.*

A master global TV plan to span North Atlantic Treaty countries is gaining adherents. *Page 80.*

AB-PT Inc. wants no part of Paramount Pictures Inc.'s anti-trust violation burden, it was revealed at FCC hearings. *Page 109.*

On Capitol Hill, a House threat to investigate radio-TV programming was caught in the bud. *Page 28.*

Upcoming

April 8: ABC annual stockholders meeting, RCA Bldg., New York.
April 16: "Brand Names Day" conference, Waldorf-Astoria, New York.
April 16: BAB Sales Clinic, Los Angeles.
April 17-20: Ohio State U. Institute for Education by Radio-Television, Deshler-Wallick Hotel, Columbus, Ohio.

(Other Upcomings page 36)

Closed Circuit

(Continued from page 5)

affiliates over double-commercials in new Joy program. CBS affiliates were complaining over sale of five-minute segments, viewed as impinging upon spot time.

ABANDON any hope that FCC's AM processing line is going to move any faster than it has in past six months. Resignation of one engineer reduces technicians on line to two, but recent replacement restores roster to mere three! As of March 15, FCC had 206 applications on processing line, 100 in pending files (daytime skywave mostly), 200 in various stages of completion (in hearing status, awaiting initial and final decisions, court actions, etc.). About 30 other applications were also in pending files awaiting answers to FCC inquiries or at the request of applicants. Monthly average of completed applications: February 17, January 21, December 7, November 16, September 34.

WHILE DETAILS are highly secret it's known many convention exhibitors especially in equipment field, kept their pens hot last week drawing up contract proposals. Inquiries too, at all-time record, as potential telecasters learned facts of post-thaw life.

LOOK for FCC to call general hearing in near future to determine whether functional music operations of FM stations are broadcasting or non-broadcasting. Commission will ask for suggestions for rules if "beep" operations are considered non-broadcast. Hearing will be along lines of movie anti-trust hearings held in 1950 which resulted in Commission decision to determine each situation on a case-by-case basis.

THERE's plan afoot at International Information Administration to decentralize New York headquarter operations of Voice of America and seek "lend lease" broadcast agreements with foreign countries. Goal is more foreign program originations, with VOA buying time on domestic stations. Difficulties arise in nations where Communist Party influence is strong. Incidentially, IIA is shopping around for top level radio executive to head up Voice New York setup.

POWERFUL RCA TUBE

RCA TUBE department, Harrison, N. J., has announced its most powerful VHF power tetrode transmitting tube (RCA-6166), a forced-air-cooled "10 kw" type equipped with a thoriated-tungsten filament which, RCA explained requires less power and has greater electron-emission efficiency and longer life expectancy. Tube "is rated for operation up to 220 mc and can deliver a synchronizing-level power output of 12 kw in broad-band TV service at 216 mc," company said.

WHIL FREQUENCY

MOVE of WHIL Medford, Mass., from 1540 kc to 1430 kc was authorized by FCC Friday. WMEX Boston (on 1510 kc) claimed that 25 mv/m contours of stations overlapped and therefore were against regulations (see earlier story on page 62). WMEX appeal to U. S. Court of Appeals for injunction against FCC for not revoking WHIL program test authority was scheduled to be argued April 25, but FCC action now makes that moot—unless another station finds that its 25 mv/m contour overlaps with WHIL's new frequency. WHIL continues with 250 w, daytime.

For you, the whole industry...

A. C. Nielsen Company announces the most exhaustive survey of Radio and TV audience circulation ever made:

NIELSEN COVERAGE SERVICE

A giant measurement of the weekly day and night audience coverage of radio and TV stations and networks

Ever since the last BMB report, the industry has urgently needed a comprehensive study of the true dimensions of station and network coverage.

Now, such a study has been launched. Using the meticulous accuracy that is a rigid policy of the world's largest marketing research firm, Nielsen Coverage Service will fill that pressing need...and then some!

To give stations and networks* the most comprehensive, up-to-date audience circulation data, NCS will report on *the size of weekly audiences... their composition... cumulative monthly audiences... homes reached per minute... out-of-home listening and viewing... home and automobile set ownership.*

Complete, accurate and timely, NCS Reports will be the definitive answer to your coverage measurement problems. Just as so many leading networks, advertisers and agencies have long depended on Nielsen services for factual data, so can you. Call your nearest Nielsen representative for more details.

**NBC has already subscribed.*

"They never missed an issue!

"Just look at that mess!

"That's what a fire, a few axes and a couple tons of water can do to a place. But you've got to give Editor Grimes and the boys a lot of credit . . . *they didn't miss an edition,* fire or no fire.

"They're over in their new home now . . . *still* printing the news, telling the truth and fighting for the people's rights like they've been doing for the last forty-two years.

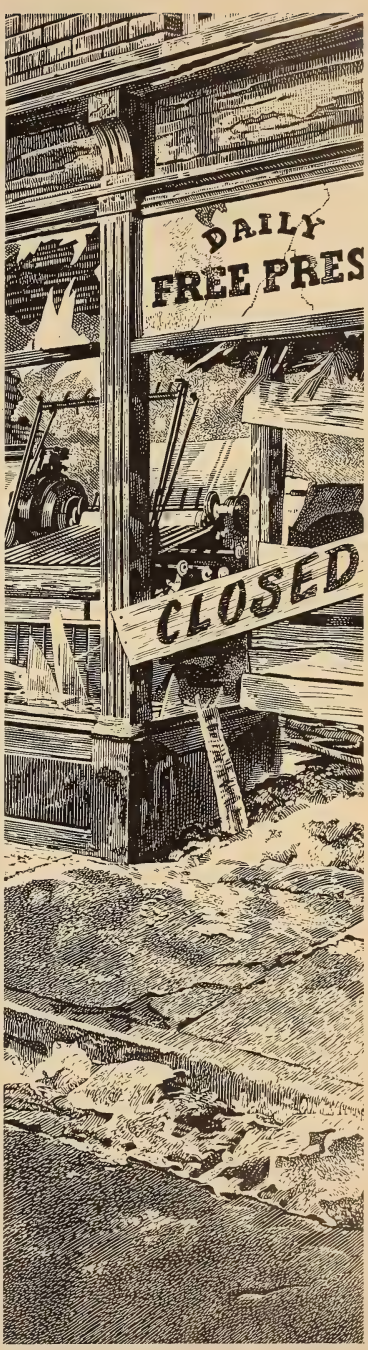
"Y'know, when I look at that boarded-up door, the broken windows and the 'closed' sign, it reminds me of how newspapers in some other countries get closed down . . . *for keeps* . . . by governments that hate the idea of free press . . . that can't take criticism . . . that don't believe in free speech.

"Well, that's what happens when government of, by and for the people becomes government of, by and for the *government!* It's 'Goodbye, Freedom' then . . . and with it go Free Worship, Free Elections, Free Enterprise . . . all those Freedoms that make you glad you're a citizen of *this* country instead of a socialistic or communistic one.

"Praise the Lord, we're still a free people over here. We can still choose our own churches, our own friends, our own jobs (like mine at Republic) and our own political parties. We can praise our government for wise decisions or criticize it for reckless spending of taxpayers' hard-earned dollars . . . without fear of secret police or concentration camps.

"But . . . let's not get careless about it. After all, the people in those dictator-plagued countries used to enjoy a lot of these Freedoms. Unfortunately, some of them got careless and handed over their rights, one by one, to governments which promised to *'take care of them.'*

"Me . . . I'll take my Freedoms with no 'hand-out' strings attached. How about *you,* Friend?"



REPUBLIC STEEL

Republic Building • Cleveland 1, Ohio

Republic BECAME strong in a strong and free America. Republic can REMAIN strong only in an America that remains strong and free . . . an America whose people, farms, homes and businesses are all enriched by the chemist's magic. *And, through the Chemical Industry, Republic serves America.* Many tons of carbon, alloy and, especially, stainless steels . . . much of it from Republic's mills . . . are needed each year for chemical vats, work tables, acid tanks, centrifuges, ventilation ducts, autoclaves, tubing and countless other types of steel equipment by which steel, through chemistry, helps tap Nature's untold wealth of better living for all America.

WRC audience surveys mean something more than passive listeners. Daily and Sunday "circulation" is also measured in terms of results over the counter for advertisers.

Morning, noon and night, Washington area people tune to the continuing editions of WRC-NBC. Combined total listening goes well over nine digits . . . a tremendous audience for your commercial message.

The entire WRC schedule represents a range of programming to fit any sales requirement.

feature of the week

INTERPRETATIVE commercials as well as interpretative reporting of news events have built an enviable record for Paul Bolton, news editor of KTBC Austin, Tex., and won him a state publice office, to boot.

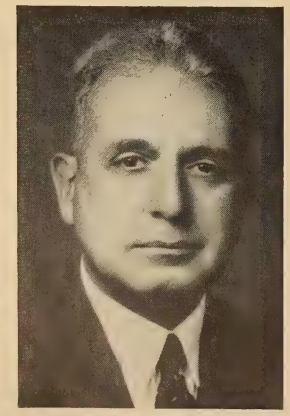
KTBC, CBS affiliate in the Texas capital, feels that it has a "surefire" selling formula in the technique developed by Mr. Bolton three years ago.

Mr. Bolton concocted the formula for Austin's T. H. Williams Co., one of Central Texas' largest women's fashion stores. Results have been so successful that Williams' radio budget is now spent almost exclusively on Mr. Bolton's 7:30 a. m. newscast, aired five times weekly.

By his own admission, Mr. Bolton did not know shantung from chamois skin. However, years of serving as head of newspaper wire service bureaus at the State Capitol had forged a reporter's approach. So instead of simply reading ad copy, he decided to use "reporter's approach" on commercials.

He interviewed Williams' salesgirls, buyers and executives to get the "story" behind each advertising feature. And, in the reportorial tradition, he quoted each authority for his ad statements.

With this technique, Mr. Bolton now covers the full field of feminine fashion—from perfume to foundation garments. His commercials make it clear that he is delivering a first-hand report on Williams' offering, just as he delivers a first-hand report on interpreting local news.



Mr. Bolton joined KTBC 10 years ago. He pioneered local "beat" coverage of Austin's news sources for radio, and today an estimated 80% of KTBC's local newscasts is the product of his personal legwork.

When first making newscasts, Mr. Bolton decided to include a regular interpretative feature on local and state issues. In these "explanation" segments, he gave listeners the "a-b-c's" on how tax rates were calculated and on school problems.

His broadcasts over KTBC about public school problems resulted in his being elected—without a campaign—to represent a 10-county central Texas district on the State Board of Education.

strictly business

GEORGE OLIVA

A MAN WHO is "not just interested in producing good advertising, but more intrested in what good advertising produces" is George Oliva of the National Biscuit Co., New York.

Another belief is that a good advertising man should know *all* media, so that each advertising form "can pull its own load and so that all media, together, do a complete job."

Mr. Oliva's evaluation of radio in these terms is obvious: National Biscuit will spend $2 million on radio broadcasting this year.

The executive is one of those successful careerists who did not have to travel to New York. He was born there in 1891. Mr. Oliva started work young and finished his education by attending night high school after he had taken his first job. That first job was as an office boy with National Biscuit Co., and, except for overseas service as a machine gunner in World War I, he has been there since.

His early work with National Biscuit was clerical, but in 1908 he transferred to the advertising department where, as he explains it, he had a few ideas and let his boss know about them. The result was that his boss, Alfred C. Mace, soon turned all promotional responsibilities over to the young man.

"He was glad to get rid of them," the quiet Mr. Oliva observes today.

National Biscuit, one of the big-

C. MURRAY CRUMMINS, WNEW New York, to Erwin, Wasey & Co., same city, as radio-TV writer-producer.

on all accounts

RICHARD I. CLARK, radio and television timebuyer for the San Francisco office of Brisacher, Wheeler & Staff, has an ambition which is shared by many men in his position: "To find a media rep that admits newspapers and magazines are still being read."

The business responsibilities of Mr. Clark's job call for the recommendation and actual purchase of all radio and television time for San Francisco as well as western media recommendations for the New York office of Brisacher, Wheeler. For such a position, he has the advantage of advertising experience on both coasts.

He was born in 1917 in Westchester, N. Y., and his education was split evenly between Champlain College, Plattsburg, N. Y., and the College of the Pacific, Stockton, Calif. His interest in advertising began at Champlain when he worked during recess periods in the merchandising department of Young & Rubicam, New York, and for a short while in the media department of Pedlar & Ryan there.

Mr. Clark's career was interrupted by 3½ years of service with the Army medical service. He had two years of overseas service in North Africa, Italy and Okinawa.

In April 1950, he joined the staff of Brisacher, Wheeler as the Pict Sweet "Telephone Quiz Man," then moved to the checking department. A year later he became director of research and space buyer for the organization. While in the media department he became assistant to the head space buyer. His next appointment was to the radio and television department.

"The deciding factor as to media selection ultimately remains in the individual market problem and in the nature of the client's product," Mr. Clark said. "However, we have found that radio and television have become increasingly more important. For that reason, we feel that the radio-TV department of this agency will expand with the growth of these media."

Mr. CLARK

Among the successful campaigns with which Mr. Clark has been associated are: Rainier beer (1951), the Van Camp Sea Food Co., Pabco floor coverings and the Contadina tomato paste, said to be the largest campaign of its kind in the country.

Mr. Clark is not married and lives in San Francisco. He is a good skier and when the snow is hard on the nearby Sierra slopes, it's not difficult to guess where he is. He is the son of Stanley I. Clark, vice president of Sterling Drug Co., New York, one of the heaviest radio and TV buyers in the country.

Coffee Sales at All-Time High For Fulton Lewis Sponsor

For the past twenty-five years at the Woods Brothers Coffee Company, Roanoke, Va., they have been roasting, blending, packing and selling coffee. And, since using radio for the last two years, sales are at an all-time high.

"We have been well repaid in sponsoring Fulton Lewis, Jr. on Station WROV," says Mr. Harold Woods, Sr., manager of the firm. "We feel that it is one of the outstanding programs on the air."

The Fulton Lewis, Jr. program, with a ready-made audience and the prestige of the largest national network, is available for sale to local advertisers in individual cities at low, pro-rated talent cost. Currently sponsored on more than 370 stations by 623 advertisers (including 16 food companies), Fulton Lewis, Jr. offers a proved and tested means of reaching customers and prospects. Since there are more than 500 MBS stations, there may be an opening in your locality. Check your local Mutual outlet — or the Cooperative Program Department, **Mutual Broadcasting System,** 1440 Broadway, New York City 18, or Tribune Tower, Chicago 11.

E. L. SCKENRODE Co., L. A. (factory representative for Sherkleen dry rug shampoo), appoints Cleveland-Collins Adv., Hollywood. TV is being used.

It's not a big story, but a long one. It began in Dallas at a little restaurant on Akard Street. The year was 1933. A salesman for Radio Station WFAA who often had lunch at the B & B Cafe was paying his check. From behind the counter, Pappa Lucas, the owner, said, "Al, I want you to be my agency! In here too many fellas come to sell me advertising—I wanta be able to tell them 'See Al, he's my agency!' If you do it for me, I buy some time on your radio station."

From that conversation evolved one one-minute radio spot a week over WFAA-820. Every week since then, for 19 years, Lucas' B & B Cafe has advertised over WFAA-820. Today Pappa Lucas has three one-minute spots each week—and a full house of customers 24 hours a day.

"You be my agency, Al..."

...and the first chapter of a success story was written

It's not a big story, but a long one. And there have been many just like it written during the thirty years WFAA-820 has been broadcasting... all of them ending on the same note of success.

The Radio Southwest story makes interesting reading, too. That's the name given WFAA-820's primary coverage area—116,000 square miles of Texas, Oklahoma, and Arkansas, including the two big metropolitan centers of Dallas and Fort Worth. With the power of 50,000 watts, WFAA-820 reaches out into 1,143,500 high-income radio homes, and sells your product to Southwesterners with over $7 billion to spend.

Begin your own success story today—over Radio Southwest—WFAA-820, Dallas!

Out on Bond

EDITOR:

Last week we were approached by [name deleted] in connection with a promotional scheme entitled "Bond a Week Club" . . .

After thorough setting up the machinery for the "Bond a Week Club" promotion and making sure that neither our advertisers nor listeners could be hurt, we authorized Mr. ——— and a crew of his salesmen to go ahead and sell the "Bond a Week Club" in our area.

Imagine our chagrin when after securing some 17 accounts, our checkback showed that Mr. ——— had offered as inducement for sales, not the plan previously worked out, but practically all of the time on the radio station. Immediately upon learning the true state of Mr. ———'s promotion we tried to contact this gentleman, only to find that he had disappeared for parts unknown.

Since then, we have found that he had collected cash payments which have not been turned over to us, making it necessary for us to turn the matter over to the authorities. Sheriff Bill Eddins of Winkler County holds a felony warrant for his arrest and will extradite should he be apprehended . . .

We feel it is our duty to inform our fellow broadcasters of this man's activities. . . .

Victor King
Station Manager
KERB Kermit, Tex.

Helpful Offer

EDITOR:

I noticed in . . . BROADCASTING • TELECASTING that the networks are planning a big "Get Out the Vote" campaign this year. WLOW has started the same kind of drive here.

I have written letters . . . to all the announced Presidential candidates, together with a "Get Out the Vote" announcement, with a request that they record the announcement for broadcast here in the Tidewater area. I have heard from them and they all think it a great idea. They will make the records as soon as time permits.

The announcements urge the people to use their American privilege of the right to vote . . . regardless of their party preference.

When the records are cut by these distinguished people, WLOW will be happy to send copies to all stations requesting them. The announcements to be recorded do not mention any particular section of the country.

I believe these discs, with other discs on the subject recorded by local civic leaders, will make quite an impression on the "lazy" voters of this nation.

Bob Drepperd
Program Director
WLOW Norfolk, Va.

Another Man's Poison

EDITOR:

I have received several calls from radio stations wanting to know whether d-Con and Dianol are the same company. They are not of the same company. They are entirely two different corporations in different parts of the country. Mr. Barnett Friedenberg is the account executive on the Dianol account and has nothing whatsoever to do with the d-Con account. Therefore we are calling your attention to the fact. Please correct the impression that people may have from reading the article [B•T, March 24].

H. A. Friedenberg
President
Marfree Advertising Corp.
New York City

[EDITOR'S NOTE: Nowhere in the story was it said that d-Con and Dianol were the same companies, but B•T is glad to publish Mr. Friedenberg's request for further emphasis.]

VOL. 42, No. 14 APRIL 7, 1952

RADIO-TV UNITY AFFIRMED

At 30th NARTB Convention

By J. FRANK BEATTY

RADIO and television broadcasters took stock of their advertising and program resources last week at the annual NARTB Convention and drew up plans to live together in the coming period of TV expansion.

Though it was the first no-crisis convention in many years, with few of the usual feuds, an all-time record was set in attendance at meetings.

The Chicago convention of 1952 took few unexpected actions that are likely to change the framework of radio and television to any considerable extent. Rather it was a "think session" and a consolidation of facilities in preparation for the media battle ahead.

Broadcasters acted to solidify their position in the media field by strengthening their two sales weapons — Broadcast Advertising Bureau and the new Radio Affiliates that grew out of the affiliates committee.

Telecasters, soon-to-be-telecasters and hope-to-be telecasters used their convention days and nights to advantage, learning the tricks of this new and fast-blooming advertising art from their brother broadcasters who already are adding pictures to their sound services.

Developments Denote Strength

The association itself emerged from the Chicago meeting as a stronger organization, having the support of a heavy share of the television industry. The achievement of bringing TV stations into the association during the past year and developing association unity was credited to Harold E. Fellows, who assumed the presidency last June.

These are the main developments of convention week:

● Groundwork was laid for station association structure.

● Industry lined up to put on a "Get-Out-The-Vote" campaign.

● New TV board of directors elected.

● Quick TV thaw and opening of UHF band promised by FCC Chairman Paul A. Walker.

● Panicky fears about sound broadcasting's future largely dispelled.

● Facilities set up to keep sound broadcasting strong.

● FM stations will expand promotion campaign.

● Association will fight to protect right to report legislative and judicial proceedings by microphone and camera.

* * *

PLAQUE, commemorating founding of NAB 30 years ago presented at NARTB Tuesday luncheon to William S. Hedges, NBC vice president (right) by President Justin Miller. Mr. Hedges recalls the association's organization in his booklet, *In the Beginning* [B•T, March 31].

● Affiliates association formed by NBC-TV station group to protect own interests.

● Record interest shown in TV equipment and Engineering Conference.

Many of the projects that received industry support last week will require board action. Others can be put into operation quickly by NARTB's President Fellows. Radio and television boards are not expected to meet before late spring or early summer.

There were a few partially "forgotten men" that received minimum attention. These included:

● TV code, in which little interest was shown because it is only a month old.

● Sports broadcasts—telecast rights, and there are troubles aplenty in this field.

● Research apathy, with the convention sidetracking a resolution though the new Radio Affiliates called for a frontal attack on this deep-rooted and serious media problem. The late Broadcast Audience Measurement Inc. was quietly interred.

Interest ran high in the newly-formed Radio Affiliates. Paul W. Morency, WTIC Hartford, chairman of the All-Industry Affiliates Committee, hastily formed a year ago in the panicky moments of network rate cutting, agreed to serve temporarily as head of Radio Affiliates during the organizational days. His services during the past year drew an ovation from broadcasters.

BAB, too, captured substantial support from delegates as it set out on its own, completely independent from NARTB. The BAB Sales Roundup Monday afternoon drew some 1,500 broadcasters. It was open to all stations. The Roundup was staged with elaborate trappings and used spectacular production tricks to point up the practical selling material.

NARTB and BAB both emerged strong, from a membership stand-

(Continued on page 70)

AFFILIATES COMMITTEE

Continuance Voted

By RUFUS CRATER

VOTING without exception to perpetuate their radio-wide Affiliates Committee, some 200 representatives of affiliated stations last week reaffirmed their faith in their medium, went on record against off-card sales, and called upon networks to help "re-establish the essential dignity, prestige and stability of network radio."

Acting on the recommendation of the 13-man committee set up to meet the crisis precipitated by network rate cuts a year before, the affiliates, meeting Monday in Chicago, also proposed the creation—via BAB's research committee—of an industry-wide group to pass on the "acceptability" of radio research.

Paul W. Morency of WTIC Hartford, who has headed the Affiliates Committee during the past year, won a long ovation with his report on committee activities to date. He expressed a wish to be relieved of the committee chairmanship in order to concentrate on WTIC affairs, but agreed to serve for "30 to 60 days" while a successor is being chosen.

"There is no doubt that the coming year will be a critical one in the history of radio," Mr. Morency declared in his report, calling upon all affiliates to "examine their operations critically and carefully" and to give support to the activities of both NARTB and BAB.

By unanimous action, the affiliates endorsed the four resolutions offered by the committee:

• Petitioned the networks to do nothing that "might in any respect modify the pattern of network radio or the basic arrangements between networks and their affiliates," without first discussing the move and the reasons for it with affiliates.

• Denounced off-card deals and acceptance of advertiser pressures for reductions in rates, calling upon stations individually to protect their own cards and to "use such methods of persuasion as seem most desirable" to get other broadcasters to do so, too.

• Recommended that the BAB Research Committee take steps toward "formation of a committee composed of representatives of affiliated stations, independent stations, station representatives, networks, advertisers and advertising agencies to pass on the acceptability of any research to be undertaken to insure acceptability on the part of all interested parties. . . ."

• Commended NARTB and BAB, and urged affiliates to "support both of these associations financially and through constructive help in committees and through a united industry front."

The affiliates left it to the present 13-man committee to devise the method of perpetuating the organization, suggesting only that it prepare "a simple constitution and by-laws." Any idea that it should be a one-year organization was affirmatively rejected: When Paul H. Goldman, KNOE Monroe, La., proposed from the floor that the committee be continued and used the term "for a year," the time limitation was deleted.

The committee consists of Mr. Morency; Edgar Kobak, WTWA

NEWS INTERNSHIP
Would Expand Project

EXPANDED program of practical training in radio journalism for college teachers through summer service at broadcast stations was voted March 30 by the Council on Radio Journalism, which met during the NARTB Chicago convention.

Plans for summer internships for teachers in broadcast stations were approved by the council, comprising National Assn. of Radio & Journalism Broadcasters and American Society of Schools and Departments of Journalism.

Basket Mosse, Northwestern U., council chairman, said two-score applications for internships have been received from teachers. The council program gives teachers employment at broadcast stations, which bear the costs.

Hugh Terry, KLZ Denver, said the plan benefits both broadcasters and teachers, qualifying these teachers to train young people for the profession of radio journalism. The council plans to include TV stations in the program.

Mitchell V. Charnley, journalism professor, U. of Minnesota, reported to the council on needs and prospects in education for TV news techniques.

Attending the meeting were Prof. Charnley; Mr. Terry; Robert K. Richards, NARTB public affairs director and council secretary-treasurer; Edward Breen, KVFD Ft. Dodge, Iowa; Donald Brown, U. of Illinois; Sig Mickelson, CBS; Jim Bormann, WCCO Minneapolis, president, National Assn. of Radio News Directors; Arthur Barnes, U. of Iowa. Absent were Wilton Cobb, WMAZ Macon, Ga.; Paul Wagner, Ohio State U., and Floyd Baskette, U. of Colorado.

Miss Truman Signs

MARGARET TRUMAN will make nine guests appearances on NBC radio and TV shows during the 1952-53 season under a contract renewed last week, NBC reported. James Davidson, Miss Truman's personal manager, and Charles C. Barry, NBC vice president in charge of radio programs, negotiated the new contract, financial details of which were not disclosed.

30TH YEAR
Fellows Asks Member Support Against Industry's Shacklers

SUPPORT of the 30-year-old NARTB for common protection against those who would shackle the industry with legislative restraints and economic burdens was advocated by President Harold E. Fellows at a luncheon marking the association's anniversary.

The ceremony was held Tuesday during the NARTB Chicago convention. William S. Hedges, NBC vice president and one of the association's founders, was presented a plaque in honor of his participation in the event. Presentation was made by Judge Justin Miller, NARTB board chairman.

Judge Miller introduced Mr. Fellows, paying a tribute to his record of achievement in less than a year —a period in which television has been integrated into the association.

President Fellows recalled the five reasons behind formation of NAB three decades ago and said they apply in the same form today. The reasons, he said, were:

To oppose unseemly demands for music licensing fees.

To encourage development of an orderly system of licensing stations.

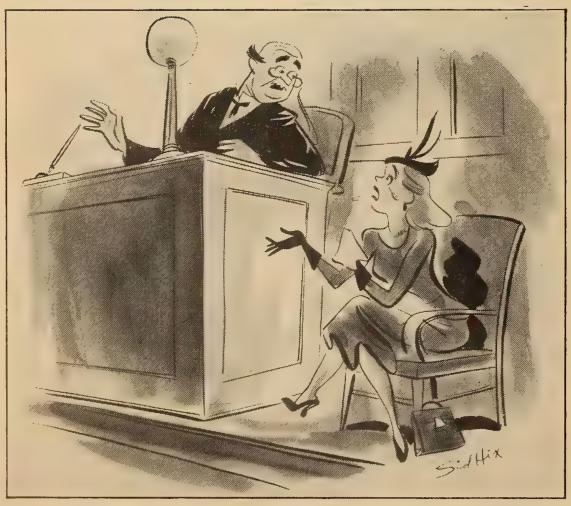
To resist through unified action any unfair or burdensome legislation.

To offset unfair public criticism and to seek public approval.

To do something about advertising to guarantee a healthy growth of the industry.

NARTB's history has been marked by three major periods of growth, Mr. Fellows said—founding to Pearl Harbor; wartime operation and reorganization period with FM, TV and granting of many new outlets. Now a fourth stage is here, he said, calling it a stage of unity. Dismissing worries over survival, he suggested there was no reason for worry because of a simple fact, "This association is essential; it is not expendable."

Industry forces produced by the association are Broadcast Music Inc., 1939; Broadcast Measurement Bureau, 1944, and Broadcast Advertising Bureau, 1949, Mr. Fellows recalled, with BMI and BAB still operating as healthy institutions.



With NARTB having about half of AM stations a higher ratio of FM and over 80% of TV stations, President Fellows said the financial position also is stronger. He said pressure of regulatory and legislative problems requires sound financing and support so the association can do its normal job without special appeals for help.

In the struggle of broadcasting and television stations for survival in the 50-cent dollar era, he pointed out that the expense surge is rising faster than income. "We must correct that situation in radio," he went on, "and we must never let it happen in television." Taxes, too, are creeping upward around the nation and broadcasters must resist together these local government levies.

The final menace, he added, is reduction of "the margin of profit in radio and television to such risk limits that there will be no compelling reason to stay in business. No person can stand alone in meeting this difficulty; we have learned the hard way that independent action establishes precedents jeopardizing each of us."

Mr. Fellows referred to rising costs of equipment and said broadcasters must make their own decisions after careful study and exchange of opinions. As to legislation, he referred to 86 bills in Congress that directly affect the industry and called it "a continuing battle." He commended work of the state associations.

In concluding he called on broadcasters, as custodians of a "great, living instrument of good for mankind, something that belongs to the people," to protect this "immensely precious" property.

Drawn for BROADCASTING • TELECASTING by Sid Hix

"No, it wasn't another woman, your honor. It was all those NARTB, BAB, BMI, state and district conventions."

Free in '53

FREE trip to the 1953 NARTB convention, to be held in Los Angeles was won at last week's convention by John W. Boler, president and general manager of KCJB Minot and president of KSJB Jamestown, N. D. As holder of the right coupon, Mr. Boler will be the guest of the Southern California Broadcasters Assn., which passed out brochures and coupons to all registered NARTB members at the Chicago convention.

AAAA MEET

Analyzes Radio-TV at White Sulphur Springs

By EDWIN H. JAMES

TELEVISION—how to produce it, how to measure it, how to pay for it—occupied a major part of the annual meeting of the American Assn. of Advertising Agencies last week.

One whole afternoon of the April 3-5 meetings held at the Greenbrier Hotel, White Sulphur Springs, W. Va., was set aside for discussion of TV. When the subject of television research came up, radio got into the talk too.

Whereas a year ago, the AAAA might easily have dismissed radio as something about which everybody knew all there was to know, last week agency research experts said there was an appalling lack of facts about it.

This change in advertiser-agency attitude was also noted earlier this week by Paul W. Morency, chairman of the all-radio Affiliates Committee, in Chicago (see story page 23).

Need for Research Dominates

As at the convention of the Assn. of National Advertisers last month [B•T, March 24], the topic that dominated media discussion at the AAAA meeting was the need for better research for all media and the expressed hope that the revived Advertising Research Foundation would be the instrument to accomplish that objective.

TV costs also figured prominently in the AAAA speeches.

Television will be advertising's No. 1 medium, but not if its costs rise beyond a guarantee of reasonable return, J. Hugh E. Davis, vice president and director, Foote, Cone & Belding, said during the Thursday afternoon session.

"We know only too well that $5 a foot for rent for a Frigidaire showroom at Fordham Road and Grand Concourse in the Bronx is a very fair price," said Mr. Davis.

"And we also know that five times that price, or $25, is impossibly out of line . . . there just aren't enough prospects who might be sold to make the $25 rent pay off."

So it is with television, said Mr. Davis.

A lot of people are worrying about the TV rent going up. But will it go beyond reach? Mr. Davis thinks not.

The reason that TV costs will be kept in line with TV advertising returns is that agencies and advertisers will not permit costs to rise that high.

"We are the buyers," said Mr. Davis, "and, as always, it is the buyer who ultimately sets the price."

He said that even when the freeze is lifted and many new stations take the air, TV rents will not go too high because, though the total bill for true national coverage may be higher, the cost per thousand will not.

"Sure," he said, "we may pay some very high prices. Maybe $5 million annually may be the time and talent bill for a half-hour weekly of night time. But we are not going to pay that price unless we get our money back and a good profit besides."

Obviously, said Mr. Davis, big-time television could be afforded only by the big advertisers. The way TV will be used, he thought, was this:

"If you are already in the big-time—that is, if you have a mass consumed product that is a leader —you will be using television in a big-time manner, just as many of your clients are now doing. If not, you will compete with your low budget in low-cost television or in other media with less coverage and less impact. . . .

"But if you do have something to offer, you can speak and even pass them (the leaders) by starting small and growing to where you, too, are in big-time. . . .

"So if you have a superior product, it is the same old story. You will go from small space to large space and a bigger and bigger sales volume. You will also go from none or small-time television to big-time television. And if your product is still better than the competition, you will be out in front."

TV Must "Get Sales"

Now if TV costs begin to go beyond even the big money that the leaders can afford, advertisers will have to pull out. If enough do, the costs will be brought down.

"You and I are not going to let the rent go too high," said Mr. Davis. "If it (TV) gets us the increased sales that we need to justify its great cost, then we will pay the price and use it.

"If it does not, the answer is simple. We won't use it."

TV networks may very well emerge from the developmental period in far different form from that of radio networks which until comparatively recently, used live programming almost exclusively, N. Neil Reagan, vice president of McCann-Erickson, Hollywood, told the AAAA.

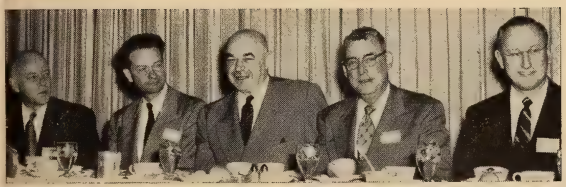
Film, he said, will make the difference.

Though he cautioned that he was not predicting that live programming was in its death throes, Mr. Reagan advanced a number of reasons why, for many shows, film is up to live performance.

"Experience has shown," he said, "that by and large a national advertiser can do a better job of tailor-making his coverage by spot buying . . . this of course means filming his show."

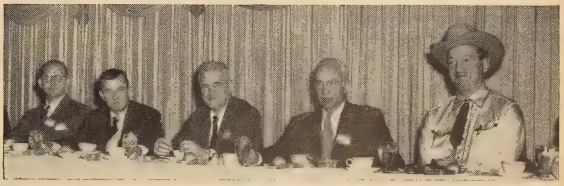
Of as much importance, film also has these advantages. . . . "Low cost once second and third runs have amortized production expenditures; high quality in attaining effects not possible in live production; ease of handling for the client and agency who are freed from fear of fluffs, and shortage of live studios."

Hollywood's production facilities are huge, Mr. Reagan pointed out, and are being expanded. Additionally, "Hollywood is a beehive of activity in the field of technical development relating to television," he said.



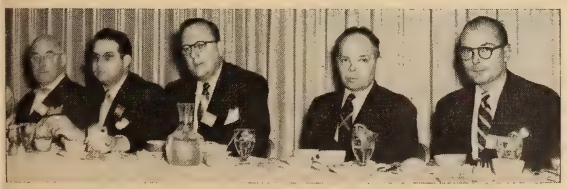
Mr. Reagan reported the development of a new film camera "that bids well to cause a stir in the field of television commercials," one which keeps both foreground and background in sharp focus.

Developed by Ralph Hogue, who invented the camera used in "Citizen Kane," the Orson Welles movie that was noted for its depths of focus, the new camera has produced sample TV commercials which Mr. Reagan said illustrated its unusual qualities by showing a close-up of detail of a ring held almost up to the lens while persons across the street in the background were in sharp focus.

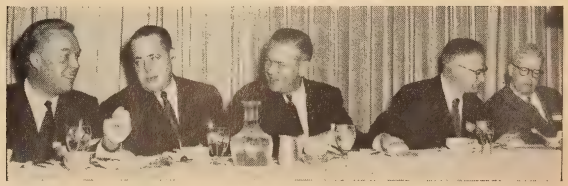


Aside from technical advantages,

(Continued on page 86)



Head Table at NARTB's 30th Anniversary Luncheon Included These Four Groups:



William Fay, WHAM Rochester; Orrin Towner, WHAS Louisville; Harry Bannister, WWJ-TV Detroit, soon to join NBC; Campbell Arnoux, WTAR Norfolk, Va.; E. M. Johnson, MBS.

Goar Mestre, CMQ Havana; Frank White, MBS; Paul Raibourn, KTLA (TV) Los Angeles; William B. Quarton, WMT Cedar Rapids, Iowa; William B. Ryan, BAB.

Raymond Guy, NBC; W. D. Rogers Jr., KEYL (TV) San Antonio; A. James Ebel, WMBD Peoria, Ill.; James C. McNary, engineering consultant; Richard M. Fairbanks, WIBC Indianapolis.

Chris J. Witting, DuMont TV Network; James D. Shouse, WLW Cincinnati; Harold E. Fellows, NARTB; Judge Justin Miller, NARTB; Henry H. Fowler, National Production Authority.

RESOLUTIONS

NARTB Endorses Get-The-Vote Plan

THREE-FOLD campaign to bring out the largest vote in history was endorsed last week by NARTB at its Chicago convention in a series of resolutions. An all-industry committee will be named to develop the project.

Another resolution adopted by the convention at the Wednesday luncheon called on broadcasters to oppose legislative proposals to restrict radio and TV coverage of legislative hearings (see TV debate story page 99).

All resolutions were adopted without opposition but a proposal to set up an industry yardstick of audience measurement was sidetracked after Campbell Arnoux, WTAR Norfolk, Va., moved it be referred to the board of directors. This motion was approved.

The vote-stimulating plan, originally credited to Joe Wilkins, KFBB Great Falls, Mont., who started the idea several years ago in the Montana legislature, has these three objectives:

To promote a national registration month in all states and urge all potential voters to be properly registered.

To support and take the lead in a "Get Out the Vote" campaign prior to and on election day.

To urge the members of the U. S. Congress to pass legislation now pending providing for a national election day half-holiday as an important adjunct to full voting by the people.

Behind the movement is the need "for full and informed participation by the citizens of this country this year."

Resistance to Discrimination

Strong appeal for industry action to meet the menace of radio-TV discrimination by legislative, bar and other groups was made in the resolution calling for resistance of such steps. It was pointed out that New York recently banned broadcasting of proceedings where witnesses are subpoenaed and similar prohibitions are likely to be proposed elsewhere.

This marks an "undesirable trend," it was stated, amounting to "a repudiation of those firmly established principles of the law of evidence recognized ever since the days of the Star Chamber restated by Blackstone and amplified in the present day texts of Wigmore, that the best guarantee of veracity on the part of witnesses is the presence of an informed public."

People have a right to know about the operations of their government, the resolution continued, and both radio and TV have an inherent right to equal and fair treatment in performing the news-gathering function "with the accompanying right to disseminate such information to the public through their established techniques of communication."

The proposed resolution on research said widespread confusion has come out of varying techniques, with emphasis on ratings often detrimental to best interests of both advertisers and broadcasters.

In an increasingly competitive advertising sales market, it was stated, it is necessary to present accurate information on total circulation, universally accepted, similar to information and analyses offered by other advertising media.

The fact that radio is advertising's "lowest-priced mass advertising medium and that the television consumer impact is of proportions unequaled by that of any other advertising medium" was emphasized in the proposed resolution. The proposal was rejected.

Other Resolutions

Other resolutions lauded FCC Chairman Paul A. Walker for his Wednesday luncheon speech and voiced gratitude to Vice Chairman Rosel Hyde and Commissioners George Sterling and Robert Bartley for appearing at the convention.

President Harold E. Fellows was praised for his administration since taking over NARTB's management last June. The convention committee, headed by James D. Shouse, WLW Cincinnati, was given a vote of thanks for its arrangements.

Resolution of respect to the memory of former Sen. Wallace White Jr., who died last Monday, was adopted (see story, page 30).

Other resolutions expressed appreciation of BMI's composers contest, clinics and other services as well as Foreman M. Lebold and the Library of Congress for their courtesy in providing documents for the Freedom Hall display during the convention; thanked NPA officers for their participation in the convention and Col. Ed Kirby for the Armed Forces information booth; approved the Voice of Democracy contest and extended thanks to Dwight Clark, Fort Collins, Col., one of the four national winners and a speaker at the Wednesday Luncheon.

Full confidence in Broadcast Advertising Bureau was voiced and support pledged to the sales agency in its independent status. NARTB was commended for its cooperation with Radio-Television Mfrs. Assn. in promoting FM tuners for TV sets. Manufacturers were urged to turn out auto sets capable of receiving FM.

National associations participating in development of audiences for United Nations radio programs were thanked by NARTB. The organizations are coordinated by Dorothy Lewis, UN radio official.

The Conrad Hilton Hotel was thanked for its convention arrangements.

Prospective television station operators were cautioned by veterans at the NARTB convention last week to make absolutely sure that they have as much floor space as possible, and to figure that their operating costs will depend on the type of program service they want to provide.

Small stations were advised, for the most part, to start conservatively, with programming at least five to seven days a week but perhaps for only a few hours a day, and to resist any inclinations to "go expensive."

The TV "confession" panel was supervised by Harry Bannister, WWJ-AM-TV Detroit, who confirmed that effective April 14 he will "take over station relations" at NBC[B•T March 31, 24], and consisted of Walter Compton, WTTG (TV) Washington; Walter J. Damm, WTMJ-TV Milwaukee; Thad Holt, WAFM (TV) Birmingham, Ala.; Harold V. Hough, WBAP-TV Fort Worth; Gaines Kelley, WFMY (TV) Greensboro, N. C.; Klaus Landsberg, KTLA (TV) Los Angeles; Robert Lemon, WTTV (TV) Bloomington, Ind.; Glenn Marshall, WMBR-TV Jacksonville, Fla., and Lee B. Wailes, Fort Industry Co.

The session was on a question-and-answer basis, after a brief introduction by Mr. Bannister.

In answer to a query, Mr. Wailes expressed belief that, by and large, AM experience by TV employes is often very helpful. But others, particularly Mr. Hough, felt that while radio experience is helpful in "routine" TV jobs, often it is easier to train beginners in TV than radio "oldtimers." This view appeared to be shared by Mr. Holt and others.

Mr. Marshall advanced the estimate that a station can be operated at a cost of $1,000 per employe per month, an estimate that coincided with those of other panel members including Mr. Kelley, who emphasized that station operators should not be "deluded" into thinking that they had to hire "prima donnas." At WFMY (TV), he said, some of the best employes were secured through general advertisements.

Mr. Lemon voiced the belief that a station can be operated for around $20,000 a month, while Mr. Landsberg noted that the question of costs and number of employes depend upon the type of programming which is undertaken. He also felt that in many cases radio-experienced personnel help comparatively little in TV.

Local Events More Interesting

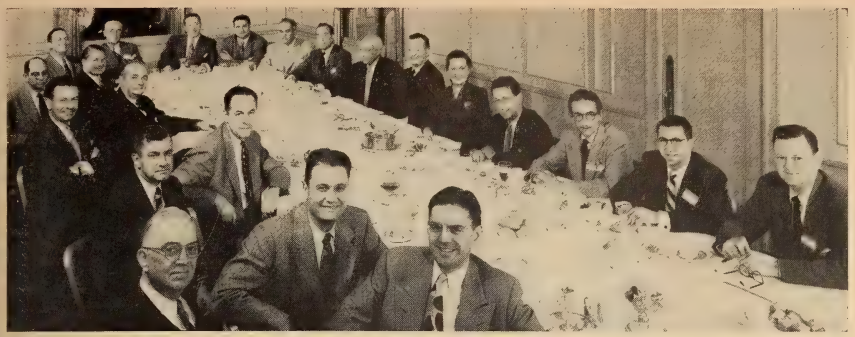
On programming, he was confident that independents can compete successfully with network affiliates.

Mr. Damm cautioned prospective telecasters to "stay all on one floor," with the back entrance level with the ground—to move out of the downtown area, and, as most other panel members insisted, to have as much storage space as possible.

He also advised that separate contracts be written, in every case, for (1) time, and (2) all other station services.

Mr. Hough especially insisted upon stations making sure that they had adequate space, asserting that his station spent $2.4 million and discovered it still didn't have space enough.

On the source of income, Mr. Damm said WTMJ-TV's last year came 12½% from the network.



Somewhat differently, Mr. Kelley said WFMY (TV)'s came approximately one-third from network, one-third from national spot and one-third from local and regional business.

When Mr. Damm reported, in answer to a question, that WTMJ's local radio sales were holding even this year with last year's while national spot was down 16% and network business down 22%, Mr. Bannister noted that WTMJ is in

(Continued on page 108)

PANEL on management problems at NARTB convention was moderated by Chet Thomas (back row, center), KXOK St. Louis. Panel members were (seated, l to r): Richard P. Doherty, NARTB; Leslie C. Johnson, WHBF Rock Island, Ill.; Simon R. Goldman, WJTN Jamestown, N. Y. Back row, William B. McGrath, WHDH Boston; Mr. Thomas, and Robert T. Mason, WMRN Marion, Ohio.

BAB BOARD of directors met before opening of NARTB convention. At meeting were (vertical row at left, front to back): Martin Campbell, WFAA Dallas; Frank White, MBS; H. Preston Peters, Free & Peters; Lou Hausman, CBS; Clockwise around table: George Hatch, KALL Salt Lake City; Gene Cagle, president, Texas State Network; Joseph E. Baudino, Westinghouse Radio Stations Inc.; Donald W. Thornburgh, WCAU Philadelphia; T. C. Streibert, WOR New York; John F. Patt, Goodwill Stations; Ed Kobak, retiring BAB chairman; Charles C. Caley, WMBD Peoria, Ill., new chairman; Kenyon Brown, KWFT Wichita Falls, Tex.; Allen Woodall, WDAK Columbus, Ga.; Robert D. Swezey, WDSU New Orleans; William B. Quarton, WMT Cedar Rapids; William B. Ryan, BAB president; Gene Higgins, BAB; Adrian Murphy, CBS; William McGrath, WHDH Boston; Simon R. Goldman, WJTN Jamestown, N. Y.; John F. Meagher, KYSM Mankato, Minn.

BAB 'ROUNDUP'

Severs Tie With NARTB

BROADCAST Advertising Bureau marked its final divorce from NARTB March 31 with a "Sales Roundup" that occupied the first afternoon of the NARTB Chicago convention. The roundup was conducted with a Wild West theme, during which over 1,500 broadcasters filled the main ballroom of the Conrad Hilton Hotel.

The program's purpose was three-fold: Sales assistance, BAB membership solicitation and entertainment. Edgar Kobak, retiring BAB board chairman, presided beneath an Indian-style feathered head-dress. Charles C. Caley, WMBD Peoria, made his first appearance as new board chairman. William B. Ryan, BAB president, and other staff members took part in the program.

Preceding the BAB roundup, James D. Shouse, WLW Cincinnati, retiring NARTB director-at-large and chairman of the 1952 NARTB convention committee, formally opened the convention. Mr. Shouse welcomed members of NARTB and BAB as well as non-members invited to appear on the program. He spoke on behalf of the full committee, which included George B. Storer, Fort Industry stations; Harold Wheelahan, WSMB New Orleans, and Merrill Lindsay, WSOY Decatur, Ill. NARTB President Harold E. Fellows greeted delegates.

In opening the BAB program Mr. Kobak called for more and better radio salesmanship. He called on stations to stick to their rate cards. The rate-splitting idea was pointed up by Jerry Amster, national indoor archery champion, who shot a series of arrows up the middle of a rate card supplied by David Kimble, promotion manager of WBBM Chicago. Mr. Kimble later acted as volunteer stooge for Doc Conrad, whip cracker.

Mr. Caley, garbed in 20-gallon hat, said BAB has $468,000 in sight for the next fiscal year compared to $345,000 in BAB's first year, but declared this was "only a good start." He said $700,000 will be needed by Oct. 1 and compared the budget to the million-dollar-plus budget of the newspaper Bureau of Advertising. "Radio is not nearly big enough," he said.

BAB President Ryan was introduced as "Bronco Bill Ryan" by Bob Atcher, WLS Chicago artist, who served as m.c. Mr. Ryan diagnoses radio's troubles as "only a head cold" and not "cancer," as implied by competitive media. He noted a marked change in attitude toward broadcasting, calling it "the renaissance of radio advertising." Radio is growing 50 times as fast every year as newspapers, he claimed, referring to the continued public demand for sets.

Mr. Ryan urged broadcasters to hold the line on rates, even if sacrifices are required. Forty-two BAB clinics will be held this year, starting on the West Coast in April, he said.

A feature of the afternoon was a drawing for door prize. Winner was D. L. Craddock, WLOE Leaksville, N. C. who was presented a live calf.

Main sales feature was a series of short success stories narrated by a group of "three-minute men." They were Bert Banks, WTBC Tuscaloosa, Ala.; William J. Edwards, WKNX Saginaw, Mich.; Simon Goldman, WJTN Jamestown, N. Y.; Julian F. Haas, KARK Little Rock, Ark.; George J. Higgins, KMBC Kansas City; Winslow Leighton, WSNY Schenectady, N. Y.; Daniel C. Park, WIRE Indianapolis; S. John Schile, KUTA Salt Lake City; C. H. Simpson, WKBI St. Marys, Pa.; Don Sullivan, WNAX Yankton, S. D.; Elmer Wayne, WJR Detroit.

BAB sales services were spectacularly described by Kevin B. Sweeney, vice president, and John F. Hardesty, director of local promotion. Blow-ups around the balcony were described as Jerry Amster shot arrows, timed with a spotlight. The young archer showed uncanny precision in the case of a blowup showing photos of a girl with bare midriff and another depicting a bull.

Mr. Ryan wound up the program with a review of BAB's plans for the coming year. Ben Gimbel, WIP Philadelphia, dramatized the membership drive by agreeng to join BAB if the archer could hit an application blank from the back of the room. The aim was good and WIP became a member.

BAB held several private meetings during the convention, including a breakfast for state membership chairman and a board meeting at which Chairman Caley assumed office.

At its March 30 meeting the BAB board, besides electing Mr. Caley chairman, took the following actions:

(a) Established a special membership category to enable universities and colleges to have access to BAB's sales aids for instructional purposes.

(b) Approved plans for promotional services and membership solicitation during the fiscal year beginning April 1, 1952.

(c) Voiced appreciation to Mr. Kobak and commended him for his service as board chairman.

(d) Appointed BAB auditor William L. Morison as assistant secretary-treasurer of the corporation.

(e) Confirmed appointment to board of Adrian Murphy, president, CBS Radio, as replacement for Howard S. Meighan.

(f) Commended BAB president William B. Ryan and his staff for the

(Continued on page 67)

RAPID-FIRE narration of BAB services, aided by a sharp-shooting archer, was given by Jack Hardesty (l), local sales promotion director, and Kevin Sweeney, vice pres.

COWBOY DECOR prevailed at BAB sales roundup during convention. Fifty-gallon hat toters are (l to r): William B. Ryan, BAB president; Harold E. Fellows, carefully adjusting tie, NARTB president; Charles C. Caley, WMBD Peoria, Ill., new BAB board chairman, and Big Chief Edgar Kobak, retiring board chairman and an honorary member of the Pawnee tribe.

"NOW you're on your own," said Bob Atcher, WLS Chicago, and m. c. at BAB's sales roundup, to D. L. Craddock, WLOE Leaksville, N. C., winner of this calf as door prize.

CONVENTIONS

Media Coverage Plans Outlined

PLANS for the most elaborate broadcast coverage of political conventions in history were described last Tuesday afternoon at a panel session of the NARTB convention.

Chairmen of the radio and television pool committees and radio-television directors of the Democratic and Republican National Committees explained the intricate system that will be used to take the conventions to a potential television audience of 60 million and a radio audience even larger.

Sig Mickelson, CBS-TV, chairman of the television network pool committee, said that the pool would use seven cameras in the convention hall. Cost of the pool: About $150,000 which will be shared proportionately among pool participants.

Those among the seven independent TV stations in the U.S. that want to cut in on the pool will have to pay their portion of the total pool maintenance costs plus whatever AT&T charges to feed their station from Chicago. It will also cost participating TV stations about $250 each for their share of the audio costs.

POLITICAL broadcasting was discussed by Tuesday afternoon panel consisting of (seated, l to r) William McAndrew, NBC, chairman of radio pool committee for 1952 political conventions; Sig Mickelson, CBS-TV, chairman of television pool committee; Clair R. McCollough, Steinman Stations, panel chairman; standing, Edward T. Ingle, radio-television director, Republican National Committee; Kenneth Fry, radio-television director, Democratic National Committee.

* * *

Pool to Operate System

William McAndrew, NBC, chairman of the radio network pool, said the pool would install and operate the central audio system of the convention, providing mikes serving the platform and each of the individual delegations. TV, of course, will use this same audio.

Mr. McAndrew reminded the audience that though there will be an estimated 17-odd million TV homes by convention time next July, another 27 million homes would be served only by radio.

Ben Cottone, general counsel of the FCC, a member of the audience, rose to ask Mr. Mickelson whether the pool would feed theatres in cities without TV stations but within access to AT&T coaxial cables carrying the convention programs.

"We are operating a pool to feed television stations," Mr. Mickelson said. "No other kinds of outlets are contemplated."

Kenneth Fry, radio-television director of the Democratic National Committee, reminded broadcasters that after candidates have been selected and the campaigns begun, there was a good chance for broadcasters to pick up political business.

He pointed out that while the national committee would be buying radio and TV time mostly on a national basis, either on networks or through national spot, local party organizations on the state or county levels would have funds of their own to spend. He advised broadcasters to begin now to sell parties in their own areas on the use of radio and TV.

Both Mr. Fry and Edward T. Ingle, radio-television director of the Republican National Committee, said the national committees would urge local groups to buy time on behalf of local campaigns.

Ralph W. Hardy, director of the NARTB government relations department, reviewed the status of the Horan bill (HR 7602) which has been reported out by the House Interstate & Foreign Commerce Committee and which would amend the political broadcast section of the Communications Act to give broadcasters protection against libel [B•T, March 31, 17].

"This is the first time we have had a really good chance to get something done about Section 315 (the political broadcast section)," said Mr. Hardy. "I hope every broadcaster will urge his Congressional delegation to act on this."

Bill May Become Law

Mr. Hardy said that it was quite possible for the bill to be pushed through into law before the political conventions.

Clair R. McCollough, Steinman stations, chairman of the panel, opened the session with a plea to broadcasters to cooperate in a vigorous campaign to get out the vote.

"That is one of the finest things this industry could do," he said. "I hope everybody will give it a full promotion."

Orange Market Test

FLORIDA Citrus Commission will use radio and newspaper campaign between April 7 and May 30 in Memphis and Louisville for special marketing test to determine whether consumer buying habits can be changed to buying oranges by the pound instead of by size and count. J. Walter Thompson Co., New York is agency.

'REVIEW' UNIT

Rep. Gathings Proposal Snagged

RUG WAS pulled from under a House "sleeper" last week which would have established a select, 15-man committee to probe radio-TV programming. At least temporarily, the proposal is in deep water with faint chances for swimming.

Turnabout on the resolution (H Res 520), introduced by Rep. E. C. Gathings (D-Ark.), came about at the close of the week.

These were the developments:

● House Interstate & Foreign Commerce Committee huddled on the resolution which had been approved by the House Rules Committee March 28 [B•T, March 31]. It had been placed on the House calendar with chances ripe for action this week and subsequent appointment of a select committee.

● However, Rep. Robert Crosser's (D-Ohio) Commerce group noted in a session with Rep. Gathings, the resolution's sponsor, that it had not been notified that the Rules committee was reporting out the measure. Members of the commerce unit pointed out that because of radio-TV subject matter in the resolution, the legislation rightfully came within purview of Rep. Crosser's committee and it should have been consulted.

● Rep. Gathings told BROADCASTING • TELECASTING that he was "delighted" with the Commerce group's concern. He has re-introduced a new resolution (H Res 596) that would set up the select committee to probe "immoral or otherwise offensive matter" in books, magazines and comic books. Thus, in effect, this resolution and another (H Res 597), introduced by Rep. Edward H. Rees (R-Kan.), who has been working with Rep. Gathings on the matter, would be a substitute proposal to probe printed matter only.

Will Ask Approval

● The Arkansas legislator now intends to ask the Rules committee to approve a resolution he introduced last summer which would have called upon the House Commerce Committee to do the investigating of radio-TV programs (H Res 278).

● Meanwhile, the Commerce group expects to go into the matter further. It may do so today (Monday).

It was said by a close informant that it was doubtful whether the majority on the Commerce committee would be inclined to favor such a probe of the broadcast media. Should the Rules committee consider the 1951 Gathings resolution it would have to sound out the Commerce group.

Rep. Gathings has told BROADCASTING • TELECASTING that he wanted a probe "for years."

OHIO RADIO EDITORS

Meet April 19 in Columbus

ANNUAL meeting of the Ohio Assn. of Radio News Editors will be held April 19 in Columbus' Deshler-Wallick Hotel.

Meeting is open to all radio and television news editors in Ohio, including non-members of OARNE. William Crooks, WFMJ Youngstown, OARNE president, has appointed Paul Wagner, WOSU Columbus, Ohio State U., to handle arrangements for the meeting. Those wishing to attend are asked to contact Mr. Wagner.

PORTLAND LICENSE SUIT

Stations Protest City Code

SEVERAL Portland, Ore., radio stations and individuals have filed a suit in circuit court contesting part of the constitutionality of the Portland license and business code. The contested section requires a $250 annual license fee for radio stations and $15 annual fees for radio advertising solicitors, plus a $1.40 levy on each $1,000 gross receipts by such businesses.

The stations, KGW KEX KOIN KPOJ KPAM KWJJ KXL KBKO, maintain the city is violating the U.S. Constitution in taxing the stations, which the plaintiffs claim are engaged exclusively in interstate commerce. New Mexico's tax on revenue from national advertising was upheld last year as constitutional by the Supreme Court, which held that an advertising contract between parties in different states is not interstate commerce.

MERCHANDISING

Results Count, Say Experts

MERCHANDISING as a vital step in the selling cycle, profitable to both station and sponsor, was urged upon broadcasters by four experts in the field during a special session at the NARTB Convention in Chicago last week.

"Every radio station which does a good merchandising job is a profitable station—profitable to the owners—and used with profit by the advertiser," G. Richard Shafto of WIS Columbia and WSPA Spartanburg, S. C., and WIST Charlotte, N. C., told the group.

Speakers in addition to Mr. Shafto, who presided, were Lester W. Lindow, WFDF Flint, Mich.; F. C. Sowell, WLAC Nashville; and Jack Zinselmeier, WLW and WLWT (TV) Cincinnati. Robert K. Richards, director of NARTB's public affairs department, presented Mr. Shafto.

"This is the era of selective network buying—selective spot buying—selective station profits, and selective station bankruptcy," Mr. Shafto asserted. "Your local advertiser and your regional advertiser want results—and they are going to evaluate your good station on what advertising results you produce, not on what advertising offers you make.

"The trend of station income is non-network. To bolster this income you should consider doing for local and regional advertisers the same merchandising practices that have made radio economical and profitable in the sale of soap, soup, and Wheaties."

'Must Stretch Efforts'

Asserting that "the product hasn't been sold until the consumer walks out of the store with it," he told the broadcasters that radio "must stretch its efforts farther to bridge the gap between the advertiser and the consumer—and in doing so, radio will profit more."

Mr. Lindow said WFDF regards merchandising, advertising and promotion as a necessary extension of sales activity.

He displayed examples of the station's work in this field, noting that they encompass direct mail, regular bulletins to the drug and grocery trades, window displays, display advertisements in trade and general papers, bus and car cards, courtesy announcements, surveys and market studies, and the checking of product sales and distribution for the advertiser.

Most of these, he noted, "cost very little in dollars."

He advised station men to acquaint themselves especially with the product categories which supply the majority of their revenues; to develop market data, and to make sure that their customers are aware of radio's values and know how to use it to the best advantage.

Mr. Sowell held that "it is the obligation of the medium which accepts [a sponsor's] advertising appropriation to do everything within reason to fulfill his expectation" that the advertising will produce sales. WLAC, he said, spends approximately 3% (not counting manpower) of the billings figure in merchandising and promoting the advertiser's products.

WLAC concentrates its promotion work primarily on (1) direct mail, mostly open-faced cards, with one or more mailings to 450 druggists and 650 grocers each week, and (2) use of radio itself, with plugs calling attention to specific programs, and on-the-scene broadcasts when clients open new stores, etc.

Keep Advertisers Informed

"It occurs to us," he observed, "that any event that will attract great crowds of people to a given location may rightly be considered of general public interest."

Mr. Sowell stressed the importance of keeping advertisers acquainted with merchandising and promotion activities in their behalf: "There's no profit in hiding your light under a bushel."

"The secret," he declared, "lies not in how *many* listen, but how well you sell those who *are* listening."

Cites WLW, WLWT (TV)

Mr. Zinselmeier reviewed the merchandising and promotion activities of WLW and WLWT, which have a staff of 26 assigned to this work.

"The management of the Crosley Broadcasting Corp. believes that radio and television should offer to a client, in addition to the best in facilities and talent, assistance in bringing the consumer and product together at the point of sale," he said.

WLW - WLWT merchandising field work, he explained, is handled by "trained personnel [who] make regular calls on the retail grocery, retail drug, wholesale grocer, wholesale drug, drug chains, and grocery chains in the major marketing centers in the four-state area covered by WLW [and] WLW-Television. These field men build displays in retail stores, counter, floor, shelf and window displays, featuring the products of the month as featured by the merchandising department of WLW and WLW-Television."

Other services among the 25 evolved in the 12 years since WLW's merchandising operations were started, he said, include:

Checks on in-stock position of products as found at the time of field representatives' calls; surveys of dealers with respect to their attitudes toward the products involved; mailings announcing special offers, promotions, or media tieins; publication of two merchandising newspapers a month (one to the drug trade, one to grocers); preparation of display material used by some 2,500 grocery and 1,000 drug stores each month; special promotions, as in "WLW Advertised Brands Week" (which brought a 26.5% gain in sales of the products involved); trade and general newspaper advertising; window displays; cab covers and car cards, and maintenance of a complete research department. Additionally, clients and their agencies are given detailed reports on each merchandising or promotional project in their behalf.

'Radio . . . More Secure'

In opening the panel discussion, Mr. Shafto reported that the subject originally had been "Rates—Is There a Formula?", an apparent reference to NBC's attempt to adjust the rates of its radio affiliates according to formula. But, he added:

"The leading advocate of applying the slide rule to radio rates declined to participate and excused himself by stating that discussion on rate formulas would only open up old wounds.

"Thereby died the last embers of that conflagration. Radio's house is much more secure. . . ."

HIX GREEN (seated l) of Hix Green Buick Co., Atlanta, signs year's contract for weekly sports show, *Bobby Dodd Reports*, on WGST Atlanta. Onlookers are Bobby Dodd (seated), Georgia Tech's head coach; John Fulton (standing l), station manager, and Don Vance, sales manager of Hix Green Buick.

NBC POSTS

McFadden Is Successor To James McConnell

APPOINTMENT of Thomas McFadden, general manager of NBC's KNBH (TV) Hollywood, to succeed James V. McConnell as director of NBC National Spot Sales was announced last Wednesday by James M. Gaines, vice president in charge of owned and operated stations.

Donald A. Norman, commercial manager of KNBH, is slated to succeed Mr. McFadden as general manager, it was understood.

Mr. McFadden

At the same time, NBC named James Cornell, formerly manager of research and sales promotion of CBS Radio Network Sales in Chicago, as manager of NBC radio network research. He succeeds Howard Gardner, transferred to NBC radio network sales as assistant manager of sales planning.

Carl Nielsen, West Coast radio-TV representative, NBC National Spot Sales, was named TV representative, and Heber Smith of the sales staff of KNBC San Francisco, was appointed to handle radio spot sales in that area.

Maurice E. McMurray, CBS-TV network salesman, and Thomas A. Wright Jr., vice president and radio-TV director of Dundes & Frank Inc., New York, join NBC-TV as salesmen.

Mr. McFadden, with NBC since 1934 when he joined the guide staff in New York, has been general manager of KNBH since April 1950. Before that time he was successively assistant manager and manager of WNBC and WNBT (TV) New York.

His first service with the network after leaving the guide staff was as a writer in the news room. By 1938 Mr. McFadden had become a newscaster. He joined the Navy on Pearl Harbor Day, 1941, as an ensign in military intelligence, resigned upon completion of his assignment and then enlisted in the Army as a private, taking pilot training.

Released in 1945 with rank of captain after flight service in the African and CBI theatres, Mr. McFadden returned to the NBC news staff. In April 1946 he was named director of news and special events for WNBC.

His appointment as National Spot Sales director is effective immediately.

Mr. McConnell, identified with NBC spot sales activities for approximately 20 years, resigned two weeks ago to accept a vice presidency with John Blair & Co., station representation firm, effective May 1 [B•T, March 31, 24].

Mr. McFadden's new role was announced in Chicago, where he, Mr. Gaines and other NBC executives were attending the NARTB convention.

Mr. Cornell, before joining CBS, served four years as manager of radio and TV research for Foote, Cone & Belding, Chicago, and a total of 11 years with WGN and WBBM in that city.

KXOB PURCHASED

By Randau and Corwin

SALE of KXOB Stockton, Calif., by Lincoln Dellar to a group headed by Clem J. Randau, New York, and Sherrill C. Corwin, Los Angeles, was consummated last week subject to FCC approval. Price, including net quick assets, will approximate $250,000.

Mr. Dellar, president of Valley Broadcasting Co., said Mr. Randau will be controlling owner and plans to return to California to reside in Stockton. He will take over operation of the station personally. Mr. Dellar also owns KXOA Sacramento, KXOC Chico and KDB Santa Barbara.

Mr. Randau is a former vice president of United Press, former business manager of the *Chicago Sun*, which included operations of the Marshall Field radio stations in Chicago, Cincinnati, Portland and Seattle. He is a minority stockholder in WNEW New York and, for the past year, has served as assistant administrator of the Federal Civil Defense Administration, headquartering in Washington.

Mr. Corwin is operator of motion picture theatres throughout California and is president of Corwin Theatre Corp., a vice president of Screen Assoc., producer of television films. He also is former vice president of the Theatre Owners of America and presently is a member of the group's executive committee.

KXOB, a Don Lee-Mutual outlet, was established in 1947 and operates on 1280 kc with 1 kw. Transaction was handled through Albert Zugsmith & Assoc., Culver City, Calif.

ARF SUBSCRIPTIONS

Total Now Reaches 123

SUBSCRIPTIONS from 18 more organizations to Advertising Research Foundation since the beginning of the year bring total participants to 123, B. B. Geyer, board chairman, announced last week.

New members — nine advertising agencies, five media concerns and four advertisers—include Barlow Adv., G. M. Basford Co., Biow Co., Harold Cabot & Co., Fuller & Smith & Ross, H. B. Humphrey-Alley & Richards, C. J. LaRoche & Co., Needham & Groham and O. S. Tyson & Co., all agencies. Also *Fortune*, *Life*, *National Geographic*, *Time* and *Today's Woman* signed. Advertiser-subscribers are John H. Breck Inc., Continental Oil Co., Pharmaco Inc. and U. S. Steel Corp.

Circus Promotion

RINGLING Bros., Barnum & Bailey circus on March 31 launched its annual saturation radio spot announcement campaign to lure one and all to the circus which started April 4 at Madison Square Garden in New York and runs through May 11. The circus named Blaine-Thompson, New York, to handle its advertising this year. Agency placed spots on the following New York radio stations: WNBC WCBS WJZ WOR WMGM WMCA WOV.

1877 Wallace H. White Jr. 1952

FORMER Sen. Wallace H. White Jr., 74, whose stamp on communications history is the FCC and the Communications Act under which it operates, died in his sleep last Monday at his home in Auburn, Me.

Sen. White, who had been seriously ill with a heart ailment for about a year, was co-author of the Radio Act of 1927 and a prominent figure in communications throughout his 32 year tenure in the House and Senate. A Maine Republican, he retired from the Senate four years ago.

Words of tribute were sounded in both the Senate where he had been majority leader and in the House where he had been an active member before being elected to the upper chamber.

Many Senators, recalling their association with Sen. White, included reference in their speeches to his ability in the radio legislative field.

President Truman said he was "saddened" by the death of Sen. White, describing him as "my old friend . . . with whom I served in the Senate for 10 years. He was a gentleman, a fine American citizen and a good public servant who made a great contribution to our country."

Senate Resolution

The Senate unanimously adopted a resolution expressing "profound sorrow and deep regret" for the death. Vice President Alben Barkley and Sen. Margaret Chase Smith (R-Me.), joined in the tribute on the floor of the Senate.

Senate Majority Leader Ernest W. McFarland (D-Ariz.), now chairman of the communications subcommittee of the Senate Interstate & Foreign Commerce Committee, noted:

. . . he was an expert on the subject of communications. He co-authored with me legislation which provided for the merger of the domestic communication companies. It was a pleasure to work with Wallace White. His advice and counsel were always valuable.

Sen. Owen Brewster (R-Me.) said:

The amazing development of radio in the last quarter of a century in America is due in no small measure to the wise provisions of legislation formulated and sponsored by Senator White.

His pre-eminence in both these fields was universally and uniquely recognized by his selection to head American delegations at international conferences even when he was in the minority—an almost unprecedented tribute not only to his knowledge, but also to his utter objectivity where the interests of his country were concerned.

Senate Interstate & Foreign Commerce Committee Chairman Ed C. Johnson (D-Col.) pointed to "the splendid qualities he possessed." His influence on the members of the Senate Commerce Committee, when he was chairman, Sen. Johnson continued, "cannot be adequately described. He ruled with a gentle hand, and yet he ruled well."

Sen. Henry Cabot Lodge Jr. (R-Mass.) joined with: "The work he did in the field of communications will stand throughout history as a very fine monument to his intellectual powers and to his sense of dedication to public duty."

Announcement of his death was given the Senate by his successor from Maine, Sen. Smith, who said he "could truly be characterized by service, training, and background as Mr. Senate."

Sen. White was graduated from Bowdoin College in 1899. He went to Washington to study law and financed his way through law school, working as assistant clerk to the Senate Commerce Committee which he was to head years later as chairman.

Radio Commission Establishment

It was with this committee as staff member in 1899 that Sen. White amassed the information and received his interest in the communications field. While a House member, Sen. White was primarily responsible for the drafting of the 1927 act which set up the old Federal Radio Commission to bring order out of chaos that had demoralized the broadcast industry when the control was invested in the Dept. of Commerce.

This radio law, which was co-authored by former Sen. Clarence Dill of the state of Washington, was basis of the Communications Act of 1934. Repeatedly, as a key member of the Senate Commerce Committee and later as its chairman, Sen. White urged revision of the act to keep pace with the progress and modernization of the broadcast arts.

Sen. White, who first entered Congress as a member of the House in 1917 and subsequently entered the Senate in 1931, sponsored the White-Wolverton bill in 1947 and its predecessor, the White-Wheeler bill of 1943. Both bills would have brought FCC functions up to date (some of these, as in the division of operations, are now in effect).

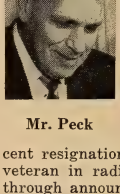
Essentially, the McFarland bill (S 658) of 1952 is a successor to the earlier White bills. Sen. McFarland, then third ranking minority member of the Senate Commerce Committee, said at the time of Sen. White's announced retirement in 1948, the following:

When communications matters are considered in succeeding Congresses, whether Republicans or Democrats are in control, the views and opinions of the Senator from Maine, as expressed in the bill authored and reported by him in this Congress, will be reflected in whatever legislation is finally enacted.

Sen. McFarland called his Maine colleague "the father of major communications legislative policy."

In the House Monday, Rep. Robert Hale (R-Me.) said: "Sen. White was . . . a great authority on patent law and radio communications. He served as a delegate to various international [communications] conferences, at Mexico City in 1924, at Paris in 1925, at Geneva in 1927, at Washington in the same year, at London in 1929, at Copenhagen in 1931, at Cairo in 1938." In the latter International Convention of Telecommunications at Cairo, he was chairman of the American delegation. At Copenhagen, he was chairman of the U. S. delegation to the International Technical Consulting Committee on Radio Communications.

Although the Senator also was an expert on shipping legislation, he was noted in the broadcast industry as the man on Capitol Hill who helped set up the principle of private operation of broadcasting facilities under federal regulation.



He was a grandson of Sen. William P. Frye of Maine, whose lengthy service in the upper chamber was legendary. He was born in Lewiston, Me., Aug. 6, 1877.

Sen. White is survived by his wife, Mrs. Nina Lumbard Lunn White; a son, Herbert; a sister, Mrs. Horace Stevens; five brothers, Harold, Thomas, Donald, John and William, and a stepson, Richard D. Lunn.

PECK TO WISN

Named Station Manager

APPOINTMENT of Harry D. Peck to the newly created post of station manager of WISN Milwaukee was announced Thursday by Gaston Grignon, vice president and general manager of the Hearst - owned CBS affiliate. The appointment is effective May 1.

Mr. Peck

Mr. Peck was vice president and manager of WDGY Minneapolis until his recent resignation. He is a 20-year veteran in radio, having come up through announcing, programming and sales ranks. A native of Kansas, he attended Kansas State and started in radio in 1932 in his home town, Abilene.

For the past 11 years, Mr. Peck has been identified with stations in Nebraska and, more recently, in Minneapolis. He is a former president of the Nebraska Broadcasters Assn. and was on the board of the Minnesota Broadcasters Assn.

WHO ACCLAIMED NATION'S BEST RADIO NEWS OPERATION IN 1951!

NATIONAL ASSOCIATION OF RADIO NEWS DIRECTORS MAKE AWARD AT ANNUAL CONVENTION IN CHICAGO

Shelley and Veteran Staff Praised

Des Moines, Iowa (Nov. 18)—This city's famous 50,000-watt Station WHO, has been awarded one of the broadcasting industry's most coveted prizes — the 1951 Distinguished Achievement Award for Radio News, sponsored by the National Association of Radio News Directors. The presentation was made on November 17 at the NARND's Annual Convention in Chicago.

In making the award, Baskett Mosse, chairman of the judges' committee, said **"...we are happy to announce tonight that radio station WHO, Des Moines, Iowa, was selected as the outstanding radio news operation in the United States for 1951. . . . The committee felt that special recognition should be given to News Director Jack Shelley and his very fine and veteran news staff".**

BEST EQUIPMENT, VETERAN STAFF, BIG BUDGET

The WHO News Bureau has an impressive physical plant: seven leased-wire machines; a portable battery-operated tape recorder; a telephone recorder; three short-wave monitors for state and city police and fire department broadcasts; a number of subscription services; and a library which includes several specialized news encyclopedia.

The seven leased-wire machines include two Associated Press, two United Press and three International News Service machines. **This is by far the greatest number of leased-wire machines servicing any radio station in this section of the country, and exceeds the leased-wire service available to many of the country's leading daily newspapers.** Only two of the seven machines are "radio" wires — the other five bring in detailed stories known as "press" wire service. Press wire service gives lengthy accounts and the three news services bring in three different versions of the big stories around the world. This necessitates constant boiling down, rewriting and sifting of details, playing up news of local interest — all tailored to fit a split-second time period.

NINE VETERAN REPORTERS EDIT AND BROADCAST NEWS

The WHO News Bureau is headed by veteran Jack Shelley, and includes eight other full-time men and a secretary. Eight of the men are college-trained reporters, rewriters and broadcasters, *all of whom are heard on the air.* The ninth man is a specialist in political reporting. The ten people on the staff represent a total of 85 years' experience with WHO. Five of the News Bureau staff have been with WHO ten or more years.

In addition to the regular full-time staff, the WHO News Bureau maintains a staff of 75 correspondents — or part-time reporters — throughout Iowa and in Southern Minnesota and Northern Missouri, heavy WHO listening areas.

TELEPHONE USED EXTENSIVELY

The WHO News Bureau uses the local and long-distance telephone extensively to supplement and verify the regular news services' coverage. Staff members check directly with peace officers and hospitals each morning to get accident reports and accident victims' conditions which may have changed since the late night news reports. In many instances, the leased-wire services do not clear this type of information until too late for a 7:30 a.m. — or even an 8:45 a.m. — newscast. Telephone checks also minimize the possibility of loss of news when events take place in remote areas, distant from a news service reporter.

STAFF WORKS TWO SHIFTS

The WHO News Bureau maintains a morning and a night shift. There is a certain amount of specialization within each shift in that one man may be assigned Washington and foreign news, another Iowa news, and a third miscellaneous human-interest stories. Whatever the assignment, the reporter stays on it for an indefinite period, building up a background for that specific job, and becoming a specialized reporter on that shift. Each shift writes its news copy especially for the men who will be airing it.

$100,000 ANNUAL BUDGET

To operate its award-winning News Bureau and to provide Iowa-Plus listeners with unexcelled news coverage, WHO spends more than $100,000 annually. This figure is believed to be one of the highest figures in the Nation.

PUBLIC SERVICE EXTRAS

In addition to its regular news services, the WHO News Bureau provides its listeners with a variety of public-service extras. These include free announcements regarding public and private meetings during periods of extreme weather conditions, up-to-the-minute reports on road and weather conditions and emergency calls on newscasts to locate families or members of families who are traveling or are visiting away from home, etc. The News Bureau has also developed a system whereby a copy of each newscast mentioning an Iowa serviceman is sent to the next of kin. This service has required the cooperation of local postmasters in many cases because of the lack of a street address or the name of the next of kin. **Management at WHO considers the public service aspect . . . the many extra "little things" that WHO does for its listening public . . . to be the difference between a routine news operation and one that is contributing to the welfare of the community. This — then — is the difference between a good news operation and the "Best Radio News Operation in the United States".**

BETTER NEWS — BETTER AUDIENCES

The leadership of WHO's News Service is only one of many reasons why WHO is *Iowa's greatest advertising value.* The 1951 Iowa Radio Audience Survey, accepted by leading advertisers and agencies as a completely authoritative analysis of listening habits in this state, shows that WHO is by far the "most-listened-to" station in Iowa. Write for your copy, or ask Free & Peters.

NPA ADVICE

Proper Scheduling Urged In Station Building

THOUGH National Production Authority rules now permit broadcasters to "self-rate" purchase orders for construction materials up to certain amounts without NPA permission, materials available through self-authorization probably will not, in many cases, be sufficient for construction of new TV stations.

This was the prospect held out to a record-size group of engineers attending the sixth annual NARTB Broadcast Engineering Conference in Chicago last week by J. Bernard Joseph, chief of the Broadcast and Communications Equipment Section, Electronic Division, of the NPA.

Self-authorization limits, Mr. Joseph noted, are 25 tons of steel, 2,000 pounds of copper and 1,000 pounds of aluminum per calendar quarter. While these are enough for most alteration or small construction jobs, he noted, the average TV tower requires 100 or more tons of steel.

He pointed out that normally construction takes from nine months to a year, and that if building a station can be scheduled so that steel usage will not exceed 25 tons per quarter, then it will not be necessary to go to NPA for permission to start the job.

Overall, he felt that many TV and radio construction jobs might, if properly scheduled, be completed without needing specific NPA authority.

Peak Attendance

Mr. Joseph spoke Monday on the opening day of a three-day series of technical sessions, held in conjunction with the NARTB Convention. Engineers' registration and attendance at the meetings was record-setting, with peak attendance estimated at 500.

The Monday sessions heard, in addition to Mr. Joseph, nine outstanding TV engineers present technical papers on TV studios, transmitters, antennas, cameras and projectors, while Tuesday morning meetings were concerned with AM, FM and audio—the only non-television sessions of the conference—and Tuesday afternoon was devoted to studies of TV lighting, broad-band transmission research, TV construction and operational economics, a 35 kw TV amplifier, and planning and installation of Argentina as first TV station.

The Wednesday conference featured additional technical papers on TV and symposia on UHF television and small TV operations. (For summaries of technical papers, see B•T, March 31.)

In a Tuesday speech, Robin Compton, associate of the George C. Davis firm of consulting radio-TV engineers, emphasized the "very large" technical costs of TV. Asserting that operating costs may be "fairly well defined" in relation to initial costs, he estimated that a $300,000 physical plant might expect operating costs between $200,000 and $240,000 the first year.

Rural or isolated operations (with at least one network feed) can expect the investment-to-operating cost relationship to approximate 2 or 2.5 to 1, he said, while metropolitan stations may anticipate a ratio of about 5 to 4.

Mr. Compton advised TV station planners to arrive at full understanding between engineering, management and programming personnel, recommended that adequate space be provided, and suggested that remodeling needs will probably arise after a station's first 90 to 120 days of operation.

TECHNICAL problems had their more pleasant side at NARTB engineering conference in Chicago. Caught between reading of technical papers were (l to r) Neal McNaughten, NARTB engineering director; Virginia R. Erwin; Harold E. Fellows, NARTB president; E. C. Page, consultant.

* * *

MATERIALS

Optimists Are Cautioned

EXPRESSIONS of caution designed to dilute the heady air of optimism over eased materials restrictions characterized the views of top government allocations officials last week.

These views were expounded by three key authorities as manufacturers continued a round of meetings with the National Production Authority. Within the past fortnight, discussions were held touching intimately on the welfare of AM-FM-TV receiver output, flow of component parts, future of color-casting equipment and the technical manpower shortage.

Warning Sounded

Notes of caution were sounded by Defense Production Administrator Manly Fleischmann, National Production Authority Administrator Henry Fowler and Charles E. Wilson, who resigned as defense mobilizer last Monday (see story page 72).

The consensus might best be summed up this way: the controlled materials plan is "over the hump" but "must travel a long road" before vital materials are decontrolled.

Radio-TV set manufacturers face no critical cutbacks and should be able to supply receiver demand and reach the industry's collective goal for 1952. The radio-TV station construction ban is "reasonably unfrozen," with prospect for approval of most applications "on a fairly regular scale," according to Mr. Fowler, who addressed the NARTB Convention in Chicago last week (see separate TV story).

Manufacturers have apprised NPA of the small receiving tube picture, the progress of a salvage drive for materials used in radio-TV loudspeaker magnets and the shortage of highly-skilled technical personnel. Still another field—transmitting and cathode ray tubes—will be explored in a session tomorrow (Tuesday).

With respect to the views of top officials:

Mr. Fleischmann told the American Management Assn. National Packing Exposition and Conference that a sudden deluge of materials "is not in the cards," and that expanding output will be offset by expanding military needs in the months ahead.

Mr. Fowler said there won't be any real improvement until the end of 1953 and noted a strike—such as threatened in the steel industry (April 9) "could plunge us into a period of scarcity worse than any we have known to date." Copper and nickel will remain scarce and under controls, he said. The outlook is "undeniably brighter than it was just a few short months ago," however, Mr. Fowler added.

Mr. Wilson, in his fifth and final report on mobilization, said that "in no case has the lack of materials . . . held up any military items"; military production is "beginning to roll"; the U. S. is two-thirds of the way toward peak production; all manpower requirements for the military and defense industry have been met.

Meeting Small Tube Demand

Small tube manufacturers told NPA authorities last Thursday that they are meeting all military and civilian demands. They estimated 1952 output at 310 million for small receiving tubes (video, amplifier systems, etc.) and 5.5 million for TV picture tubes. A trend toward electrostatic type-tubes also was reported.

Conference with set producers was called by NPA March 27 for the purpose of appraising the engineer scarcity problem in relation to the government's color TV manufacturing ban [B•T, March 31], and discussing materials outlook for monochrome sets during the last half of 1952.

Set-makers were advised of the quotas of steel, copper and alumi-

(Continued on page 85)

NARTB FLEA CIRCUS

Fourth Annual Scratch Held

FOURTH annual scratch of the NARTB Flea Circus, comprising those who have made district meeting tours, was held Tuesday during the NARTB Chicago convention. Neville Miller, Washington radio attorney, presided.

A feature of the scratch was unveiling of a flexibly-metered poem by Sydney M. Kaye, BMI. During the business session Robert J. Keller was named to study a proposed "flea classification" program. Dorothy Lewis, of United Nations Radio, was appointed chairman of the women's division in a move to strengthen that branch of the organization.

WPTR NEWSMAN

Elected to Congress

LEO W. O'BRIEN, news commentator at WPTR Albany, N. Y., has been elected to Congress from the 32d Congressional District to fill a vacancy caused by the death of Rep. William T. Byrne (D-N.Y.). He will continue his newscasts on WPTR from Washington, reporting by direct line.

Mr. O'Brien

Mr. O'Brien, winner of three national radio news commentary awards, has been heard on a nightly news program on the Albany station for two years. During this period, he and the station's news director, Howard W. Maschmeier, have captured a first place Sigma Delta Chi national news commentary award and two Ohio State first place awards for their radio reporting.

The new congressman has been bureau chief for INS in Albany and is a featured columnist for the *Albany Times Union, Syracuse Herald American* and other New York state newspapers.

SDX AWARDS

Monroe, Griffith, WMAQ Among Winners

SIGMA DELTA CHI, professional journalist fraternity, last week announced 1952 winners of its Distinguished Service Awards in American Journalism.

Awards were announced in 12 categories, among them radio reporting, radio news writing and public service in radio journalism. Winners were:

Jim Monroe, news director, KCMO Kansas City, Mo., radio reporting.

William E. Griffith Jr., KMBC Kansas City, Mo., radio news writing.

WMAQ-AM-FM Chicago, public service in radio journalism.

Mr. Monroe's "unusually speedy and comprehensive coverage last year of the worst flood in Kansas City's history was selected for the radio-television award," his citation reads. A graduate of Central College in Fayette, Mo., and holder of a master's degree from Northwestern U., Mr. Monroe joined KCMO in 1940.

The Kansas City flood also figured in the award to Mr. Griffith. "In his coverage of one of the great stories of 1951, . . . Mr. Griffith not only captured the dramatics of his story but also provided essential public information in time of emergency," according to his citation. Judges said his work "established new standards of excellence and maturity in the field of radio newswriting."

Born and schooled in Kansas City, Kan., Mr. Griffith holds a degree in journalism from the U. of Kansas. For 16 years he served successively as reporter and acting

Mr. Griffith

Mr. Monroe

city editor of the Kansas City *Kansan*. He began radio writing in 1935 at KCKN Kansas City, Kan., on a parttime basis. In 1944, he left the newspaper to be fulltime KCKN news editor. He joined KCMO in 1945.

WMAQ was honored for the news broadcasts on "narcotics in Chicago" and particularly for the program, *The Black Mark*, and other tape-recorded presentations by Len O'Connor.

Citation for this award reads, in part:

"Universal interest, timeliness, and effective dramatization of this program not only held the listener, but also imbued him with a strong desire to counter the problem by firm civic action.

"The stating of the case against narcotics, the manner of direct interview of witnesses and experts, and the offering of answers to the difficulty, were carefully handled and appropriately emphasized. The technical qualities of the program were excellent."

POLITICAL SHOWS

NBC Set May 1; CBS-TV Scoop

SPECIAL network program is scheduled by NBC when Presidential candidates Estes Kefauver, Robert Kerr, Harold Stassen and Earl Warren, with Paul Hoffman representing Gen. Dwight D. Eisenhower, jointly face the national convention of the League of Women Voters in Cincinnati May 1 at what may prove one of the most significant political meetings to be held before national party conventions this summer.

Another major event of the political year was delivered into American homes by CBS-TV exclusively Saturday, March 29, when President Truman issued his surprise withdrawal from candidacy during his address at the Jefferson-Jackson Day Dinner in Washington. Sunday papers, going to press with a previously released but incomplete copy of the speech, missed the news in early editions and were forced to bow to reporting by broadcast media.

Telenews Productions, New York film news service, shared in the scoop when it opened offices for work Sunday and, with special couriers, delivered coverage of the Truman statement for telecasts on local outlets Sunday evening and Monday morning.

POLITICAL LIBEL

Maryland Bill Is Signed

BILL safeguarding broadcasters and telecasters to some extent from suit as a result of remarks by political candidates was signed Tuesday by Gov. Theodore McKeldin of Maryland.

As finally enacted, the law provides about 80% of the protection asked by the Maryland-District of Columbia Broadcasters Assn., which sponsored the original bill. The proposed measure had passed both House and Senate and was on the governor's desk for signature just before the end of the legislative session when it was recalled by Sen. John Turnbull, Baltimore County. An amendment was inserted which drew protest from the broadcast association but since only a few hours were left in the session it was impossible to prevent a change.

Final version protects broadcasters against libel when a candidate libels his opponent. If the candidate libels others, the station can be held liable for compensatory but not punitive damages.

John E. Surrick, WFBR Baltimore, sponsored the original bill.

upcoming

April 8: ABC annual stockholders meeting, RCA Bldg., New York.

April 15-17: AIEE Southwest District meeting, Jefferson Hotel, St. Louis.

April 16: Brand Names Foundation's "Brand Names Day" conference, Waldorf-Astoria, New York.

April 16: BAB Sales Clinic, Los Angeles.

April 16-18: American College Public Relations Assn. 36th annual convention, Carter Hotel, Cleveland.

April 17-20: Ohio State U. Institute for Education by Radio-Television, 22d annual meeting, Deshler-Wallick Hotel, Columbus, Ohio.

April 19: Ohio Assn. of Radio News Editors, annual meeting, Deshler-Wallick Hotel, Columbus, Ohio.

April 19: Catholic Broadcasters Assn. midwestern regional meeting, Chicago.

April 19: Cincinnati section, Institute of Radio Engineers, Spring technical conference, Cincinnati.

April 20: Los Angeles Advertising Women Inc., in cooperation with Advertising Assn. of the West, 6th annual Frances Holmes achievement awards, Ambassador Hotel, Los Angeles.

'CHARTER SPONSOR' CLUB

Is Promotion for KBIG

INAUGURATION of a unique "charter sponsor" plan for advertisers, along lines of special charter memberships in founding of clubs, has been announced by John H. Poole, owner-manager of KBIG Avalon, Calif., new 5 kw station on 740 kc scheduled to start operating in early May.

Advertisers signing contracts in advance of May opening will buy on a special charter rate of approximately 15% below regular card rate which takes effect when station starts operating. Charter rates to be effective for the contract lifetime, up to a maximum of one year.

FCC TRIBUTE

Sen. White Memory Honored

FOLLOWING resolution on the death of former Senator Wallace H. White Jr. March 31 (see obituary on page 30) was adopted by the FCC April 3:

The Commission notes with deep regret the death on March 31, 1952 of former United States Senator Wallace H. White Jr. at his home in Auburn, Me.

As co-author of the Radio Act of 1927, Senator White exercised a profound influence on the legislative foundation of the American system of broadcasting.

At the time this act was being considered, chaos reigned on the airwaves. The utility of this great instrument of mass communications was being effectively frustrated.

Senator White on the basis of searching sympathetic study, played a leading role in determining the broad base for the regulation of broadcasting in the public interest. He planned and fought for the maximum freedom of the broadcaster consistent with the technical requirements of orderly radio transmission.

Although technological improvements have been made since 1927, his basic premise that broadcasting must operate in the public interest endures as a sound and final principle. It has met the test of the years and has not been found wanting.

The nation's far-flung flourishing system of broadcasting encompassing 3,000 aural stations is a living tribute to the foresight of the distinguished legislator.

Senator White also performed outstanding services to his nation as her representative at important international conferences on radio.

Be it resolved: That a copy of this expression of the Commission's sorrow on the death of Senator White be entered in the permanent minutes of the Commission, and that a copy be sent to his family.

Joins Shulton Inc.

MAXINE ROWLAND, head of copy department of Abbott Kimball Co., New York, to Shulton Inc., same city (Old Spice, Friendship Garden and Desert Flower toiletries), as advertising manager. Miss Rowland succeeds Elizabeth Shoemaker Shenkin, who has resigned to do freelance writing.

NETWORK GROSS

Levelling of Sales Dip Seen—PIB

NETWORK RADIO business seems to be levelling off after a consistent decline during the past year and more, according to February figures released last week by Publishers Information Bureau. Combined gross time sales of ABC, CBS, MBS and NBC radio networks for February, PIB reports, totaled $13,560,948, a decrease of only 9.3% from the $14,958,789 gross for the same month of 1951, compared with a drop of 11.3% for the combined network billings during the first two months of 1952 from the combined gross for that period of 1951. January-February 1952 total was $28,062,498; January-February 1951 total, $31,650,667.

Correcting its January totals [B•T, March 17], PIB reported that in the opening month of 1952 ABC had gross time sales of $3,301,479, CBS of $5,164,309, MBS of $1,678,409 and NBC of $4,357,353, with a combined gross for the four radio networks of $14,501,550.

Network-by-network breakdown for February and January-February, this year compared with last, shows:

	Feb. 1952	Feb. 1951	Jan.-Feb. 1952	Jan.-Feb. 1951
ABC	$ 3,177,970	$ 2,702,721	$ 6,479,449	$ 5,802,139
CBS	4,788,561	6,097,737	9,952,870	12,931,363
MBS	1,600,399	1,426,705	3,278,808	2,969,592
NBC	3,994,018	4,731,626	8,351,371	9,947,573
Total	$13,560,948	$14,958,789	$28,062,498	$31,650,667

We nominate for

THE ORDER of the BIG HEART

Jimmy Delmont of **WTCN**

The Case History:

This is the case history of Jimmy (5x5) Delmont of WTCN-Radio in the Minneapolis-St. Paul Market.

He belongs to that rare breed of men able . . . through a big heart . . . to submerge their own troubles and help others with theirs. The tools of his trade are: a telephone, a husky voice, a turntable, sympathy, and a sure touch in using it.

His mail . . . hundreds of letters and phone calls each week . . . comes from couples on the marital rocks, from working men and women who listen as they drive to and from work. He has proof of over 30 couples happily re-united through his off-the-air help.

How he does these things is Jimmy Delmont's secret. He doesn't moralize, and doesn't hang folks' troubles on a radio laundry line.

6000 members of his 5 o'clock Club tune him in on their car radios and drive home carefully because Jimmy Delmont asked them to.

One more example of radio personalities at WTCN who become part of the lives and loyalties of the folks who live here and who can sell your products to people who believe in them. In the case of Jimmy Delmont you don't sponsor *him. HE* sponsors *YOU!*

"They knew his bell, his voice: and so the friendship of a voice with many people was formed"

RADIO, TV—

PEOPLE'S OR BROADCASTER'S PROBLEM

Broadcasters have problems today which are an outgrowth of our rapidly growing technological advancements in the art of mass communication. Whether it was proper for the networks to alter their time charges on a nation-wide basis when the new art of television was available in only a relatively small area of the country is beside the point. The fact remains that the alteration of time charges by the networks has changed the value of all broadcasting, in the minds of advertisers and agencies, on a station by station and market by market basis across the whole country. In some cases this change has given the network, as the seller of station time, a decided advantage. All of the changes that will be made in broadcast rates have of course not been made as of this writing. The addition of more television transmitters, new techniques in the use of both TV and Radio, changes in coverage, changes in the size and prosperity of markets and of course, the "inventors mind," will ever be a challenge to any competitive system to alter rates in its efforts to give an advertiser "his money's worth."

The immediate problem is a need for some sort of balance between what a network charges for a broadcaster's time and what the broadcaster charges for that time. This would seem an easy problem from the great amount of analytical data broadcasters have used to sell their wares but the actual solution thus far reached has, for the moment, pleased no one. Controversy has arisen from the advertiser and agency pertaining to "listenership" figures. These figures, outgrowth of acceptability because of use by broadcasters for years, are, on the other hand, contested by some broadcasters because of newer figures now available on "store traffic" created by advertising. These new advertising-created "store traffic" figures have been most complimentary to radio in its comparison with the printed word or with TV.

All of the above is purely the business side of broadcasting.

From the people's point of view, what comes out of their loudspeakers is the determining factor.

In Radio broadcasting the networks have been the primary source of fine programs. It has been the network programs, in the main, which induced people to buy radios. True, the local stations gave many local services of news, weather, civic activities, etc., but it has been the great events of the world plus the top entertainment made available by network radio, which put radios in homes and made those radios be used hour after hour. In effect, it was the QUALITY of the service which made American Radio different from all other.

At the close of major hostilities in 1945 the American Radio picture got its first change by a great influx of new Radio transmitters. Then came Television. The added competition of more than double the "time on the air" of radio programs plus "time on the air" of television programs has "watered" the radio "listening" market. The sparkle and ring of quality shows has been diluted by the great quantity of lesser shows on the air waves. Lower charges for time and announcements with constantly rising operational costs have made for a quantity instead of a quality handling of the commercial advertising messages. All this has taken place at the local and at the national level over the whole country. Local broadcasters have coped with it on a market by market basis. In growing markets prices have been raised and in some diminishing markets prices for time have been lowered. In too many markets the station has simply put into its schedule more and more commercial copy, the effect of which is merely a lowering of rates and from the listener view, a substitution of quantity for quality.

Over the quarter century of network broadcasting, stations have been affiliated with the networks in order to have available quality programs. This fine program service has been worth money to the stations affiliated with the network and they have in most cases given "free hours" to the networks for this service. Beyond the "free hours" the stations have allowed the networks to sell their time and have been compensated at a low rate for this time sold because it cost them less to operate during such network hours. Now, with greater radio competition, plus the tremendous impact of TV in areas where TV is available, we find the networks trying to find some way by which they can painlessly substitute a certain amount of "quantity" for "quality," just as most stations have already done.

This network "quantity" substitution has been and is being done in several ways. The quarter hour and three-quarter hour station break was taken from the station and became the property of the network advertiser who carried two separate programs from the hour to the half hour period or from the half hour to the hour period. Additional secondary products were run into an advertiser's program. Contiguous time was not necessary to be purchased to get a "rate." More and more short periods of 5 minutes duration are to be found in the broadcast schedule. Talent charges were sliced and even a form of participating show has been worked out where several advertisers with different products share program and talent costs. "Premium stations" are being added on a no charge basis. "Below the belt" products, previously shunned, are now heard as regular network sponsors. The low cost detective mystery and even the disc jockey is now common via network radio. On top of this, networks cut the rates of affiliated stations whether there was TV in their markets or not. The result has been less income for the stations to say nothing of less income to the networks and more and more advertising with less and less attractive programs for the listeners and the end is not in sight.

Over the years there has been talk of limitation of the amount of commercial copy in relation to the amount of time purchased by an advertiser. In fact, in our Nation's Capitol the politician has even talked about limitation of the amount of time devoted to commercial sale. Our American free enterprise system of radio can little afford political supervision of program content of each individual program and the radio people from their own selfish point of view should soon find an answer before the representatives of the people come knocking at their door.

The people's response to a program, an announcement or the printed word, whether it be on radio or in the press or on TV should be heeded in coming to a decision concerning the value of any advertising.

Ed Craney

CERTIFIED SELLING POWER!

ARBIndex

ARBIndex is the ratio of performance at the point of sale of a radio station and a newspaper. The ratio is based upon Certified ARBI surveys in which an equal expenditure is made in both media for identical merchandise and advertised simultaneously.

ARBIndex is the ratio of the radio station to the newspaper on the basis of traffic developed by each medium. The newspaper is the constant with a factor of 1. The radio station, based upon the relative performance of the two media, is in ratio to this constant. Thus, if an equal number of people respond to the advertising at the point of sale, the ratio of the radio station to the newspaper would be 1 to 1.

ARBIndex is NOT a rating of a station's popularity—it is a RATIO OF PERFORMANCE at the point of sale. ARBIndex is a MEASUREMENT OF RESULTS.

STATE broadcast association chairmen were guests of BMI and NARTB at Monday luncheon in Chicago. At table with Carl Haverlin, BMI president, and Harold E. Fellows, NARTB president, were (l to r): Sydney M. Kaye, BMI vice president-general counsel; Calvin J. Smith, KFAC Los Angeles; J. Leonard Reinsch, WSB-TV Atlanta; Mr. Haverlin; FCC Chairman Paul A. Walker; Mr. Fellows; Emmett Brooks, WEBJ Brewton, Ala., chairman of state presidents; D. Malcolm Neill, CFNB Fredericton, N. B., chairman, Canadian Assn. of Broadcasters.

FM OPERATORS

Clarify Rights, FCC Is Asked

FM STATION operators looked their financial figures in the face, appraised results of three cooperative promotion campaigns and wound up a half-day meeting at the NARTB Chicago convention by calling on FCC to clear up the rights of such supplementary services as transit and storecasting.

Contrary to custom, FM delegates overflowed the Conrad Hilton hotel meeting room, with about a hundred broadcasters turned away during the Monday morning meeting. Presiding was Ben Strouse, WWDC-FM Washington, NARTB director-at-large for FM. Michael R. Hanna, WHCU-FM Ithaca, N. Y., sat as a board observer.

A program devoted mainly to the series of promotion programs, soon to be expanded under auspices of NARTB and Radio-Television Mfrs. Assn., wound up in a brisk debate over resolutions. Members of the Resolutions Committee were Ed Wheeler, WEAW (FM) Evanston, Ill., and Ray Green, WFLN (FM) Philadelphia.

Proposal Is Tabled

Oratory broke out all over the room when a resolution proposed the FCC check FM license renewal applications of network owned stations and match applications against performance of these stations. The resolution was tabled after delegates suggested it amounted to an endorsement of FCC investigation of stations; that all stations would probably suffer were such an FCC policy adopted, and that it would arouse antagonism on the part of other groups.

Other resolutions asked radio set makers to develop auto FM sets and auto makers to install them; thanked RTMA and member manufacturers for cooperation in FM promotion and in production of FM sets, proposed FM tuners be installed in all TV sets and praised work of John H. Smith Jr., NARTB FM director.

Benefits of the NARTB-RTMA FM promotion plan in North Carolina were described by E. Z. Jones, WBBB-FM Burlington, N. C., and Joe L. Pleasants, Allison-Erwin Co., Zenith distributor in Charlotte. Mr. Jones said FM sales were stimulated though many dealers did not cooperate nor was the home demonstration idea properly developed. He said the drive increased availability of FM sets at dealers and helped listening to some extent.

Mr. Pleasants said 15 distributors took part in the North Carolina campaign, five of them actively. Despite a textile depression and other adverse factors, a group of dealers sold 4,462 sets in the five-week test period. This did not include such chains as Sears Roebuck, Montgomery Ward and Western Auto. The total actually ran well over the 5,000 mark, he believed.

Sets in D. C. Cited

Everett L. Dillard, WASH (FM) Washington, D. C., said the District of Columbia has 140,000 FM-equipped sets in 405,000 families, with FM stations having wider range than most AM outlets as well as more network on the air than AM stations. The Washington campaign, scheduled to start March 1, got under way slowly and has been extended to April 15. He played a tape of a "sales meeting of the air" conducted for the benefit of salesmen.

William Hills, managing director of the Electric Institute of Washington, said only four distributors had any FM sets in stock when the campaign started. Despite handicaps of federal income taxes, local income taxes, Easter and $88 TV set sales, he declared, 2,309 FM sets were moved in March compared to 2,480 in the same period a year ago. He contended this record was outstanding in view of the fact that appliance volume was down 25-35% at the time. He added that dealers appreciate the daily announcements by FM stations, which help FM "sink into the public mind."

David Grigsby, advertising manager of Zenith Radio Corp. and chairman of RTMA's special FM Committee, gave Mr. Smith and other NARTB officials credit for their public relations job in the campaign and contended increased selling power has been developed in the FM set field.

Henry Onorati, advertising director of radio-TV, Crosley Div. of Avco Mfg. Corp., pointed to definite sales gains in the promotion campaign and growing public awareness of FM.

Herbert Guenin Jr., advertising manager of RCA Victor Div., said manufacturers will do all they can to help promote sale of FM sets. He said the promotion drive has helped dealer-distributor relations and showed how industry groups can work cooperatively with benefit to all.

A letter from Kenneth F. Schmitt, WIBA-FM Madison, Wis., told of the promotion campaign in that state.

Mr. Smith predicted steady expansion in FM. The association is expanding its work, he added, with the set campaign a piece of evidence. He spoke of the growing spirit of harmony about stations, manufacturers and sellers of sets. More listenership is the target, he contended.

Next FM promotion drive will take place in New York state with others to follow.

West Coast NBC Salute

FOUR West Coast stations were scheduled to be saluted on the 25th anniversary of their affiliation with NBC by a special radio network program from 10:30-11 p.m. EST Saturday. The broadcast, originating in Hollywood, was titled *Operation Pacific Coast* and honored KOMO Seattle, KHQ Spokane, KFI Los Angeles and KGW Portland.

CBC Good Friday Policy

NO commercial programs will be aired on Trans-Canada and Dominion networks of Canadian Broadcasting Corp. on Good Friday. This marks first year CBC institutes same policy on Good Friday that it has used for some years on Christmas Day. CBC-owned stations will also carry no commercials that day, but no regulation has been issued regarding commercials on independent stations.

NARTB GOAL

Is Outlined by Fellows

ORGANIZATION of the United States into an overall national association and 48 autonomous state associations is the goal of NARTB, President Harold Fellows told a joint NARTB-BMI luncheon for state presidents, held during the NARTB convention in Chicago.

Growing legislative and regulatory problems among the states require careful study and cooperative action, Mr. Fellows said.

Carl Haverlin, BMI president, described progress of the BMI campaign to encourage young composers. He said 800 stations averaged over 6 hours a week of concert music under BMI encouragement.

Dan E. Jayne, WELL Battle Creek, Mich., was elected chairman of the state association group. He succeeds Emmett Brooks, WEBJ Brewton, Ala. Guest at the luncheon was D. Malcom Neill, CFNB Fredericton, N. B., chairman, Canadian Assn. of Broadcasters.

FCC Chairman Paul A. Walker, guest of honor, informally reviewed FCC's budget problems. He recalled that Congressmen talk about cutting FCC appropriations in one breath and then ask the Commission, "When the blank are you going to get television down here. If somebody doesn't appropriate funds, many parts of the country will be in a bad fix so far as television is concerned."

BMI was host Tuesday at a dinner for the BMI-NARTB boards. The BMI board met the previous Sunday, reviewing progress of the composers contest and other promotions.

The new BMI TV Clinics [B•T, March 31] will be held in New York May 19-20; in Chicago May 22-23, and in Hollywood May 26-27. Topics on the agendas will be program and production economies, public service disc jockeys, musicians, music clearance, educational programs, local TV news, camera techniques, purchase of film, film features, film operation and package-spot programs. Some of the sessions are to be held in TV studios.

The annual series of BMI broadcast clinics opens April 27 in Missoula, Mont., running through May 16. Forty-two clinics will be held, with two and three a day in different areas.

Golden Jubilee

IN HONOR of the publisher's golden jubilee, *Santa Barbara News-Press*, KTMS Santa Barbara and KCOY Santa Maria, all Calif., invited the public to an "informal open house" in the News-Press Bldg., Santa Barbara, Monday through Thursday last week. The News-Press Pub. Co. is licensee of both KTMS and KCOY. Building was formally opened and dedicated March 30.

CONGRESS

Time Runs Short; Radio Legislation Pends

WITH an eye on the calendar, Washington lawmakers are hammering away at "must" measures for 1952 with remarkable force this spring. Legislators' aim on Capitol Hill is to fold the debate tent by July in time to stalk the Chicago political conventions.

In addition, there is the campaign stretch which means incumbents need and want a time grace to return to their home states to campaign for the November elections.

In effect, this puts an unpredictable stop watch on pending legislation that is concerned with broadcasters' interests.

Most important legislative actions with which broadcasters have been concerning themselves are (1) the McFarland bill (S 658), a major measure that would set up new operating guideposts for FCC, and (2) a projected study of political broadcasts, looking forward to a clarification of Sec. 315 of the Communications Act.

Capitol Hill's thrust toward adjournment has asserted itself in the past few weeks. The pace is unrelenting in the House where that chamber has been passing appropriations bills methodically and bucking them over to the Senate without a letup.

Congressmen's strategy is to quickly get these "must" measures out of the way so that the slower-moving Senate can have plenty of time to consider them. Other "musts" are the Defense Production Act renewal or modification and foreign aid. There is no tax bill this session.

Resume of Bills

Item by item, the Congressional radio-TV picture looks like this:

● McFARLAND BILL—House Interstate & Foreign Commerce Committee has reported the Senate-passed measure [B•T, March 17]. However, the House version of the communications bill has not yet been completed. A report, which may be more of a document, will accompany it. Latest guess is that the committee will attempt to have both these items out of the way before the House Easter recess. Next steps probably will be House approval, then a joint conference between the houses.

● POLITICAL BROADCASTS—Although the House Commerce Committee chairman, Rep. Robert Crosser (D-Ohio), has signified his desire to give this subject a hearing, the committee's agenda is crowded [B•T, March 31]. There has been no hearing in the Senate.

● RADIO-TV BAN—There has been no indication that the House will amend the rules so as to permit radio-TV live or tape-film coverage of its committee proceedings [B•T, March 10]. It appears at this date that Speaker Sam Rayburn's (D-Tex.) ban is here to stay at least until the 83d Congress convenes next year.

● "DRY BILL"—The clock ran out on the proposed banning of liquor advertisements on radio or TV. The Johnson-Case bill (S 2444) has been defeated in the Senate Interstate & Foreign Commerce Committee [B•T, March 31].

● PROGRAMMING—In the House, the rug has been slipped from under a proposed investigation by a select committee of radio and television programs [B•T, March 31] (see story, page 28). But in the Senate, apparently Sen. William Benton's (D-Conn.) call for a radio-TV review board has been languishing.

● CAPEHART PLAN—This concerns the cost-allowance formula in the pricing structure as spelled out in the Defense Production Act. It is one of many issues to be considered as Congress proceeds with a study of the Act in its roll toward adjournment.

● FCC AND RECRUITING FUNDS—FCC is striving for additional funds to help it break the expected application workload when the TV freeze lifts. The House has passed its recommendation, the Senate is next on the agenda. Recruiting funds for radio-TV—money to be spent by the Army and Air Force—also is included in consideration of the general appropriations.

● NARBA—A Senate Foreign Relations subcommittee has not yet considered the North American Regional Broadcasting Agreement that is pending Senate ratification.

NBC ISSUES NEW CARD

Formalizes 1951 Reductions

NBC last week issued a new rate card (No. 34) for its radio network, formalizing the 10% reduction in afternoon and evening rates and the elimination of the 5% premium charge for the 8-10 p.m. time which NBC put into effect July 1, 1951. Failure of some readers of the new card to note the effective date led to a flurry of excitement over what they thought was a new series of rate reductions which quickly subsided when the date was brought to their attention.

The new NBC radio network rate card groups the network's affiliates into "primary" and "supplemental" stations under the plan adopted by NBC last fall [B•T, Oct. 8], which the network is still vainly trying to persuade its affiliates to accept.

ACCORDING to Frederic W. Wile Jr., NBC vice president and director of TV production, *Life of Riley*, starring William Bendix, will be produced as both a radio and TV program broadcast from Hollywood commencing next fall.

Batista Interview

FORT INDUSTRY Co. has claimed for its owned radio stations the only personal interview thus far granted to any U. S. station by Gen. Fulgencio Batista since his coup d'etat in Cuba. The interview, company spokesmen reported, was secured and recorded by Mrs. Ida Faulk, Latin-American commentator of Fort Industry's WGBS Miami, for broadcast by WGBS and other Fort Industry outlets.

AWRT SESSION

Held at Detroit

SECOND annual national convention of American Women in Radio & Television, April 4-6 at Statler Hotel, Detroit [B•T, March 3], was to feature a series of workshop sessions on television, agencies and public service. According to Convention Chairman Edythe Fern Melrose of WXYZ-AM-TV Detroit's *House O' Charm*, sessions included the following:

"You Gotta Develop Your Vision in Television," was to be presided over by Miss Melrose, with panel members Susan Bartlett, continuity director, WTTV(TV) Bloomington, Ind.; Dave Green, director of television, WWJ-TV Detroit; Harry Kahler, Kenyon & Eckhardt, New York, and Duncan MacDonald, supervisor of women's programs, DuMont.

Betty Stuart Smith, J. Walter Thompson Co., N. Y., was to conduct session on "Meet the Agencies and Package Houses—We All Work Together," with panel including Anne Gleason, president, Gleason Agency, Detroit; Gladys Blair, Young & Rubicam, Chicago; Betty McCabe, Sherman & Marquette, New York, and Beulah Zachary, producer of *Kukla, Fran and Ollie*, NBC-TV Chicago.

Other Activities

In public service category, "The Public Be Served!" was to be led by Natalie Flatow, Girl Scouts of America, New York. Serving on the panel were James Hanrahan, vice president and general manager, WEWS Cleveland; Henriette Harrison, radio-TV director, WMCA New York; Kay Lardie, manager, WDTR (FM) Detroit, and supervisor of radio-TV for Detroit public schools, and William Hodapp, executive director, Teleprograms Inc.

A plaque honoring American Women in Radio and Television for its help to U.S. homemakers was to be presented at the convention by the Kellogg Co. of Battle Creek, Mich. The plaque was to be presented by Detroit's Mayor Albert E. Cobo on behalf of Kellogg's to Edythe Meserand, president of AWRT.

Each member of the AWRT receives a replica of the award suitable for framing.

Merchandising Magic in Baltimore!

Kitchen Karnival

The show that promotes at point-of-sale!

BRENT GUNTS
Baltimore's top M.C., a favorite with the ladies who pay $1.00 to see him or for the lunch (we don't know which).

JOE CROGHAN
Announcer and right hand man to Brent Gunts, has a quick sense of humor and a winning touch with commercials.

DON REDDING
WBAL's Sales Service Manager, whose primary function is to correlate the terrific power and effect of "K. K." with the effort of the manufacturers' own local broker or representative.

BILL MASON
Merchandising Manager, carefully plans the campaign and promotions for sponsors. He sets up luncheons, shows and displays, and personally visits dozens of chain and independent stores weekly.

JIM MARKIEWICZ
Another experienced grocery detail man. Full-time on the street, achieving distribution, stimulating sales, setting up displays, obtaining bona-fide orders for "K. K." products. Weekly written reports to sponsors on activities.

Kitchen Karnival, WBAL's outstanding daily half-hour festival of fun, offers participating sponsors guaranteed, concentrated merchandising for their products in the Baltimore area food stores. Your product is exposed to thousands of customers. For instance: Your product is mass displayed at luncheon broadcasts and at church and civic broadcasts in and around Baltimore; it is sampled by luncheon guests and audiences numbering over 500 each week; it is given as prizes at every broadcast; it gets special point of sale display and active in-store promotion from full-time merchandising men.

CO-OP PROMOTION Continuing Need Stressed

SUCCESSFUL selling of radio cooperatively by stations in the same city and the continuing need for audience promotion on the air and in sales presentations was outlined to NARTB conventioneers Tuesday afternoon.

Keynoted by Lee Little, general manager of KTUC Tucson, the audience promotion session concerning "The Tale of Three Cities" attracted an estimated audience of 60 broadcasters. Mr. Little, commenting on the small audience in contrast with the "3,000 attendance," termed the session "one of the two top-level discussions" at the convention.

After reprimanding broadcasters for not forwarding their successful promotion ideas to NARTB so the entire industry would benefit, Mr. Little pointed out that many stations neglect to promote good shows which they put on the air. He cited the instance when a network aired a sustainer to its affiliates for 13 weeks, learning afterwards that no stations had ever picked up the show because "they had not been advised the thing was available."

"Good, solid" promotion gets an audience for bad programs, and can also improve them. "When we tell people to listen to a radio program, they do. We in the radio business have found out that people do what we tell them to do," he said, referring to sale of products, collection of funds and tabulations on mail.

At KTUC, Mr. Little uses audience promotion schemes with every sales presentation, outlining what the station will do for the show and the client and what the client, in turn, should do to bolster the radio effort. He recommended advising the sponsor's employes through meetings or letters that radio is being used, inclusion of a box in newspaper space and display of store and window cards.

Detailing combined radio campaigns among stations in the same city were John Esau, vice president and general manager of KTUL Tulsa; Jack Knabb of the advertising agency of the same name in Rochester, N. Y., and Worth Kramer, general manager of WJR Detroit. Richard M. Allerton represented NARTB, of which he is research director.

Stress Own Assets

Broadcasters need to remind themselves of radio's assets, Mr. Esau said, naming flexibility and adaptability as primary. His station, among six radio stations and one TV outlet, helped organize the Tulsa Associated Broadcasters and hire a paid secretary.

The group initiated a radio week, blew up the mayor's proclamation for backgrounds and displays in retail store windows throughout the business district and organized all-station basketball and softball leagues with the call letters getting frequent mentions on newspaper sports pages.

The stations offered $1,000 cash to anyone who could find more than a 5% margin of error in a Tulsa radio and television survey. They also helped to revive the state radio association. Despite the group's "solid front," however, each station sells and promotes individually to retain its identity, Mr. Esau said.

KTUL has reinstated the last-minute copy change, "although it's a lot of trouble," uses a lot of names in chats with listeners and block programs the schedule with numerous giveaways, which include "giving away" an announcer to a housewife every other Thursday and a local variety of "Lonesome Gal" to women's clubs and civic groups.

Some 60 new residents in the city weekly receive personal letters from Mr. Esau, followed by another from the program director and a program schedule, and all staff members take active part in most of the local civic, fraternal and cultural groups.

"We've thrown out the word sustaining," Mr. Esau said. "The station that is never missed never dies —the station that dies is never missed."

Mr. Knabb, public relations counsel for the Radio Broadcast Management Council of Rochester, referred to the broadcast "nightmare in 1950 when ghosts of the competition haunted dreams of almost every radio man."

Purpose of Council

The group, organized to "make headway with use of headwork," has worked to maintain and improve the audience size and to sell better and more radio time. Because public relations "was the first job," speakers were sent to talk about radio positively rather than apologetically before local groups.

A screening committee was formed to handle all requests for free time, followed by approval of the Rochester Advertising Committee and various civic groups of the concept that stations were entitled to be paid the same amount as spent for newspaper space by organizations such as the Community Chest.

Mr. Knabb failed initially in convincing council members they could successfully sell as one group to an advertiser, although he later proved his theory by making two sales of four stations to a single sponsor. "It takes courage to make a profit and to try new ideas," he said, "and profit is the only thing that keeps us in business."

Mr. Kramer, also co-organizer with six other station men of the United Detroit Radio Council, asks broadcasters for "alert programming, vigorous audience promotion and strong sales efforts to get the other media dollars as well as competitive radio dollars." Station management can retain its place in the advertising picture and gain and keep the respect of its audience and advertisers by reflecting the strength and integrity of broadcasting concepts in their individual operations, he said.

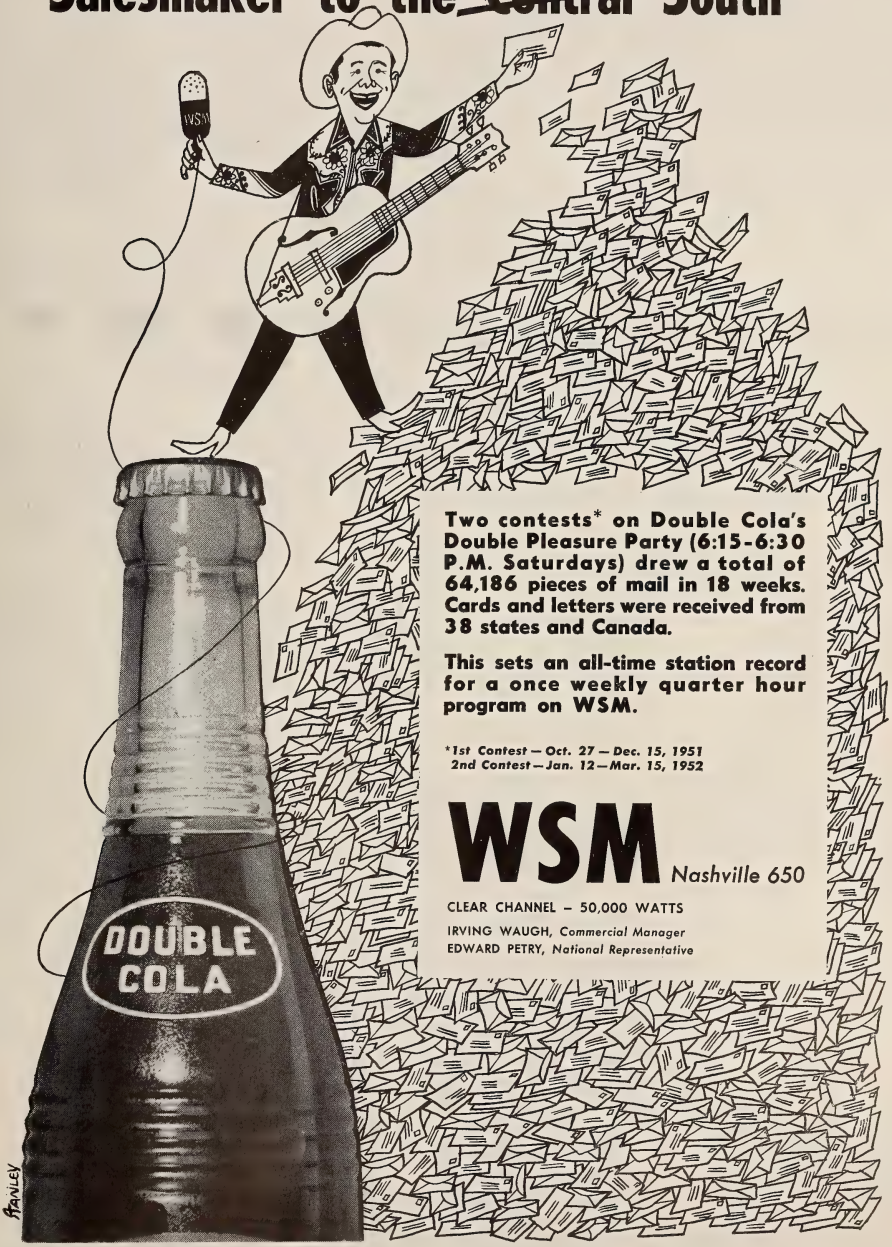
SINGER Peggy Taylor pins carnations on NARTB delegates, inviting them to visit facilities of WGN-AM-TV in Chicago. With her are Charles Sherburne (l), KCBQ San Diego, and Van C. Newkirk, KHJ Hollywood.

Detroit Activities

To "re-awaken listeners and advertisers," the Detroit group conducted weekly meetings and spent $5,000 in a three-month car card and newspaper campaign backed intensively by radio, using 400 car cards and 113 cartoon ads rotating among three papers. The seven stations aired 24 radio promotion spots daily, mentions in local shows, in direct mail pieces, on envelopes and in advertisements.

The Detroit group originated the slogan which is used by industry elements throughout the country, "Wherever you go there's radio." The slogan is the title of a song written by a WJR staffer which has been recorded and distributed at cost to other stations.

Mr. Little, in recapping comments of the panelists, outlined a few of his promotions. Among them were free brake-testing and lining replacement for all residents of Tucson, use of acetate tape with "As advertised on KTUC" in sponsoring stores, gummed wrapping tape for outgoing packages in retail concerns, letters to sponsors' employes and purchase of the sponsors' merchandise.



He advised station men in smaller towns to keep promotion plans simple, recommending also that network promotion men in New York send out "down-to-earth" audience material adaptable to "people west of the Hudson."

"They should get out and see what goes on there," he said.

"There is no reason for anyone to be a bad broadcaster. No matter what you do, you should do it well."

Salesmaker to the ~~Central South~~ 38 STATES

Two contests* on Double Cola's Double Pleasure Party (6:15-6:30 P.M. Saturdays) drew a total of 64,186 pieces of mail in 18 weeks. Cards and letters were received from 38 states and Canada.

This sets an all-time station record for a once weekly quarter hour program on WSM.

HEAVY EXHIBITS

Fewer Big Products Shown at Chicago

HEAVY EXHIBITS — those of station transmission and studio equipment makers—were lighter this year at the NARTB convention, with RCA again leading the field in amount of floor space and number of items displayed.

The company sent more than 60 representatives from its custom recording, engineering products and tube divisions. At the opening of its extensive display was a revolving platform with a new combination studio-field camera operated by a plaster male model before a life-size ballet dancer.

Equipment available for inspection included AM, FM and television transmitters, audio equipment, monitoring units and test apparatus for all kinds of stations. Items for TV stations included mobile equipment, cameras, control room units and distribution amplifiers.

RCA also showed AM, FM and TV antenna systems, transmission line equipment, tower lighting units and accessories.

The camera, described as TK11A for studio use and TK31A for the field, features a view-finder with a seven-inch kinescope, superior yoke design, a video amplifier with adjustable blanking and rugged construction.

Andrew Corp. featured as the central attraction of its display the new skew antenna based on an engineering principle which provides for mounting on the sides of buildings, eliminating necessity of a tower on top. Company manufactures transmission lines for VHF and UHF, antennas and mounting, dehydrating and tower lighting equipment.

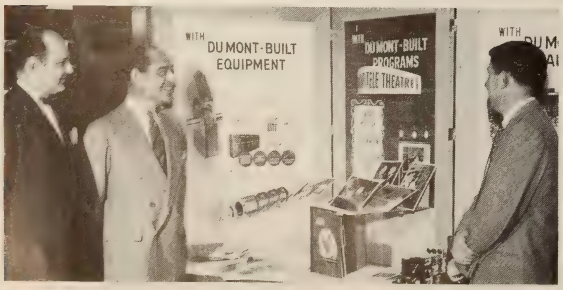
Representatives of Collins Radio Co. from five cities showed convention visitors the complete line of AM and FM broadcasting installations, transmitters ranging in power from 250 w to 50 kw, FM antennas, 10 w FM educational broadcast systems, studio and accessory equipment, remote pickup amplifiers, speech input consoles, transmitter control consoles, transmitter monitoring, test and accessory equipment and custom-built studio installations.

Fully-equipped television station, with transmitter, cameras, studio, control room, film projection room, transmitter room and client's booth was installed by the Allen B. DuMont Labs. Other exhibit features—a 5 kw "Oak" air-cooled transmitter and console, a director's desk for audio and video switching and line amplifier designed to make programming more flexible and to handle special effects with finger-tip controls.

Gates Radio Co. men showed speech input equipment, including two complete console systems and a pre-set program dispatching and switching facilities. Other features were two AM transmitters and a 250 w FM relay transmitter used for STL service.

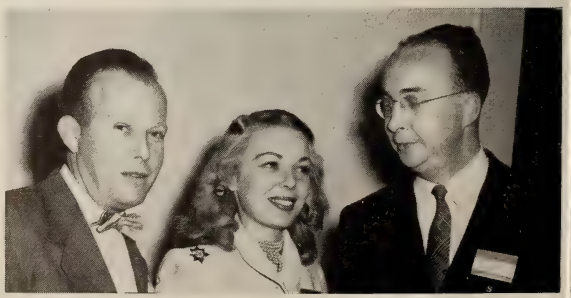
Thirty representatives of General Electric Co. manned its lower-level display of UHF TV transmitter equipment and controls, a UHF antenna, studio camera channel, film camera channel, Synchro-Lite projector, station switching equipment, synchronizing equipment, portable console and audio consolette.

General Precision Lab. presented new TV camera chains and studio field equipment as well as professional 16mm telecasting and previewing projectors. The camera has separate light indicators for each of four lenses, plus a fifth light indicating on and off.

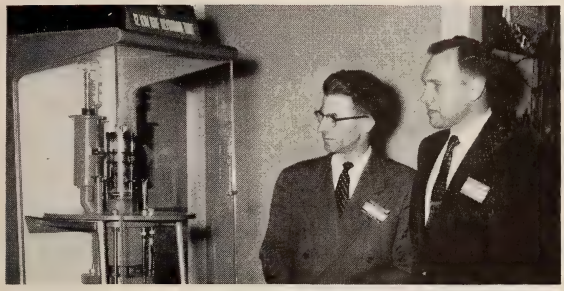


Federal Telecommunication Labs.

* * *



GRAYBAR's delegation included (l to r) Bob Uhrig, J. W. LaMarque and Larry O'Connell.



* * *

OPERATION UHF was inspected at the Allen B. DuMont Labs. display by staff members (l to r) H. E. Taylor Jr., manager of the television transmitter division in Clifton, N. J.; Herb Bloomberg and Lew Radford Jr., district managers.

TV CAMERA chains and studio-field equipment were displayed by General Precision Lab. and its delegates (l to r): John M. Sims, Lee Matheson and Louis L. Pourciau.

INTRODUCED at the convention for the first time was General Electric's 12 kw UHF Klystron tube. Heading the GE delegation were William J. Morlock (l), general manager of the commercial equipment division, and Frank P. Barnes, sales manager for the broadcast equipment section. The new tube, which has been operated at more than 15 kw power at 750 mc during development tests, will soon be installed at GE's plant in Syracuse for propagation tests. If FCC authorizes maximum effective radiated powers above the presently proposed 200 kw, the basic design of the Klystron will make 50 kw tubes "entirely practical," company claims.

* * *

displayed, in cooperation with Graybar Electric Co., the company's new distributor. Showing items from camera to antenna, the exhibit stressed installations based on successful stations which Federal has equipped in North and South America. The company manufactures transmitting, rectifier and picture tubes, as well as magnetrons.

Graybar also distributes for Continental Electronics Mfg. Co., Blaw-Knox Co., Ampex Electric Corp. and Altec Lansing Corp., all NARTB associate members. Products include transmission and studio equipment, speech input units, tubes, tape recorders, test and measurement equipment and metal cabinets. Continental exhibited three broadcast transmitters for AM.

Switching equipment wiring devices and switchboards for TV studios, as well as related engineering services, were featured in the display space of Kliegl Bros. Universal Electric Stage Lighting Co. Another manufacturer of switchboards, lighting and equipment, remote controls and mike booms was Century Lighting Inc.

Broadcast Music Inc., cooperating with the NARTB, set up Freedom Hall with a large collection of historical documents and the original manuscript of the "Star Spangled Banner." BMI, now in its 12th year, also featured a miniature theatre with hit songs. It also displayed promotion material on the program encouraging broadcast of concert music and the young composers radio awards. The award program is conducted cooperatively with state broadcasters' associations.

Also see Light Exhibit story, page 52

Other exhibition hall booths were occupied by the Broadcast Advertising Bureau, Armed Forces Information Center, National Production Authority and NARTB Station Relations.

FCC LEGISLATION

Reaches Floor of Senate

SENATE Expenditures Committee last week approved and sent to the Senate floor a bill providing that an FCC Commissioner can be removed from office only for cause, that is, for inefficiency, neglect of duty or malfeasance [B•T, Feb. 25]. The bill (S 1139) also would permit Commissioners to stay in office after their terms expire until a successor is named and confirmed by the Senate, and place a 60-day limit on extra service.

EQUIPMENT manufactured by Gray Research and Development Co. is readied for convention visitors by Chester A. Snow (l) and Chester B. Hayes.

KLZ—30 YEARS OF SERVICE

PHILLIP X. DANIELS
President
Colo. Chamber of Commerce

"KLZ...a splendid servant of the people...a great asset to our state!"

Phillip X. Daniels, president, Colorado Chamber of Commerce, recently stated: "KLZ is a splendid servant of the people and a great asset to our state."

Mr. Daniels was analyzing KLZ's 30 year record of public service to the Rocky Mountain area and the distinguished list of national honors that KLZ has brought to its area. Leading Colorado citizens—U.S. Senators, Congressmen, Governors, Mayors—have joined publishers, businessmen and clergymen in praising KLZ's unparalleled public service record.

'DUPLEX' DATA

Hooper Extends to Set Use

C. E. HOOPER Inc. is now using "Duplex Coincidental" data for "sets-in-use" figures as well as for "ratings" and "share-of-audience" data. Advantage of the "duplex" data, which are obtained by asking "What were you listening to 15 minutes ago?" as well as "What were you listening to when the phone rang?", is that the sample size is doubled with no increase in cost, the research firm explained.

Extension of the "duplex" data, according to a Hooper spokesman, followed extensive research authorized by Dr. Matthew N. Chappell during his analysis of methods of measuring broadcast audiences. "This research showed that there was no sacrifice of accuracy when compared with the industry standard method, namely coincidental," it was stated. The full research on "Validation of the Accuracy of the Duplex Coincidental" will be published in booklet form as the other parts of Dr. Chappell's study have been.

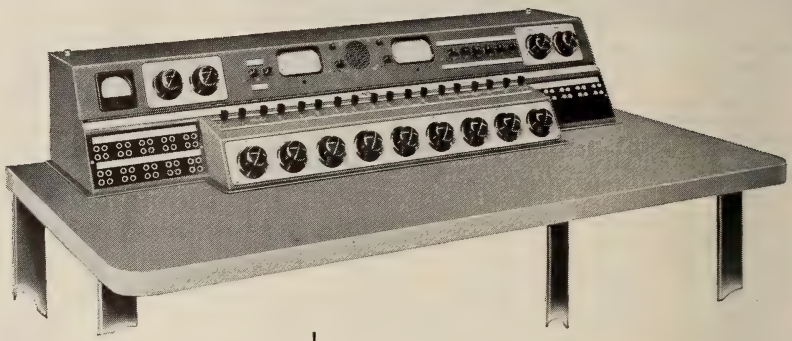
A sample test study conducted in New York in January showed little difference between station audience rating figures and sets-in-use data obtained by the "Duplex Coincidental" method and those obtained through the pure "coincidental" system. Morning radio sets-in-use were reported as 12.53 by the coincidental method, 12.79 by the duplex method. Afternoon radio sets-in-use were 9.97 (C.) and 9.82 (D.). Evening figures were 8.99 (C.) and 8.98 (D.).

ZENITH INCOME OFF

'51 Gross and Net Lower

ZENITH Radio Corp. had net sales of $110,022,780 for 1951 with a net income of $5,370,740 ($10.90 per share) after provision for federal income taxes of $6,400,000, company has reported in its annual statement.

This compares with sales of $134,012,595 and a net of $8,479,390 ($17.22 per share) in 1950.



Total current assets as of the end of 1951 was $34,588,640, of which $12,942,172 was in cash, the report showed. Total current liabilities was $13,868,381.

Bowling Green Meet

COMMUNICATIONS Institute at Bowling Green State U., Bowling Green, Ohio, June 20-21 will feature as main speaker and consultant Dr. Dallas W. Smythe, research professor at the U. of Illinois Institute of Communications Research and former chief of the economics division of the FCC. Dr. Smythe's convocation address will be, "Mass Communications: What Are They Doing for Us and to Us?" The two-day program is offered as an area public service to educators and professionals in communications.

GraybaR recommends

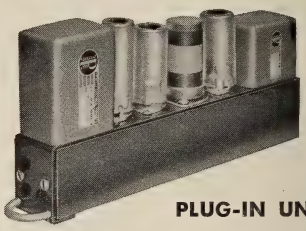
THE NEW ALTEC 250A SPEECH INPUT CONSOLE

Here is the latest addition to Altec's new and enlarged line of speech input equipment — the 250A Console. A completely self-contained unit for AM, FM, or TV, the Altec 250A offers:

•

Two main program channels which can be operated simultaneously on separate programs.

•



A nine-channel parallel mixer — any combination of nine inputs can be used at the same time on either channel.

•

All necessary monitoring, cue, audition, and signaling circuits.

•

Controls, keys, and pots conveniently arranged for maximum accessibility.

PLUG-IN UNITS . . .

All pre-amplifiers, line amplifiers, and power supplies are of the plug-in type . . . are compact . . . easy to change and service. (The pre-amplifier unit, for instance, is only 1⅝"x4¼"x9" in over-all size.) The plug-in units are also available for rack-mounted and custom speech input installations.

Ask your near-by Graybar Broadcast Equipment Representative for complete information on Altec speech input equipment for any requirement. He'll be glad to furnish you with data covering specifications and performance of the new Altec 250A and 230B consoles, as well as the popular 220A portable model. *Graybar Electric Company, Inc., Executive Offices: Graybar Building, New York 17, N. Y.* 242-14

VOA 'COURIER'

Won't Broadcast at Sea, Congress Is Advised

CONGRESS has been advised by the State Dept. that its new transmitter-equipped vessel, the *U.S.S. Courier*, will not broadcast on the high seas in violation of international treaties.

The question has been raised that the floating Voice of America relay station might violate provisions of the Atlantic City Telecommunications Treaty, which specifies international wavelengths and sets certain conditions for broadcasting [CLOSED CIRCUIT, March 24].

The department's awareness of the problem involved and its desire to minimize confusion stemming from newspaper accounts were evidenced by its international broadcasting officials before a House Appropriations subcommittee studying the fiscal 1953 budget.

A sum of $6,620,312 has been approved by the full House Appropriations Committee for two additional ship-borne stations—subject to House vote last week.

Foy D. Kohler, director of State Dept.'s International Broadcasting Services, noted printed accounts suggesting that the ship (described as the Vagabond project) will be "steaming up and down the high seas, broadcasting," and explained:

"Under the international regulations we cannot operate from ships on high seas; we must identify the locations, and have a legal frequency for the use of the transmitter, and for that reason it is not practicable to contemplate operating a Vagabond on the high seas." Mr. Kohler added that "of course all rules are off in case of war."

In response to questioning, Mr. Kohler acknowledged there is nothing to prevent the ship from shifting its base of operation. Query was posed by Rep. Daniel J. Flood (D-Pa.), a subcommittee member, with the reservation that international agreements would permit such a procedure. Mr. Kohler said such a plan would mean "elasticity and security."

Mr. Kohler said that while the vessel would not bring broadcasting closer to the target than a land-based station, the department can build two floating stations for the price of a land-based operation.

The Atlantic City treaty prohibits mobile broadcasting by land, air and sea. Under the proposed plan, the *Courier* would anchor at ports under agreements with certain countries.

Despite conformance with the treaty, some authorities have expressed consternation over the possible practical effect of such an operation. The question is raised whether the Soviet would launch a similar project and open up a communication barrage, or simply choose to regard the floating VOA as an "unfriendly act."

In the former eventuality, authorities point out, the Soviet could disrupt all modes of communication, including domestic radio-TV broadcasting.

The USSR signed the 1947 Atlantic City convention but has not yet ratified radio regulations stemming from separate administrative conferences.

The State Dept. offered its views during hearings held before the subcommittee early last month and released March 25.

$1 MILLION ASKED

To Support Foreign Media

SUM of $1 million for "mass communications" is being sought from Congress by the Dept. of State to support foreign radio, press and motion picture operations by making grants to selected personnel in certain countries.

The project is designed "to localize more and more" these activities and was worked out by the department's International Broadcasting Services, Motion Picture Div., Press Div. and the Div. of Exchange of Persons.

A House Appropriations subcommittee, holding hearings on the fiscal 1953 budget, was told that the State Dept. proposes "to bring . . . certain selected people in the radio industry" under this project. This would include, among other personnel, owners, directors and workers at local broadcasting stations in the Near East, Southeast Asia and in other areas.

Such a plan, the department testified, would improve the effectiveness of the entire U. S. international information and education program, and help combat Soviet propaganda.

Specifically, the plan calls for the U. S. to bring 90 broadcast personnel from 30 "priority" countries (evenly divided among commentators, script-writers and program directors) to this country for indoctrination. They also could be used on Voice of America programs piped overseas.

WMCA Strike Looms

CONTINUITY, publicity, programming and clerical departments at WMCA New York were granted permission by their union, Newspaper Guild of New York, to call a strike against the station management in efforts to seek wage increases. A guild spokesman reported Wednesday that union members at WMCA had received only a $3 general increase since January 1950, in spite of rising living costs. Contract negotiations have been in process for some time, it was added, but refusal by the station to grant pay increases, after WMCA had granted AFRA members an increase last December, has prompted the move toward strike. Negotiations have been conducted by the guild with Nathan Straus, president and owner of WMCA.

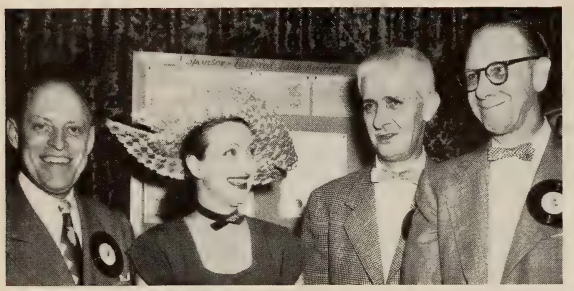
MERCHANDISING CLINIC



Set by N.Y. AMA, SEC

TWO-DAY Merchandising Clinic, planned by New York chapter of American Marketing Assn. with the Sales Executives Club of New York, has been announced for April 29-30 in Manhattan's Hotel Roosevelt. Ted Cott, NBC vice president, will speak at the opening day luncheon.

Media and other merchandising services will be discussed by panels in both afternoon and morning sessions, with chairmen to include W. Parlin Lillard, General Foods Corp.; J. Sidney Johnson, National Biscuit Co.; Ronald Welch, McCann-Erickson; H. Ford Perine, Time-Life Inc.; and John E. Shepherd, Fletcher D. Richards Inc.

Anti-Inflation Drive

RADIO, car cards and three-sheet posters are being used in an anti-inflation campaign inaugurated Monday as a public service campaign by the Advertising Council. Advertising materials identify inflation as a "wage-price leapfrog" and warn, "If we allow it to get out of hand, inflation can lick America, wreck our economy and crush us as individuals." Advertising materials were prepared on a volunteer basis by Dancer-Fitzgerald-Sample under direction of Samuel C. Gale, vice president of General Mills and volunteer campaign coordinator.

"GET MORE for Your Dough on Radio" was the convention theme for Standard Radio Transcription Services and its representatives (l to r): Gus Hagenah of the Chicago office; Lee Hart, Los Angeles; Alex Sherwood, New York, and Lewis TeeGarden, Los Angeles.

* * *

PITCHMEN for World Broadcasting System donned straw hats and called in conventioneers with canes plugging the new Judy Canova *Country Fair* show. Salesmen included (back, l to r) Hugh Grauel, Marq Marquardt, Bob Friedheim, Jim Weathers; front, Dick Lawrence, Pierre Weis and Cy Kaplan.

* * *

MAURICE B. MITCHELL, vice president and general manager of Associated Program Service, checks outsize badges of John Andrus, vice president and treasurer, and Andrew M. Wiswell, vice president and recording director.

* * *

LIGHT EXHIBITS

Viewers Get Gimmicks Galore

THE LADIES—and broadcasters blessed them—shared convention attention this year with a prize-winning steer named Nobull, Captain Video's proxy who passed out "secret rings," and cane-swinging pitchman, in addition to some 40 "light" exhibits on the fifth floor of the Conrad Hilton Hotel in Chicago.

Conventioneers, playing between the heavy exhibit section in the basement Exposition Hall and the populous Famous Fifth, toted carry-alls with paper openers from Ziv, Dick Tracy pencils from Snader, bottles of wine from Capitol and memo-books from SESAC.

* * *

World dispensed walking canes bearing a plug for Judy Canova's *County Fair*, CBS-TV Film Sales gave out miniature television sets of plastic with pictures of its stars and Standard Radio Transcription Services distributed a specially-cut record. WGN-AM-TV Chicago and the Caterpillar Co. provided carnations and daisies for visitors.

RCA Record Program Services spotted two models through the halls soliciting members for the 512 Key Club. Numbers on two lucky membership cards determined winners Monday and Tuesday evenings of a home freezer filled with some 200 pounds of beef. Plugging "Thesaurus—Your Steak in Programming," the company showed a blue-ribbon steer, Nobull, in a hay-filled pen in the exhibition hall. Models displayed packages labeled "Ready for Freddy," with reference to the new *Freddy Martin Show*.

Among the transcribed packagers was the Frederic W. Ziv Co., which decorated its suite with colorful wallboards calling attention to *Bright Star*, *Cisco Kid* and *I Was a Communist for the FBI*. Company showed promotion kits, including premiums and merchandising ideas, program features.

Lang-Worth Feature Programs queried visitors with a cardboard question, "Are You Confused?", answering that they need not be in a series of disc-posters on the walls. Benefits of the transcribed service —"I'm tough, cue easily, reproduce faithfully and wear well."

Associated Program Service stressed sale of its library "for as little as $19.50" monthly on one-year minimum contracts. It detailed its catalog of 10 different library services suited to various economic, sales and programming requirements of station men.

Also see Harry Erlebert story, page 48

Standard Radio Transcription Services, which recently signed Doris Day and the Billy May band, introduced a comprehensive sales, advertising and copy service. Sales brochures, written directly to the advertiser for use by stations, included five different plans on the new attention-getter series. Central theme of its exhibit was the slogan, "Get More for Your Dough on Radio."

SESAC, marking its 21st year with more than 4,000 selections in

* * *

HEAVY promotion was given to *I Was a Communist for the FBI* in the Frederic W. Ziv Co. suite at the convention. Promotion kits, checked here by W. Bennett Philley (l) and Al Unger, were distributed for each of the featured programs.

* * *

SNADER TELESCRIPTIONS showed conventioneers 800 of its short TV musicals. Hosts included (l to r) Al LeVine, Monroe Mendelsohn, Reub Kaufman, E. Jonny Graff and George Fisher.

SESAC, which is observing its 21st year and has more than 4,000 selections in its library, was represented by (rear, l to r) Louis Tappe, Harold Fitzgerald and Robert Stone; front, Mrs. Kenneth Parker, Alice Heinecke and John Casey.

WELCOMING guests in the Capitol Transcriptions suite were (l to r) Jim Strain, Bill Finkeldey, Cliff Ogden, Jack Barton and Alvin King.

* * *

its library, called special attention to Stan Freeman's jazz quartet in its convention suite. Representatives gave red plastic-covered notebooks to visitors.

World Broadcasting System salesmen wore a pitchman's red-ribboned straw hat and carried canes, which were given to conventioneers. Its shows include *Chapel by the Side of the Road* with Raymond Massey, *Steamboat Jamboree* with Lanny Ross, *Forward America* with Walter Houston and *Freedom Is Our Business* with Robert Montgomery.

Harry S. Goodman Radio and Television Productions featured a display and brochures on the custom-built spots, radio programs ranging in length from 5 to 30 minutes, radio and TV weather forecast jingles and 16mm television film.

Gives California Wine

Bottles of varieties of California wine went to guests of Capitol Records Distributing Co. which listed features of its custom libraries for AM and FM radio and television.

CBS Television Film Sales promoted the following programs: *Gene Autry Show, Strange Adventure, Cases of Eddie Drake, Files of Jeffry Jones, Range Rider, Holiday in Paris, Vienna Philharmonic Orchestra, Hollywood on the Line* and *World's Immortal Operas.*

Snader Telescriptions Sales, in a viewing room adjacent to its suite, showed conventioneers a series of 800 short musicals filmed for TV exclusively. A Dick Tracy pencil giveaway plugged a show of the same name. Others are *This Is the Story,* Alexander Korda feature films and *Washington Spotlight.*

Screen Gems Inc. sent representatives of its television department to the NARTB convention for the first time. The company packages show for stations as well as films and commercials for sponsors.

Musicolor Inc. exhibited telecolor, "the light that dances," light mobiles which are synchronized with music for film or live television. The device is used also for advertising promotion.

Representatives of the broadcast division of Allied Radio Corp. told station men about the company's complete line of tubes, tape recorders, microphones, test units, monitor speakers, amplifiers, pickups, cartridges, turntables, pads and patch cords.

Altec Lansing Corp.'s exhibit displayed printed promotion on its speech input equipment, microphones, loud speakers, amplifiers, transformers and intermodulation test equipment.

Ampex Electric Corp. featured its high-quality magnetic tape recorders and motion picture synchronizing equipment, while Andrew Corp. called attention to its transmission line for VHF and UHF, its multi-TV antenna, the multi-V for FM broadcasting and equipment for tower lighting, mounting and dehydrating.

Audio and Video Products Corp., for the first time, showed a console cabinet model of the Ampex portable series 400-A magnetic tape recorders. Company has standard as well as custom models.

Several items in the catalog of Eitel-McCullough were displayed,

(Continued on page 54)

* * *

MAGNECORD men at the convention were (l to r) Dick McQueen, A. L. Whyte, C. G. (Spec) Barker and Dick Hornbogen.

MISS AMPEX on poster eavesdrops on the convention discussion of this trio (l to r): M. M. Newman, E. G. Swanson and Harrison Johnston.

* * *

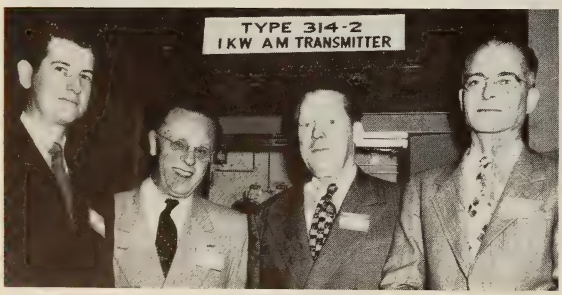
LANG-WORTH representatives, who attended the NARTB convention, are (l to r) C. E. Langlois Jr., C. E. Langlois Sr., John Langlois and Hugh Allen.

* * *

RCA THESAURUS representatives, who enrolled members in the 512 Key Club and awarded a steer to the membership card holder with the prize number, included (back, l to r) Greg Reeser, Bill Reilly, Hank Gillespie, Bob Fender and Al Sambrook; front, Bill Gartland, George Field, Jim Davis, Ben Rosner.

* * *

FILM REEL on "The Locomotive," one of first in the series of CBS-TV *Big Town* programs which switched to film April 3, is checked in the convention suite of United Television Programs. Representatives of the TV film sales organization include (l to r): Aaron Beckwith, sales manager; Jerry King, president; Milton Blink, executive vice president, and John Rohrs, Chicago sales manager.



REPRESENTING Presto Recording Corp. were (l to r) Al Jorysz, Tom Aye, Tom Aldrich, Austin Sholes.

* * *

PICTURED at Kliegl Lighting Co. exhibit are (l to r) Arch Monson, West Coast distributor for Kliegl; George Gill, TV sales, Kliegl; Charles Batson, formerly NARTB and now with Broadcasting Co. of the South; Bob Langer, development engineer, Kliegl.

* * *

PICTURED inspecting Continental Electronics Mfg. Co. exhibit are: K. W. Pyle, KFBI Wichita (second from l), John Schilling WHB Kansas City (second from r), W. D. Mitchell and W. M. Witty (r) both with Continental, flank duo.

* * *

GATES Radio Co. representatives at the exhibit booth are: (l to r) R. M. Ware, F. W. Wentura, Al Krueger and Ken Neubrecht.

COLLINS RADIO Co. representatives at the convention were (l to r) Jim Flynn, Arthur Collins and R. H. Hollister, sales manager.

* * *

Light Exhibits

(Continued from page 53)

with the company introducing Eimac's new external cavity Klystron for 5 kw output in the UHF for TV. Firm also manufactures power tubes, vacuum capacitors and air system pockets.

Another exhibitor was Dresser-Stacey Co., which makes steel towers.

Federal Telephone and Radio Corp. outlined details of its line of transmitting and rectifier tubes, television picture tubes and magnetrons, while Gray Research and Development Co. representatives explained the company's research and development facilities and services. Gray makes Telop, transcription arms, equalizers, multiplexers, camera turrets and sound-effects consoles.

Magnecord, which manufactures high fidelity magnetic tape recorders, designs all equipment for use interchangeably in portable, rack or console operations. Also available are single microphone input and multi-channel amplifiers as well as zero line level amplifiers.

Presto Recording Corp. salesmen described the firm's sound record and transcription equipment, disc and tape types, amplifiers, equalizers and blank recording discs. Magnetic recording equipment was exhibited also by Stancil-Hoffman Corp., including the minitape, a self-contained battery-operated recorder.

Wincharger Corp., represented also, manufactures vertical radiator antenna towers for radio, antenna supporting towers for AM, FM and TV and tower lighting equipment.

Other exhibitors included Keystone Broadcasting System and Standard Rate and Data Service, as well as General Precision Lab., Broadcast Advertising Bureau and Graybar Electric Co., which had other displays in the "heavy" equipment section in the lower exhibition hall (see story, page 48).

URGES FULL NEWS

UN Official Lauds Radio

BYRON PRICE, assistant secretary general of the United Nations, urged broadcasters, along with press and motion pictures, to do their utmost in keeping the American public informed about international affairs. Speaking Thursday to the Radio Executives Club of New York, Mr. Price said the fate of the world and the nation may well hang on decisions of the American voter and it is of the greatest importance that he be fully informed.

Mr. Price, who was head of the wartime Office of Censorship, lauded the broadcasters for their voluntary cooperation in suppressing news which might have harmed the war effort, saying their contribution to the national welfare has never been sufficiently appreciated by the general public.

* * *

CBS TELEVISION Film Sales staffers included (l to r) Fred J. Mahlstedt, New York, with Charles Reeves, George Lyons and Walter Preston, all of Chicago.

RCA TELEVISION console and its units are examined by this group of NARTB convention delegates (l to r): Wiley D. Wenger, RCA, Dallas; Bob McRaney, WCBI Columbus, Miss.; J. F. Palmquist, RCA, Dallas; Paul Goode, KSWO Lawton, Okla.; Buck Lewis, RCA, Camden; Bill Buford, KSWO; A. R. Hopkins, RCA; Lynwood Lessig, J. Walter Thompson Co.; W. O. Hadlock, RCA, Camden.

BOARD CHAIRMAN Kevin Mallen (r) of Ampex outlines innovations in his convention display with Russell O. Hudson, vice president in charge of sales for Audio and Video Products Corp., which distributes Ampex.

GIFT OF WDET (FM)

Union Offers to Wayne U.

GIFT offer of WDET (FM) Detroit to city-owned Wayne U. was announced last week by the station owner, UAW-CIO. The station was the last labor-union-owned FM outlet in the country.

A union spokesman stated his group is "directing our energy and plan to use our finances for the processing of a television application in Detroit."

Emil Mazey, UAW-CIO secretary-treasurer, made the statement after Mrs. Millie Jeffries, WDET (FM) manager, reported that the union would dispose of the outlet.

Mr. Mazey said the union's relinquishment of control "does not in any way reflect diminishing interest on the part of the UAW in owning and operating radio and television stations."

Failure of the UAW-CIO to succeed in operating the FM station was blamed on inability to attract a sufficiently large audience and, thus, enough advertising to make the operation paying or sustaining.

The union previously had requested the FCC to allow suspension of operations April 1, but continuance another month was decided upon at the last minute, Mrs. Jeffries said. The station's monthly expenses have been about $7,000, with a deficit of about $4,000.

Van Devander Resigns

CHARLES VAN DEVANDER, publicity director for the Democratic National Committee, has resigned his post and will resume political writing and reporting. His resignation is effective April 15. No successor had been named as of late Thursday. Mr. Van Devander formerly was Washington bureau chief for the *New York Post* before he joined the committee in September 1950.

EXPLAINING the newest developments in television lighting at the Century Lighting Inc. exhibit to E. C. Swaringen (c), WTAX Springfield, Ill., were Charles Shevlin (l) and Arthur H. Menkin.

CANADIAN ASSOCIATION OF BROADCASTERS

The ONUS is On US!

The burden of telling you about ourselves falls lightly on our Canadian shoulders, for we're good and proud of Canada's recent achievements.

The latest census shows that our population has increased by about 2½ millions in the last ten years: a rise of 22% to a total of over 14 millions.

This means that ever-increasing new markets are being formed at the rate of one city the size of Bridgeport, Conn. *each year!*

These new markets mean new money and more customers. Retail Sales have risen 290%, and Gross National Product 160% since the last census.

This means CASH customers for your products. In fact, for years Canada has been your best customer abroad!

Getting back to people again, most of us live within 200 miles of the U. S. border (closer to you than some of your best domestic markets); but the population is spread out along the border and only 38% lives in cities of over 30,000.

On the face of it, that may sound as though the Canadian market is hard to reach—media-wise. Not so! Radio will do the job—does the job every day:

Canada's primary entertainment is Radio and over 94% of all Canadian homes have one!

Radio is your best salesman in Canada.

"In Canada you sell 'em when you tell 'em."

A message from the 103 member stations of the Canadian Association of Broadcasters whose voices are invited into over 3 million homes every day.

...for any TV power up to

200 kw!*

Typical 2-kw TV station layout for VHF (ERP range, 2 to 20 kw)

A low-cost arrangement for getting up to 20 kw ERP with an RCA high-gain antenna. The installation includes: an RCA 2-kw transmitter, control console, transmitter monitoring equipment, audio equipment, sync generator, video equipment, and power supplies.

THE drawings spread across these pages are layouts of typical TV transmitter rooms using RCA equipment. They are prepared expressly for TV station planners in accordance with the best engineering practice known today. Each plan represents the basic or minimum TV transmitter room equipment needed to get "on the air" for a specific power. Each indicates the approximate space needed for the equipment—including approximate weights of individual units. Each provides wide flexibility for equipment rearrangements to meet the special or future requirements of individual stations.

"Ready-to-use" plans like these are just one of RCA's many television services now available to you—through your RCA Sales Representative. For a complete engineering analysis of your station requirements, call this expert. He can show you exactly what you will need to get "on the air" for a minimum investment.

editorial

Compatible

LAST WEEK'S NARTB convention—marking the 30th anniversary of the trade association—was a revelation. There were no discordant notes. The association had had a good year. It has money in the bank. It parried virtually all thrusts, legislative and otherwise.

All this in another "year of decision" for radio, and on the eve of allocations designed to make provision for 2,000 more TV stations.

Harold Fellows, brought into the presidency a year ago, proved himself a broadcasters' broadcaster. He directed the business affairs of the association as he had directed a station for nearly two decades. The *esprit de corps* of the association and of its personnel has never been better.

Radio and television are living compatibly, side-by-side within the NARTB. A year ago many thought this impossible.

In its 29 years, the NAB has undergone a dozen reorganizations. As presently constituted, NARTB looks like it's here for an indefinite run.

And this proves the adage that a trade association, like government itself, is a strong as its leadership.

An Untold Story

IT WAS singularly appropriate for the NARTB convention last week to pay homage to the memory of former Senator Wallace White of Maine, who died on the eve of the Chicago convention. If it had not been for the presence of Wallace White in the House in those formative 20's, there might not have been a broadcast art as we know it today, and doubtless there would have been no 30th anniversary of NARTB.

It was Wallace White to a greater degree than any one else who was responsible for the original Radio Act of 1927, creating what was to have been a temporary Radio Commission to bring "order out of chaos." A student of communications, he was the only man in the House who had the will to tackle so complex a task. A good legislator, lawyer and statesman, Rep. White was a shy, retiring man. He feared newspaper people. The upshot was that, although he was the true author of the original law, it never carried his name. Reporters then specializing in radio gave others who talked freely, the credit for Wallace White's work.

When Wallace White transferred from House to Senate, he carried with him his interest in communications. He was largely responsible for the drafting of the Communications Act of 1934, successor to the 1927 law.

James D. Shouse, chairman of Crosley Broadcasting Corp. and vice president and director of Avco Mfg. Corp., told the story aptly to the NARTB Convention last Tuesday: Of the law, he said:

> **Those of us in broadcasting knew long before most of the rest of American business what it was to be regulated. We have been regulated by Congress since 1928, and I think it is a peculiar commentary on what has happened in this country to find that the Communications Act, under whose provisions and interpretations we have, from time to time, been restive, has through these past 24 years actually supplied us with a degree of protection from further encroachment that almost every other business wishes it had. It has been in these later years just as much a charter of freedom as it has been an act of restriction.**

We agree with Mr. Shouse. The "White Bill" was a good law. The trouble came, from time to time, with its administration.

CONCERN over apparent network invasion of national spot field through acceptance of program units heretofore classified as spot, brings problem in nomenclature too. Formally, national spot is an abstraction of "national non-network." It can't be that if networks sell it as network business and at network rates. So, at NARTB session last week where there was travail over this invasion, suggestion was made that such business (if accepted even on network owned-and-operated outlets) should be classified as "national spot network."

NARTB–No Headline

A BROADCASTER stopped us in a corridor of the Conrad Hilton Hotel last week and said: "Well, it isn't much like last year's convention, is it? No big news at all."

It all depended, we suggested, on how he defined big news. If he meant news that made splashy headlines, maybe he was right. Most big headlines are reserved for negative stories, the kind that report something unhappy or uncomfortable.

But the size of a headline is not always a measurement of the quality of the story beneath. Especially this is so of the story of the NARTB convention last week. It is a story which could be misunderstood by anyone who evaluates news by the size of headlines.

Nobody dropped a bombshell, viewed with alarm, pointed an angry finger, or resigned in disgust. The convention consisted mostly of groups of businessmen, fully aware of the seriousness of the moment and of the problems facing them, intelligently trying to find solutions. This kind of behavior may not make headlines, but it does make sense.

There was a lot of difference between the atmosphere of the 1951 convention and that of the convention last week. In 1951, panic would not have been too strong a word to use in describing the reaction of the convention to the announcement of the first radio network rate cut. In 1952, though knowing that stability still had not been fully restored, the delegates were able to look upon their problems objectively.

This change in attitude was no more conspicuous than at the meeting of the Radio Affiliates, an organization which has held only two meetings in all its life. The first occurred when the network stations spontaneously banded together in a desperate effort to shore up their defenses against depreciation of rates. The second, held last week, was no less unified and occurred under no less challenging circumstances, but none of the emotionalism that obtained at the first was evident.

Panic had been replaced by sober consideration. The second attitude guarantees a greater margin of success.

What has happened in the past year is that most broadcasters have begun to think more realistically about their business.

They know they need to know more about their business, as witness the resolutions passed by the Radio Affiliates calling for better research. They know they need equally to tell others what they know and will find out, as witness the interested and large attendance at the Broadcast Advertising Bureau hard-selling session Monday afternoon.

What kind of a headline would you write to say that in radio a significant transition has been occurring? To say that broadcasters are applying a new and more mature judgment to their trade?

Whatever headline you care to write, we suggest you examine carefully the story beneath. It is one of the most encouraging stories in the history of radio.

our respects to:

MITCHELL WOLFSON

DAMON RUNYON once said of Mitchell Wolfson: "This is the man to watch in southern politics."

Since then, however, politics has become a secondary interest with Mr. Wolfson who now is regarded by many as "the man to watch in southern television."

Television is presenting the challenge of another career for Mr. Wolfson, already a successful theatre chain operator.

He is president of Wometco, which owns the Southern Radio & Television Equipment Co., licensee of WTVJ (TV) Miami. He is also president of Theatre Owners of America, which has large-screen TV problems.

WTVJ went on the air March 21, 1949, as "Florida's First Television Station." Under Mr. Wolfson's guidance, it has become a highly successful video outlet.

Mr. Wolfson feels that "TV is, in some respects, just an extension of the theatre business.

"We built our theatre chain," he said, "around the motto, 'Courtesy, Service & Entertainment.'

"Certainly, these principles apply equally well to the television medium. Not only to the viewers but also to the sponsors, advertising agencies, networks and all other facets of the business."

WTVJ, an affiliate of ABC-TV, NBC-TV, DuMont Television Network and CBS Television, has during its three years on the air built a program structure which includes some 105 network and national shows and 92 local programs weekly—all under Mr. Wolfson's guidance.

While devoting a large portion of his seemingly endless energy to television, Mr. Wolfson also has remained loyal to his first interest—motion pictures.

He has backed his faith in theatre TV with the installation of an RCA projection unit in the Wometco's Miami Beach showplace, the Caribe Theatre.

This was installed in late December, 1951, just in time for the Orange Bowl game on New Year's Day. It drew a well-satisfied, capacity crowd and further strengthened his belief in theatre TV's future.

Mr. Wolfson was born at Key West, Sept. 13, 1900. He received early schooling in Key West and, at 14, moved with his brother, William, to New York City, where he attended Erasmus Hall and Columbia U.

After his schooling was complete, young Mr. Wolfson returned to Florida and entered business as a salesman for the East Coast

(Continued on page 69)

RADIO—AMERICA'S GREAT ADVERTISING MEDIUM

OHIO STATE MEET

Panel Groups Scheduled

SYMPOSIUM on "Improvement of Television Programming" highlights the advance program agenda of the 22d Institute for Education by Radio-Television to be held April 17-20 at the Deshler-Wallick Hotel, Columbus, Ohio, under auspices of Ohio State U.

The general session the morning of April 18 will feature "Closed-Circuit Theatre Television—A New Mass Medium?" Robert H. O'Brien, vice president, United Paramount Theatres, is scheduled to discuss the theatre owner's viewpoint.

In a discussion April 19 on new techniques in radio-TV news, Jim Bormann, director of news and public affairs, WCCO Minneapolis, and president of National Assn. of Radio News Directors, speaks on "Radio's Defense of People's Right to Know"; John Shelly, WHO Des Moines news manager, on "News and Special Events Coverage for Radio"; James Byron, WBAP-TV Fort Worth news director, on coverage for TV, and Charles Day, WGAR Cleveland news director, on "Public Relations Function of Radio-TV Newsroom."

Another highlight that day is a session on education through commercial radio stations chairmanned by Gordon Hawkins, program and educational director, Westinghouse Radio Stations Inc.

Participants in the TV symposium, which is slated to open the general session April 17, have not been announced. However, speakers who represent commercial and educational TV, FCC and the public have been invited.

Topics to be discussed during the Institute's sessions also include, among others, broadcasting and international understanding, broadcast problems of teacher training institutions, broadcasting in school public relations, "What's Doing in School Telecasting?", progress report on teaching with tape, radio writing and production, youth discussion broadcasts, training by television, educational TV, research, student training, government and religious broadcasting.

FCC Comr. Edward M. Webster is slated to speak the morning of April 19 on "How Has International Broadcasting Been Affected by Allocations Conferences of the Last Six Years and by the Most Recent Geneva Allocations Conference? What Lies Ahead?" His talk is part of a work-study of broadcasting to foreign countries. FCC Chairman Paul A. Walker also is scheduled to take part in a work-study panel on "Are Organized Listener Groups Really Doing an Effective Job?"

Annual Institute dinner will be held the evening of April 19 featuring a special one hour symphony program illustrating both the *Standard Hour* and the *Standard School Broadcast* presented by Standard Oil Co. of California. Dinner speaker will be "Oliver J. Dragon" of NBC-TV's *Kukla, Fran and Ollie*.

Registration will be from noon to 8:30 p.m. April 17 in the main lobby of the hotel and from 9 a.m.-8:30 p.m. during the remainder of the Institute's sessions.

When measuring up the St. Louis Market...

Remember...

KWK delivers listeners in the St. Louis area at the lowest average cost per thousand* 15 out of the 18 hours of the broadcast day!

CHASE TAKES LEAVE

To Advise Eisenhower Group

HOWARD CHASE, public relations director for General Foods, has taken a leave of absence to serve as full time consultant to National Citizens-for - Eisenhower campaign, Paul Hoffman, advisory committee chairman, announced last week.

Mr. Chase

During past two years, Mr. Chase has served as consultant to the Secretary of Commerce, assistant to the first administrator of National Production Authority and assistant to the director of the Office of Defense Mobilization. He has taught international relations at Harvard, Radcliffe and Drake and has been an editorial writer for the *Des Moines Register & Tribune*. He still serves as a public relations committee member of the Association of National Advertisers.

front office

H. W. MAIER Jr., manager of Dallas office of John E. Pearsons Co., station representative, named account executive for both CBS Spot Radio and CBS Spot TV in southwestern states, with headquarters in Memphis.

DUNCAN R. BUCKHAM, former eastern sales manager for MBS, to DuMont Network sales staff as account executive.

JACK D. FREW, commercial manager, WJPS Evansville, Ind., to KITO San Bernardino, Calif., in similar capacity.

ROBERT N. WOLD, promotion manager, WTCN-AM-TV St. Paul-Minneapolis, to WBBM Chicago as sales service and merchandising manager.

Mr. Wold

ARNOLD BENUM, program director-promotion manager, KITO San Bernardino, Calif., placed in charge of station's Riverside studios and sales department. Succeeding him is **FRED REINHARDT**, station farm director.

DOUG FISHEL, assistant manager-farm director, KXO El Centro, Calif., to KGER Long Beach as account executive.

ROY MALONE, account executive of CKCK Regina, named commercial manager succeeding **GIL SEABROOK**, who resigned to become manager of CJIB Vernon, B. C.

POWELL ENSIGN, sales manager, Everett-McKinney Co., N. Y., elected vice president.

NATIONAL TIME SALES appointed station representative for WJET Erie, Pa.

Personals . . .

JOHN W. ROLLINS, president of WFAI Fayetteville, N. C., WJWL Georgetown, Del. and WRAD Radford, Va., elected vice president of Young Presidents Organization at March meeting in Boca Raton, Fla.

TED ARNOLD, local sales manager, WHBF-AM-TV Rock Island, Ill., elected exaulted ruler Rock Island Elks Lodge No. 980.

JOE FISHER, sales manager of WENR-TV Chicago, father of boy, March 1.

RALPH J. ROBINSON, executive vice president and general manager, WACE Chicopee-Springfield, Mass., father of girl, Mary, March 13. . . . **JOHN AKERMAN**, general manager of KMOX St. Louis, accepted award from Salvation Army on behalf of station's annual fund raising drive for unfortunates in the city at Christmas. Citation presented at annual dinner in St. Louis fortnight ago. . . . **TED COTT**, NBC vice president and general manager of WNBC and WNBT(TV) New York, awarded plaque last week for organization of Dean Martin-Jerry Lewis Telethon to benefit New York Cardiac Hospital.

FEE FORMULA

Canadian Court Test Seen

CANADIAN broadcasters are studying plans to court-test the ruling of the Canadian Copyright Appeal Board under which ASCAP's Canadian affiliate, Composers, Authors & Publishers Assn. of Canada (CAPAC) has been given the right to examine the books of radio stations to determine gross revenue on which their 1952 fees are based.

The Canadian Copyright Appeal Board's ruling was announced at Ottawa late March 27, last day of the annual meeting of the Canadian Assn. of Broadcasters at Toronto [B•T, March 31].

Under the new ruling, CAPAC will collect for 1952 from independent broadcasting stations 1.75% of gross revenue, which will amount to about $350,000, as compared to fees collected from these stations in 1951 amounting to $152,421. Canadian Broadcasting Corp. will pay CAPAC one cent per capita of population plus 1.75% of its gross commercial revenue. This will amount to $175,000 as compared to $152,421 in 1951. Previously the fees had been based on the number of licensed radio receiving sets at 14¢ per set, with the total divided evenly between CBC and independent stations.

Greatest increase in cost will be on the smaller independent stations, some of whose CAPAC fees will be increased tenfold. In other years under the licensed receiver formula, the major market stations had borne the bulk of the cost. The large number of small stations obtain half their revenue from non-musical programs, and Canadian stations feel that CAPAC is not entitled to revenue from such programs.

In a statement following an emergency meeting of CAB, the association stated that "the collection agency for these royalties is incorporated in Canada but is controlled abroad and is part of a gigantic international cartel of publishers. Consideration is being given by Canadian broadcasters to specific steps that might lead to litigation of this drain of Canadian dollars to foreign countries, including the decreased use of foreign music, especially that controlled in the United States."

At the Copyright Appeal Board hearings held in January, CAPAC had asked for 2.25% of gross commercial revenue and 4/5ths of a cent per capita of population. This would have brought payments from independent stations to about $562,000 for 1952. The new payments are retroactive to Jan. 1, 1952.

At the same hearings, fees were set as asked for by BMI Canada Ltd. at 2¢ per licensed receiver. Canadian broadcasters are expected to decide soon whether or not they will only play BMI Canada Ltd. music, which now has a large number of Canadian compositions on its list. They have been preparing for the current emergency by labeling all their music as under BMI, CAPAC or public domain. A number of stations are expected to start at once to use only BMI Canada Ltd. music, and will pay for CAPAC music used in the first three months of 1952 on a pro rata basis.

A test case is expected on the first request of CAPAC officials to examine any station's books.

HERE is the 1952-53 board of directors of Canadian Assn. of Broadcasters, following election at CAB annual meeting at Toronto [B•T, March 31]. Seated (l to r): Ralph Snelgrove, CKBB Barrie; Dr. Charles Houde, CKNC New Carlisle; Malcolm Neill, CFNB Fredericton, chairman; Gordon Love, CFCN Calgary; Wm. Speers, CKRC Winnipeg; standing, J. Arthur Dupont, CJAD Montreal; E. A. Rawlinson, CKBI Prince Albert; F. H. Elphicke, CKWX Vancouver, vice chairman; Finlay MacDonald, CJCH Halifax, and Henri Lepage, CHRC Quebec. Absent is Ken Soble, CHML Hamilton.

RATING STUDY

BBM to Direct in Canada

DECISION to set up an industry controlled rating organization under the Bureau of Broadcast Measurement, Toronto, was taken at a special meeting of the member stations of the Canadian Assn. of Broadcasters March 27 at Toronto.

The CAB went further than the research and development committee of BBM in its report, which recommended a research directorate be established at an annual cost of $25,000 to start to specify minimums for rating services in Canada [B•T, March 31]. Study is to be made with the Assn. of Canadian Advertisers and Canadian Assn. of Advertising Agencies, which are also partners in BBM. BBM would establish a fulltime research organization for ratings, and if necessary gather the ratings itself.

The BBM surveys on coverage are recognized as authoritative in Canada, having been worked out by a body representing advertisers, agencies and broadcasters. It is expected that such a BBM-operated service will cost about $40,000 annually.

IMPACT RADIO SALES, Detroit

TELEPHONE STATUS

Strike Would Complicate

NATIONAL telephone strike, a possibility if CIO Communications Workers are required to cross picket lines of installations and sales divisions of Western Electric Co., may add considerably to broadcasting headaches, it seemed late last week, but would not disrupt radio and television reception.

Western Electric workers—set to strike in 43 states today (Monday)—as well as any strike sympathizers would be replaced by nonunion supervisory personnel. Although television's use of telephone lines is generally handled by network personnel and would therefore be free of stoppages during this strike, radio use of telephone facilities for remote pickups might be affected, American Telephone & Telegraph officials reported.

In that case, networks would be asked to limit their number of remotes, which would, at worst, effect programming schedules but would not cause noticeable changes as far as the radio audience is concerned. Only real concern for broadcasters last week was that if a full telephone strike lasted some months, relay equipment breakdowns might take several days to repair.

WTIC Hartford, Conn., has begun broadcasting at 6:55 a.m. Sunday instead of 7:30 a.m. News and music program fill additional time.

Three $200 Wrist Watches for the Best Answers:

How Many Square Miles Will KBIG Cover?

Simple, quick and easy! Fill in below, and mail to KBIG, your estimate of how many square miles of land KBIG will cover within its half-millivolt area. Here's some information to help you make the most accurate estimate: KBIG will focus 10,000 watts of sealed-beam power on 740 kilocycles daytime, directing it across the great salt water route to Southern California from a triple-tower antenna atop Catalina Island.

We have three beautiful $200 Chronograph wrist watches (or if you prefer, 17-jewel ladies' wrist watches)—one for each of those whose estimates come closest to the actual coverage, as determined by an independent FCC-approved consulting engineer.

Any principal or employee of advertising agencies (save our own) and advertisers may enter. Entries must be postmarked no later than May 1. Judges decision final. Winner announced within two weeks after start of broadcasting in early May. If ties, duplicate prizes awarded.

SIGNING of pact for 300 spots per week in the Detroit area for Robert Hall Clothes was announced last week. Those participating include (front row, l to r) William Wardell, CKLW Windsor-Detroit; Jerry Bess, vice president, Frank B. Sawdon Inc., agency; Lee Wailes, WJBK Detroit; back row, George Millar, WKMH Dearborn-Detroit; H. Y. Levinson, WCAR Pontiac, and Harold Christian, WXYZ Detroit.

CONTROLS

Legislation Marks Time As Steel Strike Pends

CONGRESSIONAL consideration of economic controls reached an impasse on Capitol Hill last week as Senate and House committees marked time on the Capehart cost allowance formula and other unfinished business.

Deliberations on extension of the Defense Production Act beyond next June 30 were sidetracked because of the sudden resignation of Charles E. Wilson as defense mobilizer (see story page 72) and the threatened industry-wide steel strike.

The Senate Banking & Currency Committee has concluded hearings and plans to go into executive session this Wednesday, scheduling study of the Capehart advertising formula and other provisions of the controls law. Chairman Burnet Maybank (D-S. C.) hopes to report out a bill by this weekend.

The House Banking Committee, under Rep. Brent Spence (D-Ky.), has postponed hearings until after the House Easter recess, slated to end April 21. Mr. Wilson originally was scheduled as leadoff witness.

An atmosphere of pessimism has pervaded both committee quarters as a result of the steel strike, set for this Wednesday. There are predictions that continuance of wage-price controls would make economic control extension difficult. Consensus now is that the production act will be renewed for another year, as voted unanimously by the committee, rather than for two years as sought by the administration.

Cost-Allowance Formula

Fate of the cost-allowance formula, authored by Sen. Homer E. Capehart (R-Ind.) as a method of permitting manufacturers to compute advertising, selling, administration and research costs, still hangs in the balance. Sen. Capehart has shown no willingness to fight for retention of this amendment.

The Republican Senator was active, however, in attempts to ease credit restrictions for radio-TV buyers. His bid was beaten down in committee by a 7-6 margin. Sen. Capehart originally suggested abolition of Regulation W and later proposed terms calling for 10% down and 24 months to pay on set purchases. Current terms call for 15% down and 18 months maturity.

Price Stabilizer Ellis Arnall has advised the Senate group that ceiling price boosts resulting from the Capehart cost amendment totaled $806.2 million as of March 14. Increases from appliances and equipment alone (radio-TV receivers, etc.) amounted to $46,793,200 of all consumer goods price hikes over normal ceilings. Over 1,000 applications were filed for these benefits, Mr. Arnall reported.

Manufacturers have been permitted to apply for these benefits on the basis of costs accrued from the start of the Korean war to July 26, 1951, the cutoff date.

The committee, in unanimously voting extension, rejected, 9-4, a Capehart proposal for a nine-month extension.

Two Developments Involved

Meanwhile, there are two collateral developments involving Capehart ceiling price adjustments and manufacturers' warranties, hinging on actions taken by the Office of Price Stabilization.

OPS has authorized manufacturers who produce replacement parts—and who already have computed cost adjustments under the Capehart plan—to apply for adjustments on those parts. These firms are covered by general ceiling price regulations (CPR 22).

The agency also notified manufacturers they must obtain express permission before jumping ceiling prices on the basis of long-term warranties. Customary warranties are one year. OPS said it was informed that some manufacturers are violating regulations by offering two, three and five-year warranties at new low prices without applying for approval. While technically applicable to set makers, the order is aimed at air conditioning and refrigerator producers.

Authorities said they knew of such practices in the radio-TV set industry, for which tailored regulations are still under study at OPS. OPS is surveying manufacturers on warranties, model types of receivers, selling prices and other aspects.

While set manufacturers and makers of phonograph records and record players technically are bound by control laws, a substantial number have been selling their products below ceiling prices to meet competition in the industry.

TEST AUTHORITY

FCC Claims Legal Right

ALTHOUGH WHIL Medford, Mass., has applied to change from 1540 kc to 1430 kc—which would eliminate its conflict with WMEX Boston—principle of the legality of FCC program test authorizations is still being argued in U. S. Court of Appeals in Washington [B•T, March 17, 3; Feb. 18].

FCC last week replied to WMEX petition that the Commission should withdraw program authority it granted WHIL [B•T, March 3]. The Commission claimed that it has the proper legal right to issue program test grants and that WMEX's argument that such authority is illegal has no foundation.

In answer to WMEX's argument that, since the Commission accepted proof that overlap of both stations' 25 mv/m contours existed, (WMEX is on 1510 kc) program authority of WHIL should be revoked, the FCC stated that it felt the public interest required that the status quo be maintained until the issues were decided at the scheduled WHIL license hearings. These hearings were scheduled for today (April 7) but were postponed when WHIL applied to change its frequency.

Oral arguments on the questions are due to be heard by the Court of Appeals in the near future.

Query to Stalin

PREMIER Josef Stalin's statements about the imminence of a third world war—widely quoted last week and attributed to "a newsman's questions"—were prompted by radioman Ronald B. Woodyard of WONE, Mutual affiliate in Dayton. As president and general manager of WONE, Mr. Woodyard was touring Europe with 40 other newspaper and radio editors, a group which had sought permission by wire from Istanbul to interview the Russian premier. At Mr. Woodyard's suggestion, they also wired four questions from Rome, thereby cueing the official Soviet release.

FRED GRIMWOOD

Gates Sales Mgr. Dies

FRED GRIMWOOD, 42, vice president and sales manager of the Gates Radio Co., Quincy, Ill., died Tuesday.

Mr. Grimwood

Mr. Grimwood had been in Laurel, Miss., arranging for inspection and final shipment of military equipment. He became ill when returning and was hospitalized immediately upon his return to Quincy.

A consulting engineer, Mr. Grimwood went to Gates 10 years ago in the post of chief engineer. In 1946, he was made sales manager, when later the same year was elected a director and vice president.

Mr. Grimwood was a native of Terre Haute, Ind. He leaves his wife, Shirley Cleo, and his parents.

KGW HONORS CITIES

Gains Local Acceptance

CAMPAIGN of KGW Portland, Ore., to promote 13 communities in its area in a series of advertisements is gaining wide acceptance among local merchants, according to H Quenton Cox, station manager.

First community so honored—Gresham—actively participated in the promotion with the mayor and city council proclaiming "KGW Days" for a two week period. Additionally, members of leading civic groups joined in broadcasts from Gresham saluting the city and KGW. Stores used window displays and street banners flew the legend, "KGW Comes to Gresham." The advertisements, which also appear in BROADCASTING • TELECASTING, will continue through the year with possibly additional "honor" series pointing up various Portland suburbs and Oregon cities.

DR. L. W. CHUBB

Radio Scientist Dies

DR. LEWIS WARRINGTON CHUBB, 69, director emeritus of Westinghouse Research Labs., died Wednesday at his home in Wilkinsburg, suburb of Pittsburgh.

A world-renowned scientist, Dr. Chubb served Westinghouse 42 years, spending the last 20 as research director. He retired in September 1948.

During his two-score years of service, Dr. Chubb helped develop commercial radio broadcasting for the pioneer station, KDKA Pittsburgh.

In 1920, he was chosen to guide Westinghouse radio activities.

"At that time," he recalled later, "we were unable to envision the real future to radio. The state of the art indicated that there might be a few million dollars worth of business before market saturation, as radio seemed applicable only to emergency use at sea, ship-to-shore service and for telephonic communications where wires could not be used."

Among other affiliations, he was a member of the Institute of Radio Engineers.

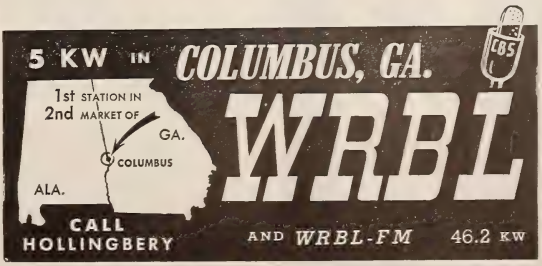
Surviving are his wife, the former Mrs. Ora Lee McGregor of Pittsburgh; three sons, and four brothers.

ARMED FORCES DAY

Promotion Kits Are Issued

KITS containing suggested material for observance of Armed Forces Day May 17 are being mailed to radio and television stations, Charles Dillon, chief of the Radio-TV Branch, Dept. of Defense, announced last week.

In addition, the Office of Public Information is mapping plans with individual radio and video networks for paying tribute to the services, Mr. Dillon said. Information also is available from information officers at all military installations who will offer their assistance to local station managers.



Radio folders will include a 15-minute script, statements from top defense authorities and background materials. A slide and 20-second film trailer is being sent to TV stations.

Foster May

FOSTER MAY, 46, former WOW Omaha radio newscaster and commentator and Nebraska political figure, died March 31 in San Diego, Calif., after a lengthy illness. With WOW for many years, Mr. May's specialty was man-on-the-street interviews. He ran on the Democratic ticket for U.S. Senator from Nebraska in 1942 and was a candidate for Nebraska secretary of state in 1950. He served on the Omaha *Bee-News* before entering radio. Survivors are his wife, two daughters and his parents.

WRBL delivers 18.7% MORE COVERAGE than ALL OTHER media in Columbus' 26 county trading area. This booming market with a population of 600,161 spent $310,780,000 in 1950 . . . and Columbus shows sales increases in every category for 1951. To get your share of the business at the lowest cost per thousand, there is only ONE BUY—the Champ of Columbus—WRBL, the station for audience, coverage and merchandising support.

GUEDEL, CBS

Sign Five-Year Contract

IN A deal unprecedented in radio-television, John Guedel Radio Productions and CBS have signed a five-year contract involving more than $30 million in time and talent for the first half-hour daytime strip, coast-to-coast commercial "adjacentcast" emanating from Hollywood.

Starting Sept. 1, Art Linkletter's *House Party*, packaged by Mr. Guedel's firm, will be telecast live to the full CBS-TV network, with a radio version taped at same time and released to CBS Radio immediately following. Show will originate from the Earl Carroll Theatre.

Arrangement, pioneered by Guedel Radio Productions, in producing *You Bet Your Life*, radio and TV shows with Groucho Marx, gives the advertiser complete coverage in all markets via both media with sponsor paying only TV production costs. Pillsbury Mills and Lever Bros. will split the cost under the new *House Party* arrangement, with program continuing through summer on CBS Radio.

Change in billings starts May 5, with program going to full half hour June 1.

Deal gives Mr. Linkletter six half-hours weekly on radio (including NBC *People Are Funny*) and five half hours on TV.

air-casters

DR. ROY K. MARSHALL, educational director, WFIL Philadelphia, presented first annual award of achievement by Fathers Assn. of Strawbridge School, Westmont, N. J., for popularizing scientific subjects on TV.

MANNY WRIGHT, WFMW Madisonville, Ky., to KTLW Texas City, Tex., as program director.

Mr. Wright

CLARENCE ELIASON Jr., personnel director Gunther Brewing Co., Baltimore, to CBS Hollywood in similar capacity.

TED LLOYD, announcer and radio actor, joins announcing staff of WOAI-AM-TV San Antonio, Tex.

BILL GRIBBEN joins announcing staff of WSB Atlanta.

BOB JONES, news director at WHHM Memphis, Tenn., appointed program director replacing **JACK BROOKS** who resigned because of illness.

STU WILSON, moderator ABC radio *Hollywood Flying Feet* and announcer KLAC-TV *Leo Carillo Dude Ranch Varieties*, adds daytime duties with KBIG Avalon, Calif. as producer, manager and director of special events effective May 1.

ROBERT E. LEE promoted to program operations supervisor at WAAM (TV) Baltimore, replacing **HARRIETT GEORGE** who joins Red Cross as coordinator of recreation activities in military hospitals.

PAUL LUTHER, WLWT (TV) Cincinnati, to WWJ-TV Detroit, as m.c. of daily *Open House* replacing **TED JOHNSON** who resigns because of other TV commitments.

Mr. Luther

ROBERT S. KELLER Inc., N. Y., named national sales promotion representative for WDVA Danville, Virginia.

JOHN MERRIFIELD, WWJ Detroit farm director, awarded Honorary State Farmer degree by Michigan Assn. of Future Farmers of America.

KIT FOX, director of special broadcast services, WLW Cincinnati, chosen candidate for "Advertising Woman of the Year" award by Cincinnati Advertising Club.

BOB RIERSON, assistant program director, WBT Charlotte, N. C., named director of radio there.

TEX WILLIAMS, western singing star of NBC radio *Round-Up Time* and *Western Songs and Music*, received Presidential award from Goodwill Industries of America Inc. for service in providing entertainment for handicapped.

DOROTHY MacFARLAND and **DON DAVENPORT,** both of WXYZ Detroit, will be married Sept. 6.

WALLACE G. RAY, assistant manager of KBLF Red Bluff, Calif., to KNBC San Francisco as announcer.

PETER JAMIERSON to WTTG (TV) Washington on announcing staff.

GERALD A. PIERCE, production chief, WIBU and WWCF (FM) Poynette, Wis., to KRES St. Joseph, Mo., as program director.

ALLAN CURTIS, WFGM Fitchburg, Mass., to WWNH Rochester, N. Y., as announcer-disc jockey.

RUTH ANNE FLAHERTY, WTOP-TV Washington, to WMAL-TV that city, for daily show, *Miss Ruth Anne's Kindergarten.*

CHUCK CECIL, staff announcer, KARM Fresno, Calif., to KFI Los Angeles in similar capacity.

TOM CARY, KFNF Shenandoah, Iowa, to announcing staff of KMTV (TV) Omaha, Neb.

BLAINE HANKS, announcer, KMCM McMinnville, Ore., to KOIN Portland, in same capacity.

SIDNEY NADLER, film editor, WOR-TV New York, to WXEL (TV) Cleveland in similar capacity.

GAIL POTTER, director of speech and drama, Southern College, Lakeland, Fla., to WFLA Tampa, Fla., as director of education and public service.

Miss Potter

W. T. McCLARIN, promotion and merchandising manager, KVOO Tulsa, Okla., elected president of Tulsa Optimist Club effective in June.

MARTIN BLOCK, WNEW New York disc jockey, to write monthly column in *Redbook* magazine commencing with April issue.

EARL L. DAHLSTROM, program director at KLIX Twin Falls, Ida., assumes similar duties at KRJF Miles City, Mont.

DON L. PIERCE, program director, WRRF Washington, N. C., re-elected to board of directors of Washington Junior Chamber of Commerce.

FRED HUCKMAN and **HUGH JARRETT** to WESC Greenville, S. C., on announcing staff.

CARL ZIMMERMAN, announcer, WSYR Syracuse, father of girl, Terry, March 27.

DON CLARK, director CBS Radio *Stars Over Hollywood*, father of girl, March 24.

MILO TOWNES, news editor, WAND Canton, Ohio, to WSRS Cleveland news staff.

Mr. Townes

BARBARA WILLIAMS joins news staff of WHAS Louisville, Ky.

CHARLES NORWOOD, WTHT Hartford, Conn., to WNHC-TV New Haven as newscaster.

ROY NEAL, news editor-producer, WPTZ (TV) Philadelphia, to NBC-TV Western Division as news director.

ATOM COVERAGE

More Reporters Allowed

ATOMIC Energy Commission is permitting 30 additional radio-TV news people to the contingent of broadcast network personnel already signed to cover the atomic explosion test in Las Vegas, Nev., set sometime after April 19.

AEC announced its plan last Monday in answer to a protest by the Radio Correspondents Assn. in Washington, D. C. The association's president, Hollis M. Seavey (MBS), and Bill Shadel, CBS, met with Charter Heslep, chief of AEC's radio-visual branch March 28.

The correspondents noted in their letter that "with a special event of this magnitude in prospect, it is reasonable to suppose that correspondents from stations throughout the country will want to report the story first-hand for their respective audiences." Deadline for radio-TV newsmen interested in taking part in the coverage was today (April 7). Contact was Mr. Heslep, AEC, Washington, D. C.

ALASKAN RADIO

Four Advertisers Buy Time

SERIES of newscasts, spot announcements and station breaks have been bought by four U. S. stateside advertisers on two Alaskan radio stations operated by the Midnight Sun Broadcasting Co.—KFAR Fairbanks and KENI Anchorage—Gilbert A. Wellington, Midnight national advertising manager, announced March 28.

Procter & Gamble will sponsor 52-week spot campaign over both stations to advertise Spic 'n' Span. Agency is the Biow Co., New York. Newscasts will be sponsored by Lang & Co., Seattle, for its Gold Shield coffee. Pacific National, same city, handles account.

Station breaks were bought for 52 weeks by Avoset Co., San Francisco, for its Avoset and Qwip. Agency is Harrington-Richards, same city. Rounding out two-station schedule is J. A. Folger & Co., which purchased 26 weeks of announcements for its Folger coffee. Raymond R. Morgan, Hollywood, is agency.

RECRUITING

Media Monies Asked

MILITARY recruiting authorities have been assured by a Congressional subcommittee that $1,050,000 sought for radio, TV and other advertising after July 1 is a "reasonable amount" and will receive favorable consideration.

Officials of the Military Personnel Procurement Service testified before a House Appropriation Army subcommittee March 26 on the Army Air Force recruitment advertising budget for fiscal 1953. Subcommittee, headed by Rep. Robert L. F. Sikes (D-Fla.), has not made its recommendations yet.

Despite this favorable development, there were no indications that Congress would lift its current freeze on current '52 monies. Additionally, about $170,000 of an estimated $900,000 remains unexpended from fiscal 1951 budget. From $530,000 to $550,000 was allocated prior to March 1 for an interim advertising campaign involving a spot campaign on some 500 Keystone Broadcasting System stations and 13 other 50 kw outlets [B•T, March 17, February 11].

The controversial '52 ban was not discussed during the brief session on Capitol Hill. Recruiting officials are thus confused over their next moves in the advertising hassle, prompted by Congressional criticism which resulted in withdrawal of network programs. Thus far, no action has been taken to lift '52 prohibition on $2.1 million for national advertising.

Before the recruiting picture clears, these steps must be taken:

(1) Authority must be obtained, first for MPPS to spend the $170,000 still unexpended from fiscal '51 funds. The current interim campaign expires July 1. Radio-TV has a stake in this sum, though its share has not been worked out. About $200,000 was spent on network shows dropped last fall.

(2) Congress must r e s c i n d Amendment 8 of the 1952 Military Appropriations Act unfreezing the $2 million-plus now tied up. Again, broadcasters' allocation hinges on this eventuality. Report that repeal would be sought in the form of a deficiency bill has not materialized yet. MPPS authorities hope for action by May 1.

Congressional Approval

(3) Congress must approve the '53 bill. Recommendations of the subcommittee will be forwarded to the full House Appropriations Committee, sent to the House floor, be taken up by a Senate subcommittee and be voted on by the Senate.

The Senate subcommittee is headed by Sen. Joseph C. O'Mahoney (D-Wyo.), under whose leadership the ban was imposed. The Senator is expected to participate in decisions involving the Pentagon's request for lifting the prohibition on the $170,000 and $2.1 million. Permission to spend the $550,000 out of '51 expenditures reportedly stemmed from conferences between Sen. O'Mahoney and Anna Rosenberg, Defense Dept. manpower specialist.

NARTB has requested a breakdown of all monies spent on radio-video since July 1, 1951. Radio is allotted about 18% of current monies and 46% of all funds spent since that date. MPPS authorities plan to submit the breakdown to NARTB President Harold E. Fellows.

Appearing for the recruiting program before the subcommittee were Brig. Gen. Omar Niergarth, MPPS chief; Col. James Banville, deputy chief, and Col. William Berkeley, publicity branch director. They spoke on behalf of voluntary recruiting, induction center and other activities.

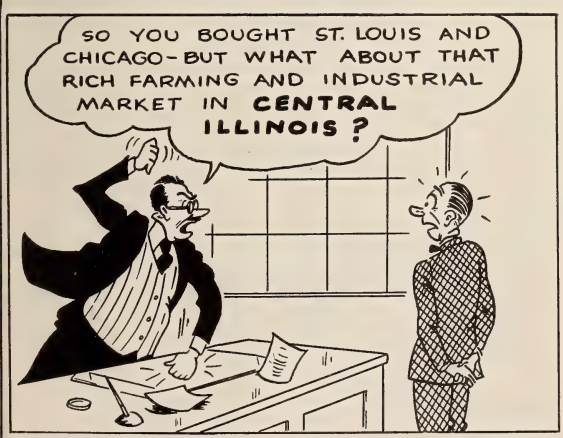
These officials asked the subcommittee for a free rein to use '53 funds in a manner best suited to personnel needs, with directionalized allocations for radio, television and other media. Because of Congressional protests, plans now envision spot announcements rather than network productions.

CHARLES MICHELSON Inc., N. Y., transcription concern, will handle U. S. release of *The Happy Gang*, daytime musical-variety show carried on Canadian Broadcasting Corp. network by Colgate and Quaker Oats.

AD COUNCIL POSTS

Witting, Trammell Named

CHRIS J. WITTING, director and general manager of the DuMont Television Network, was named to represent the broadcasting industry as one of four new directors elected to the Advertising Council last week [B•T, March 31].



Simultaneously, Niles Trammell, chairman of the NBC board, was elected a director-at-large, with Fairfax M. Cone, president of Foot, Cone & Belding and former chairman of the Advertising Council board, and William G. Chandler, president of Scripps-Howard Supply Co., similarly designated.

Besides Mr. Witting, the new directors are Harry F. Byrd Jr., publisher of two Virginia papers, and Bennett H. Fishler, New Jersey editor and publisher, both to represent the newspaper industry, and Richard E. Deems, general advertising manager of Hearst Magazines, magazine industry representative on the Advertising Council board.

Theodore S. Repplier was re-elected president of the public service advertising organization, and Allan M. Wilson and George P. Ludlam were again named vice presidents.

KMPC Hollywood has banned Capitol Records' release of *Try* by Stan Freeberg, the voice of Cecil on KTLA (TV) *Time for Beany*.

TIME BUYING FOR '52 . . . by WSOY and WTAX

NOTE: The largest market in Illinois outside of Chicago is covered by WTAX and WSOY. This tremendous market has 261,850 families with a population of 733,900. 66,671 industrial workers earn a total of $179,602,000.00 each year. The net farm annual income is $457,403,000.00—$9,016.00 income per farm family, OVER TWICE the national average.—$782,738,000.00 total annual retail sales. This major market is YOURS AT APPROXIMATELY ONE-HALF the cost of any other major market in the U.S.

'AMERICA'S HOUR'

Kirby Plan Aid Promised

ADVERTISING is taking up the cudgels on behalf of a campaign to recharge civilian and military morale and drive across the validity of America's fighting cause in this election year.

Progenitor of the idea is Col. E. M. Kirby, chief, Radio-TV Branch, Dept. of Army, who envisions "an antiphonal America's Hour . . . which radio with the leadership of The Advertising Council can bring to ears hoping to hear, and soon."

Col. Kirby appropriately broached the plan with Theodore Repplier, council president, at the annual Voice of Democracy contest luncheon last February. Actually, the Army radio-TV information chief had been toying with the idea since last fall when he conceived the notion of an *America's Hour* on radio [CLOSED CIRCUIT, Sept. 3, 1951].

Using simple good old-fashioned patriotism as the theme—against a "cross-fire of political battle and controversial charges" traditional in a Presidential election year—Col. Kirby has called on the broadcasting and advertising industries to approach this "two-way street" of civilian and military morale.

Already, promises of cooperation have been given fortuitously by The Advertising Council, American Assn. of Advertising Agencies, the Advertising Assn. of the West, the Assn. of National Advertisers and such organizations as the Coca-Cola Co., as well as NARTB.

Mr. Repplier has contacted Paul W. West, ANA president, and Frederic R. Gamble, AAAA president, on behalf of the Kirby proposal. The results have been gratifying.

Mr. Repplier advised Mr. West that the Army radio-TV chief has posed a "very real problem," one which concerns every citizen. He suggested the Kirby letter be circulated among ANA members. "For example, there may well be opportunities on many radio shows to introduce a spot which reminds people that there are men in American uniforms around the world protecting our right to sit home in an easy chair before a radio or television set," Mr. Repplier explained.

Another possibility, he felt, is the use of film from Korea on some shows, with the announcer reminding viewers "that we have a lot of boys in uniform doing a lot of unpleasant jobs." The boys, seeing such evidence in these shows overseas, "will feel much less like forgotten men," he added.

Mr. Repplier advised Mr. Gamble that while advertisers are the "controlling factor" in lending assistance, "certainly there are ways in which some of the agencies might help." He urged the proposal be circulated through the AAAA's. Mr. Gamble thought the idea "splendid" but suggested distribution through the ad council.

Others Interested

In point of concrete results, Robert C. Coleson, Pacific Coast representative of the Advertising Council, conferred with Neil Reagan, president of the AAW, who in turn asked 42 member ad clubs in 11 western states to publicize the plan at their luncheon sessions. In addition, Art Linkletter promised to push the idea in his network shows, Mr. Coleson reported.

Mr. West expressed interest in the proposal and promised "we will do everything we can" upon his return from the ANA convention in Hot Springs, Va., held last month [B•T, March 24].

Similar interest was conveyed by Felix W. Coste, vice president of the Coca-Cola Co. He suggested the overall project be under-written by the Advertising Council which "could do the job most effectively."

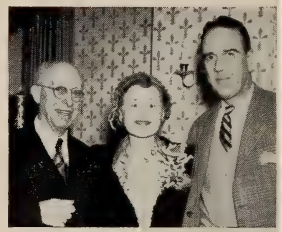
Part of the broadcast work in which Col. Kirby has continued to pioneer is reflected in the TV series, the *Big Picture*, which has expanded to some 83 TV outlets. Stations carrying the series have been given certificates and the programs enter a second phase today (April 7) [B•T, March 31].

In the letter he circulated to Mr. Repplier and others, Col. Kirby noted that "it is obvious the 'military' is caught in the increasing cross-fire of political battle and controversial charges." He termed it a "specific democratic luxury for which the military are at defense stations throughout the world today," and quoted a recent Gallup poll in which almost 60% felt the Korean action was "unnecessary."

He continued:

Somewhere a voice in the wilderness of electronic sound is needed: a voice with not political overtones, but a voice from and to the center of main street *America* that makes a man with a rifle in Korea feel that he *is* needed there, his family proud to have sent him there, and his country continuously anxious as to his whereabouts, aware of his accomplishments, his wants, and his desires. This is that two-way street we were talking about. . . .

"No one can have all the answers for radio and the Advertising Council, but it seems sure it's more than a spot announcement campaign" and news analyses, Col. Kirby said. Using fragmentary sketches as examples Col. Kirby concluded: "It's the sound of all these things, all these people, all the services, all America. . . ."



The BIGGEST rural and small town AUDIENCE in Mid-America

More rural and small-town homes are tuned in to KCMO than to any other station in the area—according to the newly-completed Conlan "Study of Listening Habits" in Mid-America. Your message on KCMO reaches them through programming planned to fit their needs. It's a big, prosperous, loyal audience—and you can reach it *best* with KCMO.

The two performers, natives of Greater Cincinnati, have starred in the *Ma Perkins* radio series more than 18 years. Show started on WLW.

RIAS EXPANDS SCHEDULE

Now on 24-Hour Basis

IN A BID to counteract all-night programming of a communist radio network in Germany, the American radio station (RIAS) in Berlin has inaugurated around-the-clock operation with addition of two extra hours, the Dept. of State has announced.

RIAS has activated a transmitter at Hof, Bavaria, and fanned out its 22-hour daily schedule through the 3-5 a.m. period, it was explained. Five-minute newscasts are aired during the extra hours. The Hof transmitter will complement RIAS shortwave and wired transmitting facilities in a move to offset programming of a five-station Soviet-zone communist network. Service is aimed at listeners in Berlin and the Soviet zone.

AIR FORCE FUNDS

Electronics Projects Asked

FUNDS for electronics—for major procurement including Air National Guard equipment and research and development projects — are contained in an Air Force appropriations bill studied by the House Appropriations Committee.

Air Force officials told an appropriations subcommittee, headed by Rep. George H. Mahon (D-Tex.), that the electronics program calls for monies for research and development, testing of airborne and ground radio, and radar equipment for piloted and pilotless aircraft.

Included in the Air Force budget are a request for laboratory funds ($14.1 million-plus), travel costs ($804,000), and research and development ($2.2 million-plus).

Sum of $3.2 million-plus is sought for the Air National Guard, covering such items as "major radio, radar, telephone and communications center equipment" with test equipment. Fiscal 1953 estimate for UHF communications equipment is $39.8 million.

An estimate which placed average cost-per-pound of airborne electronics items or similar components at $46 and average cost-per-pound of ground electronics or communications systems at $6, was revealed during the hearings.

The Air Force also requested $48.4 million for procurement of "on-base communications" equipment. These include radio relay, facsimile, and other services not provided under authorized allowances.

DEFENSE OPI

House Group Orders Slash

CONTINUING its attack on Pentagon "publicity" operations, the House Appropriations Committee last Thursday ordered the Dept. of Defense to slash its Washington public information force by over 75%. The group took this action in reporting out the department's 1953 appropriations bill, which the lower chamber will take up today (Monday).

There was no immediate indication as to how the reduction would affect media operation of each service or the Office of Public Information's Radio-TV Branch, should the House and Senate sustain the action. Also directed was a 50% cut in staffs of each service. The committee recommended sum of $312,500 for all OPI activities.

The Air Force may drop two public service radio programs as the result of reduction in similar personnel directed by Secretary Thomas Finletter [B•T, March 31].

PULSE TOP 10

Months Are Compared

TOP TEN network radio programs, comparing Jan.-Feb. multi-market ratings with those of Nov.-Dec., have been released by Pulse Inc. Listing shows evening, Monday-Friday daytime, and Saturday and Sunday daytime ratings as follows:

Evening

	Program Average Rating	
	Jan.-Feb.	Nov.-Dec.
Jack Benny (CBS)	11.8	11.4
Lux Theatre (CBS)	9.9	10.3
Bergen-McCarthy (CBS)	9.7	10.2
Amos 'n' Andy (CBS)	8.9	9.1
Bob Hope (NBC)	7.6	7.6
You Bet Your Life (NBC)	7.6	7.7

excellent progress recorded during the past six months.

John F. Patt becomes chairman of the Finance Commitee.

Attending were: Kenyon Brown, KWFT Wichita Falls, Tex.; Gene Cagle, KFJZ Fort Worth; Charles C. Caley, WMBD Peoria; Martin B. Campbell, WFAA Dallas; Joseph Baudino, representing Walter Evans, of Westinghouse, Baltimore; Simon Goldman, WTN Jamestown, N. Y.; George Hatch, KALL Salt Lake City; Louis Hausman, CBS New York; Edgar Kobak, WTWA Thomson, Ga.; William McGrath, WHDH Boston; John Meagher, KYSM Mankato, Minn.; Adrian Murphy, CBS New York; John Patt, WGAR Cleveland; H. Preston Peters, Free and Peters, New York; William B. Quarton, WMT Cedar Rapids, Iowa; Theodore Streibert, WOR New York; Robert D. Swezey, WDSU New Orleans; Don Thornburgh, WCAU Philadelphia; Frank White, Mutual, New York; Allen Woodall, WDAK Columbus, Ga.; William B. Ryan, president BAB Inc.

Excused were: William Beaton, KWKW Pasadena; Robert Dunville, WLW Cincinnati; Eugene Katz, Katz Agency, New York; Robert Kintner, ABC New York; Arch Morton, KJR Seattle; George B. Storer, Fort Industry, Birmingham, Mich.; Niles Trammell, NBC New York; Frederic W. Ziv, Frederic W. Ziv Co., New York.

BAB STRENGTH

Told by President Ryan

MEMBERSHIP of Broadcast Advertising Bureau totals 572 stations, four networks and a group of associates, BAB President William B. Ryan announced at the conclusion of the NARTB Chicago Convention.

This provides BAB with a $563,000 budget as a new fiscal year starts, compared to $340,000 in the past year.

Complete separation of BAB from NARTB April 1 left the sales agency without the 30% share of NARTB dues many members of that association had made available. Operating independently, BAB now charges half the highest hourly rate per month.

During the convention, BAB signed 125 station members, Mr. Ryan said. At its peak period under the NARTB dues-sharing plan, BAB had reached a March total of about 970 station members. Some of these were lost through NARTB member default, according to BAB.

Recruiting Is Under Way

Membership recruiting has started under a committee of BAB state chairmen. These chairmen will make station contacts before BAB's 42 area sales clinics open starting in mid-April. Only BAB members are eligible to attend the clinics.

"We're delighted to find that we can now proceed with our plans for an even stronger and more aggressive sales organization during the coming year," Mr. Ryan said. Station reaction during this convention was such that we fully expect to hit the $600,000 budget mark within a comparatively short time.

"As a result, we are proceeding immediately with our plans for the establishment of a Chicago office, to be headed by someone well versed in the fields of sales and promotion. We also plan to immediately strengthen sales, promotion and research staffs at BAB's New York headquarters."

'POLITICAL' ADS

'Institutional' Tag Hit

BARB at institutional advertising used for "political" purposes was thrown in the Senate last Tuesday by Sen. Hubert H. Humphrey (D-Minn.).

Sen. Humphrey said he was criticizing an "abuse" of institutional advertising—"I refer to the growing practice of institutional advertising for political purposes being used as a tax deductible business expense."

The attack by the Minnesota Democrat brings to the fore a criticism that has been heard off and on both in the Senate Finance Committee during hearings on tax measures and in Congressional chambers.

Policy now being followed by the Treasury Dept. and the Internal Revenue Bureau is to permit institutional advertising as a deductible tax expense providing the amount spent is "reasonable" in comparison with what the individual firm has spent previously.

Cites Newspaper Ads

Sen. Humphrey said that what set off his attack were two full-page advertisements appearing in a Washington paper that morning, one by McGraw-Hill Publishing Co. on wages and prices, another by Safeway Stores Inc. of Oakland, Calif., national food chain, on the price stabilization program.

Both of these advertisements, according to the Senator, had nothing to do with the actual product of these two firms.

I desire to make it perfectly clear that I am not opposing any right of a corporation or of any person to expound political views. I respect that right regardless of whether I agree with the point of view expressed. What I am saying is that it is not a legitimate business expense. It has nothing to do with the product sold by a corporation, whether it be Safeway, McGraw-Hill, Standard Oil, or any other corporation.

Sen. Humphrey said he planned to study the matter further and bring it to the attention of the Senate and to the Treasury Dept.

Sen. William F. Knowland (R-Calif.) suggested that Sen. Humphrey might also want to study publications and copy "intended to be used on billboards and presumably on television and radio programs, as well as in the form of newspaper hand-outs" by the Office of Price Stabilization to "sell" its case to the people.

Sen. Humphrey answered that Congress itself can stop any part of the government from spending money for this purpose "but I submit that advertising by a corporation is a proper legitimate tax deductible item only when it relates to its own business." The taxpayer, he noted, has no recourse to corporation "political" ads because housewives cannot "place full page ads in the 400 newspapers in the country and deduct the expense from their income tax."

Problem of institutional advertising, Sen. Humphrey said, "is a serious one in the light of recent Congressional interest in campaign expenditures. One of the loopholes in our present laws affecting campaign expenditures is the use of political advertising by business concerns who deduct the cost of this advertising from their tax returns."

'Leaky Bucket'

BOTTOM fell out of a leaky Capitol Hill information bucket last week. Report that Sen. Hubert H. Humphrey's (D - Minn.) subcommittee studying newsprint in the Senate had recommended newspapers should raise their advertising rates was "a mistake by the staff," the Senator said. Word that such a recommendation had been made leaked out over the previous week end. Sen. Humphrey termed the leak "a very tragic thing." Proposed report, he added, was a confidential committee print and "should not have leaked." He said he was not aware the language on ad rates was in the report when it was sent to the printers and in any case, it had no business being in there.

RECORD SALES

TV Seen Stimulating

TELEVISION will stimulate rather than retard demand for records by causing more people to seek entertainment at home, Glenn E. Wallichs, president of Capitol Records Inc., stated in his annual report to stockholders.

Convinced that recordings will continue to "enjoy popularity as a major form of entertainment," he revealed that Capitol Records sales and profits in 1951 were "well ahead of 1950."

Sales in the 12 months ending last Dec. 31 were $13,385,548, an increase of $1,069,229 over 1950 total. Last year's net income, he reported, after $437,000 for federal income taxes, was $408,439, reflecting somewhat higher prices and improved manufacturing and operating efficiency, Mr. Wallichs said.

The 1950 net income was $201,509, after federal income tax of $121,000.

Working capital on Dec. 31 was $2,760,475, an increase of $158,914 during the year. Compared with the preceding year-end, cash was up more than a half million dollars to $1,202,440, report said.

WGAR-FM PLANS

Now Assembling Equipment

FIRST major station in several months to enter FM, WGAR-FM Cleveland, after getting FCC approval fortnight ago for 99.5 mc (Channel 258), plans to go on the air as soon as equipment is assembled.

Carl E. George, WGAR general manager, said the FM adjunct would cost about $50,000. "This demonstrates our belief in the future of the aural medium," he said.

WGAR-FM will reverse the history of Cleveland FM, where at one time there were eight stations. Two suspended broadcasting in the last three years. WGAR-FM, CBS affiliate, will round out the FM network picture in the area. WGAR applied to the FCC for FM several years ago, but application was held up pending outcome of the lengthy G. A. (Dick) Richards case.

allied arts

JAMES M. BOERST, owner of Executives Radio-TV Service, Larchmont, N. Y., named associate publisher of monthly *Rorabaugh Report on Spot Radio Advertising.*

FREDERIC BERNER, manager of defense products, American Home Foods, to Industrial Surveys, N. Y., as supervisor of account group and **PAUL LIDEEN,** client service executive of A. C. Nielsen Co., to Industrial Surveys as account executive.

RUSSELL J. TINKHAM, co-founder and past president of Magnecord Inc., to Ampex Electric Corp., as manager of newly established Chicago office.

Mr. Tinkham

R. T. CAPODANNO, director of engineering at Emerson Radio and Phonograph Corp., N. Y., elected vice president in charge of engineering.

E. J. BAUGHMAN, electrical engineer, named West Coast representative for TV equipment sales for General Precision Labs.

CLIFFORD C. ROSE, audio-visual technician, to sound studio sales staff of Hudson Radio and Television Corp., N. Y.

SIDNEY GROVES, assistant sales manager of Macy's, N. Y., named factory representative of CBS-Columbia to cover Connecticut and New York state except metropolitan New York.

W. L. ROBERTS, Inc., Memphis, Tenn., named CBS-Columbia distributor for northern Mississippi, western Tennessee and eastern Arkansas.

ALEX THOMSON, manager of CKCL Truro, N. S., appointed representative in Atlantic provinces of S. W. Caldwell Ltd., Toronto, transcription distributor.

COL. EDWARD J. POTTER, U.S.A.F., ret., San Antonio, Tex. public relations man, named sales representative for United Artists Television, that city.

N. HINKLE BARCUS, manager of Ideal Pictures, N. Y., appointed sales manager of Visual Media Inc., that City.

ROBERT I. GAINES, head of export activities, Instrument Div., Allen B. DuMont Labs, promoted to export manager for newly created International Division.

A. M. REPSUMER appointed TV supervisor at Baker Mfg. Co., Evansville, Wis.

H. R. LETZTER appointed sales manager of industrial division of Webster-Chicago Corp., Chicago (record changers, phonographs, magnetic wire and tape recorders).

TED BOISUMEAU, Paramount Theatres, Chicago, and **TOM McMANUS,** Shell Oil sales representative, appointed to sales staff, Telenews Productions Inc., N. Y.

FRED MESSENGER, casting director, King Bros., Hollywood, and **JACK MURTON,** like capacity M-G-M, Culver City, form **TALENT ASSOC.,** (TV casting agency) at 6920 Sunset Blvd.

MITCHELL ARON, engineering staff of Hazeltine Electronics Corp., Little Neck, L. I., to technical staff of Andrea Radio Corp., Long Island City, N. Y. **S. RONALD HACKER** joins company's product design and development section.

WILLIAM E. JONES, former radio director of Henri, Hurst & McDonald, Chicago, and head of own program production group, appointed Chicago representative for Charles Michelson Inc., N. Y., TV film distributors.

FRANK COOPER, owner Frank Cooper Assoc., Hollywood (talent agency), father of girl, Pamela, March 25.

W. J. JILES, credit manager, Crosley Distributing Corp., N. Y., appointed national credit manager.

Mr. Jiles

HAROLD JOVIEN, head of West Coast radio-TV division General Artists Corp., Beverly Hills, joins radio-TV department Music Corp. of America, that city.

DAVID H. KUTNER, director of merchandising, Campbell-Ewald Co., N. Y., to Norge Div. of Borg-Warner Corp., that city, as director of advertising and public relations effective April 1. succeeding **CHARLES MacMAHON,** now eastern regional manager for Norge.

WARD PRODUCTS Corp., Cleveland, has released booklet covering its line of mobile antenna rods, bases and springs titled Form 54-153.

CBS-COLUMBIA Inc., Brooklyn, manufacturing subsidiary of CBS, names National Electronics Co., Minneapolis, as distributor for eastern Minnesota and western Wisconsin.

RALPH TAYLOR, sales promotion manager CBS-TV Hollywood, to *Long Beach Press-Telegram,* Long Beach, Calif., in similar capacity.

JAMES D. NORTH, general manager of Western Beet Sugar Producers Inc., S. F., appointed vice president in charge of western operations for Industrial Surveys Co.

KAYE-HALBERT Corp., Culver City (mfrs. TV sets), names Wholesale Radio & Electric Supply Co., S. F., as distributors in that area and San Jose Television Supply Co., San Jose, for San Benito, Santa Cruz, Santa Clara and Monterey counties area.

OTTO A. HARBACH, president of American Society of Composers, Authors & Publishers, last week named to Veterans Hospital Radio Guild's board of governors for 1952 fund drive.

BERNARD HENDEL, general manager of Hendel Fruit Co., joins United Artists Television as Pittsburgh representative.

HARRY ROE, manager media department, Foote, Cone & Belding Inc., L. A., and **HENRY ESCHEN,** manager Edward S. Townsend Co., that city (magazine representatives), form **ESCHEN & ROE Co.** (publishers' representative), at 1324 Wilshire Blvd.

EDWARD STASHEFF, TV supervisor of WNYE New York, and **EDGAR E. WILLIS,** professor of speech at San Jose State College, appointed to U. of Michigan's speech department faculty effective next fall.

Equipment • • •

AUDIO-MASTER Corp., N. Y., announces development of transcription player combined with PA system called AM 53-PA. Instrument has 12-inch detachable loudspeaker with 10-foot extention cord and plays all sizes of records and transcription from 7 to 17½ inches.

BAKER MFG. Co., Evansville, Wis., announces production of 10 AM fitted-end mast, electrically welded for strength and long life. Mast features special Baker tapered joint for stacking ten foot sections together to make higher masts.

PLASTOID Corp., N. Y., announces production of 300 ohm twin lead-in for television antennas designed to produce steadier more dependable pictures.

SIMPSON ELECTRIC Co., Chicago, announces manufacture of new oscilloscope calibrator termed Model 276, featuring direct meter readings. Unit is companion piece for Model 476 Mirroscope which features vertical mounting of cathode ray tube.

KENNETH PENDLETON returns to WKBZ Muskegon, Mich., as technical director after 18 months with U. S. Navy.

PARKER L. LAVERTY to KXOK St. Louis as engineer.

WILLIAM P. ENDICOTT, engineer-announcer, KBRC Mt. Vernon, Wash., father of boy, William Paul, March 26.

PAT POLILLO, projectionist, WAAM (TV) Baltimore, appointed cameraman. **LEONARD NORINSKY,** cameraman at WTOP-TV Washington, joins WAAM's staff in same capacity.

CHARLES LIND, engineer, WSB Atlanta, and June Nixon were married last week.

SYLVANIA Electric Products is offering magnetic screwdrivers, designed especially to meet the needs of TV-radio servicemen, to service dealers who purchase 100 Sylvania receiving type tubes or four Sylvania picture tubes between April 1 and May 15.

Our Respects to . . .

(Continued from page 58)

Wholesale Co., Miami. Two years later, in 1921, he became treasurer of that firm.

In 1924, he formed the Wolfson-Meyer real estate firm with Sidney Meyer, his brother-in-law. This was the beginning of a co-equal partnership that has continued to the present time. Mr. Meyer, prior to the merger, had been general sales manager of the Old Fox Film Corp.

The Wometco Theatre Circuit (Wolfson-Meyer Theatre Co.) was established in 1925 with the erection of the Capitol Theatre in Miami. The chain now boasts 37 movie houses.

The motion picture industry, however, did not claim all Mr. Wolfson's activities. From early youth he had been interested in civic affairs. This led to his participation in local politics and his election to the Miami Beach council in 1939.

In 1943, he was re-elected to the council with the highest number of votes received by any contestant up to that time. His high returns and his service in the city council resulted in his installation as mayor of Miami Beach.

Leaves for Service Overseas

Politics were temporarily shelved in September that year when Mr. Wolfson resigned as mayor to enter the U. S. Army. Military service included duty in England, North Africa, France, Germany, Austria and Belgium. Outstanding service won him promotion to lieutenant colonel. He was decorated with the Bronze Star with Oak Leaf Cluster and the French Croix de Guerre.

The war over, Mr. Wolfson returned to Miami and the expanding theatre circuit, again becoming active in various theatre trade organizations both in Florida and nationally.

It was in 1948 that Mr. Wolfson entered the video field. He applied for and received a construction permit for WTVJ, Channel 4, in Miami. The growth of that station is Florida TV history.

In 1950 and 1951, he served as chairman of the TV committee of the Theatre Owners of America. In late 1951, Mr. Wolfson was elected president of this organization, which represents more than half of the 20,000-odd movie houses in the nation.

As TOA president, he has urged its members to "join with television to build a new medium of entertainment that will surpass anything heretofore imagined."

Mr. Wolfson married the former Frances Louise Cohen. They have three children, Louis, 24, a WTVJ public relations executive; Frances, a student at Bennington College, and Mitchell Jr., 13.

In addition to professional organizations, Mr. Wolfson is an active trustee of two hospitals; a member of the Rotary, Elks, Free & Accepted Masons, the Mahi Shrine Temple, Westview Country Club in Miami, the Harmonie Club of New York, American Legion and is first assistant barker of the Variety Club of Miami.

For recreation, Mr. Wolfson plays golf. Or rather, he formerly played golf. In the three years since Wometco entered TV, he hasn't been on a golf course.

However, Mr. Wolfson finds recreation in planning the future of WTVJ and theatre television, which to him is still an exciting threshold.

JOHN A. KENNEDY (l), chairman of the board, KFMB-AM-TV San Diego, is recipient of awards for "extraordinary meritorious service to the men and women of the Armed Forces" by the stations. George A. Scott, chairman of the San Diego Council of the U. S. O., made presentation.

WBAL Documentary

DOCUMENTARY and dramatic program was fed NBC by its affiliate, WBAL Baltimore, last Thursday 10:30-11 p.m. marking the station's 25th anniversary of its affiliation. Program, touching on historical scenes and events in the Baltimore area, illustrated service and entertainment afforded listeners by NBC and highlighted audience reaction to name NBC stars and shows. WBAL is supervised by D. L. (Tony) Provost, vice president and general manager of the Radio and Television Division of the Hearst Corp. Leslie Peerd Jr. is station manager.

Direct Mail Volume

DIRECT mail dollar volume for February 1952 was $96,355,838—a gain of 19.9% over the same month last year—according to figures released last week by Frank Frazier, executive director, Direct Mail Advertising Assn. Total for January and February was $188,256,223, a 10%-plus increase over the corresponding 1951 period.

WKOW *Would Amend Atlass Contract, Renewal Bid Advises FCC*

OFFER to revise its management contract with Atlass Amusement Co. was made by WKOW Madison, Wis., last week in a petition to the FCC. The petition requested that the Commission reconsider its action last November in setting for hearing the station's application for renewal of license [B•T, Nov. 12, 1951].

Hearing, which was scheduled to start March 28, was postponed indefinitely.

The petition said that if the Commission feels 50% of the net profits plus travel allowances give Atlass control of the station, the contract will be revised to pay a flat $1,250 a month to the management consulting firm. It also would be revised to allow cancellation at the end of any year, upon three months' notice.

Hearing on WKOW's license renewal application was set on intimations by the FCC that Monona Broadcasting Co., licensee of WKOW, had abdicated its control through the contract with Atlass Amusement Co. The FCC also implied that WKOW secured a CBS affiliation after hiring the Atlass firm. Atlass Amusement Co. is headed by H. Leslie Atlass Jr., son of the CBS Western Division vice president.

Last week's petition recounted the early history of the Madison station, told of $154,597 in operating deficits from Jan. 1, 1948, to Sept. 30, 1950. It also pointed out that the station cost $250,000 to build, almost double the amount estimated.

Income Increase

After Atlass Amusement Co. was signed as management consultant, the station's income rose rapidly, the petition stated. In 1951, WKOW had a net operating income of $293,108.02 plus other income of $3,263.63, and an operating expense of $255,815.84.

Story of WKOW, as related by station executives in affidavits to the petition was as follows: Needs of the station in the early days were two—CBS affiliation and a competent manager. CBS told WKOW officials that its O&O Chicago station, WBBM, covered Madison adequately.

In 1950, Chicago attorney Arthur Morse tried to buy the station for a buyer later identified as H. Leslie Atlass Sr. Stockholders did not wish to sell, set price far above its value. Subsequently, WKOW officials were invited to Chicago to meet Mr. Atlass, where they discussed their need for a CBS affiliation and a manager.

Mr. Atlass turned them over to his son, who had set up as a management consultant. He also told them that recent surveys showed CBS was not being covered adequately in Madison and that it was seeking a Madison affiliate.

After signing a management contract with Atlass Amusement Co., station became a CBS affiliate. Its affiliation contract with MBS was cancelled when Mutual affiliated with WISC Madison, sharing affiliation with ABC on that station.

Mr. Atlass Jr. and members of his family acquired 180 shares of stock in the station at no par value, giving them 4% ownership. At one time, Mr. Atlass Jr. had options to buy 800 shares at $30 per share, which would have amounted to 13% to 19% of the ownership. However, he did not exercise these options.

Petition also related that a contract between Michael Henry, present manager of WKOW, and Atlass Amusement Co. was drawn up when Mr. Henry was being considered for employment by the WKOW board. It was drawn, petition stated, to show WKOW principals that Atlass Amusement Co. could deliver the services of the man it recommended to be station manager. Mr. Henry, then manager of WWXL Peoria, Ill., never worked for Atlass Amusement Co., the petition stated, and the contract lapsed when he accepted the offer to manage WKOW.

AMERICAN Newspaper Guild has applied for certification at Ottawa as bargaining agent for Canadian Broadcasting Corp. newswriters across Canada.

Radio-TV Unity Affirmed

(Continued from page 23)

point. William B. Ryan, BAB president, and his staff officers were quietly claiming their budget is heading above that of NARTB. Prior to the convention, the bulk of BAB's revenue had come via a 30% cut from NARTB member dues, if members desired the service. Now BAB membership will cost as much as NARTB in some cases, running half the highest published hourly rate per month.

Have Common Interest

The two groups are competing directly, from a membership viewpoint, but have common interests in stimulation of business for broadcast stations. BAB was separated from NARTB so it could enter the media field without trade association handicaps, and slug openly alongside printed and other advertising media. This separation is designed to strengthen the sales-promotion organization, and BAB responded to the expression of faith by promising an improved service.

Television occupied a heavier share of convention attention, with the industry heartened by the promise of FCC Chairman Walker that they probably will not have to wait much longer for the TV thaw and the new UHF band.

The chairman drew an ovation from the convention Wednesday noon after his first formal address in his new commission role.

In the manner of ex-Chairman Wayne Coy, Mr. Walker advised telecasters to avoid pressures for expediency. The TV freeze has lasted a long time, he said, because the Commission is drawing up a master plan for development of a leading industry, the dominant medium of mass communication.

His unfreezing promises were tempered by the reminder that licensing will proceed "at a snail's pace." Staff and budget shortages promise to aggravate the delays, he indicated. Chairman Walker mixed with delegates all during the convention. He made many new friends and served to bring the industry and Commission into a new understanding of common problems. Flanking the chairman at the convention were Vice Chairman Rosel Hyde and Commissioners George E. Sterling and Robert T. Bartley.

History-Making Debate

Right after Chairman Walker's address Wednesday noon a handful of delegates heard a debate that made history in the field of radio and television freedom. Two of the nation's leading lawyers debated the right of radio and television to report legislative and court proceedings.

The present trend toward curtailment of radio-TV rights to report public proceedings is dangerous and strikes at the fundamentals of free enterprise, it was pointed out in the discussion. Delegates joined James M. Landis and Louis Waldman in the arguing. Even Mr. Waldman, who argued against electronic reporting of some types of hearings and trials, agreed that radio and TV were not getting proper protection.

Many a delegate, recalling recent legislation tying the hands of radio and TV, winced as Mr. Waldman charged them with gross negligence in making their position known in legal and legislative halls.

There emerged from the meeting, however, what seemed to be general agreement that broadcasters and telecasters must wake up or they will find themselves locked out of more and more public proceedings.

Though the Wednesday afternoon program fell apart from an attendance standpoint, with the Code Review Board given only a few brief minutes, the overall programming of the meeting was praised. James D. Shouse, WLW Cincinnati, was chairman of the convention committee; Robert K. Richards, NARTB public affairs director, handled programming; Neal McNaughten, engineering director, handled the largest technical conference in association history; C. E. Arney Jr., and the business operations, and President Fellows was the executive head who kept the project moving.

While much of the convention time was devoted to workshop sessions, planning for TV's expansion, study of equipment and programming services, the public service side of broadcasting and television was given careful attention.

Besides reviewing the radio-TV reporting situation in connection with trials and hearings, the convention promised to throw full support behind the Get-Out-The-Vote Campaign. The fact that 1952 is a presidential year was emphasized and a strong resolution was adopted at the Wednesday business session. Another resolution covered the discrimination against microphones and cameras in court and hearing rooms, pointing particularly to the public's right to know how its governing agencies are operated.

In electing a new television board Monday morning, TV members elevated Robert D. Swezey, WDSU-TV New Orleans, to the chairmanship. Mr. Swezey was a driving force behind adoption of the TV Code last autumn. Two directors retired from the board. They were W. D. Rogers Jr., KEYL (TV) San Antonio, and Harry Bannister, who is leaving WWJ-TV Detroit to join NBC.

FM broadcasters had a busy meeting Monday morning, concentrating on their plan to promote the medium on a state-by-state basis. Three test drives have already been conducted. Interest ran high in the FM meeting, with 50-odd delegates turned away because of lack of seating space.

Winding up the Convention was the annual banquet, a complete sellout. The banquet program featured Patti Page, vocalist. Entertainment was supplied by ABC, BMI, CBS DuMont MBS and NBC.

ONE of two winners in RCA Thesaurus' home freezer-filled-with-beef contest at the convention was K. Cassel Thompson, president and general-commercial manager of WDAD Indiana, Pa. RCA models, roving the fifth floor, reminded conventioneers that Thesaurus is "your steak in programming."

SECOND freezer with another 200 pounds of beef went to Bill Hunt (l), chief engineer of WHIZ Zanesville, who is congratulated by Judge Justin Miller, NARTB board chairman. The giveaway gimmick included importation of a prize-winning steer, named Nobull, to the lower Exhibition Hall.

N.Y. CBS WAGES

Hike Pending WSB Okay

WAGE INCREASE of 7½% to all New York employes in the labor grade structure—non-union, non-executive staffers—was offered by CBS management during a special meeting of the employe-management committee Tuesday. Employe members accepted unanimously.

Retroactive to March 31, the plan awaits approval by the Wage Stabilization Board, although CBS agreed to start paying minimum cost-of-living increases June 1 and until WSB decision is made. If the 7½% increase is not approved, CBS will pay the difference into a merit fund, even though some 22% of labor grade employes, currently above the maximum for the classifications, would be ineligible for merit increases.

Discussions of the increase were started by the employe-management committee last November, with employes seeking a flat 10% raise in early March. Agreement, when approved, will remain in effect until March 31, 1953.

BAM IS DISSOLVED

BMB Successor Yields

BROADCAST Audience Measurement Inc., industry corporation formed in 1949 to study the radio research situation, was formally dissolved Wednesday during the NARTB Chicago convention.

Henry Johnston, WSGN Birmingham, wound up the corporation's affairs at a meeting of directors. Mr. Johnston was president of BAM.

Formed in the dying days of Broadcast Measurement Bureau after conclusion of the second BMB study, BAM served as a standby agency. When private measurement firms expanded the type and quality of their services, BAM failed to draw industry-wide support.

Thomson, Ga.; Clair R. McCollough, of the Steinman Stations; G. Richard Shafto, WIS Columbia and WSPA Spartanburg, S.C., and WIST Charlotte, N.C.; Hugh B. Terry, KLZ Denver; Kenyon Brown, KWFT Wichita Falls; John Patt, the Goodwill Stations; George B. Storer, Fort Industry Co.; Leonard Kapner, WCAE Pittsburgh; Richard M. Fairbanks, WIBC Indianapolis; Walter J. Damm, WTMJ Milwaukee; Ben Strouse, WWDC Washington, and Robert D. Swezey, WDSU New Orleans.

In his report, which he said represented the views of the full committee, Chairman Morency noted that the group had opposed NBC's late-1951 economic study for "several basic reasons," and said "there can be no question" that the committee's analysis of it, plus "the determined and concerted efforts" of NBC affiliates, "prevented its adoption."

Notes Committee's Objections

He felt that "no one can tell just what effect the adoption of this plan, which has since been shown to be unworkable and unsound, would have had." Committee's objections, he noted, as:

"1. Radio's effectiveness was to be measured on the basis of the presence, or non-presence, of another medium—namely, television.

"2. The reappraisal was based on BMB studies which were acknowledged by most people to be out of date and obsolete at the time they were used.

"3. The study envisioned an eventual cut in radio rates of as much as 50%, a basis, we can all agree, which if put into effect would destroy the industry, at least as we now know it."

Referring presumably to NBC's subscription to the new Nielsen survey, Mr. Morency pointed out that the network has said a new study will be made this spring "on an entirely different basis," and expressed hope that details would be given to the network's affiliates in advance. He noted, however, that the study already is "in the works," without the affiliates having been acquainted with it.

PANELISTS at the audience promotion meeting outlining "The Tale of Three Cities" included (back, l and r) John Esau, KTUL Tulsa, and Richard M. Allerton, NARTB; front, Jack Knabb, of agency of same name in Rochester; Worth Kramer, WJR Detroit, and Lee Little, KTUC Tucson, keynoter.

Although he did not mention any network by name at any time, it was obvious he was referring to CBS Radio when he pointed out that a network "is currently attempting a change in its contracts with its affiliates that would permit the network arbitrarily to change rates practically without notice." He added:

"It is the opinion of the committee that this is a very weak position from the point of view of the affiliated station and also from that of the network. Such a condition could have the direct effect of bringing increased pressures from the advertisers on the network to decrease rates, the advertiser knowing that the network has the power to decrease rates at will and without further consent or consultation with its affiliates.

"We think this is the worst position in which a network could place itself. It would invite hasty and ill-considered action. The committee strongly urges that each affiliate carefully examine the effect of any suggested modification of its network contract which might weaken his station's position and work to the detriment of the entire industry."

In its work, Mr. Morency reported, the committee has "constantly borne in mind that our end objective was to attain for radio a high degree of acceptance, stability and a real appreciation of its worth as an advertising medium. We have tried to avoid winning arguments and permanently losing friends to the industry.

"At the same time, we have been forthright, we have called a spade a spade, and we have not deviated from basic principle."

He recalled committee conferences with representatives of the Assn. of National Advertisers, which launched the attack on radio rates with its TV penetration studies approximately a year and a half ago, and said that as a result "we are quite certain that a different viewpoint is now held" by the advertiser group. He cited ANA's present insistence upon better facts on all media [B•T, March 24], and added:

"Note that a year ago all of the emphasis was placed on the effect that TV would have on only one other medium, not all."

Research, Rates Stressed

He reported that the committee's deliberations had indicated "two major fields of greatest importance"—research, and rates.

"Radio still sells merchandise at the lowest cost per dollar of sales," he asserted, "but the advertiser and the broadcaster have become so confused with the mass of contradictory research studies that both have forgotten all about sales, the only reason for the use of any medium."

He commended the ARBI studies as a good step toward measuring radio's selling power, as opposed to the "trap" of using ratings as a precise measurement.

The "popularity rating concept," he asserted, should be discarded.

"Radio should also discard the concept of radio homes and start measuring the number of people who listen to radio," he said. He singled out recent Nielsen measurements as containing "inaccuracies or distortions which are costly to radio," in that they do not, he felt, give a complete picture of listening.

Nielsen was mentioned specifically, he said, "because it is the only national rating service now available and is the one most relied upon by advertisers, agencies and networks." He added that local rating services have "important weaknesses."

Of rates and rate cutting, Mr. Morency said "what really hurts the industry are the rate cuts—package deals—the absorbing of costs and things of that nature. They are the real menace to your operation and to the health of the entire industry."

Presumably referring to General Mills' current summer saturation spot campaign, he said:

"Recently one of our largest advertisers has been offering business to stations on a basis which would mean a rate cut of about 75%. Acceptance of business on such a basis could be the most expensive dollars a station ever took in. It would seem that a broad acceptance of such terms by broadcasters might well permanently set new rates on approximately the level of that acceptance.

"This rate cutting is an insidious thing—there is no end to it—it is particularly disturbing to the users of the medium . . . Just imagine the time that could be spent on really selling radio rather than discussing just what the rate cut would be. . . .

"The networks have not a good

PATTERN FOR TV PROFIT

RADIO COMMUNICATION Magazine's Exclusive Feature Series

Here is a basic text for the guidance of executives responsible for management, sales, engineering, and programming. This series is literally crammed full of practical, factual information drawn from the personal experience of the five top television broadcast engineers.

Written in non-technical language, "Pattern for TV Profit" has been planned to cover all the factors which must be considered in planning for the successful, profitable operation of VHF and UHF stations, either independent or network, in accordance with local market and area requirements.

PATTERN FOR TV PROFIT is written by

National Broadcasting Company

THOMAS E. HOWARD
Chief Engineer
New York Daily News
Station WPIX

FRANK L. MARX
Vice President in Charge of Engineering, American Broadcasting Company

Nothing comparable in scope or factual details has been available up to now for the simple reason that never before have the top television broadcast engineers collaborated in making their knowedge and experience available to newcomers in this industry.

For example, the first chapter, in the March issue, details four distinct types of TV stations. It explains the relation between market and area requirements and the choice of basic facilities. It presents equipment lists and costs. It gives a breakdown of management, operating, and programming personnel, and average salaries. Also, it shows how to estimate the first year's operating expense.

Succeeding chapters will go into every detail of TV broadcasting in the same thorough, informative manner. You'll find "Pattern for TV Profit" more widely discussed and referred to more often than anything ever written on this subject.

Don't miss the first chapter, starting in the March issue of RADIO COMMUNICATION. A year's subscription costs $3.00, or $6.00 for three years. Use your company purchase order, or the coupon below. NOTE: To be sure that each issue reaches you promptly, we suggest having RADIO COMMUNICATION sent to your home address.

STEELMAN

Wilson Successor No Stranger To Radio-TV Broadcasters

THE ELEVATION of Dr. John R. Steelman to the post of acting defense mobilization director on the heels of Charles E. Wilson's resignation brings to the fore a man who has been intimately identified with broadcasting activities in the current preparedness program.

Dr. Steelman, labor advisor to President Truman and administration trouble shooter, was appointed defense chief on an interim basis after Mr. Wilson's surprise announcement during the heat of the steel squabble.

Mr. Wilson resigned at the close of business Monday, following a news conference during which he cited production achievements in the rearmament program since he took office 15 months ago.

The former president of General Electric Co. told newsmen he had no immediate plans beyond a vacation in Florida. Authorities thought it unlikely that he would return to the electronics firm and would not announce his future association until his return from Florida.

Mr. Wilson resigned his $175,000 GE post in mid-December 1950 to head the nation's mobilization program. He subsequently was succeeded at the top GE post by Ralph J. Cordiner.

Dr. Steelman, special assistant to the President and former head of the federal mediation agency, will fill temporarily the vacancy created by Mr. Wilson's departure. The suddenness of his decision invited speculation as to his permanent successor from industry. It was acknowledged that the President would sift through a list of possibilities at length and choose a top executive who has compiled a formidable production record in private industry.

As White House Liaison

Dr. Steelman is no stranger to broadcasters and, particularly, the NARTB. Acting for the Chief Executive, he has been instrumental in solidifying liaison between the White House and the trade association. Out of a series of conferences with industry grew the Broadcast Advisory Council, comprising top radio-TV executives.

The Presidential advisor, who thus ascends to the nation's No. 2 mobilization spot, also has been active on the TV program front. He has been serving as special host on NBC-TV's *Battle Report, Washington,* which has elicited widespread acclaim under White House auspices.

Mr. Wilson came into the rearmament program at a time when portent of controls first took form—when the Defense Production Administration was created to set policy for allocation of materials to broadcasters and set manufacturers.

During that 15-month period, Mr. Wilson was a protagonist in a number of continuing mobilization issues, primary of which were: (1) The color TV ban on manufacture of equipment for mass production; (2) the question of controlling all end products in radio-TV and other industries; (3) the "butter and guns" controversy on Capitol Hill involving degree of civilian cutbacks, and (4) economic controls, including the Capehart advertising cost formula (see separate stories). In the end, however, it was the wage-price dispute in the steel fight that prompted Mr. Wilson's decision to resign.

Mr. Wilson stoutly defended progress of the rearmament program under his leadership and scored those critics who complained that he has sacrificed military preparedness on the altar of civilian economy.

He consistently held out for a long-range defense production plan with a gradual adjustment of the nation's economy rather than all-out controls. In this fight, he emerged victorious, with the result that materials availability has eased appreciably in recent months and consumer goods output retained relatively high levels during his tenure.

In the color TV fight, not yet resolved, Mr. Wilson tacitly conceded that, while he felt mass production of color casting equipment should be stopped for the present emergency, regulations should not necessarily spell out a flat a prohibition on the allocation of materials for all TV end products such as existed during World War II.

In resigning, Mr. Wilson expressed belief he could not accept responsibility "for major stabilization action which I cannot control"—acceptance of proposals by the Wage Stabilization Board for settling the steel issue. Mr. Truman praised Mr. Wilson, in accepting the resignation, for his "vigor, competence and effectiveness" in carrying out the defense mobilization assignment.

In bowing out, the defense chief asserted that under the rearmament program the past 15 months the U. S. is "fast overtaking Russia in the quantity of production of war material"—in fact, "we have already overtaken them."

Much of the delay in filling military orders during Mr. Wilson's tenure stemmed from bottlenecks in the machine tool and component parts delivery fields and the complexity of new military designs, particularly in electronics.

KUTE (FM) on Air

KUTE (FM) Glendale, Calif., went on the air March 22, it was announced last week by the licensee, Robert P. Adams, 1644 Idlewood Rd., Glendale 2. The new station operates on Ch. 270 (101.9 mc) with 11.6 kw ERP, from 3-9 p.m.

FREEZE LIFT IMMINENT

Within Two Weeks—Walker

FCC CHAIRMAN Paul A. Walker brightened the NARTB convention last week with the assurance that the TV freeze would be lifted within the next two weeks—"barring some last-minute snag"—but he warned that licensing "will apparently proceed at a snail's pace."

Speaking to a packed ballroom at Wednesday's luncheon, Chairman Walker also won the broadcasters' commendation with his assertion of faith in the future of "that celebrated bird-in-the-hand," radio, whose local-level service, he said, makes it "the indispensable medium."

He called upon telecasters to enforce a program of strict self-discipline, and praised radio and television broadcasters alike for (1) their contributions to national security through the Conelrad plan and (2) their promotion of the democratic process in acquainting the public with current political issues and their efforts to get out the vote.

On the uppermost topic Mr. Walker said:

"Frankly, I had hoped that here at this convention I could announce the lifting of the television freeze. . . . But you will not have to wait much longer. I can give you this assurance: Barring some last-minute snag, we are going to lift the freeze within the next two weeks."

Applications May Hit 1,000

The "time table" on licensing will be slow, he cautioned. After the freeze lift is announced, three months probably will be set aside for the filing of applications. In all, he estimated, "1,000 or more" may be on hand when FCC starts processing applications "around the middle of July."

Reiterating FCC's money and personnel plight, he forecast that "Besides the work of examining and passing on uncontested applications, we will be swamped by hearing cases." He expected that hearings will be necessary "in virtually all the larger cities and many of the smaller cities."

To handle these hearings and also the hearings in all other FCC fields, he noted, the Commission now has seven examiners and similarly short staffs of engineers, lawyers and accountants.

"I know this will be a bitter pill for the many communities that have been denied television these long years and that have been hoping that the lifting of the freeze would mean a speedy end to their have-not status," he declared.

Chairman Walker, an Oklahoman who has served on the FCC since its inception in 1934, compared the imminent freeze lift with the land rush in Oklahoma in 1889.

"We are at another kind of frontier—a new frontier in the ether [with] new opportunities for fame and fortune, for adding to the real wealth of the nation, for raising our standard of living, for contributing to the general welfare, for unprecedented access to information, education and entertainment."

But, he added, after pointing out FCC's shortage of personnel:

"Unlike the break-neck speed of the great runs in Oklahoma, television will not gallop into its new frontier. It will apparently proceed at a snail's pace."

Mr. Walker noted that TV last year, with 108 stations and 14 million sets, had an income of more than $43 million before federal taxes. Independently owned stations (93) made 30 cents on the dollar, he noted, while "the networks obtained a greater proportion of their income from infant TV than they did from 30-year-old AM."

FCC's Solution 'Best'

He said it was his opinion that FCC's solution of the 3½-year-old TV freeze "will prove to be the best that could be reached at this time." It must provide for at least 2,000 assignments, recognize the needs of states for channels and of communities for local channels, while maintaining "a reasonable degree of flexibility" and reflecting "long-range thinking as a protection for the future," he declared.

Calling upon telecasters to "build for the long future" and urging "full support for efforts toward self-regulation such as your television code," Chairman Walker asserted:

"It is true that in the hurly-burly of developing any new resource or service, the public may for a time be too dazzled, too uninformed, to unorganized to realize the shortcomings and the excesses and to deal with them.

"But in the end, let me assure you, the public awakes and when that day comes, there is a day of retribution. It is a day of wailing and gnashing of teeth on the part of those who have betrayed the public interest."

He told his listeners that "the best of American broadcasting is a service in the public interest

(Continued on page 88)

Highlights of Chairman Walker's Address

". . . How much longer can the Commission stand off the thwarted applicants and the public [before lifting the TV freeze]? We might remind you that the children of Israel had to wait 40 years before they were permitted to enter the promised land. The Commission has not kept you waiting that long. It only seems that long; actually it has been three and a half years. . . .

". . . What we have been drawing up is, in effect, a master plan, comprehensive and detailed, for the development of one of America's leading industries, for her dominant medium of mass communication. When hundreds of applicants are waiting to invest hundreds of millions of dollars in this new service . . . we cannot build upon sand. . . . I say it would have been craven folly to sacrifice our chances for soundness and stability by capitulating to pressure for expediency. . . .

". . . I will state as my considered opinion that, taking all circumstances into account, the Commission's solution of the television problem will prove to be the best that could be reached at this time. . . .

". . . You will not have to wait much longer. I can give you this assurance: barring some last-minute snag, we are going to lift the freeze within the next two weeks. . . . We will then probably allow three months for the filing of applications. That would bring us up to around the middle of July before we start processing. By that time we will probably have 1,000 or more applications on file. . . .

". . . We estimate that the applications will exceed the number of available assignments in virtually all the larger cities and many of the smaller cities. This means that hearings must be held in each of these cities. We estimate hearings will be necessary for a great many of the 1,000 or more applications. . . .

"We now have seven examiners to conduct hearings. . . . Besides examiners, the Commission requires engineers, lawyers and accountants to handle these hearings. And in none of these fields do we have adequate staff. . . .

"Confronted with the biggest workload in our history, we are faced with the prospect of meeting it with hopelessly inadequate funds and staff. . . . Television will not gallop into its new frontier. It will apparently proceed at a snail's pace. . . .

"Amid all our talk of technical problems, processing procedures and construction plans, we are apt to forget the ultimate goal . . . and that is the service that will finally be delivered to the public. . . .

"On the basis of [my] experience of half a century, I respectfully urge you builders of our television industry to heed the lessons of history. . . . Turn your face resolutely against the temptation of fast, easy money through unsound practices inconsistent with the public interest. . . .

". . . I urge full support for efforts toward self-regulation such as your television code. The members who have agreed to take on the delicate and difficult task of administering this code are performing a service that needs to be performed if this industry is to realize its highest potentialities. . . .

". . . In cities where television moves in, radio does feel the effect of the new competition. The answer to that is not surrender but readjustment. . . . The truth is that some of you radio broadcasters who have been making a poor mouth about your future have not yet even begun to fight. . . .

"Both radio and television have their jobs to do. We need both systems just as we need the railroad, the airplane and the automobile. . . . I am not one of those who believe that aural radio is doomed to be transferred in time from the jurisdiction of the FCC to the Smithsonian Institution. A flourishing, far-flung system of radio is in the public interest. . . ."

HIGH TV TOWERS

Joint Meeting Is Planned

JOINT meeting of government agencies concerned with TV towers as hazards to air navigation is being planned for the near future.

Meeting is expected to include officials of the Civil Aeronautics Administration, Civil Aeronautics Board, FCC, Dept. of Defense (Army, Navy, Air Force), Treasury Dept. (Coast Guard), as well as representatives of the radio-TV broadcasting and aviation industries.

That is the latest development in a month of activities that has seen the aviation industry increasing its pressures to put restraints on the erection of tall TV towers [B•T, March 31, 17].

Summary of the proposals made by aviation interests during the last four weeks adds up to the following:

1. Request that Congress legislate an amendment to the Communications Act which specifically would give the FCC authority to deny applications whose antenna sites or heights are found to be air hazards.

2. Requirement that all TV antennas be installed on a single tower.

3. Requirement that all TV towers be localized in city sections already considered an air hazard area.

4. Requirement that the height of TV towers be limited—through FCC ruling or Congressional action.

5. Requirement that a radio warning device be installed at each antenna site.

6. Establishment of a national set of standards that all CAA regional airspace subcommittees would be required to adhere to when considering TV tower applications.

7. Requirement that TV coverage be obtained through the use of booster stations so that high towers would be unnecessary.

Most significant of the recommendations is the request of the Air Transport Assn. to the House Committee on Interstate & Foreign Commerce for legislation to specify that FCC have the power to deny applications which propose to construct TV towers believed to be hazards to air traffic.

ATA's request was made in a March 6 letter to Rep. Robert Crosser (D-Ohio), chairman of the House committee, signed by its general counsel, S. G. Tipton.

Letter recommended that the House committee include in its revision of the McFarland bill (S-658) the following additional provision to Section 303 of the Communications Act:

That the FCC shall "(s) Have authority and be required to refuse to issue or modify any license or construction permit when such license or permit would authorize the operation or construction of radio or television towers which in its judgment, after consultation with the Civil Aeronautics Administration, the Civil Aeronautics Board, the Department of Defense, and the Treasury Department, constitute, or there is a reasonable possibility that they may constitute, a hazard to air navigation."

Mr. Tipton called attention in his letter to the fact that FCC has assumed the power to deny applications proposing towers considered air hazards, but has no statutory power to back it up. He called attention to the fact, however, that the Commission has been upheld in its powers to deny an application on these grounds in one court test (*Simmons v. FCC*) in 1944.

Commission's practice of referring cases to the CAA and other agencies for tower clearances was termed advisory only by Mr. Tipton. He pointed out that the Commission was not bound by the objections of such agencies and could grant an application notwithstanding claims that a tower is an air hazard. He acknowledged that the Commission, in practice, has not gone that far.

He referred to the fact that FCC has already begun referring some applications to the airspace subcommittees and continued:

These applications will not only continue but are expected to increase when the freeze on new television licenses is lifted. Out of fairness to the applicants an early disposition of them should be made. The applicants want prompt decisions to permit them to find other locations for the tower in sufficient time to permit the operation of the broadcast stations at the earliest time authorized by the Commission.

As far as can be learned, the House Interstate Commerce Committee has not taken action on the request except to refer it to the FCC for "comments." One source on Capitol Hill admitted that recently the committee has been getting "complaints" about tall TV towers and the hazards they may be to air travel.

At present, the staff of the House committee is drafting its version of the McFarland bill, according to the committee's vote last month [B•T, March 24, 17].

The Senate Committee on Interstate & Foreign Commerce has no such proposals on its agenda.

First word of the request for legislation came at the Monday morning business meeting of the NARTB television membership in Chicago.

Thad H. Brown Jr., NARTB managing director of TV operations, said he had just learned of the request for an amendment to the McFarland bill.

It is understood that the Air Transport Assn. for several years has tried to get legislation through Congress limiting the height of all obstructions considered a menace to air traffic. It has been unsuccessful thus far.

HARRY WEISSBAUM (l), regional chairman of Damon Runyon Cancer Fund, presents Robert E. Dunville (r), president of Crosley Broadcasting Corp., a certificate of appreciation for work done by WLWT (TV) Cincinnati in helping to raise funds. John T. Murphy, vice president in charge of Crosley's TV operations, looks on as Mr. Dunville presents check to Mr. Weissbaum.

RADFORD IS APPOINTED

To DuMont Eastern Dist. Post

LEWIS C. RADFORD Jr. has been appointed eastern district sales manager for television transmitter division of Allen B. DuMont Labs, Clifton, N. J., National Sales Manager James B. Tharpe announced early last week.

The appointment, Mr. Tharpe said, is in line with DuMont's nationwide sales expansion program, calling for "greatly increased" activity for the TV transmitter group.

UTP Expands Five

SALES of five shows in six markets were completed by United Television Programs, New York, during the four-day NARTB convention in Chicago last week, Sales Director Aaron Beckwith announced Thursday. Corona Cigars extended its sponsorship of the Bing Crosby Enterprises' *Royal Playhouse* on KECA-TV Los Angeles, and Milani's 1890 French dressing bought the same package for WENR-TV Chicago. Teletronics will sponsor the Walter Schwimmer Production *Movie Quick Quiz* on WGN-TV Chicago and E & B Brewing Co. renewed *Old American Barn Dance* on WWJ-TV Detroit. Ward Drug Co. will back *Hollywood Off-Beat*, private detective show starring Melvin Douglas, on KRLD-TV Dallas, and KFMB-TV San Diego signed for a 26-week run of *Big Town*.

Trouble in the Air Space . . . . . AN EDITORIAL

TROUBLE brews again along the air lanes. The Air Transport Association is proposing legislation presumably designed to give the FCC specific authority to control antenna heights and locations—this with an eye toward the TV-freeze lift.

Under existing regulations, regional airspace committees must approve towers of more than 500 feet to eliminate air hazards. The proposal now is made that the pending McFarland bill (S-658) be amended to give the FCC legislative authority to deny applicants whose towers run afoul the CAA. The FCC has assumed this power right along and has even won a court action upholding this right.

The proposal of the Air Transport Assn., however, is only one facet of the aviation industry's recent campaign that has as its eventual aim the control of the nation's TV towers. Proposals have already been made covering such matters as single tower location for all TV stations in the same market (the Empire State approach) and even use of booster stations to reduce antenna heights.

The air belongs to the people. Broadcasting services are licensed by the FCC to use this air to provide the people with radio and television and communications services. Air lines are franchised by CAA to provide common carrier service at a fee for the people. Each government agency—FCC and CAA—functions under its own enabling act.

Over the years, the air transport people—government as well as industry—have been disposed to look with disdain upon broadcast services as in the "entertainment" field, whereas they describe their sphere as involving safety of life and defense.

The development of television should not be impeded by arbitrary restraints imposed by aviation interests through star-chamber proceedings. There were no broadcaster representatives present at the CAA sessions that already have been held on the subject. Reasonable regulations, evolved with the FCC and engineering representatives of the broadcast services exist today.

Through compliance with these regulations there have been few if any serious commercial aviation accidents resulting from tower collision. The Air Board can no more prevent erection of towers meeting FCC specifications than it can stop the construction of buildings in airport areas complying with local ordinances.

The FCC is the licensing authority from ground system to tower top. The CAA can recommend to the FCC but it cannot reverse its decision. The lines of authority should be kept that way.

NBC-TV AFFILIATES

Form Own Assn.; Damm Is Named

FORMATION of an NBC-TV Affiliates Assn., with revision of the station compensation plan as its first major project, was completed in Chicago last week under the leadership of Walter J. Damm, WTMJ-AM-TV Milwaukee, who was named chairman.

Clair R. McCollough of the Steinman Stations was elected vice chairman and Arden X. Pangborn, WOAI AM-TV San Antonio, was named secretary-treasurer of the organization, which started with some 35 station members.

In addition to the compensation question which had concerned the affiliates in prior meetings, the association adopted a resolution asking NBC to exercise greater vigilance on cow-catcher and hitch-hike commercials, inquired about the network's intentions regarding stronger morning and afternoon programming and requested that NBC, whenever the time element is not essential, place its public service TV programs in network option time rather than in station time.

The assignment of studying the compensation formula and fashioning a new payment formula was given to a seven-man committee composed of Messrs. Damm and McCollough, Raymond Welpott, WRGB Schenectady, Nathan Lord, WAVE-TV Louisville, Ky., E. R. Vadeboncoeur, WSYR-TV Syracuse, John Outler, WSB-TV Atlanta and Harold P. See, KRON-TV San Francisco.

First meeting of the committee was held Wednesday to explore the problem. When a new formula is developed, the stations will negotiate individually with NBC.

Officials of the new association expressed the view that the organization could initiate certain actions which NBC's Stations Planning and Advisory Committee cannot appropriately do, and that its formation should not be regarded as a reflection on SPAC. Activities will be channeled through SPAC. The association will meet at least twice a year, according to present plans.

Among those participating in the organization of the group were the following: Messrs. Damm, Welpott, Lord, Hoyt Andres, WKY-TV Oklahoma City; George M. Burbach, KSD-TV St. Louis; Frank P. Fogarty and Payson Hall, WOW-TV Omaha; Wilbur Havens, WTVR (TV) Richmond; Stanley Hubbard, KSTP-TV Minneapolis-St. Paul; R. B. Hanna Jr., and B. J. Rowan, WRGB (TV) Schnectady; Gaines Kelley, WFMY-TV Greensboro, N. C.

Robert Lemon, WTTV (TV) Bloomington, Ind.; Nathan Lord and John Boyle, WAVE-TV Louisville; Mitchell Wolfson and Lee Ruwitch, WTVJ (TV) Miami; Willard Schroeder, WOOD-TV Grand Rapids; Alvin D. Schrott and Frank P. Cummins, WJAC-TV Johnstown, Pa.; H. W. Slavick, WMCT (TV) Memphis; Allen Haid, WSPD-TV Toledo; W. E. Walbridge, WWJ-TV Detroit; Irving C. Waugh, WSM-TV Nashville; William Fay, WHAM-TV Rochester; A. M. Herman, WBAP-TV Fort Worth; John T. Murphy and Dwight Martin, Crosley Broadcasting Corp.; Campbell Arnoux and John Peffer, WTAR-TV Norfolk.

Jack Harris, KPRC-TV Houston; Joseph Baudino, Westinghouse Radio Stations; Martin Campbell and Ralph Nimmons, WFAA-TV Dallas; Ralph Evans and Ernie Savage, WOC-TV Davenport; John Hill, KOTV (TV) Tulsa.

MINNEAPOLIS BAN

Newsmen Protest Order

MINNEAPOLIS City Council last week issued a ban preventing cameramen of KSTP-TV there to take pictures of city employes on any city property without council permission after a protest by a union business agent.

The order, emanating from the council police committee, applies only to KSTP-TV, and followed a formal protest to the council by George Todd, business agent of Local 363 (AFL), representing state, county and city employes. He charged a cameraman and newsman from the station disturbed city laborers on the city wharves while taking pictures of an ice jam in the river.

KSTP-TV officials, as well as management of other local stations, believe the move is another flare-up from the two-year-old KSTP-TV union dispute with the International Brotherhood of Electrical Workers. The station, however, "is taking pictures as usual," one official said.

James Bormann of WCCO Minneapolis, president of the National Assn. of Radio News Directors, wrote a protest to Ald. George Martens of the police committee, saying his group was "seriously concerned" about the infringement of press freedom and free access to news.

He believes the decision "was taken without full consideration of all the points of view," and volunteered to appear before the police committee to explain the NARND position. The group has a regular meeting April 14, although a special conference may be called this week.

Biblical Brown

BIBLICAL formula for guidance of those contemplating erection of UHF TV towers was offered by Dr. George Brown, RCA research engineer, at NARTB Engineering Conference in Chicago. Using as his text St. Luke 14: 28, Dr. Brown quoted the passage as follows: "For which of you, intending to build a tower, sitteth not down first, and counteth the cost, whether he hath sufficient to finish it."

FAYE EMERSON SHOW

To Be Dropped by Pepsi-Cola

PROGRAM, *Wonderful Town* owned and produced by its star, Faye Emerson, will be dropped by Pepsi-Cola Co., according to a Thursday announcement by the company president, Alfred N. Steele, who attributed the move to "inability to obtain satisfactory time."

Sponsored by Pepsi-Cola since June 16, *Wonderful Town* is seen on CBS-TV at 9 p.m. EST Saturday. Miss Emerson has been backed by the sponsor since September 1950, and announcement bowed to her dignity and appeal in television performances and identified her personal efforts as "a contributing factor to sales growth."

It was understood that Miss Emerson's final appearance would be April 19. Pepsi-Cola was reported getting a new time slot, plus a new show, for the end of June.

Moore to CBS-TV

THOMAS W. MOORE, vice president and advertising director for Forest Lawn Memorial Park, Glendale, Calif., has been named to new post as head of West Coast sales office, CBS-TV Film Sales.

FEB. TIME SALES

TV Network Business Skyrockets—PIB

CONTINUING its skyrocketing rise, network television in February did 80.1% more business than in the same month of last year, according to figures released last week by Publishers Information Bureau. Combined gross time sales of the four TV networks for the second month of 1952 equalled $14,786,047, compared with a gross of $8,210,629 for the same month of 1951.

Two-month 1952 total (January-February) was $29,857,606, against $16,763,262 for the like period of 1951, an increase of 78.1%, PIB reported. Correcting figures reported earlier [B•T, March 17], PIB gave the individual TV network January gross billings as: ABC-TV, $2,020,461; CBS-TV, $5,074,643; DuMont, $717,148; NBC-TV, $7,259,307—a total of $15,071,559.

Gross time sales for the individual TV networks are itemized in the following table:

	Feb. 1952	Feb. 1951	Jan.-Feb. 1952	Jan.-Feb. 1951
ABC	$ 2,120,911	$ 1,254,851	$ 4,141,372	$ 2,583,570
CBS	5,103,043	2,600,339	10,177,686	5,201,504
DuMont	748,544	406,079	1,465,692	841,606
NBC	6,813,549	3,949,360	14,072,856	8,136,582
Total	$14,786,047	$ 8,210,629	$29,857,606	$16,763,262

CODE REVIEW

Only Few Complaints

ONLY a trickle of complaints about the quality of TV programming and advertising has come to the NARTB TV code review board, it was brought out at board sessions held last week during the NARTB Chicago convention.

At a Wednesday afternoon code discussion, board members said the one-month period of code existence has been too short to bring much public reaction. J. Leonard Reinsch, WSB-TV Atlanta, vice chairman, presided. Others taking part were Mrs. A. Scott Bullitt, KING-TV Seattle; Ewell K. Jett, WMAR-TV Baltimore, and Walter J. Damm, WTMJ-TV Milwaukee, Chairman John E. Fetzer, WKZO-TV Kalamazoo, Mich., is in Europe.

Mr. Reinsch said the board is not "a super board of censors." Responsibility is clearly laid out in the code, he said. He referred station operators to the board's monthly bulletin. "Take that bulletin and flavor it with common sense," he suggested. He added that the seal "is the only real link between the code and the public. To the viewer, absence of the seal indicates absence of the code."

He complimented Thad Brown, NARTB TV director, for his management of the code project in its early days.

Answering a point raised by Clair R. McCollough, WGAL-TV Lancaster, Pa., a member of the NARTB TV board, Mr. Jett recalled instances of code complaints. In one case he said criticism had been received of lengthy coverage of an attempted suicide atop a Cincinnati building. He said a similar instance in Baltimore was covered by a two-minute film shot during a newsreel program.

Two questions that have come up in review board meetings, it was stated, centered around use of the seal in commercial programs and its use by networks. The board feels it is proper to use commercial identification in connection with the seal if it is presented in good taste, keeping the code symbol and call letters predominant.

In the case of networks, the problem of seal appearance on network affiliate station programs not subscribing to the symbol is not serious inasmuch as 90 stations are now subscribers.

Mr. Damm pleaded for cooperation. "Give us time to get organized," he said. Henry W. Slavick, WMCT (TV) Memphis, asked if the review board is interested in letters from listeners, drawing an affirmative reply. "We have many letters, particularly about religious and alcoholic matters," he said.

More than 19,000 copies of the TV code have been distributed.

PLANS have been made to televise *Life With Luigi* on CBS-TV using cast from CBS Radio version. Shows will originate from CBS Television City, L. A., this fall. Mac Benoff has been assigned to write and produce.

STATION LIMIT

Johnson Suggests Year Delay

FORGET about revising the TV multiple ownership rule for a year or so until the freeze is thawed and there are more stations on the air.

That, virtually, is what Senator Edwin C. Johnson (D-Col.) wrote to FCC Chairman Paul A. Walker last week.

In a letter dated March 31, the chairman of the Senate Interstate & Foreign Commerce Committee (which handles radio-TV legislation) admitted that raising the ownership limitation from its present five-to-a-single owner "might accelerate development of UHF, but will it be done at the terrific price of still further concentrating TV in a few powerful hands?"

Senator Johnson answered his own question thusly:

"If it appears that UHF is not developing as rapidly as desired, and if smaller communities are not being served by television, and if no other solution is in sight, there will be time enough to take such a drastic step as has been suggested. . . ."

In another part of his letter, the Colorado Senator, who has actively interested himself in the freeze, color and other facets of TV, said:

"First things should come first, and the vital matter right now is the 'lifting of the freeze' and the allocation of channels to a large area of the United States long denied the benefits of this most desirable medium."

Recommendation that the FCC revise its multiple ownership rules to permit one entity to own five VHF stations and any number of UHF stations was made by NBC last January [B•T, Jan. 7]. At the present time, common ownership of TV stations is limited to five.

Sterling Suggestion

The NBC petition came two months after Comr. George E. Sterling suggested that networks be permitted to have "two or three" UHF stations in addition to the five VHF they are allowed in order to get their backing for the new channels. Comr. Sterling made the recommendation in a speech to the Armed Forces Communications Assn. in New York in November 1951 [B•T, Nov. 5, 1951].

Following the NBC petition, seconding comments were filed with the FCC by:

ABC, which urged that any one owner be permitted five VHF and 2 UHF stations [B•T, Feb. 4].

DuMont, which urged five VHF and three UHF stations [B•T, Feb. 18].

Fort Industry, which urged that the limitation rule permit "not less than seven, including five or more VHF stations" [B•T, Jan. 28].

Group of seven Mountain States radio stations, which represented that no distinction be made between limitation on AM ownership, even, and TV. The stations were KOPR Butte, Mont.; KUTA Salt Lake City; KGEM Boise, KIFI Idaho Falls, KWIK Pocatello, KLIX Twin Falls, all Idaho. [B•T, March 24].

National Appliance & Radio Dealers Assn., which claimed that retailers would benefit from the impetus given UHF through acceptance of the NBC recommendation [B•T, Jan. 28].

Opposition to lifting the limitation was expressed to the FCC by WVVW Fairmont, W. Va.; KIEM Eureka, Calif., and New England Television Co., applicant for TV stations in Fall River, Boston, Worcester and Springfield, Mass.; St. Louis and Kansas City, Mo., and Buffalo, N. Y.

On the FCC Rules book as a proposed amendment is a suggestion that one company be permitted to own in varying degrees more than five TV stations. The proposed amendment spells out degrees of ownership and the number of stations above the maximum that may be permitted. Same proposal spells out degrees of ownership to be permitted for one company to own more than the maximum of seven AM stations, six FM stations.

Text of Sen. Johnson's letter to FCC Chairman Walker follows:

During the past seven weeks I have worried a great deal about the petitions which have been filed urging revision of the Commission's multiple ownership rules which would authorize a licensee with the current limit of five VHF outlets to increase his holdings to include at least two additional UHF stations. It is said that such a concession would act as a powerful incentive in perfecting UHF for usage. I am pleased with the various steps which have been taken by the Commission and the industry to develop UHF. It is gratifying to learn that many engineers are now satisfied that high standards for UHF transmission and reception are just around the corner.

Perhaps revision of the multiple ownership rule might accelerate development of UHF, but will it be done at the terrific price of still further concentrating TV in a few powerful hands? To allot five VHF stations to one network is being most generous with the peoples' property, and it is very valuable property, too. How, in good conscience, can any network ask for more?

In any event, the monopoly problem which is inherent in the proposed revision of the multiple ownership rule should have very careful consideration by the Commission. A hearing on modification of the rule, at which time all parties would be permitted to submit comments, might develop some unexpected situations and facts.

At any rate, with all the difficult problems before it which the Commission must handle during the balance of this year, a postponement of this matter for a year or so would prove most salutary. Most of the United States does not have any kind of television. First things should come first, and the vital matter right now is the "lifting of the freeze" and the allocation of channels to a large area of the United States long denied the benefits of this most desirable medium.

I notice that some of the interests desiring to increase their TV network holdings are complaining that our current supply of electronic engineers is so short that any additional use of engineers would amount to a diversion of engineers from defense work and would seriously affect our defense production program. If there are no engineers to work on color television, how can they be spared for the proposed UHF development at this particular time?

If it appears that UHF is not developing as rapidly as desired, and if smaller communities are not being served by television, and if no other solution is in sight, there will be time enough to take such a drastic step as has been suggested. I cannot see any harm in postponing action until next year when all phases of this problem can be explored and when the agenda of the Commission is not so crowded and so confused. I don't like the old rush act, and this proposal may prove to be just that.

TV BOARD

Swezey Elected Chairman At Organizational Meet

ROBERT D. SWEZEY, WDSU-TV New Orleans, was elected chairman of the television board of directors of the NARTB last Monday at the first organizational meeting of the new board elected earlier that day.

Clair R. McCollough, WGAL-TV Lancaster, Pa., was named vice president.

Also re-elected to two-year terms on the board were: Harold Hough, WBAP-TV Fort Worth; George B. Storer, Fort Industry Co. (WAGA-TV Atlanta, WJBK-TV Detroit, WSPD-TV Toledo and KEYL (TV) San Antonio), and Paul Raibourn, KTLA (TV) Los Angeles. Campbell Arnoux, WTAR-TV Norfolk, was re-elected for one year.

New members elected to one-year terms were: William A. Fay, WHAM-TV Rochester; Henry W. Slavick, WMCT (TV) Memphis; and Kenneth Carter, WAAM (TV) Baltimore.

The four networks reappointed their representatives to the board: Alexander Stronach Jr., ABC; Herbert V. Akerberg, CBS-TV; Chris J. Witting, DuMont Television Network, and Frank M. (Scoop) Russell, NBC Washington.

The election was part of a TV membership business session that also heard a report from Thad H. Brown, NARTB manager of television operations and counsel to the TV board.

Mr. Brown outlined regulatory and legislative developments in which the association had taken active interest in the past year.

He said the NARTB could take credit for speeding the end of the TV freeze "by at least 18 months" by successfully petitioning the FCC to amend the Third Notice of Further Proposed Rule Making to permit written rather than oral testimony in allocations hearings.

Campaign Is Success

The membership campaign of the past year paid off handsomely, said Mr. Brown. As of the 1951 NARTB convention, membership totaled 55 TV stations and two networks. Last week it included 88 stations and all four networks.

The NARTB soon will distribute questionnaires to members soliciting their opinion on several proposals to request an updating of FCC rules and regulations affecting TV operation.

He said some of the rules, inherited from AM operating rules and applied to TV without adaptation, needed revising to make them more compatible with TV operation. He said the FCC had advised the NARTB it was receptive to suggestions on this problem.

NEW TV BOARD of directors of NARTB is shown after election Monday. Seated (l to r): Harold Hough, WBAP-TV Fort Worth; Robert D. Swezey, WDSU-TV New Orleans, chairman; Clair R. McCollough, Steinman Stations, vice chairman; George B. Storer, Fort Industry Co. Standing (l to r): Chris Witting, DuMont Television Network; William A. Fay, WHAM-TV Rochester, N. Y.; Kenneth Carter, WAAM (TV) Baltimore; Paul Raibourn, KTLA (TV) Los Angeles; Alexander Stronach Jr., ABC; Henry W. Slavick, WMCT (TV) Memphis, and Campbell Arnoux, WTAR-TV Norfolk, Va. Two other network representatives on board, Herbert V. Akerberg, CBS-TV, and Frank M. Russell, NBC, were not present for picture.

'Culture' Competition

TELEVISION is cutting into the advancement of culture in Atlantic City, a teachers group says. Samuel Gillingham, program chairman of a winter program series sponsored by the Atlantic City Teachers Assn., blamed television for a $1,100 loss suffered by the series during the past year. He said he will recommend discontinuing the programs which are made up of lectures, dances and music, designed to further cultural entertainment in the city.

NATO TV PLAN

Movement Gathers Momentum

A MASTER global TV plan to span all NATO countries—initially revealed on Capitol Hill last year in connection with a proposed "Vision of America" project—is gathering momentum under the relatively unpublicized leadership of three U. S. communications pioneers.

Envisioned in the vast international communications blueprint are varied services—radio relay systems, television networks, AM and FM broadcast stations and facsimile—with international television as the key activity.

The promulgation of international TV is being carried out on the basis that foreign countries accept U. S. video standards (525 lines, 60 fields, 6 mc) and finance installation of equipment.

Aside from the electronics aspect, there are other facets which invite interest, among them:

● The prospect of entertainment and cultural programs on an exchange basis among foreign countries—and between those nations and the United States.

● The potentiality of sponsorship by U. S. industrial firms with a stake in foreign markets, acting through their respective advertising agencies.

● The possibility of program originations overseas and concomitant interest of Hollywood film and stage entrepreneurs in this fare.

Who are the progenitors and primemovers behind this vast new concept?

The global TV plan originally was brought to light on Capitol Hill by Sen. Karl E. Mundt (R- S. D.), co-author of the Smith-Mundt Act setting up the U. S. information program and father of a proposed Vision of America to complement the U. S. overseas radio arm. Plans laying the groundwork for a TV network among members of the North Atlantic Treaty Organization, with installations initially in Turkey, were exclusively detailed by Sen. Mundt to BROADCASTING • TELECASTING last year [B•T, July 30, 23, 1951].

Sen. Mundt has been working with the State Dept., military authorities and foreign embassy delegations in Washington, as well as Japanese communications officials on the feasibility of such a plan. They all expressed interest.

But the actual groundwork—diplomatic, engineering and electronic—has been laid by authorities with varied backgrounds. These men are: Maj. Henry F. Holthusen, a New York lawyer-diplomat-educator, who spearheads the mission, lending the diplomatic approach; William Halstead, a consultant associated with Murray Crosby, Crosby Labs. Inc., Mineola, N. Y., and co-builder of the New York State Rural Radio Network; and Dr. Walter Duschinsky, also with Mr. Crosby, a planner for UN TV facilities, who designed WWJ-TV Detroit studios. Messrs. Crosby, Halstead and Duschinsky are partners in Telecommunications Consultants Inc.

State Dept. Adviser

Maj. Holthusen also is counsel for American electronics firms, and was instrumental in laying the groundwork for the Voice of America. He consults periodically with the State Dept.

Planning for this vast global project was laid before the Senate last week by Sen. Homer E. Capehart (R-Ind.). He inserted into the *Congressional Record* copies of an article and editorial appearing in *Television Opportunities* magazine.

The editorial noted that, under the leadership of the Holthusen-Halstead - Duschinsky triumvirate, Japan had officially adopted U. S. TV standards. A bylined article by Lawrence Levey, was titled "Pathfinders for Telecommunications Blaze Tele Trails Through Europe and the Middle East."

As a result of a trip by this delegation to Japan last fall [B•T, Nov. 19, Sept. 3, 1951], the Japanese Radio Regulatory Commission Feb. 16 issued a license to the Nippon National Television Network Corp. to operate a 22-station TV network on U. S. TV standards. Mr. Halstead supervised network plans and Dr. Duschinsky studio planning. Japanese industry is sustaining the cost of installation and maintenance.

According to the editorial, two other conditions were prescribed by the New York group: Conduct of the network on private enterprise principles and permeation of network operation with the "democratic way of life." Commercial radio operation also has been authorized in Japan.

"They said it couldn't be done . . . Yet, all these obstacles were overcome by the electronic mission . . . Never has a new industry been launched on an international scale with such brilliant omens for better global relations, economic and otherwise," *Television Opportunities* remarks.

Having completed the Asiatic phase, the electronics mission then visited Turkey, Egypt and the Philippines. Since the plan was conceived, Turkey has become a member of NATO with the result that certain difficulties have been minimized.

According to Mr. Levey, these are the next steps:

The master global TV plan, embodying 11 services, but stressing TV, will span all NATO countries. It will be—100 percent—a radio relay telecommunications system combining multichannel telephone, telegraph, teletype, facsimile, FM and AM broadcasting, and TV. It will be similar to the present microwave relay now in successful operation in the United States, stretching from coast to coast, and built by the American Telephone & Telegraph Co.

The plan will provide a completely integrated telecommunications system extending nearly 2,400 miles between London, England, and Ankara, Turkey, eventually reaching east in the direction of Asia. Military and governmental authorities, here and abroad, have knowledge of the plan, which would provide a thoroughly reliable network service, 24 hours a day, for the 14 countries in NATO, and adjacent territories. Top world communication experts have expressed their unqualified enthusiasm for the plan.

The plan reportedly has been broached at Gen. Dwight Eisenhower's SHAPE headquarters [B•T, Sept. 3, 1951].

The original TV concept envisioned installation of video outlets in Turkey first at a cost to the U. S. of between $3 million and $4 million and completion of the entire project at between $30 million and $40 million. This includes transmitters, network relays and large receivers. These funds were to be made available through Congressional allocations or, in the longer range, through American advertising firms or an advertising foundation. This concept has been abandoned.

On the basis of the Japanese success, the electronics mission is furnishing the blueprint and advice and local countries the money for putting the project on a working basis. Mr. Halstead feels that "for global TV to exist and thrive, a one-world approach is necessary."

The Mundt plan envisioned manufacturers banding together under a foundation to buy time on overseas TV stations to merchandise their wares. Advertisers would receive their money back in sales revenue in an "entirely new approach to advertising on an international scale."

In return for blueprinting and

CONSTRUCTION

NPA's Fowler Gives Assurance

HENRY H. FOWLER, National Production Authority administrator, told the NARTB meeting Tuesday that materials controls would be eased enough to permit construction of new television stations "on a fairly regular scale."

Mr. Fowler's announcement, made during a speech on the general subject of the Controlled Materials Plan, confirmed earlier reports that NPA intended to approve new TV construction after the FCC freeze is lifted [B•T, March 24].

Though he emphasized that copper would remain in short supply Mr. Fowler said structural steel for building TV stations would be in good supply. He said he could not give assurances that "every application" would be "immediately approved," but he did think "the situation on approvals can be characterized as reasonably unfrozen."

DuMONT FILMS

Summer Rates Offered

FILM distribution department of DuMont Television Network last week undertook a special promotion drive involving special summer rates and bonus arrangements as well as merchandising material published in booklet form as *Summer Hiatus*.

Department offers special rates during June, July and August, ranging from 15 to 50% off regular film prices. In addition, a free feature-length film will be given with every purchase of the 13-program *Illustrious Feature Films* package as well as with every booking of the 15-minute *Pathe Hy-Lights*, human interest series. DuMont is also distributing mysteries, dramas, and the new 15-minute *Streamlined Fairy Tales*, an animated series produced especially for video.

The *Summer Hiatus* brochure —distributed to more than 1,000 agencies, sponsors and station managers to help them fill summer time spots with top quality films—provides promotion ideas, selling tips, and merchandising aids, all focused on DuMont's film department project.

CBS-TV SHOWS

Sunday Cuts Are Made

CBS-TV is dropping its Sunday afternoon program service, effective April 20, when it will begin feeding programs to its TV affiliates at 5 p.m., leaving the earlier hours free for local programming.

Move was officially unexplained by CBS-TV but was generally attributed to a variety of causes—advent of the baseball season with many TV stations preferring to telecast ball games on Sunday afternoons instead of network programs, preference of other stations for NBC-TV's commercial programs over the CBS-TV sustainers and the always good reason of "economy."

The one commercial on the CBS-TV Sunday afternoon schedule, *See It Now*, sponsored by Aluminum Co. of America, will move on April 20 from its current time of 3:30-4 p.m. to 6:30-7 p.m. The *Sam Levenson Show*, now in that spot, will be transferred to Tuesday, 8-8:30 p.m., following the withdrawal of the *Frank Sinatra Show* which was unable to weather the competition of Milton Berle on NBC-TV and Bishop Fulton Sheen on DuMont.

Program for the second half of the 8-9 p.m. hour on Tuesday is not set, but it will not be *Out There*, science fiction series which had been considered for the full hour.

Realignment of other Sunday CBS-TV shows will put *Lamp Unto My Feet* at 5-5:30 p.m. (from 5:30-6 p.m.); *What in the World?* at 5:30-6 p.m. (from 4:30-5 p.m.); *Man of the Week* at 6-6:30 p.m. (from 5-5:30 p.m.). *Mr. I Magination*, now in the 6-6:30 p.m. Sunday period, will move April 19 to Saturday, 1-1:30 p.m. None of these programs is sponsored.

Three other CBS TV sustainers now broadcast Sunday afternoon are being discontinued, for the present, at least: *Where Do You Stand?* (now on at 2:30-3 p.m.); *Quiz Kids* (3-3:30 p.m.); *Columbia Workshop* (4-4:30 p.m.).

financing the installation, the U. S. would buy times commensurate with Turkish programming hours on these stations. The programs would be cultural and educational in nature.

Mr. Levey notes that since "sponsorship is a required corollary to TV," manufacturers who advertise in foreign countries "would doubtless sponsor program series and shorts on an intercountry, worldwide scale." Some 300-plus ad agencies represent clients in the U. S. who advertise abroad (as much as 90% overseas), Mr. Levey notes, and such a plan would stimulate trade.

Other points made in the magazine article:

- Global TV would make possible "rapid transmission by FM of the new techniques of facsimile." Material facsimiled would augment TV.
- Europe is beset with lack of cohesion and uniformity in radio broadcasting. "Regional TV and FM stations atop mountains, as outlined in the Master TV plan would, of necessity, bring uniformity, better reception in homes. . . ."
- Air and surface transportation can be enhanced through use of conventional VHF.
- "Electronic experts believe that before long there will be telecasting on an international scale," with Latin and Central American countries joining the U. S. and Canada in a Latin American network.
- There is great need for "world adoption of U. S. technical standards."
- Six or seven program TV recording points could be located strategically for kinescoping or originating programs—a "solution" for Hollywood, producers, sponsors and advertising agencies.
- "Large-screen TV, on a global basis, is also in the offing. . . . Universal televising of feature films in world theatres would augment grosses of film producers, stimulate production. . . ."
- The global TV project will help unify NATO nations, assist electronic industries of other countries and open up avenues of employment, according to Maj. Holthusen.
- Other countries need only apparatus and guidance from the world's leader in electronics—the U. S.—to receive "democracy's message" and better their own welfare.

MGM TV Test

METRO-GOLDWYN-MAYER, in keeping with plans announced in mid-March [B•T, March 24], on a test basis and to promote its new movie *Singin' in the Rain*, has started using a schedule of one minute and 20-second filmed commercials on TV stations in 10 key cities. They include Memphis, Nashville, Providence, Richmond, Rochester, Syracuse, Toledo, Buffalo, Dayton, Houston and Indianapolis. Agency is Donahue & Coe, New York.

Motorola Seeking

MOTOROLA Inc., Chicago, manufacturer of radio-TV sets, is in the market for a 26 half-hour TV film series. Top dramatic talent is wanted, in addition to a narrator-m.c. Agency for Motorola is Ruthrauff & Ryan, Hollywood.

HILL TELECASTS

Who Will Pay, Celler Asks

CHAIRMAN Emanuel Celler (D-N. Y.) of the House Judiciary Committee warned that "there would be compulsion for payment somewhere" if TV covered sessions and committees of Congress, in a simulcast March 30 of the *American Forum of the Air* on NBC (Sunday, 2:30-3 p.m.).

Rep. Celler's remarks were contained in "comment" on a portion of a BROADCASTING • TELECASTING editorial read to him on the program by Producer-Moderator Theodore Granik. The editorial said "the great goal of the future . . . must be the admission of radio and television to all public meetings of the Congress, on a basis of equal access with the press." It also pointed out that in the "truest sense" it would mean "the admission of the public to public meetings, on a scale made possible only by the miracles of radio and television" [B•T, March 3].

Rep. Celler appeared on the program in debate with Sen. Charles W. Tobey (R-N. H.) on the question, "Should Congress Be Televised?" His answer to Mr. Granik's query follows:

With reference to that, the government, for example, does not subsidize the newspapers that cover the proceedings and the government does not subsidize the radio; but, when it comes to television, there would be compulsion for payment somewhere.

The government would not pay. The telecasters would be paid. Now, if you are going to subsidize the telecaster industry, then subsidize the newspaper industry that covers the proceedings; subsidize the radio people that cover the proceedings.

Sen. Tobey interjected: "The newspapers are subsidized now. They get free postage."

Question of sponsorship was in the chief argument made by Rep. Celler, who admonished: "I do not want to make a speech on the floor and before a speech have some commercial saying I should take a laxative."

Sen. Tobey quipped: "That might be true. You might need it."

Rep. Celler questioned whether telecasting of congressional investigatory hearings may not be invading rights of witnesses. An example of holding the witness up to ridicule and trying him by the public rather than by the courts was the Kefauver Crime Committee, Rep. Celler intimated.

Sen. Tobey, who served on the crime-busting committee, took exception. The Republican said he thought the gist of his argument is that "televising hearings is merely another form of reporting the hearings. . . . If the reporters can be there with their notebooks and take down the facts and put in their own words in the paper the next morning, why should not the people in the humble homes of America have a chance to see these things graphically portrayed before their own eyes, through the miracle of television. . . ."

TV FILM SYSTEM

Unveiled at Convention

NEW TV film system to be available commercially in from 18 months to two years was unveiled to NARTB delegates Monday during the Chicago convention.

The 16mm system combines advantages of the flying spot scanner TV system with continuous motion film for commercial stations, according to James B. Tharpe, national sales manager of DuMont's transmitter division. The system is being shown in advance to give broadcasters planning TV stations a chance to plan their operations "without fear of obsolescence," he said.

According to the DuMont description of the system, the flying spot tubes in DuMont scanners are far advanced. The scanners are said to require no shading or adjustments and no critical accessories as back and rim lights. In addition, they are described as gamma corrected for gray scale. Other claims include lack of intermittent film movement, use as a film recorder and adaptability to color TV.

Broadcasters and engineers alike agreed that the new system constitutes the greatest advance in TV film techniques made to date and that it might be the answer to the kinescope quality problem.

20TH CENTURY-FOX

Entering TV Production

ALTHOUGH emphatically denied, 20th Century-Fox Film Corp., one of the major holdouts on video, is reported organizing a TV film production and distributing subsidiary.

New company will not release any of the studio's current or past motion pictures to TV because of possible exhibitor reprisal, but will concentrate on making commercial spots and films to order for advertisers, BROADCASTING • TELECASTING was informed. Distribution setup will be carried through with FCC freeze lifting when more TV stations are in operation.

To keep TV subsidiary separate from 20th Century-Fox, outside studio space will be acquired, it was said.

Six-Week Seminars

SAMUEL GOMPERS Trades School, San Francisco, on recommendation of the TV Trade Advisory Committee, will sponsor two six-week video seminars, to begin April 21-22, it was announced last week. Most sessions will be held at the school itself. Demonstrators and lecturers will be from San Francisco television stations and allied industries. Initial courses are limited to those employed in TV and those referred to the school by management or unions as prospective TV employes. Enrollment will be by mail, using special postcards which are in the hands of union officials and supervisor at each TV station. There is no charge for instruction at the sessions.

PARIS TV MEET

UNESCO Advisers Attend

DAVIDSON TAYLOR, NBC-TV general production executive, and two other members of a UNESCO advisory committee left New York last week to attend an international TV meeting in Paris starting today (Monday).

They will confer with representatives of nine countries on the importance of television as a medium of communications. Meeting will be held April 7-12, the first such international conference under UNESCO auspices.

Other committee members are Richard B. Hull, director of WOI-TV Ames, Iowa, and Robert B. Hudson, Urbana, Ill., TV consultant to the Ford Foundation's Fund for Adult Education. The three members are representative of a major TV network, a university which has experimented in educational TV and a research institution which has studied influence of TV on society, UNESCO pointed out.

They were chosen by UNESCO from a 13-member advisory group "in recognition of the advanced development of television in this country," according to Luther Evans, Librarian of Congress and chairman of the U. S. National Commission for UNESCO, who made the announcement in Washington, D. C.

Purpose of Meeting

Purpose of the meeting is to furnish a forum for exchange of views among experts of countries which have experimented with video or plan to launch TV service. UNESCO is exploring ways in which television can be developed internationally for education, science and culture.

"Television itself is no panacea for achieving [these things] by means of the cathode ray tube. It has to be judged against the older-established methods of press, film and radio, and invoked only where it seems likely to secure a better result," a UNESCO statement explained. Even so, it was conceded that TV "has to be ranked with the older mediums . . . as an influence on the public that can be used to aid international understanding, or to impair it . . ."

UNESCO said it plans to concentrate on objectives which would help individual TV organizations rather than on large-scale projects by UNESCO itself.

On the agenda are questions of international TV program exchange, involving standards of definition and film; methods of circumventing language barriers, tax and customs laws, export regulations, copyright and contractual rights, and censorship or moral codes.

LONG DISTANCE TV Marks 25th Anniversary

TODAY, Monday, April 7, is the 25th anniversary of long distance television.

On April 7, 1927, Herbert Hoover, Secretary of Commerce, in Washington, was seen and heard in New York by Walter S. Gifford, AT&T president, and an audience of about 50 scientists and newsmen in the first public demonstration of simultaneous intercity transmission of voice and image.

The signals were received on two receivers, one with a picture 2x3 inches, the other 2x3 ft.

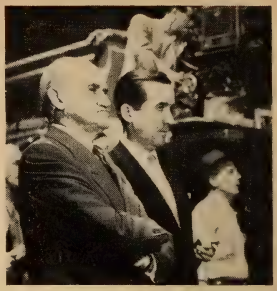
The Hoover-to-Gifford conversation was carried, sight-and-sound, over telephone wire facilities of AT&T's long lines department. The second half of the demonstration, a telecast vaudeville show, reached New York by radio from its point of origin in the Bell Telephone Labs in Whippany, N. J.

The first intercity TV program, forerunner of today's nationwide video program service, was a milepost in a continuing program of research and development carried on by Bell Labs with the goal of paralleling for vision what had already been done for voice in long distance telephony. Dr. Herbert E. Ives, director of electro-optical research for Bell Labs, was in charge of the project, which stemmed from intercity still picture transmission that the laboratories and long lines department had first demonstrated in the summer of 1924.

Sight, Sound on One Band

Within ten days of the Washington-to-New York demonstration, on April 16, 1927, AT&T transmitted both image and sound on the same frequency band by a single radio transmitter from Whippany to Bell Labs in New York. Two years later, May 23, 1929, AT&T filed the original patent application for coaxial cable, to be used as a wideband long distance transmission medium for both TV and telephony.

The next spring, April 9, 1930, two-way sight-and-sound communication was publicly demonstrated over a two-mile connection between special booths between AT&T headquarters and Bell Labs in New York. This demonstration was continued for more than a year.



In the mid-30's AT&T installed a coaxial cable link between New York and Philadelphia over which TV images of 240 lines were transmitted on Nov. 9, 1937, a year after the cable had first been tested for multi-channel telephone use. On May 21, 1940, video pictures of 441 lines, using a frequency band of 2700 kc, were transmitted over the cable from New York to Philadelphia and back to New York, nearly 200 miles. A month later the Republican National Convention in Philadelphia was televised and transmitted over the cable for broadcast by NBC's experimental TV station in New York.

First intercity TV transmission of 525-line pictures (present standard) occurred on Dec. 1, 1945, when the Army-Navy game from Philadelphia's Municipal Stadium was sent to New York for broadcast there. Two months later, Feb. 12, 1946, Lincoln memorial services in Washington were transmitted to the New York transmitters of CBS, DuMont and NBC in a pooled telecast that inaugurated TV service between New York and Washington via coaxial cable. April 19, 1946, marked the first intercity color transmission over coaxial from New York to Washington and back—450 miles—in tests of the CBS color system.

Boston Completed Network

TV transmission between New York and Boston over a 4,000 mc radio-relay system was launched experimentally on Nov. 13, 1947. This, plus the New York-Washington coaxial system, formed the Bell System Eastern TV Network. On May 1, 1948, commercial intercity TV service was authorized; on Sept. 20 the Bell System Midwestern TV Network opened; on Jan. 11, 1949, the eastern and midwestern networks were united to connect TV stations from Boston to St. Louis. Augmenting the coaxial connections, a New York-Chicago microwave radio-relay system was put into service Sept. 1, 1950.

Coast-to-coast TV was inaugurated with telecasts of the opening of the Japanese Peace Treaty Conference in San Francisco, Sept. 4, 1951, and on Sept. 29, 1951, the first commercial transcontinental TV program was aired. Of the 66 cities with TV stations, 54 are already linked via Bell System facilities and eight more will be added in time for them to receive the telecasts of the national political conventions in Chicago this July, leaving only four of the country's 108 TV stations without interconnective TV network service.

SAM GOLDWYN (l), movie producer, and Edward R. Murrow, editor of CBS Television *See It Now*, watch filming of a scene from forthcoming movie, "Hans Christian Andersen." Documentary report on the film will be shown April 13 over *See It Now*, 3:30-4 p.m.

TV STAFFS *Help New Stations Train, Jett Suggests*

A SUGGESTION that present television broadcasters help new ones to train staffs was made last week by E. K. Jett, vice president and director of television, WMAR (TV) Baltimore.

Appearing on a television management panel Wednesday morning at the NARTB convention, Mr. Jett said that unless the 108 stations now on the air provide assistance to new stations that will spring up in numbers after the lifting of the freeze, the present stations will find their own staffs raided by new telecasters seeking trained personnel.

The question of how to recruit personnel for the expanding telecasting industry was one of several dealt with by the management panel under the chairmanship of Dwight Martin, vice president, WLWT (TV) Cincinnati.

Most of the panel members, all of whom are operating telecasters, said they acquired their own staffs mostly from radio backgrounds, and by various means gave them the additional instruction necessary to adopt their talents and training to TV.

As new TV stations are authorized, in some abundance, they saw a serious problem of personnel recruitment arising, and it was to solve this without wholesale raiding of existing stations that Mr. Jett advanced his proposal.

The union jurisdictional difficulties that beset TV were discussed by the panel, which included, in addition to Mr. Jett, Lawrence Rogers, general manager, WSAZ-TV Huntington, W. Va.; Willard Walbridge, station manager, WWJ-TV Detroit, and Victor A. Sholis, vice president and director, WHAS-TV Louisville.

Mr. Walbridge reported that at his station five different unions were represented, a situation which could create constant hazards were it not for an agreement which WWJ-TV had managed to reach with all five. The agreement is in the form of a letter to which all are signatory guaranteeing that no work stoppage will ensue from any jurisdictional dispute.

He suggested that other telecasters who were obliged to deal with so many labor groups might try to get a similar agreement.

Richard P. Doherty, employe-employer relations director of NARTB, said that all new telecasters would be well advised to do their utmost to keep the number of unions with whom they had contracts to a minimum.

As insurance against jurisdictional conflicts, Mr. Doherty suggested that telecasters try to keep all technicians within one union and seek long-term contracts with that one union to discourage encroachments by other unions.

Mr. Doherty also had a suggestion for operators of combined AM-TV properties. He said there was a growing tendency among technical unions to seek common seniority clauses in contracts covering both AM and TV technicians.

The danger in these, he said, was that if the broadcaster ever wished to reduce personnel on his AM station, he might have difficulties if technicians there had seniority over those at the TV station.

The panel members reported they followed policies of rotating technical personnel among most jobs within technical operations, to avoid attaching particular specialties to any. This is another protection against attempts at encroachment by other unions, and it also gives management greater flexibility in assigning personnel.

KHJ-AM-TV ELECTIONS

IATSE, IBEW Beat NABET

BY VOTE of 7 to 1, IATSE became bargaining agent for production-program department personnel of KHJ-TV Hollywood in an NLRB supervised election contest with NABET on March 27 [B•T, March 10].

IATSE was chosen representative for makeup and scenic artists, set erectors, stage hands, construction workers, sign painters and lighting men. One vote was challenged by NABET on the ground that the voter was not on the original list of names submitted.

IBEW Local 45 was named bargaining agency for engineers and technicians of KHJ-AM-TV the following day when 36 votes were cast in its favor as against 18 for NABET. There were two "no union" votes. Latter election also was NLRB supervised.

TVA ELECTS ON COAST

Manning Succeeds Carpenter

KNOX MANNING, TV actor and moderator, KTTV (TV) Hollywood, was elected permanent chairman of West Coast section of national board of TV Authority last Monday. He succeeded Ken Carpenter, Hollywood radio-TV announcer, who resigned.

Elected to the West Coast board of directors by the membership were Lee Hogan, star of KNBH (TV) Hollywood *Lee Hogan Presents;* Peter Prouse, radio-TV actor and former West Coast executive of TVA; Vincent Price, TV-stage-film star; Lee Millar, radio-TV actor. They will serve for an indefinite period until the future of TVA is settled.

In Philadelphia more people tune to WPTZ than any other TV Station

When ARB measured the TV viewing habits of Philadelphians *for the entire year of 1951*, WPTZ led in 48.9% of all the 15-minute periods. That's nearly as much as Philadelphia's other TV stations *combined!*

BRINK RULING

Upsets TV Movie Royalty

BREAKDOWN of the AFM 5% royalty formula and re-recording fees for use of sound tracks of old movies released to television is seen if a ruling made March 28 by U.S. referee-in-bankruptcy Benno M. Brink is sustained.

Mr. Brink ruled that four theatrical feature films recently returned to George and James Nasser by United Artists through court order can now be released to TV without payment of the royalty formula and re-recording fees, but said AFM might seek damages it estimates are caused by recording of the sound track.

The ruling came when Mr. Brink refused to grant at AFM request an injunction restraining the brothers from selling the films to video unless union demands were met [B•T, March 17]. An upholding of the opinion possibly could see other Hollywood film producers following footsteps of the Nassers in releasing old films to television.

Mr. Brink said the 5% royalty demand was unreasonable since no percentage provision was provided in the original contract, and that an "agreement to agree" in the producer-AFM contract before the films were sold to TV was merely so stated and its ambiguity made it unenforceable.

He said the injunction could not be granted because AFM held no actual interest or property rights in the films, having failed to record any liens against them. The injunction would be inequitable, he said, because it would give AFM "a powerful weapon which in effect would require the producers to agree to any terms prescribed by AFM."

Mr. Brink said any damages sought by AFM could be estimated at prevailing rates of pay for musicians who would actually re-record the sessions demanded. An AFM appeal was expected.

Although AFM might be "deemed" to have a form of lien or mortgage against the film when the sound track is recorded, union failure to record it as provided for under California law voids any interest on its part in the pictures, Mr. Brink said. AFM attorney Leonard Horwin was granted an extension of time for reviewing the findings and the Nassers' attorney, George T. Goggin was given 10 days from filing date to answer.

KRON-TV GRANTED

Directional Antenna

KRON-TV San Francisco has become the second TV station in the country to get FCC permission for a directional antenna. The only other directional pattern used by a TV outlet belongs to WNBK (TV) Cleveland.

Directional TV operation is usually not permitted by the Commission, but KRON-TV showed that its coverage could be increased at no loss to areas now receiving service. This is the only change from omni-directional operation which the FCC allows. The Commission will not permit the use of a directional antenna to squeeze in another channel to a community.

WNBK (TV) at Parma, Ohio, was permitted to change its coverage from a circle-like area, which would waste half the signal over Lake Erie, to a directional pattern in order to cover Akron and Northern Ohio more effectively.

At the same time KRON-TV switches to its DA, its ERP will be reduced from 14.5 kw visual to 9.6 kw visual.

AFM 5% DEMAND

Elimination Requested

ELIMINATION of AFM demand for 5% of grosses realized from sale of old theatrical movies to TV and revision of its policy on payment for re-scoring of those films, have been asked for by Independent Motion Pictures Producers Assn.

J. E. Chadwick, head of IMPPA revealed last week that his group requested James C. Petrillo to name a special committee to re-negotiate AFM demands in Hollywood "where the producers reside and where facts are more obtainable."

Request was based on the decision handed down by U. S. referee-in-bankruptcy Benno M. Brink in the George and James Nasser vs. AFM hearing (see story this page.)

Mr. Chadwick pointed out that the referee-in-bankruptcy scored the looseness of the current contract calling for TV negotiations at a future time on uncertain conditions.

"It is well to understand that in the future the producer-musician agreements must be specific and conclusive," Mr. Chadwick said. "At this time it is evident that the entire matter has to be renegotiated."

INTERCONNECTION

Eight More Cities July 1

SEATTLE, Phoenix and Albuquerque. Those are the only cities which won't be TV-interconnected after July 1, when 104 of the 108 U.S. television stations will be able to receive instantaneous network service—including live coverage of the political conventions in Chicago [B•T, March 24].

On July 1, AT&T Long Lines Dept. will interconnect eight additional cities, bringing the total number of cities on the coaxial cable or microwave relay to 62 [B•T, March 24]. This number includes six cities interconnected with privately-owned radio relay microwave facilities — Lansing, Grand Rapids and Kalamazoo, Mich.; Bloomington, Ind.; Nashville, Tenn., and Huntington, W. Va.

The eight cities to be interconnected by AT&T in time for the political conventions are Miami, New Orleans, Dallas, Fort Worth, Houston, Oklahoma City, Tulsa and San Antonio.

Dallas and San Antonio will have two-channel service before the end of the year. The other six cities will have single channel circuits. Facilities for the eight southwestern cities were originally scheduled for the end of the year, but completion dates were moved up to meet the July political convention dates.

AT&T has no plans for interconnecting Seattle, Phoenix or Albuquerque this year. Of the three, Phoenix might be interconnected by year's end if interconnection is ordered by a network, since it is on the southern transcontinental coaxial cable. Albuquerque is 330 airline miles from Phoenix. There is also a coaxial cable running northward on the west coast from Sacramento to Portland, Ore. This could also be adapted for TV, but facilities from Portland to Seattle would have to be installed. Seattle is 145 miles from Portland.

Actually, there are two other TV cities not interconnected. They are Newark, N. J. (which is considered part of the New York area) and Brownsville, Tex. Brownsville's TV transmitter, however, is in Matamoros, Mexico, and the AT&T has had no discussions with the Mexican authorities.

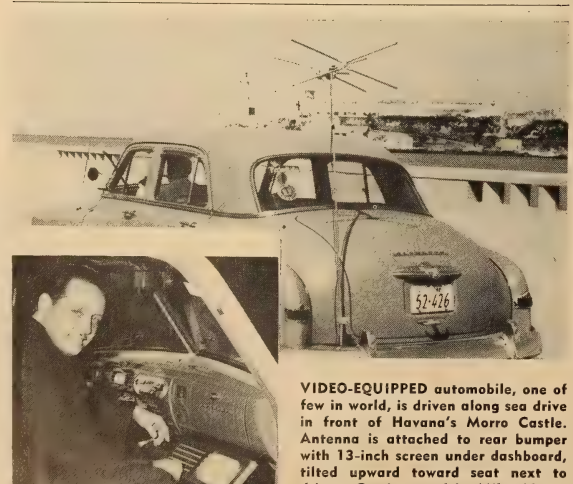
AT&T radio relay link between Washington and Charlotte was put into service April 2 for telephone use, with TV service to be available when it is fully developed. Link is final section of a $6 million project connecting Washington, Charlotte and Atlanta. The Charlotte-Atlanta leg was opened for phone-TV service March 17.

Political Audience

SIXTY million persons—approximately 40% of the U. S. population —will be able to attend this summer's Presidential conventions via television, Sig Mickelson, CBS-TV director of news and public affairs, estimated in a speech at New York's Freedom Sales Rally for Westinghouse Electric Corp., CBS convention coverage sponsor.

MBS MEETING

Hears Television Plans



TELEVISION services being planned by MBS will offer "in many respects" the same programming advantages to small and large video stations "as are enjoyed" by Mutual radio affiliates, according to Thomas F. O'Neil, MBS board chairman [CLOSED CIRCUIT, March 31].

At a meeting of the Mutual Affiliates Advisory Committee in Chicago March 29 prior to the NARTB convention, Mr. O'Neil said studies to develop Mutual's TV service are now under way. It was his first meeting with the group since General Tire and Rubber Co. acquired a controlling interest in Mutual.

He expressed satisfaction with the manner in which Mutual, under President Frank White, "is fulfilling more than ever its primary obligation to the affiliated stations."

MBS network representives present included: Mr. White; William H. Fineshriber Jr., executive vice president; Earl M. Johnson, vice president in charge of station relations and engineering; Robert A. Schmid, vice president in charge of advertising, public relations and research, and Charles Godwin, Robert Carpenter and Roy Danish, station relations executives.

Advisory committee members included: Gene Cagle, KFJZ Fort Worth, chairman; John Cleghorn, WHBQ Memphis; Victor Diehm, WAZL Hazleton, Pa.; Fred Fletcher, WRAL Raleigh, N. C.; George Hatch, KALL Salt Lake City; Rex Howell, KFXJ Grand Junction, Col.; E. J. McKellar, KVOX Moorhead, Minn.; Robert McRaney, WCBI Columbus, Miss.; Hugh Potter, WOMI Owensboro, Ky.; Porter Smith, WGRC Louisville; Fred Wagenvoord, KCRG Cedar Rapids, Iowa; and Jack Younts, WEEB Southern Pines, N. C.

VIDEO-EQUIPPED automobile, one of few in world, is driven along sea drive in front of Havana's Morro Castle. Antenna is attached to rear bumper with 13-inch screen under dashboard, tilted upward toward seat next to driver. Car is owned by Mike Alonso (left), UP Havana correspondent.

Materials

(Continued from page 32)

num they will receive for the third and fourth quarters. While estimates for each metal are earmarked below current levels, manufacturers were assured they will receive sufficient allotments to meet industry goals and civilian demand for AM-FM-TV receivers this year. Set demand currently is being met and inventories of TV receivers are good for a two weeks' supply.

Manufacturers reported a serious shortage of senior engineers, draftsmen and semi-skilled technical help. Some firms are using up to 85% of engineering personnel on military orders, it was reported. Lowest level is 35%.

It was emphasized that military orders are not being delayed, however, for lack *per se* of engineers-technicians. Greatest bottleneck, set makers reported, is in fulfilment of orders for component parts because of the long lead-time requirement.

J. A. Milling, chairman of the Electronics Production Board and director of NPA's Electronics Division, who sat in as an observer, told the set group that industry could use at least 1,500 more highly-skilled technicians and that some companies are training semi-skilled junior engineers (processing, testing help) for senior positions.

Mr. Milling said the military electronics program was valued at $1.5 billion as of last January and now is at a going rate of $2.5 billion for mid-1952 and $3.5 billion by next January.

Set-makers will receive the following allotments for the third quarter: 55% of carbon and alloy steel (compared to 50% for the second quarter); 35% of brass (now 30%); 40% of copper wire (35%), and 45% aluminum (now 30%). Despite these and earlier cutbacks, industry has maintained high set output through conservation and substitution under impetus furnished by Radio-Television Mfrs. Assn.

At another conference March 26, under chairmanship of Ralph C. Donovan, NPA General Components Division, magnet manufacturers reported active support of a program to reclaim scrap grindings. Cobalt, nickel and other scarce materials are being re-used. These firms turn out permanent magnets for radio-TV loudspeakers, radar systems and atomic research.

The industry advisory committee also discussed further reclamation of permanent magnets from magnetron tubes, with the Air Force lending active aid by channeling magnets back to suppliers for re-use of materials. Group also suggested standardization of magnets in these tubes to conserve materials and manpower. NPA promised to take it under advisement.

RTMA TUBE DATA

Small Size TV Is Down

SUBSTANTIAL slump in sale of small radio-TV receiving tubes from a year ago and data on size of TV picture tubes sold to receiver manufacturers last February was reported by Radio-Television Mfrs. Assn. Friday.

Receiving tube sales for February 1952 reached 28,262,407 units valued at $19,923,287 compared to 36,821,794 units in the same month last year. Breakdown showed sale of 26,107,782 entertainment-type tubes and 2,154,625 allied or non-entertainment tubes for last February.

Of the 28.2 million units, 17,608,-162 tubes went into new equipment, 6,623,798 for replacements, 1,153,-270 for export and 2,877,177 to government agencies.

The TV picture tube report was highlighted with disclosure that, for the first time, tubes rectangular in shape and sized from 18 inches up represented over half of purchases by manufacturers. A year ago they represented only 6% of all sales.

RTMA reported that 53% of the tubes fell in this category. Units sold were estimated at 330,-431 with value of $7,715,256.89 compared with 634,080 tubes at $17,555,375 the same month last year. Sales for January-February 1952 now stand at 670,623 tubes with value of $15,407,115.27, RTMA noted.

GETS 'ALICE' FOR TV

Crown Pictures Buys Rights

CROWN PICTURES International, Hollywood, has acquired exclusive TV distribution rights in the western hemisphere to Lou Bunin's feature film, "Alice in Wonderland." Negotiations, representing several hundred thousand dollars, were completed last week by Maxwell J. Fenmore, president and general counsel of CPI, and Henry Souvaine of Souvaine Selective Pictures, France.

Feature, filmed in 35mm color over a period of five years and combining animated puppets with live cast of English actors, will be offered for national sponsorship this year only as Thanksgiving and Christmas programs.

Crown Pictures, formerly known as Exclusive Distributors Inc., has already subtitled prints of the film in Spanish for South American distribution.

Poole to Visit BBC

LYNN POOLE, creator and producer of the *Johns Hopkins Science Review* on DuMont TV Network, has accepted an invitation from the BBC in London to visit its studios and consult with British TV personnel. Mr. Poole is scheduled to leave April 22 and return to the U. S. late in May.

AAAA Analyzes Radio-TV

(Continued from page 25)

film also is better than live on other counts, he said.

"The great problem of live television is rehearsal time," he said. ". . . If you've ever attended the first rehearsal of a Broadway show, however great the cast, you know the vast difference between a well-rehearsed performance and a careless one.

"As we know, Broadway shows seldom if ever are brought into New York short of four weeks rehearsal and out of town performance time. I know of no television show that well-rehearsed."

A live TV show, he said, is by its very nature a "continuous stream of 'first takes.' Not one first take in a dozen is good enough to print in the average 'A' picture."

A live TV show "is a show that hasn't been polished or rewritten or edited for pace," he said. ". . . A filmed show is a rewritten, polished and edited show in performance form. And even the great 'spontaneous' performers, the Grouchos, Bings and Jerrys (Lewis), prefer it for that reason."

Summing up, Mr. Reagan said: "All other things being equal, a live TV dramatic show compared to the same drama with the same actors placed on film is as inferior to its celluloid counterpart as a 'B' picture is to the average 'A.' One bad break, fluff or mike boom shadow will destroy the gossamer fabric of belief on which all drama depends hopelessly and irretrievably."

Commercially speaking, TV is not show business: It's selling. And as such, it needs more advertising know-how injected into it.

This was the substance of a talk by Robert Foreman, BBDO, New York.

"We all know that one of the most obvious advantages of television is that it's the first advertising medium which comes close to the most effective type selling there is: That is, person-to-person selling," said Mr. Foreman. But too few advertisers are taking full advantage of TV's potential, he noted.

Cites Godfrey, Dick Stark

"How many announcers are there who leave us with anything but the impression, 'Here's a guy who is just able to memorize his lines and deliver them with all the conviction of P. S. 83s valedictorian?'," Mr. Foreman asked.

"How many of our announcers have that vacant stare which shows that they are reciting from a memorized script or looking at a visualizer from out of the corner of their eyes?"

Mr. Foreman cited Arthur Godfrey and Dick Stark, the announcer for Ammident commercials, as outstanding TV salesmen.

Because TV advertising is so new, the creators of TV commercials are still more concerned with technique than with advertising content, Mr. Foreman said.

One reason for this is that many TV commercial writers have come from radio and have not learned to attach proper importance and perspective to the visual part of TV advertising. Others have come from films or other entertainment fields and they are without adequate background in advertising, the speaker observed.

Optical tricks fascinate many novice TV writers, said Mr. Foreman, and they are apt to use tricks in such abundance that simplicity and clarity are lost.

Animation is another tempting device to amateurs. As for him, Mr. Foreman said he was "damn sick" of seeing "beer bottles sing and tooth paste tubes conga and soap boxes jitterbugging."

Agencies Bypass Realism

"Why do so many smart advertisers and agencies bypass realism and completely avoid demonstration of their products?" he wondered. "Why—when they've got a medium here which for the first time permits reality in motion and demonstration in product?" What is needed to improve the effectiveness of TV commercials generally, said Mr. Foreman, is the acquisition by all in the industry of this point of view:

"Television is just another advertising medium."

If that attitude is thoroughly developed, he said, "we're sure to build a sound television copy department."

"As for the copy those folks turn out, well it'll turn handsprings for our clients simply because no advertising medium had so much to do it with."

Keynoting a panel discussion of television rating services, Fred B. Manchee, executive vice president of BBDO, who made a speech on the same subject at the AAAA meeting last spring, remarked:

"A year ago we talked about two big factors that were troubling us in audience measurement research: Confusion and the frightening costs of research. Now both have mounted."

Mr. Manchee said, however, there was "one new hope" for resolving the research muddle: The Advertising Research Foundation which, he hoped, would undertake soon a study of radio-TV rating service.

Such a study received top priority among agency subscribers of ARF in a recent questionnaire asking subscribers to enumerate their preferences for a number of projects that ARF might do.

Of the 35 agencies responding, 80% puts that study at the head of the list.

Discussions by other experts on the panel, which included some of the leading agency researchers, reflected the general feeling of hopelessness over the present research situation that prevails among the customers of broadcasting.

Charles A. Pooler, vice president of marketing, Benton & Bowles, New York, said it was impossible to make a clear choice among present services "because all of them seem to have flaws."

In answer to the question: "If all have serious question marks against them, why use any?", Herbert A. Vitriol, vice president in charge of media and research, Grey Advertising Agency, New York, said that perhaps one reason that all were being used, was that:

"We're attempting to wrap up complex problems with simple yes or no answers."

That, he felt, was impossible.

The best that can be done at the moment, he thought, was to pick the service that seemed to provide the particular kind of information that was needed for a particular show.

Mr. Vitriol said that one important research project that ought to be carried out at once was that of measuring the habits of consumers before television enters their homes.

'Last Chance' Investigation

He said that once the freeze is lifted and a host of new stations go on the air, this "last chance" to make a thorough investigation of pre-TV habits will be gone. The reason for such an investigation would be to have facts on hand against which to measure habits after TV has arrived.

That is one project Mr. Vitriol would like to see ARF do.

Lyndon O. Brown, vice president in charge of media, merchandising and research, Dancer-Fitzgerald-Sample, New York, said one area in which current reading services fall down completely is in measuring radio listening in multi-set homes and out-of-home.

He said that most recent reliable information was that some 40% of radio homes have one set, 35% have two sets and 25% have three sets or more. He compared the distribution of Nielsen Audimeters with those figures and found that multiple-set homes were being short-changed.

The Nielsen sample, he said, counted far too large a percentage of homes in the one-set class.

Commenting on forthcoming cov-

TV Defined

HERE'S a new definition of the component parts of television broadcasting as given to the AAAA last Thursday by Charles L. Whittier, Young & Rubicam, New York. Television, he said, is like an "engagement ring in which the entertainment is the platinum setting and the commercial is the valuable square cut diamond." One wag remarked: "He's in the right price bracket alright."

erage studies by Standard Audit and Measurement Bureau and A. C. Nielsen Co. [B•T, March 24], Mr. Pooler of Benton & Bowles said it was regrettable that two firms were setting out to do the same thing, though admittedly by different techniques he said.

It was to be hoped, Mr. Pooler said, that somehow Standard and Nielsen would join together in one study.

At a Friday morning session, B. B. Geyer of Geyer, Newell & Ganger, New York, and chairman of the board of Advertising Research Foundation (on which both the ANA and AAAA pin so many hopes), reported that to date ARF has 125 subscribers and an annual subscription income of $130,900.

He summed up the ARF plan and reminded AAAA that it had been given in greater detail at the recent convention of the ANA [B•T, March 24].

"What Does the Advertising Dollar Buy Today?" was the subject of Melvin Brorby, Needham, Louis & Brorby, Chicago. Answer: Ten percent less than it did a year ago.

Mr. Brorby reported on an updating of an advertising cost study done by his agency last year. He warned that this study could not be used to compare media since there was variation in the accuracy of the figure and since the study was prepared in an index form rather than with dollar figures.

Must Spend 10% More

Overall, the study shows, the advertiser must spend 10% more now to get the same advertising impressions he got a year ago.

Trends within the various media, comparing 1951 with 1952, showed that costs-per-thousand for magazines has risen 7%; for trade publications 1%; for newspapers (milline rate) 7%; for outdoor advertising 5%; for network radio time 16%; for spot radio time 22%. For network TV, cost per thousand has decreased 14% and for spot TV it has gone down 5%.

Average talent costs for radio and television have remained unchanged in 1951-52, he said, counting only the union scale talent.

Ethical problems in radio-television were discussed Friday morning by Robert D. Swezey, executive vice president, WDSU-AM-FM-TV New Orleans, chairman of the NARTB committee which drafted the television code.

The only way the code can be enforced, said Mr. Swezey, is "with the sympathetic cooperation of you advertising agencies and your clients."

Without such cooperation, he said, telecasters will be beset by a conflict of pressures — "pressures brought upon us by the public and by militant special interest groups and the pressures which we in turn will be forced to place upon you."

An omnipresent problem in broadcasting, he said, is that of trying to reconcile moral standards with economic facts of life.

"Many of us just can't seem to say no to a big name or big account, even though we are convinced in our own mind that what they asked us to do does not conform to industry standards," Mr. Swezey said.

"Sometimes this is just a fear complex, but more frequently it is tied up with economic considerations.

"It takes a lot of courage to tell a big performer that the show he's set his heart on is out; it takes a lot of courage to tell a big advertiser that you're not willing to cut your rate for him.

"I'm worried about us," he said. "No advertising standards, nor radio or television code, can be successfully observed unless all of us who participate in air programming—stations, the networks, the advertiser, and their agencies—have intelligence and mettle enough to set up appropriate standards and to enforce them . . ."

AAAA OFFICERS

Elected at W. Va. Meet

NEW officers and directors were elected by the AAAA at its spring meeting in White Sulphur Springs, W. Va., last Thursday. At the organizational meeting of the new board after the election, Frederic R. Gamble was engaged as AAAA president.

New officers and directors follow:

John P. Cunningham, executive vice president, Cunningham & Walsh, N. Y., elected chairman of the board.

Harry M. Stevens, vice president, J. Walter Thompson Co., N. Y., vice chairman.

Harold Cabot, president, Harold Cabot & Co., Boston, secretary-treasurer.

Others elected were:

Directors-at-Large

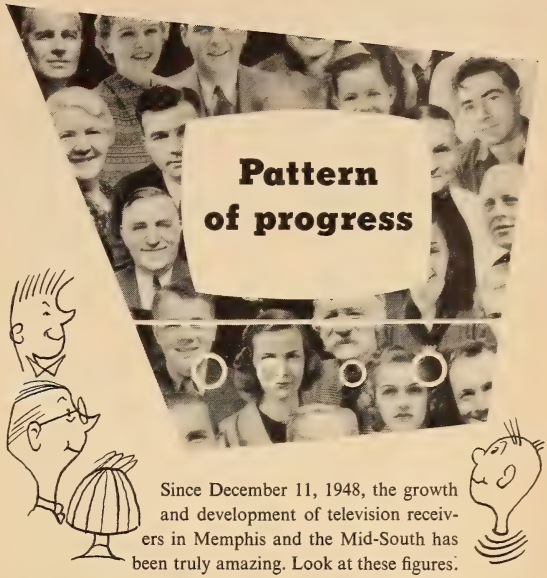
Clifford L. Fitzgerald, chairman of the board, Dancer-Fitzgerald-Sample, N. Y.; Robert E. Grove, executive vice president, Ketchum, MacLeod & Grove Inc., Pittsburgh (elected to fill Mr. Stevens' unexpired term); Henry G. Little, executive vice president, Campbell-Ewald Co., Detroit; Lawrence Valenstein, president, Grey Adv., N. Y.

Directors Representing AAAA Sectional Councils

New York Council—Marion Harper Jr., president, McCann-Erickson, N. Y.

New England Council — J. Paul Hoag, president, Hoag & Provandie Inc., Boston.

Atlantic Council—Dan W. Lindsey Jr., partner, Lindsey & Co., Richmond.



Michigan Council—Elliott E. Potter, vice president, Young & Rubicam, Detroit.

Central Council—John M. Willem, vice president, Leo Burnett Co., Chicago.

Pacific Council — Carl K. Tester, president, Philip J. Meany Co., Los Angeles.

Continuing in office are the following directors-at-large:

William R. Baker Jr., president, Benton & Bowles, N. Y.; B. C. Duffy, president, BBDO, N. Y.; Gordon E. Hyde, president, Federal Adv. Agency, N. Y.; Earle Ludgin, president, Earle Ludgin & Co., Chicago; E. E. Sylvestre, president, Knox Reeves Adv. Inc., Minneapolis.

Since December 11, 1948, the growth and development of television receivers in Memphis and the Mid-South has been truly amazing. Look at these figures.

Dec. 11, 1948 - 1444 TV Sets

March 1, 1950 - 24,172 TV Sets

Dec. 1, 1951 - 108,780 TV Sets

Feb. 1, 1952 - 118,000 TV Sets

TODAY

125,000 TV Sets

In the Memphis market area*—and this is an undivided audience, too!

WMCT is the only television station these sets can tune to. This means an undivided audience, means, too, a far better buy for your TV dollar than you would get in many multiple station markets.

IF NO THAW . . .

We Will Legislate, Johnson Says

CONGRESS must act if the TV freeze is not lifted within two weeks, Sen. Ed C. Johnson (D-Col.) declared last Thursday.

Sen. Johnson is chairman of the Senate Interstate & Foreign Commerce Committee which has jurisdiction over radio-TV legislation. His remark climaxed a growing demand in Congress that the freeze on new TV outlets be thawed immediately.

The Coloradan's comment came on the heels of a request from Sen. James P. Kem (R-Mo.) that (1) the Senate committee hold hearings and (2) if necessary Congress should legislate in order to break the ice. Sen. Kem is a member of the Senate Commerce Committee. His suggestion was contained in a letter last Monday to Sen. Johnson, recapitulating the predictions on the freeze lift which have come from top-level FCC officials.

At the same time, Sen. Spessard L. Holland (D-Fla.) turned over his "file" to Sen. Johnson of correspondence he has had with FCC the past two years on the freeze. Sen. Holland suggested that the committee study the files "for whatever action they deem advisable at this time."

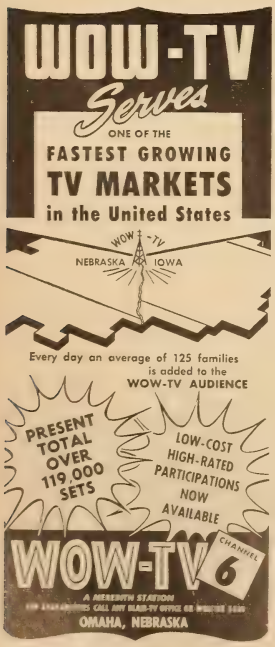
Sen. Johnson said FCC Chairman Paul A. Walker's speech in Chicago last week indicating the freeze will be lifted in the next two weeks (see story, page 76) was being taken verbatim.

"So far as I am concerned this is the last postponement . . . if it is not lifted Congress will have to legislate," Sen. Johnson said.

Sen. Holland deplored that "it would appear that not much progress is being made by FCC toward lifting the freeze which has been imposed on the nation as a whole over a period of several years." The Senator's file revealed that three letters from FCC, two from Chairman Walker (March 28 and March 26) and one from then Chairman Wayne Coy (December 1951), contained the same language in answering the Floridian's complaints.

This was noted by both the Senator and by his office assistant who has been keeping a record of the correspondence.

Sen. Holland in his letter of March 31 to Chairman Walker said in part: ". . . this most recent letter from you is in content the same as the one which was received from the Commission in December 1951. . . ." Consequently, the Senator asserted, the FCC did not seem to be making any progress.



Constituents Up in Air

In his letter to Sen. Johnson, the Floridian complained that the "lifting . . . has been quite regularly postponed from one date to another until my constituents are all beginning to get up in the air about the matter. I . . . feel that the attitude taken by the FCC is not altogether necessary."

His files also revealed that the Senator on Feb. 26 had written the FCC saying the people, "particularly in the Tampa-St. Petersburg area and the Orlando - Daytona Beach area, are getting more and more exasperated about the failure of FCC to approve TV stations which would give them direct and acceptable service." The Senator concluded "delay has now become so great as to be indefensible."

Complaints to Sen. Holland were from people representing a cross-section of business pursuits ranging from broadcaster to airline operator. One of the complaints was the existence of only two TV stations in the state, both of them on the same channel. [WMBR-TV Jacksonville and WTVJ (TV) Miami, both Channel 4 (66-72 mc).]

In the House, Rep. Oakley Hunter (R-Calif.) released a statement he is circulating to his constituents explaining the current situation as described to him by the FCC.

WNBQ (TV) Sales Up

FIRST QUARTER sales this year rose 50% above sales for the same period in 1950 at WNBQ (TV) Chicago, NBC station, Sales Manager John McPartlin said last week. The three-month period was climaxed with sale of a half-hour program, *Noontime Comics*, to Jewel Food Stores five days weekly through Herbert S. Laufman Agency.

CONGRATULATIONS are extended by Sig Mickelson (r), CBS-TV news and public affairs director, to two staff members on their appointments within CBS Television Network. Francis N. Littlejohn Jr. (l) was named managing editor for CBS-TV news and Paul C. Levitan (c) was named special events producer.

Freeze Lift Imminent

(Continued from page 76)

which is unrivaled anywhere on this globe. Let us take as our standard this highest achievement of broadcasting. I know that this industry has within its ranks the vision and the statesmanship to help guide it along the high road of the future."

The FCC chief expressed certainty that "The growth of television will pose new problems affecting the public interest which the Commission must consider if it is to be faithful to its trust."

Turning to the growth of radio from less than 1,000 stations to more than 2,300, he construed it as meaning "that radio is firmly entrenched and it is entrenched because it is rendering a local service to those communities that they need and want. Radio to them is the indispensable medium. They will never again be without this ready, efficient, powerful means of local expression."

He felt that "Economically, the present overall status of radio is excellent" and that "the prospects for the future are also encouraging." He noted that radio's revenues last year were over $450 million—"almost no loss from the total of the year before"—even though TV at the same time was taking in $240 million.

Revenues—Some Up, Some Down

While revenues and profits of networks and their owned radio stations dropped "somewhat," he said, "the revenues of more than 2,200 other radio stations went up," and "more radio stations operated at a profit last year than in 1950."

Radio's answer to TV's emergence, he said, "is not surrender but readjustment," involving "more versatile programming, greater attention to local needs, and more development of the things that radio can do better than television or which television cannot do." He also suggested "a more aggressive, more daring, more realistic employment of FM."

He said he regards it as "the duty of the Commission in the years ahead to take every appropriate step to preserve, perpetuate and promote radio."

Referring to broadcasters' service in national defense through the Conelrad plan and their contributions to the education of the public on political issues, Chairman Walker said:

"These services remind us again that under the American system of broadcasting, it is primarily upon the individual broadcaster that we base our hopes for a service that will best meet the needs of the community and the nation—in peace and in war."

Tribute To Sen. White

He paid special tribute to former Sen. Wallace H. White Jr., co-author of the Radio Act of 1927, whose death occurred Monday (see story page 30).

"American broadcasting will be forever indebted to Wallace H. White Jr. for his leadership in formulating the fundamental law that has served the broadcasters and the public so well for a quarter of a century," he asserted.

He offered this credo: "To perform our respective duties according to the true voice of our conscience; To consider our mutual problems in a spirit of fairness and tolerance; To labor unremittingly to improve broadcasting as an instrument of democracy."

Chairman Walker was introduced by NARTB President Harold E. Fellows.

Preceding the FCC chief's address, Dwight Clark Jr., a high school student and an announcer for KCOL Fort Collins, Col., won an ovation with the "I Speak for Democracy" speech which made him one of four national winners of this year's Voice of Democracy contest, sponsored by the NARTB, the Radio-Television Mfrs. Assn. and the U.S. Junior Chamber of Commerce.

ASCAP, TV MUSIC

Settlement Seen Possible

PROSPECT that ASCAP will reach a settlement with the all-industry TV Music Committee developed Tuesday at a committee meeting held during the NARTB Chicago convention. Dwight W. Martin, WLWT (TV) Cincinnati, presided as committee chairman, with some two-score telecasters present.

Judge Simon Rifkind, chief counsel, and Stuart Sprague, counsel to the committee, reported on the status of litigation. The committee has applied to the U. S. District Court, Southern District of New York, for establishment of terms and conditions for TV music licensing under terms of the amended ASCAP consent decree.

The committee is going ahead with its plans to obtain court action. ASCAP is reported to have expressed a desire to settle the TV music controversy by negotiation.

COY SPEECH

Offers Educational TV Views

"FULL OPPORTUNITY for educational institutions to have use of radio and television outlets as a supplement to, but not a substitute for commercial outlets" was advocated Sunday by former FCC Chairman Wayne Coy, making his first public address since resigning that post [B•T, Feb. 25]. He spoke on "The Future of Educational Radio-TV" at New York's Cooper Union Forum.

Mr. Coy suggested that education's greatest contribution to programming might be the study of ways to improve and develop private broadcasting.

Stressing that he would vote again to reserve 200 channels for exclusively educational use, Mr. Coy nevertheless wondered if educators have considered realistically the money problems of independent TV operation and if they could find practical answers to television financing, "especially when you think of the many other unsolved problems of education."

Required Know-How

Lacking trained technicians, trained programmers, trained producers and writers—as well as money—educators must somehow acquire these technicians in competition with professional rates to produce effective TV programming, he warned, talking to radio listeners via WNYC New York.

Educators' best interests might be served, he suggested, if they get together to produce in combination programs to be made available to commercial outlets, which would be less expensive than operating individual educational outlets—even if the educators have to purchase commercial air time.

Mr. Coy suggested forming a private organization for development of arts and radio in the public interest to study improvement and development of television programs, to emphasize citizen participation in program criticism and to collect money for new programs coupling high audience interest with educational content. The group might open its fund for TV use by state and local groups educationally and even by commercial sponsors of newer program ideas.

His own programming suggestions, which Mr. Coy said he had long wanted to share, centered on the use of film to preserve and circulate "great sermons by great preachers" (as well as complete religious services), "great lectures by great university instructors" such as Albert Einstein, and "great statements by great statesmen" such as Herbert Hoover and Bernard Baruch. "There are many others," he reported, but these could contribute to "a better general understanding" if they were distributed, through a central educational TV organization, to all stations throughout the country.

At the outset of television, educational institutions were not very interested in video, to judge by the number of station applications, Mr. Coy recalled, adding that only one college (Iowa State at Ames, Iowa) currently is operating a TV outlet.

To consider the future of educational TV as very bright is, for Mr. Coy, an "impossible assertion," but he is encouraged by educators' recognition of the medium. He is more encouraged, however, by prospects of TV use as studied by the Joint Committee on Educational TV, the Ford Foundation and the proposed mid-April educators' meeting at Penn State.

Conceding "nauseating" soap operas on AM and "offensive" variety shows on TV, he nevertheless maintained that the proposed cure—operation of channels by educational institutions—is "an oversold idea."

Broadcasting Successes

"I, for one, have difficulty in accepting the thesis that radio and TV have failed," Mr. Coy asserted, "even if you admit nothing more than that broadcasting has provided news—the most unbiased in the United States—for the past 30 years." Bowing also to presentation of fine music and drama on both TV and radio, Mr. Coy identified broadcast media as having "served to extend the lives of many, many people," in terms of life span as well as intellectual outlook. A particular compliment was handed by the music-loving administrator to the "cameraman at NBC who caught Toscanini's expressions" during NBC Symphony telecasts.

Quizzed after his hour-long speech, Mr. Coy suggested that colleges and universities might meet production costs by operating commercially part of the time, an idea being considered by Michigan State. The TV consultant to Time Inc. turned thumbs down on educational TV via state or municipal channels, however, since he feared that elected politicans might be tempted to use civic outlets for political purposes.

Asked about telecasts of Congressional sessions, he doubted the feasibility of covering all meetings, but believed that the public should be allowed to attend important sessions via broadcasts and telecasts.

MULLEN, KERSTA

Form Consulting Service

TELEVISION consulting service which will include assistance in financing as well as application procurement, facility construction and detailed plans for station operation was announced last week by Noran E. Kersta and Frank E. Mullen.

The two have combined their operations to cover both the East and West Coasts with Mr. Mullen's office at 121 South Beverly Drive, Beverly Hills, Calif., and Mr. Kersta located at 143 Meadow St., Garden City, N. Y.

Mr. Kersta was director of NBC television until 1949 and was one

Mr. Mullen

Mr. Kersta

of those who developed station and network television plans. He left NBC and formed his own consultation company. Ray Kelly, former NBC production director, is associated with Mr. Kersta in New York.

Mr. Mullen, who was formerly executive vice president of NBC, has been a consultant in radio, television and motion pictures since 1949 in Los Angeles.

"In the next two years, it is probable that between $500 million and a billion dollars will be required for capital investment by the 2,000 television broadcasters in prospect," Mr. Mullen said. "The work we have already done in the field has convinced Mr. Kersta and myself that by joining our efforts we can provide a complete consulting service in all respects, not only to the new broadcasters entering television but also to the radio broadcasters now ready to get into television with both feet."

ACE Meets May 2-3

USE of television in education will be among topics discussed at the annual meeting of the American Council on Education, May 2-3 in Chicago.

High TV Towers

(Continued from page 77)

the March 5 meeting of CAA, FCC and ATA officials, held under the aegis of the Airspace Utilization Branch of CAA [B•T, March 31], were the recommendations of the Air Line Pilots Assn. made at a March 18 meeting of the Chicago Regional Airspace Subcommittee.

"Because ALPA believes that the erection of steel 'needles' 1,000, 1,500 and 2,000 ft. above the surface . . . will seriously affect the safe and efficient operation of present and future air transportation," it proposed that all TV antennas be required to be placed on one tower and that such towers be placed in "known areas of obstructions," such as on top of buildings or within the confines of a city. It also suggested that a height limit be placed on radio-TV towers.

ALPA observed that lighting of towers was not sufficient during weather conditions requiring planes to operate on instruments. It recommended that a radio warning device "such as the 75 mc fan marker" be located at the tower site.

Fact that jet-powered planes would soon be in commercial use was stressed by ALPA. It pointed out that an aircraft travels five miles in one minute when it is flying at 300 mph; 10 miles in one minute when flying 600 mph.

"Definite Criterion" Needed

Chicago airspace subcommittee did not concur in all the ALPA recommendations, but agreed that some action was mandatory immediately to establish a "definite criterion" for radio-TV towers.

The subcommittee comment also stated that TV applicants had received quotations from tower builders for 3,000 ft. structures "and they [the broadcasters] do not consider the cost prohibitive when evaluating the anticipated results."

CAA Planning Officer D. D. Thomas, named to coordinate the CAA's study of the situation, last week wrote to all 14 of the agency's regions asking for comments and recommendations. When replies are received, they will be correlated and a specific set of criteria is expected to be evolved for the guidance of all regions.

Purpose is, according to the CAA executive, to ensure that all regions and airspace subcommittee, use the same set of standards in evaluating applications for TV towers.

As it is now, he explained, some regions are inclined to be liberal in their interpretations of existing regulations, while others are more conservative.

Mr. Thomas conferred with FCC staff officials last week in the first move of his "exploration" of the situation.

Exaggerated belief by air industry officials that immediately after the TV freeze is lifted there will be 2,000 TV stations under construction—all with 1,000-2,000-ft. antennas—is believed at the root of their activity.

Among the cities where such towers are being considered are Chicago, Boston, Norfolk, Nashville and Cincinnati. Costs generally are from $400,000 for a 1,500-ft. tower to $815,000 for a 2,000-ft. structure.

All radio-TV towers over 500 ft. have to be submitted to regional airspace subcommittees, under Part 17 of the Commission's rules.

CAA regulations require that planes fly not less than 1,000 ft. above the highest structures in the airways.

What the aviation industry has in mind was spelled out in detail in the following comments of the Air Line Pilots Assn. included in the minutes of the March 18 meeting of the Chicago Regional Airspace Subcommittee:

The number of applications for the erection of TV towers already received, plus those anticipated, will create serious hazards to enroute and terminal navigation unless some workable plan is adopted to serve as a guide in solving this problem.

Erection of steel "needles" 1,000, 1,500 and 2,000 feet above the surface, within or immediately adjacent to airport control zones and airways, will seriously affect the safe and efficient operation of present and future air transportation.

Certainly it is much easier to regulate the erection of man-made obstructions than it is to have them moved or knocked down after they have been built. The following suggestions are offered so that some plan can be adopted to prevent undue hardships on either the Television and Radio industry or the Air Transportation industry.

1. Unless from a technical standpoint it is impractical, it would be more desirable and safer for air navigation to have one tower of sufficient height to adequately serve an area with several antennae mounted thereon, than several towers of equal or nearly equal height, scattered all over the surrounding countryside. If one tower can be used by several broadcasters, the cost of erection as well as maintenance, could be shared by those companies granted FCC licenses. Television set owners would benefit from such an installation because they could tune to one tower and not have to compromise on several locations.

2. From a pilot's viewpoint, it would not be as great a hazard to have a tower located in a known area of obstructions, such as on top of a building or within the confines of a city, than to have a tower located in an area where it is the only major obstruction, and is also an added hazard to air transportation. The exception to this would be when a tower can be erected in an area where it would not become a hazard to the normal flow of traffic into or away from an airport. The thought behind this is that cities are known areas of obstructions and every effort is being made to avoid operation over congested areas.

3. A height limit should be established for TV and radio towers.

4. During weather conditions which require aircraft to operate on instruments, or during periods of reduced visibility, obstruction lighting on a tall tower is not sufficient warning. Perhaps it would be well to begin thinking about a radio warning device, such as the 75-mc fan marker, to be located at the tower site. This would serve as an obstruction warning during IFR weather conditions and during periods of low visibility when the obstruction lights are not operating.

Commercial jet aircraft will soon join the military jets now in operation and the speeds of these aircraft should serve as a guide for future planning—at 300 mph an aircraft travels five miles in one minute; at 600 mph, an aircraft travels ten miles in one minute.

If we keep these speeds in mind and also future air travel, it is not difficult to understand why serious thought should be given this problem now to restrict the erection of obstructions, which will substantially affect the safe and efficient operation of air traffic.

The minutes of the subcommittee also included the following comments:

Although the Subcommittee was not in concurrence with all the suggestions outlined above, it was in unanimous agreement that *immediate* action was *mandatory* for establishing a definite criterion for antenna erection in order that the television industry and aeronautical interest may have a guide upon which to base their decisions relative to this highly important and competitive activity [italics not supplied].

The television industry has received quotations from contractors on structures up to 3,000 feet and they do not consider the cost prohibitive when evaluating the anticipated results.

The Subcommittee has been informed that from an engineering viewpoint, one structure supporting several antennae is highly desirable in addition to placing all structures within one centralized area when separate antennae are necessary.

Text of ATA Letter

FOLLOWING is the text of the March 6 letter to Rep. Robert Crosser (D-Ohio), chairman of the House Interstate & Foreign Commerce Committee, from S. G. Tipton, general counsel of the Air Transport Assn., regarding legislation to specifically give the FCC power to deny applications which propose antenna towers which may be considered air hazards:

The . . . bill now before your Committee [S 658] permits you to deal with the hazards to air navigation created by the erection of radio and television towers. The enormous height of proposed television towers makes them a special problem, and the large number of applications now being or soon to be filed with the Federal Communications Commission for tower construction permits makes it an urgent matter requiring immediate consideration.

The Federal Communications Act in its present form does not deal directly with this problem; it provides, in Section 303, that the Commission shall "(q) Have authority to require the painting and/or illumination of radio towers if and when in its judgment such towers constitute, or there is a reasonable possibility that they may constitute, a menace to air navigation." There is not, however, specific authority to deny permits to construct such towers, and the mere illumination of them does not necessarily eliminate the hazard. Although the Commission in at least one case denied an application for a license to reconstruct a radio station in part because the antenna would constitute a hazard to air navigation and was sustained by the courts in *Federal vs. Communications Commission*, 145 Fed. 2d 578 (1944), this was decided under the Commission's general powers to issue, renew, or modify licenses contained in Section 309 of the Federal Communications Act, and not on specific statutory authority. Congress has not specifically authorized the Commission to deny applications when such towers constitute a hazard to air navigation.

In the absence of precise statutory authorization the Commission is employing an administrative procedure of referring doubtful cases to the other government agencies interested in air safety. The agencies often hear the applicants' proposals and recommend an approval or disapproval. This procedure has little, if any, statutory basis, and is advisory only. If the recommendations by the agencies responsible for air safety are rejected by the applicant he can demand a hearing before the Commission.

I recognize that this comment on S. 658 comes late in your consideration of the bill, but the immediacy of this problem has arisen recently and will be no less within the coming months that it is urgent to consider it while this bill is before your committee. The Federal Communications Commission has already referred several proposed applications for construction permits for television towers which are now being studied by the Air Force, the Navy, the Coast Guard, the Civil Aeronautics Administration, and the Civil Aeronautics Board. These applications will not only continue but are expected to increase when the freeze on new television licenses is lifted. Out of fairness to the applicants an early disposition of them should be made. The applicants want prompt decisions to permit them to find other locations for the tower in sufficient time to permit the operation of the broadcast stations at the earliest time authorized by the Commission. At the same time, the potential hazards to air navigation should also receive the consideration to which they are entitled. We recommend, therefore, that the Communications Commission be given clear authority to deal with them by amending the Federal Communications Act by inserting a provision in this bill which would add to Section 303 of the Communications Act a new paragraph (s), which would read as follows:

> **"(s) Have authority and be required to refuse to issue or modify any license or construction permit when such license or permit would authorize the operation or construction of radio or television towers which in its judgment, after consultation with the Civil Aeronautics Administration, the Civil Aeronautics Board, the Department of Defense, and the Treasury Department, constitute, or there is a reasonable possibility that they may constitute, a hazard to air navigation."**

Such a provision would remove any doubt that the Commission could deny construction permits where towers are a hazard to air navigation after consultation with agencies responsible for air safety. Each of the departments to be consulted operate aircraft or have a responsibility for the operation of aircraft. The Treasury Department's interest is due to the Coast Guard's operation of aircraft in rescue operations, and the Civil Aeronautics Administration and the Civil Aeronautics Board are responsible for safety in civil air navigation.

WJIM-TV EXPANSION

Higher Antenna Is Planned

WJIM-TV Lansing, Mich., filed with the FCC an application to increase its tower height from 320 to 500 ft. and install a new six-bay antenna to replace its present three-bay radiator, General Manager Howard K. Finch announced last week. CAA approval has been obtained, Mr. Finch said.

Also ready to be filed with the FCC is an application to install a new 25 kw RCA transmitter, Mr. Finch said. Upon FCC approval, the higher transmitter power and antenna height and gain will improve service for the central Michigan area with approximately 25 times the present 19 kw effective radiated power of WJIM-TV, he said. What is now secondary coverage will become the single Lansing station's primary area, Mr. Finch pointed out.

Consistent noise-free reception and increased viewing power will be provided to such cities as Flint, Saginaw, Bay City, Jackson and Battle Creek, he said. Additional TV service will be provided to Dearborn, Grand Rapids, Kalamazoo, Pontiac, Midland and Ann Arbor, he added.

WAUG to Seek TV

WAUG Augusta, Ga., announced last week that it plans to file for TV but is waiting until the end of the TV freeze. Melvin Purvis, president of the 250 w daytime station on 1050 kc, said that since the formation of the company two years ago it has been a "firm objective" to apply for TV. Augusta has a population of 71,508 and is about 140 miles east of Atlanta. WJBF Augusta has a TV bid pending at FCC.

"What's Cooking"
is Hot Stuff in
FORT WORTH-DALLAS!

WBAP-TV

BOWMAN BISCUIT CO.

Last September the Bowman Biscuit Company of Texas started TV advertising on WBAP-TV exclusively in the Fort Worth-Dallas market. Only five daytime announcements weekly were used, mainly participations in WBAP-TV's own local kitchen show "What's Cooking" with Margret McDonnald, from 1:00 P.M. to 2:00 P.M. early in the afternoon.

After two months, "Four times as many Mayfair Cookies have been sold in the Dallas-Fort Worth Area as ever before during a comparable time period" reported Mr. J. J. Sanders, Vice President and Division Sales Manager of Bowman--"This record constitutes the largest output of any single item ever sold out of the Fort Worth Branch." Grocer cooperation was excellent resulting in many tie-in displays and the comment "Customers say, 'I saw it on Television, and it looked so good!'"

Want Reaction ... from the Small-Fry Faction?

Here's a constructive youth program with a strong public service angle—Bob Penny's

"ACTION UNLIMITED"

"Action Unlimited" talks on even terms with a full-sized audience of half-sized halfbacks and keen-minded teen-agers—emphasizes the importance of fair play, sportsmanship and education. Penny handles his popular sports and hobby program the way kids (and their parents) like to see it handled. Penny's pointers help realistic youngsters to understand the fundamentals of sports—the pleasures of educational hobbies. They pick up background information on class work and scout work—they get the right answers to their own questions—they see and hear big name guest stars they admire.

Thousands of these young citizens look and learn when "Action Unlimited" hits TV screens in this area from 5:30 to 5:50 p. m. Monday through Thursday. *What* they learn comes in handy when Mom's washer—or Dad's car—needs fixing. And they earn a strong vote when it comes time to replace them, too.

So here they are—an interested, influential audience of tomorrow's adults—tuned four times a week to the station that's made a name for itself with a long, long list of public service programs. They're all yours on WHIO-TV's "Action Unlimited." George P. Hollingbery, national representative for WHIO-TV, can give you market data and availabilities.

Huge Stage-Lighting Plan Set By CBS-TV

(Report 210)

CBS will install what it calls the largest stage-lighting control system at its television city in Hollywood in August for Oct. 1 operation, CBS-TV Vice President Harry S. Ackerman announced last week at the NARTB convention. Mr. Ackerman is in charge of network programs originating in Hollywood.

The C-I system, named for Century Lighting, which built it, and George C. Izenour, the inventor, is the only all-electronic system of its kind, Mr. Ackerman said. It can control 5½ million watts and achieve a gradual effect of a brilliant sunset, he said. The inventor claims the C-1 extends "the 10 human fingers many, many times," with its "memory board" enabling the operator to remain at least 10 light cues ahead of the performance at all times.

Mr. Izenour claims the system "eliminated the hit-and-miss method of light cueing, and makes possible a system of light-cue notation equivalent to that of music cues in radio." Stage designer Jo Mielziner was quoted as saying the control system "is in my opinion the most important single development that has been made in the theatre during the past 25 years." The system was designed to point up camera action and to aid the artist in his expression, Mr. Izenour said. Previewed at the NARTB convention, it was described in a paper at the engineering session Wednesday afternoon.

Late Feb. Nielsen Topped by Godfrey, 'Lucy'

CBS-TV's *I Love Lucy*, reaching 8,261,000 homes and *Arthur Godfrey's Talent Scouts*, being viewed by 57.8% of homes, were the leading programs in A. C. Nielsen's second TV report for February [B•T, March 10].

Ratings are based on two weeks ending Feb. 23. Complete ratings follow:

Rank	Program	Homes (000)
1	I Love Lucy (CBS)	8,261
2	Red Skelton (NBC)	8,249
3	Texaco Star Theatre (NBC)	8,168
4	Colgate Comedy Hour (NBC)	7,951
5	Your Show of Shows (Reynolds, R. J., Tobacco) (NBC)	7,177
6	Your Show of Shows (NBC) (Participating)	6,900
7	Philco TV Playhouse (NBC)	6,692
8	Arthur Godfrey & Friends (CBS) (Liggett & Myers Tobacco)	6,634
9	You Bet Your Life (NBC)	6,634
10	Fireside Theatre (NBC)	6,624

Rank	Program	Homes %
1	Arthur Godfrey's Scouts (CBS)	57.8
2	Red Skelton (NBC)	54.1
3	I Love Lucy (CBS)	53.7
4	Texaco Star Theatre (NBC)	51.8
5	Colgate Comedy Hour (NBC)	51.4
6	Your Show of Shows (NBC) (Reynolds, R. J., Tobacco)	47.1
7	Your Show of Shows (NBC) (Participating)	46.9
8	Arthur Godfrey & Friends (CBS) (Liggett & Myers Tobacco)	45.7
9	Philco TV Playhouse (NBC)	43.2
10	Big Town (CBS)	43.1

Godfrey, Lucille Ball Lead March ARB Ratings

ARTHUR GODFREY'S *Talent Scouts* was the nation's top TV show percentage-wise but *I Love Lucy*, starring Lucille Ball, reached the greatest number of homes, according to ratings for March by the American Research Bureau.

Percentage-wise, *Talent Scouts* drew a rating of 52.1; *I Love Lucy* followed closely behind with a rating to 50.6%. Difference may be traced to Mr. Godfrey's show being telecast in 25 cities, and Miss Ball's in 62.

Rank	Program	Homes %
1.	Talent Scouts (CBS)	52.1
2.	I Love Lucy (CBS)	50.6
3.	Red Skelton (NBC)	50.5
4.	You Bet Your Life (NBC)	48.6
5.	Star Theatre (NBC)	47.9
6.	Show of Shows (NBC)	45.8
7.	Blue Ribbon Bouts (CBS) (La Motta vs. Hairston)	41.0
8.	Comedy Hour (NBC) (Donald O'Connor)	39.9
9.	Cavalcade of Sports (NBC) (Young vs. Durando)	39.6
10.	Godfrey & Friends (CBS)	39.1

Rank	Program	Homes (100's)
1.	I Love Lucy (CBS)	8,260
2.	You Bet Your Life (NBC)	7,960
3.	Star Theatre (NB)	7,890
4.	Red Skelton (NBC)	7,800
5.	Show of Shows (NBC)	7,730
6.	Comedy Hour (NBC) (Donald O'Connor)	6,370
7.	Fireside Theatre (NBC)	6,130
8.	TV Playhouse (NBC)	5,980
9.	Godfrey & Friends (CBS)	5,920
10.	Cavalcade of Sports (Young vs. Durando)	5,770

film report

For the first time current TV feature films are receiving prominent motion picture awards. *Seven Days to Noon*, produced by **Alexander Korda** and distributed by **Snader Telescriptions Sales Inc.**, won recent Academy of Motion Picture Arts & Sciences "best original film story" award for 1951.

Southern California Motion Picture Council cited another **Korda** film, *Bonnie Prince Charlie*, also distributed by **Snader.** It is now being released to television.

* * *

Jerry Fairbanks' special hour-long Biblical TV programs, *Hill Number One* and *That I May See*, have been released for Easter weekend. They were filmed for *Family Theatre* and are set for 142 presentations on 86 stations. **Arthur Pierson** directed both pictures.

Films are offered without charge. Sponsorship plans have been cancelled due to religious nature of programs.

* * *

Frank Wisbar Productions, Hollywood, to film **Procter & Gamble's** *Fireside Theatre* series in approximately six months in order to cut costs. By using same production crew, additional savings will be effected.

* * *

Mel Ronson, Hollywood film writer, acquired TV film rights to *New York's Finest* from New York Police Benevolent Assn. PBA, sharing in proceeds of series, will suggest retired policemen whose stories may be film possibilities.

Production . . .

Tele-Voz Studios, at Churubusco Studios, Mexico City, plan May 6 production of *Gloria Swanson Show* on 13 half-hour TV film series. Miss Swanson, under contract to **Simmell-Meservey TV Productions Inc.**, Beverly Hills, will receive salary plus residual rights.

* * *

Hal Roach Jr. Productions signs **Joan Harrison**, producer at Universal Pictures, as associate producer on new half-hour dramatic TV film series, *Sunday Nights*, to be distributed by **Official Films.**

Mr. Roach also preparing *Guns of Destiny*, half-hour TV film series with **Kenneth Noyes** as associate producer. Format concerns gun collector dramatizing story of each gun in collection.

* * *

Official Films announces that negotiations have been completed with film stars **Charles Boyer, Rosalind Russell, Dick Powell, Joel McCrea** and **Robert Cummings** to make half-hour television films.

Messrs. Boyer, Powell and McCrea and Miss Russell will appear in Official's *Four Star Playhouse* produced by **Don Sharpe.**

The Robert Cummings Show features the actor and **Julie Bishop** in a comedy-mystery series.

Dougfair Productions has finished filming *Terry and the Pirates* for TV audiences. Dougfair and officials have concluded arrangements for distribution of the series.

* * *

Judy Canova, star of NBC radio's *Judy Canova Show*, completing TV pilot film at **Republic Studios** for proposed NBC-TV version. Cast includes **Mel Blanc, Franklin Pangborn** and **Mari Blanchard. Del Lord** is directing.

Film People . . .

George Giroux Jr., recently resigned staff director KTTV (TV) Hollywood, appointed West Coast television program supervisor **Procter & Gamble Productions Inc.** Mr. Giroux has been associated with motion pictures, radio and TV for the past 10 years.

* * *

John H. Mitchell, director of **United Artists Television**, announced that **Bernard Hendel**, general manager of the Hendel Fruit Company, has been appointed sales representative of UA-TV in Pittsburgh, Johnstown, Erie and Huntington, Pa.

Mr. Mitchell also announced that **Edward J. Potter** has been appointed sales representative of UA-TV in San Antonio.

* * *

Charles Kerr signed by **Philidan TV Productions** as production manager on half-hour film series based on Ernest Haycox stories. Mr. Kerr has been associated with RKO, Walter Wanger and Frank Melford in similar capacities.

* * *

Bob Bennet joins **Jerry Courneya Productions**, Beverly Hills, as film writer for 26 quarter-hour TV films starring **Noah Berry Jr.**

* * *

Joan Vohs, film actress, and **Allyn Smith** signed by **Scandinavian-American Television Co.**, Beverly Hills, for leads in Hans Christian Andersen film series. Films are being produced in Copenhagen by **Karl E. Moseby.**

* * *

Screen Televideo Productions, Hollywood, signed **Georgia Johnstone**, secretary to Agnes Moorehead, as casting director.

* * *

Lorraine V. Hanley, production department at WROK Rockford, Ill., to **Jerry Fairbanks Productions**, Hollywood, as research editor of creative department.

* * *

Jane Nigh (Lorelei in CBS-TV *Big Town*) married Lt. James Baker March 16.

ROLE FOR BANKS IN TV

Cited by Bankers Trust

THERE'S a place for the bank in the television industry, according to Alex Ardrey, executive vice president of Bankers Trust, New York, who said that the bank's role will not only be financing of video productions, but other business services as well.

State of the industry and lack of bank participation to date raises questions that can only be investigated now, he pointed out, but Bankers Trust is considering naming someone within the next three months—probably from among its own staff—to see what possibilities are. "The big problem is to find someone who knows about banking interests as well as television," he said, "so it may mean that only after five years' active study will we really know where we stand."

George Herliman

GEORGE HERLIMAN, 50, head of Herliman Productions, producer of films for television, died Sunday, March 30, in Doctors Hospital, New York. Mr. Herliman started his film career in 1925 when, with his brother, he operated Herligraph Studios to process motion picture film, a business sold to Consolidated Films in 1930. He moved to the West Coast where he was a producer for Republic Studios and, independently, Caledonia Films. Returning to New York, he founded Herliman Productions and Film Classics, a rental library later sold to United Artists.

NEW SERIES of 3½-minute films, *In the Fashion Spotlight*, featuring fashions of America's top designers and filmed in cooperation with leading women's magazines and fashion houses, is being distributed by DuMont TV network's film department.

PENNANT GROUP

Forms in Hollywood

INCORPORATED for $100,000, new Hollywood television-radio production and packaging company, Pennant Productions Inc., has been organized with headquarters at General Service Studios.

Ed Woodworth, formerly production supervisor for Commodore Productions Inc., who recently formed Citation Productions, heads group as president. Harrison Dunham, attorney and former general manager of KTTV Hollywood, is secretary and counsel.

New company plans four half-hour TV film series, first to be *Date With Destiny*, which was to have been produced by Citation Productions. Pennant will establish New York and Chicago offices, it was said.

Mr. Dunham also is spearheading formation of General Television Network, and reportedly backed by a group of nationally known TV station owners and financiers, has been negotiating purchase of General Service Studios from George and James Nasser for $2¼ million.

Telecourse Expands

EXTENSION to western Michigan of college courses by television given by the U. of Michigan on its *Television Hour* (Sunday, 1 p.m.), planned and taught by faculty members, has been announced. WKZO-TV Kalamazoo, in an arrangement by General Manager John E. Fetzer and WWJ-TV Detroit's Manager W. E. Walbridge, will broadcast to western Michigan. WWJ-TV, where the program originates, and WJIM-TV Lansing already carry the program.

WTVJ (TV) Expands

WTVJ (TV) Miami, Fla., is renovating the Capitol Theatre in the city to give it additional space for studio, office, storage and maintenance facilities. The structure will contain three stories when it is completed, the station has announced. It is adjacent to a three-story building which already houses WTVJ.

CBS-TV Rodeo

CBS-TV has announced plans for a weekly hour telecast of its own rodeo featuring top talent if audition passes test. Kinescope will be filmed April 13 at Knott's Berry Farm near Santa Ana, Calif.

CALIFORNIA'S Gov. Earl Warren resumes half-hour monthly KECA-TV Hollywood *Report to the People* April 16.

GOLF TOURNEY

Higgins, Roche Winners

BRAVING inclement weather, more than 80 divot diggers fought the battle of Bunker Hill Country Club in Chicago March 30 to decide the champions of the 18th annual BROADCASTING • TELECASTING-NARTB golf tournament at convention opening last week.

The golfers recorded excellent scores despite the weather, with Joe M. Higgins, WTHI Terre Haute, Ind., shooting a 79 for low gross first prize and Steve Roche, NBC Chicago, scoring 61, aided by a blind bogey handicap of 30, to win low net honors.

The two received silver trophies from BROADCASTING • TELECASTING, which entertained with its annual "19th hole party." Tom O'Connell of J. Walter Thompson Co., Chicago, took second low gross score with an 80 and S. (Bud) Fantle Jr., KELO Sioux Falls, S. D., totaled 81 for third place.

The Bolling Co.'s John Coy, Chicago, shot a net 64, helped by a 30 handicap, for second low net, while Glenn Wilkinson of Wilkinson, Boyden & Crogun, attorneys, Washington, took third nêt honors with a 67.

Tom O'Neil of General Tire & Rubber Co., Akron, Ohio, and Tom Wilson of Dow, Lohnes & Albertson, attorneys, Washington, won free subscriptions to the *Golf Digest* which were donated by John Barnett, editor, for the most pars in the first nine holes.

SECOND-TIME winner Joe Higgins (r) of WTHI Terre Haute, Ind., in BROADCASTING • TELECASTING'S annual golf tourney conducted during the NARTB convention, congratulates Steve Roche of NBC Chicago, who won the low net trophy with a 61 score on a 30 handicap. Mr. Higgins took the low gross cup with a 79. The tournament took place Sunday preceding the meeting in Chicago.

POPPELE CHOSEN

Heads Radio Pioneers

JACK R. POPPELE, WOR New York, was installed as president of the Radio Pioneers Club at the club's annual dinner held Tuesday night during the NARTB Chicago convention. He succeeded Carl Haverlin, BMI, in the office.

Other officers elected were: Paul W. Morency, WTIC Hartford, first vice president; Martin Campbell, WFAA Dallas, vice president; Raymond Guy, NBC, vice president; O. H. Caldwell, *Tele-Tech*, vice president; Charles A. Wall, BMI, vice president; Samuel R. Dean, CBS, secretary; James E. Wallen, MBS, treasurer.

Citations for unusual contributions to radio were awarded Dr. Lee de Forest, radio inventor; Brig. Gen. David Sarnoff, RCA; Hon. Herbert Hoover; Dr. Alfred N. Goldsmith, consultant, and Charles Pannill, inventor. Mr. Guy made the presentations, with Mr. de Forest responding. The posthumous Radio Hall of Fame award went to Reginald Aubrey Fessenden for pioneering inventions in transmitting light, sound and electric waves. William S. Hedges, NBC, announced the selection. Dr. Christopher Crittenden, director, North Carolina Dept. of Archives and History, accepted the award.

Ex-President Hoover greeted the club by tape recording.

Mr. Haverlin announced that Victor C. Diehm, WAZL Hazleton, Pa., had been elected a life member in the club. The station staff surprised him by sending the $100 fee to the club.

Thomas K. Finletter, Secretary of the Air Force, delivered the principal address of the evening, reviewing progress of the air construction program.

CBS has donated offices in recently leased Earl Carroll Theatre, Hollywood, to Radio-Television-Recording Charities Inc.

FLORIDA BROADCASTERS

Schedule Meeting May 22-23

TWO-DAY meeting of the Florida Assn. of Broadcasters will be held May 22-23 at the Royal York Hotel, Miami Beach. Officers and two new directors will be elected for the year commencing July 1. Current president and secretary-treasurer are S. O. Ward, WLAK Lakeland, and John Browning, WSPB Sarasota, respectively.

Speakers for the Thursday night dinner meeting, Friday banquet and business sessions have not been announced. Program chairman for the meeting is George Thorpe, WVCG Coral Gables.

Sixty six of the state's 75 stations are members of the FAB, said to be the oldest state broadcasters group in the country.

Wins Scholarship

KURT F. W. MOELLER, electrical engineering major at Polytechnic Institute of Brooklyn and graduate of RCA Institutes, was announced Wednesday as winner of a four year university scholarship offered by RCA. Scholarship committee consisted of Dr. Alfred N. Goldsmith, consulting engineer; Dr. Ernst Weber of the Polytechnic Institute, and Maj. Gen. George L. Van Deusen, RCA Institutes president, with final selection approved by the RCA education committee.

GOOD MUSIC GROUP

Plans Audience Study

AUDIENCE surveys on listenership, composition, family habits and income level will be completed by the Good Music Stations which include WFLN (FM) Philadelphia, WEW St. Louis, WEAW (FM) Evanston, Ill., WQXR New York, WGMS Washington, WXHR Boston, WSNJ Bridgeton, N. J., KFAC Los Angeles, KEAR San Mateo, Calif., KIXL Dallas and WBIB (FM) New Haven, Conn.

Report will be ready in June for use by the group's national sales organization. Results of two local studies made in Philadelphia and New York will be correlated with surveys being done in St. Louis, Raymond Green, chairman, announced last week.

Sales strategy was outlined by managers of Good Music Stations who met during the NARTB convention. Meeting was centered around attracting more local and national business to the stations, seven of which are both AM and FM outlets.

Combined sales presentation will deal with "discriminating listening and buying audiences" which the group claims to have.

ALAN REED, who portrays Mr. Clyde and John Brown, who portrays Al of CBS Radio *My Friend Irma*, are partners in manufacture of new speaker housing to be demonstrated at Sound & Electronics Show in Long Beach Calif., this summer.

COVERAGE RIGHTS

Argued in Chicago

ADIO and TV are having their icrophones and cameras pushed t of court and legislative proedings but it's their own fault.

This charge spiced a wide-open bate on coverage of trials and arings as NARTB's convention ound up three days of meetings Chicago last week.

An afternoon of formal debate by o nationally known legal figures ound up with agreement that sic rights of the public to hear d see such proceedings must be otected against hasty and unfair tion by rule and law-making dies.

Pitted against each other in a ntest that was regarded as an tstanding presentation of the dio and TV case were James M. ndis, attorney, and Louis Waldn, labor attorney.

Mr. Landis argued on behalf of lio-TV reporting of proceedings. contended the public is entitled know how its judicial, regulatory d legislative bodies operate.

Taking an oratorial position ainst pickup of proceedings, Mr. aldman readily conceded in a e-for-all discussion after the rmal debate that broadcasters d telecasters have their own hts. He chided the industry for ling flat on its face in failing to ke its position known while the w York legislature was considerits recent bill banning radio--movie reporting of proceedings olving subpoenaed witnesses. e bill recently became law.

Mentions Broadcasters Rights

Mr. Waldman is chairman of the w York State Bar Assn. comtee on human rights, a comtee that endorsed the legislae position. He said he would like see "a better arrangement been broadcasters and the bar" l conceded again that broadters rights should be protected well as those of the general blic.

n a final observation, Mr. Landis med the old Mayflower decision the FCC "ridiculous." He added, can't understand it." The deci- had prevented broadcasters m taking editorial stands.

o runs-hits-errors tabulation made of the 2½-hour contest it was conceded by most of the ticipants and observers that the istry's position was greatly ngthened by the exchange of vs and the running fire of ora-. The debate started out with two chief participants taking metrically opposite views. It ed with what was described as ealthy statement of positions will inevitably clear up misceptions of the way public prolings are covered by electronic ia.

ewspapers were criticized at ral points for their unfair llines and biased presentation of hearings and trials, pointing up the relatively accurate and uncolored versions given the public when the microphone and camera are present. At the same time, Mr. Waldman made the point that stations tend to pick the exciting and the dramatic in their coverage.

Referring to Speaker Sam Rayburn's recent ruling that House of Representative rules do not permit radio-TV coverage, Mr. Waldman said he had congratulated Speaker Rayburn for the decision but added this pointed comment, "I deplore his decision."

As the debate got under way, Mr. Landis reduced the issue to this point, "Does TV create new possibilities of abuse." Then he asked rhetorically, "is there anything fairer than TV? It eliminates the possibility of misrepresenting the situation. Unlike newspapers, TV can't color proceedings. Greater publicity develops an interest in good government."

Inequities in the conduct of hearings and trials must be solved by forms in rules and laws, he said, rather than by mere suppression of publicity. He conceded there is some "hamming" by politicians and witnesses but suggested this would backfire in the end.

Actually the effect of TV coverage is "serving," he contended, serving as a protection of basic rights of the witness. He felt an innocent man would want TV coverage instead of mere reporting by the press.

Judicial proceedings are different from legislative hearings, he agreed, but predicted that if the public could see a judge asleep on the bench or watch mal-administration of justice it would bring fast reforms that are hard to accomplish by means of bar association reports and resolutions.

Kefauver's TV Success

Mr. Landis referred to the prominence Sen. Estes Kefauver (D-Tenn.) achieved as a result of TV, setting off a point that was referred to frequently. Mr. Waldman suggested the "lesson of Kefauver has not been lost on other legislators," who observed what TV could accomplish. "Where human rights are involved it's a different situation," he warned. The legal questions centering around human rights were worked over at some length by both debaters. The matter of "mike fright" was brought up, too. Mr. Waldman said the mechanics of broadcasts and telecasts can jeopardize ability of a witness "to be himself." He called the Kefauver hearings "a Barnum & Bailey performance."

Mr. Landis predicted the public will decide whether the hearings were merely a circus. "If trials are dignified, let the people know," he said. "If they are not, let the people know."

Newspapers have deadlines, Mr. Landis said, and all legislators and committee lawyers know them, arranging testimony accordingly.

"If Senator McCarthy (R-Wis.) were after me, I would want television coverage," Mr. Landis said. "If the government is run badly, put congressmen and senators on the screen where we can look at them. I'm deeply sincere in that conviction."

Mr. Waldman said protection must be given people whose lives and rights are involved. "We can't use public education as a device to kick people around," he argued.

During the question period Lester L. Gould, WJNC Jacksonville, N. C., criticized Mr. Waldman's bar group. "You acted without my consent, you deprived me of my rights," he said. Again Mr. Waldman struck at the industry, saying, "You should have insisted on public hearings in the New York legislature. You were asleep." Mr. Waldman conceded he would not have opposed telecasting of such hearings.

Due Process Clause

R. Russell Eagan, Washington radio attorney, asked how coverage could jeopardize the due process clause. Mr. Landis replied that constitutional law "is really only horse sense and statesmanship."

Mr. Waldman finally observed that the New York statute is borderline in its application though constitutional in regard to the way it was drafted.

"What power has a senator to call a witness a racketeer before 20 million people," Mr. Waldman asked, drawing a quick response from Mr. Landis who termed this one of the foundations of free government.

Rex Howell, KFXJ Grand Junction, Col., long a leader in the fight on behalf of editorializing on the air, raised this point, drawing from Mr. Landis the harsh criticism of the former FCC policy.

Ralph W. Hardy, NARTB government relations director, said there was a tendency to confuse closed and open hearings. "If a witness is subpoenaed to testify in an open hearing, is it his right to decide whether to tell his story?" he asked Mr. Landis.

"That's the committee's right," Mr. Landis replied. "If the hearing is open, open it to this means of communication." He praised *Meet the Press* and similar programs, and said he might have decided not to vote for a Presidential candidate he had watched in action on television. "It's wonderful what the public gets out of these programs," he added.

Getting back to the Kefauver hearings, Mr. Waldman called Rudolph Halley a lawyer whose television appearances had brought him into a top public position in New York City. "Halley was put in office because he cleaned up a condition that smelled to high heaven," Mr. Landis responded.

On the stage fright issue, Judge Justin Miller, who moderated the proceedings, posed this question, "Suppose a witness on the stand in a trial is embarrassed? Does that mean he is not required to testify?" Mr. Waldman thought it was a question of degree.

Don Elias, WWNC Asheville, N. C., observed it is "the fairest thing in the world to let the public hear—to let the public see your actions and note your intonations."

CEREMONY launches Hal Fellows (r), NARTB president, as commodore in the Oklahoma Navy. Doing the honors by bestowing the certificate on behalf of Gov. Johnston Murray is J. J. Bernard, KOMA Oklahoma City general manager. Presentation was made during Oklahoma Broadcasters Assn. meeting [B•T, March 24].

What Has TV Done to RADIO in Syracuse?

In spite of the fact that Syracuse is a two-TV-station city—even though 71% of the homes in the Syracuse area have TV sets—two separate surveys* show that radio is very much alive and kicking.

3.07 Hours a Day

is the average daily radio-listening time in TV homes in Syracuse. These same homes watch TV an average of 4.52 hours a day. Non-TV homes listen to radio 4.4 hours a day. TV has not replaced radio in Syracuse—merely supplements it as a source of entertainment and information.

RADIO'S ECONOMIC FUTURE

'Strictly Marginal'—Shouse

RADIO, which almost alone among U.S. businesses continued to expand during the depression '30s, may now face an economic future in which its gains will be "strictly marginal," James D. Shouse, chairman of the board of Crosley Broadcasting Corp., said last week.

In a major address to the NARTB convention, Mr. Shouse saw signs of a general U.S. recession.

"I might as well come right out and say it," he said. "I do not think our economy is healthy by any standard that I can determine."

Mr. Shouse said that whereas a year ago "virtually every plant in the country was straining for capacity production rather than relying upon consumer demand as the limiting factor," now there was a definite lull in consumer industries.

"In a wide and growing range of consumer industries," he said, "plant capacities are idle. Employment and hours of work are reduced. Raw material prices have broken and now many retail prices are shaky."

Profits Compared

Generally, he said, corporate profits in the first quarter of 1952 are down about 20% from profits in the first quarter of 1951. In consumer industries "that provides your income and mine" the decline in profits has been greater than 25%.

Mr. Shouse, who is also vice president and a director of Avco Mfg. Corp., said that tax increases have slowed down consumer spending, particularly for durable goods.

"The pyramiding of two tax increases has caught the whole country completely unaware," he said. Its effect has been to hit a "really big segment of the population" with big taxes "for literally the first time in the history of the country."

In this economic atmosphere, Mr. Shouse said, broadcasters "need to exercise extreme caution, extreme care and extreme adroitness if we are to survive in the highly competitive era which I am sure we are approaching."

"I do think," he said, "that it is always well for us in broadcasting to continuously remember that we have never yet run into a really depressed year.

"The rest of the country had a depression through most of the '30s, but we were an infant industry and we continually showed gains when almost every other business was in trouble.

"That can happen only so long.

"It could be that radio broadcasting has reached something approaching a point of stabilization. We could anticipate in radio some gains in the future. My guess is that they will be strictly marginal."

Television, Mr. Shouse said, is now in a position somewhat like that of radio in the '30s: "It has more of its future ahead and lacks most of radio's 30 years of past."

Though he "would be the last person in the world to try to evaluate the ultimate future relationship between radio and television," Mr. Shouse said he was "glad that I have both kinds of stations and I am sure there will always be both kinds."

Impact of TV on Radio

One reason that radio was the first of the major media to feel the impact of TV was that "radio has had a terribly bad break from the time that television really got started," Mr. Shouse stated.

"There is literally no more reason for radio budgets to be cut in favor of television than for magazines or newspapers to be cut in order to provide funds for television," he said.

"But the tragedy has been in the sheer mechanical facts of the way advertising is bought."

At the outset of TV, television buying was taken as a prerogative of radio departments and time-buyers in advertising agencies, Mr. Shouse pointed out. Psychologically, this had a profound effect within the agencies and upon their clients, for TV interest distracted from radio interest within the time-buying departments and hence TV was emphasized. Had TV buying been lodged with spacebuyers, newspapers and magazines would have suffered instead of radio.

Mr. Shouse thought there is now a tendency to disassociate radio and television timebuying within some agencies, a trend which he hoped would be encouraged.

Mr. Shouse said the uncertainty "must arise in the minds of every one of us as to whether our advertising economy can continue to support the thousands of stations we now have in our business."

In his opinion, these stations must continue to exist if what he described as a trend toward statism in the U.S. is to be abated.

The majority of radio stations are operated as proprietorships and they, along with most newspapers, small retailers and farmers represent the "last great proprietorship class left in the United States.

"You are a part of the remaining bulwark which stands between this country and statism in whatever modified form it may appear," he told the broadcasters. "Your importance as a vital and pervading force in the small but hard core of the proprietorship class in this country cannot be overestimated."

He said that broadcasters "knew long before most of the rest of American business what it was to be regulated.

"We have been regulated by Congress since 1928 and I think it is a peculiar commentary on what has happened in this country to find that the Communications Act under whose provisions and interpretations we have, from time to time, been restive, has through these past 24 years actually supplied us with a degree of protection from further encroachment that almost every other business wishes it had. It has been in these later years just as much a charter of freedom as it has been an act of restriction."

MANAGEMENT

Panel Airs Problem

EXCHANGE of ideas on improvement of station management practices marked a forum held Tuesday afternoon during the NARTB convention in Chicago. Panel moderator was Chet Thomas, KXOK St. Louis.

The four panel members set the pace by discussing current practices. William B. McGrath, WHDH Boston, urged managers to hire carefully, pay well and make the station a happy place to work. Simon R. Goldman, WJTN Jamestown, N. Y., suggested careful checkup on costs and sales.

Robert T. Mason, WMRN Marion, Ohio, and Leslie C. Johnson, WHBF Rock Island, Ill., discussed problems in their areas.

Topics discussed included talent fees, development of personalities, special problems in different markets, impact of television, use of budgets, turnover, pooling of talent fees and pirating of personnel.

GEORGE LEWIS, director of National Assn. of Gagwriters, will address Washington, D. C., branch April 1. Founder of NAG, which sponsors comedy development centers in cities throughout the U. S., will discuss "Careers in Comedy."

ASSOCIATED PRESS Broadcasters of Arkansas elected new officers at Little Rock meeting March 16. They include (front row, l to r): Ray Dexter, station manager, KDRS Paragould, president; Oliver Gramling, AP assistant general manager for radio; Fred J. Stevenson, general manager, KGRH Fayetteville, director. Standing (l to r): W. N. McKinney, general manager, KELD El Dorado, director; L. B. Tooley, manager, KNAR Hope, director, and Mar... Weaver, news editor, KLRA Little Rock, vice president.

AGRICULTURE

We've been programmed for the farmer for 25 years. That's why WIBW-advertised goods sell so well in Kansas and adjoining states.

WIBW The Voice of Kansas in TOPEKA

programs promotion premiums

SUMMER in St. Louis and details of the $900,000 sale possibilities there are outlined in promotion piece issued by KMOX St. Louis. Folder points out for advertiser's benefit that "they *listen* just as much—they *buy* just as much" as during any other period of the year. Results of a market survey taken for the summer of 1951 are also stated.

LETTER PLUGS PROGRAM

REPRINT of congratulatory letter written by a satisfied sponsor has been distributed by KYW Philadelphia to promote *KYW Feature Drugs*, merchandising idea worked into a program by Hal Moore of station's staff. Copy states enthusiastic response show has received from druggists who are participating in the plan.

CONVENTION COVERAGE

FIRST hand information on goings-on at both Republican and Democratic national conventions will be supplied to listeners of WHIM Providence, R. I., by one of station's newsmen who will be present at both party meetings. Fifteen minute program daily will be tape recorded by the reporter and flown to WHIM for broadcast next day. Recorded telephone interviews have also been planned by the station.

PRO-RADIO CAMPAIGN

STANDARD Radio Transcription Services Inc., L. A., slogan, "Get More For Your Dough on Radio," is being given full promotional treatment in company's advertising. Company's newest idea is Sponsor-Tailored Idea Cards, containing suggestions for use of Standard Program Library material in its subscriber stations' campaigns.

KXOK GOES TO HOME SHOW

UNIQUE among exhibits seen at Bildors Home Show which opened March 29 in St. Louis was display devoted to KXOK-AM-FM that city as well as station's advertisers. Remotes were conducted every afternoon and two monitor-speakers carried KXOK programs throughout the show which closed April 6.

WDSM SPONSORS CONTEST

NAVIGATION Jackpot Contest has been launched by WDSM Superior, Wis., based on opening of navigation in the Duluth, Minn.-Superior, Wis. harbor. Person most closely guessing exact arrival time of the first boat entering the harbor wins $500. Registrants also have chance to win prizes valued at over $1,000 which have been contributed by local merchants. Time buyers and agency people from all over the country are also able to enter the contest to compete for special $100 navigation jackpot prize.

'RED CROSS BUN' DRIVE

RED Cross Buns instead of Hot Cross Buns proved a popular gimmick at WHAM Rochester when Bob Keefe introduced new product into the current campaign. Local supermarket chain adopted the idea and announced that all receipts from sale of the buns would be donated to the Red Cross drive.

'PROMOTION' IS DEFINED

POSTCARD promotion based on Webster's definition of the word "promote" has been issued by Robert S. Keller Inc., N. Y., radio promotion firm. Mr. Keller suggests you mail the card, if you're in the market for more national business, to his organization which has "been *contributing to the growth and prosperity of* radio clients . . . on a *promotional* level" since 1946.

STATION-LIBRARY TEAM

PROJECT designed to afford the listener an opportunity to brush up on coming radio events has been worked out by WKBZ Muskegon, Mich., and the Hackley Public Library there. Program schedule listing Metropolitan Opera selection, topic of coming *America's Town Meeting of the Air* and other ABC features are posted in the library along with references as to where information on each subject can be obtained in the library files.

TALENTED COMBINATION

COMBINING station's on-the-air personalities, KLAC Hollywood has introduced *Platter Pulse* featuring five disc jockeys, Dick Haynes, Peter Potter, Bob McLaughlin, Gene Norman and Alex Cooper playing ten top tunes each day received from Music City, Hollywood record store. The store in turn promotes the show by displaying life size pictures of the five emcees in new serve-yourself record bar.

WIP'S EXTENSIVE COVERAGE

MORNING disc show beamed by Mac McGuire to armed forces around the world from WIP Philadelphia has a varied listening audience, according to station reports. Japanese listener in Tokyo wrote in that he had heard Mr. McGuire's request for funds for the March of Dimes and sent along 200 yen to help out.

PROGRAM EXPANDS TO FM

RADIO series, *Studio Schoolhouse*, sponsored on WFIL Philadelphia by RCA Monday through Friday, has been made available for FM reception. Programs designed for in-school listening are in their ninth year on the station. Nearly 7,000 students have visited the studio for participation in the broadcast.

STATIONS UNIT OPERATION

RADIO stations in Milwaukee, Wis., combined operations for a two week period in March for the 28th annual Milwaukee Home Show held in the city auditorium. Broadcasting from the special events stage, WMAW, WISN, WFOX and WOKY interviewed show visitors and described exhibits, fashion shows, interior design and cooking demonstrations for benefit of listeners. Special feature presentations were prepared by each station providing greatest coverage by radio in home show's history.

PHOTOGRAPHY COMPETITION

CONTEST open to both amateur and professional photographers has been inaugurated by CBS at site of CBS Television City now being constructed in Los Angeles. Photographers may shoot pictures of the center from noon to 3 p.m. on three successive Saturdays. Prizes for best pictures range from TV sets to U. S. Defense Bonds.

KNX's STORE PROMOTION

CROSS promotion has been started by KNX Hollywood with a monthly salute to a "Store of the Month" ranging from grocery store to pharmacy. Selected place of business receives a printed scroll bearing its name and that of the manager. In return, store displays products it handles which are advertised on KNX.

SPOTS GET RESULTS

NINE new car dealers were brought to the microphone at WAKU Latrobe, Pa., forty times in one day in promotion carried out by the station. In connection with auto show, station had dealers transcribe announcements calling attention to time and date of showing. WAKU reports spots brought overflow crowds and one additional dealer into the station's family of sponsors.

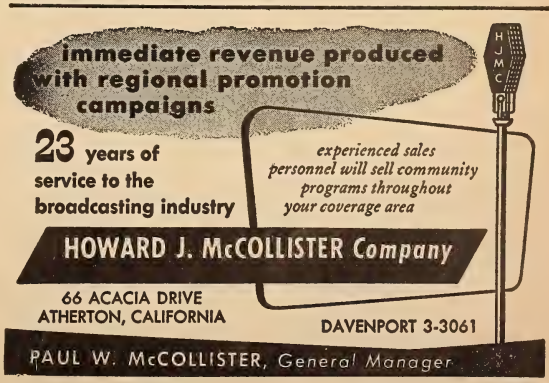
KBIG'S COAT-OF-ARMS

COAT-OF-ARMS dignifying KBIG Avalon, Calif., new station starting May 1, consists of two crossed sticks, all that remains of two Eskimo Pies. Reason for such heraldic blazonry is that Golden State Co. Ltd., San Francisco (Eskimo Pie Co.), is station's first national sponsor with purchase of 52 minute and half-minute spot announcements through Guild, Bascom & Bonfigli Inc., that city.

ADDED ATTRACTION

NEW cast member has been added to *Paul Dixon Show* on WCPO-AM-FM-TV Cincinnati. Pamela Dixon, Mr. Dixon's daughter, has been chosen to play the part of "Miss Bonnie Nu Maid" in the Nu Maid commercials in addition to assisting her father in pantomiming of latest records. Pamela, incidentally, is three years old.

POLITICAL INFORMATION



PROGRAM package designed to acquaint listeners with election mechanics from the "precinct to the national level" is being aired by WMT Cedar Rapids, Iowa. *Politics is Your Business* will be heard in 20 half-hour installments. In addition to featuring candidates from the state, 300 high schools are participating in contest conducted by the station to stimulate political interest among students.

KSL ANNOUNCES CODE

TEARSHEET has been mailed out by KSL-TV Salt Lake City picturing seal adopted by NARTB TV Code as well as reprint of text of code itself. Copy announces that KSL-TV subscribes to the code and that practices it outlines are adhered to by the station.

TELEVISION SERIES ON MAN

SIX-PROGRAM television series on general subject of "man" will be produced by NBC television network and American Museum of Natural History, New York. Scientists and explorers associated with museum are to counsel and perhaps appear on programs on physical, social and psychological aspects of man and the earth, sea and universe he lives in. Project may be completed by the end of the year.

RCA Exhibit

RCA exhibited industrial television and electronic metal detection equipment at the National Packaging Exposition and Conference of American Management Assn. April 1-4 in Atlantic City. Company demonstrated its small industrial TV camera—used as a monitor device—in a "see yourself" setup, enabling visitors in RCA booth to see themselves on television. Eriez Mfg. Co., national distributor for RCA electronic metal detectors, demonstrated its line of magnetic separators with RCA products.

WWL MARKS 30TH ANNIVERSARY

Ceremonies Recall Station's Humble Start

WWL New Orleans celebrated its 30th anniversary March 31 in ceremonies which recalled its growth from 10 w to its present status of a 50 kw clear-channel station.

A mere $400 and the dreams of Jesuit priests of Loyola U. were funneled into electronic ingenuity to give the station its start three decades ago. Today, WWL, a CBS affiliate, serves 659,040 homes in 330 parishes and counties within its four-state primary coverage area.

In addition, listeners have picked up WWL's signal in all 48 states, Alaska, Guam, Israel, the Aleutian Islands and aboard ship in the English Channel.

As early as 1907 the Jesuit fathers began their work in radio. The success of the pioneer station, KDKA Pittsburgh, later fired the imagination of the radio-minded faculty and plans were envisioned for a similar station to serve New Orleans.

As time went by, a radio school was set up in the physics laboratory under the direction of young Father Edward Cassidy. Father Cassidy's "hams" did their part in helping defeat the enemy during World War I.

Father Cassidy and his co-workers were determined to build a broadcasting station but they had little money. A retired sea captain who had been admiring the Jesuits' work in wireless offered $400.

A wireless trunk set discarded from an old government ship was bought by Father Cassidy. Then on March 31, 1922, when the nation was cheering Dempsey's victory over Carpentier, and still mourning the untimely death of Enrico Caruso, WWL was born. President of the university, Father Edward Cummings, made the initial broadcast. Then a phonograph record of John McCormick singing "When Irish Eyes Are Smiling" was played.

During the trying years of World War II, both Loyola and WWL had at their helm the Rev. Thomas J. Shields, S.J., who is given much credit for the station's progress.

Mr. Summerville (l), compares a tube used today with a small tube held by Mr. Bloom. WWL used the smaller tube in 1922.

WWL also has applied to FCC for TV Channel 4.

Father Shields is soon to receive a change in assignment and his duties will be shouldered by the Rev. W. P. Donnelly, S.J.

General manager of WWL is Howard (Slim) Summerville, a veteran of 28 years of broadcasting, who joined the station in 1939. Another veteran is Chief Engineer J D. Bloom, who joined the staff in 1924.

Other present staffers include Larry Baird, commercial manager; Ed Hoerner, program director; Ray Liuzza, promotion manager; Don Lewis, news director; Flo Shannon, farm director; Bill Brengle, sports director, and Jill Jackson, women's director.

ADS BELIEVED?

Test Method Suggested

QUALITATIVE and quantitative analysis, used in balance, can aid advertisers in learning whether their sales messages are believed rather than merely read.

This theme was propounded by Steuart Henderson Britt, vice president and director of research of Needham, Louis & Brorby, Chicago, as he spoke to members of the American Marketing Assn. in Toronto last Monday.

One reason for the lack of believability, he said, was "almost identical claims" made by refrigerators, beer, whiskey, soaps and cars."

After contrasting the four basic methods of market research, Mr. Britt suggested that people in advertising "almost take them too seriously."

"We like to quantify," he said, "and love to make up tables and graphs and charts. As a psychologist, I find it becomes difficult to encompass the complexities of the human mind in bar charts and statistical tables."

Strictly Business

(Continued from page 12)

gest advertisers at that time, went into radio first in 1932 with sponsorship of Ida Bailey Allen and her women's commentaries.

Today, National Biscuit products —Premium, Ritz, and Graham crackers, Triangle Thins, etc.—are represented by Arthur Godfrey on CBS. (Company salesmen, Mr Oliva reports, say he does them a lot of good.) National Biscuit also sponsors a newscast on the full Don Lee network and is planning spots on 84 local stations.

"We're new in television," the advertising head explains, but his organization sponsors *Kukla, Fran and Ollie* and was surprised at the volume of mail it received when the show was cut to 15 minutes. "We answered all letters," Mr. Oliva said, "telling them we could only buy what the network offered—and that we were taking two segments to replace our former half hour."

The advertising executive's office —located in the largest manufacturing plant in Manhattan—overlooks the Hudson River, but the busy Mr. Oliva says he doesn't look out very often. He has other things to survey, if he wants, such as the just-awarded grand medal from the Art Directors' Club, which means that one National Biscuit poster was judged best in all classes, receiving the grand award. Other company posters won first, second, and third prizes in the bake goods classification.

Mr. Oliva and his wife, the former Ruth Schiele, live in Englewood, N. J., where, in his spare time, Mr. Oliva prefers golf to other activities. They have one son, George Jr., who is working on radio - TV for McCann - Erickson, Cleveland.

A member of the Assn. of National Advertisers, Mr. Oliva serves on the steering committee of the outdoor group and has just been named a director of Traffic Audit Bureau.

'ALERT AMERICA' SPOTS

Radio and TV Being Used

SERIES of radio and TV spot announcements featuring radio-TV personalities is being distributed to stations by the Federal Civil Defense Administration to promote its touring Alert America convoys.

Transcribed and filmed spots were made by John Cameron Swayze, John Daly, Jay Jostyn, Quentin Reynolds, Lowell Thomas and others. Stations are using the 50-second announcements in advance of the arrival of the convoys in New England, the Midwest, Southwest and Far West. Produced by FCDA's Audio-Visual Division under Jesse Butcher, the spots urge local citizens to see the convoy and learn about civil defense.

BROADCAST day has been expanded one hour to 1 a.m. at CKX Brandon, Man.

Southwest Scenic Mountain Area
$65,000.00

Network station serves isolated market. Ideal living conditions. Good plant and equipment. Liberal financing. Profitable under absentee ownership.

California Independent
$95,000.00

Profitable 250-watt daytime station, serving metropolitan market. Absentee ownership by persons unfamiliar with radio.

Docket Actions . . .

FINAL DECISION

Brazosport Bcstg. Co., Freeport, Tex.—FCC adopted initial decision granting 1460 kc, 500 w, daytime (original application, filed Nov. 28, 1950 [FCC ROUNDUP, Dec. 4, 1950], asked 1490 kc, 250 w, fulltime). Estimated construction cost $9,825. Principals are Kelly Bell, 75%, 66⅔% interest in law firm of Bell & Reavley and owner KOSF Nacogdoches, and J. C. Stallings, 25%, manager KOSF. Decision and order March 27.

OPINIONS AND ORDERS

By memorandum opinion and order FCC granted petition filed by Gulf Beaches Bcstg. Co., St. Petersburg Beach, Fla., for review of ruling examiner made at hearing on its application and those of Alabama-Gulf Radio, Foley, Ala., and WEBK Tampa, Fla., denying permission to Gulf Beaches to complete its testimony at further hearing to be held April 14, 1952, on engineering matters; set aside examiner's ruling; granted permission to Gulf Beaches, at further hearing, to offer testimony of John D. Callan and J. Tweed McMullen in support of non-technical aspects of its case. (Gulf Beaches and Alabama-Gulf both seek new stations to operate on 1310 kc, 1 kw, daytime; WEBK seeks frequency change from 1590 kc to 1300 kc, with its present power of 1 kw daytime.) Opinion and order March 27.

WTUX Wilmington, Del.—FCC granted authority to continue temporary operation until June 10, pending action on petition for rehearing and other relief filed Nov. 26, 1951, directed against Commission's decision released Oct. 12, 1950, denying license renewal because station allegedly broadcast horse-racing information said to be of value to gamblers. Order March 27.

New Applications . . .

TV APPLICATIONS

Spokane, Wash. — KHQ Inc., Ch. 6 (82-88 mc), ERP 100 kw visual, 50 kw aural, antenna height above average terrain 941 ft. (above ground 826 ft.). Estimated construction cost $331,896, first year operating cost and revenue not estimated. Applicant is licensee of KHQ Spokane; KHQ Inc. is owned by Spokane Chronicle Co., publishers of *Spokane Daily Chronicle* (evening), the Cowles Publishing Co., publishers of *The Spokesman-Review* (morning and Sunday), and Associated Farm Papers, publishers of *The Washington Farmer, The Idaho Farmer, The Utah Farmer* and *The Oregon Farmer*. President of Spokane Chronicle Co. and Cowles Publishing Co. is William H. Cowles Jr.; general manager is Harold E. Cassill, president and general manager of KHQ Inc. is Richard O. Dunning. Filed April 4.

Dayton, Ohio—Skyland Bcstg. Corp., UHF Ch. 22 (518-524 mc), ERP 200 kw visual, 100 kw aural, antenna height above average terrain 500 ft. Estimated construction cost $349,377.45 First year operating cost and revenue not estimated. Applicant is licensee of WVKO-AM-FM Columbus, WONE and WTWO (FM) Dayton and WKOL-AM-FM Elyria-Lin, Ohio. Filed April 4.

Chattanooga, Tenn. — Mountain City Television Co., Ch. 3 (60-66 mc), ERP 17.205 kw visual, 8.603 kw aural, antenna height above average terrain 1010 ft. (above ground 250 ft.). Estimated construction cost $538,18.58, first year operating cost $200,000, revenue $200,000. Principals are President Ramon G. Patterson (50%), manager WAPO Chattanooga, owner 25% interest in WAPO plus 50% interest in estate which in turn owns 50% interest in WAPO; Vice President Helen H. Patterson, program director of WAPO and wife of Mr. Patterson; Treasurer Will Cummings (50%), retired farmer, and three other persons who hold no interest in station. Filed April 1.

AM APPLICATIONS

Roanoke, Va.—Cy N. Bahakel, 1410 kc, 5 kw, daytime. Estimated construction cost $31,650.45, first year operating cost $40,000, revenue $60,000. Mr. Bahakel is licensee of WKOZ Kosciusko, Miss., and WKIN Kingsport, Miss. Resubmitted April 4.

Kinston, N. C.—Edwin J. Schuffman, 1230 kc, 250 w, fulltime. Estimated construction cost $18,341.55, first year operating cost $42,500, revenue $47,000. Mr. Schuffman is program director and 10% stockholder of WELS Kinston and has 33⅓% interest in Schuffman's Furniture Store, New Castle, Ind. Filed April 4.

Jackson, Ohio—Luther M. Jones, 1280 kc, 1 kw, daytime. Estimated construction cost $23,000, first year operating cost $36,000, revenue $48,000. Mr. Jones is a retired businessman. Filed April 1.

Narrows, Va.—H. J. Romanus, tr/as Giles Bestg. Co., 990 kc, 1 kw, daytime. Estimated construction cost $23,363.25, first year operating cost $30,000, revenue $36,000. Mr. Romanus is retail dry goods merchant, owns controlling interest, manages and operates stores in Narrows and Pearisburg, Va. Filed April 1.

TRANSFER REQUESTS

KLOK San Jose, Calif.—Involuntary assignment of CP and license from E. L. Barker and Claribel Barker, general partners, and T. H. Canfield and Opal A. Canfield, limited partners, d/b as Valley Bcstg. Co., to E. L. Barker and Claribel Barker, general partners, and Paul Grim, special administrator of estate of T. H. Canfield, deceased, and Opal A. Canfield, limited partners. Interest to be transferred from Mr. Canfield, deceased, to Mr. Grim is 15%. No monetary consideration. Filed March 28.

KCSJ Pueblo, Col.—Transfer of control from The Star Bcstg. Co. Inc. to Douglas D. Kahle and Robert L. Clinton Jr. for a total consideration of $78,750. Mr. Kahle, to have 67% interest, is general manager and already owns 1% interest in KCSJ. Mr. Clinton, to have 33% interest, is commercial manager of KCSJ. The Star Bcstg. Co. Inc. is now owned by KMYR Bcstg. Co. (67%), A. G. Meyer (17%) and F. W. Meyer (17%) for total of 99% interest. Filed April 1.

KCSJ Pueblo, Col.—Assignment of license from A. G. Meyer and F. W. Meyer, d/b as The Star Bcstg. Co. Inc., to Douglas D. Kahle and Robert L. Clinton Jr., d/b as Star Bcstg. Co., under lease arrangement for ten years at base annual rental of $12,000 and with option for Messrs. Kahle and Clinton to extend terms of lease upon expiration for another decade. Contingent upon FCC grant of transfer of control of station to Messrs. Kahle and Clinton. Filed April 1.

[Note: KCSJ Pueblo, Col., transfer and assignment transaction, in two parts as noted above, will place full control of KCSJ in hands of Douglas D. Kahle and Robert L. Clinton Jr., upon FCC approval. First application is for transfer of 990 shares of stock (99%) of The Star Bcstg. Co. Inc., licensee of KCSJ, from KMYR Bcstg. Co. (650 shares), A. G. Meyer (170 shares) and F. W. Meyer (170 shares) to Messrs. Kahle and Clinton, d/b as partnership. (Remaining 10 shares [1%] now held by Mr. Kahle will be transferred to partnership so partnership will control all authorized and issued stock of company.) Second part of transaction, contingent upon FCC approval of transfer of control, is to assign license of KCSJ from The Star Bcstg. Co. Inc., all of stock of which will then be owned by partnership, to Messrs. Kahle and Clinton. Physical assets of station KCSJ are not included in the assignment. Reason for two-step transaction is because transferors desire to sell corporate stock rather than its assets. On the other hand, partnership desires to operate KCSJ as partnership licensee rather than as stockholder in corporate licensee.]

WJPS Evansville, Ind.—Acquisition of control WJPS Inc. by Robert S. Davis, Nettie R. Davis and Hazel D. Seacat. J. Porter Smith held 11,875 shares common stock, no par value; he transferred 200 shares to Mr. Davis, 250 shares to Mrs. Davis and 250 shares to Mrs. Seacat (sister of Mr. Davis), leaving Mr. Smith with 11,375 shares. While stock has actually been transferred on books of corporation, no change in management and no change in board of directors has been made or is contemplated. It was believed that no prior FCC approval was necessary because stock transfer did not give Mr. Davis control in his own right. Sale was to provide capital for construction of new residence costing $23,900 and to prevent sale of stock on open market. Filed April 1.

KUGN Eugene, Ore. — Transfer of negative control from O. E. Berke and P. R. Berke to Ewing C. Kelly. The Messrs. Berke, who each hold 25%, will sell total of 5% to Mr. Kelly for $4,602.91 (leaving them with total of 45%); in addition, Mr. Kelly has option to buy remaining 45% within the next two years for $41,426.19 plus 5% interest rate from time sale closed following FCC approval. If Mr. Kelly does not buy remaining 45% within two year period, the Messrs. Berke have option to buy the 5% interest sold to Mr. Kelly for $4,602.91. (Other 50% of KUGN owned by C. H. Fisher.) Filed April 2.

WSKB McComb, Miss. — Assignment of license from H. Bee Wood, trustee in bankruptcy, to Lester Williams for $25,800. Mr. Williams owns 73⅓% interest in and is manager of WCJU Columbia, Miss.; owns 49% interest in and is manager of Columbia Publishing Co., Columbia; is sole owner of *Rural Life* (monthly farm magazine); former owner of *Tylertown Times*, Tylertown, Miss., and former 48% owner of *Picayune Item*, Picayune, Miss. Filed April 2.

WBML-AM-FM Macon, Ga. — Relinquishment of negative control from E. D. Black and E. G. McKenzie to Allen M. Woodall through transfer of 25 shares each out of 75 shares each (or total of 50 shares out of 150 shares) from Messrs. Black and McKenzie to Mr. Woodall for $16,666.66, to be paid to each of sellers. Mr. Woodall owns ⅓ interest in WDAK Columbus, Ga., ¼ interest in WCOS-AM-FM Columbia, S. C., and 1/5 interest in WRDW Augusta. Filed April 2.

(Also see Actions of the FCC, page 102)

Record Brush

A SMALL record brush, which attaches to the tone arm of any pick-up and sweeps the disc clean as it is being played, is now being marketed nationally. Brushes are being made by Permo-Fideliton, Chicago, after the product was designed in collaboration with Mystik Adhesive Products, Chicago. Firm says brush is made of hair from ears of Chinese mountain goats.

Ream, executive vice president, CBS; and Robert D. Swezey, WDSU-AM-FM-TV New Orleans. Not present were John E. Fetzer, WKZO Kalamazoo; Mark Woods, Woods & Warwick; Abel Green, *Variety;* and Jack Alicoate, *Radio Daily.*

Affiliates Committee

(Continued from page 71)

record in this matter of rates. In fact, some of the most important deviations are attributable to them. They are in a difficult position, it is appreciated, but this must be straightened out."

The resolution on network relationships recognized "that particularly in view of the current uncertainty among many of radio's principal clients as to the extent of the inroads which television will make upon other media including radio, there is considerable question concerning the proper steps to be taken to insure the continued strength and prosperity of radio."

Confidence Expressed

The resolution expressed confidence that affiliates "are perfectly willing to consider open-mindedly any suggestions made by the networks with a view to improving network service or increasing its value to the public and to advertisers," asking only that the networks consider affiliates' recommendations open-mindedly:

"Therefore, be it resolved, that the network affiliates . . . reaffirm their confidence in the power and efficacy of network radio, and assert their willingness fairly and objectively to consider any and all efforts reasonably calculated to strengthen, improve or protect the position of network radio as a public service and advertising medium; and,

"Be it further resolved, that said affiliates earnestly petition the networks to refrain from any action which might in any respect modify the pattern of network radio or the basic arrangements between networks and their affiliates, without full and frank consideration with their respective affiliates of the reasons for such action and the end to be attained by it, with due regard to long-term industry values as compared with immediate competitive gains or curtailment of temporary losses, and with like regard to the encouragement of the solidarity of the industry incumbent upon them as a dominant factor in it; and further petition the networks to exert their greatest efforts to re-establish the essential dignity, prestige, and stability of network radio."

The rate-card resolution noted "a tendency on the part of certain individual stations, involved in competitive situations, to look with favor on . . . proposals to desert their published rate cards, in fact in some cases to have approached both local and national advertisers with solicitations for future business at rates well below their published figures."

Such practices, the resolution continued "have as their ultimate result the depreciation of the value of individual radio stations . . . and the confirmation of the belief already held in some quarters that radio as a medium is in desperate circumstances and that individual station operators are ready and willing to prostitute their properties in order to obtain revenue, the combination inevitably leading to the ruination of the industry;

"Therefore, be it resolved that all radio station operators give thought to this dangerous situation, take effective measures to insure the maintenance of their own rate cards, and use such methods of persuasion as seem most desirable to inhibit such practices."

There was no call for further financial contributions toward committee activities, Treasurer George B. Storer reporting that $19,083 had been collected and $7,288 spent. Expenditures include fees for legal counsel and reimbursement of committee members at the rate of seven cents a mile for their most recent meetings. They paid their own expenses at initial sessions. A total of 354 stations had supported the committee financially.

Queen Juliana's Visit

QUEEN JULIANA'S arrival in the U.S. with Prince Bernhard Wednesday and her address to Congress Thursday received almost full network radio and television coverage, with only ABC-TV and DuMont not carrying the events. Arrival ceremonies for the Netherlands' Queen were carried live by CBS Radio and CBS-TV, using WTOP-AM-TV Washington facilities, and her address (also live) by NBC-TV MBS, ABC radio and WOR-TV New York. Tapes of speech were carried same day by NBC radio, CBS Radio and WJZ New York. At request of U. S. State Dept., NBC-TV made kinescope of Queen Juliana's Congressional address, had Dutch continuity dubbed in by a member of the Netherlands' New York consulate, and flew the film on a KLM plane to Europe, where it was to be shown on Dutch television Friday.

REGULATION W

Appliance Dealer Views

APPLIANCE retailers are about evenly divided on the question of whether Regulation W (consumer credit restrictions) should be extended with other controls after June 30, according to a survey by the National Appliance and Radio-TV Dealers Assn.

The membership survey revealed that 45% favored retention and 45% favored abolition of the credit regulation. The remaining 10% requested it be kept on the books as a "standby" measure. The survey was based on a questionnaire issued with NARDA's newsletter, *Appliance & Radio-TV Dealers News.*

Members also were polled on wage-price controls. A majority of 61.3% felt they no longer are necessary and only 11.3% wanted continuance. Another 27.4% favored controls on a standby basis.

Regulation W in the Defense Production Act now calls for a minimum 15% down payment and 18 months maturity on installment purchases of radio and television receivers.

KTLA (TV) Leases Films

KTLA (TV) Hollywood has leased 20 feature films, produced or released by Lippert Pictures Inc. during 1949-50, from Tele Pictures, Los Angeles, under two-year contract of unlimited runs.

Resolutions

(Continued from page 26)

a one-TV-station market and that in Detroit, where there are three stations, WWJ's radio volume was down 20% last year.

Somebody wanted to know how a TV station fixed its initial rate. Mr. Hough observed that "that's between you and God."

Mr. Compton made clear that he felt that "any man who gives in to a minimum-crew demand [by a union] is going to wreck us," and that it should be made clear to unions that "minimum or maximum crews are a prerogative of management."

RADIO'S IMPACT

Cited by Zeckendorf

"IF WE woke up tomorrow morning and found that no advertising was permitted on radio . . . we would have the greatest financial catastrophe this country has ever known," William Zeckendorf, president of Webb & Knapp, New York realtor and former driector of ABC, told the Sales Executives Club in New York Tuesday.

Mr. Zeckendorf's talk was the result of his being included in the list of "America's 12 Master Salesmen," which is the title of a book being issued by B. C. Forbes Pub. Co.

Radio's master salesman was Mary Margaret McBride, ABC commentator and the only woman included in the book, who, to prove her point that women are not necessarily "long-winded," gave a terse acceptance speech at the same luncheon meeting.

"The frontiers of business are greater now than they ever have been and are, in fact, cruelly infinite," Mr. Zeckendorf said. Citing the important role in American economy played by selling, he described salesmanship as "probably the greatest factor in this nation which raises our standard of living above that of the rest of the world."

To prove his point "in reverse," he made the supposition that advertising not be permitted on radio, which, he said, would result in economic catastrophe. Volume of cigarette sales, alone, would drop 25%, he estimated.

"I believe that the stimulant from advertising has caused and created that extra volume of business for most corporations dealing in advertised products," Mr. Zeckendorf continued. "And those who don't deal in advertised products get the benefit of the progress in success and prosperity of those who do."

Again referring to broadcast advertising, he said he could not even estimate, just in terms of employment, what would happen "if the hundreds of products that have been introduced since it's become possible to reach into a home" were denied access to radio.

ABC-UPT MERGER

Hearings Recessed

ATTEMPT to saddle American Broadcasting-Paramount Theatres Inc. directors with the burden of anti-trust violations of Paramount Pictures Inc. was angrily opposed by Leonard H. Goldenson, president of United Paramount Theatres Inc., last week at the FCC hearings on the proposed merger of UPT with the American Broadcasting Co.

Two-day cross-examination of Mr. Goldenson was marked by acrimonious exchanges between DuMont Counsel Morton R. Galane and UPT Counsel Duke M. Patrick.

FCC hearings were recessed until April 14, following the completion of Mr. Goldenson's cross-examination. When they resume, the following schedule of witnesses will be followed:

1. Gordon Brown, owner of WSAY Rochester, N. Y., and longtime foe of networks, will appear as a public witness to oppose the merger.

2. DuMont officials will appear in rebuttal to the testimony favoring the merger.

3. Witnesses in the issue concerning the transfer of Paramount Pictures, half-interest in WSMB New Orleans to UPT will be heard.

4. Cross-examination by FCC Counsel Frederick W. Ford of Paramount Pictures and UPT directors concerning specific theatre acquisitions will be undertaken.

Denies Responsibility

Denial that the responsibility of Paramount Pictures anti-trust violations can be laid to AB-PT executives was made by Mr. Goldenson on the ground that only six of the 18 AB-PT directors ever had anything to do with the producing company. They were, he said, himself, John Balaban, A. H. Blank, Walter W. Gross, Robert H. O'Brien, Robert B. Wilby.

Of the other 12 directors, five of them will come from ABC, Mr. Goldenson pointed out. They are Edward J. Noble, Robert E. Kintner, Earl E. Anderson, Robert H. Hinckley, Owen D. Young.

The other seven directors are from other industries, he emphasized. They are John A. Coleman, Adler, Coleman & Co., brokers; Charles T. Fisher Jr., president, National Bank of Detroit; E. Chester Gersten, president, Public National Bank & Trust Co., New York; Robert L. Huffines Jr., president, Burlington Mills Corp.; William T. Kilborn, president, Flannery Mfg. Co., Pittsburgh; Walter P. Marshall, president, Western Union Telegraph Co.

"ABC will have prudent business practices because of the men who are operating that business," Mr. Goldenson said. "Mr. Kintner is president and will continue to be president of the American Broadcasting division. He is subject to the control of the board of directors, composed of seven who are independent and had no previous connections with Paramount Pictures Inc., five of whom have been associated with ABC, and six of whom have been associated in the past with the management of the theatres of Paramount Pictures Inc.

"It is and has been our desire to operate our business in the spirit and in the principles laid down in U. S. v. Paramount [the consent decree] and that we will have prudent, sound and fair management operating these respective businesses—whether they be theatres or whether they be the American Broadcasting division. . . ."

During his cross-examination, Mr. Goldenson was asked how the value of $14.70 per ABC share was arrived at when its book value indicated that the stock was worth $3 per share. He answered that ABC with five TV stations in five of the six top markets was assumed to have a potential of about five times its book value.

In his answers regarding the future of radio and TV, Mr. Goldenson made these remarks:

"I think the real vitality in the future of TV is in live broadcasting. TV has the opportunity to do things I do not think any other medium has. It is unlike the stage, it is unlike motion pictures, it is unlike radio. I think it has the opportunity of getting behind the scenes, such as the Kefauver hearings indicated, such as MacArthur arriving in San Francisco, and things of that nature."

The future of radio is still bright, Mr. Goldenson declared. He repeated what he had said in his direct testimony—that there are radio sets in 22 million automobiles, that there are multiple receivers in homes, that people can listen to the radio while doing other things.

"Radio, by pinpointing itself to its particular markets, in my opinion, can develop a great vitality and serve a great need which TV cannot serve," he said.

"I find that a great number of people who formerly watched TV to a great extent are now shifting back to radio when they want to read magazines or books. They may want to do other things in the home and they may be listening to the radio while they are doing these other things."

Is it possible that TV will grow to such an extent that the broadcasting division will contribute more to the merged company's earnings than theatres, Mr. Goldenson was asked by Mr. Ford. He answered that that is possible.

In the course of DuMont counsel's position that the capital strength of the merged company would leave DuMont trailing a "bad fourth" among TV networks, FCC Hearing Examiner Leo Resnick was prompted to remark:

"I am not prepared to say that leaving DuMont a bad fourth has no effect on the competitive situation. DuMont does appear to be the remaining unmarried sister in the family of four and is objecting to the engagement of the American Broadcasting Co."

Recommendation that the FCC look into the question of whether the proposed merger of ABC and UPT violates the 1949 U. S. v. Paramount consent decree, which forbade the combination of producers and exhibitors, was made last week in a letter to FCC Chairman Paul A. Walker by the American Civil Liberties Union. The ACLU has had an observer at all the hearing sessions.

On the other hand, the ACLU also recommended that the Commission consider whether approval of the merger would strengthen ABC so that it is "better able to compete with the two dominant networks [NBC and CBS] and thus enlarge the area of diversification."

VOA MONEY

House Unit Hears Collins, Asks $27.5 Million For Voice

LARGELY on the strength of vigorous military support and radio's effectiveness in piercing the Iron Curtain, the Voice of America could be a financially stronger operation after July 1.

A glowing testimonial to the "enormous benefit" of U. S. transmitter bases abroad for military use and the effectiveness of shortwave broadcasting could very well turn the tide money-wise for the Dept. of State in fiscal 1953.

VOA transmitters would aid the U. S. armed forces and other friendly nations "in time of war" and overall are vital in the "psychological warfare for men's minds," Gen. J. Lawton Collins, Army chief of staff, had advised a House Appropriations subcommittee.

Proof of the efficacy of the Collins testimony was evidenced by the full House Appropriations Committee in a mid-week report voting more funds for VOA operation during the coming fiscal year. The House was to vote on the expenditures late Friday.

Large appropriations were approved by the House group, which noted in its report that radio broadcasting "is our most effective way of reaching the people behind the Iron Curtain." The committee allotted $27.5 million of $30 million requested for this activity. The reduction, it was explained, "will in no way interfere with the effectiveness of that operation." VOA received $19.8 million plus in regular appropriations this fiscal year.

Additionally, the committee earmarked $20.5 million for nine station projects—a paring of $16,227,086—covering two more sea-borne relay stations and five overseas transmitter projects looking toward "completion of a ring of radio broadcasting facilities . . . (in) critical target areas throughout the world." A bid for two new one-megowatt (1 million watts) home base, domestic stations at $7,280,790 each was denied. Two such transmitter units already are under construction on the east and west coast [CLOSED CIRCUIT, March 31].

The House group thus voted a substantial boost over '52 in funds for broadcasting operations and acquisition of new radio facilities.

Senate Holds Hearings

Meanwhile, a counterpart subcommittee has begun hearings on the Senate side. The House hearings were held early last month.

Budget requests were sharply criticized by Rep. Cliff Clevenger (R-Ohio). Noting that it calls for six and a half times the 1951 figure, Rep. Clevenger asserted: "If this broadcasting is the most effective medium, let us discontinue some of these other things which will not bring home the bacon."

Appearing for the State Dept. were Dr. Wilson Compton, new International Information Administrator; Foy Kohler, chief, International Broadcasting Services; George Herrick, chief engineer; Ben Gedalecia, former ABC research director and member of the OWI during World War II, and others.

NARTB was commended by Mr. Kohler for its "activities and great interest" in helping the State Dept. to enlist personnel for job gaps, especially electronics engineers whom he described as a "bottleneck" in recruitment. He lauded the association for its "generous gesture" in using its facilities "for reaching these people."

Sum of $6,550,000 was allowed by the committee for special projects and media evaluation surveys on the basis of testimony.

Radio research projects are aimed to assure that development of the "ring" project is in line "with latest scientific discoveries and inventions capable of providing more efficient means of penetrating the 'electronic curtain' of Soviet jamming."

Zenith on ABC

ZENITH Hearing Aid Division of Zenith Radio Corp., Chicago, will sponsor 10 minutes of *Monday Morning Headlines* on ABC each Sunday from April 20 through BBDO, same city. Show is broadcast for 15 minutes weekly at a different time for each zone. Seeman Bros., for Air-Wick, sponsors opening five minutes.

at deadline

HOPE TO CONSOLIDATE FILM STANDARDIZATION

INDUSTRYWIDE action by technical groups to bring all TV film standardizing studies under one roof to be started by joint committee created under NARTB auspices.

Move started by NARTB Recording and Reproducing Standards committee, revived last week with Neal McNaughten, NARTB engineering director, as chairman. Inactive several years, committee studies during last decade ended confusion in disc and tape recording by setting up uniform standards. Proposed changes in these standards based on practical use will be considered by committee.

Film standards, both optical and sound, now being worked out piecemeal by Institute of Radio Engineers, Society of Motion Picture and Television Engineers, Radio-Television Manufacturers Assn. and NARTB. Work is to be correlated and results analyzed on systematic basis.

NARTB group has created two new subcommittees covering disc and magnetic recording. Heading disc subcommittee is K. R. Smith, Allied Record Mfg. Co. Topics to be studied include thickness of pressings, fine grooves, speeds and reference discs.

W. Earl Stewart, RCA-Victor division, heads magnetic subcommittee. Topics cover timing limits, frequency response at different speeds, reel thickness, reference tape, half-track recording and signal-to-noise ratio.

THEATRE TV PLANS

REQUEST for information on plans for common carrier facilities for theatre TV was asked of AT&T, Western Union and Independent Telephone Assn. in letter from FCC last Thursday. Identical letters asked that following information be worked up for presentation at hearing, scheduled for May 5: (1) Existing or planned intercity TV links; (2) new developments in broadband transmissions; (3) ability of common carriers to expand TV networks to provide for theatre TV requirements; (4) experiences in providing theatre-TV services, and (5) intracity plans for theatre TV pickups and remote pickup facilities.

CIVIL LIBERTIES COMPLAINT

QUESTION of black listing in radio-TV because of alleged associations or beliefs will be put up to FCC in complaint to be filed this week by American Civil Liberties Union, citing specific persons, stations, and networks. Complaint, being prepared last week, is based on radio-TV blacklisting report made for ACLU by Merle Miller and being published Wednesday by Doubleday & Co. as book titled *The Judges and the Judged.*

WESTERN UNION REPORT

WESTERN UNION Telegraph Co. reported Friday February gross revenue of $16,675,319, amounting to net of $246,154 after provision of $369,000 federal income taxes, as compared to February 1951 gross of $15,314,258 with net of $471,497 after $264,000 for taxes, Revenues for first two months this year totaled $34,318,866—increase of $2,552,296 or eight per cent over comparable period last year—with net of $528,712 after provision of $767,000 for taxes.

50¢ ON RCA COMMON

FIFTY CENTS dividend on RCA common stock, payable May 29 to holders as of April 18 close, was declared by RCA board Friday. Dividend of 87½ cents per share was voted for April 1-June 30 period on first preferred stock, payable July 1 to holders as of June 9.

Business Briefly

(Continued from page 5)

8 to 10 p.m. Kenyon & Eckhardt, New York, is agency appointed to plan and prepare show.

HOPALONG ON RADIO ● General Baking Co., New York (Bond bread), through BBDO, same city, understood to be considering placing half-hour radio version of *Hopalong Cassidy*, once a week in number of non-TV markets.

JELKE CONSIDERS RADIO ● John F. Jelke Co. (Jelke margarine), division of Lever Bros., New York, through its newly appointed agency, Hewitt, Ogilvy, Benson & Mather, New York, understood to be considering quarter hour radio show five times weekly on spot basis.

KORDOL NAMES JONES ● Kordol Corp. of America, N. Y., has appointed Duane Jones Co., N. Y., to handle Dordolin, drug product to relieve arthritic and rheumatic pains. Newspapers, radio and TV spots will be used.

TODAY SPONSOR ● Mystic Foam Corp. (rug and woodwork cleaners), Cleveland, to sponsor 8:15-8:20 a.m. Wednesday segment of NBC-TV's daily *Today*, starting this week. Agency: Carpenter, Cleveland.

'VOICE' FUNDS AXED

IN SHARP reversal, House late Friday axed funds for State Dept. Voice of America and other activities. Chamber deleted $20.5 million for five new overseas stations and two sea-borne projects, and pared information budget from $133 million to $85.5 million, including VOA broadcast money. (See early story page 109.)

KENYON & ECKHARDT SHIFTS

IN REALIGNMENT of copy department at Kenyon & Eckhardt, N. Y., Garth Montgomery, vice president in charge of radio and TV, moves to copy department as one of its supervisors, retaining his vice presidency, along with Leslie Munro and Howard Wilson, who were appointed vice presidents last week. Meanwhile, Werner Michel will become acting director of radio-TV department until another appointment is made.

HICKERSON AGENCY

J. M. HICKERSON, who resigned from presidency of Albert Frank-Guenther law last month, reestablishing his own agency, J. M. Hickerson Inc., at 270 Park Avenue in New York, as a creative copy agency with efforts directed at hard selling campaigns.

PEOPLE . . .

DONALD A. NORMAN, KNBH (TV) Hollywood sales manager, appointed manager to succeed Thomas B. McFadden, new director of NBC National Spots Sales (see story, page 29), James M. Gaines, NBC vice president of owned stations, said Friday. Associated with NBC since 1943, Mr. Norman has been spot sales manager for western division, account executive in national spot sales, and sales director of WNBC and WNBT (TV) New York before being named KNBH sales manager in July 1950. Previously, he was field supervisor for A. C. Nielsen Co. and, before that, with Standard Brands for four years.

EUGENE KATZ, executive vice president of KATZ agency, station representative, to talk on film programming needs of local video outlets at Television Film Council's quarterly forum, to be held in New York Wednesday. **CAROLYN BURKE**, NBC's only woman TV producer, to speak on integrating film in live shows, and **DR. A. N. GOLDSMITH**, RCA chief consultant, to discuss future TV trends. Entire agenda of day-long forum, to be held in Warwick hotel, will be keyed to TV problems.

GEORGE DIRADO, formerly with Raytheon Co., Watham, Mass., appointed assistant to president of CBS-Columbia Inc. to succeed Mort Barron, recently appointed assistant sales manager.

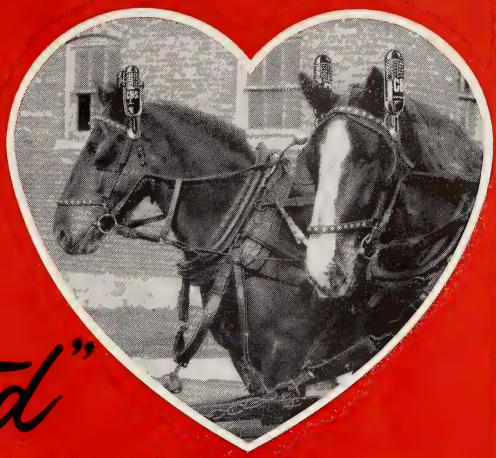
JOSEF C. DINE, director of NBC press department, has been appointed director of public relations of Ziv Television Programs Inc., John Sinn, Ziv president, announced in a statement for publication today. Mr. Dine joined NBC six years ago. His successor at NBC has not been named.

O'NEIL, WHITE TO BE AT GENERAL TIRE EXHIBIT

THOMAS F. O'NEIL, General Tire & Rubber Co. vice president, president of Lee Enterprises and chairman of MBS, and Frank K. White, MBS president, are scheduled to be present in Washington tomorrow (Tuesday) at General Tire's elaborate exhibit in Statler Hotel. Day has been marked as "William O'Neil Day" honoring General Tire president. Exhibit shows various products and interests of General Tire, parent company of Lee Enterprises—Yankee, Don Lee and WOR divisions—and 58% owner of MBS. Radio-TV properties and interests occupy first spot inside exhibition door. Hidden TV camera picks up entering visitors, relays their picture to large TV receiver at one end of radio-TV display. Washington is first city to see exhibition. After April 16 it will probably go to Akron, General Tire headquarters.

EDUCATIONAL SERIES

INSIDE OUR SCHOOLS, educational series produced by local stations with *Life* magazine and currently on WNBC and WNBT (TV) New York after having been on WHAS-TV Louisville, WRGB-TV Schenectady, and KSD-TV St. Louis, to be seen on following schedules: WEWS-TV Cleveland, Friday to end of school year; WDTV (TV) Pittsburgh, April 27 to May 3; WJBK-TV Detroit April 28 to school year's end; WFBM-TV Indianapolis, April 28 to May 9, and WCPO-TV Cincinnati, May 5-11. Other stations to focus on local schools at dates to be announced, include KNBH (TV) Los Angeles, WPTZ-TV Philadelphia, WSPD-TV Toledo, WTOP-TV Washington and WLWD-TV Dayton.



"IN THE HEART OF AMERICA . . .

It's The

KMBC KFRM

Team and It's

Wholehearted"

7½ MILLION "HANDS HIGH"...

Measurement, in equestrian vernacular, is expressed in "hands." By these standards the KMBC-KFRM Team is well on its way to 7½ million *"hands high."* Why 7½ million? Because that is the number of hands on the 3¾ million people living within the half millivolt contour of The Team – and those are the hands which daily take the measure of The KMBC-KFRM Team and which have applauded and lifted The Team to the number one spot in the Heart of America!

The tremendous lead of The Team is now being increased by the affiliation of KFRM with the CBS Radio Network. That means the addition of CBS service to the outstanding local programming of KFRM by KMBC of Kansas City that has made KFRM the favorite of the people of Kansas. It means a host of new listeners are joining the thousands who daily ride the wagon drawn by The KMBC-KFRM Team. In this step, The KMBC-KFRM Team becomes *"CBS for the Heart of America"* and in doing so brings about a greater sales potential for KMBC-KFRM advertisers, for those same measuring "hands" also hold the purse strings in the Heart of America! Write, wire or phone KMBC-KFRM, Kansas City, Missouri, or your nearest Free & Peters Colonel!

TO SELL THE WHOLE HEART OF AMERICA WHOLEHEARTEDLY, IT'S

The **KMBC-KFRM** *Team.*

CBS RADIO FOR THE HEART OF AMERICA

OWNED AND OPERATED BY MIDLAND BROADCASTING COMPANY

Namesakes of a voice . . .

WWJ's "LAURA"

Lady LAURA

Baby LAURA

LAURA HEIFER

And they're all real—the thoroughbred West Highland White Terrier duly registered with the American Kennel Club as "Lady Laura"; the baby "Laura" who arrived a few hours ahead of schedule while her parents tuned in WWJ to while away anxious moments futilely waiting for a cab to take them to a hospital; the Flushing, Michigan, farmer who listened nightly and showed his appreciation by naming the queen of his dairy herd "Laura Heifer".

Real, too, are the thousands of 2:05-6:00 A.M. listeners to "Lovingly Yours, Laura". You can reach those thousands at surprisingly low cost.

Ask any Hollingbery man.

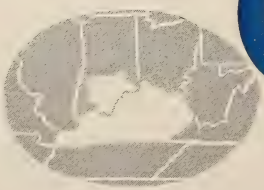
NOTE: The majority of the talent costs are already underwritten. Co-sponsorship is surprisingly low.

Go where there's GROWTH... go WHAS!

The WHAS-Market is a balanced market . . . and getting BIGGER in a healthy way.



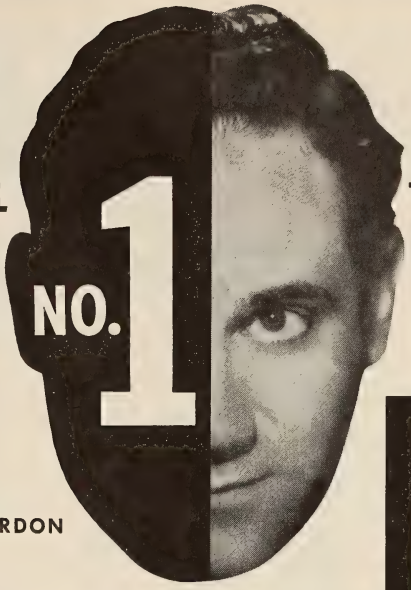
FARM RECEIPTS UP 22%

In its region, Kentucky's 632 million dollars ranked second only to Texas in cash farm income last year. Kentucky has more cattle than any other Southeastern state, and the value per head is the highest in this area of the nation. Kentucky leads the U.S.A. in rise of land value over pre-war level; and crops in 1951 showed an increase of 24%.

35 TOTALLY NEW INDUSTRIES LOCATED IN KENTUCKY IN 1951

Industrial development in Kentucky last year produced nearly 26,000 new jobs, and added more than 1 billion dollars in invested capital. When the new plants go into operation, they will add 80 million dollars to the annual industrial payroll of the state.

No other station—or group of stations in this market can match the audience delivered by WHAS seven days a week; morning, afternoon and night. (Benson and Benson Diary Study, November, December, 1951)



THE WHAS MARKET

CLOSED CIRCUIT

WILL PRESIDENT TRUMAN become radio-TV personality after he retires next January? There are folks interested in retaining him as commentator on public affairs and he soon may be getting bid. Thus he might follow in footsteps of his daughter whose $100,000 contract makes her just about highest paid of "first year" performers in show business annals.

HOW MANY hearings will be entailed in FCC TV proceedings? It's anybody's guess but best judgment is there will be hearings involving every city of 50,000 or more having VHF assignments.

WITH FCC hard pressed because of lack of appropriations, indications are that most of hearings stemming from final TV allocations will be held in Washington. That's because FCC has limited travel expense and cannot send its task forces into field in sufficient numbers to cope with problems ahead.

LOOK FOR APPOINTMENT of Clayton B. Fritchey, civilian chief of Office of Public Information, Dept. of Defense, as public relations consultant to Democratic National Committee.

INDICATION of tribulations stemming from 1,000 ft. antenna height limitation placed on stations in new TV Zone I (See Page 23) is plight of WBEN-TV Buffalo. Station last year got grant for 1,000-ft. tower, bought land and erected transmitter building 20 miles out, spending about $200,000. Tower steel is ready, but would put antenna about 1,200 ft. above average terrain. Thus, Channel 4 station must reduce 100 kw maximum permitted power about one-third. Or it might lop off 200 ft. from tower. Alternative would be to move proposed tower to another site, and lose vast investment made in good faith.

NEWEST big-league entries in TV film syndication field expected to be *Call of the Yukon* and *The Green Hornet*, properties of Trendle-Campbell, now syndicated for radio. Programs, in pilot film, are being produced by Jack Certak at Apex in Hollywood under direction of George Trendle and H. Allen Campbell.

AMONG FIRST citizens to be served with advance copies of final TV allocation (in addition to press) were all members of Senate and House Interstate Commerce Committees in which communications legislation originates.

WITHIN week, members of American Television Society and Radio Executives Club of New York will receive ballots on which to vote for or against merger of two organizations. If approved, new organization, as yet unnamed, will start functioning with opening of 1952-53 fall-winter-spring season next October.

SUGGESTIONS for name for proposed com-

(Continued on page 6)

TV HEARING STATUS DEFINED BY FCC

TV APPLICANTS for following cities, who have been in hearing status since before the imposition of freeze Sept. 20, 1948, are being removed from hearing status today in line with decision of Commission in final TV report:

Hearings begun — Boston, Providence, San Francisco, Cleveland, Detroit, Cincinnati, Reading, Philadelphia, Harrisburg, Milwaukee, Allentown - Bethlehem, Atlantic City, San Diego.

Hearings designated, dates set, but never begun—Hartford, Atlanta, Fall River, Miami, Kansas City, St. Louis, Albany (N. Y.), Charlotte, Akron, Youngstown, Pittsburgh, Wilkes-Barre, York (Pa.), Dallas.

Hearings designated, dates never set—Fresno, Sacramento, San Jose, Denver, Waterbury, Chicago, Indianapolis, Des Moines, New Orleans, Portland (Me.), Lowell (Mass.), Springfield (Mass.), Holyoke, Worcester, Flint, St. Joseph, Omaha, Buffalo, Niagara Falls, Rochester (N. Y.), Oklahoma City, Tulsa, Portland (Ore.), Memphis, Houston, Richmond, Seattle, Wheeling, Madison.

WJBK POWER BOOST

ANNOUNCEMENT will soon be made by FCC of approval of grant to WJBK Detroit to change frequency from 1490 kc to 1500 kc and boost power from 250 w to 10 kw day, 5 kw night, directional antennas night and day, thus ending four-year-old case. Fort Industry station's move is predicated on similar move by WABJ Adrian, Mich., from 1500 kc to 1490 kc and from 250 w daytime, to 250 w fulltime, also to be approved by FCC. Among 10 stations involved in case, which went through hearings and oral argument, were KSTP Minneapolis-St. Paul and WTOP Washington. Examiner's initial decision late last year proposed to make grant, but exceptions were taken by FCC's Broadcast Bureau. WJBK's directional antenna will have eight towers.

BUSINESS BRIEFLY

WILDROOT LOOKING ● Wildroot Co., N. Y., contemplating spot announcement radio campaign on West Coast. Availabilities are being lined up with final decision expected next week. Agency, BBDO, New York.

SERUTAN ADDS ● Serutan Co., N. Y. (Serutan Geritol), to air its DuMont Network *Battle of the Ages* (Tues., 9-9:30 p.m. EST) on 12 stations with addition of WTVJ (TV) Miami and KING-TV Seattle. Agency, Franklin Bruck Adv., N. Y.

CIGAR APPOINTMENT ● La Primadora Cigar Corp., N. Y., names Monroe Greenthal Co., same city, as advertising agency.

AGENCY NAMED ● Rilling Dermetics Co., N. Y., manufacturer of cosmetics, names Ruthrauff & Ryan, same city, to handle advertising, effective May 1.

WAFFLE CORP. SPOTS ● Waffle Corp. of America, Philadelphia (frozen waffle mix), through J. M. Corn Co. there, preparing radio and TV chainbreak campaign starting April 29 for 13 weeks in half-dozen markets.

POPSICLE DISCS ● Joe Lowe Co., N. Y. (Popsicles), placing five-minute transcribed show featuring Buster Crabbe adjacent to network and local children's shows, on local station basis. Agency, Blaine-Thompson, N. Y.

SINGER IN TEXAS. ● Singer Sewing Machine Co. extending radio spot campaign to Texas, in cooperation with dealers. Agency, Young & Rubicam, N. Y.

AGENCY NAMED. ● Delaware Valley Dairy Inc., Trenton, names N. W. Ayer & Son to handle advertising. Firm distributes Sealtest products and is National Dairy subsidiary.

Liberty Seeks Last-Minute Court Relief

LIBERTY Broadcasting System slated to go into Chicago Federal District Court this morning (Monday) in effort to preserve its network structure and its major feature, baseball broadcasts. Amending its original complaint charging restraint of trade against 13 major league ball clubs, Liberty attorneys Friday filed complaint naming Western Union as co-defendant. It charges illegality on part of leagues and member clubs and Western Union, with which American and National Leagues have had contracts since 1943, paying $24,000 each per year.

According to contractual terms, clubs can control parties using Western Union wire lines from parks, complaint alleges. Liberty says Western Union is licensed as common carrier under terms of Communications Act, which provides that facilities must be unrestricted and available to anyone. Amended complaint therefore charges illegal contract terms and petitions for temporary restraining order permitting Liberty to participate in baseball season which starts Tuesday.

Liberty's plan, if relief is granted by Judge John P. Barnes, is to carry live broadcasts of Brooklyn Dodgers and Chicago White Sox, with which it has contracts, and to recreate top games of other teams in both leagues. Only remaining team not included in either category is Cincinnati Reds, expected to "go along with live broadcasts".

Liberty's main objective is to prolong suit with temporary restraining order followed by temporary injunction, latter remaining effective until outcome of conspiracy hearings. Network reportedly faces possible loss of many affiliates who signed originally for ball games.

REYNOLDS, GENERAL TIRE TO CO-SPONSOR DRAMAS

R. J. REYNOLDS TOBACCO Co. has signed for co-sponsorship, with General Tire & Rubber Co., of WOR-TV New York's new *Broadway TV Theatre*, which starting tonight (Monday) will present full-length Broadway dramatic successes, each of which will be carried five consecutive evenings [B•T, March 31].

This week's show is "The Trial of Mary Dugan," and will be seen at 7:30 p.m. Monday, Tuesday, Thursday and Friday and at 8 p.m. on Wednesday, featuring Ann Dvorak and Vinton Hayworth. Other Broadway hits have been lined up for showing in successive weeks.

Reynolds, sponsoring for its Cavalier cigarets, and General Tire & Rubber will alternate in taking first 45 minutes of each show. Move to present same show on consecutive nights is part of plan for general program strengthening which has been in progress since General Tire became major stockholder of WOR radio and TV properties early this year.

Agency for Reynolds, which signed for 52 weeks, is William Esty & Co., New York; for General Tire, D'Arcy Adv. Co., New York.

EDUCATORS HAIL THAW

JOINT Committee on Educational TV hailed educational reservations included in FCC's final order unthawing the TV freeze released today. Statements were issued by Ralph Steetle, executive director of JCET, and following educators: Dr. Edgar Fuller, chairman of JCET; President David Henry of Wayne U., vice chairman of JCET; President Arthur S. Adams of American Council on Education; Willard E. Givens, executive secretary of National Education Assn.; Seymour N. Siegel, president, National Assn. of Educational Broadcasters; Belmont Farley, National Education Assn. representative on JCET; James H. Denison of Michigan State College, representing land grant colleges and universities on JCET; Dr. A. N. Jorgensen, president, U. of Connecticut.

POWER OF SPOT SHOWN

ADVANTAGES of spot broadcasting as advertising to be shown in presentation by National Assn. of Radio & Television Station Representatives, slated for preview tomorrow (Tuesday) before business press in New York. Tom Flanagan, NARTSR general manager, will handle presentation following luncheon at Biltmore Hotel.

ADMIRAL SALES HOLD UP

INTEREST in political conventions will bring Admiral Corp.'s sales of radio and TV sets in first half of 1952 to about same level as last year, President Ross D. Siragusa said in Chicago at annual stockholders meeting. Admiral is sponsoring both conventions on ABC-AM-TV.

TWO NBC RADIO PROJECTS

NBC RADIO believed interested in new show, just auditioned, titled *Meet Your Match*, featuring Jan Murray. Network has taped another new program, *Word by Woolley*, quarter-hour show featuring Monty Woolley.

In this Issue—

The freeze is thawed; 2,053 TV stations assigned to 1,291 communities in the FCC's Sixth Report and Order. Of these, 242—of which 80 are VHF—are reserved for non-commercial educational use. Main story and highlights of the report on *Page 23*. Comparisons between new allocations and those proposed a year ago in the Third Report are on *Page 24*. Full text of the report is published in the special Part II of this issue. Procedures to be followed by applicants, now that TV is opened for business nationwide, are described in detail on *Page 65*. Concurring opinion of Comr. Webster and dissents of Comrs. Jones and Hennock on *Page 24*.

House version of the Senate-passed McFarland Bill, first piece of basic legislation affecting broadcasting to get this far in Congress since the Communications Act was passed in 1934, is exposed in detail. Some of its provisions give the FCC far more authority than it now has or claims. *Page 25*.

Manhattan Soap drops high-rated TV program to put the money into spot radio. It's only one of several big moves by sponsors reported in the week. *Page 29*.

Edgar Kobak is named president of the Advertising Research Foundation which is off to a well-heeled start on several vital projects. *Page 27*.

American Civil Liberties Union seeks full-dress FCC investigation of blacklisting in radio and television, charges four networks and two stations with allegedly discriminating against specific performers. *Page 25*.

U.S. Census Bureau issues first statewide report of radio and TV circulation in 1950. It's for Delaware and it shows that radio saturation rose from 87% in 1940 to 96.2% in 1950. *Page 27*.

Sen. Hubert Humphrey wants to remove from tax deductions the cost of institutional advertising that expresses political attitudes. He'll probably have a fight on his hands. *Page 31*.

One of the biggest headaches of the TV film industry is undercapitalization, but generally the future for the industry looks promising. Here's a report on a meeting of the National Television Film Council in New York. *Page 66*.

Edward J. Noble says there won't be any more radio rate cuts at ABC this year. *Page 48*.

Ohio State U. Institute for Education by Radio-Television announces 16th batch of broadcasting awards. *Page 44*.

Upcoming

April 16: "Brand Names Day" conference, Waldorf-Astoria, New York.
April 16: BAB Sales Clinic, Los Angeles.
April 17-20: Ohio State U. Institute for Education by Radio-Television, Deshler-Wallick Hotel, Columbus, Ohio.
April 19: Ohio Assn. of Radio News Editors, Deshler-Wallick Hotel, Columbus, Ohio.
(Other Upcomings page 38)

Closed Circuit

(Continued from page 5)

bined ATS-REC range from American Radio & Television Society (ARTS) to Radio & Television Executives (RATE), affording members opportunity offered by broadcast media for choosing either creative or commercial path to success.

IN ANTICIPATION of big business in TV, more than one top FCC lawyer (as well as engineer) contemplating hanging out shingle or being importuned to join existing firms. Half-dozen lawyers have left in recent weeks.

ANOTHER manifestation of anticipated TV business seen in splitting up of both law and engineering firms. So far there has been one in each field, while engineers, who have been in government or non-radio-TV practice during lean period of freeze, are re-establishing themselves in broadcast operations.

WHILE entire FCC was working overtime to meet its April 14 deadline on final TV allocations, Comr. Robert F. Jones worked practically around clock in writing his voluminous dissent protesting overall allocations. For several weeks, he took 15 minutes for desk lunch and kept away from telephones.

NBC ARRANGES SERIES OF RADIO WORKSHOPS

PLANS for four radio promotion-press-merchandising workshops between NBC network officials and affiliated stations, with first to be held in New York's Waldorf-Astoria May 1-2, announced Friday by Jacob A. Evans, NBC radio advertising and promotion manager.

Other two-day meetings—"to effect closer liaison and mutual understanding" between station officials, promotion and publicity managers and their network prototypes—to be held in Chicago, May 5-6; New Orleans, May 8-9; and Hollywood, May 12-13.

All workshops to follow same format: First day, station heads to hear of network sales, promotion, merchandising, publicity, exploitation, news and research operations, plus general network plans for rest of year. Second day, network officials and station heads to discuss means for affiliates' maximum use of those network plans. Then station members to have closed session, followed by network-station meeting for further discussion.

Network officials to participate in New York workshop include: Joseph H. McConnell, NBC president; John K. Herbert, vice president of Radio Network Sales; Charles C. Barry, vice president of Radio Network programs; William F. Brooks, vice president of public relations; Sydney H. Eiges, vice president of press and information; Mr. Evans; Clyde L. Clem, radio audience promotion supervisor; Fred N. Dodge, merchandising director; Henry Cassidy, radio news-special events director; Hugh M. Beville Jr., plans and research director; and Fred Shawn, radio station relations manager.

LORILLARD CHANGES

P. LORILLARD Co. (Old Gold cigarets) replacing its 8:30-9 p.m. portion of *Stop the Music* on ABC-TV (Thurs., 8-9 p.m.) with *Chance of a Lifetime*, starring Dennis James beginning May 1. Agency is Lennen & Mitchell, N. Y. ABC-TV planning to continue 8-8:30 p.m. *Stop* segment (being dropped by Hazel Bishop Inc. and Toni Co. in favor of another time period) while seeking new sponsor.

In some countries products are endorsed by the Crown, and bear the arms of the royal family. That gives them prestige which stimulates sales.

But in democratic America our products are endorsed solely by the approval of the American people, and are identified by brand names and trademarks that have won esteem the hard way.

Here every product must stand on its own feet, and fight for survival in the intense competition of the market place.

Here there is no easy road to popularity or leadership—no suggestion from government as to what you shall buy or what you shall pay. Under our brand system, which is the very keystone in the structure of our free economy, people can separate the wheat from the chaff and make their purchases solely on the basis of merit and appeal to their personal tastes and preferences.

Our system of brand names and advertising is important to the American way of life for two other basic reasons:

1. It develops broad markets for our goods, which in turn stimulate volume production. As a result, many conveniences that would otherwise be luxuries can be sold at prices almost everyone can afford.

2. Brand competition spurs our manufacturers to greater efforts to please us. And this results in constant product improvement and the birth of many new products to add to our comfort and happiness.

• • •

Getting this story across, simply, clearly, is an important job—a task that calls for the concentrated efforts of all who have a stake in the success of manufacturers' brand names.

First IN RADIO IN WFIL—

for Drugs

2,300 INDEPENDENT DRUGGISTS PUSH WFIL-ADVERTISED PRODUCTS

An exclusive arrangement with the Philadelphia Association of Retail Druggists and its affiliates now makes WFIL "the voice of the independent druggist" in the heart of this rich coverage area. Here's a tailor-made plan for you to cash in on full co-operation by 2,300 druggists who account for 75 per cent of Philadelphia's retail drug volume. Here's a plan which once again gives a head start in merchandising to WFIL advertisers!

DISPLAYS!

Each week a different product will be featured on an eye-catching WFIL Spotlight Drug display set up in PARD member stores. This tremendous point-of-sale impact can be yours—exclusively—for seven days!

RADIO JACKPOT!

A daily telephone jackpot quiz is featured on the PARD-sponsored Skip Dawes disc jockey show. Cash awards go to consumers who can answer a question on the Spotlight Drug of the week, and to the druggist who submitted the winner's entry blank. A sure-fire gimmick to pull customers to your display.

DIRECT MAIL!

The Spotlight Drug of the week is promoted through PARD direct-mail product notices to members in Philadelphia and seven neighboring counties. WFIL designates the product with PARD's prior approval.

EFFECTIVE SPOTS!

Any WFIL-advertised drug product which uses the equivalent of six minute spots a week for 13 weeks is eligible for the Spotlight Drug promotion. When you schedule WFIL you hit hard in an area with 6,800,000 people and more than $9 billion in buying power.

... America's Third Market

for Food

500,000 FOOD FAIR CUSTOMERS WEEKLY STOPPED BY SPECIAL MERCHANDISING DISPLAYS

Food Fair, one of the nation's leading supermarket chains, has made a special co-operative agreement with WFIL covering its Philadelphia-area stores. Now WFIL can offer advertisers valuable point-of-sale merchandising and a strong tie-in with a successful women's show. You'll reach an estimated 500,000 shoppers at point-of-sale each week under this plan. Here's another example of how WFIL leads Philadelphia radio stations in merchandising sponsors' products.

DISPLAYS!

Special merchandise displays for qualifying WFIL advertisers will be erected each week in 35 busy Food Fair markets. A different advertiser will be featured every seven days on these attractively-designed displays. It's an ideal way to put your product in position where it can't be missed by a half-million shoppers!

POINT-OF-SALE CO-OPERATION!

Wherever possible, Food Fair will use point-of-sale and other display material prepared and furnished by the advertiser. This is a worthwhile plus to the basic merchandising plan—a plan that's worth real money to every food advertiser.

COVERAGE IN 35 SUPERMARKETS!

Food Fair is one of the three leading supermarket chains in Philadelphia. You cover these markets by taking part in WFIL's merchandising plan: Philadelphia, Trenton, Chester, Wilmington, Atlantic City, Coatesville, Bryn Mawr, Jenkintown, Norristown, Camden, Collingswood, Vineland.

PARTICIPATION!

WFIL's Spotlight Foods Service is available to advertisers who buy three or more participations a week in the popular Mary Jones Show, for a minimum of 13 weeks. This show has proven pulling and selling power throughout the 14-County Philadelphia Retail Trading Area, where WFIL's voice is strongest.

agency

STEPHEN P. BELL, account executive, Ruthrauff & Ryan, N. Y., elected a vice president.

WALLACE L. SHEPARDSON, vice president-general manager, James Thomas Chirurg Co., Boston, elected to board of governors of New England Council, American Assn. of Adv. Agencies.

Mr. Shepardson

CHARLES HULL WOLFE, director TV commercials, McCann-Erickson Inc., N. Y., transferred to Los Angeles office in same capacity.

JOHN C. APPLETON, account executive, Gray Adv., N. Y., to Ellington & Co., that city, in same capacity.

NOEL CHARLES, British film attache in Rome, Italy, named coordinator of TV film production and personal representative in Europe for Ted Baldwin Inc.

BOB KESTEN, manager of Toronto office of O'Neil, Larson & McMahon Adv., appointed to trustee vacancy on East York Board of Education.

on all accounts

SEVEN years ago, Claire Koren decided that advertising was a fascinating field and made up her mind to be part of it all.

Canvassing the Los Angeles advertising agencies, she found an ally in Foote, Cone & Belding which recognized the initiative and determination of young, attractive Claire and promptly set her to work as a service girl on the Sunkist account.

Now media director of The Mayers Co. Inc., Los Angeles, Miss Koren has never changed her mind about advertising. To her there is still nothing so exciting as planning a campaign and seeing it through. Working on the premise of "good hard work" plus just enough "guess work" she still finds the field a constant challenge.

Six years "apprenticeship" at FC&B taught her many of the ins and outs of advertising, particularly in radio and television.

About a year after joining the agency, she was made assistant timebuyer; about a year and a half later she got a taste of other media when she was assigned to help set up a new Contract Department, acting as liaison between media and account secretaries. In June 1949, the agency timebuyer left. Miss Koren was called away from her contracts to fill the post.

In that capacity she worked on national radio and TV accounts including Union Oil, Purex, as well as Sunkist. She had the further advantage of learning about television at an early date because of an association with an agency that recognized the potentialities of the new medium almost from its start.

As timebuyer she was in on two important national debuts on television, that of Sunkist's line of frozen anud canned citrus products, and Union Oil's Royal Triton motor oil.

In October 1951, Miss Koren left FC&B to take her present position with The Mayers Co. That 37 year old agency, under the quiet direction of advertising veteran Henry Mayers, also has been alert to the potentialities in television advertising. The agency's growing television department has its own facilities for producing films, as well as its own projection room.

Miss KOREN

Recently the firm published and distrbuted to manufacturers a booklet entitled *"What Does TV Advertising Cost?"*, listing rates of local TV stations, in addition to information on how the medium can be successfully used. Quarterly revisions will be made on the well received booklet.

Among the agency's radio and television accounts are Sears, Roebuck & Co., Los Angeles, currently carrying the hour weekly *Dude Martin Show* locally on KTTV

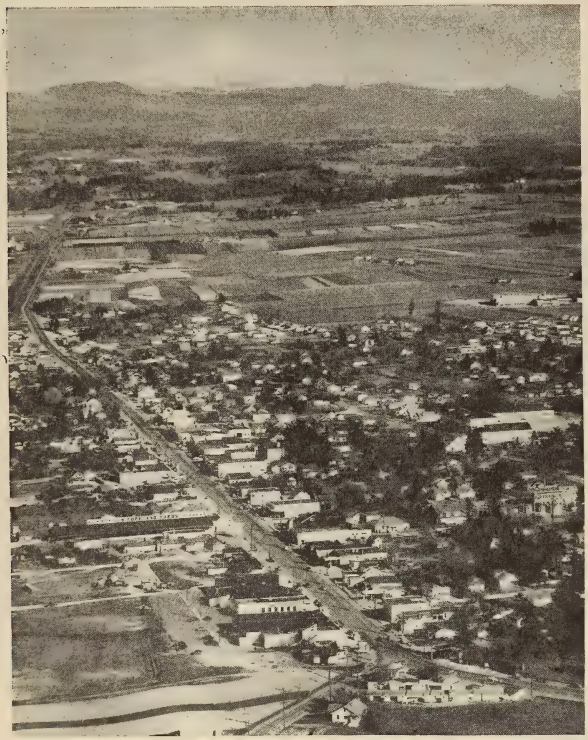
ED SHAPIRO Adv, Phila., moves to larger quarters in Fox Bldg., that city.

TED HAINES promoted to production manager, Adolph L. Bloch Adv., Portland. **EARL GRAY** joins agency as art director.

Obviously OUTSTANDING . . .

Proof again that the prosperous Peoriarea market is a must on your market list! One industry with 28,000 employees earning over $2 million each week—that's mass buying power . . . and when you add the $30 million that Caterpillar spent last year among 439 Peoriarea merchants for products ranging from peanuts to industrial cranes . . . and look at Peoria's many other industries and its rich agricultural market . . . you can see that PROSPEROUS must be capitalized to describe the Peoriarea market.

WMBD Dominates the Rich Peoriarea Market



WMBD, the mass medium for Peoriarea, reaches and sells more of these people than any other radio station in the area. Advertisers use WMBD to tell their story beginning at 5:55 in the morning and don't stop until after 11:15 at night. Their commercial messages are beamed to the rich PROSPEROUS Peoriarea "mass buying power" . . . the sales results prove it!

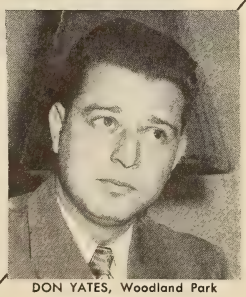
THE People's Choice* IN PORTLAND OREGON



In community after community, people declare KGW is the "People's Choice"! This acceptance is no accident. More than 30 years of continuous operation plus diversified programming combine to make this pioneer station a dominant advertising medium without equal. Read what Portland area residents say about KGW and learn why you, too, will benefit by placing your copy on the station that delivers results!

PARKROSE BUSINESS DISTRICT

Merging with part of Multnomah county's fine agricultural district, it is one of the leading shopping centers in the Portland area.

RAY GILL, Oregon State Grange Leader

DON YATES, Woodland Park Booster Club President

COMMUNITY CIVIC LEADERS

Men such as these three community leaders in the Parkrose district say, "KGW is the leading station in the Portland area." With support from such well-known business leaders KGW can assure advertisers of the utmost in listener loyalty.

FRED SCHWARY, Parkrose Chamber of Commerce President

KGW

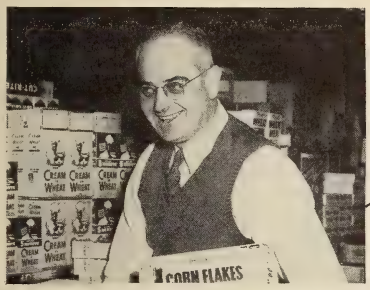
NBC AFFILIATE

PORTLAND, OREGON

REPRESENTED NATIONALLY BY EDWARD PETRY & CO., Inc.

THESE PARKROSE PEOPLE HAIL KGW's LEADERSHIP

DRUGGIST "The most productive advertising in Portland radio is KGW... the favorite in this area," states Douglas Densem, Parkrose Pharmacy.

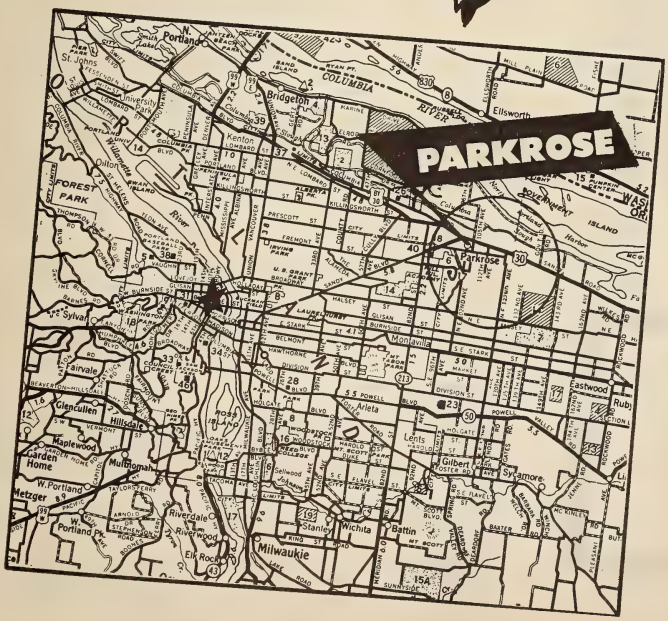


BANK MANAGER

"Definitely a good investment, whether you're a listener or have a product to sell in Portland radio," reports Arthur Damschen, manager, Parkrose branch of Portland Trust Bank.

CAREER GIRL "Prestige with local listeners makes KGW 'tops' in our area," says Clara Johnson, Parkrose resident.

GROCER "The 'Silent Salesman' in the grocery business is Radio Station KGW... really the 'People's Choice' in my store," asserts Parkrose Grocer G. R. Silverthorne.



Parkrose

Where more than 60,000 people are influenced by KGW's "selling"... one of the most rapidly growing sections in the Portland area.

SCHOOL HEAD

"KGW's educational value and long-range civic efforts have brought it a place of prominence in our community," according to Don Campbell, Parkrose Superintendent of Schools.

STUDENTS "Our favorite station and programs that attract ALL age groups. Truly the best in the Portland area," declares Parkrose High School Students Diane Mahoney and Jim Sheley.

TICK

they started with a good program and a sound idea

THE PROGRAM: "The Gruen Playhouse," a half-hour dramatic series . . . on film.

THE IDEA: Develop broad coverage for the program . . . with stations only in markets they need . . . on a Spot basis.

On a Spot basis, Gruen cleared good time in 35 hand-picked markets, including 29 hard-to-get one- and two-station markets. In all markets, Gruen got top picture quality . . . thanks to film.

And thanks to Spot Program television, Gruen saves enough on time costs to take care of extra film prints, their handling, distribution.

What you can expect from Spot Program television is told in a new presentation, "A Better Approach to TV Advertising." A call to your Katz representative will bring it to your office. It shows why Gruen and other advertisers agree:

YOU CAN DO BETTER WITH SPOT...MUCH BETTER

is a simple word . . .

but Mr. Webster takes up half a column to tell its different meanings

In this broadcasting business "FIRST" gets sort of overworked, too. Some stations enthusiastically claim to be first just because they are the oldest in the market. And other stations talk about the Number One network—also on the basis of grey hairs. We respect grey hairs (and have our share) but the Webster definition of FIRST that we want to talk about is

FOREMOST

WTAX is first with the listeners with more audience than other Springfield stations combined (see HOOPER).

WTAX is the first choice of Springfield advertisers —to the extent that spot availabilities have a habit of getting non-existent at times.

WTAX is affiliated with CBS—which has more top-20 programs than the other three major networks combined—and ranks first with national advertisers as shown by an investment of 28% more dollars in 1951 than the next ranking network.

WTAX is only 22 years old (not first in years we admit) but we won't weep over that. It's modern up-to-the-minute plant was constructed in 1947-48 and its equipment is unsurpassed. If you want to cover the Springfield market thoroughly and economically—the most listeners at the lowest cost to you—you will put WTAX on your list

Half-Time Activities

EDITOR:

KINY Juneau, Alaska . . . believes it has recruited the youngest listener in history to basketball broadcasts. It all happened when the town of Wrangell, 140 miles south of the Alaskan capital, went on the air for the first time with a broadcast of the territorial high school basketball championship series. . . . The play-by-play was carried by the Signal Corps' submarine cable to the Juneau transmitter. . . .

Mrs. Robert Whickman, wife of the town clerk, was expecting a baby but didn't intend to miss the historic broadcast. When she was taken to the [Wrangell] hospital, her radio went with her. A considerate daughter arrived at half-time so that neither Mrs. Whickman nor her husband (who had been ordered away from his wife and the radio during the delivery) missed any of the broadcast.

Baby and team both did well, Wrangell sweeping the series in two straight games. . . .

feature of the week

KBKR Baker, Ore., is more than slightly proud of an advertising campaign which has won three awards in the past two years.

The sponsor, Henry Levinger, owner of a Rexall Drug Store, is highly pleased, too. Gross business has increased more than 400% in the past five years and the store now reportedly is doing more business than all other eight stores in the county combined.

Planned and supervised by Milton L. Levy, KBKR advertising manager, the campaign consisted of a twice-weekly give-away show, a weekly remote broadcast, a prescription contest and a Christmas letter-writing contest for children. In addition, spots were used.

By dint of hard work, Mr. Levy was able to get more than 25 firms to assist with cooperative advertising for the Rexall campaign.

Prizes won were the Highest Merit Certificate in the Oregon Advertising Club's annual Oregon Advertising Achievement Exposition; the Highest Merit Award in the Third Annual MacWilkins Memorial Award contest conducted by the Oregon Advertising Club, and a first prize from BAB in its "Radio Gets Results" contest.

In effect, the campaign has made of Mr. Levinger a "neighborhood druggist" for the entire county. His voice, heard throughout the remote broadcast, is a familiar one to listeners.

Mr. Levinger (l) and Mr. Levy hold the three awards.

This is what Mr. Levinger has to say about radio advertising:

"During the last 20 years we have tried all types of advertising, direct by mail, newspaper and radio. We find for a small town such as ours with a good rural trading area, the radio is by far the most effective.

"Before we concentrated on radio advertising we spent far too much time working out newspaper ads. We find that the radio is much simpler, more flexible and pulls better dollar-for-dollar of expenditure.

"We continually 'scoop' our competitors on promotions because of the speed with which we can get new items on the air. We believe changes in the programs are essential and are planning on many revisions to keep our listeners listening."

Mr. Levy reported that many radio stations and drug stores have made inquiries about his campaign.

strictly business

CARROLL LAYMAN

THE FUTURE of TV is so tremendous "we haven't even begun to see its possibilities" is the opinion of Carroll Layman, Chicago manager of Harrington, Righter & Parsons, which claims to be the first exclusive national television station representative firm.

Mr. Layman, in the near future, expects many new advertisers to go into TV, old advertisers to use TV spot in new and more effective ways, and stations to "clean up" their schedules with the advent of competition. Spot, which has been "abused locally," often has an excess of commercialism with no value "from any angle," he says.

Taking the country as a whole, TV costs are not as high as people seem to believe, he states. Mr. Layman thinks results should be reviewed on the basis of sales.

In Buffalo, for example, he said a Class A spot for $115 has a potential audience of more than 250,000, plus some 30,000 persons in Canada who are classed as a bonus.

Mr. Layman, who opened his

BROADCASTING

VOL. 42, No. 15—PART 1 APRIL 14, 1952

THAW JULY 1

THE FCC today (April 14) thawed the 43-month-old television freeze with the release of a ponderous "Sixth Report and Order" which establishes a national television policy for the United States.

The new allocations, providing over 2,000 stations in nearly 1,300 communities, came by a divided FCC vote, with four of the seven commissioners (Chairman Paul A. Walker, Vice Chairman Rosel H. Hyde, Comrs. E. M. Webster, George E. Sterling) giving it unqualified endorsement. Comr. Robert F. Jones bitterly dissented on all counts, and Comr. Frieda B. Hennock, victor in her crusade for educational reservations, concurred in part and dissented in part. The seventh Commissioner — neophyte Robert T. Bartley—did not participate in the final vote.

The report, destined to set off the biggest land-rush for facilities since the advent of electrical communications, does not become effective until July 1. This leaves 78 days of "waiting period" during which applications can be perfected. And it will be on the controverted "channel - by - channel" basis, as against the "one-pot" proposal.

Actually, the report does not become legally effective until 30 days following its publication in the *Federal Register*. But that is a technicality.

A temporary expediting procedure is established, with cities having no TV service to be processed first. (Detailed outlines of procedures and priorities, plus highlights of the report on this and the next page. For full text, see Allocations Supplement published with this issue.)

In its 600-plus page final report, the Commission establishes a zone system with varying spacings between stations to fit engineering or geographical conditions. Most of its conclusions followed closely the speculation that had been circulating broadcast ranks for many weeks (as depicted in issues of this publication).

On July 1, the processing actually resumes. There will be some grants — where uncontested — but most applications will go to hearing. The station population of 108 is not destined to increase by more than a handful this year, it is thought. And hearing cases may take months; even years.

With the release of the report, it now can be expected that literally hundreds of new applications will be filed. Consolidations of applicants in given areas also are anticipated, in consonance with the revelation of the table of assignments to cities, and the new rules of the game.

The FCC provided no additional VHF channels to such major "trouble" areas as Boston, Chicago, San Francisco, Philadelphia or Pittsburgh, compared with the assignments last year in the "Third Notice" [B•T, March 26, 1951].

It did, however, provide additional VHF channels in 21 cities. But this was partly offset with the deletion of one VHF channel each from 15 cities. Most of these losses were in the Gulf Area states, where wider separations were specified because of interference factors.

Educational reservations were increased from the proposed 209 to 242—11.8% of the total assignments. Among the 242 educational reservations are 80 VHF channels—13% of all VHF assignments.

Highlights of Report Ending TV Freeze

FOLLOWING are the significant highlights of the FCC's Sixth Report and Order, which sets the pattern for TV in the United States:

Number of Channels and Communities: There are 2,053 assignments made to 1,291 communities (including 51 assignments to 17 cities in the territories). This compares with 1,965 assignments made to 1,256 communities last March in the FCC's Third Report and Order [B•T, March 26, 1951].

VHF and UHF Assignments: There are 617 VHF and 1,436 UHF assignments made, of which 51 VHF channels are to territories. This compares with 608 VHF and 1,357 UHF assignments made then.

Educational Reservations: There are 242 non-commercial, educational reservations made in as many cities (including nine to territories). Of the 242 reserved channels, 80 are VHF frequencies (including the nine to territories). This compares with 209 non-commercial, educational reservations made last March, of which 82 were VHF.

Zones: The United States is divided into three zones. Zone I includes the northern part of the country to the Mississippi River. Zone III includes the southern states, from the Gulf of Mexico northward for about 150 miles. Zone II includes rest of nation.

Mileage Separations:

	I		II		III	
Zone	VHF	UHF	VHF	UHF	VHF	UHF
Co-Chan.	170	155	190	175	220	205
Adjacent Chan.	60	55	60	55	60	55

Powers: Maximum power for Channels 2-6 is 100 kw; Channels 7-13, 316 kw; Channels 14-83, 1,000 kw. Minimum power for all stations is 1 kw.

Antenna Height: Maximum antenna height permitted with maximum power is 2,000 ft. above average terrain—except in Zone I where VHF antenna maximum is limited to 1,000 ft.

Changes in Existing Stations: Only 30 of the existing 108 U. S. stations are required to change frequencies. Last March, 31 were proposed to be changed. WKY-TV Oklahoma City has been permitted to remain on Channel 4. In two other instances, changes are different from those proposed last March: WSAZ-TV Huntington changes from Channel 5 to Channel 3, instead of to Channel 8, and WTAR-TV Norfolk from Channel 4 to Channel 3, instead of to Channel 8.

Flexibility Channels: Plan to reserve 18 UHF channels for future assignment on request was abandoned. Instead some of the so-called flexibility channels were used to add UHF frequencies to some cities. The others were unassigned and will be assigned to a city upon rule-making procedure.

For city-by-city assignments see page 132, TV Allocation Supplement.

617 VHFs, 1436 UHFs in 1291 Markets; Educators Win

The voluminous report (reprinted in full in this issue's Special TV Allocations Supplement) embodied a legal, point-by-point discussion of the various proposals and counter-proposals filed in the more than 1,500 comments submitted to the FCC last fall.

Report contained discussion and decisions on the general issues and the city-by-city comments. It also contained a complete revision of the TV Rules and Engineering Standards, prediction charts, curves and tables.

Three reasons were given for the Commission's support of a table of allocations: (1) It was the most efficient technical use of the limited number of TV channels. (2) It protects the smaller cities and rural areas. (3) It eliminates procedural disadvantages and delays in processing applications.

"Assignments made upon the 'application' or 'demand' method necessarily leads to results which do not adequately reflect on a nationwide basis significant comparative needs as well as differences among communities throughout the country," the Commission stated.

Commission table of assignments uses the entire VHF and UHF bands—the latter from 470 to 890 mc.

In answer to several suggestions that commercial TV be moved to the UHF band, solely and completely, the Commission questioned whether there would be enough UHF channels to provide a nationwide service.

Former FCC Chairman Wayne Coy never made any bones about his belief that all TV should be moved to the UHF. He said as much in several public statements and speeches.

Idea of UHF flexibility channels reserved for "drop-in" purposes was abandoned. Although all 18 such channels were not assigned, those remaining can only be assigned to a community through rule-making procedure.

Table of Assignments (see page 132 of Supplement to this issue) will be in force without change for one year, the report noted. However, exceptions to this "freeze" will be made for (1) assignment of a channel where no assignment has been made in the table to a

(Continued on page 67)

DISSENTERS

Are Jones and Hennock (in Part)

OF the three separate opinions to the majority FCC final TV "freeze" report (reprinted in full in the special Supplement), Comr. Robert F. Jones was the only one who dissented in toto. He found the whole philosophy of the report distasteful—and he said so, vigorously and colorfully.

Comr. Frieda B. Hennock also objected vigorously to the lack of what she claimed was an "adequate" educational reservation plan, to the power and antenna height standards, which she claimed "enhanced VHF at the expense of UHF," and to the temporary expediting procedure. She concurred with the idea of the educational reservation plan, although re-emphasizing that she didn't think it went far enough.

Comr. Edward M. Webster issued a concurring opinion in which he declared that the Commission was forced to accept the educational reservation plan because of the lack of a case against it by commercial interests.

Blistering Attack

Blistering attack on the FCC's "Sixth Report and Order" was set down by Comr. Jones in 27 pages and 33 charts and tables. In graphic language, he declared that the report:

1. Gave the advantage to major cities to the detriment of the smaller cities.

2. Was based on administrative convenience rather than on the fair and equitable distribution of frequencies to the various cities and states.

3. Was on questionable legal ground when it included the Table of Assignments in the rules, which prohibited any changes except through rule-making procedures.

4. Was in error when it established minimum separations to assign channels throughout the United States. He said he believed that the Commission should take advantage of the flexibility provided in raising antenna heights rather than powers and use the difference in efficiency to get the equivalent of minimum co-channel separations agreed upon.

5. Gave VHF operators a greater break than UHF in station coverage. He desired, he said, regulations which would equalize the coverage of VHF and UHF stations.

"Actually, if you attribute all the selfishness charged against them in the Commission's decision, broadcasters could have done little more on an application basis, without an allocation plan, to carve out an advantage to the detriment of the smaller cities," he said.

Speaking of the high cost entailed in meeting the Commission's maximum powers and antenna heights, which he believed almost everyone will be forced to meet, Comr. Jones said:

"This means that there is a million dollar entry fee for every broadcaster to guarantee the Commission plan's efficiency. . . . This plan throws the heaviest financial burden upon those least able to pay [UHF operators]."

Other, equally vivid, passages follow:

"It [the FCC] has created a bigger Frankenstein with this artificial scarcity of channels in this plan than it is trying to avoid. . . .

"The Commission has had the paralysis of analysis for one year, not consumed in drafting the general Rules and Standards, but consumed in a search for a city-to-city allocation plan which it can freeze on the country by rule-making proceedings.

". . . the firm, fixed and final allocations plan constitutes an inefficient use of our valuable spectrum space.

". . . this dodge of mileage separations is the Achilles heel to this allocation plan's efficiency. . . . The arbitrary mileage separations . . . are not based upon engineering principles at all.

"In their Report, they [the Commission] have given only lip service to that standard [fair and equitable distribution of television service] . . . The inevitable result [of abandoning that standard] is an allocation which is neither fair nor efficient nor equitable and which so far departs from the realities as to be completely arbitrarary and capricious.

". . . by giving excessive co-channel protection to VHF stations and inadequate protection to UHF stations the Commission has arbitrarily and adversely affected the ability of UHF stations to compete."

In establishing maximum powers and antenna heights, the Commission should have limited VHF so that UHF stations could compete properly, Miss Hennock declared. She would have limited Channels 2 to 6 to 50 kw with 500 ft. antenna height, Channels 7 to 13 to 150 kw and 500 ft., and the UHF frequencies to 1,000 kw. She did not mention antenna height limitations for UHF.

The greater coverage that VHF channels will get with high powers and antenna heights were specified by Miss Hennock.

"To increase power and height now is irrevocably to cast the die in favor of the VHF and to take an unnecessary gamble with the future of our entire television system," she said.

Failure to use the flexibility channel idea was also scored by Miss Hennock. She stated that she feared that the unassigned channels will be "preempted" by the larger cities.

A "two-lump" hearing procedure —VHF and UHF—instead of the channel-by-channel procedure is best, Miss Hennock declared. "By permitting applicants to pick and seek particular VHF frequencies, the 'channel-by-channel' procedure is inconsistent with this basic allocations principle [that all VHF channels are identical]," she said. She also foresaw "multiple" VHF hearings in the same community under the Commission's plan of processing, she said, rather than any more speedy grants as it believed.

"Maximizing" the number of educational reservations should have been the program in the final Table of Assignments, Miss Hennock declared. She stated that she believed also that the reservations have "predominantly been confined to the UHF portion of the spectrum and an insufficient number of VHF reservations provided."

Her 26-page dissent went into detail as to reasons why she is opposed to the reservation methods followed in the final report.

Educational reservations are the

WHERE VHF CHANNELS WERE ADDED

And the Cities That Lost VHF Channels

NONE of the big city "hot spots," like Boston, Chicago, San Francisco, Pittsburgh and Philadelphia, got any more VHF channels than were proposed to be allocated to them in the Third Report last year [B•T, March 26, 1951].

However, 21 cities had a VHF channel added to the assignments proposed last year. They are: Santa Barbara, Calif.; Denver, Col.; Durango, Col.; Grand Junction, Col.; Hartford, Conn.; Champaign-Urbana, Ill.; Cedar Rapids, Iowa; Bay City, Mich.; Cadillac, Mich.; Eugene, Ore.; Altoona, Pa.; Spartanburg, S. C.; Memphis, Tenn.; Nashville, Tenn.; Lubbock, Tex.; Salt Lake City, Utah; Vernal, Utah; Harrisonburg, Va.; Bellingham, Wash.; Beckley, W. Va.; Green Bay, Wis. Additional VHF went to Sacramento, Calif., but the educational reservation shifted from UHF to VHF.

Fifteen cities lost a VHF channel. They are: San Diego, Calif.; Visalia, Calif.; New London, Conn.; Pensacola, Fla.; Tallahassee, Fla.; Tampa-St. Petersburg, Fla.; Valdosta, Ga.; Centralia, Ill.; Middlesborough, Ky.; Alexandria, La.; Lafayette, La.; New Orleans, La.; Jackson, Miss.; Columbia, S. C.; Amarillo, Tex. The following cities were left with no VHF assignments: New London, Tallahassee (VHF remaining is reserved for education), Valdosta, Centralia, Middlesborough, Lafayette.

In the following three cities the educational reservation was changed from the VHF channel to a UHF channel: Indianapolis, Kansas City, Omaha. In addition the Commission deleted the VHF reservation for Columbia, Mo., and did not change it to another channel.

In two cities, the Commission reserved VHF channels. They are Gallup and Silver City, N. M.

Among other changes made in the city-by-city assignment table, the Commission specified Brownsville, Weslaco and Harlingen, Tex., and Buffalo and Niagara Falls, N. Y., as one market cities.

Noteworthy was the lack of Commission action on Channel 5 in Ames, Iowa. This channel is now occupied by WOI-TV, owned by Iowa State College. This places the station in the commercial, rather than educational category.

NEW OFFICERS of the American Assn. of Advertising Agencies, elected at early April meeting [B•T, April 7] are (seated l to r) John P. Cunningham, Cunningham & Walsh, new board chairman; Henry M. Stevens, J. Walter Thompson Co., vice chairman; standing (l to r) are Frederic R. Gamble, AAAA, president; Harold Cabot, Harold Cabot & Co., secretary-treasurer, and George Link, Jr., AAAA legal counsel.

McFARLAND BILL

Senate Eyes House Version

FUTURE Senate conferees on the McFarland bill had a chance to see the House version in black-and-white last week and prepare strategy.

It's believed that Senators will be ready to explore carefully the House Interstate & Foreign Commerce Committee's revised bill in a move to bring it more in line with the Senate-passed original.

The House version of S 658, only major communications legislation in Congress, was released for full inspection Wednesday. It contains a rewritten section which would give to FCC powers of suspension, cease-and-desist and fine-levying to add to the agency's present authority to revoke broadcast licenses [B•T, March 24, 17].

Bill arrived on the eve of a House Easter holiday recess. The chamber convenes April 22.

Next step will be for the House Rules Committee to give the bill, which would modernize FCC functions, a go-ahead. That action will propel the bill to the House floor where it can come up for a vote at almost any time.

If amendments are to be proposed in the House they will be offered at that time. Rep. Alvin E. O'Konski (R-Wis.) already has warned he will attempt to amend the bill so as to direct the FCC to charge fees for station licenses.

Next Steps

Once the House approves the bill, it will travel to the Senate, where, if a conference is asked, both houses will appoint conferees. From there, the bill will be on its last lap toward enactment.

A clause in the bill says that the new Communications Act would take effect "on the first day of the first month which begins more than 60 days" after enactment.

There were these signs pointing to eventual joint conference:

(1) House committee has added language to the McFarland bill that was not there when the measure left the Senate. It has rewritten some Senate bill sections, deleted still others entirely.

(2) One of the sections omitted refers to "double jeopardy" in anti-trust, a pet clause of Senate Majority Leader Ernest W. McFarland (D-Ariz.).

(3) A controversial re-worked section is that of suspension-fine levying powers. Its hastened debut by the House committee brought immediate radio-TV industry opposition. Industry people say they are fearful of how these new powers could be used by FCC [see editorial, B•T, March 24]. The feeling also is rife in radio's ranks on the potential power of cease-and-desist. (The section in the House version dealing with these powers appears in context below.)

More important implications of House committee actions:

● The McFarland section on anti-trust (Sec. 311) was omitted. However, there was no explanation in the committee's report on why this was done. The report described the McFarland change saying it would have eliminated from Sec. 311 the provision "which authorizes the Commission to refuse a station license or construction permit to any person which has been finally adjudged guilty by a federal court of unlawfully monopolizing or attempting unlawfully to monopolize, radio communication, directly or indirectly, through the control of the manufacturer or sale of radio apparatus, through exclusive traffic arrangements, or by any other means, or to have been using unfair methods of competition." Thus, the House would retain this provision.

● In explaining its section dealing with cease-and-desist, suspension, revocation and fines, the committee said its "modified section would in addition [to revocation for acts willfully, knowingly, or repeatedly committed] authorize, for certain specified reasons or grounds, (1) suspension of station licenses for not to exceed 90 days, (2) revocation of construction permits, (3) issuance of cease-and-desist orders, and (4) imposition of penalties in the nature of forfeitures. (Specified grounds appear below in text of section).

● So-called "job-jumping" clause has been eliminated from the McFarland bill. It would have barred any Commissioner from representing an individual or a firm before the FCC in a professional capacity for one year after he failed to serve out his term. It would have become effective one year from the date of enactment. Reason for this omittance, the committee said, was that similar agencies do not have such a bar.

● The same reason was given for eliminating a provision in the McFarland bill on placing certain limitations on the authority which FCC now has to issue declaratory orders. Latter orders would have been used by FCC, in the Senate version, "to terminate a controversy or remove uncertainty."

In the main, except for the section added on non-discrimination against newspaper applicants and the important changes related above, the House version is considered by observers not to basically modify the original Senate bill. Thus, the conferees can concentrate on key sections.

● Surprise new section (Sec. 6 of House version) is a provision which would permit an unsuccessful applicant for license renewal to request FCC to condition its grant to the successful applicant with right of purchase of physical facilities (plant and equipment) owned by the unsuccessful applicant. It would add a new subsection (f) to Sec. 307 of the Act.

Here is the section on suspensions, fines and cease-and-desist:

Sec. 10. Section 312 of such Act is amended to read as follows:

ADMINISTRATIVE SANCTIONS

"Sec. 312 (a) Any station license may be revoked, or may be suspended for a period not to exceed 90 days, and any construction permit may be revoked—

"(1) for false statements knowingly made either in the application or in any statement of fact which may be required pursuant to section 308;

"(2) because of conditions coming to the attention of the Commission which would warrant it in refusing to grant a license or permit an original application;

"(3) for willful or repeated failure to operate substantially as set forth in the license;

"(4) for willful or repeated violation of, or willful or repeated failure to observe, any provision of this Act or any

(Continued on page 34)

ACLU

Asks FCC Action on 'Blacklisting'

CITING four networks and two stations specifically, the American Civil Liberties Union last week called upon FCC to conduct a general investigation of "blacklisting" in radio and television and to consider adoption of rules banning the practice [B•T, April 7].

The complaint also asked FCC to refuse to renew the station licenses of the defendants—NBC, CBS, ABC, DuMont, WPIX (TV) New York and KOWL Santa Monica, Calif.—until they take an oath against discrimination because of actual or alleged associations or beliefs, past or present, and agree to insert a similar no-blacklist clause in contracts dealing with programs prepared by advertisers, agencies or others.

The "general investigation and hearing" requested by ACLU would be designed "to determine (1) the extent of such discrimination and blacklisting in the radio and television industries and (2) which appropriate measures may be necessary, including the adoption of a general rule, pursuant to . . . the Federal Communications Act . . . to insure the immediate cessation of such blacklisting."

A letter accompanying the complaint to FCC appeared to question the legality of networks permitting advertisers and agencies to produce the programs they sponsor, whether blacklisting occurs or not, but officials told newsmen that they are not concerned with this question except as it relates to blacklisting.

Officials denied that the complaint, which was prepared with the assistance of former FCC Chairman James Lawrence Fly, was "a press agent stunt" to promote the book on which it was based: *The Judges and the Judged*, a report by author and ACLU board member Merle Miller on an investigation of blacklisting which, commissioned originally by ACLU, was published last week by Doubleday & Co. (See review, this page). The book was submitted to FCC as "Exhibit A."

Whether the Commission would undertake the probe could not be foretold. At least once before, it has refused to consider the problem. That was when Rex Stout, president of Authors League of America, called for FCC hearings on blacklisting during the turmoil surrounding release of Philip Loeb from *The Goldbergs* TV show [B•T, Feb. 18].

But ACLU officials felt that although it turned down Mr. Stout's request, FCC had "practically invited a complaint of this sort."

They noted that in his letter of notification to Mr. Stout, then-Chairman Wayne Coy had said that "any specific information which might establish that a licensee has surrendered responsibility for the operation of his station would be relevant" in license-renewal proceedings and that "you may therefore desire to bring any facts which you may have relating to specific stations and licensees to the Commission, so that it can be ascertained whether any matters within the jurisdiction of the Commission are involved." (The Loeb case

in review...

THE JUDGES AND THE JUDGED. By Merle Miller. Doubleday & Co., 575 Madison Ave., New York 22. 220 pp. $2.50.

THIS BOOK manages a successful effort in presenting a documented, objective case history of the so-called blacklists, allegedly circulated widely in radio and television offices.

It was compiled with the assistance of the American Civil Liberties Union, which sponsored this report on blacklisting and its effects.

In closing words of the book, Mr. Miller, a former writer for *Time* and *Harper's* magazines, makes this plea:

"Freedom is expensive. In wartime it is bought at the cost of lives; in peacetime the price must be paid in terms of coolheaded courage.

"It is a price that Americans have a right to expect the leaders of one of its basic industries to pay.

"We have a right to demand moral responsibility in radio and television as well as in government."

DEMO. CAMPAIGN

Joseph Katz Co. Named

MAJOR step in media planning by the Democratic National Committee for the '52 Presidential election campaign was taken last Tuesday with the appointment of The Joseph Katz Co., New York and Baltimore, as its advertising agency.

Preliminary discussions were held among agency executives and committee officials the following day to map plans for radio-TV time buying and other media programs.

While the national committee has given no concrete figure on proposed radio and television expenditures, the overall budget calls for between $1 million and $2 million during the campaign—or substantially more than for the 1948 elections.

Kenneth Fry, radio-TV director of the committee, is expected to confer with network authorities in New York this week. Cost problems and other factors will be explored.

The Katz agency will handle all timebuying allocated by the national organization, including national network and national spot commitments. State and city Democratic organizations will purchase time for local candidates at community levels.

TV Complicates the Picture

Television complicates the picture this year because of its expansion since 1948 and high costs. Because of the latter factor alone, radio-TV's share will be substantially greater than four years ago when roughly $700,000 was expended on radio-video broadcasting through Warwick & Legler.

Joseph Katz, president of the agency bearing his name, will supervise the account. Lloyd G. Whitebrook, vice president, and Robert Swan, radio-TV director, will assist Mr. Katz and work directly with the national committee. The appointment was effective last Tuesday, concurrent with the announcement.

It was emphasized that media planning is in the formative stage and that thinking on time purchases will not firm up immediately. The bulk of the media budget—the Democrats approved a total outlay of $2.8 million for the campaign—will go to radio-TV broadcasting, with the stress on post-convention activities.

Wednesday's agency - committee session was attended by Mr. Katz and half a dozen other executives from his company, Mr. Fry and other top-level committee officials.

Funds will be available on the state or county level for broadcasters. The Democratic National Committee will urge local groups to buy time for local candidates and broadcasters were urged at the NARTB convention to canvass local organizations for paid time segments [B•T, April 7].

Drawn for BROADCASTING • TELECASTING by Sid Hix

"The network wants to put a hitchhike on that 8 p.m. cowcatcher and sell it at daytime rates."

SELL-RADIO DISCS

Distributed by NARTB

FIRST transcriptions of the radio-promotion series authorized for station use by the NARTB were sent to all stations last week by Robert K. Richards, NARTB director of public affairs.

The first release had a subscription list of 250 stations. Only subscribers will receive future monthly transcriptions.

Titled "Radio on the Record," the transcription series was approved by the NARTB board last year on recommendation of President Harold E. Fellows, who conceived the idea. It is designed to use radio to sell radio, with prominent public figures depicting the medium's solid place in the American structure.

The initial disc carries radio-promoting announcements voiced by several political leaders, including Guy George Gabrielson, chairman, Republican National Committee; Mrs. India Edwards, vice-chairman, Democratic Committee; Sen. Edwin C. Johnson (D-Colo.), chairman of the Interstate & Foreign Commerce Committee, and FCC Chairman Paul Walker.

A quarter-hour script recalling radio's growth in the news field and its development into the world's leading news medium was voiced by H. V. Kaltenborn, commentator.

Long-playing 10-inch transcriptions were pressed by Columbia. Drex Hines was producer. Future releases will include leading figures in the business world and other fields. Discs will be available to stations at a cost of $2 each.

FULTON LEWIS FILES

Seeks New AM Outlet

FULTON LEWIS jr. applied to FCC last week for a new AM station.

He requested 1370 kc with 1 kw, daytime, and would construct the station at Lexington Park, Md., near his farm at Hollywood, Md.

Mr. Lewis reported that his net worth is "in excess" of $200,000, and that his annual earnings exceed $25,000. Mrs. Lewis has 5% interest in KJBS San Francisco, but he has no radio interests.

MBS Gross Up 11.1%

GROSS billings for Mutual during the first quarter of 1952 showed an 11.1% increase over the comparable period last year, according to a network statement issued Thursday. Total for the first three months of this year was given as $5,126,201.82 in contrast to last year's $4,617,598.72.

TV Allocations Supplement

AS A service to subscribers, and in keeping with our "full text" policy on all important news events, BROADCASTING • TELECASTING is publishing in complete text the FINAL TELEVISION ALLOCATIONS REPORT.

The ALLOCATION REPORT is being delivered WITHOUT CHARGE to the 16,000 subscribers as a supplement to the regular weekly BROADCASTING • TELECASTING. Extra copies of the PRINTED text will be available as long as the supply lasts, at $3 each.

STRIKE THREAT

ABC-NBC Newsmen Ask Fees

RADIO Writers' Guild served strike notice Tuesday—"this afternoon, tomorrow, or you guess"—after ABC and NBC networks refused to grant commercial fees to news writers.

Continuity writers at both networks might also walk out, it was said, although their question concerns rights to their materials, for which the companies now claim complete ownership.

Strike date remained unspecified late last week, although RWG spokesmen underlined the sincerity of their Guild's stand. General RWG membership has voted to support the strike and the Guild's parent body, Authors League of America, gave strike approval through its council. A possibility pointed out by RWG was that the League may direct all writers—including novelists, dramatists, radio and video authors—to withhold TV material from the networks since no general TV contract with writers is in effect yet.

Newswriters on non-sponsored newscasts first raised the question of commercial fees in 1943. Their argument is that actors and announcers get the fees by contract, that engineers automatically get the higher scale, and that newswriters are only ones not paid on commercial basis. Network representatives decried the duo-structure for sustaining and commercial shows and refused to extend the structure further.

A $300 weekly maintenance was reported by RWG as pledged to its members during the proposed strike, and Guild leaders hoped to add $1,000 a week more at the RWG membership meeting Thursday.

NBC and ABC would not comment.

RADIO HOMES

B•T Estimate on Target

ESTIMATES of Delaware radio homes by counties as of 1950 [B•T, Jan. 7], as compiled by BROADCASTING • TELECASTING, are almost identical with official figures released last week by the U. S. Census Bureau (see story and table on opposite page).

The B•T county figures for 1950 were compiled by applying Broadcast Measurement Bureau figures against the number of occupied dwellings in each of the nation's 3,070 counties. These dwelling figures were made available in December by the Census Bureau.

Comparisons of the Census Bureau's official 1950 radio homes figures for Delaware and the B•T estimates follow:

	U. S. Census	B•T Estimate
Wilmington*	72,565	72,734
Kent Co.	10,400	10,301
New Castle Co.	58,815	58,883
Sussex Co.	16,560	17,309

*Standard Metropolitan Area

CENSUS' RADIO HOME COUNT

Del. First State Released

THE NUMBER of radio homes in the State of Delaware rose from 59,921 in 1940 to 85,775 in 1950, according to official U. S. Census figures. This represents 96.2% saturation in 1950 compared to 87% in 1940.

First of a series of state reports showing radio and television homes by cities and counties was made available last week by the U. S. Census Bureau. The data are based on radio and TV set ownership as of April 1950, when enumerators took the 1950 Census (see attached table).

The state had 20,405 television homes as of April 1950, according to the Census, showing 23% of all occupied homes in the state had television service at that early moment in TV history. Fewer than 5 million TV sets were in use at the time the Census figures were gathered, compared to 16,761,000 at present.

Release of the Delaware figures starts a flow of state radio-TV Census data, giving city and county radio as well as television homes. The state reports will be completed by mid-December, according to the present Census Bureau schedule.

"Release of the statewide radio and television reports will give advertisers, media and marketing organizations a true picture of broadcasting and TV circulation as of April, 1950," Dr. Roy Victor Peel, Director of the Census, told BROADCASTING • TELECASTING.

Figures Trace Growth

"In the case of television the 1950 Census provides benchmark figures that will help trace the growth pattern of this fast-developing medium. The figures showing the number of radio homes by states, counties and cities reflect a national increase in radio saturation from 91.9% in 1940 to 95.6% in 1950."

The radio-TV figures are included in tables showing diversified information on housing facilities in the nation, state by state, according to Robert C. Hamer, Chief, Quality & Equipment Statistics Section, Population and Housing Division.

Radio-TV statistics were based on a 20% sample, one out of each five returns used by enumerators having the radio-TV questions. This large sample is believed to involve only infinitesimal danger of error, giving a high degree of accuracy. In Delaware, for example, all but 1,200 of the 90,390 occupied dwellings are represented in the radio homes data, with 85,775, or 96.2% reporting radio set ownership.

The official Census data do not include extra radio sets in homes nor do they show non-home sets in autos, offices, stores, other places of business and non-home structures.

At the time the 1950 Census was taken, the bureau had anticipated the state radio-TV figures would be available within 12 months, or spring of 1951. Pressure of high-priority government work and need of countless re-checks to insure accuracy are understood to have been mainly responsible for the one-year delay in release of the figures.

The 1950 nationwide radio homes data, as released by the Census Bureau, showed a total of 40,093,000 U. S. homes equipped with radio receivers as of April, 1950 [B•T, June 11, 1951]. This represented 95.6% saturation.

As of Jan. 1, 1952 there were 42,427,000 radio homes in the nation, according to an estimate by BROADCASTING • TELECASTING [B•T, Dec. 31, 1951]. This estimate was based on the Census Bureau's official 95.6% radio saturation figure (as of April, 1950) applied against the bureau's estimate of 44,380,000 occupied dwellings at the start of 1952. By adjusting the 95.6% saturation figure upward to show the increase of radio homes since spring of 1950, it was estimated the number of homes actually had reached 43,000,000 as of Jan. 1, 1952.

The number of radio homes in the nation in 1950, by standard metropolitan areas, was estimated last December by BROADCASTING • TELECASTING [B•T, Dec. 31, 1951] by applying Broadcast Measurement Bureau percentages against new Census Bureau figures showing the number of households in 1950.

RADIO AND TELEVISION—1950 U. S. CENSUS OF HOUSING — DELAWARE

SOURCE: Tables 13, 20, 27 Series H-A8 (and P-A8)

Sussex	61,336	18,408	17,930	16,560	92.4	11,194	17,765	665	3.7

*Figures not available or not comparable with 1940 Census data.

THE STATISTICS in this table are extracted from a final report of the 1950 Census of Housing, Series H-A, No. 8, for Delaware, which will be available in about six weeks from the Superintendent of Documents, Washington 25, D. C., at 30¢ per copy.

Statistics on distribution of the population in Delaware are presented in a final report of the 1950 Census of Population, Series P-A, No. 8, now available from the Superintendent of Documents at 15¢ a copy. Descriptions and maps of "urbanized areas" are presented in this report.

Statistics on characteristics of the population in Delaware are presented in a final report of the 1950 Census of Population, Series P-B, No. 8, available from the Superintendent of Documents, at 30¢ a copy. Descriptions of Standard Metropolitan Areas are presented in this report.

A Standard Metropolitan Area is generally described as a county or group of contiguous counties with at least one city of 50,000 or more. In New England, it is defined on a town or city rather than county basis.

An urbanized area contains at least one city of 50,000 or more and includes surrounding closely settled incorporated and unincorporated areas.

County estimates were compiled similiarly [B•T, Jan. 7].

In starting the flow of state-county-city radio-TV homes data, the Bureau includes the following area classifications: State, urban and rural nonfarm; urban; rural nonfarm; rural farm; standard metropolitan areas; urbanized areas; cities and counties. The urbanized area figures were not compiled in the 1940 Census.

Highest saturation rate for radio homes in Delaware was found in urban or city areas, amounting to 97.7%. Lowest rate was in rural farm areas where it was 91.3%.

In Wilmington and nearby thickly populated areas there were 51,210 radio homes out of 52,807 occupied dwelling units, a rate of 98.1%. New Castle County, including Wilmington, had a saturation rate of 98%. Kent County had 92.7% and Sussex, the third county, showed a rate of 92.4%.

The Wilmington metropolitan area, including counties immediately surrounding the city showed 72,565 radio homes out of 75,075 occupied dwelling units, a rate of 97.6%.

On a statewide basis, Delaware's 23% TV saturation in the spring of 1950 compares with 33.3% in Wilmington and nearby thickly populated areas, at that early stage of TV's development when TV circulation on a national basis was less than a third of the current circulation.

ARF REACTIVATED

Kobak Elected President

ADVERTISING Research Foundation, semi-dormant all-advertising project, set out last week to attain a prominent role in the media world by starting work on four studies and electing Edgar Kobak, consultant, as president.

Mr. Kobak

Mr. Kobak, long a leading figure in the media and advertising industries, was picked by the ARF board at a Thursday meeting to direct the cooperative organization in its effort to improve advertising research and techniques. (As predicted in CLOSED CIRCUIT, March 24.)

American Assn. of Advertising Agencies and Assn. of National Advertisers have thrown their weight behind ARF, with individual media also lending their support [B•T, April 7, March 24].

The foundation already has over $125,000 in subscription income from 56 agencies, 45 advertisers and 21 media. CBS is the only broadcast member announced to date.

Basic objectives are to provide a set of research standards acceptable to the whole industry and to stimulate new techniques in advertising.

B. B. Geyer, chairman of the ARF board, announced election of Mr. Kobak following the board session.

"Appointment of Mr. Kobak as president of the foundation marks a major step forward in the new expansion program of the recently reconstituted foundation," Mr. Geyer said. "His extensive experience in business, advertising and media will be most helpful in extending the work of the foundation in better serving the advertising industry."

The new president will initiate

(Continued on page 36)

AWRT MEET

Citizenship Project Approved

THREE hundred women from all parts of the country gathered at Detroit for the first national convention of the American Women in Radio & Television, April 4-6 and all agreed that a firm step had been taken in accomplishing the organization's aim: To enable women to make a greater contribution to their industry, their station and to their own well-being.

The convention opened Friday afternoon at the Statler Hotel with a brief introduction by Edythe Fern Melrose, WXYZ Detroit, convention chairman. Gov. G. Mennen Williams made a welcoming talk and AWRT National President Edythe Meserand then addressed the group.

Before the convention opened, the national board of directors approved the first national project to be undertaken by AWRT. It will be a good citizenship project for women, to be titled "Are Women First Class Citizens?"

Material will be furnished by the Project Committee to AWRT members, enabling them to enlist the active support and understanding of the women in communities throughout the United States, to inform them of their citizenship responsibilities as women, and to stress vigorously how important they can be in the scheme of things.

Reform For Future

AWRT leaders expect this project to be very influential, in years to come, in overcoming corruption, unsatisfactory school conditions, juvenile delinquency, poor housing and generally raising living standards.

Saturday was devoted to a series of five panel discussions on different phases of telecasting and broadcasting.

In "You Gotta Have Vision in Television," chairmanned by Miss Melrose, the problems faced by a TV director, a TV network executive an advertising agency official and the operator of a small television studio were discussed. Each field was covered by someone in that field who explained how his or her problems was solved.

Esther Van Wagoner Tufty, a Washington syndicated radio news writer, led a discussion labeled "Why Not More News" in which several speakers gave their views on how radio and TV news programs could be broadened and improved. At this panel, President Meserand, a newswoman with WOR New York, explained the need of unbiased, accurate and concise news reports.

The leading address in the panel discussion "How to Sell . . . and Sell . . . and Sell" was made by Stephen Douglas, director of sales of The Kroger Co., Cincinnati, O.

Speaking at the panel "Meet the Agencies," Ann I. Gleason, owner of the Gleason Advertising Agency in Detroit, listed five "dont's" for women in TV and radio: (1) don't pack your program with too many commercials; (2) don't take a product on your program unless you believe in it; (3) don't take competitive products without allowing a reasonable time to elapse between them; (4) don't let your programs become stereotyped; (5) don't pass your fan letters on to the sponsors without answering them.

She also urged women in radio to sell their bosses on not getting panicky about the present competitive situation because the tendency to cut rates, special deals and agency-by-passing can lead to destruction.

In the discussion "The Public Be Served," Henriette Harrison, radio-TV director of the YMCA and YWCA in New York, urged her listeners to be schizophrenic, altruisitic and commercial at the same time, by participating in community organizations as much as possible.

"Ten who became tops" was a novel feature of the convention. Miss Melrose introduced 10 of the most successful AWRT members who spoke briefly.

The ten were: Gladys Blair, radio-TV account executive, Young & Rubicam, Chicago; Kathleen Lardie, WDTR Detroit; Agnes Law, CBS librarian, New York; Elizabeth Marshall, assistant director, WBEZ Chicago; Christine Miller, General Foods Corp., New York; Bette Doolittle, assistant to the director of TV, NARTB; Joyce Smith, WDSU-TV New Orleans; Josephine Wetzler, director of education, WLS Chicago; Geraldine Zorbaugh, legal counsel, ABC, and Norma Young, KHJ Hollywood.

Assistant Secretary of Defense Anna M. Rosenberg sent a message of congratulations to AWRT, cited the growth and progress of its first year as an organization. Noting the "splendid record of service to the nation" by AWRT, Mrs. Rosenberg said: "We of the Defense Dept. are deeply grateful for the support and cooperation we have always received from your members."

The seven winners of the McCall Mike awards selected for outstanding public service. were honored at the McCall award dinner Saturday night. Dr. Hale Aarnes, director of education in radio and television at Stephens College, Columbia, Mo., was dinner speaker on "The Undefined Impact."

At the convention's conclusion the AWRT national officers for the coming year were announced. Elected president was Doris Corwith, supervisor of talks and religious broadcasts for NBC. She is a past national president of the American Legion Auxiliary. New secretary-treasurer is Jane Dalton, director of women's programs, WSPA Spartanburg, S. C.

The four new area vice presidents are Dorothy Fuller, WBET Brockton, Mass.; Alice Sieberg, WCYB Bristol, Va.; Elizabeth Marshall, WBEZ Chicago, and Molly Morse, KGB San Diego.

POLITICAL TIME

Overcharging Is Hit By Rep. Mansfield

LEGISLATIVE whip may be cracked against stations which overcharge political candidates for their advertisements, Rep. Mike Mansfield (D-Mont.) cautioned Thursday.

He thus revived a complaint he made in December 1950 when he was chairman of the House Special Campaign Expenditures Committee [B•T, Jan. 15, 1951, Dec. 4, 1950].

At that time, the committee scolded certain broadcasters for charging higher rates for political advertising than for commercial advertising. NARTB (then NAB) immediately re-routed the congressman's complaint to stations. The NAB board adopted a resolution calling for the desist of such practices by stations and sent a copy of the resolution along with a statement by Judge Justin Miller, then president and now chairman of the NARTB board, to individual broadcasters.

Rep. Mansfield, however, brought the subject up again in a speech on the floor of the House warning that he "was studying legislation" in this regard. As he put it to BROADCASTING • TELECASTING later, the legislation would be directed against those stations "who charge twice as much" for political advertisements as they do for commercial advertisements.

The campaign expenditures committee, he said, had been concerned with it in its final report in 1950. While he would not specify whether new complaints of so-called rate overcharging had been received by his office, Rep. Mansfield pointed out that he remembered the "prompt" action taken by NARTB in warning stations.

Repeals Hatch Act

His speech was delivered as he introduced a bulky bill designed to amend the Federal Corrupt Practices Act. The measure (HR 7488) would repeal the Hatch Act and make it mandatory for candidates and persons spending money on behalf of candidates to reveal the amounts spent and register with an election government agency, Office of Election Records.

A catch-all bill, the new elections law proposal would affect political advertising on the airwaves indirectly, i.e., make mandatory upon candidates and persons supporting candidates to keep records and file amounts spent for radio-TV time. It would cover not only national elections but also primaries and nominating conventions.

Expenditures and contributions would be publicized through the press to the American people, Rep. Mansfield told his colleagues. It would repeal the "absurdly low financial limitations which have existed since 1925 and which are one of the main reasons for the continual evasion of the statutes by candidates."

Rep. Mansfield asked for an immediate hearing from the House Administration Committee to which the bill was referred. It's "time for Congress to put its own house in order," the congressman emphasized, noting that his measure was being offered when corruption was an issue in government.

AT formal opening of the American Women in Radio & Television convention April 4-6 at Detroit's Statler Hotel were (l to r) Edythe Fern Melrose, WXYZ Detroit, convention chairman; Gov. G. Mennen Williams; Edythe J. Meserand, national president, and Dorothy Fuller, WBET Brockton, Mass., past secretary-treasurer and elected an area vice president.

N.Y. AMA-SEC Clinic

N. Y. CHAPTER, American Marketing Assn., in cooperation with the Sales Executive Club of New York, will conduct its 1952 merchandising clinic April 29-30 in New York's Hotel Roosevelt. Conference will include panel discussions and business sessions on such topics as robot selling, media merchandising, co-op advertising, contests, test markets, and retailing trends. Joint luncheon meeting with the Sales Executive Club will be held April 29, with a closing luncheon following day.

SPRING BUSINESS

Radio, TV Report Rise

SPRING activity in both radio and TV took an unexpected leap last week.

One advertiser, Manhattan Soap Co. (Sweetheart soap), decided to drop its alternate-week NBC-TV show and put the budget into a radio campaign of news and spot announcement schedules, to be placed on a local basis. The agency, Scheideler, Beck & Werner, New York, currently is lining up availabilities in major cities to start May 12 for approximately 13 weeks. The soap firm may return to TV next fall but plans are still indefinite.

Manhattan drops its *One Man's Family* on NBC-TV (Sat., 7:30-8 p.m., alternate weeks) despite the high rating of the program, reportedly because it is unhappy with the time period. Meanwhile, Miles Labs will continue to sponsor alternate weeks and NBC, which owns the show. Network expects to line up another sponsor shortly.

At least three advertisers are understood to be interested in the television version of *Our Miss Brooks*. Colgate - Palmolive - Peet, which has first option on the show and also sponsors the radio version on CBS Radio, is expected to make a decision early this week. Both General Foods and American Tobacco Co. are said to be interested in taking over the TV version, if Colgate turns it down.

Benny Replaced

American Tobacco Co. will replace the *Jack Benny Show* on CBS Radio (Sun., 7:30-8 p.m.) for the summer season with *FBI in Peace and War*. Mr. Benny will return to the time period in the fall for Lucky Strike cigarettes. The talent cost on the show will be cut from $25,000 weekly to $18,000 in the new fall contract, it was understood. BBDO, New York, is the agency.

General Foods (Jell-O), which had been considering sponsorship of Edgar Bergen on CBS-TV, has definitely decided not to take the program.

Gulf Oil Co. for its Gulf Spray insecticide is considering a 16-week summer radio series of 2½- to 3-hour Sunday afternoon shows on CBS Radio, featuring a disc jockey. Deal late last week was still in the negotiating stage because the telephone strike had held up station clearances. The show would feature recorded and live music, with local cut-ins for reports on local weather, traffic conditions, etc. Gulf is expected to reach a final decision this week. Young & Rubicam, New York, is the agency.

Realemon-Puritan Co., Chicago (Lemon Juice), will pick up sponsorship of the 10-10:15 a.m. segment of the *Arthur Godfrey Show* on CBS Radio, which has been sponsored by Ovaltine, on May 5. Schwimmer & Scott, Chicago, is the agency.

B. F. Goodrich Co. is following the trend of sharing TV expenses via alternate - week sponsorship, with its decision to take over the George Burns and Gracie Allen TV show every other Thursday, starting next fall. Carnation Co., Los Angeles, which currently sponsors the show on alternate Thursdays, has renewed effective Oct. 2 for another 52 weeks through Erwin, Wasey & Co., New York. BBDO, New York, is Goodrich agency.

W&W DISSOLVED

Mark Woods to Retire

DISSOLUTION of the advertising agency of Woods & Warwick, New York, which was organized last fall, was announced last week.

One of the partners, Mark Woods former president and vice chairman of ABC, has retired to live in Sarasota, Fla., while the other, J. R. Warwick, joined Kenyon & Eckhardt, New York, as vice president and general executive.

Before forming his own agency with Mr. Woods, Mr. Warwick was vice president and director of Warwick & Legler, where he served such accounts as Sherwin-Williams, Vick Chemical Co., Motorola and others. He is chairman of public information of the United Negro College Fund and a member of the board of governors of the Dartmouth Club of New York.

Mr. Woods had been vice chairman of ABC for one year prior to formation of the agency and formerly had been president of the network since its inception in 1942. Before that Mr. Woods was with NBC, which formerly operated the network, as vice president and treasurer. He originally moved to the network from AT&T in 1926.

New Post For LeVally

NORMAN W. LEVALLY who retired from the agency business a year ago with dissolution of LeVally Inc., Chicago, has joined MacFarland-Aveyard, same city, as manager of the business development department. LeVally Inc. handled 12 accounts with a 4½ million yearly billing. Mr. LeVally also worked as an account executive at Leo Burnett Agency.

CUBAN NETWORK

Edmund Chester Heads $1 Million Purchase

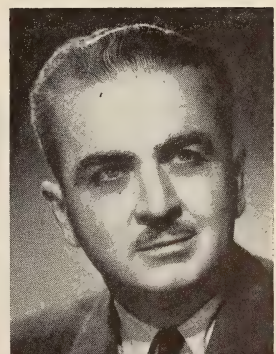
EDMUND CHESTER, veteran CBS news executive, becomes quarter-owner and general manager of RHC-Cadena Azul under a million dollar cash transaction consummated last week, whereby a new joint Cuban-United States company takes over the operation from the Amando Trinidad interests.

Mr. Chester, director of news and public affairs for CBS Radio and well-known in Latin American radio and TV circles, left New York Saturday for Havana where formal transfer of the properties will take place.

RHC is a network of 10 standard broadcast stations covering the islands, plus two international shortwave stations. Six TV channels already have been allocated and Mr. Chester said the plan is to get their construction underway immediately. It is understood his salary will be in the neighborhood of $100,000 a year and that he also will acquire an interest in a related set manufacturing project.

Mr. Chester said he could not identify the American interests but he described them as businessmen and private investors, not now identified with broadcasting in this country. The Cuban interests are represented by Gaspar Pumarejo, former part owner of Union Radio, which placed CMUR-TV on the air in October, 1950—Havana's first TV station.

Don't Confuse With Roosevelt



Mr. Chester told BROADCASTING • TELECASTING that the transaction is not to be confused with reports of plans of Elliott Roosevelt to enter the Cuban radio-TV field. He said his transaction was not consummated until the Roosevelt negotiations had been concluded.

A close personal friend of General Fulgencio Batista, Mr. Chester said the Cuban president is not identified with the new ownership. He had discussed the matter with Gen. Batista, however, after the leader's *coup d'etat*, and he said the Cuban executive thought the transaction "would be a good thing." It was learned that Gen. Batista, during his exile from 1944-49, spent considerable time with Mr. Chester in this country.

RHC, radio-wise, has been the top competitor to CMQ, the Goar Mestre network. CMQ, besides its key TV station in Havana, recently began operation of two additional outlets and likewise holds construction permits for an aggregate of six stations.

Mr. Pumarejo will be president of the new company, with Mr. Chester as general manager, part owner and operating head.

Mr. Chester plans to return to the United States following the meeting today (Monday) at which the transaction will be concluded. He will return to Cuba as soon as his affairs at CBS Radio can be delegated. It was expected that Wells Church, news editor-in-chief, will become acting head of CBS Radio news and public affairs.

Mr. CHESTER

Mr. Chester first went to Cuba in the early '30s to cover a Cuban revolution for Associated Press. That assignment in Havana, taken on only six hours notice, was the beginning of a career as foreign correspondent. During the succeeding eight years, Mr. Chester traveled some 250,000 miles and distinguished himself as a reporter of Latin American events.

In November 1940, he was named director of Broadcasting to Foreign Countries for CBS. In 1948, he became CBS director of news and special events. A native of Louisville, Mr. Chester is in his mid-50s. He served in 1915 under the late Gen. John J. Pershing in the Mexican Border Expedition and also is a World War I veteran.

ATOMIC TESTS

Networks Plan Coverage

MAJOR networks are planning to send as many representatives as they are allotted for the Atomic Energy Commission's "developmental activities on the weapons program"—and atomic blast—to be conducted in Nevada April 21.

ABC announced that it will attempt to bring both radio and television audiences on-scene reports of the tests and has assigned network engineers to study transmission and recording problems.

NBC television news last week scheduled its own films of the blast for 11:15-11:30 p.m., EST, April 22. Special camera crews are to rush their work to NBC West Coast television headquarters in Hollywood for processing and telecasting.

Mutual Broadcasting System spokesman said their network would carry on-scene broadcasts, if possible, or at least would have taped descriptions on the air as soon as they were passed by security checkers.

CBS Radio assigned Commentator Robert Trout as their witness of the tests, where media representatives and civil defense officials are to be admitted on a quota basis.

Plans of other radio and television networks had not been completed at the end of last week.

INFO. PERSONNEL

Radio-TV Funds Attacked

PUBLIC information personnel of the Defense Dept. drew fire again last week on Capitol Hill as House members lashed out at use of funds for radio and television programs.

Despite these criticisms, the House voted down a proposal to delete $312,000 recommended by its Appropriations Committee for the department's Office of Public Information. The overall fund cuts may mean a reduction of 75% in defense personnel and 50% in each of the services—Army, Navy and Air Force [B•T, April 7].

Rep. Pat Sutton (D-Tenn.) labeled OPI activities as "propaganda" consisting of "radio programs, with movie stars, and so forth on television at the taxpayers' expense." Rep. Sutton was advised that he unwittingly had reference to "recruiting" or perhaps the OPS' *Stars for Defense* series.

Rep. H. R. Gross (R-Iowa) injected that many performers "are paid $75 an hour, when most of the people who watch television and listen to the radio programs think they are contributing their services." He said he found no limitation in the defense bill "which would prohibit any branch of the service from paying . . . for the services of actors, singers, musicians, sports broadcasters, announcers, news commentators or script writers."

ITU TO CONVENE

Geneva Meeting Planned

SEVENTH session of the Administrative Council of the International Telecommunication Union will convene in Geneva, Switzerland, next Monday, with Francis Colt de Wolf serving as U. S. representative.

Mr. de Wolf, chief of the State Dept.'s Telecommunications Policy Staff, will be accompanied by Helen G. Kelly, also of the policy staff; Donald C. Blaisdell, U. S. representative in Switzerland, and Wayne Mason, U. S. telecommunications attache for the American legation at Bern.

The council, which comprises 18 ITU members, will discuss administrative and fiscal operations of the union in preparation for the Plenipotentiary Conference at Buenos Aires this October. A major council function is to insure efficient coordination of all ITU work.

Richter Appointed

EDWIN C. RICHTER Jr. has been appointed general manager of WKRC-FM Cincinnati, Transit Radio outlet, according to David G. Taft, managing director of Radio Cincinnati Inc., licensee of WKRC-AM-FM-TV. He succeeds Robert F. Bender, who has transferred to the sales department of WKRC-TV. Mr. Richter has been a WKRC-FM account executive since September 1950.

ATTENDING luncheon-meeting in preparation of campaign of the Elliott-Lewis Corp., Philadelphia, to sponsor five news shows weekly over WCAU there are (seated l to r) Donald W. Thornburgh, WCAU president-general manager; R. F. Pettet, vice president, Elliott-Lewis Appliance Div., and T. H. Lewis Jr., Elliot-Lewis president-board chairman; standing (l to r) are Charles Shaw and George Lord, WCAU newsmen; Earle Dietrich, account executive, Joseph Lowenthal, Adv. and Alan Scott, WCAU newsman.

DEFENSE BUDGET

Hill Cuts May Halt Paid Advertising

CONGRESS last week wielded its economy axe over military recruiting operations, with the prospect that virtually all paid radio-TV and other advertising funds may be eliminated after July 1.

The House of Representatives took a dim view of voluntary recruiting activities and lopped off a sizable chunk for Army maintenance and operation, under which recruiting monies fall. Personnel procurement authorities for both Army and Air Force thus are faced with the prospect of restudying the overall recruiting program and distributing the cuts down the line—providing the Senate goes along with the lower chamber.

Authorities noted that the axe was not aimed at advertising *per se* but the Defense Dept.'s personnel program as a whole. But, in any event, the combined Army-Air Force budget of $1,050,000 is certain to suffer unless the cut is restored.

Air Force recruiting officials said the reduction would mean "considerable curtailment of voluntary recruiting methods and perhaps complete elimination of the advertising program."

According to best estimates, overall recruiting monies of $12.5 million would be cut to the bone. The Air Force pointed out it would suffer more than the Army, which still receives manpower through selective service. The proposed $1,050,000 was earmarked for radio, TV and other media in fiscal 1953. The ad split is 60% Army and 40% Air Force.

The House Appropriations Committee had recommended that recruiting be pared $2 million. The lower chamber lowered the boom in adopting an amendment by Rep. Leroy Johnson (R-Calif.) to pare Army maintenance and operation $135.6 million out of the budget request of $4.5 billion. Another amendment completed the job, chopping pay and allowances for field recruiting stations 75%.

Last week's action, taken during debate on a Defense Dept. appropriations bill (HR 7391) aggregates an already bruised condition in which recruitment advertising has found itself in recent months [B•T, April 7].

When the current interim ad allocations program for radio-TV broadcasting and other campaigns expires, personnel procurement authorities will find the money cupboard bare. An estimated $2 million-plus of '52 funds is still frozen by Congressional mandate. The interim program is financed from '51 monies of which another $170,000 is tied up [B•T, Feb. 1].

In hearings before a House Appropriations subcommittee, Maj. Gen. G. H. Decker, Army Dept. budget division, pleaded that the freeze on current ('52) funds has curtailed local radio expenditures and "made the task of obtaining public service newspaper and radio support much more difficult." Congress has taken no action yet to rescind the ban.

An Air Force official, on the other hand, assured Congress that "we will try as far as we can go with free advertising—free space, free time" in carrying out the '53 campaign. The program called for radio and television spots "where we think we can get the best results," according to Brig. Gen. Omar O. Niergarth, chief, Military Personnel Procurement Service, USAF.

An MPPS authority acknowledged last week that "we will probably have to go on bended knee to all media" to sustain the program.

Morgan Returns

EDWARD P. MORGAN, after more than a year at the Office of Price Stabilization, leaves the government agency April 15 to return to the Washington law firm of Welch, Mott and Morgan. Mr. Morgan was national director of enforcement for the agency.

TUBE OUTPUT

Defense Orders Needed

MANY manufacturers of transmitting tubes will need additional defense orders to continue normal operations this fall, the government was told last Tuesday.

A special advisory group met with George Henyan of National Production Authority's Electronics Division, and other officials to discuss production needs.

Committee members reported some shortages of certain tube types for non-military demands but indicated that, in the main, sufficient materials have been made available to industry. Present and proposed plant facilities should meet production needs for both transmitting and special purpose tubes, NPA was advised.

Representatives of General Electric Co., Raytheon Mfg. Co., RCA, Western Electric and other firms were told that no substantial relaxation of controls is in sight [B•T, April 7]. Copper will continue scarce another year and the nickel situation will remain acute even longer. There will be sufficient copper to meet current second-quarter needs, however.

The session was called during the heat of the steel dispute last week. The government promptly froze steel supplies deliveries for civilian needs to conserve vital stockpiles for defense.

While the strike failed to materialize, production was set back by the mantling and dismantling processes at the steel companies. There were estimates that TV set production would be cut about a million receivers if it had come off. The freeze on civilian goods using steel will be maintained only long enough to permit withdrawal of stocks for defense production.

Aside from receiver production, TV broadcasters are pinning their hopes for new station construction on availability of structural steel late this year and in 1953.

NBC COMEDY PLAN

Introduced in N. Y.

NBC's Comedy Development Plan to build new comedians, new writers and new material for television has been introduced in New York studios, with the first of a series of bi-weekly revues staged for an audience of NBC executives, TV directors and program producers.

Produced by William Gargan Jr., the revues are not telecast and are actually auditions intended to introduce new talent and test new comedy possibilities, according to Joe Bigelow, producer of NBC-TV's *Royal Showcase*, who is also in charge of the development plan. The comedy tests are the first phase of an over-all talent development scheme, ultimately to include the NBC tryout theatre and the NBC variety theatre on broadway, he said. Results of comedy development should be offered on the NBC-TV network starting this summer, Mr. Bigelow added.

RADIO HELPS AP

Newsgathering Cited

ASSOCIATED Press services in the U. S. and 72 other countries were channeled to a total of 5,564 outlets by the end of 1951—with domestic radio membership alone having increased by 58 to a total of 1,126—according to a year-end report by the AP general manager, made public last Friday.

Domestic newspaper members increased by 13 to 1,733, and outlets for the news, radio and picture report outside the United States rose by more than 200 to reach 2,705.

Speaking of the radio news service—as distinguished from domestic and world newspaper service, newsphotos, features, *etc.*—the report said that, since it was impossible to give over the radio wire to individual requests for specialized coverage, radio service would operate "on the basis of the greatest good for the greatest number of subscribers."

Some station members, it was noted, had sought only football scores and game details on Saturdays during the fall, even to the exclusion of all general news, and there had also been requests for baseball play-by-play coverage and fights, round-by-round. Other stations had requested extensive coverage of special events lending themselves to sales of programs, such as the Japanese peace conference at San Francisco.

Seeking Greater Coverage

State meetings of radio members, the report continued, persisted in seeking greater coverage of the particular areas on Sundays. "Fundamentally," the general manager observed, "they are looking for something that does not exist, since people's normal activities do not make news Sunday mornings." AP tried to expand its Sunday coverage with long-distance telephone calls and telegrams, however.

General news coverage was aided and increased throughout the year by participation of radio members, it was said. Cooperation of most of the 162 radio members in localities where there are not newspaper members was particularly cited as "of noteworthy value."

Possibility of regular AP membership for qualified radio stations, suggested by the AP board of directors as early as 1950, was discussed with newspaper members and various state groups throughout the year, the report indicated, "but no definite conclusions were reached."

Radio subscribers — quoted as praising AP services highly and criticizing harshly — indicated a marked preference for straight, factual news reports and omission of slang from radio news wire, although an occasional colorfully written feature story drew member praise, it was noted. A usual criticism was that women's scripts were overly specialized, that rural radio listeners had no interest in recipes for avocado salad or in Paris styles.

Radio members of AP continued to form state associations, according to the yearly review, with a new group formed in New Mexico to bring the total to 36 state groups which cover the geographical areas of 46 states plus the District of Columbia and Alaska.

The report noted that Tom O'Neil, radio news editor of AP for 11 years, retired and was succeeded in late December by John A. Aspinwall, former general early news editor.

COLLEGE RADIO

Discussed at IBS Clinic

COLLEGE radio is still largely an untried advertising medium which should develop more facts about itself and its market but which the sponsor will be ready to use when its proves itself, an Intercollegiate Broadcasting System sales clinic was told April 4 at Columbia U., New York.

The speaker was James C. Bowling of Philip Morris & Co.'s college sales department, who outlined both advantages and disadvantages of advertising via the wired-radio campus stations.

Thomas F. Clark, national representative for the IBS group, reported "reasonable success" in sales of spot announcements, but emphasized the need for developing programs to offer agencies as well as for more audience and market data. "We are beginning to get the medium across to the advertisers," he asserted.

Other speakers in the IBS weekend sales and promotion clinic included Leslie T. Harris, radio-TV director of Colgate-Palmolive-Peet, who stressed the importance of public relations and publicity and also noted the value of campus radio experience as an "entree into radio"; Roy C. Porteous, NBC-TV account executive, who discussed "The Television Salesman"; J. Donald Foley, WCBS New York advertising and promotion director, who outlined station promotion needs and tools, and Samuel Kaufman, NBC press dept., who sketched NBC's activities in the various fields of publicity.

'POLITICAL' ADS

Humphrey Seeks Curb On Deductible Tax

FRONTAL attack on institutional advertising was promised by Sen. Hubert H. Humphrey (D-Minn.) last week which may add steam to a brewing fight on Capitol Hill with the advertising industry.

It was learned by BROADCASTING • TELECASTING that the Senator is engaged in consultation with the Bureau of Internal Revenue in an effort to determine how so-called "political" institutional advertising can be eliminated as a deductible tax expense by corporations.

This new development followed Sen. Humphrey's broadside against "political" institutional advertising in a speech on the Senate floor [B•T, April 7].

At present, the bureau's policy is to permit institutional advertising to be deducted as an expense providing the amount spent is "reasonable" in comparison with the firm's advertising budget of previous years.

Sen. Humphrey would have the bureau tighten this policy and crack down on firms which use so-called "political" advertising and mark off this expense in their income tax returns.

Over the weekend of April 5, Sen. Humphrey's Senate Small Business Subcommittee on Newsprint released a report of a study made on the problem of newsprint supply.

In the report, the subcommittee concluded that "postal subsidies and tax regulations tend to stimulate advertising that may be unnecessarily extravagant and not particularly productive. Possibly our government can give more consideration to its postal rates and tax regulations."

May Turn to Legislation

Sen. Humphrey reportedly has made his plans to first consider institutional advertising as a field where corrective administration can be applied. If the bureau is unable to tighten its hand under the law, the Senator will look into the possibility of clearing a path for the bureau through legislation.

A sentence in the report, reading: "Large publishers might help to alleviate the situation [of newsprint shortages] by voluntarily adjusting and increasing their advertising rates so as to discourage extravagant use of newspaper space for advertising," already has been disavowed by the Senator [B•T, April 7].

Sen. Humphrey said he had not been aware this language was in the report and in any case it had no business being in the report.

Should the Senator be successful in forcing the hand of the bureau in cracking down on "political" institutional advertising, the ruling would affect the funneling of ad budgets in both radio and television as well as in the printed media.

The report was delayed on Capitol Hill for a week. One paragraph was deleted when Sen. Andrew F. Schoeppel (R-Kans.) said he would criticize sections of the report which blamed the newsprint shortage on increased advertising.

Further Explanation

In the report, the Senate committee recommended legislation for the formation of publisher-owner cooperatives for the manufacture and distribution of newsprint.

In further explanation of why the Senator is against higher advertising rates, an associate explained last week that the "little fellow" would be squeezed out of the picture.

While he is not against the practice of a corporation or any person advertising in order to expound political views, Sen. Humphrey said "it is not a legitimate business expense. It has nothing to do with the product sold by a corporation. . . ."

WISMER TO LEE

To Help Guide Expansion

HARRY WISMER, radio - TV sportscaster and commentator, has joined the Thomas S. Lee Enterprises in a general executive capacity, President Thomas F. O'Neil announced Thursday.

Mr. Wismer will be assigned to work on the new and expanded program of the O'Neil radio and television stations, including WOR-AM-FM-TV New York, and the Mutual Yankee and Don Lee radio networks, and later this month will start his own series of sports broadcasts on WOR. The five-times weekly program will be sponsored by General Tire & Rubber, of which Mr. O'Neil is vice president. The sportscaster will also develop a sports feature on WOR-TV in the future, and will continue with his reporting of major athletic events, the announcement said.

Mr. Wismer had been associated with ABC as a member of its sports division and then on a free lance basis until last fall, when he moved his New York offices from ABC quarters and assumed independent operations.

HERE IS signing for new show, *Private Files of Matthew Bell*, starring actor Joseph Cotton, on MBS (4:30-4:55 p.m., Sunday), sponsored by Seabrook Farms Inc., Bridgeton, N. J. This is firm's first use of national radio. L to r: Jack Seabrook and Courtney Seabrook, vice presidents of firm; Mr. Cotten, and Frank White, MBS president.

1881 Philip J. Meyer 1952

PHILIP JOHN MEYER, 70, founder and owner of KFYR Bismarck, N. D., died April 6 following a heart attack at his winter home in Miami Beach, Fla.

Mr. Meyer, also president of the Meyer Broadcasting Co., licensee of KFYR, founded the station in 1925. He reportedly was one of the first three persons to get a station license from ex-President Herbert Hoover, who was then Secretary of Commerce. The Dept. of Commerce then governed radio.

KFYR grew from a one-man operation to its present stature as a 5 kw station on 550 kc. From the outset, Mr. Meyer aimed at improving Canadian-North Dakotan relations, once strained.

So successful was this effort that in 1932 a delegation from Winnipeg went to Bismarck to honor Mr. Meyer.

Born in Waseca, Minn., Mr. Meyer moved to Bismarck at an early age. At the time he started the radio station he was working in his father's combination florist-stationery store.

Mr. Meyer was a member of the Bismarck Chamber of Commerce, the Rotary Club, Bismarck Masonic Lodge, the Shrine at Fargo, N. D., and recently was granted a life membership to the Elks.

Surviving are his wife, the former Etta Hoskins, of Bismarck, and a daughter, Mrs. William Ekberg, whose husband is an instructor at the U. S. Naval Academy.

Funeral services were held in Miami Beach April 8.

WOPA-LBS CASE

Settlement Terms Studied

FINAL terms of the out-of-court settlement between WOPA Oak Park, Ill. and Liberty Broadcasting System were being checked last week by WOPA owners Egmont Sonderling and William L. Klein. The agreement was drawn during the NARTB convention by these men, who also own United Broadcasting Co., Chicago, and Gordon McLendon, Liberty president, and James Foster, LBS executive vice president.

Although both parties have agreed not to divulge settlement terms, it is presumed Liberty will pay a cash sum to WOPA and continue with WCFL Chicago as its affiliate. WOPA charges affiliation contract violation.

Magazine Revenues Up

MAGAZINE advertising revenues reached a new high during the first quarter of 1952, with a total of $122,941,552, up 10.1% from the $111,623,629 gross for the first quarter of 1951, according to Magazine Advertising Bureau. Pages of magazine advertising were up 3.9%, with 18,894.50 pages in the opening three months of 1952 to 18,188.13 in the same period of last year. Sunday newspaper sections are down from last year, MAB reports, with total first-quarter billings of $13,846,354 this year, down 8.5% from the $15,125,735 last year. Advertising pages in Sunday supplements for the quarter dropped to 1,160.27 this year from 1,186.34 last, a decrease of 2.2%.

Martin H. Barrett

FUNERAL services, followed by interment in Holy Cross Cemetery, Los Angeles, were held last Wednesday for Martin H. Barrett, 43, West Coast representative of Cunningham & Walsh., New York agency. He died at St. John's Hospital, Santa Monica, on April 7, after a lingering illness. Surviving are a daughter, 3½, his mother, five sisters and three brothers.

SHEA NAMED

Heads NBC Cleveland Outlets

HAMILTON SHEA, controller of owned and operated stations of NBC, was named general manager of the network's WTAM-AM-FM and WNBK (TV) Cleveland last week following the resignation of John McCormick from that post.

The appointment, announced Tuesday by James M. Gaines, NBC vice president in charge of the O&O division, is effective May 1.

Mr. Gaines predicted that Mr. Shea "will bring new excitement to radio and television in Cleveland," and said the network's stations there "will explore new formulas and devices to accentuate the vital policy of community integration."

"Mr. Shea's most important job is one of service to the greater Cleveland community," he said. "He will add to this local service the world-wide facilities of the national networks of NBC in radio and television. Thus local and national programming will stand side by side to form the strongest broadcasting partnership in Cleveland."

With NBC since 1949, when he joined as controller of the O&O division, Mr. Shea formerly was treasurer and controller of Emerson Drug Co. for five years, during which time he was closely associated with the successful Bromo-Seltzer advertising campaigns. He previously was with Chase National Bank for two years and with Tel-Autograph Corp. for six years.

His successor as operations director and controller of the O&O division was not designated.

20-Year Radio Veteran

Mr. McCormick, leaving the managership of the WTAM properties, has been in radio for more than two decades and with NBC since 1940 except for a part of 1945 when he was on leave of absence to serve as director of the radio department of the Republican National Committee.

He joined WGBS (now WINS) New York in 1930 as an announcer, engaged in free-lance program work in New York from 1932 to 1934, then moved to WKRC Cincinnati as program and production director, rising to assistant manager of the station in 1935 and manager in 1936. He joined WCCO Minneapolis in 1938 as assistant manager and two years later entered NBC service as an account executive in the central division. Except for the brief leave of absence, he remained with the central division until named manager of WTAM on Feb. 1, 1948.

WRFD HOLDS OPEN HOUSE

18,471 Visit New Radio Farm at Dedication

RURAL Ohio trekked from all the state's 88 counties when 18,471 Ohioans attended a weeklong dedication of the new WRFD Worthington studios and 260-acre Radio Farm at Powell Rd. on route 23 in Delaware County.

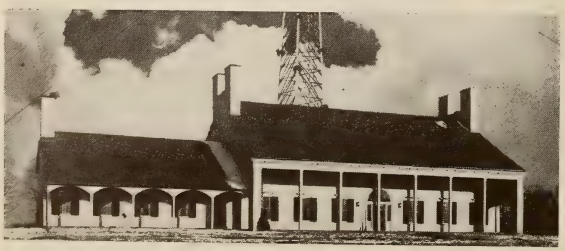
Greeting the rural Ohioans personally was Col. "Pop Hess," 72-year-old farm sales representative.

Some 6,000 Ohio families drove an average of 75 miles through cold wet weather to cause a traffic jam near the scene, during the first big day of the Open House week, the station noted. Highlighting the opening day was a two-hour dedication broadcast with Ohio Governor Frank J. Lausche introducing the program.

"It seemed like all Ohio came walking through our front door . . . and we like it!" said J. D. Bradshaw, WRFD manager. "Our open house success proved to all Ohio stations that 'Wherever you go there is radio!'"

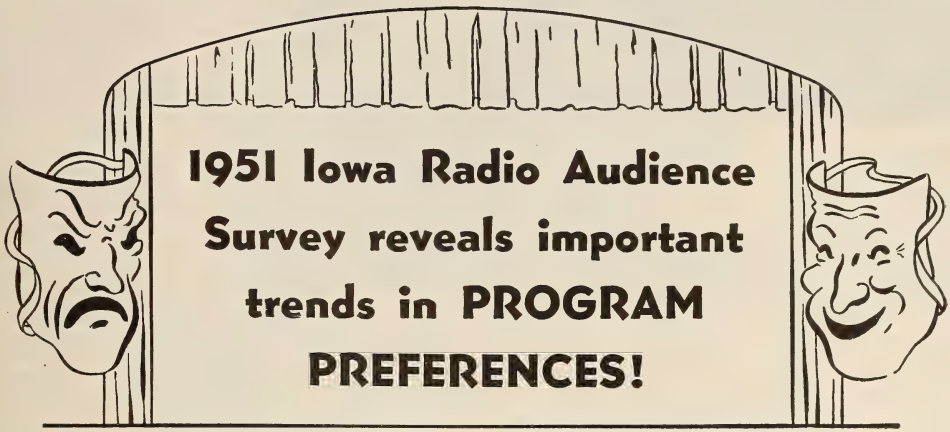
Included in the mass attendance were church, school, civic and farm groups, all arriving by chartered bus and special auto tours through dedication week.

WRFD staffers and Worthington high school students greeted them with tours and gifts of baby vanda orchids flown from Hawaii, animal balloons, WRFD folders and book matches. Staff personalities entertaining included Ray Roese, with Frank LaRue and orchestra, mornings on *Hospitality House*, WRFD Women's Director Mary Lou Pfeiffer on her daily programs, *Kitchen Kettle* and *Your Home* and Allen James, staff pianist, and Floyd Mussard, baritone, in quarter-hour musicals.



Dedicatory Speakers

Herbert E. Evans, vice president and general manager of the Peoples Broadcasting Corp., station's owner and operator, dedicated WRFD at the opening day ceremonies, and Murray D. Lincoln, president of the firm and of Farm Bureau Insurance companies, Columbus, spoke on "Peace Through Abundance."



The sponsors' tour took place on the second day and at a sponsors' dinner in Columbus, 400 heard talks by Edgar Kobak, WTWA Thomson, Ga.; Joseph C. Harsch, *Christian Science Monitor*, and Liberty Broadcasting System news commentator, and A. C. Nielsen Jr., administrative vice president of the audience measurement firm.

The closing day saw WRFD presenting the first broadcast of the Columbus Little Symphony with G. E. Hardesty conducting. Before the Open House week WRFD entertained the Ohio press at a luncheon, with Mr. Evans of PBC describing the station's future development plans. The station was the cover feature of the March issue of the *Ohio Farm Bureau News* and received a seven-page spread in the *Columbus Citizen* magazine section. More than 5,000 invitations were mailed throughout Ohio.

During the Open House week WRFD sponsors furnishing special contest and door award prizes included: Meridian plastic tile, Youngstown kitchen, Gibson refrigerator, Apex washer, Norge home freezer, Hamilton clothes dryer, Tappan range, Crosley electric range, Perfection electric range, Gruen watches, Lincoln farm welder, Westinghouse roaster, Crosley radios, Columbus plastic kitchen sets, Big H feed, Purity feed, Genuine Pfister hybrid, Miami baby chicks and others.

HERE are the new studios of WRFD Worthington, Ohio, and 260-acre radio farm, dedicated during the station's weeklong Open House.

1951 Iowa Radio Audience Survey reveals important trends in PROGRAM PREFERENCES!

In comparing Iowa's "best-liked" types of radio programs in 1951 with those of 1947, 1948, 1949 and 1950, the 1951 Iowa Radio Audience Survey* highlights several important trends which might well influence your radio plans.

Here, in capsule form, is the five-year comparison for 16 program types:

MEN	1947 Survey	1951 Survey	WOMEN	1947 Survey	1951 Survey
News broadcasts	80.4%	87.1%	News broadcasts	72.1%	79.9%
Featured comedians	71.5	62.0	Featured comedians	66.3	57.6
Popular music	39.9	48.5	Popular music	44.7	51.4
Sports broadcasts	38.7	47.4	Audience participation	47.4	49.4
Audience participation	41.7	41.0	Complete drama	43.1	38.4
Market reports	25.2	30.6	Religious music or devotionals	28.5	28.2
Oldtime music	23.2	29.7	Sports broadcasts	16.6	27.4
Complete drama	32.7	28.2	Serial drama	30.5	26.7
Variety programs	29.5	20.6	Oldtime music	19.5	21.9
Religious music or devotionals	17.4	18.4	Variety programs	32.3	21.3
Talks, comment	20.5	16.4	Homemaking programs	18.2	18.8
Band music (brass)	14.5	15.3	Market reports	12.8	16.1
Talks on farming	17.0	14.3	Talks, comment	15.0	15.0
Serial drama	15.2	12.3	Classical music	20.7	14.6
Classical music	16.1	9.5	Band music (brass)	13.2	13.4
Homemaking programs	4.3	5.4	Talks on farming	8.8	8.3

Note the growing popularity among both men and women of news and sports broadcasts, popular music, market reports and oldtime music. And notice the substantial decline in popularity of featured comedians, complete and serial drama shows, classical music and variety programs. In almost every case the trend is consistent, year after year, indicating a definite pattern rather than a temporary shift in preference.

You'll find the 1951 Iowa Radio Audience Survey one of your most valuable reference books. It's packed with authentic, up-to-date information. It is one of America's most dependable radio studies. *Write us for your copy, today! — or ask Free & Peters!*

The 1951 Survey proves again that WHO continues to be your best radio approach to the Iowa market. With its 50,000-watt, Clear Channel voice, its top-grade programming and its enlightened Public Service attitude, WHO is Iowa's greatest radio outlet — listened to by more Iowans night and day than any other station in the State.

*The 1951 Iowa Radio Audience Survey is the fourteenth annual study of radio listening habits in Iowa. It was conducted by Dr. F. L. Whan of Wichita University and his staff. It is based on personal interviews during March and April, 1951, with 9,180 Iowa families—all scientifically selected from Iowa's cities, towns, villages and farms, to present a true and accurate picture of the radio audience in Iowa.

THE NEEDLE!

by MAURICE B. MITCHELL Vice-Pres. Gen'l. Mgr.

Associated Program Service 151 W. 46th, N.Y. 19

UNANIMOUS!

"No transcription library can approach APS." That was the unanimous verdict of broadcasters in the U. S. and Canada at both NARTB and CAB Conventions in Chicago and Toronto during the past weeks.

"It sounds better" was a frequent comment. The cumulative impact of all that fine talent . . . all that specially-arranged music . . . made a sound that broadcasters liked. And sound counts in radio.

"What a talent list" Delighted programmers revelled in that APS Talent Roster. Where many libraries have cut corners, APS has built well—with basic ingredient music. Yes—we saw the importance of commercial help as a part of library service long ago —long before the rest, but the big difference lies in the fact that we didn't borrow from the music (the heart of any library!) to pay for the sales gimmicks.

"You must be after a rate increase," was an oft-heard comment. Broadcasters were realizing that APS' overwhelming superiority as a station tool made it an outstanding value. Where good names and *"important"* music have been on the down grade in *"promotional"* libraries, they keep piling up at APS stations. And a library is never any better than its talent and its music, no matter what else you use for trimming.

"The phone rings more often since we started with APS" said many friends in Toronto and Chicago. It's true there's a startling difference in APS music—because it's so different. It's a different sound, and listeners call to ask *"Where can I get that music?"* Many APS stations proudly reply: *"Sorry, you just can't get it. That's music transcribed especially for this station."*

"We're always reading raves about your talent" said a flock of wide-awake broadcasters. We expect that. Where else can you find winners like Rosemary Clooney . . . Guy Mitchell . . . Vic Damone . . . Evelyn Knight . . . Kay Armen . . . Ted Dale . . . Glenn Osser . . . Al Goodman. . . . a flock of others . . . always in the headlines. Recently we've seen *"Four Star"* ratings for personal appearances like the Clooney current nightspot tour . . . Guy Mitchell's Toronto date . . . Evelyn Knight's superb singing at the Swank Plaza in N. Y. . . . Glenn Osser's incomparable conducting on TV . . . etc.

"How can you keep this up?" Was a frequent question. It's easy to answer. We're the music specialists of the library business. Performers like us, do their very best for us. We have the know-how, and we spend our music dollars for performances that can be used, not for musical *"gimmicks"* you can't even find once the library arrives. A library is like any other kind of entertainment material. It *"plays"* or it doesn't. Ours does.

"It's been ten years—and we use it more than ever." We heard that from many old friends. They chuckle with us at the *"two-years-and-out"* kind of library. There's only one *"best performance,"* and once you have it, there's no sensible reason for changing to second best *"just for a change."* Stations never junk top-audience shows "just for a change" and our old friends have learned that when you have a flock of solid performances all in one library it gets better and better as time goes on and new material keeps flowing in.

"How much?" We enjoy hearing that question. It's a *"closer"* for us. That's because there's an APS library service for every broadcaster. Our Specialized libraries lease at rates like these: $19.50, $22.50, $32.50, $39.50, $47.50 per month. The full basic APS library costs less than any other full-sized library on the market. A bargain? Nope! Just a sensibly priced service for broadcasters, produced by broadcasters who know broadcasting problems. We have nothing else to sell—this is a full-time business for us.

rule or regulation of the Commission authorized by this Act or by a treaty ratified by the United States; and

"(5) for violation of or failure to observe any cease and desist order issued by the Commission under this section.

"(b) where any person (1) has failed to operate substantially as set forth in a license, or (2) has violated or failed to observe any of the provisions of this Act, or (3) has violated or failed to observe any rule or regulation of the Commission authorized by this Act or by a treaty ratified by the United States, the Commission may order such person to cease and desist from such action.

"(c) Before revoking or suspending a license or revoking a permit pursuant to subsection (a), or issuing a cease and desist order pursuant to subsection (b), the Commission shall serve upon the licensee, permittee, or person involved an order to show cause why an order of revocation or suspension or a cease and desist order should not be issued. Any such order to show cause shall contain a statement of the matters with respect to which the Commission is inquiring and shall call upon said licensee, permittee, or person to appear before the Commission at a time and place stated in the order, but in no event less than 30 days after the receipt of such order, and give evidence upon the matter specified therein; except that where safety or life or property is involved, the Commission may provide in the order for a shorter period. If after hearing, or a waiver thereof, the Commission determines that an order of revocation or suspension or a cease and desist order should issue, it shall issue such order, which shall include a statement of the findings of the Commission and the grounds and reasons thereof, and specify the effective date of the order, and shall cause the same to be served on said licensee, permittee, or person.

"(d) Except insofar as other provisions of this Act provide for specific forfeitures, in any case where subsection (a) or (b) of this section authorizes the revocation or suspension of a license, the revocation of a construction permit, or the issuance of a cease and desist order, and in any case where section 303 (m) of this Act provides for the suspension of an operator's license, the Commission may, in lieu of revoking or suspending the license, or revoking the permit, or issuing the cease and desist order, or in addition to issuing the cease and desist order, direct the payment of a forfeiture to the United States of the sum of $500 for each day during which any offense specified in subsection (a) or (b) of this section, or in section 303 (m), occurred, or such lesser sum as the Commission may find appropriate in the light of all of the facts and circumstances of the particular case. Before the imposition of any forfeiture herein provided for, the Commission shall serve a notice of apparent liability for the forfeiture of a specific sum of money, which sum may be determined by the Commission on the basis of information then before it. Such notice shall give a reasonable opportunity to apply for hearing, or, if a hearing is waived, to submit a written request for remission, or reduction in the amount, of the forfeiture, such written request to be supported by a statement of the facts warranting remission or reduction. The Commission, upon final determination of the amount of any forfeiture, shall give notice thereof and specify the time, not less than thirty days after receipt of notice, within which to pay such sum into the Treasury of the United States. If not paid within the period specified, suit may be brought as provided in section 504 of this Act for recovery of a forfeiture. In any case where the Commission has served an order to show cause pursuant to subsection (c) of this section, the Commission, after hearing or waiver thereof as therein provided, may, in lieu of revoking or suspending a license, or revoking a permit, or issuing a cease and desist order, or in addition to issuing a cease and desist order, in such proceeding, impose the forfeiture provided for in this subsection. If a hearing is waived, a reasonable opportunity shall be given to submit a written request for remission, or reduction in the amount of the forfeiture, supported by a statement of the facts warranting remission or reduction. Any forfeiture ordered after the service of an order to show cause shall be collected as provided above.

"(e) In any case where a hearing is conducted pursuant to the provisions of this section, both the burden of proceeding with the introduction of evidence and the burden of proof shall be upon the Commission.

"(f) The provisions of section 9 (b) of the Administrative Procedure Act which apply with respect to the institution of any proceeding for the suspension or revocation of a license or permit shall apply also with respect to the institution, under this section, of any proceeding for the issuance of a cease and desist order or for the imposition of a forfeiture."

ABC-UPT MERGER

Hearing Nears Conclusion

FINAL two- to four-week phase of the hearing on the proposed merger of United Paramount Theatres with ABC begins at the FCC today (Monday) [B•T, April 7].

First witness will be Gordon Brown, owner of WSAY Rochester, N. Y. He will appear as a public witness. Mr. Brown has been at odds with the networks—especially ABC—for some time.

Next part of hearing will bring testimony from DuMont officials, who will offer rebuttal to testimony favoring the merger.

WSMB New Orleans half-interest transfer from Paramount Pictures to UPT will be considered next.

Finally, FCC Counsel Frederick W. Ford will cross-examine Paramount Pictures and UPT directors. He is expected to delve into the propriety of certain theatre acquisitions by those companies.

The number of witnesses Mr. Ford plans to question and the manner of his interrogation will determine whether the hearing is concluded within two weeks or four weeks.

FCC Hearing Examiner Leo Resnick said that regardless of whether the proceeding is completed with two weeks or a month, he still expects to issue his initial decision by October 1.

Observers point out that if the Commission accepts Mr. Resnick's findings the final decision may be out by December 1—providing that, upon filing of the exceptions to the initial decision, the Commission proceeds promptly to oral argument.

On the other hand, if the Commission should differ with the examiner's conclusions, the final decision may not be forthcoming for a much longer period of time.

The hearing began Jan. 16.

Haber Buys WFEC

SALE of WFEC Miami, 250 w daytime station on 1220 kc, was completed last week pending FCC approval. Price is $75,000. Buyer is David Haber, of New York and Miami, who has investments in real estate and has interest in various taxicab companies including 50% of Cresent Cab Co., New York. Seller is Howard D. Steere. Transaction was handled by Blackburn-Hamilton Co.

Watch your pennies, Mister!
When you buy radio time these days, you want to make every penny count. In Baltimore, the way you do it is simple. You just buy WITH—the BIG independent with the BIG audience!
Every penny you spend on WITH helps produce exactly what you want from radio—*low cost results!* Because WITH delivers more *buying* listeners-per-dollar than any other radio or TV station in Baltimore.
No wonder WITH is so popular with the local folks! Their advertising *must* produce immediate, economical results. *And WITH regularly carries the advertising of more than twice as many retail merchants as any other station in town!*
Let your Forjoe man give you the whole WITH story today!
WITH
IN BALTIMORE
TOM TINSLEY, PRESIDENT
REPRESENTED BY FORJOE & COMPANY

To an advertiser who prefers to captivate audiences

There are no captive radio audiences in Iowa. Every set has a dial. The dials work, the radios work, and any listener is free to free lance. Apart from the totalitarian implications of the word (no self-respecting Iowan—that's the same as saying no Iowan —would sit still for being a captive anything) we figure an audience earned on program merit is more healthy for business.

Being on WMT, CBS outlet in Eastern Iowa, is like occupying a choice location on Main Street. Twenty-three of the top twenty-nine programs are on CBS. There's great customer traffic—great opportunity to reach more than 300,000 radio families in WMT-land. They're captivated by programming—CBS and local. For full details, trap a Katz Agency rep (*they* capture easy).

ARF Reactivated

(Continued from page 27)

a study of the Foundation's program and make recommendations for enlarging the service to the membership.

A complete report was made at Thursday's board meeting on the various research projects which ARF plans to undertake. It is expected that analyses of these projects will be completed within a month, so that work can be commenced without further delay. A survey of the membership showed a study of magazine ad readership measurement and one of radio-TV ratings most wanted by most subscribers, and it was indicated they will be undertaken first. The ARF research committee has also recommended two short-term projects, one of preparing analytical tabulations of the findings of ARF continuing studies, the other a study of the relationship of advertising expenditures to sales and to national income. Presumably these will also be launched promptly.

Mr. Kobak will serve as salaried president of ARF but continue his consulting practice, retaining his headquarters at 341 Park Ave., New York. He is not under contract to ARF and is to devote one day a week to the foundation once it is well under way.

Among Clients

Among his clients, it is understood, are General Mills, Knox-Reeves Adv., Miles Laboratories, Westinghouse Radio Stations Inc., A. C. Nielsen Co., Cleveland *Plain Dealer*. He also is identified with McGraw-Hill interests.

In addition Mr. Kobak is owner of WTWA Thomson, Ga., and a weekly newspaper in that city. He is an NARTB director-at-large for small stations. Just a fortnight ago he resigned as chairman of the board of Broadcast Advertising Bureau. In advertising much of his career, Mr. Kobak was president of Mutual network before becoming a consultant. Prior to that he had served in high executive capacity at NBC and McGraw-Hill as well as in the agency field.

Fred B. Manchee, executive vice president of BBDO and chairman of the ARF Projects Development Committee, reviewed survey results at the ANA convention in March.

In the survey, 72% voted for the magazine readership study and 65% wanted the radio-TV ratings study. Ranking fourth was the effect of TV on magazine and/or newspaper reading.

"We want to be sure that we can rely with confidence on the data we receive on the measurement of our radio and television advertising," Mr. Manchee had told the ANA convention. He added that agencies rated the radio-TV project first in their voting, with advertisers ranking it fourth and media fifth.

ARF will not go into the rating measurement business, according to Mr. Manchee, but try to get the answers to questions asked about present methods and techniques. This, he felt, would aid in interpreting present data and possibly lead to improved techniques. In addition it would put into force recommendations made last year by a special test survey committee which called for field testing of broadcast research methods. This committee had been formed following an advertisement in the July 10, 1950 issue of BROADCASTING • TELECASTING.

In this advertisement Stanley G. Breyer, KJBS San Francisco, pointed to confusion in radio research and proposed an impartial evaluation of techniques. The report was made March 3, 1951 by Dr. Kenneth H. Baker, then NAB research director who served as chairman of the special test survey committee.

PEABODY AWARDS

Announcement Set May 1

ANNUAL George Foster Peabody Radio and Television Awards will be announced May 1 in New York at a meeting of the Radio Executives Club of that city at the Waldorf-Astoria, Dean John E. Drewry of the Henry W. Grady School of Journalism, U. of Georgia, has announced.

The awards, given for outstanding meritorious public service during 1951, are presented to individuals, stations and/or networks as follows:

Radio—for public service by a regional station above 1 kw, public service by a local station 1 kw or under, reporting and/or interpretation of the news, drama or other non-musical entertainment, music, education, children's program or series and promotion of international understanding; television — education, entertainment, news and/or interpretation and children's program or series. Special awards also are made.

LEE ESTATE

Twin Sisters Named

TWIN sisters Marilyn Joan and Mary Jean Lee who will eventually receive nearly $1 million from the estate of the late Thomas S. Lee have been granted a monthly allowance of $150 each in Santa Monica Superior Court.

Cousins of Mr. Lee, the 16-year-old twins were among 10 persons named to share $4,788,206 remaining from $12½ million left by the heir to the late Don Lee broadcasting and automobile distribution fortune. They are daughters of the late Cupler Lee, brother of Don Lee, and reside with their mother, Mrs. Frances M. Lee in Northridge, Calif. The twins are to receive $470,000 each from estate.

sole basis for Comr. Webster's concurring opinion.

"The failure of the commercial interests to make a strong, positive showing with respect to educational productions leaves me with the impression that that group is not as prepared to voluntarily go forward with this type of television programming as originally indicated . . .," he said.

"But, with respect to an overwhelming majority of the 209 communities tentatively assigned educational channels by the Third Notice, support therefor by local educational organizations took, for the most part, the form of affidavits stating that reservations of such channels were desired," he continued.

". . . we are left with no alternative. Despite the inadequate showing made by the non-commercial educational group, circumstances dictate that the requested reservations be made," he concluded.

WBT's 'Mr. Dixie'

CAREER of Grady Cole, WBT Charlotte farm director, is traced in the April 19 issue of *Collier's* magazine. The article is written by William A. Emerson Jr. under the title, "Mr. Dixie." Writes Mr. Emerson: "Grady is generally recognized in the Carolinas by sight or sound. He'd be downright disheartened if a formal introduction were necessary."

NARTB MEMBERS

Total Passes 1,500 Mark

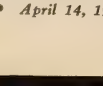
AM STATION membership of NARTB reached the 1,000 mark last week—highest point in the last two years, according to President Harold E. Fellows. This brings the overall membership total to more than 1,500, comprising in addition to the AM group a total of 376 FM stations, 92 TV members (88 stations, four networks) and 75 associate members.

No. 1,000 in the NARTB AM directory is WOWL Florence, Ala., according to William T. Stubblefield, NARTB station relations director.

Most of the members recently signed made application during the NARTB convention in Chicago, where the Station Relations Dept. maintained a service desk. Over 1,100 service calls were handled at the desk by William Treynor, assistant station relations director, and Helen Fruth. The service desk served as a central point for phone calls, telegrams and other messages addressed to convention delegates.

Other new member stations include KLCN Blytheville, Ark.; KLO Ogden, Utah; KOJM Havre, Mont.; KSJV Sanger, Calif.; KULP El Campo, Tex.; KVNU Logan, Utah; KWKC Abilene, Tex.; KUSC (FM) Los Angeles; WACO Waco, Tex.; WANS Anderson, S. C.; WQXI Buckhead, Ga.; WVLK Versailles, Ky.; WSFA Montgomery, Ala.; WPAQ Mount Airy, N. C.; WPAL Charleston, S. C.; WNOK Columbia, S. C.; WLOK Lima, Ohio; WIBW Topeka; WGTM Wilson, N. C.; WGCM, WGCM-FM Gulfport, Miss.; WCRI Albertville, Ala.; KWCB Searcy, Ark.; KHAS Hastings, Neb.; KCKN Kansas City.

17 OUT OF 18 PREFER WDAY, FARGO!



An independent survey of radio listening habits in the Red River Valley was recently made by students at North Dakota Agricultural College. The Survey covered 3,969 farm families in 22 counties within about 90 miles of Fargo. In answer to the question, "To what radio station does your family listen most?" 78.6% of the families said WDAY, 4.4% Station "B", 2.3% Station "C", 2.1% Station "D", etc. WDAY was a 17-to-1 choice over the next station . . . a *3½-to-1 favorite over all competition combined!**

It's the same story in town. Year after year, WDAY makes a run-away of the Hooper race, consistently getting a 3-to-1 greater Share of the Fargo-Moorhead Audience than *all other stations combined!*

Truly, WDAY is a colossal radio buy in a stupendous farm market. Write direct, or ask Free & Peters for all the facts.

** Competition includes local studios of the other three major networks.*

Bennett Blames TV For Decline In Bus Passenger Volume

State Capitol, Hartford, March 10—(Special)—Television is curtailing the number of bus riders of the Connecticut Co., Richard J. Bennett, vice president and general manager of the company told the Public Utilities Commission today.

Bennett, appearing as a witness on the company's petition for a fare increase, said that large numbers of persons who formerly came into the center of the city evenings for theaters and other recreation are now remaining at home, with their television sets.

He declared "Television has adversely affected the revenue of public service transportation companies, as it has that of the theaters."

Summer

'Boom-State'

The tremendous impact of Station WGY on an enlarged summer-time audience is ably demonstrated by one of WGY's sponsors—the Catskill Game Farm. In 1951, this organization abandoned its advertising schedule in newspapers and other radio stations to use WGY *exclusively*. Through spot announcements in the morning and night-time stations breaks, the result was a 250 percent increase in attendance.

Reaching all the summer resorts in the Adirondack, Catskill and Berkshire Mountains and Vermont, sales messages carried by WGY also reach the many tourists and vacationers in Saratoga Springs, Lake George, Lake Champlain and Cooperstown, New York. The WGY area is surely one of America's foremost vacation areas.

Motorists visiting "WGY-Land" learn the station's location on the dial through seven striking, colorful 8' x 24' Scotchlite billboards which are located on the major traffic arteries leading into the "17th State."

You can realize outstanding results by doing your summer selling on Station WGY.

HOW MANY COMMERCIALS AIRED IN '51?

More than 114 Million, B•T Survey Discloses

RADIO and television have had a nose-counting job performed on their commercials by BROADCASTING • TELECASTING. Here are the results, based on carefully computed estimates:

● 100,620,000 commercial messages were delivered in 1951 by all AM broadcast stations.

● 10,000,000 commercial messages were delivered in 1951 by all FM broadcast stations.

● 4,000,000 commercial messages were delivered in 1951 by all television stations.

● Grand total: 114,620,000 commercial messages delivered during the year on the three broadcast media (AM, FM, TV).

The figures came out of actual checks of radio and TV station logs, using samples believed typical in each category. In addition, the renewal applications of typical stations were checked at the FCC, with number of spot announcements projected to give total number of commercial announcements in a week.

In the case of AM stations, the number of commercial announcements (including all announcements within programs) ranged from 20,800 to 95,000 during the year for 2,236 stations. A median figure of 45,000 commercial messages per year per AM station resulted.

The FM figure was more difficult to pin-point because so many stations duplicate AM and because of the variation in number of daily operating hours. The computation produced an estimate of 10,000,000 commercial messages broadcast in a year by the 653 stations.

The check of TV commercial announcements (again including all announcements within programs, as done in the AM and FM estimates) showed 145 commercial announcements as the highest daily total for the logs selected. The total for 108 TV stations was 4,000,000.

These figures do not include free public service announcements, which in the case of AM stations range from 30 to over 200 a week.

NLRB SETS VOTE

For WGH, WNOR Employes

DIRECTIONS of election were handed down by the National Labor Relations Board last Wednesday involving the American Federation of Radio Artists (AFL) and two Virginia stations—WGH Newport News and WNOR Norfolk.

The board ordered balloting at WNOR among announcing, announcer-engineer and continuity employes, and at WGH among announcing and programming personnel. Elections will be held within 30 days.

At WNOR, the union sought a unit of announcers and announcers-engineers excluding continuity, traffic, production and commercial help. The station, licensed to Norfolk Broadcasting Corp., favored inclusion of a salesman and traffic and receptionist personnel. In including continuity help, NLRB noted "the small size of the radio station . . . and integrated nature of the employer's broadcasting operations."

WGH, licensed to Hampton Roads Broadcasting Corp., favored inclusion of its commercial manager, chief announcer, choir director, and continuity and promotion employes. The board directive included in the unit only continuity employes from this proposed group urged by WGH. AFRA would have limited the voting unit to announcers.

Paul Styles, NLRB member, dissented from the majority opinion. He contended that while "this is a small radio station" and jobs performed by announcers are integrated with other program functions, announcers perform a special kind of work involving special conditions of employment. He favored a unit of announcers, pointing out the board has so acted in other radio cases.

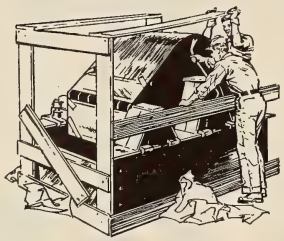
WCBS NARCOTICS SERIES

Gets Wide Development

WCBS New York is giving a demonstration of program and idea development, all focused on the true story of a heroin addict—known to the public as "Robert Adams"—and his 30-year struggle with drugs, first told as a two-week series on Bill Leonard's *This Is New York*.

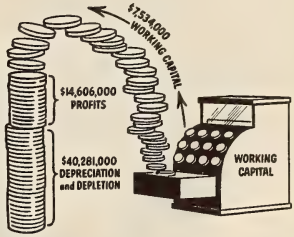
The story was slated for further discussion last week on Dwight Cooke's *You and the World* (WCBS, weekdays, 6:15 p.m. EST) as well as for a Thursday roundtable with State Attorney General Nathaniel Goldstein and State Senator Seymour Halpern on Mr. Leonard's program.

Simon & Schuster has scheduled publication of "Robert Adams'" story, "Confessions of a Heroin Addict," and two film companies (MGM and Paramount) are listening to broadcast transcripts as possible movie story material. The addict's wife, who participated in one broadcast to explain what it meant to be married to a drug-user, is writing an article for publication in June issue of *Today's Woman*.



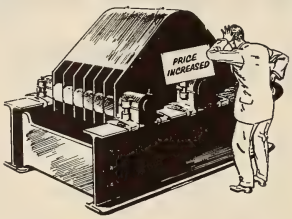
HENRY W. TYMICK, Buchen Co., Chicago, has been appointed general chairman of the 30th annual conference of National Industrial Advertisers Assn., Chicago, June 29-July 2. Debate on communications is scheduled as well as origination of ABC *America's Town Meeting of the Air*.

How you can make a profit of $27,295,971



and go in the hole!

1. According to our accountants, Union Oil made a net profit during 1951 of $27,295,971. If this bookkeeping profit represented the company's actual "take" our 38,347 common share owners would be overjoyed. But after paying dividends of $11,444,259, we actually ended up on the minus side of the ledger to the sum of $7,534,000 in working capital.



2. Here's the reason: In 1951 we had to spend $62,421,000 for replacement of worn-out equipment and oil properties and to enlarge our facilities to meet the greatly increased demand in the West for petroleum products. This money came from three sources.

3. $40,281,000 of it came from the "depreciation and depletion" allowance. (The sums a corporation sets aside each year to replace equipment and oil properties when they're worn out.) $14,606,000 of it was made up out of profits. $7,534,000 of it was taken from working capital—the "checking account" a business keeps on hand for day-to-day expenditures.

4. We obviously can't keep dipping into our working capital indefinitely and stay in business. For if we do we'll eventually run out of money to carry our receivables, inventories, etc., and pay our daily operating expenses. That's why something has to be done about a situation that affects not only us but every U. S. corporation.

5. Briefly it is this: The sums the tax collector allows you to set aside for depreciation and depletion are based on what things cost *when you acquired them*—not what it costs to *replace them today*. Since these depreciation funds aren't adequate to replace equipment and oil properties at today's prices, we have to make up the difference somewhere—or go out of business.

6. On top of this, extremely heavy taxes on corporate earnings make it almost impossible to retain enough profits to make up the difference. So we have to take it from working capital. That's why we must have a tax policy that will permit corporations to earn enough for the replacement and expansion necessary to maintain the productivity and economic growth of the nation.

UNION OIL COMPANY

OF CALIFORNIA

INCORPORATED IN CALIFORNIA, OCTOBER 17, 1890

This series, sponsored by the people of Union Oil Company, is dedicated to a discussion of how and why American business functions. We hope you'll feel free to send in any suggestions or criticisms you have to offer. Write: The President, Union Oil Company, Union Oil Building, Los Angeles 17, California.

Manufacturers of Royal Triton, the amazing purple motor oil

AFRA L.A. TALKS

Open With Independents

WITH CURRENT contracts expiring April 30, American Federation of Radio Artists has started negotiating for a 10% overall wage increase and improved working conditions for staff announcers of Los Angeles area independent outlets.

Besides KFWB, KLAC, KFVD, KFAC and KRKD Los Angeles, the group includes KGIL San Fernando, KGER and KFOX Long Beach, KWKW, KALI and KXLA Pasadena.

Improved working conditions requested include a health and welfare plan which would be paid for by the station, covering each announcer and dependents, with cost to employer of $8 monthly; severance pay based on one week for each year of service, with minimum of two weeks' notice; special conditions covering employment of parttime announcers with premium pay time-and-a-half minimum call provision; and full day salary for parttime work.

AFRA also requests KGIL and KWKW to adjust $3 weekly differential to same salaries as KFOX; KLAC to increase pay to the same as KFWB, eliminating $6 differential. KMPC Los Angeles, Liberty affiliate, was put in the network category by AFRA and instead of present flat $99 per week, the union wants $100 weekly for first year men, plus commercial fees, and $115 for second year.

Announcer pay on Los Angeles independents currently varies from $75 to $99, Claude McCue, AFRA executive secretary, stated.

KBIG Avalon, Calif., has contracted for United Press news service, effective when station starts operating in early May. Teletypes will be installed in both the Avalon studio on Catalina Island and Hollywood studios at 6540 Sunset Blvd.

EDUCATION ON FM

Chicago Series Scheduled

FIVE Chicago-area colleges April 14 will begin educational programming on WBIK (FM), affiliate of WBKB (TV) Chicago, General Manager John H. Mitchell has announced.

Preliminary program plans were revealed at a press conference in the Garrick Television Center. Schools participating in the cooperative plan are Roosevelt College, the U. of Illinois, Lake Forest College, Illinois Institute of Technology and Loyola U.

Each school will broadcast its programs one day weekly for 10 weeks, furnishing educational material from 3-9 p.m. If the series, entitled *Operation New Horizon,* wins enough public response, it will be resumed in the fall on WBIK as well as on WBKB. Stations are owned by the Balaban & Katz theatre chain.

Radio Still Dominates THIS RICH MARKET

Radio delivers MORE sets-in-use in the South Bend market than before TV! . . . Hooper Serveys for Oct.-Nov. 1951 compared with Oct.-Nov. 1945 prove it. Morning up 6.8, afternoon up 8.0 and evening up 4.4. Television is still insignificant here because no consistently satisfactory TV signal reaches South Bend. Don't sell this rich market *short.* Wrap it up with WSBT radio.

KDKA Aid to Blind

KDKA Pittsburgh has begun shipment of a second ton of used radio transcriptions to the American Printing House for the Blind Inc., Louisville. Shipments were started in September 1940. Transcriptions, which KDKA supplies free of charge, are re-milled, worked in with new material and used in the production of "talking books" for the blind. Officials of the printing house explained that the demand for "talking books" is increasing daily.

LIKES WNBC MUSIC

Rep. Morano Tells Cott

A CONGRESSMAN, who doesn't like "claptrap emanating from other radio stations in New York City on after-midnight programs," wrote a fan letter to WNBC New York complimenting the station on its classical music disc jockey show, *Music Through the Night.*

Rep. Albert P. Morano (R-Conn.) last week released his letter to Ted Cott, program director of WNBC. Rep. Morano created a stir last fall when he complained that WMCA New York's nighttime music m. c., Barry Gray, had made "ad-lib" remarks on his program [B • T, Oct. 29, 1951]. It was alleged that Mr. Gray had criticized a column printed in the *Greenwich* (Conn.) *Time* that had attacked government sponsorship of recruiting programs.

In his letter, Rep. Morano said in part: "This program is indeed a real public service. I am sure that the predominant majority of the radio public would much prefer to listen to the works of the great masters . . . as interpreted by the contemporary conductors . . . in marked contrast to the clatrap emanating from other radio stations in New York City on after-midnight programs."

In the WMCA incident, Rep. Morano had complained to the FCC. While praising WNBC and the program, Rep. Morano, who noted he is a frequent listener, also commended NBC for placing the show in the midnight-to-dawn period.

KFAB SCHOLARSHIPS

Offer In-Service Training

HARRY BURKE, general manager, KFAB Omaha, has announced that for the seventh consecutive year the station will cooperate with the U. of Nebraska in taking students from the university's radio department for summer training at KFAB.

In-service scholarship "graduates" include Bob Jones, KFAB staff announcer; Herm Harvey, KFAB farm field director; Myron Levenson, WOAI-TV San Antonio; John Carson, KTTV (TV) Hollywood, and Arved Christiansen and Jo Anne Mellen, KFOR Lincoln.

YOU MIGHT CAST A TROUT FLY 183 FEET*—

BUT . . .

YOU NEED THE FETZER STATIONS TO LAND SALES IN WESTERN MICHIGAN!

AM or TV, here's proof that the Fetzer stations are Western Michigan's best advertising buys.

RADIO

WKZO, Kalamazoo, and WJEF, Grand Rapids, deliver Western Michigan's *largest* audience, at surprisingly low cost. Each is consistently the most listened-to station in its home city, and BMB figures prove the same kind of audience in surrounding rural areas. WKZO-WJEF's unduplicated BMB Audience is up 46.7% over 1946 in the daytime—up 52.9% at night! *Yet this strong CBS combination costs 20% less than the next-best two-station choice in Kalamazoo and Grand Rapids!*

TELEVISION

WKZO-TV, Channel 3, is the Official Basic CBS Television Outlet for Kalamazoo-Grand Rapids. It also provides Battle Creek with intensive primary service —effectively reaches a total market with a Net Effective Buying Income of more than two billion dollars! And here's the best part of the story: A recent 24-county Videodex Diary Study made by Jay & Graham Research Corporation, using the BMB technique, shows that *WKZO-TV delivers 54.7% more Western Michigan and Northern Indiana homes than Station "B"!*

Write direct or ask your Avery-Knodel man for all the facts.

** Dick Miller of Huntington Beach, California, holds this world's record.*

WJEF tops IN GRAND RAPIDS AND KENT COUNTY (CBS RADIO)

WKZO-TV tops IN WESTERN MICHIGAN AND NORTHERN INDIANA

WKZO tops IN KALAMAZOO AND GREATER WESTERN MICHIGAN (CBS RADIO)

AVERY-KNODEL, INC., EXCLUSIVE NATIONAL REPRESENTATIVES

American Exhibition of Educational Radio and Television Awards

RECOGNITION is extended to local and regional television programs for the first time this year in the list of awards and honorable mentions of the 16th American Exhibition of Educational Radio and Television Programs.

The exhibition, to be announced today (Monday), is sponsored by the 22d Institute for Education by Radio-Television, which meets under the auspices of Ohio State U. at Columbus this week (see separate story).

All awards are based upon entries made by networks, stations and other organizations. Regional and local TV programs are auditioned comparatively by the same panel of judges as national network video fare. With one exception, the awards are made to series rather than individual broadcasts. Series were judged in 14 cooperating centers, one for each program class.

Radio awards are broken down into national (network or transcription) programs, regional networks, stations and organizations (including clear-channel, 5 kw to 50 kw stations) and local organizations and stations (less than 5 kw).

Television awards cover network live and kinescope fare and local and regional stations or organizations.

List of awards, honorable mentions and citations by classification follows:

RADIO AWARDS

Programs Heard Nationally by Network or Transcription

Religious—First Award, *The Ave Maria Hour*, to The Franciscan Friars of the Atonement, New York, broadcast at various times over numerous stations.

Honorable Mention, *Let There Be Light* to Broadcasting and Film Commission of National Council of Churches, New York, broadcast at various times over numerous stations.

Agricultural—(No awards).

Women's—(No Awards).

Cultural: Art, science, literature and music (but not straight music)—First Award, *Stage 52*, to Canadian Broadcasting Corp.

Honorable Mention, *CBC Wednesday Night*, to Canadian Broadcasting Corp.

Dealing with Personal and Social Problems—

Honorable Mention, *The Lonesome Road*, to Communication Materials Center, Columbia U. Press, broadcast at various times over numerous stations.

Presenting Public Issues (Forums, etc.)—First Award, *Cross Section*, to Canadian Broadcasting Corp.

News Interpretation (not straight reporting)—(no awards).

Furthering International Understanding—First Award, *Citizens of the World*, to United Nations Radio, broadcast at various times over numerous stations.

Special One-Time Broadcasts—First Award, *Arise and Go Thy Way*, to The National Society for Crippled Children and Adults, broadcast over the NBC network.

Honorable Mention, *No Escape*, to Canadian Broadcasting Corp.

Children's (for out-of-school listening)—First Award, *Bert, the Turtle*, to Audio-Visual Division, Federal Civil Defense Administration, Washington, D. C., broadcast at various times over numerous stations.

Honorable Mention, *The Children's Theatre*, to Canadian Broadcasting Corp.

Honorable Mention, *A Carol for Canada*, to Canadian Broadcasting Corp.

Teen-Agers' (for out-of-school listening)—(no awards).

Designed for in-school use by pupils in primary grades (approximately grades I-III)—no awards).

Designed for in-school use by pupils in intermediate grades (approximately grades IV-VI)—(no awards).

Designed for in-school use by pupils in junior and/or senior high schools (approximately grades VII-XII)—(no awards).

Regional Networks, Regional Organizations, and Regional and Clear-Channel Stations (5 to 50 kw)

Religious—First Award, *The Pastor's Study*, to WSB Atlanta, Ga.

Agricultural—First Award, *McClatchy Farm Review*, to McClatchy Broadcasting Co., Sacramento, Calif., broadcast over various California stations.

Honorable Mention, *The Voice From the Farm*, to WNOX Knoxville, Tenn.

—Special Citation, *The Farm Front*, to Farm Department, the Crosley Broadcasting Corp., Cincinnati, Ohio, broadcast over WLW Cincinnati.

Women's—First Award, *Knudsen Women's Forum*, to Columbia Pacific Network, broadcast over KNX Los Angeles, Calif.

Honorable Mention, *The Barbara Welles Show*, to WOR New York.

Cultural: Art, science, literature and music (but not straight music)—First Award, *The University Hour*, to Communication Center, U. of North Carolina, Chapel Hill, broadcast over various North Carolina stations.

Honorable mention, *Critically Speaking*, to KUOM Minneapolis (U. of Minnesota).

Dealing with personal and social problems—First Award, *Minnesota Mid-Century*, to KUOM Minneapolis (U. of Minnesota) broadcast at various times over other Minnesota stations.

Honorable mention, *The Untouchables*, to WBBM Chicago.

Presenting Public Issues (forums, etc.)—First Award, *Freedom Revisited*, to WCAU Philadelphia.

First Award, *The Killers*, to Public Service Division, WMCA New York.

News Interpretation (not straight reporting)—First Award, *E. W. Ziebarth News Analysis*, to WCCO Minneapolis, Minn.

Honorable Mention. *W. S. C. Views the News*, to KWSC Pullman (State College of Washington).

Furthering International Understanding—First Award, *The Ralph Story Show*, to Columbia Pacific Network, broadcast over KNX Los Angeles, Calif.

Honorable Mention, *It's a Small World*, to WMAQ Chicago, Ill.

—Special Citation, *Japanese Peace Conference*, to KFWB Hollywood, Calif.

Special One-Time Broadcasts—First Award, *Who Killed Dr. Drew?* to KOIN Portland, Ore.

Children's (for out-of-school listening)—First Award. *Let's Listen to a Story*, to Public Service Division, WMCA New York.

Honorable Mention, *Down Story Book Lane*, to Speech Dept., U. of Michigan (Ann Arbor).

Teen-Agers' (for out-of-school listening)—Honorable Mention, *WQXR Youth Forum*, to WQXR New York, and the *New York Times*.

Honorable Mention, *Young Book Reviewers*, to Public Service Div., WMCA New York.

Designed for in-school use by pupils in primary grades (approximately grades I-III)—First Award, *Old Tales and New*, to Minnesota School of the Air and KUOM Minneapolis (U. of Minnesota).

Designed for in-school use by pupils in intermediate grades (approximately grades IV-VI)—First Award, *Let's Sing Together*, to the Departments of Education of Manitoba, Alberta, and British Columbia, broadcast over CBW Winnipeg (Manitoba) and stations in Alberta and British Columbia.

Honorable Mention. *News of the Week*, to WHA Madison (U. of Wisconsin) broadcast over the Wisconsin State FM network.

Designed for in-school use by pupils

(Continued on page 46)

American-Standard ups its sales $14,000,000

Complete story of this big increase appeared in the March 28 Printers' Ink

"But," said an official of the company, "This sales increase in 1951 is only the beginning." Now readying the program for the second year, the company believes they can parlay increased sales results in the years to come.

Pick up your copy of the March 28 issue of Printers' Ink. (If you can't find it, send us 25¢ for another). Note the first of four paragraphs that are preceded by a "Bull's Eye." The first one says, "For the first time consistent schedules of local radio and TV" were used in conjunction with other local media.

At the close of 1951, this fine company had more than 7,000 retailers in all parts of the country tied in with their overall plan of selling and consistent advertising. Last year it spent around $2,000,000 for space advertising, and another $750,000 in cooperative advertising.

You will get two benefits from reading this Printers' Ink article:

First—a sales idea that you may be able to use right now. If you didn't get any of the $750,000 spent last year, contact the nearest American-Standard dealer. About 1,200 of them are scattered all over the country, one in every major market.

And second, you'll get a good example of the kind of material we give our 23,475 subscribers every week that consistently attracts to Printers' Ink the largest combined audience of advertisers and agencies that you can reach anywhere.

Bob Kenyon

Many things are involved in making any sales drive a success. But the backbone of the most successful campaign is, as was reported in this and other Printers' Ink articles, *consistent schedules.*

You find the same thing true in advertising *to* advertisers. Each year more radio stations start to advertise in Printers' Ink. Some use but 1/6 of a page to tell with consistent schedules the story of their market. Others use full pages. Whatever your budget allows, we believe that you, too, should tell our readers—the advertising, management, sales and agency executives who make the buying decisions—the importance of *your* market. "Advertising to Advertisers" is one of the most profitable ventures you ever started.

When can we have a talk with you about what Printers' Ink can do to help you sell more advertising?

ROBERT E. KENYON, JR.
ADVERTISING DIRECTOR

From where I sit *by* Joe Marsh

Handy's Cows— "Tired But Happy"

Handy Peterson is one person around here who really lives up to his name. Stopped by his fine-looking farm the other day and watched his cattle enjoying the latest brainstorm he had—a back-scratcher.

What Handy did was to cut a tractor tire in half—then he slid the open ends over the tops of two posts set in the ground—bolting the tire to the posts, making the inside edges come just about the height of a cow's back.

Handy's cattle-scratcher wasn't a very *big* idea as ideas go—but he figures the happier his cows are the better. (And he'll probably get more milk from them, too!)

From where I sit, it's important to keep your eye on the little things. They add up. For example, little differences of opinion are important. You may like a milkshake, my choice may be beer—the difference may be small in itself, but the right to have that opinion is one of the biggest *things in this democracy.*

Joe Marsh

ABC RATES

Stability This Year Seen by Noble

THERE will be no further decline in ABC's radio network rates this year, Edward J. Noble, board chairman and major stockholder in ABC, told the annual stockholders' meeting last Tuesday.

Asked about the possibility of further radio rate reductions, Mr. Noble answered, "Definitely not." On the contrary, he said, some radio rates "ought to be higher than they now are. I look for the next move to be an increase rather than a decrease."

Mr. Noble added that for the immediate future, ABC radio rates probably would remain at their present level.

Questioned as to ABC's low net income last year, less than 1% of the gross, Mr. Noble admitted the net "was not anywhere near what it ought to be." He blamed the small profit on the costs of TV operations, saying the TV network's overhead costs are as high now as they will be when there are video stations all over the country instead of in only 66 cites as at present.

Answering a query about reports of a decline in TV business, Robert Kintner, ABC president, said that "a weakness" in network TV business began to develop last December, with "the three major TV networks—NBC, CBS and ABC —the hardest hit." Shortage of TV stations, which he said has had a depressing effect on the medium, and increased costs of TV time and programs were the main causes of the decline in business, he said.

Mr. Kintner said he hoped "the period of cancellations" has ended and predicted that the end of the freeze April 14 will stimulate time sales. "I have great faith in the importance of television and in the ABC TV network and its five owned and operated TV stations," he declared. He said that the NBC and CBS head start in TV affiliations gave them a present advantage in clearing time, but that the advent of new stations will change that picture.

Asked if ABC was developing its own TV programs for sale to sponsors, Mr. Kintner replied in the affirmative but in a more limited degree than NBC and CBS, adding that after merger with United Paramount Theatres is effected "we hope to exceed those networks."

Mr. Noble indicated his unqualified belief that the merger will be approved by FCC, but regretted that the hearing has taken so long. However, he noted that with the ABC and UPT testimony concluded, the hearing is now substantially over.

Only official business of the stockholders' session was the re-election of the full slate of ABC directors: Earl E. Anderson, Alger B. Chapman, Robert H. Hinckley, Robert E. Kintner, Edward J. Noble, C. Nicholas Priaulx, Franklin S. Wood and Owen D. Young. Group will serve until the next annual meeting or until the UPT merger becomes effective.

RADIO SALES JOB

Recalled by WLS' Snyder

RADIO'S sales job today is similar to that in the late 20's and early 30's, "when we had to show people it worked," Glenn Snyder, general manager of WLS Chicago, said last week in commenting on the station's 28th anniversary.

"We had to talk hard to convince an advertiser that he should be a 52-week man, going year after year. We still have to advance the same arguments today, through it is interesting to notice how many of our year-around, long-term advertisers have grown and developed right along with radio, while the spasmodic type passed out of the picture.

"Problems we've always had with us—we welcome them as a challenge that forces us to tell and sell the full power of radio, a power that has never been equalled anywhere," Mr. Snyder said.

In April 1924, WLS housed its 500 w transmitter atop Sears, Roebuck & Co. (world's largest store, from which the call letters were taken) on the city's West Side, with a "remote" studio in the Hotel Sherman.

Sears Agricultural Foundation established the station, with Edgar Bill, retired owner-manager of WMBD Peoria, Ill., as the first station director. Prairie Farmer newspaper bought the station in October 1929 with Mr. Snyder as general manager.

ELECTRONIC FIRMS

DPA Grants Tax Writeoffs

SPEEDY tax writeoffs for a number of manufacturers turning out electronic products for the defense effort were among a list of applications approved by the Defense Production Administration from Feb. 16 to Feb 29. Certificates of necessity for plant expansion were approved for these firms making electronic equipment:

Raytheon Mfg. Co., $110,125; Superior Electric Co., $72,750; Diamond Mfg. Co., $10,019; Aerovox Corp., $118,983; Georgiana Massa, $54,000; Allied Control Co., $19,143 and $28,704; Doelcam Corp., $79,906; Kellett Aircraft Corp., $16,934; Electrical Industries Co., $4,795; Sylvania Electric Products, $85,461 and $685,582; Stackpole Carbon Co., $350,000; Bird Electronic Corp., $10,905; George W. Borg Corp., $122,118; RCA, $1,900,000; General Instrument Corp., $57,452; Operadio Mfg. Co., $23,513; Model Engine & Mfg. Co., $103,148; Electra Mfg. Co., $34,687; Canoga Corp., $12,755; Litton Industries, $6,000; Micro Precision Co., $58,093.

WKCR, educational radio outlet of Columbia U., New York, has completed tape recording of Shakespeare's "Antony and Cleopatra" which will be available to stations without charge.

FM PROGRESS
Smith Sees Strides

FM BROADCASTERS are overcoming their greatest mistake—failure to reach the public with the FM story, John H. Smith Jr., NARTB's FM director, said in an address last Monday to the National Capital Forge, American Public Relations Assn.

Mr. Smith joined with Robert Rogers, general manager of WGMS-AM-FM Washington, in pointing to the need for proper programming if listeners are to be drawn to the high-fidelity medium.

Sales of FM receivers are holding the 1951 level in Washington despite a drop of 35% in appliance lines, Mr. Smith said. He described results of the test FM promotion campaigns in Washington, North Carolina and Wisconsin. Other campaigns are to get under way soon. The three drives staged in recent months have been effective in making the public more conscious about FM, he explained.

Mr. Rogers said good-music programming had drawn many listeners to radio, with the nighttime FM-only service showing a constantly rising audience. He said good music programming "is likely to survive in the TV world." WGMS announcers, he added, are trained to a level delivery "without unusual emphasis or oil." Cards showing dial listings of all AM and FM stations are sent every family moving into the Washington area.

KSBW DRIVE
Hits 125% of ARC Goal

WHIRLWIND one-day KSBW Salinas, Calif.'s, Red Cross campaign over the seven-town Salinas Valley in March raised $48,000 or 125% of the fund quota in a nine-hour broadcast in which 1,500 workers participated in the drive among the valley's 80,000 people, the station reports.

KSBW General Manager John Cohan, fund drive chairman, and his partner, W. M. Oates, prerecorded announcements by 180 business, union, professional and other leaders calling for funds. Jaycees placed radios at 100-yard intervals in all business districts and seven sound trucks patrolled streets announcing for KSBW tune-in.

The campaign, covered by *Life*, Universal News Reel, *San Francisco Chronicle* and all wire services, featured a continuous KSBW broadcast from four pick-up points, interviewing citizens. Broadcasting also for MBS, Mr. Cohan says KSBW's build-up campaign attained one of the highest ratings ever recorded in the area.

U. S. SENATOR WILLIAM F. KNOWLAND. (R-Calif.) will conduct re-election campaign on 13 ABC California stations, Mon., May 12, 19 and 26, 9:45-10 p.m. PST, and June 2, 9:30-10 p.m. PST. Agency handling arrangements is Erwin, Wasey & Co., L. A.

WSYR's Local Radio Sales

UP 46%

WSYR---Message Form

To Caley Augustine
From W. R. Alford, Jr.
Date March 24, 1952
Subject RADIO PROMOTION

Up to March 15th, WSYR's local radio sales for 1952 are 46% more than 1951!

Local advertisers who are responsible for this increase are in the best position to test the real pulling power of all media. They know, day by day, which advertising is ringing the cash register.

And when they use WSYR almost 50% more than they did a year ago; when they prefer WSYR over any other local station — that's our best testimonial.

Beethoven
COURTESY DETROIT SYMPHONY ORCHESTRA

. . . a name to remember

To musicians the name Ludwig van Beethoven has been pre-eminent in the sphere of orchestral composition for 150 years. For real grandeur, perfect sense of beauty, and range, depth and truth of thought, Beethoven is possibly the greatest musician that ever lived. His major orchestral works, of which the Fifth Symphony is a classic example, have achieved a pinnacle of fame second to no other. Today, more than ever before, Beethoven's name is remembered for the originality and creative power of his music.

To time-buyers the name FORT INDUSTRY has been recognized as a leader in the field of broadcasting for 25 years. THE FORT INDUSTRY COMPANY is well-known, in each of the thriving markets where its stations are located, for attentive programming and high ideals of service in the public interest. Today, as in years past, FORT INDUSTRY is the name remembered by alert advertisers who want the greatest audience-response and maximum sales results.

editorial

Humphrey, Drop Dat Gun

AS REPORTED elsewhere in this issue, Sen. Hubert H. Humphrey (D-Minn.) has set out to remove institutional advertising of a "political" nature from the business expenses that can be deducted from corporation taxes.

He objects in particular to those advertisements which take an attitude on political questions and which, he says, have no connection with the business of the advertisers.

Is he really confining his interest to this particular kind of advertising? Hardly.

He is chairman of a Senate Small Business Subcommittee on Newsprint which has just released a report recommending ways of conserving paper. An illuminating part of that report reads: ". . . Postal subsidies and tax regulations tend to stimulate advertising that may be unnecessarily extravagant and not particularly productive. Possibly our government can give more consideration to its postal rates and tax regulations."

The inference there, of course, is that if advertising is curtailed, so will be the use of newsprint. You can't quarrel with that conclusion, nor with the attendant fact that newspaper profits, already perilously slim, will be tragically curtailed.

Can the government, either by legislative or administrative action, curtail newspaper advertising without also curtailing advertising in all other media? Not by a long shot.

Suppose Sen. Humphrey succeeds in getting the Internal Revenue Bureau to turn thumbs down on "political" institutional advertising. Who is to be the judge of what is "political" and what is not—a government agency which is itself as political as it is possible to be? Would a pro-Administration ad receive the same judgment as one that opposed Administration policy?

Quite obviously Sen. Humphrey's proposals must be answered firmly and immediately, else everybody in advertising suffer. This is not exclusively a defense to be fought by newspapers or any other media. The whole advertising business must rise to defend itself.

Ubiquitous Mr. Kobak

THE NEWS that Edgar Kobak, a name as well known as any in broadcasting management, is to be the president of the revived Advertising Research Foundation should reassure broadcasters about the future of this tripartite effort to learn more about the advertising business.

It is no secret that broadcasters have been skittish about joining up with an organization that seemed so heavily dominated by advertisers, agencies and rival media. Their not unnatural concern was that research projects undertaken by the ARF would be loaded in favor of the competition.

Perhaps broadcasters will be more willing to subscribe to ARF now that a man of intensive experience in all phases of advertising, including broadcasting, is administering it. We hope so.

Just about the only topic on which almost everybody in radio and television is in agreement these days is that some basic research is needed to find out what is wrong with present research and with its uses. That is a job which only an ARF-kind of group can do.

In the operations of ARF there seems to be an excellent chance to at least stimulate a search for comparable information about all media. In that direction lies the greatest hope for radio. For radio has suffered because advertisers have isolated it from other media in assessing the influence of TV.

Had advertisers had in their possession equally detailed information about TV's effect on, say, newspaper readership as they had about TV's effect on radio listening, it is probable that they would not have concentrated their pressure on lowering radio rates.

The ARF provides a chance to correct these inequities and to improve knowledge about all phases of advertising. It would be shortsighted of radio and television not to give this organization their full support.

Wrong Channels

IT IS DIFFICULT in these times of emotional and intellectual strain for even the sanest and most even-tempered to keep their heads. Hence, it is not surprising to find the officers of the American Civil Liberties Union losing theirs over the blacklisting issue in radio and TV.

However commendable the intentions of the ACLU in seeking to correct what has admittedly been an awkward and regrettable situation, the decision to take the matter to the FCC was not rational.

Misunderstandings too often crop up in discussions of this kind and so we wish to make some preliminary statements before explaining why we think the FCC is not qualified to deal with blacklisting.

First, it must be understood that regardless of its legality, the Communist Party, by the proved treason of many of its members, has been clearly shown to be a menace to the security of the United States. Broadcasters must be especially wary of Red infiltration which could, at whatever D-Day the Communists pick, seize radio-TV facilities which would be of greatest value in espionage and fifth column activity.

Concurrently, however, broadcasters must do everything consistent with security to protect the cherished principles of respect for the individual which distinguish democracy from totalitarianism. It is these principles which have unquestionably suffered in the publication of *Red Channels* and the attention paid to that accumulation of innuendo and doubtful facts.

It is not irresponsible to say that a good deal of fear hysteria has been brought about within radio and television by *Red Channels*. The important thing is to remember that it has not been fear of placing subversives in positions where they endanger security but rather fear of being associated with anyone remotely "controversial" that has prevailed.

The charge cannot be avoided that broadcasters and sponsors have acted timidly in regard to *Red Channels* and *Counterattack*. But, to get to the main point of this editorial, that is none of the FCC's business.

It is, after all, the responsibility of the broadcaster and nobody else to determine who does and does not go on the air. If Actor X can prove he has been deprived of a livelihood or has otherwise been damaged as a result of his being listed in *Red Channels*, his recourse must be to the courts, not to the FCC.

Indeed the ACLU would completely negate its own purposes if it were successful in prosecuting its preposterous complaint to the FCC. For broadcasters too have liberties which would be seriously infringed upon if the FCC were able to order them to put a specific person on the air or forbid them to take another off it.

One of the greatest enemies of democratic freedom is the concentration of power in the state. It ill suits the ACLU to be petitioning an agency of the state to assume more power over broadcasters and to limit the broadcasters' own discretionary authority.

our respects to:

CHARLES LIONEL GLETT

CBS has two vice presidents in Hollywood in charge of network services and both answer to the name of Charles Lionel Glett.

And it is not a coincidence of names. It's a case of one man carrying water on both shoulders. When CBS divided its broadcasting and telecasting operations into two separate corporations, Mr. Glett was affected by the division more tangibly than most other executives and employes.

Where the services of others were channeled either into CBS Radio or CBS-TV, Mr. Glett's talents were split right down the middle. He was made vice president in charge of network service, CBS Radio, Hollywood, and separately vice president in charge of network service, CBS-TV Hollywood.

This mouthful of titles sounds like a big load for one person to carry around. Mr. Glett is a man sturdy enough to handle big loads, however. That is how he came to CBS in the first place.

The term "Network Services" is CBS-talk for describing all operational functions of production except the creative. When the network needed a top-notch production administrator for its fast expanding Hollywood operations, it found him right in its own backyard.

After more than 30 years in motion picture business, Mr. Glett in 1949 was appointed vice president in charge of television for Don Lee Broadcasting System, Hollywood. His vast production experience immediately was put to use.

When CBS bought the pioneer Los Angeles TV station KTSL (now KNXT) from Don Lee, his services were acquired too. He joined CBS as administrative consultant on Jan. 1, 1950.

Subsequently the company was split into the present two corporations. Mr. Glett was handed his two jobs and two titles on August 23, 1951.

A slim, wiry man of medium height, with great drive, vast energy and a rather intense personality, his goal is efficiency and economy of operation in production. He doesn't spare himself or anyone else in his efforts to get them.

"I abhor waste," Mr. Glett says. By that he means not only waste of dollars and time, but anything—whether words, motion or thinking—that doesn't lead directly to desired goals.

Mr. Glett likes efficiency because it saves dollars. By economy he seeks not to do a job cheaply as possible, but to make sure that dol-

(Continued on page 60)

Five Years Ago-at 9:37 a.m. On April 16, 1947-

A telephone call to the KPRC newsroom brought the first bulletin of the Texas City disaster — minutes before news was flashed over press association wires.

From that moment . . . and for the next 48 hours . . . KPRC newsmen, under the on-the-spot direction of News Editor Pat Flaherty, broadcast to the Houston area and to the entire nation via NBC accurate, up-to-the-minute reports of one of America's major tragedies.

For this brilliant radio news coverage, KPRC was lauded by Texas City officials, by NBC listeners throughout the country, by officials of the National Broadcasting Company, and by the press through the annual **Headliners Awards.**

It was No Accident that KPRC Won Local and National Acclaim for Its Coverage at Texas City.

Today, still under Pat Flaherty's direction, KPRC maintains an even larger staff than five years ago . . . men whose full-time job is covering and broadcasting the news for KPRC.

Complete, accurate, instantaneous news coverage is a KPRC tradition that has helped to make us . . .

FIRST in the South's First Market!

'FATHER OF RADIO' HONORED

de Forest Feted by 500 at Waldorf-Astoria

DR. LEE de FOREST, famed inventor whose invention of the audion tube in 1907 paved the way for all radio developments since that time, was guest of honor Tuesday at a testimonial dinner held at New York's Waldorf-Astoria, where some 500 top radio engineers and executives gathered in tribute to the man who is generally termed the "Father of Radio."

Dinner was organized by the de Forest Pioneers, a group of men who have been associated with the inventive genius at some stage or other of his long career in radio—50 years in which he has been granted more than 300 patents. Hosts with the de Forest Pioneers were American Institute of Electrical Engineers, American Radio Relay League, Institute of Radio Engineers, NARTB, RTMA, SMPTE and Veteran Wireless Operators Assn.

The importance of the de Forest three-element vacuum tube, essential to every radio and television broadcast station and receiver as well as to sound motion pictures, radar, radiotelephony and radiotelegraphy and industrial electronic controls, was hailed by the banquet speakers.

Rear Admiral Ellery W. Stone, president, American Cable & Radio Corp., who presided at the dinner, traced Dr. de Forest's phenomenal career in his "keynote" speech and reported that the inventor, who will be 79 this August, is still active.

Filed Patent Application

When Dr. de Forest arrived in New York last week, Admiral Stone reported, his friends shied away from any mention of transistors, which seem likely to compete with the vacuum tube in many of its applications. That is, they did not mention the subject until Dr. de Forest himself brought it up, telling them that before leaving California he had filed patent applications for an improvement on the present transistor and stating "I think it's going to be a real good patent."

Herbert Hoover, chief banquet speaker, said that when Faraday was asked by a politician of his day what practical use could be made of his invention of a device for transforming energy into electricity, he repied: "Sir, some day you will tax it." If an American politician had asked Dr. de Forest the some question about his vacuum tube, Mr. Hoover suggested that his answer would have been: "Sir, some day you will try to regulate it with laws."

"And now," said the former president who, as Secretary of Commerce during the early 20's was responsible for licensing the nation's first broadcasting stations, "the managers of this $6 billion industry are haunted by day with summons to Washington and by night theirs is the restless pillow of regulation nightmares in their sleep."

Mr. Hoover hailed Dr. de Forest for bringing "infinite blessings to mankind by the instant transmission into every home of the news, of great music, of great drama and great lifts in education.

"But," Mr. Hoover went on, "he has some grave matters to answer for. He has made it possible to transmit the worst music on earth —and political speeches. Perhaps the worst of his results is the singing commercial that plugs in when we try to get the news. And then there is the fellow who cannot sponsor a program without periodic interruption of huckster chatter into the midst of an inspiring musical presentation or a great drama.

Suggests Another Invention

"Dr. de Forest could redeem himself if he would produce another great invention. That is the push button by which we could transmit our emotions instantly back to the broadcasters. It would explode our feelings over the air instead of having their inner gnawing of our morals."

Charles Edison, former governor of New Jersey, recalled the association of Dr. de Forest with his father, Thomas A. Edison. E. N. Pickerill, president of the de Forest Pioneers, presented a bust of Dr. de Forest to Yale U., from whose Sheffield Scientific School the inventor had earned his B.S. in 1896 and his Ph.D. in 1899. Irving S. Olds, chairman of the board, U. S. Steel Corp., accepted the gift on behalf of the university.

INTERWOVEN PLANS

Minute Spot Drive Prepared

FOR the third successive year, Interwoven Stocking Co., New Brunswick, N. J., has prepared one-minute radio spots for dealers and radio stations throughout the country to launch its promotion for Father's Day.

Last year, as a result of the unusual tie-in with dealers and local stations, more than 700 Interwoven dealers used the spots (which are supplied free) and bought time on local stations. This year the number of dealers using the service is expected to increase heavily.

The announcements—20 one-minute spots—are made available to the Interwoven dealers throughout the country. In addition the company also supplies radio stations with spot announcements in every part of the country where Interwoven dealers are located.

The promotion for Father's Day holiday is the second largest sales season for the stocking company—second only to Christmas. Thus its annual campaign begins at this time of the year.

WBNS Doesn't Fall Back on the "NET"

With the greatest of ease . . . WBNS programming swings back and forth from top CBS shows to locally-produced programs built around beloved Ohio personalities. Blessed with a choice of all the best CBS talent, WBNS knows sponsors can't miss when local favorites add their endorsement to selling messages aimed at Central Ohio.

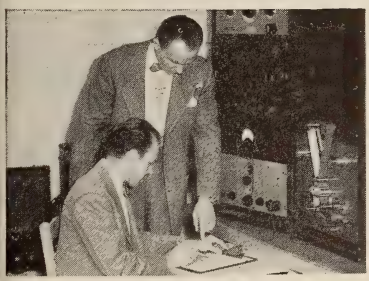
GROUCHO MARX and Bob Dwan (co-director of "You Bet Your Life" with Bernie Smith) check the tape of a recent broadcast. Tight, noisefree splices are easily made — the only equipment required is ordinary scissors and "Scotch" Splicing Tape.



Groucho takes to tape

Sparkling wit -!- skillful tape editing = radio's top quiz show... "YOU BET YOUR LIFE" (NBC)

How funny would a comedian be without his script writers? Groucho Marx supplies the hilarious answer to that one every week on "You Bet Your Life". His deft ad libs ("You say you're a philatelist? So am I...I figure if it's gonna happen, it's gonna happen") are captured on tape during relaxed non-broadcast sessions with studio audiences; the tape is skillfully edited to produce a laugh-packed show that has climbed to top listenership ratings.

"Scotch" Sound Recording Tape is used exclusively for "You Bet Your Life."

EIGHTY 3M SOUND ENGINEERS in the field —backed by 20 technical experts in the 3M Laboratories—stand ready to give you technical assistance with any recording problem you may have. Call your local 3M Service Representative, or write us direct: Dept. BT-42, Minn. Mining & Mfg. Co., St. Paul 6.

Here's why recording engineers use more "SCOTCH" Sound Recording Tape than all other brands combined

- Lower noise level than any other tape
- Greater output sensitivity than any other tape
- Better reel-to-reel uniformity than any other tape
- Erases cleaner than any other tape
- No curling or cupping — always lies flat on head
- Lubricated for longer tape life

3M COMPANY

IMPORTANT: There's more than one brand of sound recording tape. Insist on the "SCOTCH" brand, the *lubricated* tape that gives matchless fidelity, clarity of reproduction, freedom from distortion. Used by all major networks and for master recording by leading record companies.

The term "SCOTCH" and the plaid design are registered trademarks for Sound Recording Tape made in U.S.A. by MINNESOTA MINING & MFG. CO., St. Paul 6, Minn.— also makers of "Scotch" Brand Pressure-sensitive Tapes, "Underseal" Rubberized Coating, "Scotchlite" Reflective Sheeting, "Safety-Walk" Non-Slip Surfacing, "3M" Abrasives, "3M" Adhesives. General Export: Minn. Mining & Mfg. Co., International Division, 270 Park Avenue, New York 17, N. Y. In Canada: Minn. Mining & Mfg. of Canada, Ltd., London, Canada.

AGENCY STATUS

Ver Standig Sees New Age

THE DAY of the "15% house" in the advertising agency business is passing, M. Belmont Ver Standig, head of the Washington agency bearing his name, told the Washington Ad Club last Tuesday in an agency day panel, presided over by Joseph Katz, president of Joseph Katz Co., Baltimore-New York.

Forseeing the end of the old "blood and guts" method of "slapping out advertising," Mr. Ver Standig said advertisers finally are placing agencies "in their proper light—not as people who just 'do advertising' but as counsellors to be consulted in all fields pertaining to advertising, merchandising and selling."

He contended that every agency must be a marketing agency, with clients entitled to demand merchandising, marketing and sales help including research.

"The time is here now in some agencies, and will soon be in others," he said, "when you will no longer be able to sell space or time according to routine methods and facts concerning readership, listeners and viewers. We now know that readers aren't necessarily buyers, listeners aren't necessarily customers and viewers just aren't necessarily interested.

"With the high cost of media, smart advertising men are demanding proof of salesworthiness from media. So a great deal of media testing is being done by agencies—and, let me caution you on this: You should know enough about media testing and good copy and advertising techniques to be sure that the agency testing your media is using fair samples. If not, you can come out on the short end."

Mr. Katz, in a serious departure from his humorous approach to the whole "crazy business" of advertising, asserted that too much lip service is given to the "responsibility" of media. It's the advertising message that counts, he said, pointing out that the media "constitutes the hall the advertiser hires" and that media should not be blamed if the advertising message isn't right. He cited the recent case of a 1.6 rating through which an advertiser doubled his business, while a 24 rating "didn't sell anything."

Mr. Katz was introduced as the "account executive" for the agency which had just been named by the Democratic National Committee to handle the 1952 advertising campaign for the Presidential elections.

Henry J. Kaufman, head of Henry J. Kaufman & Associates, Washington, in his panel stint, suggested to Mr. Katz that a good slogan for the campaign might be: "Honesty is no substitute for experience."

Other panel participants were Bill Sigmund of Kaufman, Alvin Miller, Ernie Johnson, Henry Kronstadt, Gervis Stark, Alvin Epstein, Charles Isbel (Advertising, Inc.) and Robert J. Enders.

FOUR radio stations, KOMO Seattle, KHQ Spokane, KFI Los Angeles and KGW Portland, celebrate 25th anniversary as NBC affiliates, this month. KNBC, owned and operated by NBC, has been San Francisco outlet also for 25 years.

front office

ROBERT S. deSOUSA, account executive, KNBH (TV) Hollywood, appointed sales manager.

JACK M. LOGAN, formerly account executive with KOOL Phoenix, Ariz., and general manager of KLUF Galveston, Tex., joins advertising staff of KRLD Dallas.

CHARLES CLIFTON HOWARD named resident manager of KISW (FM) Seattle, replacing ROBERT WALDRON who transfers to KRKL Kirkland, Wash.

WILLIAM E. WALKER, sales staff, KIKI Honolulu, appointed sales manager.

Mr. Walker

WILLIAM SANFORD, former news editor at KMJ Fresno, Calif., named manager of station.

EARL A. PETERSON, division manager of Montgomery Ward's major appliance division, to sales staff of WTCN-TV Minneapolis-St. Paul.

TOM UNDERWOOD, WPDQ Jacksonville, Fla., to WGRC Louisville, Ky., as commercial manager.

NEAL B. BUNN, program director, KNEA Jonesboro, Ark., promoted to assistant manager.

CARL W. HILL, account executive, KFOB Long Beach, Calif., and ROBERT WAYNE MULLER, account executive, KIEV Glendale, Calif., to KBIG Avalon in similar capacities.

BEN BURDETT, transmitter technician, KSL Salt Lake City, transfers to sales staff.

ERNEST LEE, assistant personnel manager, *Los Angeles Times*, L. A., to KTTV (TV) Hollywood in same capacity.

NORMAN FLYNN, salesman, WENE Binghamton-Endicott, N. Y., appointed sales manager effective April 8.

Personals . . .

BERTRAM LEBHAR Jr., director of WMGM New York and head of MGM Radio Attractions, and SAM ROSSANT, WMGM account executive, won blue ribbon pair event in Eastern Tournament of American Contract Bridge League, held in New York fortnight ago. . . . ARTHUR E. GERBEL Jr., assistant manager, KJR Seattle, elected secretary-treasurer of Seattle Rotary Club. . . . GORDON B. McLENDON, president of Liberty Broadcasting System, named "Man of the Month" for April of East Texas Chamber of Commerce.

WHEN KMA Shenandoah, Iowa, President Edward May, son of the station's founder, presented this engraved silver cup for 25 years in radio to Bernice Currier, station's homemaker, there was a total of 180 years' service in broadcasting represented. The KMA veterans attending, and their length of service, were (l to r) Tony Koelker, assistant manager (16 years); Mr. May; Gretta Bellamy (27 years); Mrs. Currier; Frank Field (26 years); Adella Shoemaker (9 years); Doris Murphy (23 years), and Mrs. Earl May, widow of founder. Mr. May practically "used the KMA microphone for a teething ring," station pointed out.

Would you throw 357 million tax dollars into HELL'S CANYON?

The government may do it for you — using *your* tax money to promote a giant federal power monopoly.

The plan is to spend more than a third of a billion tax dollars to build a dam and hydro-electric plant on the Snake River along the Idaho-Oregon border. The site: Hell's Canyon.

This would be a needless expense because the local electric light and power company already has offered to develop the power *at no cost* to American taxpayers. For more than four years the company, with the wholehearted support of its customers, has been ready with plans for a series of five dams.

But the job is held up. For there are those who want the federal government to take over electricity — as well as medicine and other businesses and services. They insist that the government develop the power even though it takes longer and costs many more millions.

Congress will make the final choice within the next few months. And these are the facts that will be considered:

If the local company does the job

The company and its investors will pay for it.

It will pay about $6 million a year in local, state and federal taxes.

Power produced will be shared by all with rates regulated by public commissions.

All dams can be completed and power available in about 2½ years.

If the federal government does the job

You **and every other American taxpayer will put up the money.**

Little or no local, state or federal taxes will be paid.

Specially favored groups will have first call on all power. Rates won't be regulated by state commissions.

Six years to build one high, costly dam. Ten years to complete project.

Those who want a socialistic America know that when government takes over electricity, it is a step toward the control of every business, farm and family. The time to stop the spread of socialized electricity is now. That's why these facts are brought to you by America's business-managed, tax-paying Electric Light and Power Companies*.

Wilson Profiles Lamb

EDWARD LAMB, owner of WTVN (TV) Columbus and WICU (TV) Erie, was the subject of a column by Earl Wilson, nationally-known New York newspaperman. Mr. Wilson wrote that Mr. Lamb was "an unusual man" because, "he wants to give the public something." Mr. Lamb told Mr. Wilson of his proposal to set aside a couple of hours a day for "nonprofit" programs. In addition to the TV stations, Mr. Lamb owns WTOD, WTRT (FM) Toledo and WHOO-AM-FM Orlando and is publisher of the *Erie Dispatch.*

NEW public service series, *The Thin Blue Line* on KNBH(TV) Hollywood, features discussions of current public interest concerning L. A. Police Force by its members.

Strictly Business

(Continued from page 20)

company's Chicago office in August 1949, started with a sales force of two men and three office girls representing two stations. The list has grown to eight stations, with staffs in Chicago, New York and San Francisco.

He has been in the broadcasting business since 1938, when he worked for $2.50 weekly as a singer at WDWS Champaign while attending the U. of Illinois. A star debater, athlete, dramatist and student government official, he spent his first two years studying law at Harvard U. after winning the first National Elks Foundation $1,000 cash scholarship. He was chosen the most outstanding high school or preparatory school graduate in the competition after graduation from DuQuoin (Ill.) High School, the city where he was born and raised.

After graduation from Illinois in 1938, he learned about radio station operation "from the broom up" at WDWS and at WDAN Danville, Ill., later freelancing in Florida. Still favoring the Midwest, he returned to Chicago and was hired as a credit representative for the U. S. Gypsum Co. after cornering the personnel director on a slow Saturday morning and getting a job for which he didn't apply.

He left to join the Navy as an ensign in 1943. Helping to keep Navy planes flying, he spent most of his service time in the Pelau Islands, where he discovered over a five-month period in Anguar that the Army and Navy got along famously despite reports to the contrary.

After his Navy duty, Mr. Layman worked as an account executive at T. R. Bauerle Agency and Grant Adv. in Chicago before selling network time for ABC there.

He married the former Betty Jane Lovegren, whom he met at the U. of Illinois, and they live in west suburban Hinsdale with their children, Susan Gay, 8, and twins Carol Lyn and Cathy Lea, 4.

Mr. Layman is a member of the Chicago Television Council. He also works actively in Hinsdale civic affairs and is a member of the Union Church there.

FREEPORT, TEX., GRANT

WAFB Withdraws Protest

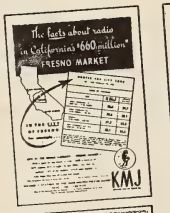
BRAZOSPORT Broadcasting Co., Freeport, Tex., has been granted 1460 kc with 500 w, daytime. FCC adopted an initial decision recommending grant.

About three weeks after the issuance of the initial decision by Hearing Examiner Hugh B. Hutchison, WAFB Baton Rouge, La., filed a petition objecting to the proposal, asserting that it feared interference [B•T, March 24, 17].

The FCC stayed the effectiveness of the initial decision in order to study the matter further. Later, WAFB withdrew its objections.

added information

for busy buyers of space and time



publishers and station operators are providing another source of timely media information

Getting *standard* media information fast poses no problem . . . you have Standard Rate & Data and CONSUMER MARKETS handy.

It's the media information that is *not standard* that is harder to keep up with . . . trends—market coverage data—by trading areas—by class or type or age.

Many publishers and station operators appreciate that media buyers do not always have time to call for help; or even for careful study of all filed literature. **Last year approximately 1,050 of them put supplementary information about their publications and stations near their listings in SRDS, and near the appropriate market data in CONSUMER MARKETS.**

Media buyers tell us they appreciate finding helpful "*non-standard*" information right there when they are referring to standard market or media data. They say it often helps them select media; sometimes helps them defend their selections.

In the course of your daily use of SRDS monthly publications and CONSUMER MARKETS, don't forget—in Service-Ads like these there is *added information* for busy media buyers.

lars, like other tools, are well used.

He believes the creative elements must be given all the tools, materials and assistance they require to do their end of the job. Whatever economies are effected must not be at expense of quality of production.

"By acting in close teamwork with the creative people, the production administrator can actively help in insuring quality of the final show," he declares. Summing it up, Mr. Glett says, "My job is to work hand-in-hand with the creators to help get a good end product at realistic cost."

Born in New York March 13, 1902, Mr. Glett attended Public School 42, but by the time he enrolled in high school, he had to go to work. He spent only one year in regular day high school. In his second year he became stockroom boy for the old Motion Picture News. He continued high school at night for another 12 months. Then he enrolled in New York School of Journalism night classes. After two years his formal education was completed.

Meanwhile, he changed jobs. He joined Far East Film Co. in 1918. The following year at 17 he went to Europe for that firm.

He went to Chicago in 1920 and got a job selling reissues of Triangle movies. During his next two years Mr. Glett learned the film distribution business. He joined Goldwyn Film Co. in 1922 and a year later became mid-west sales representative for United Artists, distributing movies of Mary Pickford, Douglas Fairbanks, Charles Chaplin and D. W. Griffith.

Forms Production Unit

The ambitious young man went to work in 1925 for George Matthew Adams' newspaper syndicate, which handled Edgar A. Guest poems. Interesting exhibitors in a series of short subjects based on Guest's works, his employer gave him the go-ahead to form his own film production unit.

Mr. Glett wrote, directed, produced and edited 18 of these films during 1926. He won a national trade paper blue ribbon award for his second picture, *The Yellow Dog*. After this promising start, sound came in.

Some months later he produced Paramount's first sound short, *Song of the Builder*, ending a ten-year period that Mr. Glett now looks back on as his apprenticeship in motion pictures.

In 1928 he became production manager of Western Electric's motion picture subsidiary, Audio. He continued in that post until 1931, resigning to again enter independent production.

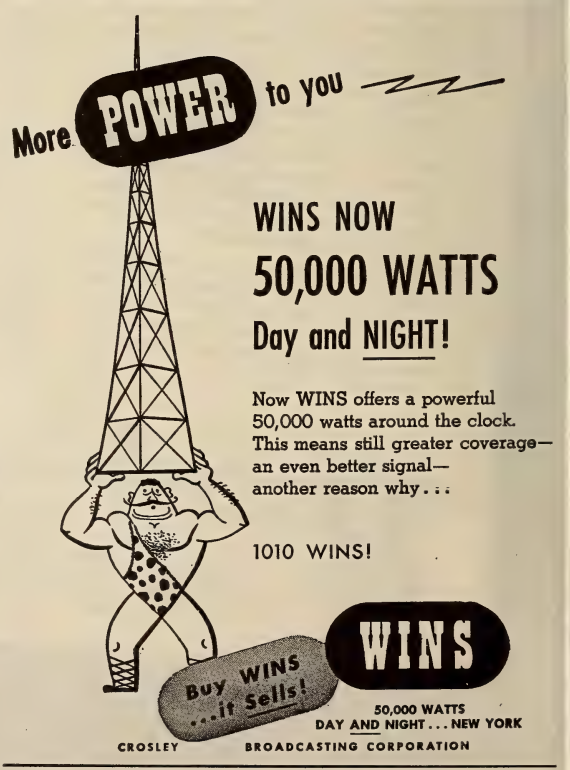
Mr. Glett went broke in 1932 when backers defaulted on their notes during the government bank holiday. Undaunted and determined to pay off obligations, he borrowed $350 and went to England where U. S. dollars weren't frozen. He arrived in London with $62. By week-end he couldn't even pay his hotel bill. He managed, however, to liquidate all his firm's foreign holdings and brought back enough dollars to New York to pay off company debts. With bills paid in full, Mr. Glett had $100 left.

Rejoining Western Electric in 1934, he was made vice president in charge of production. When that company took over the former Paramount Studios in Astoria, Long Island, in 1937 he became vice president of studio and production operations, continuing in that capacity for the next two years.

Then Mr. Glett joined director William Dieterle in Hollywood as associate producer and they formed William Dieterle Productions. Their first picture, *The Devil and Daniel Webster*, won two Academy awards.

This association ended in April 1942 when he became vice president and general manager of General Service (United Artists lot) in charge of production and studio operations for about one year.

Shortly afterward Mr. Glett was elected vice president of Myron Selznick Agency, handling many top film stars, directors, producers and writers. He took military leave-of-absence from the agency in 1943 to join the Army Signal Corps. Still in service upon the death of Myron Selznick in 1944, Major Glett was elected the talent agency's president by estate executors.



As Chief of Operations Branch, SCPC, Western division, while in service, Major Glett supervised from 20 to 25 active production units making over 500 training and indoctrination films.

Returning to civilian life in 1945, he rejoined the Selznick family. He became vice president and general manager in charge of production and studio opertions for David O. Selznick Studio. Next move was three years later to Motion Picture Center Studios as managing director.

Mr. Glett joined Don Lee Broadcasting System on June 7, 1949 as vice president in charge of TV. When CBS bought Don Lee TV station some months later, his present association began.

Faced with the problem of creating a production organization for an industry entering into a period of rapid expansion, but at a rate not yet measurable, he found a solution that Mr. Glett believes anticipates any increasing or decreasing work load.

He set about creating basic units for each phase of physical production. Once these were established and their functions clearly defined, he had a foundation that could be expanded indefinitely to handle any

flow of production with "quality the goal regardless of any other consideration."

Work and his family are almost Mr. Glett's only interests. He enjoys the relaxation of his Beverly Hills home shared by Mrs. Glett, the former Clarice Allen and their 12-year-old daughter, Patricia. Not a hobbyist, he works around the house and yard on week-ends, and has become an expert rose fancier and carpenter.

A reserve officer, a member of Amvets, and Retired Military Officer's Assn., he is a founder and board director of Television Broadcasters of Southern California.

Total Ads Up

TOTAL national advertising in four major media—network radio, network TV, magazines and Sunday newspaper supplements—reached a new all-time high in dollar volume in 1951 of $873,428,513, up 17.1% over the 1950 aggregate, Magazine Advertising Bureau has reported. Figures came from tabulations kept by Publishers Information Bureau, which showed a gain over 1950 for every one of the 28 industry classes included in the PIB service. PIB shows that 1951 was the top year for network TV and magazines; network radio and Sunday supplements fell below their 1950 levels of advertising revenue.

EMPLOYES wore "Slave" caps and management wore "Top Brass" helmets at March 24 annual meeting of Chesapeake Chapter, American Assn. of Advertising Agencies in Baltimore. Among those attending were (l to r) Sidney A. Levyne, S. A. Levyne Co., Baltimore; M. Belmont Ver Standig, M. Belmont Ver Standig Agency, Washington; Joseph Katz, Joseph Katz Co., Baltimore; Jerry Collins, media director, Ver Standig Agency; Robert V. Walsh, radio-TV director, Van Sant, Dugdale & Co., Baltimore; Edgar Kassan, account executive, Joseph Katz Co., and Theodore A. Newhoff, Theodore A. Newhoff Agency, Baltimore.

WOWO HEALTH CONSERVATION

Joint Cooperation With Others Planned

ANNOUNCEMENT that Westinghouse's WOWO Fort Wayne, Ind., has embarked upon a health conservation project came at the 13th annual Farm Achievement Award banquet, sponsored by the station. Franklin Tooke, general manager, who will direct the project, said WOWO believes the work will be counted among the most important public service activities ever undertaken by an individual radio station.

WOWO will co-operate in the project with other organizations throughout Indiana, Ohio and Michigan, which hope to improve environmental factors affecting health, Mr. Tooke said. He indicated that there are many professions devoted to curing disease, but few dedicated to preserving health.

The project, "Health From the Soil Up," will include any activity pertaining to physical, mental, social or community health, the station manager said. He stated WOWO personnel will work with all individuals or agencies who seek the common goal of good health, including extension departments of state universities, county agents, home demonstration agents, soil conservation men, health councils and services, among others.

Some objectives are: Natural resources use and conservation; improvement in the average home's ration balance; complete health checks for school children, with hot and better lunches, and a closer approach to ideal health conservation through home environment, personal habits and disease control.

The project also would improve health and conservation education in schools, with church participation in these activities; add more organized recreation for youths and adults and more county health councils, and promote contests, displays and demonstrations of health maintenance at local events.

WMRY Increases Rates

WMRY New Orleans has announced a 15-25% rate increase in both local and national advertising. Mort Silverman, general and commercial manager, explained that this was the first increase since May 1, 1950, at the time when the station went into all-Negro programming.

'OPERATION BLOOD BANK'

Stations Go All Out in Community Campaigns

OPERATION Blood Bank, a project to meet the needs of the armed forces in Korea, and other Red Cross projects have been an unqualified success at the community level, judging by reports from local stations.

Participation of radio-TV networks has been reported previously in detail in past issues of BROADCASTING • TELECASTING, with commendations from top government authorities. But the American Red Cross and other organizations also have been lavish in their praise of stations who evolved promotional plans to put over local quotas. Staffmen literally gave their blood in many instances.

The techniques and promotions varied throughout the country, but as always, the results were uniformly the same—successful. Typical of the reports submitted by stations were these:

In Pennsylvania, WMGW Meadville cooperated with the Red Cross and local chamber of commerce by remaining on the air an hour past signoffs for several nights. On one stunt, two announcers volunteered to sleep in the local park all night if five people would each donate a pint of blood to meet quotas. They got the blood—so announcers Jim Strickler and Mike D'Angelo slept in the park—as advertised.

In New York, WFAS-AM-FM White Plains had five staffers donate blood and describe their reactions in the process via tape recorder. Staffers included Joan Schneider, assistant program director; Fran Keegan, traffic supervisor; Bob Juhrenm, copywriter; Lenny Dillon, sportscaster, and Dan Valle, assistant chief announcer.

WLAM Lewiston, Me., announcer Norm Card, who is m.c. on *WLAM Bandstand*, went through the Red Cross bloodmobile "line" when the donor vehicle visited there. He interviewed Red Cross workers and nurses at each step, giving his personal reaction, including the period when he was giving his blood. Quota for the Bloodmobile visit was 100 pints. Armed Forces, for whom the blood was earmarked, received 119 pints from residents of Lewiston and Auburn.

Swinging south to Georgia, WFRC Athens credits H. Randolph Holder, news director, for "single-handedly" putting over the most successful blood bank drive in the city's history. Over 250 pints were pledged—well over quota.

In Texas, Charlie Harrison, program director at KFRD Rosenberg, greeted the arrival of a Red Cross bloodmobile with a donation. He gave listeners a first-hand report on its effects and on procedure to be followed.

In the Midwest, reports were received from Wisconsin, Michigan, Missouri, Nebraska and Minnesota. WTMJ-AM-TV Milwaukee set up a "Five Thousand Club," seeking that number of pledges during a two-week campaign. Result: a total of 7,612 came in. A service award was offered to donors. Station cooperated with the Milwaukee County Red Cross Chapter and Junior League Blood Center.

A total of 3,871 pints of blood were promised the Detroit chapter of ARC for Korea veterans as the result of a feature film promotion on WXYZ-TV there. Sponsor of *Motion Picture Academy* series, the Rose Jewelry Co. devoted commercial time to appeals. Switchboard was kept open to 3 a.m. with many celebrities contributing blood.

Kansas City Efforts

In Kansas City the voices of some 1951 flood victims offered a helping hand in the local drive. KMBC there used transcribed statements of victims to push the drive. Heavy play was given by WDAF WHB KCMO KCKN there, with WDAF-TV using still picture as well.

KMBC reported praise from civic leaders, local Red Cross directors and E. Rolland Harriman, national American Red Cross director. Other stations carrying transcriptions reported favorable listener comment. Number of pledges doubled after spot interviews were begun.

In Nebraska, KWBE Beatrice went promotionally all-out with the theme, "Anything for the Red Cross." The gimmicks consisted of a baby-sitting auction by Acting Manager Bud Pentz and announcer Bill Boyce. Top bidders got the services of the two staffmen for a night. Station made a tape recording of the proceedings with "hilarious" results after news stories and promotion put over the idea.

In Minnesota, KAUS Austin took dramatic means to remind listeners of blood needs. Staffers donated blood after station signed off in mid-afternoon and invited listeners to join in. Ten daily announcements pointed up arrival of the Red Cross bloodmobile. Total of 1,309 pints of blood was collected in five-day visit.

On the West Coast, Bill Weaver's "B-Day" drive at KCBS San Francisco netted the armed forces 230 pints of blood. Working with local baseball club, Mr. Weaver passed out complimentary baseball tickets for exhibition games to donors. Tributes were paid Arthur Hull Hayes, CBS San Francisco vice president and KCBS general manager, by the Red Cross.

CITRUS SPOT TEST

Memphis, Louisville Underway

SPOT budget for Memphis and Louisville during the Florida Citrus Commission's $25,000 intensive educational and advertising campaign on selling Florida citrus fruits will take $12,414 of the total. The two-month promotion campaign began last Monday [B•T, April 7] and calls for $5,971 to be spent in Memphis among WHHM WMC WDIA WMPS and $6,443 in Louisville among WHAS WINN WKLO WAVE.

J. Walter Thompson Co. is handling the tests, to be conducted with radio, newspapers and display material for retail food stores. The campaign will test the proposed new method of selling citrus fruits in Memphis by the pound, the system used in selling most fruits and vegetables, and in Louisville by the present method of selling by the dozen, with results to be studied for control and comparison purposes.

TEMPERATURE STABILITY

Research Aids Production

BOTTLENECK in manufacture of certain electronic equipment has been eliminated through Navy research, according to the Office of Technical Services in the Dept. of Commerce. New development evolves around temperature stability, a basic requirement in electronic equipment.

OTS noted that tuning and other operating characteristics of equipment should remain unchanged even when temperature fluctuates. To avoid temperature - produced changes, electronic components are used as "compensating" elements. The Navy devised a test which, when applying a quick "heat pulse," produces same effects as obtained by a long heating run. New technique requires less time, is less costly and involves smaller test equipment.

Theory is outlined in a 27-page book, *A New Instrument for the Rapid Measurement of Capacitor Temperature Coefficients*. It is available for $1 at OTS, Dept. of Commerce, Washington 25, D. C.

WCHS Full Time

FULL-TIME, around-the-clock operation by WCHS Charleston, W. Va., has been announced by John T. Gelder Jr., vice president and general manager of the CBS affiliate. WCHS will program 24 hours daily, seven days a week, with accent on standard music designed to reach a general audience. Doug Martin will handle the record shows. Station operates on 580 kc with 5 kw.

New PULSE Surveys Show "We've Done It Again"

KMTV
Omaha's No. 1 TV Station

KMTV has done it again! Latest Pulse figures show that KMTV leads in 66 out of 100 Class A (6 to 11 P.M.) quarter-hours—Monday thru Friday. For the entire week, KMTV leads in 88 out of 140 Class A quarter-hours or 62.8% of all Class A quarter-hours.

KMTV has a bright picture on afternoon ratings, too, with a 53% share of the weekday afternoon audience and a 54% share on Saturday. For the best in TV coverage of the rich Omaha area, contact the Katz Agency or KMTV today.

KMA
The Most Listened To Station in Its Vast Rural Midwest Area

Pulse figures released in January, 1952 for 23 rural Iowa, Nebraska and Missouri counties show that KMA is the Most Listened To Station during 234 ¼-hour period throughout the week. This is more than all other radio stations heard in this area combined. KMA delivers 117 additional BMB counties not included in the Pulse.

KMA gives you more concentrated coverage of this rich, midwestern, rural market at less than 1/3 the cost of the 2nd place station. Contact Avery-Knodel or KMA today.

in our 7th year

Did You Realize That You Can Sell Eleven Key Markets with TV for as little as $590.50 A WEEK?

Spot Television is
one of the most economical media available today—
and certainly the most effective per dollar.

Yes, TV advertising on the outstanding programs
of these eleven stations can be purchased for as little as
$590.50 a week. That's an average of
$53.68 per market per week.

That's low cost (and highly effective) advertising.
Worth buying into right now.

features Betty Hoyt with market operators as guests. Program ties in with point-of-sale material and products featured in newspaper ads for timely, direct merchandising.

NBC HOLLYWOOD KNBH channel 4

TO SELL THE BUYING MILLIONS IN AMERICA'S *2ND LARGEST TV MARKET*

APRIL 14, 1952

TELECASTING

TV APPLICATIONS

FCC Will Begin Processing July 1

PROCESSING of TV applications, after a 45-month freeze, begins July 1—78 days after the April 14 issuance of the FCC's Sixth Order and Report.

Applications will be considered on a channel-by-channel basis. That is, qualified applicants seeking a channel for which there is no competing application will be granted a construction permit no matter how many applications are filed for other facilities in the same city.

A temporary expediting procedure has been set up which has as its prime purpose to get TV service to those cities which have none today. A subsidiary purpose is to process UHF applications as early as possible.

Four processing lines will be set up.

Line A will process: (1) changes required to be made by 30 of the 108 existing TV stations immediately following the effective date of the final report (30 days after the date of publication in the *Federal Register*). (2) Applications for cities which are not now receiving TV service. As a rough rule of thumb, the Commission designated such cities as those 40 miles from the nearest TV transmitter. Processing will start for such non-TV served cities in order of population.

Line B will process, in the following order, applications for cities now receiving TV service: (1) UHF applications where no commercial VHF channels are assigned. (2) UHF applications where all commercial VHF channels are occupied. (3) Applications for cities with one TV service but no local station. (4) Applications for cities with one station and no other TV service. (5) All other applications for cities which are now getting two or more TV services.

Line C will process requests for modifications of CPs made after July 1, petitions for reconsideration, waivers of hearings, etc.

Line D will process applications

(Continued on page 75)

FOUR WASTED YEARS? . . . . . An Editorial

WAS THE freeze necessary? That's the startling question which overrides all others in appraising the FCC's final Television Report, born of nearly four years' labor.

The what, why and wherefore of the Great Thaw, biggest event in broadcast annals, are recounted in these pages. The full text, which becomes the television law of the land, is published as a supplement to this issue.

In capsule, the allocations provide for 2,053 stations in 1,291 communities, including the territories. Of these 617 are VHF, 1,436 UHF. The big lament is that of an exorbitant 242-channel reservation for noncommercial educational stations, a lusty 80 are VHF—facilities that properly should be used to serve vast mass audiences, both urban and rural, rather than lie fallow, awaiting single-purpose educational occupancies which may never come. Thus, the educators get 11.8% of total assignments and 13% of the coveted VHFs.

While it's futile now to rehash the need for the freeze, it nevertheless behooves us to see where we have been and where we are going. The freeze was imposed in September 1948, when the FCC was under terrific duress. The reason given for the freeze (which was to have been of a few months duration) was something called troposphere, and how this interference was to be circumvented. The final report scarcely mentions it.

The 43-month freeze has brought certain pluses. There are wider separations and there's offset carrier operation. There are other admitted engineering refinements.

The minuses: A sell-out to the educators, who were hardly aware of TV's existence in 1948. The onslaught of politicians who recognized TV as the difference between winning and losing elections. The Klondike rush of applicants who regard a TV license *anywhere* as a modern-day Wallingford. Most important, denial of service to many millions of people.

The FCC certainly didn't need four years to emerge with a plan which, at best, still must be viewed as abortive. It provides no more service for large areas than did the 1948 report —with certain glaring exceptions. Whatever new desirable facilities that were opened up, in large part, go to educators, for service to unknown and unchecked minorities. Many important cities are left without VHF commercial facilities adequate to accommodate their minimum needs.

Certainly, when we look at what we have—after four years of gestation—it's evident that the better part of those four years were wasted. It would have been wiser to have allowed the interplay of normal forces of competition, through allocation as demand developed. That now seems to be the approach of Comr. Robert F. Jones, in his formidable, albeit bitter, dissent, but Comr. Jones right or wrong speaks too late. It's a lost cause. The Commission majority has voted. The hot breath of Congress was on the FCC's neck. It couldn't re-traverse old ground without inviting a Congressional investigation.

No matter how well-reasoned the Jones plan, it comes after the fact. In our judgment, he should have publicly proclaimed his philosophy months ago. The FCC then could have had the benefit of reactions from broadcasters, engineers and attorneys specialized in the field. And vocal members of Congress, looking to the time when TV would be available to their constituents, might have reasoned that possibly another few weeks could have been spared to reach for near-perfection. The stake is investment of uncounted millions by public and industry in what potentially is the greatest medium for mass communication in the history of man.

The fact that the FCC and its staff labored long and hard (and we do not question their integrity, zeal or indefatigability) doesn't absolve the Commission from criticism. The most regrettable phase was the complete capitulation to Comr. Frieda Hennock's campaign for education "reservations."

But the FCC isn't entirely to blame. Broadcasters, who waited until the eleventh hour, made an abysmal showing on education. Comr. Webster, in his caustic concurring opinion, is correct in severely indicting "commercial interests" for failing to make a positive showing.

Educational "reservations" were even given to a score of "applicants" who made no pleading whatever. This was done on petition of the Joint Committee on Educational Television, and comes as close to flaunting the law as is possible.

The educators get 242 reservations. It's our guess they won't use a dozen. Theoretically, these reservations are up for grabs after a year. But, if we perceive the strategy, they'll be back asking for "non-profit" status, which means they could become network affiliates and take other business, but simply would plough what normally would be profits into new stadia, libraries and stained glass windows. To do this would be to procure commercial facilities by fiat and under false colors, as against the rights of other citizens who were forced to compete.

So the TV Allocations of 1952 now are a *fait accompli*. New stations will go on the air—but the hard way. There will be attempts at litigation. The FCC feels it has buttoned up all possible legal loopholes and that the project, as a whole, cannot be enjoined. This may not be true of specific city-by-city allocations.

The Commission worked its heart out in devising these final allocations. The staff, headed by Paul Dobin, performed a super-human job, in following FCC instructions. The victor, for the moment, is Frieda Hennock and her brood of ambitious but naive educators. The public-at-large does not get the equitable allocation to which it is entitled. Many broadcasters, to some extent, because of their own lethargy, are tossed into the crucible of expensive and extensive hearings, with concomitant delays in providing the public the new services to which it is entitled.

It is thus that the destinies of arts and industries are charted—a compromise between unsound political pressures and sound engineering and economics.

TV FILM FUTURE

Capitalization Is Problem

UNDERCAPITALIZATION is currently a major problem for the television film industry, Dr. A. N. Goldsmith, chief consultant for RCA, said Wednesday, warning independent producers to build their industry's economic health either by selling first-run and residual rights as a package or by increasing first-run prices.

Dr. Goldsmith made his statement as luncheon speaker at a day-long quarterly forum held by the National Television Film Council in New York Wednesday. Other speakers were Edward Codel, TV director of The Katz Agency, stations representative; Carolyn Burke, NBC-TV producer; and T. R. Shearer, vice president in charge of the A. C. Nielsen Co. New York office.

Identifying independent TV film production as "the giant industry of the future," Dr. Goldsmith said that the 50,000-mile TV network expected to link the country's potential 400 VHF and 1,500 UHF stations will be serviced largely by film.

He estimated that today at least 75% of commercials and 25% of network programs—including those with top ratings—are filmed. Citing the flexibility, realism and economy of filmed programs, he said that from 50-90% of non-network scheduling is further filled by film products.

The consultant suggested that films be produced in color, to be sold for first and second showings in monochrome and, ultimately, for first and second runs in color, thus increasing the producers' profits through four-time sales in a single market.

Hour Cost Cited

"Network connections compete with film syndication, to a degree," he admitted, quoting $30.30 as the average cost per station per hour for network lines. Film producers must meet this competition, he suggested, or at least conduct an educational campaign to explain the film cost-advantage relationship.

Advantages of film which the RCA executive listed—in addition to syndication of four residual rights for color films—included greater ease in clearing station time, achievement of animation and slow-motion effects as well as outdoor shots, chance to correct fluffs, and re-use of films for auditions, sales meetings and general product promotion. He also listed the practically of repeat showings, but warned that labor demands for repeat payments must be solved first.

Dr. Goldsmith further warned that TV films should be created for TV and its characteristics, not, in imitation of Hollywood, as feature films for theatre showings.

Questioned from the floor, he said that, to date, film cameras cannot compete with TV cameras in achieving depth of field. The RCA consultant saw three-dimensional television as a definite possibility, however, either by a vertical scanning method or by polaroid, side-by-side images seen through polaroid glasses. But three-dimensional TV should not be overemphasized, he advised, since about 45% of the public have eyes that are "low" or impaired in registering depth.

"Any show—except special events—can be done on film," Mr. Codel noted, saying that The Katz Agency has learned that all TV stations require good film programs, if only for their own spot sales. He explained that his agency does not buy, sell or syndicate films and has no plans to finance them, but it has recognized the utility of films as a device to sell time. Katz stations, he footnoted, spent over $1 million for films in 1951.

Television networks, faced with time restrictions, costs and sharing of lines in cable transmission, have also turned to film for their answer, he pointed out, saying that all four TV networks are also in the film business.

Since stations need help in selecting film, his company has supplied its representatives with catalogues of all film availabilities and has produced "Better Approach to Television Advertising," a presentation which cites advantages of celluloid: A film program can be placed on a national spot basis at 19% savings in time costs, with the stations also benefiting from their higher spot sales fees.

Mr. Codel suggested that producers, instead of attempting totally new formats on film, scout local stations that, of necessity, have developed their own shows, many of which he considers highly salable as well as audience-tested.

Films On Art, Travel

Some programs cannot be produced live, Miss Burke, only woman listed as a TV producer at NBC, said in nominating films on art and travel as offering a great potential to the film producer. The cost of an average art film—such as "Paris 1848" or "Matisse" which Miss Burke introduced on television last fall—would be up to $6,000 a reel, she noted, a cost that could be returned not only from repeated TV showings, but subsequent distribution or sale to museums, schools, civic groups and art theatres, of which there are now some 1,500 in the United States.

The best production plan, she advised, is for 13-minutes in length with black and white films shot on 35 mm and the more expensive color films, on 16 mm. "Figures I have gathered," she reported, "show that the average 16 mm art film sells over 100 prints, and the demand is increasing. The average number of rentals for the same picture is approximately 250, and growing fast."

Public hunger for travel films was demonstrated, she noted, when a "fast, 10-second offer" of a French Tourist Office brochure—made on NBC-TV's *Vacation Wonderlands* program—resulted in an unexpected total of 8,000 audience replies. The program, attracting what Miss Burke described as a "low-brow, high-brow audience" that was just as interested in Chicago as in Paris—also held its own ratings against an opposing soap opera.

Saying that there is little new travel film to be rented, Miss Burke predicted an enormous market for it both as program film and as clips for background material.

Mr. Shearer, speaking on "Research Builds the TV Box Office," explained how the Nielsen rating is determined for TV and how it affects the film producer's business. He noted that the top program of the previous week, *I Love Lucy*, is presented on film.

NCAA COUNCIL

Given TV Recommendations

EXECUTIVE council of the National Collegiate Athletic Assn. last week in Chicago heard details of the television committee's recommendations for continued controlled telecasts of football this year, but declined to release them until April 22 in New York. At that time, the committee will meet for a two-day session, make its recommendations and pass them on to member institutions.

A two-thirds vote is required for passage of any one of 12 plans for control which have been studied thus far. Blackout telecasts sectionally were approved by the NCAA last year in convention with a vote of 163 to 8. The progress report in Chicago was presented to the 17-man policy group in meetings at the LaSalle Hotel April 6 and 7 by Asa Bushnell, director of the TV program this year.

The council also heard a summary of the 1951 football season attendance report conducted by the National Opinion Research Center, which was paid for by an assessment of 18% from member schools. NORC will check its preliminary survey results, and no new study will be made this season, according to NCAA Executive Secretary Walter Byers. He said the preliminary report of last fall has evolved into a conclusive summary which substantiates the report that gate attendance at games decreased in TV areas.

TV committee members, in addition to Mr. Byers and Mr. Bushnell, are Robert Hall, Yale, chairman; J. Shober Barr, Franklin and Marshall; Jeff Coleman, Alabama; Howard Grubbs, Southwest Conference; K. L. Wilson, Big 10; E. L. Romney, Mountain States Conference; Willis Hunter, Southern California, and Reaves Peters, Big 7.

IERT PANEL

Comr. Hennock to Air Educational TV Views

UTILIZATION of educational TV channels will be explored by FCC Comr. Frieda Hennock and other panelists during Ohio State U.'s 22d Institute for Education by Radio-Television at Columbus, which starts Thursday.

In the light of FCC's allocations plan, now released, this special session on educational television will command top attention Friday among educators and broadcasters gathered for the four-day conference—particularly educators.

Comr. Hennock, an outspoken proponent of reservations for noncommercial educational channels, will discuss steps which institutions and civic groups may take to obtain and use TV assignments.

Some 30 general and special interest meetings have been scheduled for the conference at the Deshler-Wallick Hotel under the direction of Dr. I. Keith Tyler, coordinator of radio activities and radio education director at Ohio State U.

In addition, a number of allied groups will meet concurrently with the Institute. Another feature of the conclave is the 16th American Exhibition of Educatonal Radio and Television Programs, whose awards are announced today (see separate story page 44).

Other panelists discussing steps which educational and civic groups should take in getting and using TV channels will be Ralph Steetle, executive director of the Joint Committee on Educational Television, Washington; George Probst, director of the radio office of the U. of Chicago; Burton Paulu, manager of KUOM, U. of Minnesota, and Seymour Krieger, counsel member of the JCET. Belmont Farley of the JCET will moderate.

Another special interest session (Sunday) will concern "Broadcasting by Government Agencies," with John Meagher, acting chief of radio, television and visual media for the State Dept., as chairman. Panel members will be Kenneth M. Gapen, assistant director of information for radio and TV stations, Dept. of Agriculture; Charter Heslep, director of AM-TV, Atomic Energy Commission; Dr. C. R. Seitz, chief of the research branch of the Human Engineering Division, Office of Naval Research, and the Rev. Daniel Power, S.J., Georgetown U.

Conference kicks off Thursday evening with a general symposium session on television programming. Participants will include commercial and educational telecasters and an FCC representative. On Saturday Comr. E. M Webster will speak on international broadcasting, and FCC Chairman Paul A. Walker will take part in a panel session on organized listener groups. Other topics previously were set [B•T, April 7].

Thaw July 1

(Continued from page 23)

community and where such a community is not eligible for reassignment under the 15-mile rule; (2) assignment of a non-commercial, educational channel where no such assignment has been made in the table to the community involved; (3) assignment of a commercial channel to a community to which no commercial assignment has been made in the table.

Fifteen-mile rule permits without rule-making procedure the shifting of a channel from the community to which it is assigned in the table to another community not more than 15 miles from the first.

Educational reservations were justified on the theory that the Table of Assignments itself is a reservation of channels for specific communities.

It isn't possible to force commercial TV stations to give time to educational institutions, the Commission decided. It warned, however, that the fact or reservation does not absolve commercial stations from filling the educational needs of the community.

Educational stations must be licensed to educational institutions, or a cooperative group of such institutions, the Commission emphasized. However, if there is no such authorized institution, then a municipality running the schools of its area may be licensed, the Commission pointed out.

Requests for partial commercial operation of educational stations were rejected with finality.

Smaller Cities Share VHF

VHF was used primarily in the large cities to give wide coverage, the FCC pointed out, but it emphasized that it did not believe large cities should receive an "undue share" of the "relatively scarce" VHF channels. Therefore, the Commission said, it made a substantial distribution of VHF channels among the smaller cities. It was apparent that cities with populations below 30,000 got UHF-only assignments.

If all VHF and UHF channels are utilized, the Commission said, "there should be few, if any, people in the U. S. residing beyond the area of TV service."

Decision on the number of channels (both VHF and UHF) to be assigned to a city was based on the following population criteria: One million or more, 6 to 10 channels; 250,000-1,000,000, 4 to 6; 50,000-250,000, 2 to 4; under 50,000, 1 or 2.

But, the Commission said, variations were made on the ground that it was more important to give each of several cities in one area at least one channel rather than to place them all in the largest city. There was also the requirement, the Commission said, to distribute channels equitably among the states. And finally, it pointed out, it tried to give every primary educational center a VHF channel.

In answer to the DuMont plan which urged that at least four VHF channels be assigned to the larger metropolitan areas in order to equalize network competition, the Commission said it could not agree to that premise.

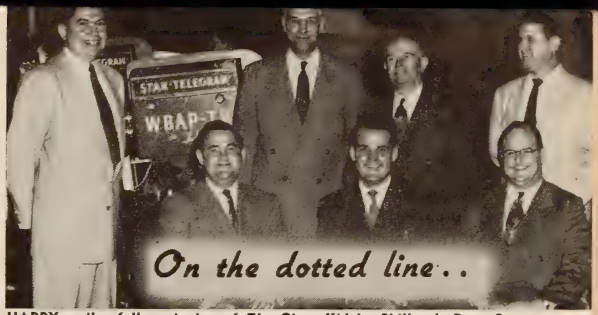
"Healthy economic competition in the TV field will exist within the framework of the assignment plan," it said. It also stated that it was concerned that many smaller cities, under the shadow of larger cities, should have the opportunity of having their own stations rather than having to rely on a big city's coverage.

The DuMont allocation plan, which was the only one submitted as a substitution for the whole of the FCC's proposed allocation last year, was also denied on the ground that many of its assignments were below the minimum separations established.

Also denied were several requests for less than the separation minimum which held out hope that mountain walls would serve to confine signals, and thus overcome co-channel interference. The FCC majority sought to adhere to the strict technical limits in such instances.

Notion that additional channels could be squeezed in certain cities, by requiring less than maximum powers, also was turned down.

Coverages For Stations Differ



In specifying maximum powers, the Commission pointed out that coverages would be different for each station. This reference was to the fact that the whole assignment principle is embraced in rigid adherences to separations, powers and antenna heights.

A provision in the "Third Notice" last year which would have forced stations to diminish maximum powers when interference was caused stations on adjacent channels was deleted in the final report.

Proposals made in the "Third Notice" were retained for the following: Oscillator radiation—UHF stations seven channels apart are required to be 60 miles apart (based on a receiver IF of 41.25 mc). Picture image interference—UHF stations must maintain minimum spacing of 75 miles if they are separated by 15 channels. Sound image interference—UHF stations must maintain a minimum spacing of 60 miles if they are separated by 14 channels. IF beat—UHF stations must maintain minimum spacing of 20 miles if they are separated by eight channels. Intermodulation — UHF stations must maintain minimum spacing of 20 miles if they are separated by less than six channels. Multiple interference—not recognized.

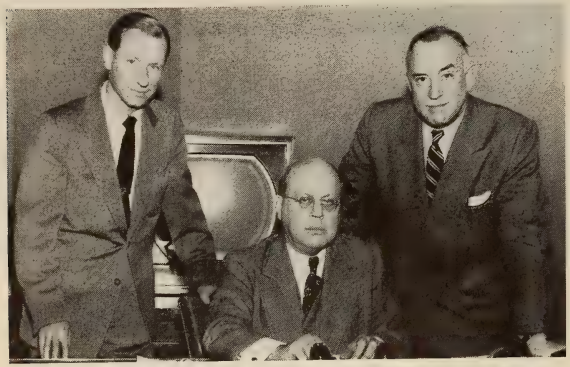
New rules and standards cannot be construed as guarantees of service, the Commission warned, but only as yardsticks. For UHF service curves (F 50, 50), the Commission decided to use 63 mc instead of the 195 mc basis it previously had used. It was believed these would give a more realistic picture

(Continued on page 68)

HAPPY smiles follow signing of *The Cisco Kid* by Skillern's Drug Stores on WBAP-TV Fort Worth. From l to r (standing): Curly Broyles, WBAP-TV slsmn.; Harry Holcombe, natl. radio-TV dir., Grant Adv.; Harold Hough, station's dir.; Henry Finch, sls. mgr., Skillern's; (seated) Frank Skillern, sponsor's v. p.; Tom Murphy, v. p. and mgr., and W. C. Woody, v. p. and TV dir., Grant's Dallas office.

NON-NETWORK segment of WLWT (TV) Cincinnati's *Breakfast Party* is sold for 13 weeks to Alber's Super Markets, food chain. From l to r (standing): Herb Flaig, WLWT slsmn.; Bob Egbers, Alber's; (seated): John Murphy, TV v. p., Crosley Broadcasting Corp., and Alfred Bissmeyer, Alber's.

GEORGIA Tech football games for film showing next fall on WSB-TV Atlanta are arranged by Coach Bobby Dodd (seated, l) and Walter W. Gibbs, GE Supply Corp. adv. and sls. mgr., whose firm will sponsor contests. Ed Danforth (standing, l) *Atlanta Journal*, with John M. Outler Jr., WSB-AM-TV gen. mgr., join huddle.



NEW SERIES, *Rebound* (ABC-TV, Fri. 9-9:30 p.m. EST), premiered last month on ABC-TV owned stations with Packard Motor Car Co. signed by S. James Andrews (c), asst. to pres. in charge of radio and TV dept., Maxon Inc. [B•T, Jan 28]. Flanking him: W. Ray Baker (l), v. p., Maxon and Slocum Chapin, ABC v. p.

EXCLUSIVE contract for Chicago Cubs home game telecasts on WGN-TV Chicago followed this signing by James T. Gallagher (l), Cubs' bus. mgr., and Frank P. Schreiber, treas. and gen. mgr., WGN Inc. Games were carried four years by station, but this was first time exclusive rights were attained.

THIRTEEN-WEEK contract for *Star Hostess Party*, half-hour audience participation show, on WWJ-TV Detroit is approved by (l to r) W. P. Smith, radio-TV dir., Charles W. Hoyt Co.; Norman Hawkins, station's sls. mgr.; Jim Cottingham, adv. mgr., Stanley Home Products, the sponsor; Robert W. Mickam, Hoyt's sec., and Al Elzerman, Michigan sls. mgr. of Stanley.

FIRST contract for the new AP television newsfilm service is signed by (l to r) Al Stine, AP executive representative; George M. Burbach, general manager, KSD-TV St. Louis, and Oliver Gramling, AP assistant general manager.

* * *

AP TELEVISION

Newsreel Scheduled on 7 Stations

ASSOCIATED PRESS today (Monday) makes its entry into the television news field. The first of a series of daily quarter-hour TV newsreels will, if all goes off according to schedule, be delivered to seven AP member TV stations for broadcast today.

KSD-TV St. Louis, owned by the *St. Louis Post Dispatch*, was first subscriber to the new AP service. Others signed to date include WDAF-TV Kansas City *(Star)*, WBAP-TV Fort Worth *(Star-Telegram)*, WTAR-TV Norfolk *(Virginian-Pilot and Ledger-Dispatch)*, WCAU-TV Philadelphia *(Bulletin)*, WHAS-TV Louisville *(Courier-Journal* and *Times)*, WBNS-TV Columbus, Ohio *(Dispatch)*. Service is exclusive to AP members, with TV stations eligible for associate membership in AP on the same basis as radio stations have been for some years.

Describing the AP video service, Oliver Gramling, assistant general manager of AP for television and radio, who will direct its operation, said that it "will stress domestic news, enlivened and diversified by a format that includes good human interest and features as well as all the other varieties of news that can make a television screen interesting and really informative.

Music and Sound Effects

"On news that lends itself to such treatment, we will background and explain," Mr. Gramling said. "We propose to give TV news meaning and significance—to lift it out of the category of yesterday's headlines, yesterday's newscasts. Another innovation is that much of the service will be completely scored with music and sound effects."

Announcement of the new service, made by Frank J. Starzel, AP general manager, said that to obtain the objective of a film news service "created and tailored solely for television and not as a by-product of other purposes, AP arranged for the formation of a new, specialized organization — Spotnews Productions Inc." Spotnews, in collaboration with AP offices throughout the world, will produce the AP TV service under Mr. Gramling's direction.

A privately financed corporation and not an AP subsidiary, Spotnews is headed by Theodore A. Morde, president, whose background in news, film and radio goes back to 1929. He has also seen government service as a special agent of the Military Intelligence Division, as chief of the foreign language division of the U. S. Coordinator of Information and as assistant chief of operations of the War Department's strategic services unit.

Production Personnel

John T. Tobin, former general manager of Telenews, International News Service's video ally, is vice president of Spotnews Productions. Other production personnel include George Johnston, former president of Video Productions; F. D. Kahlenberg, former editorial director of Telenews; Tom Craven, Paramount News cameraman for 25 years; Bernard Dresner, formerly an NBC cameraman in Washington, and Louis Tumola, former March of Time cameraman.

Cameramen and correspondents in 42 states, plus representatives in the other states, Alaska, Honolulu and Puerto Rico, will supply Spotnews with its domestic coverage. Foreign News will be covered by cameramen and correspondents in 44 countries.

Spotnews production headquarters will occupy a full floor in the same building with Major Film Laboratory which will process the news film. Major Film is the video division of Consolidated Film Industries, laboratory owned by Republic Pictures Corp. Washington offices of the new company adjoin the AP newsroom in the Star Bldg.

Recalling that AP was "first in the field with news-on-film for television four years ago, but there were not enough member stations on the air at the time to support the venture," Mr. Gramling declared that "since then, no news gathering association has developed a comprehensive service designed exclusively for television use. Everything has been largely an off-shoot of the old movie house newsreel. Coverage has been spotty, with emphasis on New York, Washington, Cheesecake, free publicity film and an overbalance of foreign film of questionable age.

"Television, a potentially great news medium, deserves a service product for its exclusive use," he declared. "That is what AP is now producing. We propose to deliver a rounded service, not just a lot of footage, which is the cheapest and easiest way to do it—the way everyone else has done it to date."

Noting that Spotnews cameramen can operate with the knowledge that their films are for TV use exclusively, Mr. Gramling pointed out that the service "is flexible, with provisions for dropping sound or cutting off titles without affecting the sound tracks on the stories themselves. Stations don't have to edit, but they can edit any way they wish."

Thaw July 1

(Continued from page 67)

of potential service areas. The Commission also changed UHF interference curves (F 50, 10).

Coverage and interference estimated by these charts, the Commission admonished, were for large area consideration, not for individual station predictions.

No co-channel or adjacent channel interference ratios were contained in the revised rules and standards, the FCC pointed out.

Provision encouraging the use of common antenna sites was retained in the new rules, but recommendations that this be required were turned down on the ground that such a requirement should not be imposed "without further exploration of the problem."

This is one of the plans being advanced by the aviation industry in its current campaign to impose some sort of a limit on TV antenna heights and sites [B•T, April 7, March 17]. Joint meeting of government and radio-TV and aviation representatives is planned for the near future, but has not yet been scheduled.

In setting up the three zone system, the Commission cited the population densities of the three areas: Zone I, 222.1 people per square mile; Zone II, 27.4, and Zone III, 47.8.

Single class of TV stations, instead of the community, metropolitan and rural of pre-freeze days, was reaffirmed.

Plan for individual separate spacings for assignments and for facilities was dropped. Minimum facilities spacing is the same as minimum assignment requirements, the report disclosed.

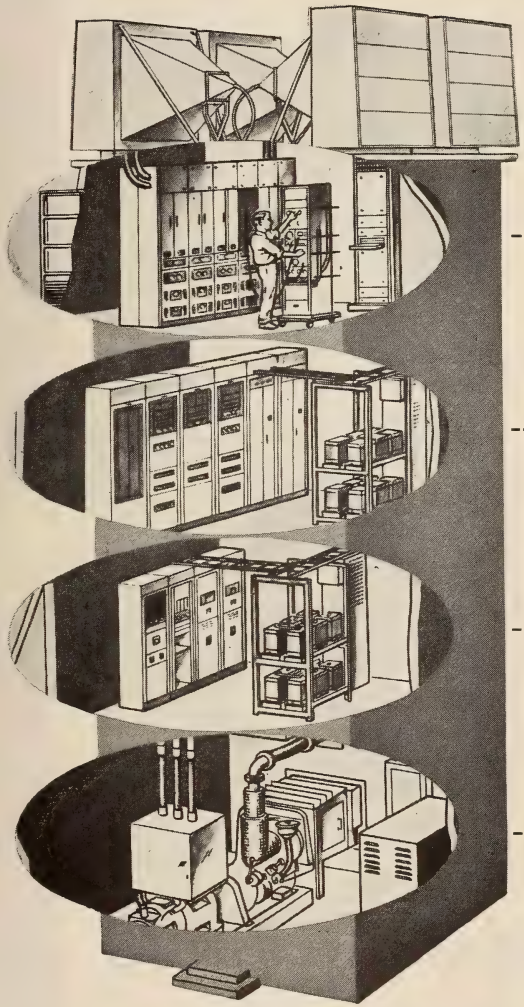
Tolerances for VHF and UHF use of offset carrier, the technique by which stations on the same channels can overcome co-channel interference to a great extent, were set as plus or minus 10 kc, with 1 kc tolerance.

The principle of the intermixture of VHF and UHF channels in the same city was upheld by the FCC. It emphasized that it was necessary to treat VHF and UHF television as one service, on the assumption that someday both frequency bands would be. The Commission recalled the differences that existed before the 1948 freeze was imposed when Channels 2 to 6 and Channels 7 to 13 were considered in different bands, with the latter believed not as useful as the lower end of that band.

Ban on the use of directional antennas to "shoe-horn" another channel into a city was retained, although permission was given to use DAs to increase service.

Experimentation Upheld

Experimentation with Stratovision and Polycasting was upheld, as it was in the "Third Notice," but commercialization of these principles was turned down. Stratovision, sponsored by Westinghouse, is a means of wide-area coverage through the use of high-flying airplanes radiating TV signals downward. Polycasting, a recommendation of consulting engineer Raymond M. Wilmotte, is a method of wide-area coverage through the use of a number of low-powered TV stations [B•T, March 31].



Assignments along the northern border were arrived at after conferences with Canadian officials. It enabled additional assignments to be made to some U. S. cities, the report stated. The same practice was followed along the Rio Grande with the same results, the report pointed out. It also disclosed that Mexico was not planning to use UHF for the time being.

That there will be court actions because of the Commission's rulings on some of the city-by-city recommendations seems to be a foregone conclusion. However, it was pointed out that the document is so built that they can only apply to a limited area of the country. FCC officials seemed confident that the whole allocation plan cannot be enjoined.

The final report was furnished BROADCASTING • TELECASTING a week in advance of the April 14 release date so that it could be put into type and printed in time for arrival at subscribers' addresses with the regular issue of this date. Because of advance release handling it was impossible to procure expert legal and engineering reaction to the document.

WHAT'S INSIDE A RADIO-RELAY STATION?

Sending television signals across the country is a complicated job, requiring 123 radio-relay stations between Boston and Los Angeles. This view of a typical unattended station shows the arrangement of the apparatus which amplifies the signal and sends it on.

ON THE ROOF

are the lens antennas, each with its horn tapering into a waveguide which leads down to equipment in the building.

ON THE TOP FLOOR

the signal is amplified and sent back to another antenna on the roof. Normally unattended, the station is visited periodically for maintenance.

ON THE THIRD FLOOR

are power supplies for several score electron tubes.

ON THE SECOND FLOOR

are power supplies for additional electron tubes. Storage batteries on both floors will operate the station in an emergency for several hours, but

ON THE GROUND FLOOR

is an engine-driven generator which starts automatically after anything more than a brief power failure.

Anything that happens—even an opened door—is reported to the nearest attended station instantly by an automatic alarm system.

Most of this equipment is complex, and expensive. The present value of the nation-wide network, provided by the Long Lines Department of the American Telephone and Telegraph Company and the Bell Telephone Companies, is nearly $85,000,000. Yet the charges for the use of this network are low—averaging about 10 cents a mile for a half-hour program.

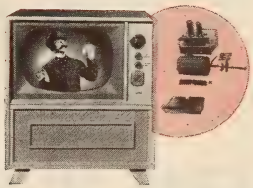
WITH DU MONT TRANSMITTERS

UHF at VHF prices! Entirely new concept in UHF transmitter design results in clean, simple, circuitry allowing easiest future power increases. Utilizes the new 5KW Klystron with independent cavities.



WITH DU MONT PROGRAMS

The Du Mont network is prepared to supply nationally famous stars and shows via coaxial cable, syndicated film service, or teletranscription; the variety of programs necessary to build big audiences.

WITH DU MONT BUILT AUDIENCE

With new Telesets designed to receive various combinations of UHF and VHF channels, Du Mont is prepared to launch an intensive promotion campaign, through local distributors and dealers, to build your UHF audience.

See how these three Du Mont operations, working together, can help you to make your UHF station a success. Write for the free booklet "UHF—The Big New Development in Television." Find out why you can't go wrong with Du Mont.

Pre-School 9-10 a.m. Show Proves Popular

(Report 211)

ASK the viewers, if you want the answers, assert WWJ-TV Detroit officials who are busy reading the 10,889 replies to the station's questionnaire during the second quarter of one of its 9-10 a.m. *Playschool* programs.

Braving a possible thumbs down, WWJ-TV asked viewers if they would condone a sponsor for the program, with the answers coming under the general theme, "Yes, we will approve a sponsor if it means keeping the program on the air."

Viewers gave a solid affirmative to the first question, "Do you want *Playschool* to continue?" officials said.

The yesses to the first question and the third, "Do you want *Playschool* every day?" decided WWJ-TV upon keeping the show on the air through the summer and changing the schedule to five days a week instead of the present four.

Other comments, station staffers said, included statements that the viewers hoped the sponsor would be chosen wisely since children watching would regard statements as utter truth, and several persons offered to help raise money to support the program if no sponsor was available.

Program format includes: Merri Melody, who teaches the children songs; Midge, who brings cartoons; Eko, the pixie-like artist who sketches as the Story Spinner tells his tales; Lady Dooit, whose Magic Workshop of things to make appeals to both mothers and children; and the Magic Fairy and the Busy Buzzy Bee, who whirl through the program as transition effects. WWJ-TV's Walt Koste is producer.

Film Editing Is Aided By Camera Control

NEW automatic camera control system which can reduce cutting time on a TV film from five days to one day has been successfully tested at Filmcraft Productions, Hollywood, Isidore Lindenbaum, president, has revealed.

Invented and developed by Ferenz Fodor, production supervisor at the studio which films NBC-TV's *You Bet Your Life* with Groucho Marx, the patented system has completed eight weeks of tests. It can control eight motion picture cameras at once so that one technician can start and stop all of them from one control room, the inventor said.

It is estimated that time of editing and synchronizing the film of eight cameras can be cut down 75 to 80%, resulting in a great reduction in film.

Single-Channel City Viewing Studied by G-P

WHAT amount of viewing is there on Saturday in a single-channel city?

This was the subject of a study by Guide-Post Research which surveyed 1,200 families in Pittsburgh March 8. Only TV station in that city is WDTV (TV).

Guide-Post results showed that 93% of the set owners had their sets on sometime during the day (9:30 a.m. to midnight); 92½% tuned in WDTV sometime during the day and that 6½% had an out-of-town station on sometime during the day.

Average morning program, it

'Bob & Ray' Revised For 'Average Listener'

IN ORDER to revamp and revise the format of its *Bob & Ray Show* on NBC radio, Colgate-Palmolive-Peet Co. made a survey to determine habits and characteristics of the average daytime listener.

Material gathered by the C-P-P Market Research Dept.'s Consumer Institute revealed that 8,000 samples show the average listener to be a housewife, between 30 and 34 years old, married to a factory worker for about 11 years, with an annual income of $3,683 to $5,542, and with two children, six and 14 years old. The family has its own home, with a mortgage.

"As a result of the survey the format of the *Bob & Ray Show* was changed and is turning out successfully," Leslie Harris, director of radio and TV for C-P-P, told BROADCASTING • TELECASTING.

Regarding other habits and ways of life of the average listener, the survey showed that she is mainly interested in her children and her home, although national and local affairs interest her more than in the past. She is also more concerned about religion than before World War I.

She buys four dresses a year, wears very little make-up, and has a permanent once a year.

She reads her local newspaper, subscribes to one magazine and reads one book a year.

She and her husband do not discuss world affairs very much. Her main concern is his health and what she can do to help him progress to a better-paying job.

The family eats well, but not lavishly.

She is not very sophisticated, and her sense of humor is not attuned to smart jokes.

If she likes audience participation shows, the chances are she does not care very much for daytime drama. She has never seen a Broadway show, but if she had her choice it would be "South Pacific."

COMMUNITY TV

Palm Springs Under Way

INSTALLATION of International Telemeter Corp. community antenna system is underway to bring television to the mountain-ranged desert community of Palm Springs, Calif.

The city council had granted ITC a 50-year exclusive franchise late last month.

How progress of the ITC system will affect plans of Howard-Yale Inc., who recently applied for FCC permission to build a relay-type station to boost signals from all Los Angeles stations [B•T, March 31], is not known. Howard-Yale plans to scramble its pictures and service subscribers through a de-coding device.

The ITC system consists of a mountain top master antenna and coaxial cable connections to town. Cost will be $100,000, according to Carl Lesserman, ITC vice president [B•T, March 3]. It will bring to viewers in the California desert resort programs from all seven Los Angeles stations—110 miles away.

Subscribers to the community antenna system will pay about $150 for installation and $4 a month service charge.

The ITC system also will test pay-as-you-see scrambled picture service. Arrangements have been made with three Palm Springs theatres to feed feature films in scrambled form over the system. Subscribers pay through coin-box attached to their sets. The fee will be regular theatre admission price, of which ITC will keep a small portion, the rest going to theatre owners.

Pay-as-you-see service will use Channel 6(82-88 mc), unassigned to Los Angeles TV outlets. ITC is half-owned by Paramount Pictures Corp.

In the meantime, a community antenna project is being discussed for Ocala, Fla. It would be built by R. M. Chamberlain, president and general manager of WGGG Gainsville, and Regge Martin, associated with WTTT Coral Gables. Messrs. Chamberlain and Martin have presented a proposal to install the master antenna system to the Ocala city council.

Mr. Martin said community TV service is now in successful use in 30 to 40 towns and cities. Installation would run about $135, Mr. Martin said, with a monthly service fee about $4.

Builders Show Pact

WLWT (TV) Cincinnati has announced an exclusive contract with the Cincinnati Home Builders Show Assn. for promotion of the Home Builders Show to be presented April 19-27 at the Cincinnati Gardens.

ALL RAYTHEON Mfg. Co. operations except TV showed larger sales and profits in third quarter report of firm's Waltham, Mass., plant. Net profit after taxes for quarter ending Feb. 29 was $408,000 on $28,698,000 sales.

TV Applications

(Continued from page 65)

to change facilities of existing stations (except the 30 forced to change frequencies), license applications by existing stations, etc. The Commission stated that Line D will not start functioning until Nov. 1 at the earliest.

Non-commercial, educational applications and those from the territories will be processed in the order received immediately after July 1.

The Commission also announced that all TV applications in hearing status have been removed from such classification.

The new procedures also call for all pending applicants to submit completely new applications. Among the revisions of Application Form 301, which are largely technical to incorporate the new standards, is the requirement for program plans. Up to now, TV applicants were not required to submit program plans with their applications.

Pending applications which are not completely resubmitted will be dismissed, the Commission stated. Only exception is when duplication of some exhibits would prove an "undue hardship."

Applications in Processing Line A will be checked against applications in Line B for conflicts regarding transmitter - to - transmitter spacings. It therefore behooves all applicants to get their applications on file within the 78-day period before July 1, it was pointed out. Otherwise, an applicant in Line B is likely to find that his antenna site will conflict with that of an application granted in Line A, and he will be required to pick another site.

Where two applications are found to be in conflict, they will be set for hearing. If the conflict is resolved, the application with the higher priority will be processed, while the application with the lower priority will go back into its proper place in its processing line.

The Commission also called attention to present rules which require that an application must be filed at least one full day before Commission action on another application in order for the former to be considered in conflict with the latter. It also pointed out that a new application must be filed at least 20 days before the date of a hearing in order to be consolidated in the hearing with the other applications.

UNION MERGER

AFRA-TVA Fusion Foreseen

MERGER of at least two entertainment unions—American Federation of Radio Artists and Television Authority—was a certainty for this summer as a result of membership vote announced last week.

Results of the balloting, conducted by mail throughout March, showed that 1,254 TVA members were for the merger, while 269 were opposed. Among radio artists, 2,213 favored unification while 79 did not. Voters also approved a constitution for merger of the unions, which would become the American Federation of Television and Radio Artists.

National polling was conducted, as planned at the TVA convention in New York last December, as an alternative to an over-all merger with three other talent unions, scheduled with a July 1 deadline. The other unions are Actors and Chorus Equity Assns., American Guild of Musical Artists and American Guild of Variety Artists. All are members of Associated Actors & Artistes of America (AFL).

Early this year, all entertainment unions—on record as favoring total merger but unable, among themselves, to effect it—approved a study for total unifications to be conducted by the Institute of Industrial Relations at the U. of California at Los Angeles and the School of Industrial & Labor Relations at Cornell U. The educators volunteered to study feasibility and means for total merger, to report to AAAA members in time for them to vote on it by July 1. TVA, previously invited to form an all-broadcasting union by AFRA, served notice that unless total merger is accomplished by July, it would unite with the radio group.

P&G REVIEWS SHOWS

Chicago Kinescopes Viewed

REPRESENTATIVES of Procter & Gamble visited Chicago last week to see kinescope auditions of *Welcome Travelers*, which P&G sponsors five mornings weekly on NBC. The kines were cut at NBC headquarters and were filmed at NBC Merchandise Mart headquarters as two quarter-hour and one half-hour films.

AM principals are expected to handle the TV show also, among them being emcee Tommy Bartlett, Bob Cunningham, director; Myron Golden, producer, and Les Lear, manager. AM sponsors are Lava, Spic-N-Span, Joy and Prell. Although the show is proposed now as a five-a-week afternoon show, the network is also considering a simulcast.

Alex Drier, NBC network commentator from Chicago, last week put his own news-feature package, *Man on the Go*, on kinescope for prospective client auditions. Designed as a once-weekly half-hour network show, the program features Mr. Drier in a narrative and dramatic format discussing news trends, features and human interest stories.

The tube that puzzled the experts

Ever stop to figure how RCA puts this tube together? It's quite a trick. And it was also quite a trick to design an air-cooled triode that could take 1800 watts input—*in a glass envelope no bigger than a cookie jar.*

The RCA-833A and its predecessor, the 833, have served broadcasters faithfully for more than 14 years. Today the tube is used in practically every 1-kw AM transmitter in the country. And by the way, RCA-833A's now cost you less than 60% of what they did originally.

For fast tube service, call your local RCA Tube Distributor!

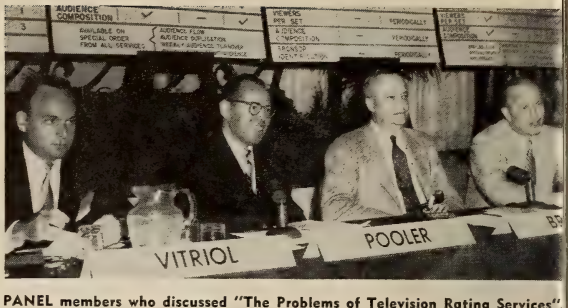
FCC ATTORNEYS

Three More Leave Staff

FCC lost three attorneys last week. A. Harry Becker, chief of the Administrative Law Branch, Office of the General Counsel, resigned to open his own office. Howard J. Schellenberg Jr., attorney in New & Aural Facilities Division, and Leonidas P. B. Emerson, attorney in the Renewal & Transfer Division, Broadcast Bureau, resigned to join the newly formed law firms of Haley & Doty and McKenna & Wilkinson respectively.

Mr. Becker

Washington radio law firm of Haley, McKenna & Wilkinson becomes two separate organizations April 15. Andrew G. Haley and Dwight D. Doty, with Mr. Schellenberg, form Haley & Doty. James A. McKenna Jr. and Vernon L. Wilkinson, with Mr. Emerson, become McKenna & Wilkinson. Both firms will remain for the time being at their present address, Duryea Bldg. on Connecticut Avenue.



Meanwhile, Edward P. Morgan, of Welch, Mott & Morgan, resigned as director of enforcement for the Office of Price Stabilization and returned this week to his private practice. He has been with OPS since February 1951.

Mr. Becker ended 18 years of service with the FCC with the opening of his own office in Room 1116 Ring Bldg. He joined the Commission in 1941, was chief of the Law Department's Chicago office from 1942 to 1945. During his FCC career, Mr. Becker acted as Commission counsel in such notable cases as Clear Channel hearing, in 1946; Daytime Skywave, in 1946; rule making on 30 kc separation, in 1947; WMIE Miami, in 1949-50. Mr. Becker was graduated from Marquette U. Law School in 1934, worked for the Securities and Exchange Commission and the Federal Power Commission before joining the FCC.

Prior to his OPS tenure, Mr. Morgan served as counsel for the Senate Foreign Relations (Tydings) subcommittee looking into communists in government. Before joining Messrs. Welch and Mott in 1947, Mr. Morgan was with the General Accounting Office and the FBI.

Benton-McCarthy Spat

IN THE continuing spat between Sen. William Benton (D-Conn.) and Sen. Joseph R. McCarthy (R-Wis.), the Wisconsonite last week criticized Sen. Benton's use of TV in his 1950 campaign. Sen. McCarthy introduced a resolution asking for a Senate probe of Sen. Benton, naming as one of six areas of inquiry: "The use by Benton of fake television portrayals of Benton during his 1950 campaign."

PANEL members who discussed "The Problems of Television Rating Services" at the 34th annual meeting of the American Assn. of Advertising Agencies [B•T, April 7] were (l to r) Herbert A. Vitriol, Grey Adv.; Charles A. Pooler, Benton & Bowles; Lyndon O. Brown, Dancer-Fitzgerald-Sample, and Fred B. Manchee, Batten, Barton, Durstine & Osborn, panel leader.

UTP PACKAGE SALES

Announced for 7 Markets

UNITED Television Programs recorded sales of four video film packages in seven more markets last week, according to Aaron Beckwith, UTP sales director.

Hollywood Off-Beat, a half-hour private detective series starring Melvin Douglas, will start on WXYZ-TV Detroit April 29 for the Evans-Beckwith Carpet Co. and on KFMB-TV San Diego this week.

Quarter-hour sports interviews, conducted by Leo Durocher and his wife, Laraine Day, *Double Play With Durocher and Day*, starts on WNAC-TV Boston April 26 and, for the Fedders-Quigan Corp., on WMBR-TV Jacksonville as of May 7. On the market little more than six weeks, the sports program has been sold in 16 markets so far, Mr. Beckwith reported.

Royal Playhouse, which won honors for the best film series of 1951 when it was presented as *Fireside Theatre*, was added by WOC-TV Davenport, where Ford dealers will sponsor.

Anticipating the end of the TV station freeze, UTP is the first film distributor to start contacting possible new stations, Mr. Beckwith claimed. Many sponsors anxious to get top time franchises are already lining up in some markets, he said.

Montgomery Testifies

ROBERT MONTGOMERY, radio news commentator and NBC TV producer, testified before the House Agriculture Committee last week. He was called to explain where he got the information with which he attacked in news broadcasts the government's $125 million dollar campaign against foot-and-mouth disease (prevalent among cattle in Mexico). Mr. Montgomery acquitted himself well in the opinion of observers by countering questions with queries of his own. At the hearing's close, Rep. August Andresen (R-Minn.) said "this hearing will not be a total loss. Where you had 15 million listeners you'll now have 75 million."

DETROIT TO LANSING

Microwave Link Planned

PLAN to erect a microwave TV radio-relay link between Detroit and Lansing to provide one northbound channel to Lansing was revealed in an application filed last Tuesday by AT&T with the FCC.

The link will require two intermediate amplifying stations between the cities and will cost $250,000. If the FCC approves the request promptly, AT&T expects to have its link in operation by late summer.

WJIM-TV, the only TV outlet in Lansing, now is interconnected with the four TV networks but uses a privately-owned microwave system which connects with Bell facilities in Detroit.

Peterson to CBS-TV

EDGAR PETERSON, original producer of *Pulitzer Prize Playhouse* and more recently producer-director of the *Faye Emerson Show*, has been named manager of the CBS-TV story and script department, effective today (Monday). The former motion picture production aide to Dore Schary, David Selznick and Frank Capra will report to William Dozier, former CBS-TV script manager recently named executive producer of dramatic shows.

WTOP-TV's Thanks

RETURN by WTOP-TV Washington of the CBS-TV *Songs for Sale* with Steve Allen to the air after being dropped a month was accompanied by so many "thank you" letters from appreciative viewers that the station in a series this week will air its own thank yous, using names of letter writers. Lloyd Dennis, director of program service, said the 9:30-11 p.m. EST Saturday telecast was returned after a flood of letters and post cards, and called the station's response to the writers "television democracy."

JUSTICE PROBE

RCA Opposes Subpoena

RCA asked the U. S. Court for the Southern District of New York last week to withdraw or modify the subpoena issued to the manufacturing company in the anti-trust probe launched by the Justice Dept. in the electronics industry six weeks ago [B•T, March 5].

Deadline for the Justice Dept. to answer the motion, originally set for today (Monday), was extended a week with RCA consent. The motion was filed Tuesday by the law firm of Cahill, Gordon, Zachry & Reindel, RCA counsel.

The action, considered the normal way to counteract a subpoena, charged that the federal request for voluminous company records, correspondence and other documents—some dating back to 1934—pertaining to electronics manufacture—was "too broad, unreasonable and oppressive," spokesmen for the law firm said Thursday.

An additional part of the motion charged that that part of the subpoena relating to RCA licensing had previously been adjudicated in the 1932 consent decree in the Delaware courts. When the office of the Attorney General tried to reopen that case in 1942, the motion said, the court held that the case was closed. A subsequent federal appeal to the U. S. Supreme Court was dismissed before hearing.

RCA was the only manufacturer among those served—virtually all the nation's major producers of AM, FM or television transmitting and receiving equipment—who by late last week had taken legal steps to eliminate or change the court order, a spokesman for the anti-trust division indicated.

The subpoenaes were served in late February to start what was described as an industry-wide investigation of possible anti-trust law violations. Those served were instructed to deliver masses of company records to the New York court on May 12, for study and consideration by a grand jury. Actual charges could be lowered only at grand jury request upon completion of its closed-door investigation, a matter that might take months.

List of manufacturers known to have been subpoenaed, or presumed to have been since the investigation was to be industrywide—included RCA, whose activities were singled out as a specific subject upon which certain information was demanded, and CBS, General Electric, Westinghouse, Philco, Hazeltine Corp., International Telephone & Telegraph Co., Zenith, and DuMont.

AFA CONVENTION

Includes TV Session

ADVERTISING Federation of America's convention session on television, based on the theme "Television Takes Stock of the Future" [B•T, March 17], will be conducted by Eugene S. Thomas, vice president of George P. Hollingbery Co., station representation firm, it was announced last week. The annual convention will be held June 8-11 in New York.

Speakers for the TV session, slated for the morning of June 11, have not been announced.

"What's Ahead for Advertising and Marketing?" is scheduled topic for the June 9 morning meeting, featuring a survey report by Arno Johnson, vice president of J. Walter Thompson Co., followed by a panel discussion. Panel leader will be Stuart Peabody, assistant vice president in charge of advertising, The Borden Co., with members including Marion Harper Jr., president of McCann-Erickson; Ben Duffy, president of BBDO, and a national advertiser, to be announced.

AFA award to its annual high school essay contest will be made at luncheon the same day by Thomas Brophy, Kenyon & Eckhardt board chairman and chairman of the board of judges.

NBC AFFILIATES

Resist New Spot Plan

NBC-TV reportedly was encountering affiliates' resistance last week to a plan to sell the four half-hourly 35-to-60 second weather reports on its *Today* morning show, charge the sponsor for the equivalent of a five-minute segment and pay affiliates one-third of the 15-minute rate.

The proposed sponsor is Armour & Co., which under the plan would get a brief mention of its Dial soap before each weather report and a 15-second commercial afterward. The network pointed out to its affiliates that this adds up to approximately four minutes of program and one minute of commercial time daily.

NBC-TV spokesmen had no immediate comment on affiliates' reaction, but it was known that some stations were contending the plan would put the network into the "spot carrier" business with less remuneration to the stations than if they themselves sold the announcements.

The program is seen 7-9 a.m. EST and CST, Monday through Friday, and features Dave Garroway, who is sponsored by Armour on NBC radio.

TV Talent Search

GEORGE FOLEY Inc., producer of ABC-TV's science-fiction *Tales of Tomorrow*, began a "Star of Tomorrow" talent search last week in effort to find new TV talent from among women, 20 to 25 years old, who have never been cast in video roles. Final winner of nightly auditions will be selected April 30 by Charles Underhill, ABC-TV programming head; Jessica Landau, Universal Pictures' Eastern talent supervisor; actor Thomas Mitchell, and a Broadway producer. Winner to be starred in *Tales of Tomorrow* May 9 and be screen tested by Universal Pictures.

In MARCH an agency executive wrote about a WGN-TV program:

"I have consistently watched our participation with a very critical attitude, and all I have ever come up with was... Praise, sincerely and copiously, for the fine job you are doing."

The Chicago Tribune Television Station

OPERATING COSTS

Herold of RCA Issues Study

DETAILED analysis of TV station operating costs, broken down by size of station, has been prepared by Joe Herold, TV station planning consultant for RCA's engineering products department. Actual stations, now in operation, were studied and their averages were used as the basis for the study.

Not only has Mr. Herold listed typical salary requirements, department-by-department, for four major classifications of station, but also he has considered transmitter operating costs, rent, depreciation, insurance and even the amount of floor space needed for various departments in each class of station.

A typical station with a 2 kw transmitter, without a live studio and using network, film and slide programming, has total yearly operating expense of $184,048. Its personnel numbers 22, and the station needs 2,624 sq. ft. of floor space. Technical expense for such a station is $40,140; program expense runs about $64,180; sales expense is about $24,700, and administrative and general expenses are about $55,028.

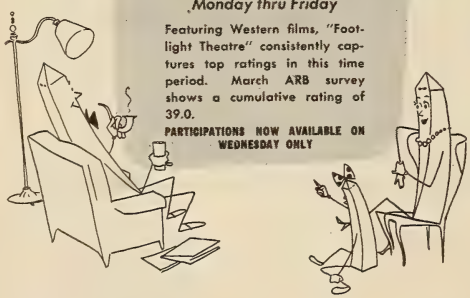
A station with a 10 kw transmitter has 31 employes, needs 6,260 sq. ft. of floor space and has total yearly operating expense of $274,718. A breakdown of departmental expenses shows about $65,268 for technical expense, $103,350 for program expense, $28,720 for sales expense and $77,380 for administrative and general expense. Such a station uses network, film and slide programming, in addition to one live studio.

A station with a 20 kw transmitter has yearly operating expenses of about $444,632 and 50 employes. It needs at least 15,835 sq. ft. of floor space. These stations spend about $116,144 on technical expense, $186,480 on program expense, $34,700 on sales expense and $107,308 on administrative and general expenses. It uses network, slide and film programming, has a live studio and also handles remotes.

The station operating with maximum ERP uses network, film and slide programming, has two or more live studios and remote equipment, plus a master control room. Its total yearly operating expense is $618,882 and it has 70 employes. Technical expense is about $160,725, program expense is $222,312, sales expense is $65,800 and general and administrative expense is $166,045.

Also included are comparison tables showing at a glance statistics for all four major groups of stations.

Average Class "A" time rates per hour and minute vary from $225 an hour and $27.50 a minute for a 12,000-receiver market, $400 an hour and $75 a minute for a 100,000-receiver market, to $1,500 an hour and $300 a minute for a 1,775,000-receiver market and $3,000 an hour and $550 a minute for a 3,000,000-receiver market.



The report is concluded with a breakdown of responsibilities for the usual TV station operating personnel.

TV PRIORITY

St. Louis Wants From FCC

ST. LOUIS Board of Aldermen has asked the FCC that St. Louis be given first priority when the TV freeze is lifted and the Commission begins processing applications. In a resolution adopted April 4, the Aldermen asked that the city's TV applicants be given an early hearing so that new stations can be built and put on the air at the earliest date.

The resolution called attention to the fact that St. Louis viewers are "in a more adverse position with respect to television . . . than the residents of the 10 principal metropolitan areas of the United States. . . . The St. Louis area contains the largest concentration of receivers (372,000) in the United States having only a single service available." The Aldermen credited the city's only TV station, KSD-TV, with performing "a marvelous job."

Owner of KSD-TV, the *St. Louis Post-Dispatch* editorially endorsed the Aldermen's request that the FCC "give early consideration" to the city's applicants.

Meanwhile, on April 6, the *St. Louis Globe-Democrat*, which owns a minority interest in KWK, began a series on the history of the TV freeze. Series was introduced by a front-page editorial which referred to the fact that St. Louis has only one TV station, but explained that the situation was not due to the "unfairness" of the FCC but to the freeze. The editorial pointed out that some major cities had no TV—Denver and Portland, Ore. "Television," the editorial said, "has made a stupendous and historic growth. . . . It is fabulous in its appeal to the people, and in a great sense has changed the pattern of public entertainment and the home life of the American people."

There are seven applications pending the six available channels in St. Louis. Applicants are KWK, WEW, KXOK, KFUO, St. Louis Amusement Co., 220 North Kingshighway Inc., and the New England Television Co. Of the six available channels in St. Louis, three are VHF and three are UHF. One of the VHF channels is reserved for non-commercial, educational use.

Who's All Wet?

COLD WATER followed hot words during *America Votes*, KECA-TV Los Angeles public service sustaining panel program, when George McLain, advocator of an old age pension plan, replied to the question of "Are you a communist?" by heaving the contents of a glass of water at his questioner, Paul Sheedy, counsel for the Property Owners Assn. of California. Television watchers saw Mr. Sheedy reply by throwing a full glass back at Mr. McLain, who was nicked on the hand by a piece of flying glass. Nelson Pringle, moderator, stepped in to smooth ruffled feathers and the old age pension plan discussion continued to a wet but uneventful conclusion.

WCBS-TV AUDIENCE

Sales Presentation Made

WCBS-TV New York is circulating a sales presentation, "The New York Television Picture," claiming that the CBS-TV key delivers the biggest audiences, leads in local as well as network programming and offers lowest cost circulation of all Manhattan TV stations.

Brochure states that WCBS reaches 18% of the total national TV audience, leads in quarter-hour count of audience for both daytime and nighttime, with Telepulse reporting total of 247 firsts for WCBS-TV compared to 120 for the next highest station. Station also claims first rating on such pooled broadcasts as President Truman's March 6 speech and the San Francisco Peace Conference; highest-rated film programs, women's program, news program and sports feature. Average cost per thousand is said to be $1.47 on WCBS-TV with nearest competitor listed as $1.83.

CBS-TV Sleuth Series

NEW TV series of 39 half-hour programs, *Files of Jeffrey Jones*, was announced as available by CBS Television Sales last week. Concerning a former G. I. who finances his way through law school by outside sleuthing activities, the series has been taken by Crawford Clothes for WABD (TV) New York, effective June 7 when the CBS-TV film sales' *Cases of Eddie Drake*—also sponsored by Crawford—completes its 13-week run. *Files of Jeffrey Jones* also was purchased by Ennds for KING-TV Seattle and by Pittsburgh Brewing for WDTV (TV Pittsburgh. Program stars film actor Don Haggerty and features Gloria Henry, Lyle Talbot, Vince Barnett and Tristram Coffin.

AMERICAN Brewing Co.'s 104-week sponsorship of TV drama series, *The Unexpected*, began April 5 on WBAL-TV Baltimore. Ziv series features half hour dramas with trick ends.

CH. 1 'REBATE'

Bill Would Repay 'Losses'

BILL to pay William L. Gleeson, president of Broadcasting Corp. of America, nearly $150,000 for losses due to the FCC's deletion of Channel 1 (44-50 mc), has been introduced in the House by Rep. George B. Miller (D-Calif.).

The House Judiciary Committee, where the bill pends, has taken no action on the "relief" measure.

Mr. Gleeson got his CP for Channel 1 in Riverside, Calif., in December 1946. Early in 1948, as the station neared construction, the FCC deleted Channel 1. Mr. Gleeson then asked for Channel 13, assigned to KLAC-TV Los Angeles. Later, he decided not to become involved in hearings and asked for special temporary authorization to use Channel 6. This request was rejected by the FCC which said he would have to submit a new application and take chances on getting the grant just like any new applicant.

Commission said it took action in deleting Channel 1 only after informing Mr. Gleeson in May 1947 that re-allocation or deletion of Channels 1 and 2 appeared likely and that he should participate in public hearings on the proposals. Although Channel 6 is not in use in Los Angeles, it was assigned to San Diego, 112 miles away.

Originally Channel 1 was set aside for community TV stations, but later FCC decided mobile and fixed services, also assigned 44-50 mc, could not share channel with TV stations. Eleven cities were assigned Channel 1, but no other CP's were granted by the FCC.

Gleeson Petition

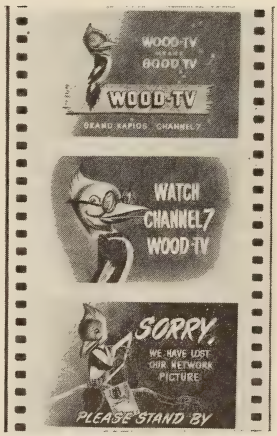
Last November Mr. Gleeson filed a petition to reorganize BCA under the Federal Bankruptcy Act in Los Angeles. Petition was to prevent a pending sheriff's sale of KROP Brawley, Calif., equipment and furnishings. Foreclosure action was brought by Mr. and Mrs. Fred K. Wahl who claimed $8,120.41 due on a $10,000 promissory note signed in 1946 by Mr. Gleeson [B•T, Nov. 5, 1951].

William B. Ross, head of W. B. Ross & Assoc., Los Angeles advertising and public relations agency, was appointed BCA trustee. When he filed applications with the FCC for involuntary transfer of control of the Gleeson-owned stations (KPRO Riverside, KREO Indio, KPOR Blythe and KROP Brawley), Mr. Gleeson refused to sign them.

Last week Mr. Gleeson signed a petition with the FCC requesting that no action be taken on the transfers since he claims he is under the protection of the court. Until the court decides at a hearing next month whether or not BCA is bankrupt, Mr. Gleeson contends that he should retain control.

Mr. Gleeson said he is trying to work out arrangements with his creditors for monthly settlements. If this can be done, and the court approves the plan, BCA will be spared bankruptcy he said.

Only if the court does not approve the plans for payment to creditors, or if it declares BCA bankrupt, should the involuntary transfer of control be made, Mr. Gleeson claimed.



'WOODY' WOWS 'EM

WOOD's Bird Is Versatile

WOOD-AM-TV Grand Rapids is proud of its bird. He's "Willy Wood," who appears quite liberally on the station's video picture and also identifies both stations.

The little woodpecker, who has animation that is life-like and pleasing to the eye, the stations note, expresses well the area which they serve. Grand Rapids is in the heart of a wood working area with a concentration of furniture factories.

Search for Willy's creator is a story in itself, the stations report. Studios nationwide submitted sketches in response to WOOD's bid. But all had something missing until Harry Wesslund's sketch arrived. Mr. Wesslund, a local self-taught freelancer, had the answer. His skilled pen makes Willy "commanding, excited, whimsical or athletic—exhibiting the impression desired for almost any circumstance," Willy is "a bird equal to every challenge," WOOD adds.

TV film strip shows Willy in action.

'Faith of Our Fathers'

AN UNNAMED television network is reported considering production of a serial version of "Faith of Our Fathers," the Paul Green sesquicentennial show at Washington, D. C., which has been suffering budget problems. According to Sesquicentennial Director Paul M. Massmann, the $65,000 received from TV serial rights would put the show over the hump this season. Costs for the drama are about $260,000 annually.

TVA COLLECTS CLAIMS

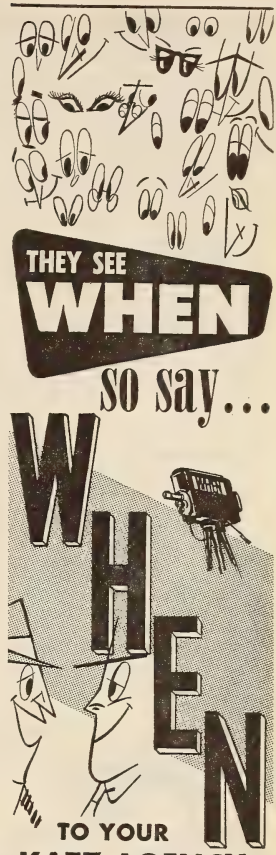
Payments Due Under Code

TELEVISION Authority has collected more than $25,000 in claims in the past 18 months, according to a report by Wayne Oliver, West Coast representative, made to the union's executive board.

Explaining that payments collected were due under the TVA code, Mr. Oliver said producers had either protested or sought clarification on the various claims. Daws Butler and Stan Freberg, voices on *Time for Beany* on KTLA (TV) Hollywood, received $1,300 in claims against Clampett Productions, co-owner of the puppet show. The pair based their claim on the fact they were not paid for handling commercial spots for which they doubled.

Included also was money held in escrow until the Wage Stabilization Board approved the new TVA code for salary increases and fee adjustments. KTTV (TV) there released $5,020, which represented pay increases for staff announcer. Terra Productions turned over $5,122 to TVA and adjusted its fees for cast members of ABC-TV *Space Patrol.*

OFFICIAL FILMS



To Distribute TV Series

OFFICIAL FILMS, New York, has acquired distribution rights to three half hour TV film packages being produced by Don Sharpe Enterprises, Hollywood. They include *My Hero,* comedy-accentuated mystery series starring Robert Cummings, with Julie Bishop; *Impulse,* suspense series written by Larry Marcus, and *Four Star Playhouse,* series of original plays starring Charles Boyer, Rosalind Russell, Dick Powell, Joel McCrea and Robert Cummings, who will be rotated each week.

In addition Official Films will handle distribution of Dougfair Corp.'s TV film series *Terry and the Pirates.* The adventure series is based on the comic strip distributed by Chicago Tribune-New York Daily News Syndicate.

Political Advice

POLITICAL quotation of the hour was delivered by Sen. John M. Butler (R-Md.) to the Arlington, Va., Republican Women's Council. He said: "The most important medium in campaigning today is television." Directing his remarks to a Republican who is aspiring to a House seat from Virginia, Sen. Butler, who unseated former Sen. Millard E. Tydings (D-Md.) in a controversial election that set off a Capitol Hill investigation, added: "You can take care of the city people through TV, but take care of the people in the counties through personal contact."

'THE BIG PICTURE'

Second Cycle Shown

PREVIEW of the second 13-week cycle of *The Big Picture*, Army-produced documentary of the Korean War, was held last Monday in New York. It depicts the vast U. S. military training program at home and abroad, development of new military equipment, and the U. S. military picture in Western Europe and Africa.

Produced jointly by the Radio-TV Branch, Public Information Div., Dept. of the Army, and the Signal Corps Photographic Center, the film is distributed by Col. E. M. Kirby's Radio-TV Branch of the Army in Washington.

The series currently is running on 83 TV stations. Stations may sell it to sponsors on an institutional basis.

Regulation W

CEILING for radio-TV and other consumer goods now exempted from Regulation W installment restrictions has been raised from $50 to $100 by the Federal Reserve Board. Effect of ruling is to subject all appliances costing over $100 to the current requirement of 15% down and 18 months to pay. Board of Governors explained additional exemption would "simplify administration" of Regulation W without "substantially affecting volume of consumer installment credit outstanding."

90,000 TV SETS

IN THE QUAD-CITY AREA

EACH month this TV set total is ascertained by Quad-City wholesalers serving this area. Actually, the total of TV homes reached by WHBF-TV is considerably larger as our TV signals are received over an extensive area beyond the Quad-Cities.

Increased power has doubled WHBF-TV radiated strength; the staff and facilities have recently moved into enlarged quarters.

True to a 25 year tradition of service in radio broadcasting, WHBF-TV now also serves Quad-Citians *well*—and advertisers *profitably*.

film report

Crown Pictures International, Hollywood, acquires *The Barber of Seville*, feature film version of Rossini's comic opera produced in Rome by Tespi-Productions, for exclusive seven-year television distribution rights in America. Film stars **Ferruccio Tagliavini**, Metropolitan Opera star, and opera personalities **Tito Gobbi, Nelly Corradi** and **Italo Tajo.** Feature will be offered as single unit or in three half-hour episodes.

* * *

Hyman Marcus, financier, to head **Television Varieties Inc.**, Hollywood, formed with more than $200,000 capital to produce and package TV film programs. **Herman Webber**, General Service Studios producer, vice president, and **Max Fink**, attorney with Fink, Rolston, Levinthal & Kent, as secretary-treasurer.

Production . . .

Stanton Kramer, head of TV Enterprise Pictures, Hollywood, and former head of George Florey Inc., Chicago, to be executive producer of **Radiant Productions**, Hollywood, newly formed to produce two 13 half-hour film series plus several features. Writer-director will be **Lawrence Raimond**, head of Lawrence Raimond Productions, and **David Buntzman**, United Artists Productions Inc. executive producer, to be associate producer. Production planned to start in 90 days.

* * *

Jack Chertok Productions Inc., Hollywood, to start 52 half-hour *Lone Ranger* next month for **General Mills Inc.**, with **Fred Fralick** to work with Mr. Chertok as representative of series owner, George W. Trendle.

* * *

Lindsley Parsons Productions, Hollywood, starting new TV film series of 26 half-hour CBS-TV *Files of Jeffrey Jones* on April 17. Actors **Don Haggerty** and **Gloria Henry** of first 13 of series, again will be co-starred and **Lew Landers** and **George Blair** will share direction.

* * *

Gayle Gitterman, head of **Hal Roach Studio** story department, Culver City, appointed producer on *The Dramatic Hour*, four-part, one-hour TV film series starting May 19. Studio is seeking actor and actress to star in programs, format of which will be: (1) screen test followed by discussion with the two stars, (2) dramatized chapter from *The Last Days of Pompei*, (3) playlet by studio's stock company and (4) playlet featuring the two stars.

* * *

Phildan TV Productions, Hollywood, has acquired TV rights to *Alley Oop*, N.E.A. Service Inc. comic strip, and plans to produce 13 half-hour TV film series starting this summer.

Film People . . .

Royce Barclay of production department, Warwick & Legler Inc., Los Angeles, signed as story coordinator with **Pennant Productions Inc.**, Hollywood, for initial TV film series, *Date With Destiny*. Budget of over $8,000 allowed to obtain personalized stories for series through newspaper ads in 12 cities.

* * *

Fred Messenger and **Jack Murton**, head of newly-formed **Talent Assoc.** (television casting agency), signed by **Lindsley Parsons Productions**, Hollywood, to cast next 13 half-hour *Files of Jeffrey Jones* TV film series.

PRESIDENT'S NEWS

Pollard Would Televise

RADIO-PRESS conference of the President of the U. S. should be telecast to provide another channel for the flow of White House ideas, opinions and actions "directly home to millions of Americans," according to Dr. James E. Pollard, director, Ohio State U. School of Journalism.

Dr. Pollard's suggestion was contained in his article written for *Public Opinion Quarterly*. He received the 1947 Sigma Delta Chi Distinguished Service Award for research in journalism for his book, *The Presidents and the Press*. The article analyzes the President's news conference as a channel of communication.

News conference telecasts would not impair press and radio reports but would make both the President and his questioners "more responsible in their conduct of them," he said. It would "enhance the personal touch" and "would make still more democratic a major communications device that is uniquely American," Dr. Pollard added.

TV PROGRAM ADVICE

'Home Is Not Nightclub'

THE TV industry must not conceive of the home as a nightclub but rather as a church in miniature, Martin H. Work, executive secretary of the National Council of Catholic Men, said in an address before the 1952 Family Life Conference in Columbus, Ohio. The conference was sponsored by the Family Life Bureau of the National Catholic Welfare Conference.

"If the home is as sacred as the church," Mr. Work continued, "dramas will not justify suicide, divorce of convenience, drunkenness, lust and violence." Mr. Work suggested that, at present, TV is "neither a saint nor a sinner" and added that on the credit side, "television brings into our homes many hours of innocent, healthful entertainment."

LOUIS G. PACENT

Was Pioneer Engineer

LOUIS G. PACENT, 58-year-old founder and president of the Pacent Engineering Co. and pioneer in radio development, died in Roosevelt Hospital in New York on Monday after having become ill earlier in the day.

The industrial electrical engineer, a graduate of Pratt Institute, first experimented with wireless in 1906, 10 years after Marconi's successful tests, and had his own amateur station in 1909 when he was 16 years old. Working with the Armed forces as a communicator in 1913, he helped develop communications equipment for both the Army and Navy in World War I.

After the war, Mr. Pacent formed the Pacent Electric Co. to design and produce radio apparatus and electrical equipment for such companies as RCA, General Electric and Westinghouse. During the next two decades, as a consultant to Warner Bros. Pictures, he also worked on talking motion picture equipment, developing in 1928 the first power-operated sound projector for films.

In 1933, Mr. Pacent formed the engineering company he headed at the time of his death.

He was a fellow of the Institute of Radio Engineers, as well as of the Society of Motion Picture Engineers, a member of the American Institute of Electrical Engineers, and also author of a number of papers and books on communications engineering.

Mr. Pacent is survived by his wife, the former Antoinette Marie Andriola, and two sons, Louis G. Jr. and Homer C. Pacent.

Henry Cabot Lodge Jr. (R-Mass.), chairman of the Eisenhower campaign, and Walter Williams, national chairman of the committee. Mr. Larmon will continue to serve as publicity-public relations director.

INDEPENDENT PROGRAMMING

Fairbanks Warns Against 'Mediocrity'

INDEPENDENT TV station programming is doomed to mediocrity if the current attitude of operators is projected into the future.

Jerry Fairbanks, president of Jerry Fairbanks Productions, made this prediction in Hollywood after talks with station executives during his five-week, 11,000-mile tour of video cities.

Policies of resistance to re-runs, disregard for basic principles of good showmanship, unrealistic attempts to get everything for nothing and a viewer-go-hang attitude were impressions he said he received from independent station operators.

He was amazed to find that many operators "are not concerned with raising the quality of their programming.

"Engrossed in selling time, they are interested in improving their presentations only if no expense is involved," he said.

Noting that TV film producers generally base program prices to stations on the outlet's rate card, he declared that "It is an equitable arrangement because the rate card is based on the number of sets in the area, just as motion pictures are priced to theatres according to the number of seats in houses.

"Not only are operators unwilling to pay a comparable price for quality programming but they frown on any re-runs," he said.

Mr. Fairbanks stated that some stations rule against a repeat for at least 12 months and warned that unless this policy is relaxed, TV film producers will stop investing money in quality products.

"In many instances," he said, "re-run ratings have been higher than during the first release. Many viewers missed shows because of competing programs, the time and date of telecasts and other home factors. And there are the many new set owners each month in each city."

During the past five years, TV film producers have developed new production techniques, resulting in remarkable savings, Mr. Fairbanks said. Some shows are being made at prices 500% lower than in 1947.

Operators in cities with multiple stations have a much greater appreciation of quality programming, Mr. Fairbanks said he learned during his tour.

"Unfortunately, there are not enough multiple-station markets available currently so that the producer can amortize his production costs over them," Mr. Fairbanks explained, "and until the monopoly created by the FCC freeze on station permits is lifted, the public and the TV film producer will continue to suffer."

Skyland Stations

LAST WEEK's FCC ROUNDUP listed stations affiliated with Skyland Broadcasting Corp., applicant for new TV station in Dayton, Ohio, incorrectly. Skyland is licensee only of WONE and WTWO (FM) Dayton. Skyland seeks Channel 22 (518-524 mc) with ERP of 200 kw visual.

PROGRAM FORMAT TEST

Planned at Syracuse U.

EXPERIMENTATION in developing formats for television programs dealing with economics are underway at Radio Television Center of Syracuse U. under the sponsorship of Twentieth Century Fund. Purpose of the project is to determine the best method of presenting economic information to the public via TV.

Edward C. Jones has been placed in charge of coordinating the project. Don Lyon will handle scripts and production. Research will be under the direction of Lawrence Myers. All are on the staff of the center.

Three programs, each using an experimental format and based on economic research information supplied by the fund, are being broadcast in April over WSYR-TV Syracuse from the university's TV studios on campus. Each program format will be different. Audience reaction tests and interviews are employed to determine relative impact of each format.

Wilmotte Ends Tour

RAYMOND M. WILMOTTE, who recently completed an assignment as consultant to Research and Development Board of the office of the Secretary of Defense, last week announced his return to the field of broadcast engineering. Headquarters are at 1460 Church St., N.W., Washington 5, D. C.

FRANK FOGARTY, General Manager

TRUSTEESHIP TV

Proposed at Evansville

AN INGENIOUS plan to get TV started in Evansville, Ind., without waiting for comparative hearings and an FCC grant for the sole proposed VHF Channel 7, has been submitted to the Commission.

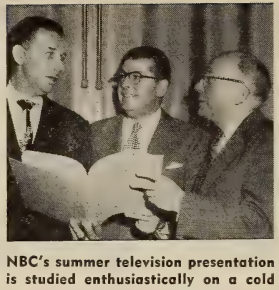
Plan involves the use of a trusteeship to construct and operate the VHF station pending the Commission's decision granting it to a single applicant.

There are two Evansville applications on file at the present time. Both are for VHF. In the Commission's proposal, Evansville would have three additional UHF channels—one of which would be reserved for non-commercial, educational use.

Essence of the trusteeship plan is this: A group of non-broadcast highly regarded Evansville citizens would set up a TV company. With FCC permission it would build and operate the VHF station as soon as the TV freeze is lifted. When consolidated hearings on Evansville applicants are finally decided (expected to be 1½-2 years off), the trustees would turn over the station to the chosen applicant—which would repay the costs of construction and operational losses, or inherit any profits.

Idea was broached to FCC General Counsel Benedict P. Cottone by Evansville Mayor H. O. Roberts and J. D. Beeler, local businessman and chairman of the Chamber of Commerce's TV and Communications committee.

Mr. Cottone's reaction, it was reported, was that the group should formulate its plan in more detail and submit it to the FCC for a decision. He also pointed out, it is understood, the possibility that the idea might run afoul the objections of a single applicant.



First recommendation for the trusteeship plan was made by John B. Caraway Jr., executive vice president of Electronics Research Inc.

Controversy flared when John A. Engelbrecht, president and general manager of WIKY Evansville, first opposed idea, then proffered use of WIKY's television facilities (900-ft. tower, transmitter and studio equipment now in storage, 44x24x-22-ft. studio).

Mr. Caraway charged that WIKY was trying to "torpedo" the plan, since one of the provisions in the WIKY offer was that the trustees must be acceptable to the owners of WIKY.

Mr. Engelbrecht retorted that he was suspicious of the plan because Mr. Caraway was the consulting engineer for WGBF Evansville and that one of the executives of Electronics Research Inc. is a major stockholder in WGBF.

Only applicants for TV in Evansville at present are WIKY and Trans-American Television Corp., a Philadelphia group. It is understood that there are about five more TV applications being prepared for Evansville.

NBC's summer television presentation is studied enthusiastically on a cold Chicago day by this threesome (l to r): Booth Luck, director of TV operations for Geoffrey Wade Adv.; Perry Schupert, sales manager, Miles Labs., Elkhart, Ind., and Oscar Capelle, sales promotion manager for Miles. Wade agency, headquartering in Chicago, handles Miles account. Presentation luncheon was attended by more than 200 agency and client representatives.

SMPTE CONVENTION

TV to Be Leading Topic

TELEVISION will be the leading topic when the Society of Motion Picture & Television Engineers holds its 71st semi-annual convention in Chicago, April 21-25, President Peter Mole said last week.

Video speeches, scheduled for the first day, include talks on color viewers by Robert E. Lewis, Armour Research Foundation, Chicago; "Theory of Parallax Barriers" by Sam H. Kaplan, Chicago TV consultant; "Effective Sum of Multiple Echoes in Television," A. D. Fowler and H. N. Christopher, Bell Telephone Labs, Murray Hill, N. J.; and "TelePrompters" by Fred Barton and H. J. Schlafly of TelePrompter Corp., N. Y.

Omaha TV Courses

SERIES of short university courses for college credit has been announced by the U. of Omaha and KMTV (TV) Omaha. The station has reserved a time segment for a minimum of 52 weeks, committing full resources to the series. Owen Saddler, KMTV executive vice president and general manager, said that he has long felt that television could be of tremendous value in education. "By bringing the classroom into the home," he explained, "we are tapping a new source of students—the housewives."

METHOD to reduce handling costs 20% in moving TV console sets from production line to retailers was demonstrated April 2 in Atlantic City by Yale & Towne Mfg. Co. Firm showed National Packaging Exposition how its gas and electric fork lift trucks, equipped with new TV clamps, can handle eight consoles at once.

TV RENEWALS

Eleven Temporaries Per

ONLY 11 of the 26 TV stations placed on temporary license by the FCC because of the lack of educational and/or religious programming have not been granted regular renewals.

Fortnight ago the Commission granted another five stations regular license renewals. They were WBTV (TV) Charlotte, WKTV (TV) Utica, WNBQ (TV) Chicago, WNBT (TV) New York and WNBW (TV) Washington. Earlier 10 stations got their licenses renewed [B•T, March 24, 3].

Last February when all 78 TV licensees came up for regular yearly renewal the FCC put 26 on temporary because their listings for the 1951 composite week showed no agricultural and/or religious programming. The Commission's attitude was that a TV station could not be operating "in the public interest" without some such programming [B•T, Feb. 4].

Stations receiving regular one-year renewals after having been placed on temporary license showed FCC that the composite 1951 listings did not indicate the true picture of program types actually aired, or informed the Commission that such programs had been started or were soon to start.

Still operating under temporary licenses, due to expire May 1, are KING-TV Seattle, KPHO-TV Phoenix, KTTV (TV) Los Angeles, WGN-TV Chicago, WJAR-TV Providence, WLWT (TV) Cincinnati, WLWC (TV) Columbus, WLWD (TV) Dayton, WNHC-TV New Haven, WOR-TV New York and WOW-TV Omaha.

'TRUTH IN ADS'

More Clubs Join Campaig

AT LEAST six ad clubs in the nation have followed the lead of the Dallas Ad League in promoting "truth in advertising" campaign to boost public confidence in advertising, the Texas unit reported last week.

The Dallas league said resolutions patterned after its suggested resolution have been adopted by ad clubs in Oklahoma City, Tulsa, Akron, Central Florida, Providence and the Women's Adv. Club of Winnipeg. Letters from other clubs in the U. S. and Canada indicated much interest, the league added.

Its resolution suggesting that the Advertising Federation of America call a convention to set up "a code of basic advertising principles" and also develop a program of "voluntary self-regulation to the end that public faith and confidence in and acceptance of advertising generally may be preserved" was adopted by the Dallas league March 28 [B•T March 31].

RTMA SESSIONS

N.Y., Canadian Meets Set

EFFECTS on TV station construction and receiver sales in the wake of FCC's expected freeze lift will top *post facto* discussions among directors of Radio-Television Mfrs. Assn. and RTMA of Canada at the joint ninth international conference of the groups in Ontario April 24-25.

This topic is scheduled on the agenda with the expectation that the Commission will release its new TV allocations plan by mid-April. Anticipated effects on station construction and receiver sales in the U. S. and Canadian cities within American station range will be studied.

Prior to the Canadian board meetings, several RTMA committees will convene in New York April 22. Groups meeting are the Advertising Committee Technical Products Divisions, Executive Committee and Broadcast Section Industrial Relations Committtee and the Eastern Credit Committee.

The Canadian conference will be held at the General Brock Hotel in Ontario with separate board meetings on successive days. U. S. RTMA directors will meet April 24 (Thursday) under Chairman Robert C. Sprague and their Canadian counterparts Friday morning under President Ralph A. Hackbusch. Directors of each association will sit in at the other's session as guests. Two luncheons, a reception and dinner dance round out social activities.

New York sessions will be held at the Biltmore Hotel.

The Advertising Committee will weigh recommendations that the FM promotion campaign be extended after a drive in New York state this coming May. Heading the committee is Lee Pettit, General Electric Co., with David Grigsby, Zenith Radio Corp., as chairman of the FM Promotion subcommittee.

The Technical Products Division Executive Committee, with RTMA Director H. J. Hoffman, Machlett Labs., presiding as chairman, will review progress of its reorganization plan and map future activities.

HOUSEWIFE DAYTIME AUDIENCE

Oakite Offer on WNBT (TV) Brings 18,000 Requests

A TRIAL OFFER over WNBT (TV) New York by Oakite Products Inc. of its silver cleaning plate drew 18,000 requests from one demonstration, the firm has reported.

Offer was made on the *Josephine McCarthy Cooking Show,* telecast Monday through Friday, 11-11:30 a.m.

Oakite has been using radio for 23 years and now uses TV as well.

Frank A. Conolly, manager of the Oakite package division, declared after viewing the avalanche of requests, "I honestly believe that this forever knocks into a cocked-hat any myth about the lady-folks not looking at daytime TV shows."

Miss McCarthy and her manager, Mole & Lee Inc., commented, "We've simply been inundated. . . ."

The telecast during which the offer was made was itself a special occasion. Miss McCarthy was crowned "Queen of TV Cooking Schools" by Mr. Conolly. In addition, two women were awarded fur coats for their prize-winning letters concerning Oakite.

Entrants in the Oakite contest, promoted nationally in radio, TV and newspapers, were to tell in 50 words or more, "Why I like the Oakite handi-squeeze spout" or "Why I like Oakite for my fall cleaning."

Entries were received from all 48 states, the District of Columbia and Alaska. In all, there were 1,000 prize-winners from 40 states.

First prize, a persian lamb coat, was won by Mrs. William E. Long, McKeesport, Pa. Second prize, a mink-blended muskrat coat, was awarded to Mrs. Elsie Mallow, Brooklyn. Both coats were from I. J. Fox Inc., furrier.

Appearing on WNBT (TV) telecast were (l to r) Mrs. Long; Howard Fox, president, I. J. Fox Inc.; Miss McCarthy, Mrs. Mallow and Mr. Conolly.

MONOGRAM TV POLICY

Is Explained by Broidy

WITH CURRENT contracts fulfilled, Monogram will "refrain from committing any further products to video," Steve Broidy, president, revealed in announcing studio's policy of licensing motion pictures to television.

He declared "for the record" that Monogram is "primarily in the business of producing and distributing pictures for theatrical exhibition."

Deal was concluded recently with Screen Actors Guild enabling the studio to release one group of approximately 70 feature films, made since August 1948, to TV by reimbursing actors from 12½% to 15%. No deals with Screen Directors Guild and others were finalized.

Interstate Television Corp., subsidiary of Monogram, is making TV films.

Solar Noise Bursts

SOLAR investigations by the National Bureau of Standards in Washington have led to the discovery of a phenomenon that appears to be another source of interference to long-range radio reception. The phenomenon has been observed as bursts of solar radio noise superimposed on a normally steady level of radio-frequency energy received from the sun, it was reported.

SEATTLE AWARDS

Ad Club to Present

RADIO and television figure as two of nine media classifications in the fifth annual advertising awards competition of the Seattle Advertising and Sales Club. Last Friday was deadline and awards will be made at a banquet May 8 at Seattle.

Dick Keplinger, free-lance newscaster and radio personality, is chairman of the judging committee on radio entries. Chairman of the television judging committee is Otto Brandt, general manager of the King Broadcasting Company (KING-AM-FM-TV Seattle).

All entries will be judged by a "new standard yardstick," according to Trevor Evans, vice president of Pacific National Advertising Agency, Seattle, and chairman of the ad club's awards committee. The three elements, summarized by Mr. Evans in a letter to all advertisers, agencies and media, are: (A) creative idea, (B) execution of idea, (C) achievement of objective.

Four categories each have been set up for the radio and television awards:

RADIO

a. Best commercial announcement copy broadcast, and designed to sell merchandise and/or service.
b. Best commercial program designed to sell merchandise and/or service.
c. Best announcement copy promoting Public Relations and/or Community Service campaigns.
d. Best program or programs promoting Public Relations and/or Community Service campaigns.

TV

a. Television commercials on film or slides of approximately one minute or less, designed specifically for television.
b. Television live commercials of approximately one minute or less.
c. Commercial filmed television programs, of five minutes or more, designed for and containing one or more commercial messages for one or more clients.
d. Commercial live television programs of five minutes or more, designed for and containing one or more commercial messages for one or more specific clients.

G. LYNN SUMNER

Was Kimball Executive

G. LYNN SUMNER, 67, chairman of the plans board and a director of Abbott Kimball Co., New York, died last Monday in his sleep at his Quaker Hill country home.

Mr. Sumner was a former president of the Advertising Club of New York and had been president of Assn. of National Advertisers. He established his own agency under his own name in 1925, and joined Abbott Kimball Co. as a vice president in 1951, when the agencies merged. He was made chairman of the plans board last February.

Surviving are his wife, Mrs. Mary Brooks Picken Sumner, a son, G. Warren, and a daughter Mrs. George Birdson.

MAIER Brewing Co., L. A., renewed *Lonesome Gal*, nightly program on KHJ Hollywood, on April 7. Show is in its third year on the station.

allied arts

HOFFMAN LABS Inc., L. A., subsidiary Hoffman Radio Corp., established to specialize in electronics field. **H. L. HOFFMAN** president, heads new company which is housed in three plants: 3761 S. Hill St. and 3716 S. Grand Ave., both L. A., and 335 S. Pasadena Ave., Pasadena.

BEALE H. RICHARDSON, Motion Picture Advertising Service Co., New Orleans, appointed sales manager for company's television film commercial production.

T. O. WHITE Co., Birmingham, Ala., appointed sales representative for United Artists Television in that city. **BETTY E. JONES** will be direct contact.

ALBERT B. EARL, advertising and sales promotion department, Columbia Records, N. Y., named executive assistant and director of consumer research.

HARRY ADELMAN, radio-electronics advertising man, appointed sales promotion manager of Arrow Electronics, N. Y., distributor of broadcasting and industrial electronic equipment.

FRED FREELAND, former TV director of Ruthrauff & Ryan, Chicago, named director of motion picture and television department, Kling Studios, same city.

JAMES R. BUTLER, national sales promotion manager, Frew Sewing Machine Co., Rockford, Ill., to Belmont Radio Corp., Chicago, in same capacity.

DAVID A. BADER appointed national publicity director of Motion Picture Pioneers Inc. and Foundation of the Motion Picture Pioneers Inc.

ARTHUR E. WELCH, national merchandising manager of Raytheon Mfg. Co., to Bendix Aviation Corp., Baltimore, as assistant general manager of radio, television and broadcast receiver division.

WILLIAM H. LINZ appointed representative of Peerless Electrical Products, division of Altec Lansing Corp., in Illinois, Wisconsin and part of Indiana north of Indianapolis.

BERNARD L. CAHN, general sales manager, Insuline Corp., Long Island City, N. Y., elected 1952 chairman of Sales Managers Club, Eastern Division, association of electronics and equipment manufacturing executives.

ALLEN B. DuMONT, president of Allen B. DuMont Labs, named member of Industrial Council, recently organized at Rensselaer Polytechnic Institute, Troy, N. Y.

MISS CUTHBERT

Retires From NBC Post

MARGARET CUTHBERT, supervisor of public affairs for NBC radio and a widely known broadcasting pioneer, is retiring June 1 after more than 25 years' service with the network [CLOSED CIRCUIT, March 31], it was announced last week.

Miss Cuthbert

Miss Cuthbert joined WEAF New York (now WNBC) about 1924 as director of speakers, and when the station became the key of the newly organized NBC in 1926, she was made an executive of the network. She headed the women's and children's programs division for many years, developing and producing a large number of radio series including *Gallant American Women* and *Echoes of History*.

More recently, she produced the award-winning, long-run *NBC Theatre* series.

A native of Prince Albert, Sask., Canada, and graduate of Cornell U., Miss Cuthbert is president of the New York Chapter, American Women in Radio & Television. In 1936, she was designated by the New York League of Business & Professional Women as one of 24 "women of achievement," because of her work in radio, and in 1941 the General Federation of Women's Clubs honored her for achievement. In 1946, the Women's National Press Club placed her among 10 women chosen for outstanding work as "promoters of progress."

Her successor at NBC has not been designated.

Probst Resigns

J. STANLEY PROBST has announced his resignation as president of Maryland Pharmaceutical Co., Baltimore, to be effective on or shortly after May 1. He says his future plans are not definite. The firm uses radio spots through Joseph Katz Co., Baltimore.

GLEEFUL expressions tell story for (l to r) Jim Clark, WRVA Richmond sales manager; Betty Powell, Geyer, Newell & Ganger; Anne Small, Scheideler, Beck & Werner; Eunice McGarry, Doherty, Clifford & Shenfield, and Steve Suren, Sullivan, Stauffer, Colwell & Bayles. Occasion was week-end festivity arranged by WRVA for 24 executives of New York agencies.

KJR FARM PROGRAM SELLS

Lime Firm's Sales Add Retailers as Sponsors

ABOUT a year ago, dealers in the service area of KJR Seattle noticed the rapid depletion of their stock of lime fertilizer.

When tracing the reason for the unexpected demand, their path of inquiry led to KJR's Bill Moshier telling farmer-listeners about beneficial effects of proper application of lime to the soil. One of Mr. Moshier's sponsors is the Imperial Agricultural Limestone Flour account.

The dealers decided that this year they would take advantage of his program and buy participations in the *Farm Forum* Tuesday and Thursday, and in *Farm News* Wednesday and Friday.

KJR comments that judging by mail and other inquiries, the campaign has paid off handsomely.

One key to Mr. Moshier's success may be found in his manner of addressing his audience. Mr. Moshier does not talk down to his listeners, KJR notes. Instead, he discusses soil acidity, plantfood elements, plant nutrients, chemical reactions, bacteria and the amounts of lime needed by various types of soil.

Mr. Moshier long ago learned that the farmer is a businessman and unless radio advertising satisfies him that the product will pay off in cash, the farmer isn't interested.

Though the farmer regards expenditures for soil improvement as a long-term investment, KJR points out that the radio approach is the same as in selling consumer items.

Knowing the listening habits of farmers, Mr. Moshier airs the *Farm Forum* at 6:45 a.m. and *Farm News* at 12:30 p.m., both Monday-through-Friday.

KJR says that radio's ability to sell cigarettes, toothpaste, and other "consumer" items has pretty well been established. But, the station proudly adds, Mr. Moshier's success shows that radio can sell "capital" goods, too.

Appoint Maj. Mayall

APPOINTMENT of Maj. Herschel Mayall, network TV and stage actor, as producer-director for the Defense Dept.'s Radio-TV Branch has been announced by Charles Dillon, branch chief. Major Mayall will replace Lt. Alfred Lurie (Army), who has returned to WBAP-TV Fort Worth as video director. The major, who uses the stage name of Herschel Bentley, recently completed a stage tour with actress Kay Francis in the production of "Theatre."

KAYE-HALBERT Corp., Culver City (mfrs. TV sets), has opened factory sales and service branch at 3349 Adams Ave., San Diego. Service and installation of Kaye-Halbert TV receivers is offered to dealers' stores and customers' homes. William Jellerson is in charge of factory service branch.

Radio Stamp Issued

RADIO Monte Carlo is pictured on stamps for 1, 15 and 30 francs issued by the post office of Monaco. Philatelic experts say this is the first time a radio station has been honored in this way. Station broadcasts simultaneously in medium waveband, 1466 kc with 120 kw, and in two shortwave bands with 30 kw, according to Pan American Broadcasting Co., which represents the station in the United States.

CBC ON PROGRAMS

Improvement Is Noted

IMPROVEMENT in programming of all Canadian stations was noted by the Canadian Broadcasting Corp.'s board of governors at its March 21 meeting in Toronto. But it also said in announcing the renewal of seven small station licenses that the "board will continue to keep program patterns of private stations under review."

All applications for share transfers and changes of licenses from individuals to companies, except that of CKRS Jonquierre which was deferred for further study, were approved during the meeting. CJON St. John's, Newfoundland, was authorized a broadcast pick-up license to operate in the 152-174 mc band. Stations which had their licenses renewed were CHLO St. Thomas; CJOY Guelph; CKBL Matane; CKOK Penticton; CKEN Kentville; CJDC Dawson Creek, and CJRW Summerside.

NARTB HONORED

Truman, Candidates, Send Greetings

ABILITY of the radio and television industries to help people know what is happening in the world, aiding them in making proper decisions, will determine their importance in the national structure, President Harry S. Truman told NARTB in a telegram of greeting to the 30th annual convention held in Chicago March 31-April 2.

Greetings also were sent by three leading Presidential candidates—Sen. Robert A. Taft (R-Ohio); Sen. Estes Kefauver (D-Tenn.), and Sen. Richard B. Russell (D-Ga.).

Sen. Kefauver congratulated radio and TV for making the most of their opportunity to serve the public during the recent crime hearings. He added that they are performing "an invaluable service for the freedom of the world and the cause of democracy in bringing the American people and their government closer together . . ."

Text of President Truman's greeting follows:

Please extend my greetings to those attending the 30th annual Convention of the NARTB. These 30 years have brought radio from the status of an infant to the stature of a giant in American life and have also witnessed the birth and unprecedented expansion of television. This has been fortunate for the American people because never have they needed, as much as in the last three decades, such elaborate communication media to keep pace with the national and international problems confronting us. Much as we all enjoy the entertainment features of radio and television, in the last analysis the importance of these industries will always depend in a large measure upon their ability to help the people know what is going on in the world so that the people can make the right decisions for their welfare and safety.

Sen. Kefauver's message follows:

I wish to congratulate your association on its 30th birthday. No praise is too high for the fine work you radio broadcasters and telecasters have done and are doing better and better every day. You have a rare opportunity to serve the general welfare, for the potentialities of your media are almost limitless. You have seized and made the most of that opportunity as I know from personal experience, especially in the crime hearings I had the honor to lead for a time.

You were invaluable allies in focusing the attention of the American people on the twin evils of crime and corruption. You have brought into almost every American home and to millions of people abroad a fair report of the events of the day and a lively discussion of the problems that face us.

You are performing an invaluable service for the freedom of the world and the cause of democracy in bringing the American people and their Government closer together, thus promoting the kind of mutual understanding upon which national unity rests. A well-informed public is essential if we are to achieve the full promise of American life and we shall all work together to make the public even better informed.

As you probably know, I have proposed to Congress that a regular question and answer period be established at which the heads of the executive department would be asked to appear on the Congressional floor to explain their problems, report progress, and answer questions. This would clarify issues and bring closer cooperation between the executive branch and the Congress.

It would also serve as a great public school of political education if, as I also propose, these question and answer periods were fully covered by the press, by radio and by television. This would give all of us, from coast to coast, a better insight into our Government. Through our marvelous modern means of communication we could thus establish on a national scale a kind of New England town meeting at which everybody sits in on matters of common concern.

The radio and TV broadcasters of America have a proud record, having led the way for all the world. Keep up the good work, as I know you will. With deep appreciation of all you have done, I wish you the best of luck for the future.

Sen. Taft's message:

Congratulations on your annual convention. I understand this is the largest meeting of radio and television broadcasters and I wish you a profitable and enjoyable time.

Sen. Russell's greeting:

Congratulations and best wishes to the NARTB on the occasion of their 30th annual convention in Chicago on March 30.

BAVARIAN RADIO STUDY

40% is FM—State Dept.

THERE are approximately 1.5 million FM listeners in Bavaria, with 400,000 or 40% of the total registered radio receivers being FM sets, according to a Radio Munich estimate revealed by the Dept. of State.

The survey, another in a series made public by the department on the status of FM in Germany [B•T, March 31], estimates that about 27% of all sets in Western Germany are FM-equipped. Local dealers there also have started a cooperative campaign designed to increase FM set ownership.

Additionally, Radio Munich will concentrate more heavily on FM programming, with a new drive scheduled to get under way last Tuesday. New FM programs will feature entertainment and newscasts. Many shows originally broadcast first over medium wave will be aired initially on FM now, it was reported.

Baseball Sound Effects

CHARLES MICHELSON Inc., New York, has announced the availability of a special group of five Speedy-Q double-faced baseball sound-effects phonograph records. The discs are designed to recreate actual background of baseball games.

INVENTORIES

Feb. Stores 'Inadequate'

"INADEQUATE" inventories last February for low-priced radio receivers and 17-inch table model TV sets were claimed by 13% of retail stores covering five cities, the National Production Authority announced last Monday.

NPA's Office of Civilian Requirements, under Administrator Walter J. Currie, surveyed retail outlets in 10 cities for availability of selected essential low and medium-priced consumer durable goods during February. Study revealed only occasional reports of low inventories or difficulty in obtaining new merchandise, Mr. Currie said.

Retailers advised that new supplies of inexpensive radio sets and 17-inch table video receivers "were cut off from some sources." Other TV set models were not included in the list of 37 items checked.

About 20% of the stores reported "limitations on shipments" of 17-inch sets and other products. "Some of these allotments to retailers may be due to customary trade practices," NPA explained.

The survey covered dealers and chain stores in Boston, New York, Philadelphia, Pittsburgh, Detroit, Chicago, Cincinnati, Birmingham, Houston and Los Angeles. Study was made for NPA by the Bureau of Labor Statistics.

CONELRAD PLANS

Funds Cut May Not Hurt

TESTING of FCC's Conelrad, or permanent broadcast alert plan for radio station participation in the event of hostile air attack, may escape appreciable impairment despite House action fortnight ago.

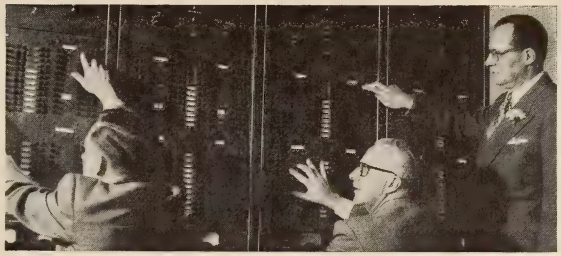
An FCC spokesman said that while the fund slash for monitoring and field engineering activities "is not good," Conelrad still would be pressed into action when practicable.

The House upheld recommendations of its Appropriations Committee, which allotted the Commission $125,000 for acquisition of new equipment at existing monitoring outlets but made no allowance for new stations or additional personnel requested for these functions [B • T, March 24, 17].

The Senate still must vote on these funds, contained in the independent offices expenditures bill for fiscal 1953, beginning July 1. The Senate Appropriations Committee has completed hearings on the FCC phase.

Broadcasters currently are operating under the "interim" plan calling for 24-hour, around-the-clock operation by key 50-kw clear channel outlets. It was understood that the main roadblock in the path of operating Conelrad is the question of what agency shall pay for setting up telephone lines—the Federal Civil Defense Administration or the Continental Air Defense Command, which drafted the broadcast alert plan.

The House sustained its appropriations group in cutting requested FCC funds for monitoring and field engineering activities. Most immediate effect of the House action is that it bypasses monies for 86 people requested by the Commission for "functions relating to the electronic and magnetic radiation control (Conelrad)." These functions relate primarily to testing of Conelrad.



Former FCC Chairman Wayne Coy had testified before the Independent Offices subcommittee that 19 jobs pertain to this critical work. He placed Conelrad estimates at roughly $260,000 for fiscal '53.

The Conelrad plan, entailing voluntary participation by broadcast stations with slight equipment changes, has been financed out of a trust fund involving transfer of funds from the U. S. Air Force to FCC. Members of the FCC chief engineer's staff are compensated from this fund.

The Commission requested funds to build four new monitoring stations, estimated at $307,000, plus another $250,000 to replace worn-out equipment at 11 primary and seven secondary stations. The $125,000 sum represented half of the latter figure for replacement.

"The number of monitoring stations which we have and our lack of ability to staff those stations on a full 24-hour, seven-days-a-week basis, has created what we believe is a major crisis in the national defense aspect," Mr. Coy testified.

Presumably, this is the background for current 24-hour "skywave" operations of the nation's 50 kw stations, underway in recent weeks. Under this interim plan, all stations could be asked to leave the air on proper authority. In a similar action last year, the House wiped out a similar bid for monitoring and engineering funds.

TESTING ABC's new master control center in the network's new studios are (l to r) William Trevarthen, director of engineering operations; John Bourcier, New York AM operations supervisor, and Frank Marx, vice president in charge of engineering. New ABC radio studios are located at 39 W. 66th St., New York. First program was aired 6 a.m. March 31.

GENE AUTRY, western TV and film star, signs with General Features Syndicate, N. Y., for daily and Sunday comic strip based on his TV adventures.

HADACOL RULING

Jurisdiction Affirmed

QUESTION of jurisdiction over Hadacol reorganization by the U.S. Southern District Court in New York has been settled. Judge William Bondy ruled on March 25 that the matter fell within proper domain of his bench.

Matter had been weighed since last fall when a southern group of Hadacol creditors—including members of the Dudley Le Blanc family—sought to have reorganization of the corporation handled by southern courts, raising the jurisdictional question when the New York court appointed Milton F. Rosenthal, New York attorney, as trustee, on Oct. 5.

Judge Bondy's ruling leaves the way open for Mr. Rosenthal to continue conduct of the Hadacol business, unless the decision is appealed. Representatives of his counsel predicted last week that it may take some time before opposing parties even know whether they will appeal.

Reorganization of the business, in process for several months, is still too new to measure, it was indicated, since much of the effort has resulted in clearing dealers' shelves rather than lowering the corporation's measurable inventory. One basic matter still has not been solved, however: The Federal Trade Commission suit against previous Hadacol advertising methods. Possible solutions are for the trustee to enter a consent decree—in effect, to make wide compromises with the FTC—or to see the matter through legal channels, expected to be a time-consuming process. Concern of many creditors last week was that the longer the reorganization is extended, the less chance for any of them to make good the bills they hold.

Scott Radio Names

SCOTT RADIO Labs., Chicago, which also owns John Meck Industries and Meck Television Inc., has named Ross Roy Inc., same city, to handle advertising on all divisions. Radio and television will be used. Mark Martin, vice president of the agency, is account executive.

RADIO SALES PULL

WOV Cites Mueller Results

ITALIAN language broadcasts on WOV New York, bi-lingual independent, proved a real booster for sales of Mueller's Macaroni Products in a market dominated by Italian-name brands, results of a test have revealed.

After 13 weeks of broadcasts—bolstered by night and morning announcements in WOV's English language time—a six-day premium offer was made: send in a box top to receive a free steak knife. Response was 8,166 replies, more than double the figure set by Scheideler, Beck & Werner, the agency, as satisfactory. Overflow mail received after the established deadline was not even counted.

The Italian response of 5,825 was viewed by WOV General Manager Ralph Weil as particularly astounding, inasmuch as Mueller's had not achieved wide distribution in Italian stores—meaning that many listeners had to go beyond their usual shopping centers to make Mueller purchases.

A concurrent test of WOV's English language pull showed similar results: one announcement daily for six days on two programs *(Prairie Stars* and *Wake Up New York)* brought in 2,341 replies, again double what Mueller's would have settled for as satisfactory in proportion to advertising costs, according to the station.

FTC BARS 'FREE'

Cannot Be Used In Ad Copy

THE WORD "free" eventually may disappear from all broadcast and published advertising claims as a result of a ruling promulgated by the Federal Trade Commission within the past fortnight.

There were strong indications, too, that the Better Business Bureaus of major cities would crack down on companies, dealers and other groups who use this bait in connection with the advertising and sale of merchandise.

The commission doesn't prohibit the word or similar phrases in so many words, but is falling back on a stringent interpretation of its deceptive practices statute. It now has the backing of federal courts to administer the new policy.

In an order handed down April 2, FTC reminded that an appellate court has affirmed the interpretation banning the use of "free" and requiring a more judicious use of phraseology in connection with advertising claims. The Supreme Court, in effect, upheld it by refusing to review the order.

The Washington Better Business Bureau has served notice on local dealers, it was learned, that it will refer all such instances of alleged violation to the commission. A spokesman said this practice may be followed throughout the country.

Firms and dealers, when offering gifts or gratuities, are urged by bureaus to abandon the use of "free" and qualify such offers with the reservation that they are "given without extra or additional charge" with other purchases. Another requirement is that the item offered "free" be of the same quality and value as that purchased. FTC authorities withheld official comment on the ruling.

A BBB official conceded that under such a literal interpretation, no offer actually could be construed as "free" inasmuch as the recipient has to perform such action—merely by applying— to take advantage of it. FTC has been awaiting court affirmation before cracking down, he explained.

There was confusion in ad agency circles last week as a result of the FTC order, which actually has been on the FTC books since early 1948.

The issue was posed casually during a panel session of a luncheon held by the Washington Advertising Club of the District of Columbia last Tuesday.

Henry L. Kronstadt, president and media director of Kronstadt Advertising Agency, Washington, observed that as a result of the FTC ruling, it has become "dangerous" to use the word "free" in ad claims.

Strict Interpretation Questioned

Kronstadt and other agencies reportedly have questioned whether the strict interpretation offered by the commission prohibits certain related uses of the word and generally have advised clients to steer clear in their ad claims lest they run afoul of FTC's deceptive practices statute.

The U. S. Court of Appeals for the Second Circuit in New York affirmed the commission's ruling last November and the U. S. Supreme Court last month denied a petition for *writ of certiorari*, thus throwing out the case. It was reportedly the first time the "free-without-any-strings-attached" issue had reached the high tribunal.

The case involves a commission order citing Modern Manner Clothes, New York, for making such claims in their representations.. After the appellate court affirmed the decision the respondents, Joseph and Sadie Rosenblum, filed a petition with the high court, which refused review March 24.

FTC's administrative interpretation, which appeared in the Federal Register in February 1948, reads as follows:

The use of the word "free", or words of similar import, in advertising to designate or describe merchandise sold or distributed in interstate commerce, that is not in truth and in fact a gift or gratuity or is not given to the recipient thereof without requiring the purchase of other merchandise or requiring the performance of some service inuring directly or indirectly to the benefit of the advertiser, seller or distributor, is considered by the commission to be a violation of the Federal Trade Commission Act.

The question was raised by Mr. Kronstadt whether the interpretation prohibits use of the phrase "free of extra charge" with respect to offers of certain items. According to the Washington Better Business Bureau, it does.

An FTC spokesman pointed out that the ruling was prompted by numerous complaints and that some companies or small firms have circumvented the intent of the statute by holding so-called "one cent sales."

Modern Manner Clothes in New York had advertised wearing apparel with reference specifically to "free goods."

CREATING a leaning tower of Pisa from 24,000 entries to a $100-weather contest is Ken Allen (l), WKBH La Crosse, Wis.'s m.c. of *Man on the Street*. He staged contest for sponsor, La Crosse Breweries. Mr. Allen, who toppled the stack just after picture was taken, is assisted by Mrs. Margaret Magin, who handled paper work, and Carl Michel Jr. (r), representing sponsor.

PUBLIC SERVICE

KNOX, WANS Make It Pay

SUCCESS in signing sponsors for station's *Baukhage Talkin'* show was realized at KNOX Grand Forks, N. D., when the KNOX sales staff hit on idea to sell public service announcements to companies such as real estate offices and banks which did not ordinarily use radio advertising.

Each sponsor got one announcement per week supplied by the National Safety Council with credit given to the sponsor for making the message possible. When the idea clicked, Elmer Hanson, general manager of the station, wrote the good news to MBS's co-op department with which it is affiliated.

Publication of the idea in a memo sent to all MBS stations prompted WANS Anderson, S. C., to give it a try. Result: 15 out of 21 firms approached in Anderson signed up to sponsor a co-op news broadcast on WANS.

On All Accounts

(Continued from page 12)

(TV), and thrice weekly Tom Harmon sports-newscasts on KNX plus special radio and television spot campaigns from time to time: Shontex Co. (hair conditioner, shampoo), now conducting a spot radio campaign on Western stations; Hoffman Candy Co. (Cup 'o Gold candy bar), which recently increased its distribution 1,200% over a six months' period mainly by the use of radio programming in Los Angeles; Bandini Co. (fertilizer); Gordon Bread, and Baker Boy Bakeries (confection rolls).

Miss Koren was born in Chicago 26 years ago. When she was seven the Korens moved to Los Angeles. Loyal to her adopted city, it wasn't until 1948 that she even got to see one of the West Coast's other attractions, San Francisco, and then it was on business for Foote, Cone & Belding.

She was graduated from Beverly High School in 1945. From there she took a job with Hughes Aircraft Co. in the engineering department. She supplemented her income by singing evenings with a popular dance band in various local spots. Two years later, she deserted Hughes for advertising.

Miss Koren shares a garage apartment in Los Angeles' Wilshire district with "Gus the Great," a champagne-colored miniature French poodle. One of her active hobbies is cooking, with particular emphasis on foreign dishes. Next project will be learning how to play the piano.

PLANT EMPLOYMENT

Chicago Area Down 27%

ALTHOUGH employment in Chicago-area electronics plants is down more than 27% from a year ago the region is still not classed as "distressed" and therefore is unable to get priority on the list for government contracts. This was reported to the board of the Radar-Radio Industries of Chicago at an emergency session called by President Leslie F. Muter last week.

Mr. Muter, discussing the new Defense Manpower Office directive which favors letting contracts to firms in "distressed areas," pointed out that "the world's largest concentration of radio, television and electronic equipment and components manufacturers" has been "fighting an uphill struggle for its share of government orders."

programs promotion premiums

IVIC club promotion of program on WGST Atlanta, *I Was a Communist for the FBI*, is assisting the station and nder Motors, Atlanta Dodge d Plymouth dealer, to put the ogram across. One of four inrested clubs is Atlanta Lions, hich gave the promotion top spot its monthly luncheon, for show hich began fortnight ago.

V COVERS HOME SHOW

OME Builders Show, Cincinnati, being promoted by WLWT (TV) ere by exclusive contract with ncinnati Home Builders Assn. *idwestern Hayride*, heard on the ation as well as the NBC netrk, will originate from show on ril 19, the opening date. Thirtyree members of the station's talt roster will make personal apearances and telecast coverage is anned for opening ceremonies. ow will run through April 27.

HOW MUST GO ON

BEST trouper tradition, Bill aschmeier, WPTR Albany's ungest disc jockey, age 4, overme the problem of measles by doing his part of the *WPTR Children's Playhouse* over the telephone hile his father, Howard Maschier, did his end of the show m the studio. Young disc jockey heard each Saturday on a chilen's record program.

EED RECORD CLAIMED

W speed record for filming, deoping and airing newsreel film claimed by WPTZ (TV) Philaphia. Station's film unit took tures of U. S. Attorney General mes P. McGranery on April 3, and a half hours after his apntment to the President's cabi- shortly before 4:30 p.m. Shots ned between 7 and 7:20 p.m. re seen on NBC's *Camel News ravan* same night, 7:45-8 p.m.

RADIO'S ECONOMY VALUE

PROMOTION stressing economy of radio advertising compared to cost of other media has been distributed by WBBM Chicago. Copy deals with one advertiser's "case history" and points out that money spent in radio produced results far greater in ratio to money spent than did advertising through any other medium.

SIGN LANGUAGE

NEW technique is being used by Mary Jones, women's commentator for WFIL-AM-TV Philadelphia, on her weekly TV program. Program is conveyed in sign language for deaf and hard-of-hearing. As result, nearly 2,000 laudatory letters came to station after first effort and method was continued as regular feature on TV. One camera covers interpreter exclusively throughout half-hour program each Wednesday, and other two focus on Mary and Howard Jones and their guests.

CLASSROOM PROGRAMS

TV classroom series will resume on WAAM(TV) Baltimore April 23. Show, titled *Baltimore Classroom: 1952*, will be patterned after the 1950 series. Program, seen once a week, telecasts unrehearsed sessions from local public school classrooms.

CALIFORNIA MARKET

LETTER pointing up Southern California as all-year market—and particularly in summer months—is being distributed to trade by KNX Los Angeles under signature of Edwin W. Buckalew, assistant general manager in charge of sales. Letter says over one quarter of year's total retail sales are made in three summer months and notes influx of tourist trade. Figures are quoted on sets-in-use in area and KNX average share of summer audience in Los Angeles.

KLZ PROMOTES SERIES

PROMOTION drive has been launched by KLZ Denver for its *Philo Vance* series under sponsorship of Denver National Bank. Station placed cartooned cards at each teller's window, prepared colorful statement insert, designed a lobby easel and display window and aired announcements and motion picture trailers. Display uses "Wanted, to Solve Baffling Mysteries" as theme and books by S. S. Van Dine, original author.

SCHOLARSHIP PLAN

FOR seventh consecutive year, KFAB Omaha is cooperating with U. of Nebraska on its "In-Service Scholarship" program. Station takes students from the school's radio department for summer training in studios. Past winners, including announcer Bob Jones and farm director Herm Harney at KFAB, have gone on to key jobs in the broadcast field, according to Harry Burke, KFAB general manager, who made announcement.

NEW INDUSTRY

CAMPAIGN to attract new industry to the San Francisco East Bay area has been started over WPIX (TV) New York through Ryder & Ingram, Oakland, Calif. Series consists of three five-minute programs dramatizing advantages of Alameda County as an industrial location. Ross Ryder of agency is account executive on drive, launched for metropolitan Oakland March 30.

HOLIDAY SHOWS

PLANS for entertaining children Memorial Day are being mapped by Spooks Beckman, m.c. of *Big Bear Dollar Derby* on WLWC (TV) Columbus, Ohio. Mr. Beckman got idea from Washington's Birthday circus show he put on for children. Station decided that on future school holidays, Mr. Beckman will put on similar program for kids, issuing tickets in advance for the show.

"HARD SELLING" PAMPHLET

"HARD selling" pamphlet, pointing up an advertiser's accolade in response to announcements on its daily *Every Woman's Hour*, featuring Helen Brooks, home economist, is being circulated by WFBR Baltimore. Message conveyed is just how well advertiser's product gets across via radio "especially in a strong TV market." Advertiser cited in the piece is The Sofskin Co., Bloomfield, N. J., maker of skin cream.

RADIO PLUGS MERCHANDISE

RETAIL buying is getting a lift from WNEW New York. Station has begun extensive campaign of "reminder-to-buyer" announcements designed to make listeners aware of their needs for various kinds of merchandise. Over 100 unsponsored spots of this type are aired by the station daily to stimulate retail buying which has reportedly been at an unusually low ebb of late.

Mr. William J. Hecker
Cecil & Presbrey
Cincinnati, Ohio

Dear Bill:

Gist yestidy I seen a memo on the boss' desk with a hull mess uv figgers. Down at th' bottom it sed that WCHS with 5,000 watts on 580 haz more listeners hyar in West Virginny than any other stashun in th' state. Ef'n you add thet to the fact thet we hev more listeners hyar in Charleston than all th' other four stashuns, you can shore see that WCHS will sell a hull lot of Redtop.

Additional Radio-TV Schedules Announced

FURTHER baseball signings and broadcast schedules have been announced by radio and TV stations.

Complete home schedule of the Boston Red Sox will be telecast through joint sponsorship of the Atlantic Refining Co., Narragansett Brewing Co. and Liggett & Myers Tobacco Co.

To 77 home games will be added two pre-season games between the Red Sox and the Boston Braves, April 12-13. The TV coverage will be alternated between WBZ-TV and WNAC-TV Boston. In addition arrangements are being made to have 31 games carried by WJAR-TV Providence.

Under the same joint sponsorship, all 154 home-and-away Red Sox games will be aired over WHDH Boston and fed to a network of 15 stations in Massachusetts, Rhode Island, Connecticut and New Hampshire.

Curt Gowdy, Tom Hussey and Bob LeLaney, veteran New England sportscasters, will handle both radio and TV announcing.

Agencies directing the broadcasts are N. W. Ayer & Son for Atlantic Refining and Cunningham & Walsh for Narragansett Brewing and Liggett & Myers.

Atlantic Refining, along with the Adam Scheidt Brewing Co., will sponsor games of the Philadelphia Athletics and Phillies.

Philadelphia baseball video schedule calls for 58 day games, 43 of which are to be played on weekends or holidays. No night games are to be telecast.

WIBG Philadelphia will air the radio broadcasts, with 16 other stations from Wilmington through eastern Pennsylvania hooked into the Athletics-Phillies network.

Telecasts will be divided among three Philadelphia stations, WPTZ (TV), WFIL-TV and WCAU-TV.

Announcers will be Byrum Saam for the Athletics and Gene Kelley for the Phillies with Claude Haring as alternate and color man for both.

In addition, WFIL-TV will present Messrs. Saam and Kelley in a 15-minute program, *Strictly Baseball*, Monday, beginning April 14.

Washington Plans

WWDC-AM-FM Washington will air the full 154-game schedule of the Washington Senators in addition to 12 pre-season exhibition games. Phillips Radio & Television Co. and the Christian Heurich Brewing Co. (for its Old Georgetown beer) will sponsor all broadcasts on an alternating basis.

KRIC Beaumont, Tex., will air MBS' *Game of the Day* during the afternoon. During the evening the station's sportscaster, Ed Dittert, will describe games of the Beaumont Roughnecks.

KNOE Monroe, La., will broadcast all home-and-away games of the Monroe Sports with Irving Zeidman, KNOE program director, handling play-by-play. Frigidaire and the Coca-Cola Co. share sponsorship.

WOAI-TV San Antonio, as a public service, was to telecast an exhibition game last Saturday between the St. Louis Browns and the Brooke Army Medical Center Comets by remote pickup from Ft. Sam Houston's Christy Mathewson Field. The game was to be carried to the bedsides of 2,000 patients of Brooke Army Hospital where a TV receiver is available in each ward.

WMAR-TV Baltimore will telecast home games of the Baltimore Orioles (International League) on a two games per week basis for the fifth straight year. Covered will be Thursday night games and the first game of each Sunday afternoon double-header, station announces, with Chuck Thompson handling play-by-play assisted by John McLane. Gunther Brewing Co. will sponsor the telecasts, coverage of about a total two-dozen games. Biow Co. was the handling agency.

KXOK Bat Boy

CONTEST being conducted by KXOK St. Louis, the Browns baseball station for this season, will award $500 and a job as the Brownies bat boy to the lad, 10 to 16, who writes the best 150-word letter on "Why I want to be bat boy for the Browns." Second place winner in the contest, which ends April 13, will be bat boy for the Browns' visiting opponents.

James A. Willard

JAMES A. WILLARD, 63, w was a children's favorite as "Un Wip" on WIP Philadelphia fr 1932 to 1936, died April 3 of heart ailment at his North Phil delphia home. Mr. Willard al was in the visual education depa ment of the Society for Preventi of Cruelty to Animals. His wi Mrs. Elsie T. Willard, survives.

present figures which were in any major degree at variance with those of ". . . the FCC and some other engineers." To the best of my belief there are no major differences.

My evaluation was based on a comparison of the power needed for the same service and indicated that it should require something of the order of 1,000 times the power radiated for UHF to give the same service as VHF. Power was used as a comparison because that is what the broadcaster has to pay for when he invests his money in a station, but the power ratio indicated does not mean that the UHF service area or population reached will be 1/1,000 of that served by a VHF station of the same power.

That the service area and the population served will be less for UHF than for VHF under the contemplated rules is a certainty, but how much less will greatly depend on the location of the station, the terrain, population distribution, the interference, and the proper handling of these factors. . . .

The figures I gave were checked informally with other engineers whose affiliations and standing could under no circumstances be considered to harbor an extreme point of view. They came up with ratios of equivalent powers of UHF and VHF for the frequencies selected which were of the same order as mine but which were on the whole somewhat less favorable for UHF.

Raymond M. Wilmotte
Consulting Engineer

Airspace

EDITOR:

We have noted with a great deal of interest your editorial in the March 10 issue of BROADCASTING • TELECASTING and the stories in the March 17 and 31 issues regarding the problem of obtaining approval of proposed television towers and sites from an aeronautical viewpoint. I think you are doing a splendid job of bringing this matter to the attention of the broadcasting and television industry.

There is one factor which has not yet been brought out, however. . . . The CAA has published criteria for determining what are hazards to their operation and what changes would have to be made in their operating procedures by reason of erection of television towers. . . .

The problem that concerns us at this time is the fact that several of the regional CAA offices do not want to be guided by their published rules, but instead apply arbitrary rules and standards that go beyond the published material, just because they do not want a tall tower anywhere in the area. . . .

A. Earl Cullum Jr.

No Swamis Here

EDITOR:

Your editorial, "The Network Problem," [March 31] should prompt many to realize that just as in the early '20s the local daily newspaper emerged from the shadows of metropolitan publications and "boiler plate," so today the local radio station is taking the lead in listenership and advertiser acceptance.

Your discerning commment that "the day may not be far distant when the network, for a fee, will provide something analogous to press association service" indicates you employed a good pair of binoculars rather than a crystal ball.

Thomas B. Tighe
Station Manager
WJLK Asbury Park, N. J.

Eastman Booklet

EDITOR:

We have noted the reference given in your TELECASTING YEARBOOK for 1952 regarding our booklet, "The Use of Motion Picture Films in Television." We have had some requests for the revised edition of this booklet as a result of this reference.

For your information, we wish to advise that we have not yet been able to prepare a new edition of this booklet and it will probably not be available before the end of this year. Also, we do not have any available copies of the old edition.

Since there have been so many requests for information on this subject, we did reprint a small section of the old booklet as an aid in helping people with some of the fundamentals regarding lighting technique for television studio photography and outlining some of the production methods used. . .

W. I. Kisner
Motion Picture Film Dept.
Eastman Kodak Co.
Rochester, N. Y.

File 13?

EDITOR:

. . . I suppose that all stations regularly receive so-called house hold hints, etc., in the mail. Most of these are out and out ads for some national product . . . I am wondering how the industry as a whole treats such items, how managers feel about giving, or at least being asked to give, such firms as Procter & Gamble, *Popular Mechanics* magazine, Fritos and many others free time. . . .

James D. Abbott
President
KEVA Shamrock, Tex.

[EDITOR'S NOTE: Any other broadcasters want to tell Mr. Abbott how they handle such things?]

It's a Problem

EDITOR:

We are attempting this year to develop some problems and cases for our students in American government . . . One of the cases we have selected is the Benton bill (S 1579) proposing a National Citizens Advisory Board on Radio and Television. Those of us teaching the course are very desirous of presenting the opposition viewpoint to the bill as fully as possible.

I have just found a couple of your editorials in BROADCASTING • TELECASTING . . . which I believe are excellent materials for our students to read . . . I should be most grateful if you would give me permission to use these materials. . . .

Phillips Bradley
Prof. of Political Science
Syracuse U.
Syracuse, N. Y.

SALES of Stewart-Warner Corp., Chicago, increased 28.3% in 1951 over the previous year but earnings dropped about 10%, according to an announcement made by James S. Knowlson president. Sales last year totaled $103,269,258 with earnings of $4,104,789 after taxes or $3.40 per share on $5 par value capital stock.

ACLU Asks FCC Action

(Continued from page 25)

is not involved in the ACLU complaint.)

In an accompanying letter to FCC Chairman Paul A. Walker, ACLU's Patrick Murphy Malin, executive director, said "the only three" legal issues involved in the proposed hearing are: (1) Whether blacklisting is against public interest; (2) whether licensees "have improperly delegated programming powers—and on this we cite the *Blue Book* of 1946 and the Commission's report on chain broadcasting—and then improperly acquiesced in or endorsed blacklisting, demonstrating a lack of character qualification as well as action against the public interest. . . ." and (3) whether conditional renewal of licenses is appropriate—"and on this we cite the Richards case."

Cases cited in the complaint, like Mr. Miller's book, frequently involved the anti-communist newsletter *Counterattack* and its *Red Channels* booklet linking 151 persons with various "Communist or Communist-front" groups, past or present. Also as in Mr. Miller's book, the network, advertiser or agency officials allegedly involved are not identified.

Mr. Miller explained that often he was unable to reach the persons he sought to interview, despite repeated efforts, and that in almost all cases interviews which were granted were conditioned upon anonymity for the interviewee. Nevertheless, he said, a number of persons have agreed to come forward and testify if FCC grants a hearing.

Proof Claim

From the network and station side, Mr. Malin said "one or more of the defendants may well admit the allegations made," but asserted that, if not, ACLU is prepared to prove its charges "once we have the subpoena powers" which are granted in hearings.

All but one of the cases cited in the complaint involved alleged or suspected firings or non-hirings, due to public pressure or fear of it, of persons who had been linked with pro-Communist associations or beliefs. In the case of ABC, however, the charge was that "two vehement anti-Communists" had been kept off a show.

NBC was accused on two counts: (1) The famed "Jean Muir case," in which the actress' appearance on General Foods' *The Aldrich Family* was cancelled in August 1950 by Young & Rubicam, with 'apparent asquiescence" by NBC, "because of her alleged affiliations listed in . . . *Red Channels*," according to the complaint, and (2) cancellation of the appearance of The Weavers, folk-singing quartette, on Congoleum-Nairn's Dave Garroway TV show last June by NBC "solely on the basis of alleged associations of some of the members of the said quartette."

The charge against CBS was that it eliminated the dance of Paul Draper from the kinescope of a *Toast of the Town* show in January 1950 "solely as a result of protests received [following his appearance on the live version of the program] on the basis of the said Paul Draper's alleged associations and beliefs."

The kinescope in question, the complaint said, was shown on KTTV (TV) Los Angeles, "KWTJ Miami," WDAF-TV Kansas City; KSD-TV St. Louis, WHAS-TV Louisville; WAGA-TV Atlanta and WRGB (TV) Schenectady. [Presumably the reference to "KWTJ Miami" should be to WTVJ, Miami's only TV outlet. The complaint erroneously identified all seven stations, except KTTV and "KWTJ," as CBS-owned outlets.]

ABC Incident

In the case of ABC, it was charged that in the summer of 1951 the network "refused to permit two vehement anti-Communists, Ralph de Toledano and Benjamin Gitlow, to appear on its *Cholly Knickerbocker* radio show originating in New York City."

Asserting that "the said refusal may have been due to the beliefs of the aforesaid de Toledano and Gitlow, or to a general policy of not having political discussions of any kind on that particular show," the complaint said that "the matter should therefore be investigated by this Commission."

With regard to DuMont, the complaint said that pianist-singer Hazel Scott's program was cancelled in September 1950 "probably because of allegedly pro-Communist affiliations, though she is in fact violently anti-Communist."

WPIX was charged with cancelling a series of Charlie Chaplin film series "solely because of the alleged affiliations or beliefs of the said Charlie Chaplin."

KOWL, the complaint alleged, "barred Rev. Clayton Russell from speaking over its facilities solely because of his alleged associations."

Citing the instances of alleged discrimination detailed in Mr. Miller's report, ACLU asserted that in cases of blacklisting the licensee is operating contrary to public interest, regardless of whether the act is performed by the licensee or by advertisers, agencies or others to whom he delegates program responsibilities.

ACLU said it was filing the complaint "solely in the public interest" and not in the interest of any of the victims of alleged blacklist practices. Further, it said:

"This complaint is brought not only because the complainant believes the said discrimination to be against the public interest because of its effects upon the individuals blacklisted and others in the radio and television industries, but also believes it to be against the public interest because of its denial to the public of the right to see or hear artists or their work-products because of irrelevant considerations."

In his letter to FCC, Mr. Malin quoted from the Miller report:

By lumping together the names of some of the most prominent and talented people in radio and television, "Red Channels" has surely done exactly what the Communists would wish it to do. It has, by innuendo at least, given the Party glamour, prestige, and importance it has never before enjoyed in radio and television.

It has created throughout the industry a suspicion and distrust and despair and hysteria which the Communists themselves could not hope to create. The publication and those executives in advertising and among the sponsors and on the networks who have used it have, whatever their intentions, created in one of this country's most crucial industries the kind of terrified dissension on which the Communist Party always has and always will grow.

More important, the publishers of "Red Channels" and those who adhere to it have wrecked, probably forever, the careers of many talented anti-Communist Americans, not to mention the spiritual pain and humiliation suffered by all of the 151 [named in the booklet].

ACLU's position on the blacklisting issue was outlined by Executive Director Malin and Board Chairman Ernest Angell in an introduction to *The Judges and the Judged* (see page 25):

(1) The government has a duty to preserve national security but is the "only" proper authority to designate positions closely affecting security and to decide what persons should be excluded from them;

(2) For all other positions, employment "should be decided on the basis of qualifications strictly relevant to the particular task involved";

(3) The public has a right to express disapproval of employment of certain radio-TV performers, "but when they aim at censorship or suppression which would prevent other people who do not agree with them from looking at or listening to the performer, then they are acting contrary to the spirit of the First Amendment";

(4) If private persons "purvey information reflecting on a person's loyalty," then they should "observe the elementary canons of due process," striving for accuracy and completeness of information and providing the persons a full and fair hearing;

(5) The radio-TV industry must show "the determination to pay what little cost may be involved to support free speech, due process, and non-discrimination."

ACLU officials said they had "no illusions" that their approach to the problem through the FCC is "all that's needed," but felt it would be a step forward in the overall civil liberties campaign.

The complaint was prepared by former FCC Chairman Fly, an ACLU board member; John F. Finerty, also a board member, and Herbert Monte Levy, staff counsel.

VOTE CAMPAIGN

Broadcast Aid Sought

THE Advertising Council will solicit a major amount of free time from the broadcast media to promote the first national non-partisan register-and-vote campaign, being sponsored by the American Heritage Foundation. This was reported in Chicago Wednesday as Thomas D'Arcy Brophy, president of the non-profit educational foundation, outlined plans for the extensive public service promotion.

The foundation will provide advertising, promotion and publicity patter to the various mass communication media as a prelude to getting out a heavy fall vote, with personnel of Leo Burnett Agency, Chicago, handling most of the planning.

Mr. Brophy hopes the campaign will result in a record vote of 63 million, or 15 million more than were cast in the last national election. Although the drive was launched in Chicago, coordinating headquarters are in New York. NARTB is a cooperating organization.

WCTC Ups Rates

A RATE rise amounting to approximately 10% was announced last week by WCTC New Brunswick, N. J., independent station on 1450 kc with 250 w power. General Manager Robert L. Williams said the increase was effective April 1 but pointed out it was not made "across the board."

Non-Docket Actions . . .

TRANSFER GRANTS

KLOK San Jose, Calif.—Granted involuntary assignment of license and CP from E. L. Barker and Claribel Barker, general partners, and T. H. Canfield and Opal A. Canfield, limited partners, d/b as Valley Bcstg. Co., to E. L. Barker and Claribel Barker, general partners, and Paul Grim, special administrator of estate of T. H. Canfield, deceased, and Opal A. Canfield, limited partners. Interest to be transferred is that held by Mr. Canfield, deceased, to Mr. Grim, and totals 15%. No monetary consideration. Granted April 8.

KNOB Long Beach, Calif.—Granted assignment of license from J. E. Tapp, Raymond B. Torian and John Doran to Messrs. Torian and Doran who will assume all assets and liabilities of licensee being transferred to new partnership d/b as Cerritos Bcstg. Co. Before transfer Mr. Tapp held 33⅓% interest, Mr. Torian held 43⅓% interest and Mr. Doran held 23⅓% interest. After transfer Mr. Torian holds 76⅔% interest while Mr. Doran continues to hold 23⅓% interest. Mr. Torian pays Mr. Tapp $1,721 for his interest. Granted April 8.

WKIN Kingsport, Tenn.—Granted assignment of license from Cy N. Bahakel, d/b as Sullivan County Bcstrs., to Radio Station WKIN Inc. Change from individual to corporation; no actual change of ownership or control. Granted April 8.

WGBA - AM - FM Columbus, Ga.—Granted transfer of control Georgia Alabama Bcstg. Corp. to R. E. Page Corp. All present stockholders of Georgia-Alabama Bcstg. Corp. also hold stock in R. E. Page Corp., and no one except R. E. Page holds stock in R. E. Page Corp. and not in Georgia-Alabama Bcstg. Corp. Five Georgia-Alabama Bcstg. Corp. stockholders, who each hold 400 shares (20%), will sell interest to R. E. Page Corp. for $108 per share or $43,200 per stockholder, for total of $216,000. Principals in R. E. Page Corp. (transferee) are: President A. H. Chapman (0.06%); Vice President Wyline Page Chapman (33.27%); Vice President Annie Laurie Page Ashworth (33.27%); Treasurer W. E. Page Jr. (16.67%); Secretary M. R. Ashworth (0.06%), and Richard Edwin Page (16.67%). R. E. Page (as individual) owns Ledger-Enquirer Co. and Bradenton Herald Co. Transfer is to simplify and expedite expansion of capitalization of corporation to allow for television addition. Granted April 8.

WGWD Gadsden, Ala.—Granted assignment of license from First National Bank of Montgomery and Margaret Covington Milwee, executors of estate of G. W. Covington Jr., deceased, to Etowah Bcstrs. Inc. Principals of Etowah are beneficiaries of estate of deceased; President Oscar P. Covington (13.8%), owner of Oscar Covington Foot Health Shop, Montgomery, and DeLuxe Shoe Fixery, Montgomery, and Selby Bonfield Shoes Inc., Birmingham, Ala.; Earl B. Covington (13.83%), owner of farm at Canton, N. C.; Secretary-Treasurer Hugh M. Smith (3.19%), manager of WCOV Montgomery, and following housewives, each of whom will hold 13.83%: Clara R. Covington, Ethel Covington, Margaret C. Milwee, Peggy M. Carlton and Hazel C. Davies. Transfer is to effect settlement of estate; no monetary consideration since transfer merely carries out terms of will of Mr. Covington Jr., deceased. Granted April 9.

WCOV-AM-FM Montgomery, Ala. — Granted assignment of license from First National Bank of Montgomery and Margaret Covington Milwee, executors of estate of G. W. Covington Jr., deceased, to Capitol Bcstg. Co. Principals of Capitol are same as principals of Etowah Bcstrs. Inc. and percentage of ownership in Capitol would be substantially equivalent as that which they hold in Etowah (see WGWD Gadsden, Ala., above). Transfer is to effect settlement of estate; no monetary consideration since transfer merely carries out terms of will of Mr. Covington Jr., deceased. Granted April 9.

WGWC Selma, Ark.—Assignment of license from First National Bank of Montgomery and Margaret Covington Milwee, executors of estate of G. W. Covington Jr., deceased, to Dallas Bcstrs. Inc. Principals of Dallas are same as principals of Etowah Bcstrs. Inc., and percentage of ownership would be substantially equivalent as that which they hold in Etowah (see WGWD Gadsden, Ala., above). Transfer is to effect settlement of estate; no monetary consideration since transfer merely carries out terms of will of Mr. Covington Jr., deceased. Granted April 9.

KCRT Trinidad, Col.—Granted assignment of license from Ernest M. Cooper, d/b as Mel-Bert Bcstg. Co., to Harvey R. Malott for $20,000. Mr. Malott is newspaper broker in Kansas City, Mo. Granted April 9.

New Applications . . .

TV APPLICATIONS

Dayton, Ohio—Skyland Bcstg. Corp., UHF Ch. 22 (518-524 mc), ERP 200 kw visual, 100 kw aural, antenna height above average terrain 500 ft. Estimated construction cost $349,377.45. First year operating cost and revenue not estimated. Applicant is licensee of WONE and WTWO (FM) Dayton. [This item is in lieu of TV application for Dayton published in FCC ROUNDUP April 7 which incorrectly listed stations of which Skyland Bcstg. Corp. is the licensee.] Filed April 4.

Roswell, N. M.—John A. Barnett, Ch. 8 (180-186 mc), ERP 110 kw visual, 55 kw aural, antenna height above average terrain 903 ft. (above ground 783 ft.). Estimated construction cost $314,722.14, first year operating cost $100,000, revenue $100,000. Mr. Barnet, since 1947, oil producer, principally in Midland and Upton counties, Texas; also, consulting geologist. He has 100% interest in numerous oil leases as producer and various interests ranging from 10% to 50% in joint adventures involving leases. Prior to 1947 he was petroleum engineer for U. S. Dept. of Interior, Oil & Gas Div., Conservation Branch, Roswell, N. M. Filed April 8.

Newport News, Va.—Eastern Bcstg. Corp., UHF Ch. 33 (584-590 mc), ERP 21.6 kw visual, 10.8 kw aural, antenna, height above terrain 303 ft. (above ground 315 ft.). Estimated construction cost $152,950, first year operating cost $130,000, revenue $170,000. Applicant is licensee of WHYU Newport News. Filed April 9.

AM APPLICATIONS

Lexington Park, Md.—Fulton Lewis, jr., 1370 kc, 1 kw D. Estimated construction cost $35,844.14, first year operating cost $52,500, revenue $52,500. Mr. Lewis is radio commentator and newspaper columnist; also, he owns and operates farm at Hollywood, Md. Filed April 10.

Warrensburg, Mo.—Clinton Bcstg. Co., 1450 kc, 250 w fulltime. Estimated construction cost $12,000, first year operating cost $36,000, revenue $48,000. President of Clinton Bcstg. is David M. Segal, who also is president of KDAS Malvern, Ark. Filed April 10.

Southbridge, Mass.—James W. Miller and Hope N. Miller, 970 kc, 1 kw D. Estimated construction cost $11,000, first year operating cost $40,000, revenue $50,000. Mr. Miller is owner of J. W. Miller Co. (producers of radio programs and campaigns for radio stations) and president and 50% owner of Old Guilford Forge Inc. (metal goods and household furnishings). Mrs. Miller is wife of Mr. Miller and a homemaker. Filed April 9.

New Martinsville, W. Va.—Magnolia Bcstg. Co., 1330 kc, 1 kw D. Estimated construction cost $22,598, first year operating cost $25,000, revenue $36,000. Principals are President and Treasurer J. P. Beacon (130 shares out of 150 shares), 97% owner of WVVW and WJPB (FM) Fairmont, W. Va.; Vice President Nima Fabre Jr. (10 shares), vice president and general manager of WVVW and WJPB (FM), and Secretary Joseph McQuay (10 shares), assistant manager and program director of WVVW and WJPB (FM). Filed April 8.

Lewiston, Idaho—W. Gordon Allen, 940 kc, 1 kw D. Estimated construction cost $7,800, first year operating cost $36,000, revenue $55,000. Mr. Allen owns 60% of KGAL Lebanon, Ore., 33⅓% of KGAE Salem, Ore., and 50% of KSGA Redmond, Ore. (CP only). Filed April 1.

Deletions . . .

TOTAL deletions of licensed stations to date since Jan. 1: AM 5, FM 3, TV 0. New deletions:

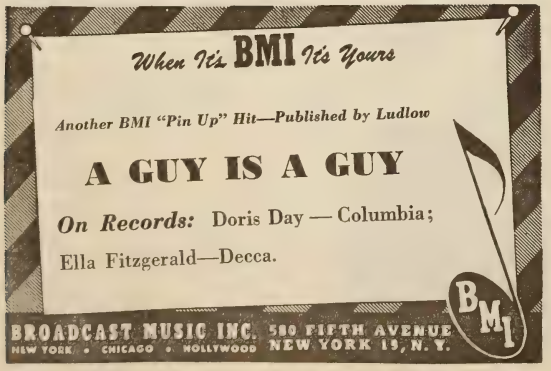
WKST-FM New Castle, Pa., license. Licensee stated that every hour for one week station broadcast announcements asking if audience wanted FM service continued. Total of five letters and cards were received, licensee said, hence it was decided that there was no interest in or need for FM station. Deleted April 8.

WFDR (FM) New York, license. Licensee asserted that operating deficit of $10,500 monthly to Dec. 1951, and $7,000 monthly since then, forced decision to discontinue operations. Deleted April 8.

FCC Actions

(Continued from page 91)

April 9 Decisions . . .



COMMISSION EN BANC

To Remain Silent

KPRS Olathe, Kan.—Granted authority to remain silent for 90 days from March 11 in order that arrangements can be made to resume operation. In event arrangements result in transfer of control, prior Commission approval must be secured before station resumes operation.

Granted Renewal

KQ2XBH, Crosley Bcstg. Corp., Cincinnati, Ohio—Granted renewal of experimental TV broadcast station license for regular period.

WMOR (FM) STATUS

Placed in Receivership

WMOR (FM) Chicago, owned by the Metropolitan Radio Corp., was placed in receivership last week with attorney Arthur Morse by the bankruptcy court after petition of a former employe for unpaid salary. The station, started originally by a group of veterans in 1949, has been the center of a maze of legal and management difficulties since a large portion of the stock was transferred by restaurant-owner Dario Toffenetti about three years ago. Several other claims for back salaries and unfulfilled contracts have been filed and more reportedly are contemplated.

Station has been off the air since January, with minor stockholders charging action was taken without their proper consent by Chicago attorney Abraham Teitelbaum, the largest single stockholder who is understood to have between 40 and 49%.

Several stockholders are planning an informal meeting with Mr. Morse to discuss the matter of assets. Station, located in the 188 W. Randolph St. bldg., is understood to owe a large sum of money in rent.

WWXL AUCTIONED

Cecil Roberts Bids $11,000

CECIL W. ROBERTS, president of KREI Farmington, Mo., bid $11,000 Thursday afternoon for WWXL Peoria, Ill., which went into bankruptcy court last month. The bid includes the building and equipment, as well as the property lease. The sale becomes eligible for FCC approval April 24 if no creditors have objected to the sale price by that time.

WWXL has been operated since 1947 at 1590 kc as a 1 kw daytimer, owned most recently by Central Illinois Radio Corp. It is indebted to between 50 and 75 creditors, one attorney said, with preferred creditors splitting the sale revenue.

PLANE CRASH

Radio-TV Report New York Tragedy

THROUGH the alertness and fast work of radio-TV news and special events staffs, crash-conscious New Yorkers were delivered immediate reports and prompt pictures of the cargo plane which fell and burned in residential Jamaica Saturday, April 5.

All networks included word of the event in their regular news programs, while local New York outlets came up with fullest possible details and, in some instances, put special programs on the air.

WJZ New York, key station of ABC, timed its reports as follows: 8:45 a.m. (shortly after the crash), first bulletin; 9:15 a.m., program interruption for first details; 9:45 a.m., interruption for fuller details; 10 a.m., two-minute wrap-up; 10:28 a.m., added details; 11:01 a.m., telephoned report from the scene by Gordon Fraser; 11:49 a.m. wrap-up of details; 12:20 p.m., live broadcast from scene by Julian Anthony and Gordon Fraser; 12:30 p.m., regular newscast with all details then known. At 6 p.m., WJZ produced a special 15-minute program including recorded interviews and excerpts from earlier on-scene broadcasts.

WOR New York received first word of the event from the secretary to Vice President J. R. Poppele, Peg Morris, who lives near the accident site. Hearing the crash she telephoned a description to the station even before newsroom teleprinters carried the first bulletin. WOR sent three reporters to the scene and broadcast eye-witness accounts an hour and a half after the accident which took five persons' lives. Alert to civic opinion which had urged removal of airports from residential areas, WOR broadcast a special program at 6 p.m. in which a state senator discussed the problem.

WKBS Oyster Bay, L. I., claimed a scoop on other broadcasters for on-the-scene crash coverage. Station reports news was on the air 46 minutes after first flash of the tragedy came through. First live broadcast was aired at 9:16 a.m.

WHLI Hempstead, L. I., was one of the first to report the accident, broadcasting a bulletin within five minutes of the crash. Director of News Jerry Carr and Director of Public Affairs Art Patterson went to the scene, taped interviews and descriptions and broadcast them that noon. Additional accounts were aired throughout the afternoon.

Slowed down by the time required to develop film, TV outlets nevertheless made high-speed deliveries to New York viewers: Lester Mannix, cameraman for WPIX (TV), reached the scene seven minutes after the crash so that his first film was processed and ready to go on the air at 11:15 a.m., although the station did not start its broadcast day until 12:38 p.m. Two special WPIX telecasts were devoted to the aviation accident at 2 and 4:45 p.m.

CBS-TV, covering the disaster only locally through WCBS-TV, had its first stills on at 11:59 a.m., more at 1:15 p.m., and a seven-minute film at 3:11 p.m.

Telenews Productions' Cameraman Skip Lambert, hired to report for work the following Monday, was driving with his wife near the scene when the crash occurred. While his wife gave Telenews a running account from a drugstore phone booth, Mr. Lambert shot his first films for the company which had them processed and shipped to subscribers for showing that evening.

NBC was only company to give TV network coverage, with an on-scene report plus a 15-minute film telecast at 3:30 p.m. Don Goddard, who covered prior plane crashes in Elizabeth, N. J., headed the mobile unit crew. Two commentators from NBC radio were reportedly the first radio reporters on the scene and taped interviews and descriptions for network broadcasts at noon and 6 p.m.

IN REVIEW . . .

Program: Crossfire; simulcast on ABC radio and ABC-TV; Wednesday, 9:30-10 p.m.
Producer and Moderator: Gunnar Back.
Director: Milton Komito.
Panel: Regulars, Elmer Davis, Bert Andrews and Martin Agronsky, and a fourth guest member.

ABC's full-blown excursion into the realm of Washington news panel programs, for which other networks already have displayed an obvious relish, invites speculation that someday the number of such shows may exceed the dwindling political fraternity of the uninterviewed.

To be sure, ABC has embellished the format with a new twist on its *Crossfire*, a simulcast offered to the full ABC radio and TV networks.

There is a faint suspicion in this corner, however, that the producers of this program may permit the vehicle to deviate from its announced purpose and merely serve as a sounding board for ABC commentators who grace the panel.

"The program is aimed at bringing prominent people in the news to the listeners and viewers," according to ABC. These prominent people are to range the gamut of top government officials, legislators, military or public figures.

The first two programs kicked off with Sen. Richard Russell (D-Ga.), a Presidential hopeful, and Sen. James H. Duff (R-Pa.), one of the leaders of the Eisenhower-for-President movement.

The most immediate reaction to *Crossfire* may be summed up in this fashion:

Since the panel members are established observers in their own right, with news shows of their own, the temptation is overriding to ramble on with their own views. Within the limitations of a 30-minute segment, this defeats the avowed purpose. As a result, *Crossfire's* interviewee finds himself too frequently out of line of fire.

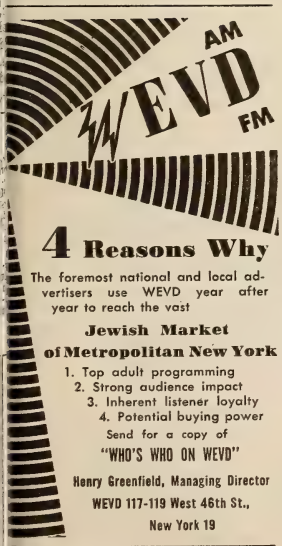
An example of this time-consuming meandering was exhibited by Mr. Agronsky, whose "question" is paraphrased here:

> Senator, there's been a lot of talk after that famous Saturday night—when the President announced he would not be a candidate—there was some speculation on the possibility of a Democratic ticket with Gov. (Adlai) Stevenson as President and you as vice president. . . . I understand that you and the governor are what might be called kin folks down south. . . . Now, how would you feel about that possibility, accepting the vice presidential candidacy with Gov. Stevenson as the Presidential candidate?

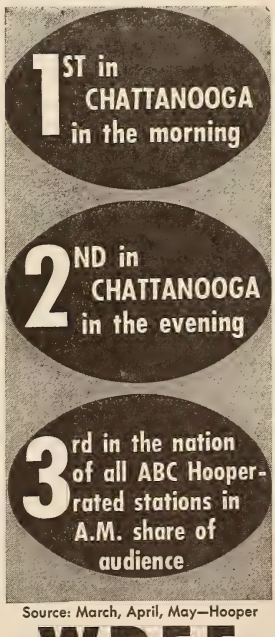
Sen. Russell, more to the point, replied simply: "My friends are talking about the possibility of me as President and Gov. Stevenson as vice president."

In the first two programs Sen. Russell and Governor Duff both found themselves on the sidelines at times. At the close of the program, both took advantage of the "turnabout" twist and, in summing up the questions, revealed the very weakness of *Crossfire*—that of permitting the panel members to edge out important issues.

The question also arises as to whether such a format may be effectively adapted for simulcast, since there is no attempt to identify the participants after the program gets underway.



Yet, despite these criticisms, *Crossfire* is in its way an intelligently different approach to the news conference idea. With a more properly directed aim and the restraint of distinguished commentators, it could prove stimulating and news-worthy fare in this Presidential election year.



ABS IMPROVEMENTS

To Cost Over $100,000

PLANS calling for improvement expenditures of over $100,000 for three Alaska Broadcasting System stations—KFRB Fairbanks, KINY Juneau and KTKN Ketchikan — were revealed last week by William J. Wagner, ABS president.

Plans include acquisition of a building in Seattle, Wash., Mr. Wagner stated, adding that work will begin as soon as approval is received, to be completed by next fall. Additions in equipment, and erection of larger control towers are among improvements scheduled. Subject to FCC approval, KFRB will change from 1290 to 790 kc, with KINY moving from 1460 to 1290 kc, position vacated by KFRB; and KTKN is seeking power increase from 1 kw fulltime to 5 kw day and 1 kw night.

TV, MOVIE EXTRA PLAYERS UNDER NEW GUILD PACT

AFFECTING some 3,500 film extras and retroactive to last Oct. 25, wage increases and improved working conditions granting new basic contract worked out between Screen Extras Guild and Assn. of Motion Picture Producers, subject to Wage Stabilization Board approval.

Covering television as well as motion pictures, new contract increases general extra rate from $15.56 to $18.50 per day, stand-ins from $13.90 to $17, dress extras, dancers, skaters, swimmers, riders and special ability extras, from $22.23 to $25; amputees (new classification) $35; comparable increases in other classifications.

Agreement also increases auto allowance from $5 to $7.50, wardrobe allowance set at $2.50 per change with $5 maximum. Carfare allowance increased from 50 cents to $1.25.

Running to Jan. 2, 1958 both SEG and producers have right to reopen contract at start of 1954 and 1956 if cost of living index rises 5% or more above Oct. 15, 1951 figure, SEG has right to reopen contract for negotiation on wage rates only. Guild agreed to cooperate in averting wild-cat: work stoppage by players and pledged cooperation in meeting producer's problems regarding photographing of military personnel. New contract also provides producers carry at least $20,000 insurance on each employed extra player traveling by air and that joint standing committee be created on safety and sanitation to check equipment, wardrobe, etc.

FM-AM PROMOTION DRIVE IN NEW YORK STATE

FIRST extension of FM promotion campaign beyond original three test areas—North Carolina, District of Columbia and Wisconsin—will be New York State drive starting May 12, according to John H. Smith Jr., NARTB FM director. New York City is not included in plan.

Because some areas in state do not have full FM programming, emphasis will include AM and FM both according to service available.

Committee structure includes H. S. Brown, Rural Radio Network, broadcast chairman; Glenn Sprague, WHAM Rochester, vice chairman; Frank Kelly. WBEN Buffalo, western chairman; Russell Wilde, WFLY (FM) Troy, eastern chairman. Distributor structure includes Ted Pierson, Onondago Supply Co., Syracuse, chairman; Harold Kelley, General Electric Supply Co., Buffalo, western vice chairman; C. J. Ward, Crosley Distributing Co., Albany, eastern vice chairman.

THEATRE TV DELAY

THEATRE TV hearings were postponed indefinitely last week by FCC, "because of the pressure of other business." Hearings had been scheduled to commence May 5, following several postponements. Last week's notice said that FCC will announce new date "as soon as possible."

TWO NAMED Y&R VPs

ALEXANDER KROLL, account executive for Kent cigarets and Statler Hotels, and Frank L. Henderson, merchandising executive, Young & Rubicam, N. Y., have been appointed vice presidents of agency.

WATCH IT GROW

DAILY progress of garden planted outside of Milwaukee's Radio City to be telecast by WTMJ-TV, from planting in April to frost in autumn. Gordon Thomas will direct daily excursions of viewers. Milwaukee County agents as well as guests from U. S. Dept. of Agriculture and U. of Wisconsin will take part in project and appear on weekly roundup programs. Daily telecasts planned, rain or shine.

IT&T NET INCOME REACHES RECORD LEVEL

CONSOLIDATED net income for International Telephone & Telegraph Corp., New York, during 1951 was highest in organization's 31-year history, $17,992,314, according to annual report issued Friday by President William H. Harrison.

Net, which exceeded previous year's by almost $2½ million, was based on gross income of $297,952,113 as compared with $253,136,029 for 1950. Net earnings equaled $2.60 per share on 6,918,895 shares of outstanding stock. Net income of combined telephone and radio operating facilities was $2,988,451 from gross of $33,357,442, generally higher than in 1950 when net was $1,901,089 on gross of $29,754,906.

Commercial radio equipment orders during 1951 were mainly for microwave radio links, medium-haul carrier equipment and voice-frequency telegraph equipment, it was reported, with about 1,000 miles of microwave equipment —20% of that ordered—installed. TV picture tube sales increased. Inventories of Capehart TV sets were lowered to point where "new and improved line will soon be in production."

FLORIDA CITRUS RENEWAL

PARTICIPATION by Florida Citrus Commission in NBC-TV *Today* four more weeks beginning April 14, at cost of $42,000, announced Friday. Commercials will stress grapefruit and oranges in 3-2 ratio. John F. Forshew, Lakeland, Fla., manager of J. Walter Thompson Co., said program is "a very outstanding buy at the present time." It is viewed in 30 cities. Funds for renewal come from additional state advertising tax income as result of increased citrus crop estimates.

ABC GETS NEW LOAN

ABC has borrowed additional $500,000 under bank credit arrangement providing for loans up to total of $3.8 million, Stock Exchange records showed Friday. Loan, made as of March 10 and put into working capital, brings to $2 million amount borrowed under that credit (with Bankers Trust Co., N. Y.) and raises outstanding long-term debt to approximately debt to approximately $11 million, including $784,820 in installments due this year.

TONI RENEWS SERIAL

TONI Co., division of Gillette Safety Razor Co., Chicago, renews *This Is Nora Drake* on CBS Radio (Mon.-Wed.-Fri., 2:30-2:45 p.m.) for 52 weeks, effective May 5. Agency: Foote, Cone & Belding, Chicago.

PEOPLE...

ROBERT S. WOOD, recently news division manager of WOR New York and before that with CBS in New York and Washington, named deputy director of Radio-TV Film Division, Office of Price Stabilization.

LEN MATTHEWS, chief timebuyer at Leo Burnett Agency, transfers to account staff. His replacement, effective April 28, will be Ken Fleming, salesman at George P. Hollingbery station representative firm in same city.

BOB CABITT, promotion and publicity chief, WORL Boston, to Hoag & Provandie, same city, as copywriter. Hank Wilayto, Boston Red Cross disaster service assistant director, to succeed him at WORL.

JOHN C. APPLETON, Grey Adv., N. Y., to Ellington & Co., that city, as account executive.

RICHARD C. HUNT, formerly Ruthrauff & Ryan, Chicago, as account executive, to Buchanan-Thomas Adv. Co., Omaha, as account consultant on grocery and drug packaged products.

GENERAL MILLS ATTEMPTING EXTENSION OF RATE-CUTTING

GENERAL MILLS and Knox Reeves Advertising, agency handling its Wheaties advertising, attempting to extend to summer of 1953 wholesale cut-rate announcement purchase plan introduced this year [B•T,March 10, Feb. 25]. Agency letter to stations asks their acceptance of agreement granting agency, for General Mills, "first refusal for a similar one-minute spot announcement summer campaign for 1953; such first refusal to run to March 1, 1953."

Plan for 1952, reportedly rejected by most major stations, offered one-half of one-time daytime rates for each of five or 10 spots daily. 80% to be broadcast in Class A time. As for next year, agency letter says: "Naturally, the terms and conditions of any future campaign would again have to be worked out."

JAHNCKE NAMED TO DIRECT ABC'S RADIO AND TV

ERNEST LEE JAHNCKE Jr., ABC vice president for radio network, promoted to vice president and assistant to President Robert E. Kintner with responsibility for both radio and television, effective immediately, it was learned Friday. Charles T. Ayres, vice president for radio sales, advances to Mr. Jahncke's former post as vice president for radio network. Alexander Stronach continues as vice president for TV. Successor to Mr. Ayres as radio sales head not disclosed.

WICK CRIDER JOINS K&E

WICK CRIDER, vice president in charge of new program development, BBDO, N. Y., appointed vice president in charge of radio and television department of Kenyon & Eckhardt, N. Y., last Friday by William Lewis, president of agency [B•T, April 7). Mr. Crider prior to his BBDO association was with J. Walter Thompson Co.

CBS-TV CLINIC SCHEDULED

SPECIAL clinic on station operation, in view of FCC's TV thaw, set for Waldorf-Astoria Hotel, New York, May 1-2, J. L. Van Volkenburg, president, CBS Television Network, announced today. Third in series, clinic expected to draw about 500 top executives of 62 TV and 207 CBS Radio affiliates.

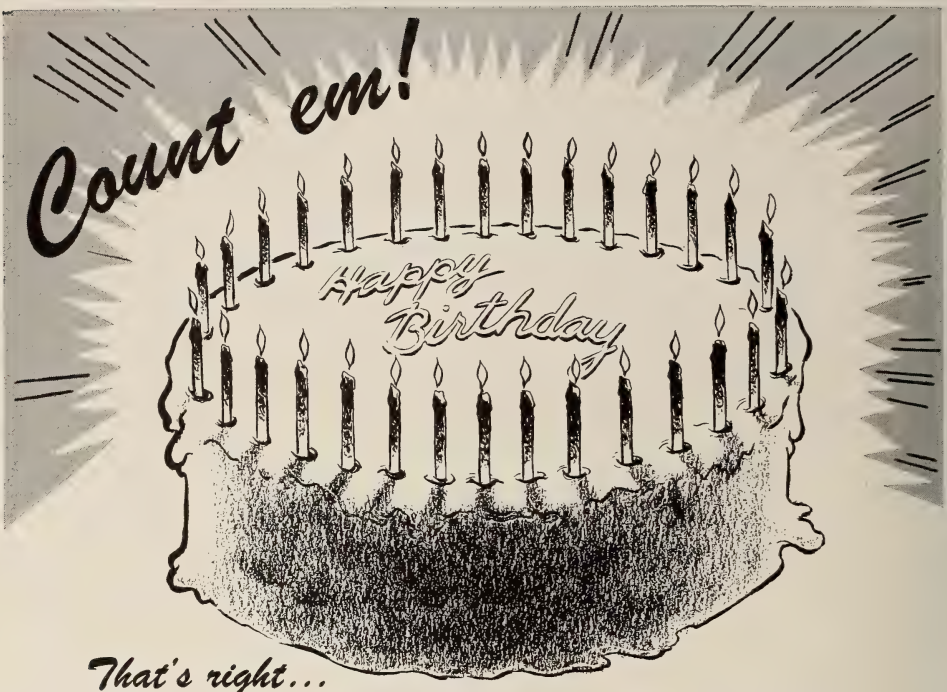
FORERUNNER...

Forerunner of today's big, efficient outdoor advertising industry was this scene. Early in the century advertising posters of various sizes were displayed on buildings, boards and fences—wherever a suitable surface greeted the bill poster.

About the same time that billboards were becoming standardized, other media—newspapers, magazines, car cards—were also burgeoning with advertising as manufacturers sought more and better ways to reach the public.

Then came radio . . . and advertisers quickly took advantage of this new medium that enabled them to reach millions of people simultaneously with sound selling.

Now television has added sight to sound . . . and again advertisers were quick to capitalize on the added impact this newest medium affords them.



In WLW-Land, these two media—WLW Radio and WLW-Television—used in combination, offer advertisers the most efficient and economical way to reach more people more often and more effectively.

30th year

THE NATION'S STATION AND ITS TV SERVICE

That's right...

30 candles...one for every year of radio history

Back on April 13, 1922, a few hundred persons in Chicago heard a new voice in their earphones. It was a new radio station, destined to become the leader in Midwest radio . . . destined to pioneer in programming and sales techniques which have become standards of the industry.

Those first few hundred persons in a single area of Chicago have grown to a family of millions in five states—the hub of the thriving Middle West. These millions long ago learned to rely on WMAQ for the newest and the best in home entertainment.

Advertisers, too, long ago learned that products and services find a host of willing buyers when advertised by Station WMAQ and its crew of favorite personalities.

These 30 years of know-how and listener acceptance are ready to work for YOU and your product or service. Ask your WMAQ or NBC Spot salesman for the complete story.

Television for the New Orleans Market

(A statement of policy and an expression of thanks)

WWL thanks BROADCASTING & TELECASTING for their kind comment on our plans in their editorial of January 21, 1952.

New Orleans, a city of 600,000, is like other large communities. There is an urgent need for additional television service—to give the audience a choice of programs and the advertisers a choice of stations.

WWL believes that additional stations should be established as soon as possible with a minimum of bickering and few, if any, hearings.

WWL filed a television application with the FCC on March 3, 1948, and on February 17, 1950, tendered an amendment to specify Channel 4.

WWL will adhere to its request for Channel 4. WWL will file no last-minute amendments and will not try to outguess any other applicant.

WWL believes that in this manner the expansion of television service to the people can be hastened.

SIXTH REPORT AND ORDER

By the Commission (Commissioner Bartley not participating; Commissioner Webster concurring; Commissioner Hennock concurring in part and dissenting in part; and Commissioner Jones dissenting.)

Adopted: April 11, 1952.

Released: April 14, 1952.

THE PROCEEDINGS

1. These proceedings were instituted on May 6, 1948, by a "Notice of Proposed Rule Making" (FCC 48-1569) designed to amend the table of television channel assignments for the United States, set out in Section 3.606 of the Rules and Regulations of this Commission. During the hearing held by the Commission pursuant to this Notice, evidence was introduced which indicated the necessity for a revision of the Commission's Rules, Regulations and Standards with respect to the technical phases of the television broadcast service.

2. On September 30, 1948, the Commission issued a Report and Order (FCC 48-2182), commonly referred to as the "freeze order". In general, this Order provided that no new or pending applications for the construction of new television broadcast stations would be acted upon by the Commission; and that new and pending applications for modification of existing authorizations would be considered on a case-to-case basis with action thereon depending on the extent to which the requested modification affected the issues in the television proceeding. In adopting the "freeze order", the Commission pointed out that a national television assignment plan and the Commission's Rules, Regulations and Standards must be based upon, and must reflect, the best available engineering information. It was noted that the Commission could not continue to make assignments under the existing Table since the evidence presented at the hearing raised serious questions concerning the validity of the bases upon which the Table was constructed. The Commission stated that the granting of additional television authorizations would make more difficult any revisions in the Table made necessary by subsequent changes in the Rules and Standards.

3. The current phase of the television proceeding was initiated on July 11, 1949, by the issuance of the Commission's "Notice of Further Proposed Rule Making" (FCC 49-948). Attached to this Notice were four appendices: Appendix A set forth the Commission's proposals to amend its television Rules, Regulations and Engineering Standards: Appendix B set forth the methods and assumptions upon which the Commission's figures and values specified in Appendix A were based; Appendix C contained the Commission's proposed revision of its Table of television channel assignments throughout the United States and the Territories; and Appendix D contained illustrative assignments for Canada, Mexico and Cuba indicating the manner in which it might be necessary to take into account the use of channels by these countries.

4. In September 1949, the Commission began its hearings on the color television issues in this proceeding and its First and Second Color Reports were issued on September 1, 1950 and October 11, 1950, respectively (FCC 50-1064 and FCC 50-1224).

5. Subsequently, on October 16, 1950, the Commission began hearing the testimony of interested parties who had filed comments concerning the general issues set forth in Appendices A and B of the Notice of July 11, 1949. These extensive hearings continued until January 31, 1951, when the Commission recessed in order to study the record and determine whether it should proceed with the hearings on Appendices C and D in the light of the evidence adduced on the general issues.

6. On March 22, 1951, the Commission issued its "Third Notice of Further Proposed Rule Making" (FCC 51-244).[1] In Appendices A and B of the Third Notice, the Commission set forth its conclusions based on the hearing record developed with respect to the general issues. The Commission at the same time afforded interested parties the opportunity to object to the conclusions in Appendices A and B by filing statements of objections.

7. Appendices C and D of the Third Notice contained a new proposed Table of television channel assignments for the United States and the Territories and new illustrative assignments for Canada and Mexico. Pursuant to paragraph 12 of this Notice, parties were permitted to file comments and oppositions to such comments as might be filed by other persons with respect to the proposals in Appendices C and D.

8. On June 21, 1951, the Commission issued its "Third Report" (FCC 51-640) in the above entitled proceedings. In this Report, the Commission decided that it could not, at that time, take action to effect a partial lifting of the "freeze." On July 12, 1951, the Commission issued its "Fourth Report and Order" (FCC 51-693) which allocated to television broadcasting the frequency band 470-500 Mcs. On July 25, 1951, the Commission adopted its "Fifth Report and Order" (FCC 51-752) amending its "freeze order" to permit consideration on a case-to-case basis of applications by existing licensees and permittees for special temporary authority to increase power within certain defined limits.

9. On July 25, 1951, the Commission issued an Order (FCC 51-739) cancelling the oral hearings which were scheduled to take place pursuant to the Third Notice.[2] This Order provided all parties with an opportunity to file sworn statements or exhibits fully setting out their position in support of the pleadings they had filed. In addition, parties were permitted to submit sworn statements or exhibits directed against statements or exhibits offered by other parties and to file briefs with respect to any matter of fact or law raised by the evidence. The Commission also provided for oral presentations in addition to the submission of sworn statements or exhibits with respect to any issue which in the Commission's judgment could not be satisfactorily considered and disposed of without oral presentation.

10. The Order of July 25, 1951, also provided:

> "In view of the fact that the issues raised by Appendices A and B of the Third Notice of Further Proposed Rule Making (FCC 51-244) are interrelated with those raised by the issues to be determined in the remaining portion of these proceedings, and in order to permit parties to make a full presentation of their cases, the Commission has decided not to finalize Appendices A and B at this time. However, sworn statements or exhibits filed pursuant to paragraph 5 above must be consistent with Appendices A and B, with the following express exception: If a comment or opposition with respect to Appendices C and D of the Third Notice deviates from Appendices A and B, a sworn statement or exhibit inconsistent with Appendices A and B may be filed pursuant to paragraph 5 above if such statement or exhibit is inconsistent with Appendices A and B only to the extent that the comment or opposition is inconsistent with Appendices A and B."

11. Upon consideration of the entire record in this proceeding, the Commission is now in a position to issue a final Report with respect to the matters covered by Appendices A, B, C, and D of the Third Notice.

GENERAL CONSIDERATIONS SUPPORTING THE ADOPTION OF A TABLE OF ASSIGNMENTS FOR THE TELEVISION SERVICE

12. Toward the close of the War in 1945, when it appeared that the emergence of television as a regular broadcasting service was imminent, the Commission conducted a rule making proceeding (Docket 6780) resulting in the adoption of the existing television Rules and Standards, including the present Table of Assignments.[3] This earlier Table which employs VHF frequencies only, has served as a framework for the growth thus far of the television service. It has been urged in this proceeding that as a matter of policy[4] we should abandon the concept of a nationwide table of channel assignments and permit applicants from any community to apply for the use of any channels provided certain general engineering criteria were met. Upon careful consideration of the record in this proceeding we are convinced that the public interest requires our continued adherence to the concept of a table of channel assignments as the most effective method for assuring a fair distribution of television service throughout this country.

---

[1] Hereinafter referred to as the "Third Notice."

[2] The procedural steps leading to the cancellation of the oral hearings are described in the Order of July 25, 1951 (FCC 51-739).

[3] In FM also the Commission decided that the optimum distribution of stations could best be accomplished by a Table of Assignments.

[4] The Commission has already determined in its Memorandum Opinion of July 13, 1951 (FCC 51-709) that it has legal authority to prescribe such a Table of Assignments as part of its Rules.

13. The Communications Act of 1934, among other things, establishes as a responsibility of the Commission the "making available to all people of the United States, an efficient, nationwide, radio service," (Section 1), and the effectuation of the distribution of radio facilities in such a manner that the result is fair, efficient and equitable and otherwise in the public interest from the standpoint of the listening and viewing public of the United States (Sections 303 and 307b). Our conclusion that these standards can best be achieved by the adoption of a Table of Assignments is based upon three compelling considerations: A Table of Assignments makes for the most efficient technical use of the relatively limited number of channels available for the television service. It protects the interests of the public residing in smaller cities and rural areas more adequately than any other system for distribution of service and affords the most effective mechanism for providing for non-commercial educational television. It permits the elimination of certain procedural disadvantages in connection with the processing of applications which would otherwise unduly delay the overall availability of television to the people. Each of these factors is discussed below.

14. One of the principal reasons for an engineered Table of Assignments incorporated into our Rules is that it permits a substantially more efficient use of the available spectrum. It is clear that, mathematically, once a fixed station separation has been agreed upon, the maximum number of stations which can be accommodated on any given channel becomes fixed. In practice this theoretical maximum cannot be achieved since the location of cities capable of supporting such stations will not follow any such regular pattern of location. But an Assignment Table drawn upon an examination of the country as a whole can confidently be expected to more closely approximate the mathematical optimum, than would assignments of stations based upon the fortuitous determinations of individual applicants interested solely in the coverage possibilities in a particular community irrespective of the effect of such assignments on the possibility of making assignments in other communities. We are convinced that only through an engineered Table of Assignments can areas receiving no service or inadequate service be kept to a minimum.

15. In our opinion there is an equally significant reason why a Table of Assignments should be established in our Rules. For while the record in this proceeding demonstrates that the desire for broadcasting service from local stations, reflecting local needs and interests is widespread, experience has shown that many of the communities which cannot now support television stations but would eventually be able to do so, will in the absence of a fixed reservation of channels for their use, find that available frequencies have been preempted. The same is true with respect to the establishment of any significant number of non-commercial educational stations. It might, of course, be possible to achieve these results by allocating a large block of frequencies for these smaller cities and non-commercial educational television without specifying the assignment location of particular channels. But we are convinced that this could only be done at the expense of unnecessarily reducing the total number of channels available to meet other television needs.

16. A further consideration compels us to adopt the Table. When we resume the processing of applications for television stations, we expect to have on file an exceedingly large number of applications. We find that in the absence of a fixed Assignment Table it would be unduly complex—and perhaps impossible—to decide all conflicting demands among communities in individual licensing proceedings. Once it is recognized that these conflicting demands are interrelated, it becomes apparent that they can most satisfactorily be decided in one hearing. Moreover, a question is raised in view of the decision of the Supreme Court in *Ashbacker Radio Corp.* v. *Federal Communications Commission,* 326 U. S. 327, whether it would not be necessary as a matter of law to decide all these cases in one or several very large proceedings. Accordingly, we find that the determination of the questions relating to the equitable distribution of facilities among the cities and states in one rule making proceeding such as we have here conducted was conducive to the best dispatch of our business, satisfied the ends of justice and was required in the public interest.

17. It is contended that the establishment of a Table of Assignments such as has been adopted herein does not provide sufficient flexibility in the assignment of channels as to enable us to recognize economic, geographic, population and other pertinent differences between communities and areas. This is in effect an argument that a Table of Assignments cannot possibly achieve results which are as much in the public interest, convenience and necessity, or as "fair, efficient and equitable" as the "application" or "demand" method of assigning channels. But it has not been in any wise demonstrated by anyone making this contention that the end result of the claimed "flexibility" for the "application" or "demand" method of assigning television channels throughout the country will be a more fair, or more equitable, or a more efficient assignment of television facilities throughout the country. Indeed, it is almost self evident that assignments made upon the "application" or "demand" method necessarily leads to results which do not adequately reflect *on a nationwide basis* significant comparative needs as well as differences among communities throughout the country. We find no merit in the contention that by the adoption of a Table we have generally or specifically disregarded any pertinent public interest factors. We have given parties a full opportunity to present comments and evidence with respect both to the basic principles and standards underlying the Table and with respect to proposed assignments for specific communities. Particularly, where parties did not think our proposed assignments were fair or equitable, or where they felt that we have improperly assigned channels to individual communities, they have been afforded an opportunity to establish their contentions in this hearing. All these objections and the relevant comments and evidence have been most carefully considered in connection with our decision herein.

18. In view of the foregoing, we find that the public interest requires the establishment of a Table of Assignments such as we have adopted herein.

THE CHANNELS
Use of the VHF

19. Since the deletion of Channel 1 in 1948 the Commission has allocated 12 channels, Channels 2-13 in the 54-216 Mc. band, for use by the television broadcast service. The Commission's Third Notice proposed to continue this allocation.

20. Two parties filed comments pursuant to Paragraph 11 of the Third Notice objecting to the fact that the Commission has not provided additional VHF channels. Allen B. DuMont Laboratories, Inc.,[5] objects that no finding was made on the feasibility of allocating 1 or more additional VHF channels. A. Earl Cullum, Jr., objects that an additional television channel was not allocated in the frequency range from 72 to 78 Mcs.

21. In order to allocate additional VHF channels to the television service, it would be necessary to delete frequencies from one or more of the other radio services which have been allocated frequencies in this portion of the radio spectrum. While there is testimony in the record as to the possibility and alleged desirability of such a reallocation of frequencies, this proceeding has included no issue or proposal by the Commission or the parties for the reallocation of specific frequencies nor any evidence evaluating the comparative needs of the various radio services for the pertinent VHF frequencies. Accordingly, this proceeding affords no basis for a decision withdrawing frequencies from other services (both government and non-government) for the purpose of creating additional VHF television channels.

Utilization of the Entire UHF Television Allocation

22. In the Third Notice, the Commission stated with respect to the utilization of the UHF bands:[6]

> B. *Utilization of entire UHF band.* In its Notice of Further Proposed Rule Making issued on July 11, 1949, the Commission proposed to assign forty-two 6-megacycle channels (14 through 55) in the lower portion of the UHF band for commercial television broadcasting. The Commission proposed to assign 32 of the above UHF channels for use by metropolitan stations and the remaining 10 channels for use by community stations. During the hearings conducted by the Commission with respect to the general issues in the pending television proceedings, testimony was presented which favored the allocation of the entire UHF band for commercial television broadcasting.

Although some testimony was presented which favored the allocation of a portion of the UHF band at this time pending the acquisition of additional data greater support was given to the proposal to assign television channels in the entire UHF band for immediate use. It was urged that a need existed for additional commercial television channels; that such an allocation would encourage developments in UHF equipment; and that due to problems not previously considered, i.e., oscillator radiation, intermodulation, image interference, etc., more channels were necessary to provide an adequate number of usable channels. Some testimony was presented to the effect that the allocation of the lower portion of the UHF band was preferable because better coverage and equipment performance could be expected there. On the other hand, there was testimony to the effect that differences would not be appreciable throughout the entire UHF band. In any event, the effect of such differences on the optimum utilization of the band are likely to be small. Accordingly, the Commission has concluded that allocation of the entire UHF band for television broadcasting on a regular basis would result in the maximum utilization of television channels in the United States and would be in the public interest.

23. Comments in support of the above proposal have been filed by the American Broadcasting Company and RCA-NBC. The great demand for television service by commercial and non-commercial educational interests evidenced by the portion of the proceeding dealing with Appendices C and D of the Third Notice clearly supports the use at this time of the entire UHF television allocation for regular television operations. No objection to the proposal was filed. Accordingly, the Commission is herewith finalizing the allocation of the entire UHF television band for use at this time by television on a regular basis.

24. The Commission's Third Notice left undecided the manner in which the band 470 to 500 Mc. would be allocated. At that time the Commission had not yet determined whether that band should be allocated to multi-channel broadband common carrier mobile radio service or to television broadcasting. In the Fourth Report and Order in these proceedings (FCC 51-693) the Commission allocated the 470-500 Mc. band for television broadcasting. The grounds for its decision are

[5] In 1948 during the first part of these proceedings DuMont suggested a means of obtaining additional VHF channels by the use of government frequencies. Since DuMont did not refer to this proposal in the comment filed pursuant to the Third Notice, no further consideration is being given to that proposal. See also Paragraph 4 of the Notice of Further Proposed Rule Making issued July 11, 1949, in this proceeding (FCC 49-948).

[6] The UHF band is defined to include the frequency range 300 Mc.-3000 Mc. Television is allocated that portion of the UHF band between 470 and 890 Mcs.

forth fully in the Fourth Report and Order. Accordingly, the Commission is now in a position to make available for the television broadcast service 70 UHF channels (Channels 14 through 83), located between 470-890 Mc.

25. Statements were filed by Mercer Broadcasting Company, Trenton, New Jersey; Lehigh Valley Television, Inc., Allentown, Pennsylvania; Radio Wisconsin, Inc., Madison, Wisconsin; and Presque Isle Broadcasting Co., Erie, Pennsylvania, contending, among other things, that all commercial television stations should be assigned to the UHF band. The statements allege that many of the economic and competitive problems which would arise because television broadcasting will be expanded into the UHF portion of the spectrum would be obviated if no commercial television broadcasting were permitted in the VHF. These objections, however, do not point out any specific testimony or evidence to support the large scale reallocations and reassignments which would thereby be required nor do they make any concrete proposal. We are not, moreover, convinced that an adequate showing has been made that sufficient spectrum space would be provided for an adequate nationwide television service if only the UHF portion of the spectrum is allocated for commercial television broadcasting. Accordingly, we have decided that commercial television operations should be provided for in both bands of the spectrum allocated for television broadcasting.

The Use of Channels 66-83 (782-890 Mc.)

26. In making up the Table of Assignments proposed in the Third Notice the Commission made specific assignments to particular cities and communities only on Channels 2 through 65. Channels 66 to 78 or 83 [7] were designated as flexibility channels and no specific assignments to individual cities or communities were made on these channels. It was provided in the Third Notice that persons desiring to file an application for a station in a community which (1) is not listed in the Table of Assignments and (2) is not eligible for an assignment, without the necessity of rule making proceedings, might file an application for a station on one of the flexibility channels without further rule making. It was provided, however, that stations on flexibility channels could not be applied for, in this manner, in any community assigned a channel in the Table or which was otherwise eligible for such an assignment without further rule making under the 15 mile rule.[8]

27. In addition to the use of flexibility channels as set forth above, the Third Notice provided for the use of flexibility channels for experimentation in stratovision and polycasting. As has been pointed out in another portion of this Report no comments have been filed pursuant to Paragraph 11 of the Third Notice with further reference to the stratovision or polycasting. Several of the parties [9], however, have made proposals for the use of Channels 66-83 in a manner other than that provided for in the Third Notice. Objection has been made to the proposal of the Commission to set aside some of the UHF for use as flexibility channels and parties have requested that the Commission at this time assign all of the channels in the UHF to specific communities. Two arguments are made. First, that certain specific communities have present need of an assignment that only can be established if use is made of Channels 66-83 for specific assignments. The other contention is that if all of the 782-890 Mc. band is not fully assigned at this time an inefficient use will be made of the channels available in this band.

28. At the outset it should be pointed out that the provision for flexibility channels (Channels 66-83) in the Third Notice was itself a reservation, although not a specific reservation for particular cities or communities, made to assure that channels will be available for cities and communities not otherwise provided for on Channels 2-65 of the Table of Assignments, particularly the smaller cities and communities of the country. Clearly, the Commission should leave some of the spectrum allocated to television unassigned. For while the Commission may, upon the basis of the evidence, viewed in the light of its experience with broadcasting, make reasonable provision for television facilities in the various communities of the country, it cannot predict with complete accuracy every community in which there may eventually develop demand for television. Accordingly, it is desirable to leave a portion of the spectrum allocated to television unassigned.

29. We therefore adhere to our proposal in the Third Notice that the whole of the spectrum allocated to television should not be assigned at this time to specific cities or communities. As a matter of fact, it is clear from inspection of the Table adopted herein that possible assignments have not been made on Channels 2-65 as well as on Channels 66-83. We recognize, however, that need may exist at this time for the assignment of additional channels to individual cities and communities even though they have already been assigned channels in the Table. Therefore, where a request has been made for the assignment of a channel to an individual community, we have on a case-to-case basis considered whether such an assignment should be made in the Table of Assignments. We wish to point out, however, that the Commission must act carefully in considering assignments to communities that already have assignments, particularly on Channels 66-83. The number of assignments that can physically be made on Channels 66-83, particularly in areas where cities are located close together, is indeed limited. Accordingly, it must be clearly and affirmatively demonstrated that a channel from the group 66-83 should be assigned at this time to a community which has assignments in the Table before we will make an additional assignment to the community. The portion of this spectrum left unassigned is intended to be used primarily in cities and communities without any assignments in the Table and in situations where either non-commercial educational or commercial assignments are not included in communities listed in the Table.

30. In view of the comments that have been filed and upon consideration of the whole record, we believe, however, we should not permit channels 66-83 to be used solely on the basis of the filing of an application but should rather require applicants to secure an assignment in the Table by rule making before the application for a station will be considered. By doing so we are in a position to minimize any inefficiency involved in the proposal made in the Third Notice.[10] Accordingly, in the Rules we have adopted herein, no application for a television station will be considered by the Commission if the channel requested is not listed as an assignment to the community involved in the Table of Assignments.

31. The Joint Committee on Educational Television suggested in a comment that the proposal with respect to flexibility channels be modified so as to permit an educational institution to make application for a non-commercial educational television station on Channels 66-83 in any community in which no channel has been reserved for such a station. The same proposal has been made for similar reasons by the Board of Regents of the University of the State of New York, the Public Schools, Springfield, Massachsetts, Gary Public Schools, Gary, Indiana, Utah State Agricultural College, Logan, Utah, the State of New Jersey, and the Connecticut State Board of Education. The effect of this proposal would be to permit Channels 66-83 to be used on an application basis for non-commercial educational purposes not only in cities which are not assigned a television channel under the Table, but also in cities with commercial assignments but which do not have an educational reservation. No one has objected to these proposals.

32. We recognize that cities which do not have educational reservations or a non-commercial educational station in operation should have an opportunity to use any portion of the spectrum unassigned for such purpose. Accordingly, where an appropriate showing is made in a rule making proceeding, as indicated above, assignments in the Table will be made for non-commercial educational stations where the community involved does not have an educational reservation and no non-commercial educational station is in operation.[11]

THE EDUCATIONAL RESERVATION

33. Section VI of Appendix A of the Third Notice contained a statement that as a matter of policy certain assignments in the VHF and UHF would be reserved for the exclusive use of non-commercial television stations. Careful consideration has been given to the exceptions taken to this policy proposal in comments filed by several parties [12] pursuant to Paragraph 11 of the Third Notice. For the reasons set forth below, the Commission has concluded that the record does support its proposal [13] and it is hereby adopted in the public interest as the decision of the Commission.

34. The only comments directed against the proposal which fulfill the requirements of Paragraph 11 of the Third Notice are those filed by NARTB-TV and Allen B. DuMont Laboratories, Inc. The others do not specify their objections nor do they cite the evidence on which their objections are based. It is difficult to ascertain in some cases whether the objection is in fact based upon the view that there is a failure of the record to support the proposal or upon some other general disagreement with the proposal. Since, however, the comments filed with NARTB-TV and DuMont clearly cover all the objections to the proposal made by any

---

[7] The use of the 470-500 Mc. band was still under consideration at the time of the issuance of the Third Notice.

[8] The Third Notice, as amended by FCC 51-410, provided:

"A channel assigned to a community in the Commission's Table of Television Assignments shall be available, without the necessity of rule making proceedings, to any other community which is located within 15 miles of the assigned community and which has no assignment of its own provided the minimum separations set forth in Paragraphs E and G herein are maintained."

[9] Communications Measurements Laboratories, Inc., New York; Radio Kentucky, Inc., Louisville, Kentucky; Radio Virginia, Inc., Richmond, Virginia, and Kingston Broadcasting Corporation, Kingston, New York, all have filed objections which request that the Commission assign all of the UHF band allocated to television and leave no channels for use as flexibility channels. DuMont proposed that channels in the 782-890 Mc. band be made available for use by any applicant.

[10] The manner in which Channels 66-83 may be assigned is already determined and limited to a substantial degree by the assignments in the Table together with the minimum assignment spacing requirements adopted herein. Whatever the inefficiency that may remain, we believe that the flexibility retained by leaving some of the television spectrum unassigned is necessary and desirable in order that adequate provision can be made for smaller cities without assignments in the Table and to provide for some future adjustment of the Table.

[11] In recognition of the fact that the unassigned portions of the spectrum are being reserved primarily for cities and communities without assignments or without any non-commercial educational or commercial assignments, we have below provided an exception to the general one year ban on amendment of the Table of Assignments, so that petitions to amend the Table will be considered and acted on in this one year period upon petition (1) for assignment of a channel where no assignment has been made in the Table to a community, and the community is not eligible for an assignment under the 15 mile rule (2) for assignment of a non-commercial educational channel where no such assignment under the Table of Assignments is available in the community involved or (3) for assignment of a commercial channel to any community listed in the Table to which no commercial assignment has been made.

[12] These parties are: NARTB-TV, Allen B. DuMont Laboratories, Inc., Radio Kentucky, Inc., Capitol Broadcasting Co., and The Tribune Co. Some comments were filed which challenged the power of the Commission under the Communications Act to reserve channels for this purpose. Such contentions have been disposed of by the Commission's Memorandum Opinion of July 13, 1951 (FCC 51-709). Other comments objected to the reservation of a channel in a given community. These objections have been considered in another portion of this Report. The Joint Committee on Educational Television filed comments in support of the educational reservation, as did many individual educational institutions, and other civic non-profit organizations.

[13] Communications Measurements Laboratories, Inc. has taken issue with the use of the word "nationwide" in describing the reservation of channels for this purpose. The proposal is self-explanatory in this respect. Although channels have been reserved throughout the nation, the reservation does not set apart any single channel or group of channels on a nationwide basis.

of the other parties, a discussion of their exceptions will cover those of the other parties, and it will not be necessary to determine whether the latter comments must be rejected for failure to comply with the provisions of Paragraph 11 of the Third Notice.

35. In view of the rather comprehensive and detailed exceptions taken to Section VI of Appendix A it is necessary to review the nature and extent of the Commission's proposal in the Third Notice. An extensive hearing was held by the Commission on the issue: whether television channels should be reserved for the exclusive use of non-commercial educational stations. A total of 76 witnesses testified on this issue.[14] Among the subjects upon which the proponents of reservation presented evidence were: the potential of educational television both for in-school and adult education, and as an alternative to commercial programming; the history of education's use of other broadcast media and of visual aids to education; the possibility of immediate or future utilization of television channels by public and private educational organizations and the methods whereby such utilization could be effectuated; the type of program material which could be presented over non-commercial television stations; the history of and prospects for educational organizations' securing broadcast opportunities from commercial broadcasters; and the number of channels, both UHF and VHF, which would be required to satisfy the needs of education throughout the country. The witnesses who opposed the principle of reservation, contending that it was unlikely that educators would make sufficient use of the reserved channels to warrant withholding them from commercial applicants, and that the best results could be achieved by cooperation between educational groups and commercial broadcasters, testified principally about the past record of educators in broadcasting, the cost of a television station, and cooperation between commercial broadcasters and educational institutions.

36. On the basis of the record thus compiled, the Commission concluded, as set forth in the Third Notice, that there is a need for non-commercial educational television stations; that because educational institutions require more time to prepare for television than commercial interests, a reservation of channels is necessary to insure that such stations come into existence; that such reservations should not be for an excessively long period and should be surveyed from time to time; and that channels in both the VHF and UHF bands should be reserved in accordance with the method there set forth.

37. It has been contended that the record in this proceeding fails to support the Commission's proposal in three basic respects; that it has not been shown that educational organizations will, in fact, require a longer period of time to prepare to apply for television stations than commercial broadcasters; that it should have been found that the reservation of channels for this purpose will result in a waste of valuable frequency space because of non-usage and because of the limited audience appeal that educational stations will have; and that no feasible plan for stable utilization of channels by educational institutions has been advanced, particularly with respect to the problem of licensee responsibility.

38. None of the commenting parties have contended that the record has failed to support the findings of the Commission in the Third Notice that, based on the important contributions such stations can make in the education of the in-school and adult public, there is a need for non-commercial educational stations. The objections to the Commission's proposal must, therefore, refer to the desire and the ability, as evidenced in the record, of the educational community to construct and operate such stations.[15] We conclude that the record shows the desire and ability of education to make a substantial contribution to the use of television. There is much evidence in the record concerning the activities of educational organizations in AM and FM broadcasting. It is true and was to be expected that education has not utilized these media to the full extent that commercial broadcasters have, in terms of number of stations and number of hours of operation. However, it has also been shown that many of the educational institutions which are engaged in aural broadcasting are doing an outstanding job in the presentation of high quality programming, and have been getting excellent public response. And most important in this connection, it is agreed that the potential of television for education is much greater and more readily apparent than that of aural broadcasting, and that the interest of the educational community in the field is much greater than it was in aural broadcasting. Further, the justification for an educational station should not, in our view, turn simply on account of audience size. The public interest will clearly be served if these stations are used to contribute significantly to the educational process of the nation. The type of programs which have been broadcast by educational organizations, and those which the record indicates can and would be televised by educators, will provide a valuable complement to commercial programming.

39. We do not think there is merit in the contention that the record, with respect to the general phase of the hearing, does not support the general principle of a reservation of channels for educational purposes as set out in the Third Notice because it does not contain detailed information with regard to the desire, ability and qualifications of the educational organizations to construct a non-commercial educational station, or the competing commercial interests which desire to bring television service to the public. In preparing a proposed Assignment Table for the entire nation which would provide the framework for the growth of television for many years to come, we could not limit our perspective to immediate demand for educational stations under circumstances where all communities did not have an opportunity to give full consideration to the possibilities of television for educational purposes and to mobilize their resources. Moreover, evidence of specific demand for educational television was submitted for several communities in the general phase of the hearing, and in addition there was presented an estimate of the number of channels required for this purpose for one section of the country based upon the size of the various communities and their general educational requirements. We do not think it unreasonable to believe that general principles of assignment may be derived from such evidence, and that such principles may validly be applied to comparable communities, for the purposes of drawing up a nationwide assignment plan. See, e.g., *The New England Divisions Case*, 261 U. S. 184, 197-199 (1923).

40. Moreover, the Third Notice provided for the contesting of specific reservations in any community. The Assignment Table adopted below has been prepared after consideration of the specific evidence in support of, as well as in objection to, specific proposed reservations and after consideration of the overall needs of all communities for television service.

41. The great preponderance of evidence presented to the Commission has been to the effect that the actual process of formulating plans and of enacting necessary legislation or of making adequate financing available is one which will generally require more time for educational organizations than for commercial interests. The record does, of course, show that there are some educational institutions which are now ready to apply for television broadcasting licenses, but this in no wise detracts from the unavoidable conclusion that the great mass of educational institutions must move more slowly and overcome hurdles not present for commercial broadcasters, and that to insure an extensive, rather than a sparse and haphazard development of educational television, channels must be reserved by the Commission at this time. There is moreover, abundant testimony in the record that the very fact of reserving channels would speed the development of educational television. It was pointed out that it is much easier for those seeking to construct educational television stations to raise funds and get other necessary support if the channels are definitely available, than if it is problematical whether a channel may be procured at all.

42. With regard to possible waste of the reserved channels by non-use, it is contended that evidence offered in the general portion of the hearing, concerning the record of performance of non-commercial educational agencies in aural broadcasting, and their plans and abilities to meet the installation and programming cost of television, can lead only to the conclusion that waste of limited spectrum space through non-usage will result from the reservation of channels for non-commercial educational stations. To whatever extent the position taken in these exceptions is that any immediate non-use of channel space available for television constitutes a waste of channels the Commission cannot agree. The basic nature of a reservation in itself implies some non-use: to attribute waste of spectrum to the Commission's proposal concerning the use of certain channels by non-commercial educational stations without attributing it to those assignments in the Table for smaller cities, which may not be used for some time, is misleading. The very purpose of the Assignment Table is to *reserve* channels for the communities there listed to forestall a haphazard, inefficient or inequitable distribution of television service in the United States throughout the many years to come. Moreover, as pointed out in another portion of this Report, the whole of the Table of Assignments including the reservations of channels for use by non-commercial educational stations is subject to alteration in appropriate rule making proceedings in the future and any assignment, whether an educational reservation or not, may be modified if it appears in the public interest to do so.

43. We do not believe that in order to support our decision to reserve channels for non-commercial educational stations it is necessary that we be able to find on the basis of the record before us in the general phase of the hearing that the educational community of the United States has demonstrated either collectively or individually that it is financially qualified at this time to operate television stations. One of the reasons for having the reservation is that the Commission recognizes that it is of the utmost importance to this nation that a reasonable opportunity be afforded educational institutions to use television as a non-commercial educational medium, and that at the same time it will generally take the educational community longer to prepare for the operation of its own television stations than it would for some commercial broadcasters. This approach is exactly the same as that underlying the Assignment Table as a whole, since reservations of commercial channels have been made in many smaller communities to insure that they not be foreclosed from ever having television stations.

44. Although the record in the general phase of the proceedings does not contain any detailed showing on a community-by-community basis that the educational organizations have made detailed investigation of the costs incident to the construction and operation of television stations and of the exact sources from which such funds could be derived in the near future, nevertheless, the record, as a whole does indicate that educational organizations in most communities where reservation has finally been made will actually seek the neces-

[14] Of this number, all but five were called by educational organizations or testified in their own behalf in support of the position taken by such organizations in favor of an affirmative resolution of the question. Two other witnesses were in favor of the principle of reservations but differed with witnesses presented on behalf of educational groups with respect to the manner and extent of reservation.

[15] DuMont, in its Comments in Opposition to Comments and Proposals of Other Parties, has submitted the results of a survey which bear upon this question. Insofar as the survey bears upon any specific reservation, DuMont had the opportunity to present it in the portion of the hearing dealing with Appendix C. The Third Notice was not intended to permit the filing of new material on the matters which were already the subject of hearing. DuMont had an opportunity to present this type of evidence in the general phase of the proceeding.

sary funds. Furthermore, interested persons have had an opportunity to present evidence in the city-by-city portion of the hearings as to whether such funds will be sought or will become available in specific communities. It will admittedly be a difficult and time consuming process in most instances, but the likelihood of ultimate success, and the importance to the public of the objective sought, warrants the action taken. Several educational institutions, it was indicated on the record as early as the general portion of the hearing, had applied for television stations. The amounts of money spent by other public and private educational groups in aural broadcasting indicates that the acquisition of sufficient funds for television would not be an insurmountable obstacle. It has been shown, for example, that considerable sums have already been spent on visual aids to education. Television is clearly a fertile field for endowment, and it seems probable that sufficient funds can be raised both through this method and through the usual sources of funds for public and private education to enable the construction and operation of many non-commercial educational stations. As concerns the costs of operation there is the possibility of cooperative programming and financing among several educational organizations in large communities. The record indicates that educational institutions will unite in the construction and operation of non-commercial educational television stations. Such cooperative effort will, of course, help to make such stations economically feasible. The fact that somewhat novel problems may arise with respect to the selection and designation of licensees in this field does not—as some have contended—constitute a valid argument against the concept of educational reservations.

45. Several alternative methods for utilizing television in education have been presented to the Commission, but we do not think that any of them is satisfactory. One proposal is to utilize a microwave relay or wired circuit system of television for in-school educational programs. It appears that the cost of a wired circuit for the schools in larger cities might be prohibitive; but the determinative objection to such a proposal is that it would ignore very significant aspects of educational television. It is clear from the record that an important part of the educator's effort in television will be in the field of adult education in the home, as well as the provision of after school programs for children.

46. The NARTB-TV contended that the solution lay in the voluntary cooperation of educators and commercial broadcasters in the presentation of educational programs on commercial facilities. We conclude, however, that this sort of voluntary cooperation cannot be expected to accomplish all the important objectives of educational television. In order for an educational program to achieve its purpose it is necessary that broadcast time be available for educators on a regular basis. An audience cannot be built up if educators are forced to shift their broadcast period from time to time. Moreover, the presentation of a comprehensive schedule of programs comprising a number of courses and subjects which are designed for various age and interest groups may require large periods of the broadcast day which would be difficult if not impossible to obtain on commercial stations.

47. Another alternative was proposed by Senator Edwin C. Johnson of Colorado. This proposal is elaborated in the Senator's statement:

> "It is my belief as I have repeatedly said that the Commission could and should impose a condition on all television licenses that a certain amount of time be made available for educational purposes in the public interest as a sustaining feature. In this manner, television can become available for educational work now without saddling schools with the enormous burden and expense of constructing and operating a non-commercial educational station. . . . It is my considered opinion that the Commission can best serve the public interest and at the same time extend extremely profitable assistance to the educational processes of this country by imposing a condition in each television license issued which would require the availability of appropriate time for educational purposes."

48. It must be remembered that the provision for non-commercial educational television stations does not relieve commercial licensees from their duty to carry programs which fulfill the educational needs and serve the educational interests of the community in which they operate. This obligation applies with equal force to all commercial licensees whether or not a non-commercial educational channel has been reserved in their community, and similarly will obtain in communities where non-commercial educational stations will be in operation.

49. Aside from the question of the legal basis of a Rule which would accomplish Senator Johnson's proposal, the Commission feels it would be impracticable to promulgate a rule requiring that each commercial television licensee devote a specified amount of time to educational programs. A proper determination as to the appropriate amount of time to be set aside is subject to so many different and complex factors, difficult to determine in advance, that the possibility of such a rule is most questionable. Thus, the number of stations in the community, the total hours operated by each station, the number of educational institutions in the community, the size of the community, and countless other factors, each of which will vary from community to community, would make any uniform rule applicable to all TV stations unrealistic. All things considered, it appears to us that the reservation of channels for non-commercial educational stations, together with continued adherence by commercial stations to the mandate of serving the educational needs of the community, is the best method of achieving the aims of educational television.

Who May Be Licensed To Operate Non-Commercial Educational Stations.

50. While the Third Notice did not specify who would be eligible to own and operate a non-commercial educational station, the Commission has in the past restricted the ownership and operation of such stations to non-profit educational organizations.

51. The United States Conference of Mayors and the Municipal Broadcasting System, City of New York, have in appropriate comments proposed that eligibility be extended to any municipality operating educational institutions. The Municipal Broadcasting System states that a "more expeditious management of educational television in the City of New York from an administration standpoint" would result if it were permitted to operate a television station. It further stated that "if the Municipal Broadcasting System is eligible to operate television facilities, the station can be utilized by all of the educational institutions over which it has jurisdiction, rather than having responsibility for the operation placed in a particular school."

52. The Commission is of the opinion that in any community where an independent educational agency is constituted, and is eligible under the Commission's rules to apply for a non-commercial educational television station, there are no compelling reasons for extending eligibility to municipal authorities. The continued operation by the Board of Education of the City of New York since 1939 of non-commercial educational Station WNYE indicates that no insurmountable administrative barriers exist which would preclude the Board of Education as a potential licensee in the television field. Similarly, there is no evidence to indicate that the Board of Education of the City of New York, now eligible under the present rules, would give less access to other educational institutions were it the licensee of a television station than would the Municipal Broadcasting System were it eligible and granted a license. It should be noted that in any community the municipal authorities, or any other group, can take the initiative in constituting a consolidated television authority which would represent municipal educational institutions, private universities and other organizations concerned with education.

53. The Commission has, however, established in its Rules an exception providing that where a municipality has no independently constituted educational entity which would be eligible under the rules, the municipality in such case will be eligible to apply for a non-commercial educational station. This exception is designed solely to meet those situations where the municipal authorities do not delegate educational authority but reserve to themselves the management of the municipal educational system.

Partial Commercial Operation By Educational Stations

54. In its comments the University of Missouri[16] requests that the Commission authorize ". . . commercial operation on the channels reserved for educational institutions to an amount equal to 50% of the broadcast day." It appears from the evidence that funds in the amount of $350,000 are presently available to the University for the construction of a television station, but that no funds are available for the operation of such a station. Accordingly, the University requests that the Commission permit educational institutions to use the reserved assignments to operate stations on a limited commercial non-profit basis. It is urged that if its request is granted the following objectives will be attained:

A. More educational institutions will be in a position to construct and operate television stations throughout the country to the benefit of the public at large without materially affecting the strictly commercial stations;

B. Educational television stations will be able, through income received from commercial programs to better program their stations; and

C. That the commercial programs televised will break the monotony of continuous educational subjects so as to permit the stations to attract and hold audiences.

55. A similar proposal, that the Commission extend the reservation to include all educational institutions which are operated on a non-profit basis, is made by the Bob Jones University (WMUU) Greenville, South Carolina. The Bob Jones University argues that ". . . the reservation of the privilege of a commercial income commensurate with the operating expense of the educational station . . ." will result in the encouragement and aid to television broadcasting by educational institutions.

56. KFRU, Inc., Columbia, Missouri, opposed the request of the University of Missouri. In its reply to the University, KFRU states that it has no objection to the proposed reservation of Channel 8 for non-commercial education purposes in Columbia, Missouri. However, it opposes the request of the University for partial commercial operation on the grounds that such an operation would give the educational institution unfair competitive advantages over a commercial licensee.

57. It is our view that the request of the University of Missouri and the Bob Jones University must be denied. In the Third Notice we stated:

> In general, the need for non-commercial educational television stations was based upon the important contributions which non-commercial educational television stations can make in educating the people both in school —at all levels—and also the adult public. The need for such stations was justified upon the high quality type of programming which would be available on such stations—programming of an entirely different character from that available on most commercial stations.

A grant of the requests of the University of Missouri and Bob Jones University for partial com-

[16] See the discussion, elsewhere in this Report, of the assignments in Columbia, Missouri.

mercial operation by educational institutions would tend to vitiate the differences between commercial operation and non-commercial educational operation. It is recognized that the type of operation proposed by these Universities may be accomplished by the licensing of educational institutions in the commercial television broadcast service. But in our view achievement of the objective for which special educational reservations have been established—i.e., the establishment of a genuinely educational type of service—would not be furthered by permitting educational institutions to operate in substantially the same manner as commercial applicants though they may choose to call it limited commercial non-profit operation.

58. The Joint Committee on Educational Television suggests in its final brief that, in communities where only one VHF channel is assigned, and that channel is reserved for use by a non-commercial educational station, the non-commercial educational station should be allowed to broadcast programs which at present are available only from commercial network services. This exception would apply until such time as a commercial Grade A service is available in the area.

59. On January 10, 1952, a Reply and Motion to Strike was filed by Peoria Broadcasting Company, Rock Island Broadcasting Company and Champaign News-Gazette, Inc., with respect to the above described proposal of the Joint Committee. On January 25, 1952, a response to the Joint Motions was filed by the JCET. In view of the fact that the proposal made by the Joint Committee was not previously raised in any of its prior pleadings, the Motion to Strike is granted and the proposal is being given no further consideration.

The Use Of The VHF For Non-Commercial Educational Television

60. The Commission's Third Notice proposed to reserve one of the assigned channels for non-commercial educational television use in all communities having a total of three or more assignments (whether VHF or UHF). Where a community had fewer than three assignments no reservation as proposed except in those communities which were designated as primarily educational centers, where reservations were made although only one or two channels were assigned. Except for educational centers, a UHF channel was proposed in those communities where there were fewer than three VHF assignments. In 26 of the 46 educational centers, the Commission proposed to reserve a VHF channel for educational use. In 23 of these 26 centers a VHF educational reservation was proposed where only one VHF channel was assigned to the community. Where three or more VHF channels were assigned to a community, a VHF channel was proposed to be reserved except in those communities where all VHF assignments had been previously licensed. In those cases, the reservation of a UHF channel was proposed.

61. The Joint Committee on Educational Television in its comment has proposed that a VHF reservation for non-commercial educational institutions in place of a UHF reservation be considered in communities with less than three VHF assignments. On the other hand, some parties have argued that no assignments in the VHF be set aside as educational reservations. The Commission's Third Notice stated that the proposed reserveations were not final and that consideration would be given to any specific proposal looking toward additions or deletions. After examining the comments and evidence filed pursuant to the Third Notice, the Commission remains of the view that the bases upon which it determined the apportionment of non-commercial educational assignments by communities are generally sound and should be continued. However, in particular cases the Commission concludes that the evidence warrants deviations from the proposals in the Third Notice, for the reasons stated in the city-by-city portion of this Report.

62. The Joint Committee on Educational Television also proposes that the Commission should specifically state that an educational interest is not to be foreclosed from applying for a VHF channel in the so-called "closed cities" where all VHF assignments have already been made. No properly qualified applicant is ever precluded from applying for any channel in the broadcast field on the expiration of the existing license. Thus, whether educational interests seek a commercial or non-commercial television operation, they are, just as other applicants, eligible to apply for licensed channels upon expiration of the license term of the stations involved.

ASSIGNMENT PRINCIPLES

The Basis of the Table of Assignments

63. In proposing the Table of Assignment set out in the Third Notice the Commission said that it had

> . . . endeavored to meet the two-fold objective set forth in Sections 1 and 307 (b) of the Communcations Act of 1934, to provide television service, as far as possible to all people of the United States and to provide a fair, efficient and equitable distribution of television broadcast stations to the several states and communities.

In attempting to carry out these objectives, the Commission set forth certain principles, in terms of priorities, underlying the Table of Assignments.[17] These principles were:

> Priority No. 1: To provide at least one television service to all parts of the United States.
>
> Priority No. 2: To provide each community with at least one television broadcast station.
>
> Priority No. 3: To provide a choice of at least two television services to all parts of the United States.
>
> Priority No. 4: To provide each community with at least two television broadcast stations.
>
> Priority No. 5: Any channels which remain unassigned under the foregoing priorities will be assigned to the various communities depending on the size of the population of each community, the geographical location of such community, and the number of television services available to such community from television stations located in other communities.

64. The Commission has reviewed the above described principles in the light of the comments and evidence received in this proceeding. We believe it desirable to state in somewhat comprehensive form the various factors underlying the establishment of the television Assignment Table.

65. At the outset it should be clearly understood that no single mechanical formula was utilized in the construction of the Table of Assignments. With the above priorities in mind it was necessary to recognize that geographic, economic, and population conditions vary from area to area and even within the boundary of a single state; the possibility of assigning channels, for example, may differ as between the northern and southern segments or between the eastern and western parts of the same state. It must be emphasized, therefore, that in establishing the Table of Assignments it is not possible to follow a mechanical and rigid application of the basic principles or what was termed the "priorities" in the Third Notice.

66. In establishing a Table of Assignments we were faced at the outset with the significant fact that we could not make all assignments in the Table within the VHF. The intermixture problem resulting from this situation is discussed below. Secondly, propagation characteristics in the VHF are different in some respects from those in the UHF. Primary consideration was given to the fact that the VHF can effectively cover large areas, and VHF was used wherever possible in larger cities since such cities have broad areas of common interest. To achieve the benefits of VHF the 12 VHF channels were distributed as broadly as possible. However, conflicting interests had to be adjusted. Thus, the Commission concluded that in order to achieve an equitable distribution of facilities, metropolitan centers with their large aggregations of people should be assigned more VHF channels than communities comprising fewer people. At the same time—and this is a basic element in the Commission's assignment plan—the Commission did not believe that large cities should receive an undue share of the relatively scarce VHF channels; the Table we have adopted herein reflects a substantial distribution of VHF assignments among smaller communities and sparsely settled areas.

67. The Assignment Plan for UHF channels was coordinated with and made complementary to the VHF assignment plan. The Commission has always recognized that even with an extensive scattering of VHF assignments, the 12 channels available are not sufficient to meet the objective of providing television service to all the people. With the additional UHF channels, however, the Commission was able to formulate an assignment plan that have the potentiality of fulfilling the objective of Section 1 of the Communications Act. If all the VHF and UHF channels are utilized, there should be few, if any, people of the United States residing beyond the areas of television service. (See priorities 1 and 3.) Moreover, the Table has gone far in fulfilling the needs of individual communities to obtain local television outlets. It has provided at least one assignment to over 1250 communities. (See priority 2.) And it has attempted where possible to provide each community with at least two assignments. (See priority 4.)

68. Examination of the Table of Assignments makes clear, that in seeking to arrive at an equitable distribution of assignments throughout the country, the Commission has given consideration to population as one of the important criteria for distribution of assignments. Thus, it will be seen that for the most part, the following table reflects generally the number of assignments made to cities falling within the indicated population groupings:

1950 Population of Cities (Central City)	Number of Channels (Total VHF and UHF
1,000,000 and above	6 to 10
250,000-1,000,000	4 to 6
50,000- 250,000	2 to 4
Under 50,000	1 or 2

There are of course variations from this pattern because of the many factors and circumstances that had to be considered in connection with making a final judgment as to the exact number of assignments that should be made for any particular community. For example, consideration was given to the advantages of VHF channels for obtaining wide coverage. Also it was considered more important for each of the several cities in an area to have at least one channel than for the largest of the cities to have the maximum number of channels indicated. And as a further example, cutting across the criterion of population size as a basis for the number of channels assigned to a particular city was the criterion of insuring an equitable distribution of facilities to the several states. Thus, the Commission has attempted to provide at least some VHF channels to all states even though in some cases an assignment might otherwise have been made to a large metropolitan center in an adjacent highly urbanized state.

69. The Commission also concluded that as a further assignment factor it should provide channels for non-commercial educational television service in 44 communities outside of metropolitan areas designated as "primarily educational centers." Certain of these communities were assigned one channel for non-commercial educational use, whereas they would otherwise not have been assigned any channel; others received an additional channel over and above the number of channels they would have otherwise received. Moreover, an attempt was made in so far as possible to assign a VHF channel to each of these educational centers for educational use. In a few cases, however, the assignments have been made on the basis of the evidence in the record relating to the issues presented.

70. Allen B. DuMont Laboratories, Inc., was the only party in the proceedings to submit a national television assignment plan as an alternative to that contained in the Commission's Third Notice. In many respects the DuMont plan is similar to that of the Commission. With very few exceptions both DuMont and the Commission make at least one television assignment to the same communities

[17] For a discussion of the legal power of the Commission to establish a Table of Assignments such as we are adopting here, see the Memorandum Opinion issued in this proceeding on July 13, 1951 (FCC 51-709).

Moreover, both DuMont and the Commission provide for intermixture of VHF and UHF channels in numerous communities. A detailed comparison of the proposed assignments community-by-community reveals the important fact that under both the DuMont and the Commission plan the great majority of communities would receive the identical number of VHF, UHF, or VHF and UHF assignments.

71. On the other hand, the DuMont assignment plan differs from that of the Commission in several important respects. The present section deals with these differences in the two plans in so far as they concern the basis for assignments. Elsewhere in the Report are discussed other differences between the DuMont plan and the Assignment Table adopted herein.

72. DuMont's major criticism of the Commission's proposed Table of Assignments was that it allegedly failed to provide adequately for the commercial television needs of large cities. In its comment of May 7, 1951, DuMont stated its agreement with Priority No. 1 but objected to Priorities Nos. 2, 3, and 4. DuMont alleged that these priorities were unrealistic in that they failed to take adequate account of the need and demand for services in large cities; that they failed to recognize present and long-range differences as between VHF and UHF; and that they were harmful to the future of networking. As an alternative to the Commission's priorities, DuMont recommended the following two priorities:

(a) Provide channels which will permit one service without regard to population.

(b) Encourage fair economic and equitable operation of television service through assignment to major metropolitan service areas of not less than four VHF channels when technically feasible under the proposed standards and with further distribution in allocation in relationship to population of communities in the service areas; provision being made for transfer of unused frequencies and adjustment by subsequent assignment of specific "flexibility channels."

73. A basic objective of the DuMont assignment plan is to provide major metropolitan centers with multiple VHF stations. In particular, DuMont seeks the assignment of four VHF channels to such communities—an objective directly related to DuMont's contention that this is necessary to promote network competition. By the assignment of four VHF channels in the largest markets, DuMont assumes that it would thereby obtain an outlet for its network operations in the most important centers. Contrariwise, DuMont fears that if only one or two VHF channels are assigned in these markets, it would be unable to obtain affiliates in such centers and would be in the position of dependence on UHF outlets. Because of the time required to develop UHF stations, DuMont contends that it would be placed at a severe competitive handicap in relation to other networks.

74. In its sworn statement of August 17, 1951, DuMont does not specifically repeat the recommendation in its original comments with respect to a revision of the Commission's priorities. Rather, DuMont attempts to show that both its own assignment plan and the FCC plan seek the same dual objective. DuMont describes this objective, as follows:

(1) To provide television service, as far as possible, to all people of the United States; and

(2) To provide the most services to the most people.

75. After allegedly showing that the two plans are alike in objective, DuMont attempts to prove that its plan is superior to that of the Commission in more nearly realizing the common objective. DuMont states that both plans meet DuMont Principle 1 in that they provide for service to all people of the United States. However, DuMont emphasizes that its own plan is superior in providing more VHF service to the larger centers, and that it is therefore more efficient in producing a highly competitive network situation than the FCC plan.

76. Columbia Broadcasting System, Inc., in its comment of May 1951, and later in its evidence presents views generally similar to those of DuMont in respect to the need for providing additional commercial VHF stations in key economic areas. It calls attention to the need for an additional assignment policy of insuring to the maximum extent possible a competitive commercial television service. However, CBS does not suggest any specific system of priorities but rather recommends that the Commission's priorities be applied in a "flexible" manner. Specifically, CBS urges that an additional commercial VHF channel should be assigned to Boston, Chicago, and San Francisco.

77. As set forth above, the Commission has concluded that larger cities should be assigned more VHF channels than communities comprising fewer people. However, the Commission cannot agree with the DuMont principle that an overriding and paramount objective of a national television assignment plan should be the assignment of four commercial VHF stations to as many of the major markets as possible. The Commission is of the view that healthy economic competition in the television field will exist within the framework of the Assignment Table adopted herein. Moreover, in the assignment plan adopted, the Commission has taken into account other significant factors. For example, the Commission in fulfilling what it considers the mandate of the Communications Act to provide an equitable distribution of facilities has attempted to provide at least some VHF channels to each of the states, although in some cases this was done where an assignment might otherwise have been made to a large metropolitan center in an adjacent state.

78. A second policy difference between the DuMont and Commission assignment plans lies in their contrasting views with respect to the importance of individual communities having television assignments. The DuMont view is that emphasis should be placed on locating the assignments, particularly VHF channels, so that the largest number of people will have television service but not necessarily that the largest number of communities should have one or more television stations of their own.[18] This view derives from DuMont's premise that the major cities with their large populations are certain to be able to support expensive television facilities, and that smaller communities which are within appropriate range of these cities should obtain service from stations in the large cities, rather than attempt to support stations with their own less substantial economic resources.

79. The Commission, on the other hand, believes that on the basis of the Communications Act it must recognize the importance of making it possible with any table of assignments for a large number of communities to obtain television assignments of their own. In the Commission's view as many communities as possible should have the opportunity of enjoying the advantage that derive from having local outlets that will be responsive to local needs. We believe with respect to the economic ability of the smaller communities to support television stations that it is not unreasonable to assume that enterprising individuals will come forward in such communities who will find the means of financing a television operation. The television art is relatively new and opportunity undoubtedly exists for initiating various methods of reducing television costs.

80. Another difference in assignment principle as between the DuMont and FCC plan lies in respect to the assignments made to the "primarily educational centers." DuMont opposes any reservation for non-commercial educational television stations and under the DuMont plan all of its channel assignments would be available for commercial use.[19] With reference to the educational centers, DuMont does not follow the Commission's assignment principle of providing in so far as possible a VHF channel to these communities, which would be reserved for use by non-commercial educational television stations. Thus in 10 of the educational centers to which the Commission has assigned a VHF channel DuMont proposes to assign a UHF channel.

81. The Commission finds that the principles of assignment which DuMont advocates are inadequate in that these principles do not recognize specifically the need to provide an equitable apportionment of channels among the separate states and communities and they do not provide adequately for the educational needs of the primarily educational centers.

82. With respect to the recommendation of CBS that the Commission apply its priorities in a flexible manner, the Commission, as previously indicated, formulated its Table of Assignments on the basis of taking into account numerous factors and objectives and did not apply the priorities in a rigid, mechanical way. With respect to the needs of larger communities for additional VHF assignments as set forth by CBS, the Commission believes that in its final Table of Assignments it has provided for these needs to the extent possible, consistent with its other objectives and criteria viewed in the light of the record. With respect specifically to the CBS request for additional commercial VHF assignments in Chicago, Boston, and San Francisco, these requests are dealt with in the section of the Report which discusses assignments to individual cities.

83. Whereas both DuMont and CBS contend that the Commission's priorities do not make adequate provision for the competitive and commercial aspects of television, the Joint Committee on Educational Television alleges that the Commission's priorities were deficient in not specifically recognizing non-commercial educational television. The Joint Committee urges that an additional priority should be established between Priority No. 3 and Priority No. 4 reading as follows:

> To provide a non-commercial educational television service to all parts of the United States by the reservation of frequencies for this purpose.

84. It is not clear from the above statement as to whether or not the Joint Committee actually is proposing an additional assignment principle. An assignment principle refers to: (a) the number of television channels that individual communities should receive, and (b) whether the channels should be in the VHF or the UHF band. The Commission has reserved channels for non-commercial educational television use on an extensive basis throughout the United States, but not as a principle of assignment. That is to say, the Commission decided first that a particular community should have three channels on the basis of various criteria, and only subsequently did it decide that one channel should be reserved for educational use. As discussed previously, in one main exception the Commission treated the educational need as a principle of assignment: in the special case of the 46 "primarily educational centers." In this case, the fact of being an educational center influenced the Commission's decision as to the total assignments to these communities, and also influenced its determination as between the assignment of VHF and UHF channels. Moreover, upon request in this proceeding and a proper showing, the Commission has added an assignment as an educational reservation in various communities even though these assignments had not been made to the community in the Third Notice. At any event, in view of our decision discussed elsewhere in this Report to avoid any reference to priorities as such in the Commission's Rules, no further action is necessary with respect to the request of JCET for an additional priority.

Prediction of Service Areas and Interference

85. In the Third Notice the Com-

[18] While DuMont as a matter of general principle takes this position in its own assignment plan, DuMont makes at least one assignment to practically every community listed in the Commission's Table of Assignments contained in the Third Notice.

[19] Contrariwise, the number of *commercial* VHF channels in the Commission plan is reduced because of the Commission's policy of reserving one VHF channel for non-commercial educational television use in every community having at least three VHF assignments, unless all of these assignments had been previously licensed. While this principle does not determine in which community an assignment should be made, it is an important factor to be considered in any comparison of the number of commercial VHF channels in the DuMont and the FCC Assignment Tables.

mission stated with respect to prediction of service areas and interference:

> Methods for describing service areas and interference are set forth in Appendix B. The methods therein described include the propagation of radio waves through the lower atmosphere only. These propagation charts are based on an extensive number of measurements made at various locations over a long period of time. It is recognized that these charts may have to be revised from time to time as more measurements are made, and interested persons are encouraged to make as many measurements as possible and submit them to the Commission. The Commission is satisfied that on the basis of the data presently available to it the data underlying the propagation charts are sufficient to afford an adequate statistical basis for describing field intensities under average conditions, but it is expected that there may be substantial variations in individual areas.
>
> *Long distance skywave interference.* It is also realized that propagation to distances of the order of 500 to 1,500 miles via the sporadic E layer and to distances beyond via the F2 layer may occur in certain of the channels. However, since such interference may occur over extremely large distances, it is not possible to protect stations against such interference unless operation on such channels is limited to one or at the best a few stations. In order to provide stations for the various communities, the Commission has determined that the overall public interest is better served by not protecting television broadcast stations against this type of interference.

86. No objections were filed with respect to the proposal concerning long distance skywave interference. Accordingly, the decision of the Commission not to protect television broadcast stations against this type of interference is made final. In this connection it should be pointed out that in setting engineering standards, we have considered all known propagation effects. If in the future, any person is of the opinion that the Commission's Rules do not properly reflect any given types of propagation effect, consideration will be given in an appropriate rule making proceeding only to amendment of the Rules.

87. Several comments have been received which, in general, state that the propagation curves in Appendix B of the Third Notice are not supported by the record when used for UHF propagation. These comments are especially directed to the use of these curves in rough terrain. Comments of this nature have been received from the Greylock Broadcasting Company, Pittsfield, Mass.; Fort Industry Company; Enterprise Publishing Company, Brockton, Mass.; WTAG, Inc., Worcester, Mass.; and James C. McNary.

88. These comments must be viewed in light of the nature of the propagation curves used in the prediction of service areas and interference. The Ad Hoc Committee Report establishes that the received field intensities of television signals vary so greatly from location to location, and with time, that any prediction of service from these average curves for a specific station is expected to deviate appreciably from the actual service. In addition, it is clear that a very large number of measurements from both desired and interfering stations, many of which will not be in existence for several years, would be necessary to make an accurate prediction of service for any specific station. However, the Ad Hoc Report indicates that the overall estimate of service for a large number of stations will be fairly good. In view of the foregoing, it is apparent that the Assignment Table must be made on a large area basis for which the overall estimated service is reasonably accurate. The assignment Rules and standards, however, cannot be construed as guarantees of service but rather as yardsticks based upon the best available data. As the quantity of available data increases, the assignment Rules and standards may be revised at a later date in the light of the scientific findings.

89. The Commission, after review of the whole record and the comments filed in this proceeding, has decided that the 63 mc. F (50,50) curves present a more accurate picture of expected service in the UHF than do the 195 mc. curves. The UHF data in the record indicates that for 50% of the locations the field strengths are approximately 4 db below the 195 mc. F (50,50) curves for distances in the order of 10-20 miles for which data are available. The 63 mc. curves are approximately 4 db below the 195 mc. curves at distances of this order and appear to generally provide a reasonable match with the data for UHF within service distances (as contrasted with interfering distances). In addition, the Commission has reconsidered the curves with respect to the prediction of interference in the UHF and based on T.R.R. Report No. 2.4.10 (Exhibit 565), in the record in this proceedings, a new family of curves for the prediction of interfering UHF signals has been prepared and has been substituted for the F (50,10) curve for Channels 14-83 proposed in the Third Notice.

90. With these changes in mind the Commission is confident that the curves it is establishing are of sufficient accuracy to achieve the purposes of its assignment plan. The use of such curves is indispensable to the inauguration of a nationwide television service. If we were to await more extensive data before establishing the Assignment Table, it would be necessary to withhold the inauguration of a nationwide service which will operate on both the UHF and VHF. The objections to the use of the 195 mc. curves for UHF in rough terrain are in part mitigated by the use of the 63 mc. curves for prediction of service ranges. It is nevertheless true that the same curves are used for smooth as for rough terrain. However, no one either in the record or the comments filed pursuant to the Third Notice has proposed a system of prediction of coverage which while recognizing the differences between rough and smooth terrain meets the criterion of reasonable simplicity or in lieu thereof is reasonably accurate in the light of available scientific data. Actually, no one has offered adequate data upon which curves may be adopted which would recognize the differences between smooth and rough terrain or has established criteria for determining various degrees of terrain roughness. As a result no further changes in the curves adopted are justified on the basis of the record. In the future, when measurements are made which will add to the store knowledge in the field of propagation, these will be considered in appropriate rule making proceedings looking toward the amendment of existing curves. In the absence of such data, objections to the UHF propagation curves must be rejected.[20]

91. For purposes of establishing a Table of Assignments and developing Rules and standards for the television broadcast service, the service areas are described in terms of iso-service contours based upon the proposed propagation charts. It should be stressed again that the service and interference computed by the use of these charts are not expected to prevail for any specific station but rather describe the service and interference which would prevail if the stations involved were all typical ones producing the average field intensities described by the charts. In other words, the proposed methods for describing service areas and interference are only assignment tools which are expected to give a fairly good service description on a large area basis but not necessarily on an individual station basis.

92. It has been found that radio signals in the frequency range pertinent to the television allocation vary both with time and location in a statistically normal distribution. In order to adequately describe these variable field intensities, the Commission has adopted the statistical approach advocated by the Ad Hoc Committee. Thus, if a T per cent field intensity is defined as that level of field intensity exceeded for T per cent of the time, then F(L,T) is the T per cent field intensity exceeded at L per cent of the locations. Stated in another way, F (L,T) is the field intensity exceeded for at least T per cent of the time at the best L per cent of receiving locations. In establishing the Table of Assignments and in developing the Rules and standards for the television broadcast service, it has been found necessary to use primarily the F(50,50) and F(50,10) values of field intensity and the charts indicating the variation of field intensity with the percentage of receiver locations. However, we have considered in this connection the efficiency studies developed by the Ad Hoc Committee utilizing the concept of integrating the service available at all receiver locations.

93. The above charts are based upon the results of the Ad Hoc Committee Report with two exceptions. First, the field intensity versus distance curves were extrapolated for transmitting antenna heights of more than 2000 feet. Secondly, the Ad Hoc Committee did not study UHF propagation.

94. The concept of iso-service contours has been introduced for the purpose of describing service. It is recognized that there exists no sharp line of demarcation between service and interference but that the service available may be more satisfactory or less satisfactory in varying degrees. However, for the purpose of obtaining practical comparisons of the service to be expected under the assignment plan it has been found desirable in this proceeding to set up a standard criterion of service, based upon a standard instantaneous acceptance ratio of desired to undesired signals being exceeded for 90 per cent of the time at any given receiver location, as outlined in Volume I of the Ad Hoc Committee Report. The iso-service contour is defined as that contour along which every location has the same probability of exceeding the standard criterion of service, described above. The farther away a location is from the transmitter, the smaller is the probability that the received service will exceed the standard criterion. The grades of service are determined by selecting particular location probabilities, namely 70% and 50% for Grades A and B service respectively.

95. In determining service and interference, the receiving antenna is assumed to be non-directional. This assumption has been recommended by the Ad Hoc Committee. It is believed that the receiving antenna directivity gain should be used as a safety factor to permit adjustment of the antenna to minimize multipath distortion and local oscillator radiation, to permit a compromise orientation for the reception on the same antenna from several desired stations in different directions, and to minimize the effects of multiple interference.

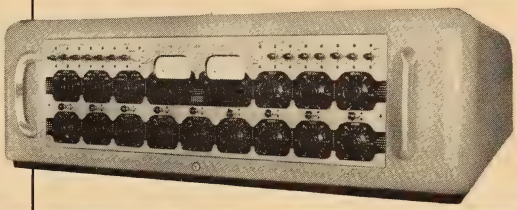
96. In view of the foregoing, the Commission's proposal as modified herein, with respect to prediction of service areas and interference has been followed in this proceeding and appropriate portions thereof have been incorporated in the Commission's Rules and standards. The F(50,10) curves are attached hereto as Appendix B.

Grades of Service

97. The Third Notice provided C. Grades of service.[5] In its

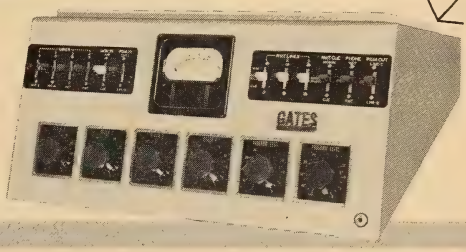
[5] The Commission proposes the use of iso-service contours which express service in terms of the ratio between desired and undesired signal in decibels, or the minimum required signal levels in decibels above one microvolt per meter. This has been done in order to facilitate computation of service and interference field strengths. Likewise, the same terms may be carried over to the output of the transmitter, transmission line loss and antenna gain. This has the advantage of using the same unit throughout the service whether in the transmitting equipment or in the field and has the additional advantage that a decibel of power added at the transmitter results in a decibel of increased field strength. In order to place these matters on a related basis, the decibels with respect to transmitter power and antenna gain as well as field strength must be expressed as decibels with reference to some given level. Field strength is expressed either in decibels above an undesired signal or decibels above a reference level which has been chosen as one microvolt per meter. A convenient reference level of transmitter power is 1 kilowat. The propagation charts attached to Appendix B and identified as "Appendix V, figures 1-4" are based upon the radiation in the equatorial plane of a half wave dipole antenna having an effective radiated power of one kilowat. Antenna gain is expressed as the ratio in db of the maximum radiation from the antenna to the radiation in the equatorial plane of a half wave dipole with equal power input.

[20] It is to be noted that the Commission's decision with respect to the Enterprise, Greylock and WTAG counterproposals with respect to the cities of Brockton, Pittsfield and Worcester does not rest on the nature of the UHF propagation curves.



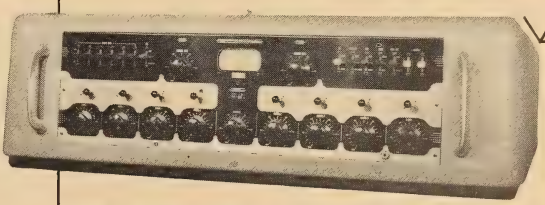
"These 3 for TV"

GATES offers three speech input consoles that fully meet every TV need. Whether you select the ultra complete SA-50 dual channel equipment, the much used SA-40 single channel console, or the very popular 52-CS studioette, you can be certain of top quality through advanced GATES engineering. For 30 years now, GATES has been building fine speech equipment — and for TV there is nothing finer!



GATES SA-50 Dual Channel Console . . .

Nine mixing channels, dual program amplifiers, dual V. U. meters, 10 watt monitoring amplifier, self-contained cueing amplifier, five preamplifiers with room for two more where required. Complete remote, override, cueing and talk back facilities. Extremely low cross talk combined with high gain. Deluxe equipment all the way!



GATES 52-CS Studioette . . .

All GATES consoles have the same top quality components. This popular, modestly priced console is made possible by combining functions through key control. Many TV stations will prefer to use several 52-CS Studioettes instead of a single larger console. Every progressive TV engineer will find it worth while to investigate the 52-CS Studioette!

GATES SA-40 Single Channel Console . . .

Perhaps the most used speech input console in TV and radio today. Nine mixing channels, wide circuit selection, low cross talk, high gain and extreme ease of servicing are but a few of the SA-40's many features. GATES will gladly send detailed circuit data on request.

GATES Speech Input Catalog — Yours for the asking is a 44-page catalog on GATES speech equipment plus a new 12-page brochure on remote control apparatus. No obligation, of course. Why not write now?

manufacturing engineers since 1922

QUINCY, ILLINOIS, U. S. A.

Notice of Further Proposed Rule Making issued on July 11, 1949, the Commission proposed to classify television broadcast service into three grades of service. In the Commission's opinion, there is no need for more than two grades of service. Grade A service is so specified that a quality acceptable to the median observer is expected to be available for at least 90 per cent of the time at the best 70 per cent of receiver locations at the outer limits of this service. In the case of Grade B service the figures are 90 per cent of the time and 50 per cent of the locations.[6] The field strengths and interference ratios are as follows:

1. Required median field strengths in db above 1 uv/m:

Grade of service	Channels 2-6	Channels 7-13	Channels 14-83
A	68 db	71 db	74 db
B	47 db	56 db	64 db

2. Permissible co-channel ratios in db of median desired field strength to 10 per cent undesired field strength:

	Channels 2-13		Channels 14-83	
Grade of Service	Non-Off-set	Off-set	Non-Off-set	Off-set
A	51 db	34 db	53 db	36 db
B	45 db	28 db	45 db	28 db

3. Permissible adjacent channel ratios in db of median desired and undesired field strengths:

Grade of Service	Channels 2-83
A	0 db
B	0 db

98. No objections were filed to the proposal described above with the exception of comments concerning adjacent channel interference ratios which are treated elsewhere in this Report. Accordingly, the proposal in the Third Notice has been followed in this proceeding and appropriate portions thereof have been incorporated in the Commission's Rules and Standards. In view of our decision herein with respect to station separations, powers and antenna heights, there is no need to include in our Rules and standards co-channel and adjacent channel interference ratios.

99. The Third Notice provided that:

> Transmitter locations shall be so chosen that the following median field intensities as calculated in accordance with the methods and procedures described in Appendix B are provided over the entire principal city to be served:

Channels 2-6	Channels 7-13	Channels 14-83
74 db	77 db	80 db

100. No one has objected to this proposal with respect to median field intensities and accordingly it is being finalized.

101. It should be noted that the values selected for these grades of service assume a number of conditions with respect to a typical home receiver installation such as the sensitivity of the receiver, the type of antenna, the installation of the antenna, and the transmission line used. In VHF, considerable information concerning a typical home installation is available as a result of actual experience; in UHF a typical installation had to be predicated to a large extent on the basis of technical feasibility. Thus, the extent to which the grades of service for the UHF, herein adopted are actually realized in practice will depend on the ability of the industry economically to produce and install high performance receiving equipment as well as upon the propagation characteristics of these frequencies.

102. DuMont and Radio Kentucky, Inc., Louisville, Kentucky, have both recommended that the Commission impose requirements with respect to the joint use of antennas to make coverage more equal, reduce construction costs and aid the public in the installation and use of receiving antennas. In this connection, Section 3.639 of the Commission's present rules provides:

> Use of common antenna site.—No television license or renewal of a television license will be granted to any person who owns, leases, or controls a particular site which is peculiarly suitable for television broadcasting in a particular area and (a) which is not available for use by other television licensees, and (b) no other comparable site is available in the area; and (c) where the exclusive use of such site by the applicant or licensee would unduly limit the number of television stations that can be authorized in a particular area or would unduly restrict competition among television stations.

While we encourage licensees to use common antennas where possible, we believe that we should not impose such a requirement without further exploration of the problems which might arise from such a rule. We have, however, retained the provisions of Section 3.639 in the Rules adopted herein.

Station Separations

103. The Commission in seeking to establish a nationwide television assignment plan which will provide service to the people of the United States for years to come is basing the Assignment Table in large part on a system of minimum station separations. These station separations, together with the station powers and antenna heights permitted by the Rules, will establish the nature and extent of the protection from interference to be accorded to television stations. The use of this system of station separations, we believe, will more easily and more likely bring about a truly efficient and equitable distribution of television service than would a system based upon "protected contours."

The Measurement of Station Separations [21]

104. We are dealing in this Report with two types of separations or mileage spacing requirements. There are in the first place *assignment spacing requirements* which we are following herein and which will be followed in future rule making proceedings dealing with additions or amendments to the Table of Assignments. These separations are to be distinguished from *facilities spacing requirements* that must be complied with in determining spacings between stations in licensing proceedings involving individual applications for facilities. The Third Notice implicitly recognized the difference between these two types of separations by referring to assignment spacing requirements as city-to-city spacings and by referring to facilities spacing requirements as transmitter-to-transmitter spacings.

105. A number of parties[22] have filed comments pursuant to the Third Notice taking issue with the requirement that minimum co-channel separations be determined exclusively on a city-to-city basis. These parties state that the evidence in the record of the hearing, supplied by Edward Allen, a Commission witness, pertaining to the determination of interference, distance to service contours, and associated studies related to the locations of the transmitting antennas irrespective of the distance between cites. These parties further maintain that the determination of interference, distance to contours, and grade of service are functions of the transmitting antennas together with the propagation characteristics of the frequencies concerned, and power and effective antenna height. Accordingly, they request that the Third Notice be modified so that minimum co-channel separations be stated either on a transmitter-to-transmitter basis or that the alternative of transmitter-to-transmitter or city-to-city spacings be permitted.

106. In providing that assignment spacings were to be measured from city-to-city, the Third Notice did not expressly specify what reference point in a city should be chosen in measuring the city-to-city separation. However, where a transmitter is in existence by reason of a Commission authorization, that transmitter site is obviously the appropriate reference point. Accordingly, insofar as the comments described above constitute a request that, in measuring assignment spacings an authorized television transmitter shall be used as one of the two necessary reference points, they are granted, and we have in this proceeding measured [23] assignment spacings from authorized transmitter sites where such sites were available. The location of the site is derived from the co-ordinates of the transmitter as indicated on the official Commission instrument of authorization. Where television transmitters are authorized in both cities, each site should be used as a point of reference, and in such case the assignment spacing is measured transmitter-to-transmitter.

107. The Third Notice did not state specifically how an assignment spacing should be measured where no authorized transmitter site is available as a reference point. We have decided that where an authorized transmitter site is available for use as a reference point in one city but not in the other, the latter is the point described by the city co-ordinates as set forth in the publication of the United States Department of Commerce entitled "Air Line Distances Between Cities in the United States," [24] or if this publication does not specify such co-ordinates, the reference point used is the point described by the co-ordinates of the main post office of the city involved. Where no authorized transmitter sites are available for use as a reference point in both cities, the mileage distance between the two cities listed in the publication described above has been used where available. In the absence of such information, the reference points are determined by ascertaining the city co-ordinates as set forth in the publication listed above and where the city co-ordinates are not listed, by ascertaining the co-ordinates of the main post office in the city involved.

108. The measurement of facilities separations in licensing proceedings is simplified by reason of the fact that in each case one reference point is established by the applicant by his selection of a proposed transmitter site. The other reference point is determined by ascertaining (1) the co-ordinates of an authorized transmitter site in the other city or (2) where such a transmitter site is not available the city co-ordinates as set forth in the publication of the United States Department of Commerce entitled "Air Line Distances Between Cities in the United States" or if said publication does not specify such co-ordinates the co-ordinates of the main post office of the other city involved. In addition where there are pending applications in the other city, which, if granted, would have to be considered in determining facilities separations, the co-ordinates of the transmitter sites proposed in such applications must be used to determine whether minimum facilities spacing between the two proposals have been met.

The Minimum Co-Channel Assignment Spacings

109. In the Third Notice, the Commission said with respect to co-channel assignment spacings:

> The Table of Assignments contained in the Commission's Notice of Further Proposed Rule Making, issued July 11, 1949, had as its objective co-channel separation of 220 miles in the VHF band and 200 miles in the

[6] For the specialized case that exists in the case of adjacent channel interference, see par. II E (2) below.

[21] Station separations include co-channel separations, adjacent channel separations, and those separations provided for herein to protect against interference caused by oscillator radiation, I. F. beat, intermodulation and to protect against image interference.

[22] Southern Minnesota Supply Co., Mankato, Minn.; Pennsylvania Broadcasting Co., Philadelphia, Pa.; The Brockway Co., Watertown, N. Y.; Hampton Roads Broadcasting Corp., Norfolk, Va.; Loyola University of The South, New Orleans, La.; The Gazette Company, Cedar Rapids, Iowa; Telegraph Herald, Dubuque, Iowa; Kingsport Broadcasting Co., Kingsport, Tenn.; Hartford Times, Inc., Hartford, Conn.; Buffalo Courier Express, Inc., Buffalo, N. Y., Bay Broadcasting Co., Bay City, Mich.; WJR, The Goodwill Station, Inc., Detroit, Mich.; Wm. H. Block Company, Indianapolis, Ind.; The Travelers Broadcasting Service Corp., Hartford, Conn.; McClatchy Broadcasting Co., Sacramento and Fresno, Calif.; WIBC, Inc., Indianapolis, Ind.; Peoria Broadcasting Co., Peoria, Ill.; Independent Broadcasting Company, Des Moines, Iowa, and Jacksonville Broadcasting Co., Jacksonville, Fla., among others.

[23] The manner of measurement of mileage spacings between two reference points is set out in the Rules adopted herein.

[24] The Third Notice provided that in determining separations between cities for the purpose of application of the 15 mile rule (see footnote 8 above) "the city mileage separations set forth in the publication of the United States Department of Commerce entitled 'Air Line Distances' shall be utilized. Where cities are not listed in the above publication, separations shall be computed on the basis of the distance between the main post office in the respective cities."

UHF band. At the hearing on the general issues, testimony was offered that these separations could be reduced considerably by utilizing offset carrier operation. Evidence was also offered that more television service could be made available to the country if the separation objective were reduced to 150 miles for VHF channels.

The Commission has carefully considered the above evidence and has concluded that some reduction in co-channel separation is possible because of the improvements which result from offset carrier operation. It is not deemed advisable to effectuate a reduction to 150 mile VHF separation as suggested at the hearing. In the first place, the evidence upon which the 150 mile separation is based is the theoretical computations of what coverage can be achieved. On the basis of the evidence in the record, it is clear that considerations of terrain and other propagation factors will materially affect many of the theoretical computations. In the second place, much of the propagation data—although the best available—upon which the Commission relies is necessarily quite meager. Postponing a decision in these proceedings would not materially aid this problem since it has been the Commission's experience that substantial amounts of propagation data do not become available until stations are authorized on a regular basis. Hence, the Commission is faced with the practical problem that if it postpones assigning stations until sufficient propagation data are available, such data may never become available, while on the other hand if stations are assigned before sufficient propagation data are assembled, more interference may result in actual operation than was anticipated. In the Commission's view, the best method of handling this problem is to assign stations as soon as a reasonably sufficient amount of data is accumulated, but in doing so assignments should not be made on the barest minimum separation which exact calculations would indicate. Instead, a safety factor should be included. In this way, if as a result of actual experience more interference results than was indicated by the earlier calculations, the safety factor will prevent extensive damage to overall service. If actual experience shows that the amount of interference is approximately that predicted by the calculations, then the rules and standards can be amended to reflect the new data. In the Commission's experience, it is much easier as a practical matter to reduce station separations which are somewhat larger than were originally thought to be necessary than it is to increase separations which are smaller than were originally thought to be necessary.

110. In determining minimum co-channel separations we must consider a number of factors. The geographical distribution of the people and cities of the United States does not lend itself to a simple rule for the spacing of stations. The northeastern portion of the United States is generally characterized by higher population density and closer spacing of cities than the other portions of the country. See Appendix A.

111. Recognition must also be given to the fact that the mileages set for co-channel spacings determine the size of the interference-free service area of nearby co-channel stations. It is important to note that we are referring here not to Grade A service but to the more extensive Grade B service. As spacings in the order of 140-250 miles are reduced by 10 miles the interference free service area is reduced by 2-3 miles in the direction in which stations face each other. Accordingly, reductions in Grade B service resulting from reduced separations deprive the rural areas and the less sparsely settled areas of television service. To the extent we do this in the VHF, we lose one of the benefits of that portion of the spectrum, the wide area coverage possible.

112. We have also considered the import of minimum spacings on the policy we have adopted herein with respect to the use of greater heights and higher powers. As greater antenna heights and higher powers are used, the greater is the need for wider separations; with smaller separations, in the direction of the co-channel station, the potential gain from greater heights and higher powers would be lost. We do not wish to negate the policy of trying to obtain wide coverage by the use of high antenna heights; neither do we wish to create excessive interference by permitting operation with high power at small spacings.

113. Finally we have given consideration to the need for a safety factor in view of the incomplete nature of available propagation data. Where the pros and cons hang in even balance we deem it highly desirable if not imperative to tip the scales in favor of wider separations.

114. The Commission in the Third Notice provided the following minimum co-channel assignment spacings between cities:

VHF — 180 miles
UHF — 165 miles

Actually, however, it was not intended that all requests for additional assignments should be granted solely because they met the minima provided for in the Third Notice. The Third Notice stated:

> In each case, the above figures are minimum separations. Greater separations are utilized in the sparsely settled areas of the country in order to secure a maximum amount of service. In addition, greater separations are also utilized in Gulf Coast areas and in other areas where high levels of tropospheric propagation may be expected. *This should be kept in mind by persons desiring to suggest changes in the Table of Assignments.* (Emphasis added.)

115. Moreover, examination of the Table of Assignments proposed in the Third Notice makes it clear that the 180 mile VHF co-channel separation and the 165 mile UHF co-channel separation were not intended to be the minimum assignment spacing throughout the country. These minimum spacings were intended to be used and were used only in those portions of the country where narrower spacings are appropriate, particularly in the northeastern part of the United States. Upon review of the whole record we adhere to the concept that in the less densely settled areas of the country wide separations must be maintained. The minimum VHF co-channel spacing utilized in the Third Notice in such areas of the country was 190 miles. We adopt this spacing as the appropriate minimum VHF spacing in areas which have a relatively lower population density or where large cities are more widely separated. See Appendix A. For if we were to permit stations at close separations in such areas, we would deprive persons residing in the interference areas between such stations of television service since there generally do not exist other cities of sufficient magnitude in this interference area capable of supporting stations on other channels which could serve the area.

116. A different situation, however, exists where there is a higher density of population and concentration of cities. Because of the concentration of cities, the provision for lower minimum spacings in such an area will not have the tendency of depriving residents of the area of television service, since there would be an overlapping of service contours of stations on different channels located in the interference areas.

117. Analysis of population density and distribution of cities establishes the existence of one large contiguous area where there is a substantially higher density of population and concentration of cities compared to all other contiguous areas of comparable size. See Appendix A. We believe the record in the general portion of the hearing supports the conclusion that lower separations in this area are warranted.

118. We have called this area Zone I. It consists of that portion of the United States located within the confines of the following lines drawn on the United States Albers Equal Area Projection Map, (based on standard parallels 29½° and 45½° North American datum): Beginning at the most easterly point on the state boundary line between North Carolina and Virginia; thence in a straight line to a point at the junction of the Ohio, Kentucky, West Virginia State boundary lines, thence westerly along the southern boundary lines of the States of Ohio, Indiana and Illinois to a point at the junction of the Illinois, Kentucky and Missouri State boundary lines; thence northerly along the west boundary line of the State of Illinois to a point at the junction of the Illinois, Iowa and Wisconsin State boundary lines; thence easterly along the northern state boundary lines of Illinois to the 90th meridian; thence north along this meridian to the 43.5° parallel; thence east along this parallel to the 71st meridian; thence in a straight line to the intersection of the 69th meridian and the 45th parallel; thence east along the 45th parallel to the Atlantic Ocean. When any of the above lines pass through a city the city shall be considered to be located in Zone I. A map of Zone I is included in the Rules adopted herein.

119. In establishing the boundaries of Zone I we have included within the Zone portions of some states that, as a whole, have relatively low population densities and relatively few large cities. The portions we have included, are, however, relatively more populous and have a greater number of large cities than the other portions of the same states and they are all contiguous to the general area with a higher density of population and concentrated cities. For these reasons we believe their inclusion in Zone I is warranted.

120. Upon consideration of the whole record, we have determined that the minimum co-channel assignment spacing in Zone I shall be 170 miles in the VHF and 155 miles in the UHF.[25] This constitutes a reduction of 10 miles in the minimum assignment separation proposed in the Third Notice, but is the same as the minimum facilities separations provided for in the Third Notice. We find no basis for going below the 170 and 155 mile figures proposed as the minima in the Third Notice.

121. As we have pointed out in the Third Notice, in certain areas of the country, particularly the Gulf Coast area, high levels of tropospheric propagation may be expected. In such areas greater separations are necessary to compensate for the reduction in service areas that is caused by the interference resulting from the high level of tropospheric propagation. We have carefully re-examined the record and the comments that have been filed pursuant to the Third Notice and we have determined that only the Gulf Coast area should, by rule, be treated differently from other areas which may be affected by a high level of tropospheric propagation. In reaching this conclusion we are aware that wide separations will have to be maintained in other areas as well to protect against the effects of high levels of tropospheric propagation. We believe, however, that these situations can be considered on a case-to-case basis, and we have attempted to take care of this problem on such a basis in establishing the Table of Assignments in this proceeding.

122. We have designated the Gulf Coast area as Zone III. Zone III consists of that portion of the United States located south of a line, drawn on the United States Albers Equal Area Projection Map, (based on standard parallels 29½° and 45½° North American datum), beginning at a point on the east coast of Georgia and the 31st parallel and ending at the United States-Mexico border, consisting of arcs drawn with a 150 mile radius from the following specified points:

	North Latitude	West Longitude
a)	29° 40′	83° 24′
b)	30° 07′	84° 12′
c)	30° 31′	86° 30′
d)	30° 48′	87° 58′ 30″
e)	30° 23′	90° 12′
f)	30° 04′ 30″	93° 19′
g)	29° 46′	95° 05′
h)	28° 43′	96° 39′ 30″
i)	27° 52′ 30″	97° 32′

When any of the above lines pass through a city, the city shall be

[25] We recognize that a few existing operations do not comply with the minimum separations set forth above. It has not been possible to remove these cases without unwarranted dislocation.

considered to be located in Zone II. A map of Zone III is included in the Rules adopted herein.

123. All of the United States (including the Territories) not included in Zones I and III is designated as Zone II. In measuring separations between cities in different Zones, the lower separation applicable will govern.

124. The area designated as Zone II is more sparsely settled than the area designated Zone I and has a lower concentration of cities than does Zone I. See Appendix A. As shown in Appendix A, the population density per square mile in Zone I is 222.1 people per square mile; in Zone II the population density is 27.4 per square mile. For the reasons set out above, we believe the minimum VHF co-channel assignment separation of 190 miles maintained in this area in the Table proposed in the Third Notice, should be adhered to without change. In the case of the UHF, the minimum co-channel separation in Zone II, maintaining the relationship used in Zone I, shall be 175 miles. There are very few UHF assignments proposed in the Third Notice in violation of this minimum; these assignments have, however, been deleted from the Table adopted herein.

125. There remains for consideration the minimum co-channel separations to be maintained in Zone III, the Gulf Coast area. This area would be on the basis of density of population and concentration of cities fall within Zone II. The population density per square mile in Zone III is 47.8 people per square mile. See Appendix A. On the basis of the record, it appears necessary, however, to add a factor of about 33 miles spacing between co-channel stations to obtain the same service area as would exist in Zone II. We believe it to be reasonable in light of the foregoing to add 30 miles in the Gulf Coast area to the 190 mile minimum VHF co-channel assignment spacing provided in Zone II. This will substantially equalize the service contours of stations in the Gulf area with stations in Zone II. On this basis the minimum assignment spacing in Zone III will be 220 miles in the VHF band and 205 miles in the UHF. Several VHF assignments in Zone III proposed in the Third Notice involved spacings below this minimum. However, as set forth above, it was clearly contemplated in the Third Notice and the Commission so indicated that spacings in the Gulf Coast area would have to be much wider than spacings in other portions of the country [26]. Accordingly, necessary changes have been made in the Table to insure that all assignments meet the minimum required herein.

126. In establishing Zone III we are taking into account the fact that we do not have sufficient data at this time to determine exactly at what point the effects of the high level of propagation in the Gulf need no longer be considered in establishing minimum assignment spacings. We believe, however, that the figure we have chosen provides an adequate margin of safety and yet does not prevent assignments that could appropriately be made at this time.

127. DuMont Laboratories, Inc. has submitted an alternative nationwide assignment plan which it claims is superior to that of the Commission. DuMont makes this claim on the grounds that its assignment plan allegedly makes a more efficient use of the available television spectrum, especially the VHF band. DuMont points out that it has made more assignments on each VHF channel than the Commission and that it has provided more communities with VHF multiple service. At the same time DuMont proposes to assign at least one channel to practically every community listed in the Commission's Table of Assignments. In substantiation of its claim that its plan would provide more persons with more service, DuMont had a population count made of the number of persons living within 50 miles of television service centers. It defined a "television service center" as a community to which more than one television channel had been assigned under either the Commission or the DuMont assignment plans. For example, DuMont states that under the proposed FCC plan 98 television centers have been tentatively assigned four or more VHF and UHF channels and a population of 95,115,203 live within 50 miles of these centers, whereas under the DuMont plan 149 centers would have four or more channels and a population of 113,814,387 live within 50 miles of these centers.

128. DuMont contends that it achieved this greater efficiency "within the FCC framework of engineering standards." As a matter of fact, however, there is a highly significant difference between the two plans with respect to the minimum co-channel assignment separations employed and this difference is necessarily reflected in the total number of assignments under the two plans. In order to increase the number of VHF assignments in large cities, DuMont would make many assignments below the minimum separations employed in the Table of Assignments proposed in the Commission's Third Notice and as adopted in this Report. For example, in the area comprising Zone II, the Commission's proposed Table and final Table have no assignment separations below 190 miles. By contrast DuMont proposes 79 spacings below this minimum. These would be distributed as follows: 6 below 170 miles; 21 between 170 and 180 miles; and 52 between 180 and 190 miles. In the area defined as Zone III, the Commission had proposed 9 spacings below 220 miles (minimum established herein), but in the Table adopted herein all VHF spacings below 220 miles have been deleted. DuMont, however, proposes 30 assignments below this minimum. Two separations would fall below 180 miles, 18 between 180 and 200 miles, and 10 between 200 and 220 miles.

129. By reducing the spacings below the minimum at numerous points, the DuMont plan achieves a greater number of VHF assignments than does the FCC table. It is apparent, however, that DuMont's alleged superior assignment efficiency in fact results from utilizing station separation standards at variance with those of the Commission. For the reasons detailed previously, the Commission does not believe it is in the public interest to utilize such lower assignment separations.

130. Furthermore, the DuMont Assignment Table is inconsistent, in part, with the assignments that have been made along the Mexican and Canadian borders. This aspect of the DuMont assignment plan is discussed elsewhere in this Report. In addition, the DuMont proposal for UHF assignments does not follow a basic principle provided for in this Report and followed in the Commission's Table, namely, that UHF stations separated by less than 6 channels should be separated by at least 20 miles. This aspect of the DuMont assignment plan is also discussed in detail elsewhere in this report.

131. The Commission has already examined and rejected certain of the underlying principles of the DuMont plan.[27] We must, for the reasons indicated above, similarly reject the proposed DuMont Table of Assignments.

132. DuMont requested an opportunity to make an oral presentation in this proceeding. This request was based on the view that the Commission would not adequately understand the DuMont nationwide assignment plan. We have very carefully considered the DuMont proposal. The Commission recognizes the contributions made by DuMont to these proceedings. We do not believe that an oral presentation is necessary for the Commission to satisfactorily consider and dispose of the issues raised by DuMont. In our view the detailed written evidence submitted by DuMont adequately presents the facts with respect to the nature of DuMont's proposal and has enabled us fully to consider the merits of its proposal. The DuMont request for an oral presentation is, therefore, herewith denied.

133. A request has been made[28] that the Commission permit assignments of co-channel stations at less than the minimum spacings where advantage can be taken of mountain ranges to form a natural protection between stations. The parties referred to testimony on this point presented in the record by Messrs. Goldsmith, Poole, Gillett, Inglis, O'Brien and Harmon. While there is some evidence that intervening mountain ranges may normally reduce television signals, the propagation data available at this time is insufficient to determine the extent to which there may be significant deviations from the normal pattern in such situations. The Commission is, therefore, denying in this proceeding the requests for co-channel separations lower than the minimum between stations separated by mountain ranges. [29]

134. Some of the parties [30] have requested that co-channel assignment spacings be calculated on the basis of proposed transmitter sites as well as on the basis of existing transmitter sites. Such a request confuses assignment spacings with facilities spacings. The purpose of assignment spacings is to determine what channels shall be assigned to individual communities for use by applicants who may seek authorizations for stations in such communities after an assignment has been established. After an assignment has been made it must be capable of being used by any applicant who may succeed in the licensing proceeding. To use the specific transmitter site proposed by an individual petitioner in a rule making proceeding as a reference point in calculating assignment spacings would be to use a site that might in fact never be available to the successful applicant in the licensing proceeding.

135. Further, to permit parties to use specific proposed sites or possible transmitter sites in order to establish that they meet minimum assignment spacing requirements would in effect reduce the minimum assignment spacing requirements. Several parties have, however, attempted to demonstrate that proposed co-channel assignments meet the minimum requirements by offering evidence that they can select a transmitter site that will meet the minimum assignment separation requirements even though the distance between the proper reference point in the community of the proposed assignment and the other city involved is less than the minimum. We cannot permit separations to be reduced by allowing proponents of new assignments to demonstrate in rule making proceedings that they can meet the minimum assignment spacing requirements only by being able to erect a transmitter at a specific site. The manner in which the assignment spacings are measured is important in determining the spacings between stations and the measurements will vary significantly depending on the reference points used. To permit assignments to be made in rule making proceedings on the basis of the measurement of spacings from particular transmitter sites other than the appropriate reference point would result in a reduction of the required assignment spacings. Accordingly, we are denying all requests for the establishment of assignments where the minimum spacings would be measured not from the proper reference point but from possible transmitter sites. [31]

136. The Table of Assignments contained in the Commission's Third Notice permits the use of maximum power at all locations where an assignment was proposed.

---

[26] For example, The Houston Post Company, in its comments, expressly supported the principle that in the Gulf area minimum spacings substantially above the minima in other areas are required. The Houston Post Company advanced the proposal that a specific limitation be made on assignments in this area so that stations operating on the same channel should be separated by 240 miles on Channels 2-6 and by 200 miles on Channels 7-13.

[27] See Paragraphs 70-81 above.

[28] Southern Minnesota Supply Company, Mankato, Minn.; Erie Television Corporation, Erie, Pa.; Airfan Radio Corp., Ltd., San Diego, Calif.; California Inland Broadcasting Co., Fresno, Calif.; Tribune Building Co., Oakland, Calif.; KUGN, Inc., Eugene, Oregon; and Kingsport Broadcasting Co., Kingsport, Tenn.

[29] For the same reasons we have rejected similar proposals for assignments in violation of the minimum separations where other than co-channel spacings are involved.

[30] See footnote 22 above.

[31] For the same reasons we have rejected similar proposals for assignments in violation of the minimum separations where other than co-channel spacings are involved.

A number of parties[32] contend that it would be possible to provide additional assignments in many locations if the stations at such localities were limited to power less than the maxima. For example, it is stated that if two stations serving small communities operate with minimum power they could be located as close as 73 miles co-channel and 19 and 25 miles adjacent channel for Channels 2-6 and 7-13, respectively, while at the same time receiving the same grade of protection offered by a separation of 180 miles shown in the Commission's standards. The parties accordingly have requested that the Commission provide for additional assignments at reduced power where such assignments will not cause interference greater than would exist under the prescribed minimum spacings.

137. The Commission does not believe that limited power stations should be provided for in the Table of Assignments at this time in order to squeeze in additional assignments. The effect of low power combined with close spacing is to reduce the interference-free coverage area of such stations, thus providing a sharply limited service. In the example cited above of two stations operating with minimum power (1 kw effective radiated power) and separated 73 miles co-channel, the interference-free Grade A service would be confined to 11 miles and the Grade B service to 14 miles. Further, the proposals for low power stations are all based upon operation of the co-channel stations with an antenna height of 500 feet. As the antenna heights of co-channel stations increase, the service area of the lower powered stations would decrease.

138. Further, these proposals rest on the implicit assumption that where interference is not caused to the Grade A service of a station, the minimum separations may be reduced below the standards adopted by the Commission. The television Assignment Table and the Rules with respect to television, however, recognize no protected contours. Rather they are based on the concept of affording each station the widest coverage possible consistent with an efficient utilization of the spectrum and the satisfaction of the needs of the various cities and communities in the United States. The Commission in considering grades of service in this proceeding has utilized the principle of iso-service contours. Basic to this principle is a recognition of the fact that, even though "objectionable interference" may not be caused in any contour, an inevitable degradation of service occurs. We have above discussed at length the basis for the separations we have established. The proposals here cannot be accepted because they are contrary to the basis upon which the co-channel separation requirements have been established.

139. Also to be considered is the safety factor we have previously mentioned. If we should find at a later date the interference which stations may suffer is greater than we have predicted upon the basis of available data, generally only Grade B service will suffer whereas the impact on Grade A service will be little, if any. Moreover, power could then be reduced if it were decided that the interference should be reduced. But in the case of stations operating with lower power at reduced separations it would be more difficult to further reduce power and the service that would generally suffer would be Grade A service.

140. Accordingly, the Commission finds that it must deny the requests of the parties seeking additional assignments where such assignments would require operation at less than the maximum powers specified in this Report.

141. In establishing the co-channel assignment spacing requirements set out above, we have considered carefully the comments and evidence of all the parties who have requested assignments at spacings below the minima adopted herein. Insofar as we have reduced the minimum assignment spacing in Zone I from that proposed in the Third Notice, the requests of certain of the parties for reduced minimum assignment spacings have been granted. We find, however, no adequate basis on the record for granting any of the other requests for reduced minimum spacings and we have found no convincing reason to deviate from our minimum assignment spacings in acting on any specific counter-proposal in this proceeding.

142. The following is a summary of the minimum co-channel assignment spacings provided for herein:

	VHF	UHF
Zone I	170 miles	155 miles
Zone II	190 miles	175 miles
Zone III	220 miles	205 miles

Classes of Stations: Powers and Antenna Height

143. In the Third Notice, the Commission stated:

> The Commission's Notice of Further Proposed Rule Making issued July 11, 1949, provided for three classes of stations, i.e. community, metropolitan and rural stations. During the hearings on the General Issues relatively little comment was offered concerning the proposed classifications. In reviewing this proposal, the Commission has concluded that it is desirable to reduce station classifications to a minimum and that more than one class of station is unnecessary if provision is made for appropriate power ranges for the various sizes of cities and rural areas. Accordingly, only one class of television broadcast station is proposed, with provision for minimum and maximum effective radiated powers in accordance with the respective tables set forth below:
>
> (1) Minimum Power

Population of city (excludes adjacent metropolitan areas):	Minimum effective radiated power[1] (in db above 1 kw)
Above 1,000,000	17 db/500 ft. Ant.
250,000-1,000,000	10 db/500 ft. Ant.
50,000-250,000	3 db/500 ft. Ant.
Under 50,000	0 db/300 ft. Ant.

[1] Or equivalent, based on the same Grade A service radius as with these values of effective radiated power and antenna height above average terrain. A chart showing this relationship is attached to Appendix B and identified as Appendix IV. No minimum antenna height is specified. However, wherever feasible, high antennae should be used to provide improved service.

> (2) Maximum power. The maximum effective radiated power to be authorized on the respective channels is set forth in the following table:

Channels	Maximum effective radiated power (in db above 1 kw)
2-6	20 db/500 ft. ant.
7-13	23 db/500 ft. ant.
14-83	23 db/500 ft. ant.

144. No one has objected to the Commission's proposal to establish only one class of station and to permit any station to operate on any channel, consistent with the Rules and standards. Some comments have been received with respect to operation with lower powers where the minimum mileage separations provided for in the Rules cannot be met. These comments have been considered above in another portion of this Report and the requests have been denied for the reasons set forth. The Commission is, therefore, finalizing its proposal to have only one class of station.

145. No comments were received with respect to the Commission's proposal concerning minimum power. Generally, we believe we should adhere to the proposal made in the Third Notice. It is a fact, however, that with very low effective radiated powers the service areas of television stations are extremely limited. Accordingly, we have provided in our Rules that no television station shall in any case operate with less than 1 kw effective radiated power. As so modified the proposal in the Third Notice with respect to minimum power is adopted.

146. Several comments have been received relating to the Commission's proposal with respect to maximum power for television stations. Radio Kentucky, Inc., and Radio Virginia, Inc., both oppose the granting of further power in the VHF above the maximum presently provided for in the Rules. The reason for this position appears to be a desire not to increase the disparity of coverage between the VHF and UHF. Havens and Martin opposes this proposal to limit power and subscribes to the Commission's proposal for an increase in existing power limits in the VHF. A. Earl Cullum's comment refers to his testimony relating power to frequencies in order to obtain comparable coverage. The frequencies involved on Channels 7 through 13 are approximately three times the frequencies involved on Channels 2 through 6, and the UHF channels allocated to television are approximately three times the frequencies on Channels 7 through 13. Cullum contends that in both of these cases the maximum power for the higher channels should be three times that of the lower channels and that putting a limit of 200 kw (23 dbk)[33] on the power to be used on Channels 7 through 13, and 14 through 83 is unfair to those who wish to use these channels in competition with assignments made on Channels 2 through 6. James C. McNary filed a comment in which he stated that an amplifier tube with 25 kw was feasible on the UHF. Such a tube it was stated would provide a radiated power of 400 kw (26 dbk). McNary, therefore, recommends that provision be made for the use, on an individual basis, of power in excess of 23 dbk on Channels 14 through 83. Pacific Video Pioneers also proposes that the maximum power limitation of 23 dbk (200 kw) on Channels 14-83 be liberalized to permit single stations to increase to 26 dbk (400 kw) on a showing that objectionable interference will not be caused to other assignments using 23 dbk (200 kw) at 500 feet and to permit horizontal increases in power by two or more stations. On the other hand, RCA-NBC, and Communications Measurements Laboratories, Inc., support the Commission's proposal.

147. On the basis of the record it appears that the Grade B coverage of the television channels decreases as the frequency involved increases. Considering first the power relationship between Channels 2-6 and Channels 7-13 the propagation charts in the record establish that, assuming operation at 500 feet and the maximum powers proposed in the Third Notice, the Grade A service extends to 33 miles on Channels 7-13 as compared to 27 miles on Channels 2-6.[34] However, in the case of Grade B service and where the only limiting factor is noise the service on Channels 2-6 extends 57 miles compared to 50 miles on Channels 7-13, based on the same powers and antenna heights. In view of this disparity with respect to Grade B service there was considerable testimony in the record favoring a three-fold differential in power between Channels 2-6 and Channels 7-13 rather than the powers proposed by the Commission.

148. The arguments described above are somewhat misleading since the prediction of service areas is made in all cases on the basis of noise limitations only. Co-channel operation is, however, a substantial factor in the determination of the effects of permitting an increase in power such as is requested here by the parties. For example, at 170 mile station spacing, with maximum power as specified under the Third Notice and 500 feet antenna height, the Grade B service of a station operating on Channels 2-6 or 7-13 would extend 41 miles and 47.5 miles, respectively, in the direction of a co-channel station. These coverages are related to the station separation and would be unchanged by the same increase in power of

[32] Pennsylvania Broadcasting Company, Philadelphia, Pa.; Southeastern Broadcasting Company, Macon, Ga.; Middle Georgia Broadcasting Company, Macon, Ga.; The Brockway Company, Watertown, N. Y.; Hampton Roads Broadcasting Corp., Norfolk, Va.; Jacksonville Broadcasting Company, Jacksonville, Fla.; Loyola University of the South, New Orleans, La.; The Gazette Company, Cedar Rapids, Iowa; Telegraph Herald, Dubuque, Iowa; Kingsport Broadcasting Company, Kingsport, Tenn.; Michigan State College, East Lansing, Mich.; Hartford Times, Inc., Hartford, Conn.; Travelers Broadcasting Service Corp., Hartford, Conn.; Southern Minnesota Supply Company, Mankato, Minn., and Indiana Technical College, Fort Wayne, Indiana.

[33] As used herein "dbk" signifies power in decibels above one kilowatt.

[34] See in this connection our discussion above of the manner of prediction of service areas and interference.

all stations on the same channel. However, in other directions, assuming noise as the only limiting factor, such stations would furnish Grade B service as far as 57 miles and 50 miles, respectively, for the channels stated. Similarly, at 200 mile spacing with stations on the same channel operating with the same power and antenna height, the Grade B service of a station would extend 47 miles and 50 miles for Channels 2-6 and Channels 7-13, respectively, in the direction of a co-channel station, and 57 miles and 50 miles, respectively, in other directions. The latter distances for both examples could be increased by an increase in power of all stations on the same channel. Thus, although co-channel operation will be determinative of Grade B coverage in some areas, in many other areas an increase in power for stations operating on Channels 7-13 can effectively increase the Grade B service range and more nearly equalize the potential coverage of such stations with those operating on Channels 2-6. Even in those areas where the specified grades of service are determined by mutual station interference, the use of higher power will improve the service by helping to overcome other types of interference, such as receiver noise. This results in increased coverage efficiency and a more effective utilization of the spectrum space involved. In reviewing the comments that have been filed and the whole record in this proceeding, the Commission has, therefore, concluded that an additional 2 db should be permitted on Channels 7-13 providing for a total maximum power of 25 dbk (316 kw). Where noise is the only limiting factor, this increase will add approximately 3 miles to both the Grade A and Grade B service areas of Channels 7-13.[35]

149. Similar considerations are involved in establishing maximum power limitations in the UHF. According to the median field strength requirements, Channels 2-6 require 68 dbu[36] for Grade A service and the UHF channels require 74 dbu. Since both the low VHF and UHF areas are, pursuant to this Report to be computed from the same 63 megacycle curves and considering noise to be the only limiting factor, it is obvious that the UHF must have an additional 6 db to obtain the same Grade A service area. Likewise the median field strength required for Grade B service is 47 dbu and 64 dbu for Channels 2-6 and the UHF respectively. Hence an increase of 17 db would be necessary in the UHF to equalize the Grade B service areas where noise is the only limiting factor. The same considerations which impelled the increase in the maximum power on Channels 7-13 to 25 dbk (316 kw) impel an increase in the maximum UHF power to 30 dbk (1000 kw). This increase will extend the Grade A and Grade B service areas of stations operating with 500 feet antennas to 32 miles and 47 miles, respectively, where noise is the only limiting factor. In establishing this maximum power for the UHF, we recognize that these powers may not be immediately attainable, but we believe, on the basis of the record, that provision should be made for such an increase since we are confident that developments in the art will achieve such powers.

150. The maximum radiated power permitted under the Rules adopted herein is tabulated below:

Channels	Effective Radiated Power
2-6	20 dbk (100 kw)
7-13	25 dbk (316 kw)
14-83	30 dbk (1000 kw)

151. In making these increases in power we recognize that not all stations in all communities will operate with such maximum power. Where stations operate with such maximum power the resulting added coverage of the stations will almost always more than offset the decreased service areas of other stations affected. We have, further, by reason of the mileage separations which we have required in the Rules, provided that where such powers are used the service area involved will not be unduly reduced. Accordingly, we believe that the provisions with respect to increased power made herein are required in the public interest in order to provide a more effective use of the portion of the spectrum devoted to television broadcasting.

152. In the Third Notice the Commission stated with respect to antenna heights:

> Any station may be authorized on appropriate application to increase its power to the maximum set forth above without the necessity of a hearing so far as interference to other stations is concerned. The use of antenna heights greater than 500 feet above average terrain is encouraged as a means for improving the quality of service. If an antenna height greater than 500 feet is used, the effective radiated power shall be limited to that value which will avoid interference within the Grade A service radius of any other station, either existing or provided for in the Table of assignments, on the basis of the operation of such station with the maximum power and antenna height of 500 feet as set forth above. Where antenna heights of less than 500 feet are utilized, the effective radiated power shall not exceed that listed above.

153. Several comments have been filed with respect to the application of the proposal in the Third Notice to limit increases in antenna height because of adjacent channel interference. These comments contend that the Commission should not prevent the use of heights above 500 feet because of interference that might be caused to stations operating on adjacent channels. The American Broadcasting Company[37] points out that in the case of WJZ-TV located on the Empire State Building, the power would be restricted under the Third Notice to 15.4 dbk because of the assignments of the adjacent channel to New Haven. ABC proposes that when antenna heights above 500 feet are utilized the limitation on power shall only apply where the Grade A service is invaded by the *co-channel* interference. ABC also points out what appears to be the discontinuity existing in the Commission's proposal between antenna heights of 500 feet and those above 500 feet. ABC cites the case of two adjacent channel stations in the Channel 7-13 range with transmitters separated by 60 miles. Under the proposal in the Third Notice, both stations would be permitted to use powers of 23 dbk at 500 feet antenna height even though both stations would suffer a reduction in area of 31 square miles within their Grade A contours. If, however, one of the stations used, for example, an antenna height of 505 feet through choice or necessity, application of the proposed rule would result in reduction of the power of this station to approximately 19.5 dbk and the service area would be reduced from 3,220 to 2,465 square miles, a loss of 23%. ABC contends further that the proposal is inconsistent with other Commission proposals which encourage high antennas wherever feasible both to increase service and reduce interference. It also contends that the gain in service area by increasing the antenna height of one of the stations is much greater than the loss of service area to the adjacent channel station which has not changed its height. General Teleradio, Inc., took a position similar to that of ABC.

154. The Allen B. DuMont Laboratories, Inc., also notes the alleged discontinuity in the power/height proposal and suggests that the rule might be amended to permit both the affected stations to agree to increase power simultaneously. A. Earl Cullum's comments that the proposed power/height rule is a good general allocation principle provided it is tested by *co-channel* conditions. If the proposed rule is adopted, he claims, it would discourage rather than encourage the use of taller antennas. Cullum further states that the rule would place an arbitrary requirement in the Rules and prevent a station from providing additional service. James C. McNary requests that the adjacent channel interference considerations for antennas above 500 feet on certain channels should be clarified. Earle C. Anthony, Inc., recommends that —6 db[38] rather than 0 db be used as the permissible adjacent channel ratio.[39] He cites testimony of Thomas Goldsmith and William Lodge to substantiate a —6 db ratio.

155. Although several parties subscribed to the Commission's Third Notice in toto and thus by implication were on record as favoring the adjacent channel ratio and power-height relationship, none of these parties singled this item out for specific comment. Elm City Broadcasting Corporation (WNHC-TV), New Haven, Connecticut, filed comments opposing the comments of ABC, Inc., and General Teleradio, Inc. The comments of WNHC-TV are based on its particular situation with regard to possible adjacent channel interference from WJZ-TV and WOR-TV with WNHC-TV operating on Channel 8. It is contended that it would be unfair to limit the service areas of stations receiving adjacent channel interference from other stations utilizing particularly high antennas beyond the extent contemplated in the Third Notice.

156. The record clearly supports the use of greater antenna heights where possible to achieve maximum channel utilization. However, the existence in some cases of a small amount of adjacent channel interference would, if the proposal in the Third Notice is adhered to, prevent the accomplishment of the very objective which is sought. In fact the parties point out a discontinuity in the heights and power, which would exist under the Third Notice proposal. The parties, therefore, proposed to remove this limitation and would provide for the acceptance of a small amount of adjacent channel interference over and above that originally contemplated. The record shows that this small amount of interference is minor when compared with the accompanying gain in service and consequently should not prevent acceptance of the parties' proposal, particularly since adjacent channel interference is susceptible to treatment by technical expedients and at the most results in a substitution of one service for another in so far as the listener is concerned.

157. Adjacent channel interference has not been a severe problem in the past and it appears that it is not costly to provide additional adjacent channel selectivity in receivers if necessary. We believe the record supports a 0 db adjacent channel interference ratio. On this basis the rules with respect to adjacent channel mileage separations will not unduly reduce service areas of individual stations. Accordingly, we have deleted from the Rules adopted herein any provisions which would prevent the use of higher antennas because of adjacent channel interference that would be caused to other stations.

158. The Commission has also given further consideration to the use of antenna heights above 500 feet. As we have pointed out the record clearly supports a policy of the encouragement of increased antenna heights. The record contains detailed engineering studies showing that increased antenna heights are much more advantageous than increased power. It is shown that the ratio of service area gained to service area lost by other stations increases with antenna height. It has also been shown that a given increase in radiated power is more effective with higher antenna heights than it is with an antenna height of 200-500 feet. When two stations are operating co-channel and one station is allowed to increase its antenna height greatly in excess of the other, the increase in area covered by the first station will greatly exceed the loss in service to the second station. If the two stations do not change antenna heights, but the first station increases power, the area gained by

[35] We believe that the Radio Kentucky and Radio Virginia requests must be denied. The record clearly requires us to raise the existing limits on power in the VHF in order to achieve an efficient use of the spectrum.

[36] As used herein "dbu" signifies field strengths in decibels above one microvolt per meter.

[37] The situation involving KECA-TV, the ABC station in Los Angeles, and KFMB-TV, San Diego is discussed separately below.

[38] As used herein adjacent channel interference ratio signifies the ratio of median desired and undesired field strengths.

[39] Lynchburg Broadcasting Corp., Lynchburg, Virginia; KTTV, Inc., Los Angeles, California, and KMTR Radio Corp., Los Angeles, California all propose an adjacent channel interference ratio of -6 db.

that station is still greater than than lost by the second station but the effect is not as pronounced as is the case where the antenna height is increased. Again it should be emphasized that in all cases the service areas are not unduly reduced when the minimum spacings are maintained.

159. Accordingly, in order to achieve a more efficient utilization of each television channel we are modifying the provisions with respect to the use of antennas over 500 feet to specify that in Zones II and III where wider station separations have been maintained in the Table[40], antennas will be authorized in the VHF up to heights of 2000 feet, with maximum power, without regard to co-channel interference that will be caused by such operation with the greater antenna height. In Zone I[41] we have provided that VHF stations may use antennas up to a height of 1000 feet, with maximum power. In view of the fact that station separations in this Zone are lower than in Zones II and III, and in view of the fact that cities in Zone I are more closely located than cities in Zones II and III, until a larger body of data is available with respect to operation with antenna heights over 1000 feet with higher powers, we are unable to permit operation with such powers at heights over 1000 feet. The rules we have adopted with respect to antenna heights in the VHF constitute no substantive modification of the proposal in the Third Notice. Stations in the VHF, under the Third Notice proposal, would have been entitled to operate with antenna heights of 2000 feet since at these heights there would be no interference to Grade A service to co-channel operations, assuming co-channel operation at maximum power and an antenna height of 500 feet (as was done in the Third Notice).

160. In the UHF we have provided in our Rules that stations may operate at full power in all Zones, with antennas up to a height of 2000 feet, without regard to co-channel interference that will be caused by such operation with the greater antenna height. We have provided no special rule with respect to Zone I in view of the fact that UHF stations will not be able to operate with maximum effective radiated power for some time to come. We recognize that, in the UHF, loss of Grade A service of a co-channel station operating with maximum power (30 dbk) and an antenna height of 500 feet would be caused by another station operating on the same channel with 2000 feet and one megawatt power where the co-channel separation was less than 183 miles. We feel, however, that any loss of Grade A service that is caused by operation with such greater antenna heights and maximum power should be permitted in view of the added service gained.

161. Our choice of a 2000 foot antenna height limit is based, mainly, on the fact that the propagation data in the record at heights over 2000 feet is extrapolated from data obtained under 2000 feet. Moreover, relatively few stations are now or will in the near future be operating at heights over 2000 feet, and these are primarily in areas where greater co-channel separation has been maintained. Where the height is above the 2000 foot maximum we have provided a chart in the Rules which permits operation with less than maximum power but which nevertheless gains some of the benefits afforded by sites over 2000 feet. We encourage interested individuals and licensees to conduct propagation tests to determine the effect of operation with high powers and antenna heights over 2000 feet. When such data becomes available the Commission will consider appropriate changes in the chart established for the determination of power where antenna heights over 2000 feet are used.

162. In Zone I where the greatest permissible VHF antenna height with maximum power is 1000 feet, higher antenna heights will be permitted but only with appropriate reductions in power. A chart has been included in the Rules to make possible the determination of the power that will be permitted at any antenna height over 1000 feet. It will be noted that we have maintained the power ratio of 3.16 to 1 between powers to be employed on Channels 2-6 and 7-13.

163. There remains for consideration the comment of the American Broadcasting Company which requests that KECA-TV, owned and operated by ABC on Channel 7 in Los Angeles, be permitted to operate with maximum power on top of Mount Wilson. ABC requests that the Commission's Rules authorize operation with maximum power even at heights such as that on top of Mount Wilson. If such operation is not permitted as a matter of general rule, ABC requests that an exception be made in the case of KECA-TV. Opposition to this request has been filed by the Kennedy Broadcasting Company which owns and operates KFMB-TV on Channel 8 in San Diego, California. KFMB-TV is located 106 miles from KECA-TV. KECA-TV has an antenna height of 3040 feet above average terrain and an antenna height of 4987 feet in the direction of KFMB-TV. The basis of Kennedy's opposition is that operation at maximum power on top of Mount Wilson will cause excessive interference to operation of KFMB-TV, especially in view of what is alleged to be unusual propagation characteristics prevalent in that area by way of the proposphere.

164. We have above decided that VHF stations in Zones II and III will have a right to operate with maximum power with antenna heights up to 2000 feet above average terrain and that at heights above 2000 feet, a special chart shall be used to determine maximum power. It is to be noted that KECA-TV would be permitted to operate with the maximum power of 21.9 dbk (155 kw) at its present location on Mount Wilson. No special circumstances are presented which would warrant a special rule in the case of KECA-TV. Nor do we believe that the Commission should adopt any special rules at this time to afford protection against adjacent channel interference when one of the stations is operating with an antenna height over 2000 feet at the maximum powers provided for in the special chart. With particular reference to the KECA-TV—KFMB-TV situation, we do not believe that KECA-TV operating with the maximum power permitted will cause excessive interference to the operation of KFMB-TV in San Diego. At a later time when more extensive propagation data is available with respect to operation with higher powers at antenna heights over 2000 feet, we will be in a position to re-examine problems of a general nature or relating solely to specific communities, that are created by adjacent channel interference. Such examination will be made in the light of further data which will then be available with respect to receiver selectivity characteristics.

165. In establishing Rules with respect to power and antenna height we have considered the effect of our action on the development of the UHF. We are unable to conclude that Rules adopted herein will prevent the fullest development of this new and valuable portion of the spectrum. We believe that under these circumstances it is clearly in the public interest to make the most efficient use of both the VHF and the UHF by providing for the use of antennas and powers that will permit the listening public to receive the most and the best service possible.

Adjacent Channel Separations

166. The Third Notice of Further Proposed Rule Making stated with respect to adjacent channel separations:

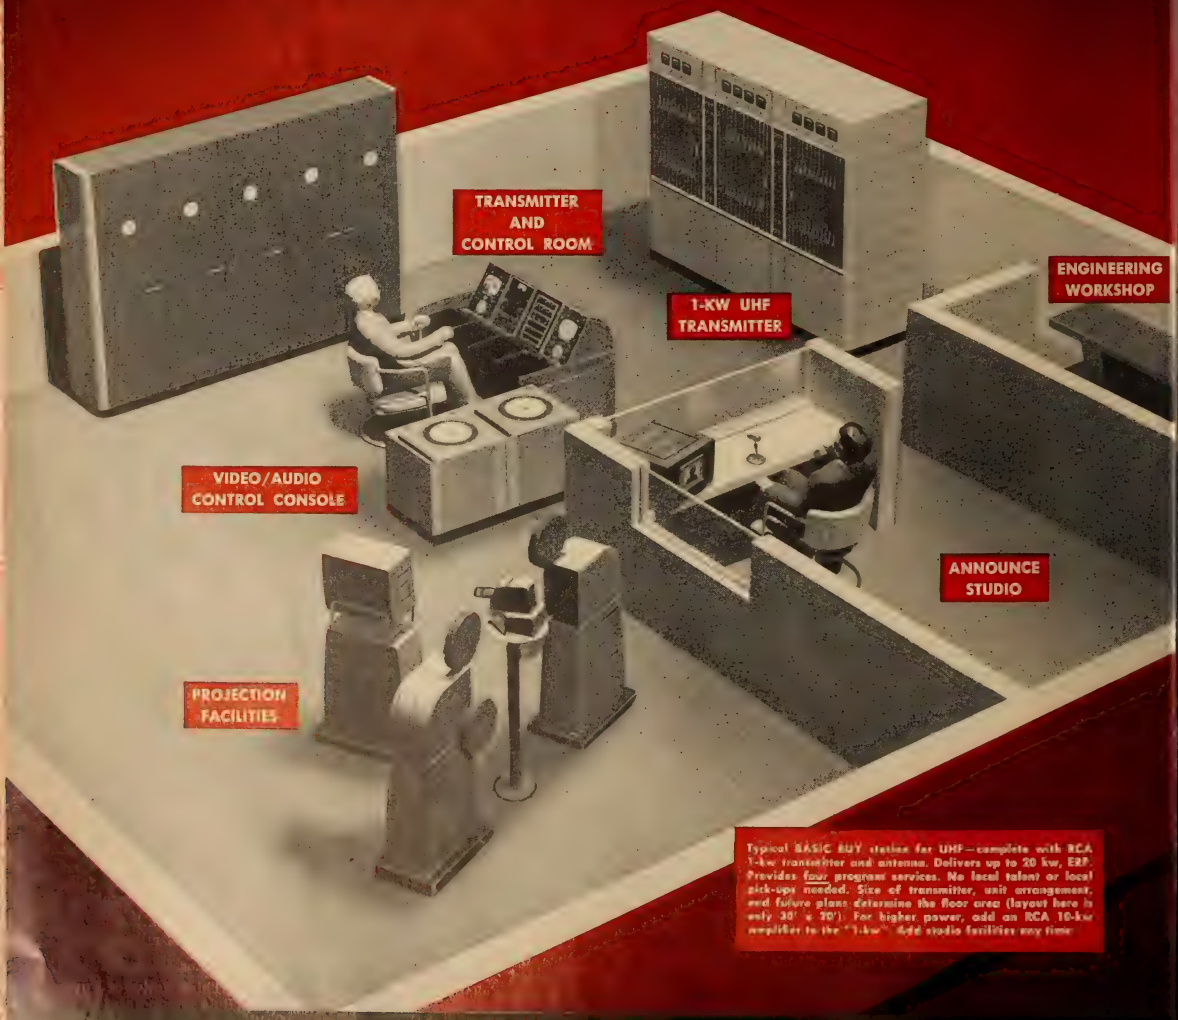
> *Adjacent Channel Separation.* Under the present television standards, objectionable adjacent channel interference results when the ratio of the desired to the undesired signal falls below 6 db. The Commission's proposals of July 11, 1949, did not recommend any change in this ratio. Considerable data presented to the commission indicate that this ratio is too conservative and that it could be 0 db or —6 db. In general adjacent channel interference has not been of a serious nature and such problems as do exist can be solved to a very considerable extent by improvements in receiver design which are neither difficult nor costly. Experience has shown that many receivers are giving satisfactory adjacent channel performance in areas where interference is predicted under the present standards.
>
> The Commission's proposals of July 11, 1949, provided for a normal adjacent channel separation of 110 miles in the VHF band and 100 miles in the UHF band—one-half the distance provided for the normal co-channel separations. Since adjacent channel interference is so readily subject to being controlled by adequate design and production methods by manufacturers, the Commission believes that adjacent channel separations should be reduced, thus making possible a greater number of assignments. The Commission is of the opinion that these separations should be based upon receiver performance which may reasonably be expected of manufacturers and not on the characteristics of the poorer receivers. Separations have been based on the assumption of receivers having an adjacent channel rejection ratio of —6 db. Thus a median field strength ratio of 0 db should provide service from one station or the other at each receiver location for at least 90 percent of the time, irrespective of signal fading. The Table of Assignments has been based upon an adjacent channel separation between cities of 70 miles for Channels 2-13 and 65 miles for Channels 14-83. The separations between transmitters are 60 miles for Channels 2-13 and 55 miles for Channels 14-83.

167. For the reasons stated above, we have deleted from the Rules adopted herein any limitation on the use of antenna heights based upon adjacent channel interference. Under these circumstances we are of the opinion that we have no need of specifying in our Rules a definite ratio of desired to undesired field strengths on adjacent channels. The adjacent channel separations provided for herein will not unduly reduce the service area of individual stations. We have, therefore, eliminated all reference to adjacent channel ratios and we have provided that the minimum mileage separation requirements should alone govern spacing of adjacent channel stations.

168. The Commission's Third Notice stated that the proposed Table of Assignments was based on minimum adjacent channel separations between cities of 70 miles for Channels 2-13 and 65 miles for Channels 14-83. We have lowered the minimum co-channel assignment spacing requirements in Zone 1 to 170 miles in the VHF and to 155 miles in the UHF. We, therefore, believe that the minimum adjacent channel assignment spacing requirements should be reduced proportionately to 60 miles in the VHF and 55 miles in the UHF. Moreover, we do not believe it necessary to impose higher minimum assignment spacings for adjacent channel operation in the other zones. Excessive tropospheric propagation has no relation to adjacent channel spacings since the effects of such propagation are felt at long distances from the transmitter rather than at relatively close distances. Accordingly, the reasons for treating Zone III differently from the rest of the country do not obtain in the case of adjacent channel spacings. Further, we do not believe we should have higher adjacent channel spacings in Zone II than we have provided for in Zone I. As we have pointed out, high minimum assignment spacings tend to decrease the number of assignments that may be made. In the case of co-channel spacings it is necessary to establish higher minima since in Zones II and III people in the rural areas tend to rely on service from stations relatively far away. But in the case of adjacent channel interference the listener does not suffer unduly. He will continue to receive one of the two potential services. In view of this fact, the minimum adjacent separations may be the same for the whole country and the following minima have been established:

VHF 60 miles
UHF 55 miles

Oscillator Radiation



169. The Third Notice of Further Proposed Rule Making stated:

> Oscillator Radiation—(a) VHF. The Commission's proposed

[40] For a description of Zones II and III, see Paragraphs 117-126 above.

[41] For a description of Zone I see Paragraphs 117-126 above.

RCA's TV "Basic"

Typical BASIC BUY station for UHF—complete with RCA 1-kw transmitter and antenna. Delivers up to 20 kw, ERP. Provides four program services. No local talent or local pick-ups needed. Size of transmitter, unit arrangement, and future plans determine the floor area (layout here is only 30' x 20'). For higher power, add an RCA 10-kw amplifier to the "1-kw." Add studio facilities any time.

Buy" does the most

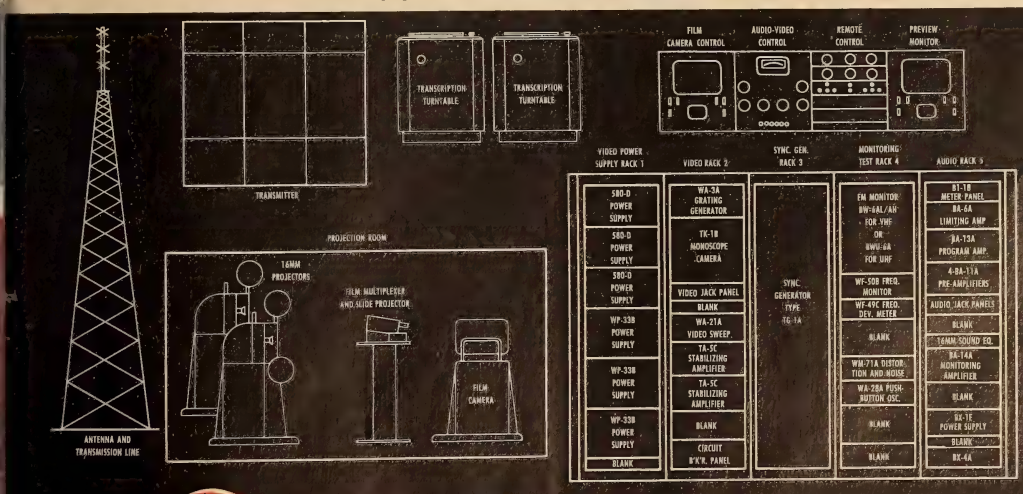
-with the least TV equipment

-VHF or UHF!

4 PROGRAM SERVICES

—no local studios needed!

- **Network programs**
- **Local films (16mm)**
- **"Stills" from local slide projector**
- **Test pattern from monoscope (including individualized station pattern in custom-built tube)**



THIS PICTURE ILLUSTRATES what we think is the minimum equipment a TV station should have to start with—*and earn an income.* The arrangement can handle any TV show received from the network and provides station identification and locally inserted commercials as required. In addition, it offers an independent source of revenue—by including film and slide facilities for handling local film shows and spots, or network shows on kine recordings.

The BASIC BUY includes: A transmitter and an antenna (necessary for any TV station); monitoring equipment (required by FCC); film and slide equipment (for local programs—and extra income); monoscope camera for reproducing a test pattern of known quality (important for good station operation and as an aid to receiver adjustment); and a control console that saves operator time and effort (it enables one technical man to run the station during nearly all "on-air" periods).

RCA's BASIC BUY can be used in combination with any RCA TV transmitter and antenna, of any power—VHF or UHF. Matched design and appearance make it easy to add facilities any time (you need never discard one unit of a basic package). And note this: *RCA BASIC UNITS ARE IDENTICAL TO THE RCA UNITS USED IN THE BIGGEST TV STATIONS!*

RCA's BASIC BUY is already being adopted by many TV station planners. Let your RCA Sales Representative work out a flexible package like this for you—show you how to do the most with the least equipment!

This is what the BASIC BUY includes!

RADIO CORPORATION of AMERICA

ENGINEERING PRODUCTS DEPARTMENT CAMDEN, N.J.

Table of television channel assignments set forth in its Notice of Further Proposed Rule Making, issued on July 11, 1949, did not take into account the effects of receiver oscillator radiation on assignments in the VHF or UHF band. Evidence has been presented to the Commission concerning interference caused to receivers as a result of the use of a 21 mc. I.F. by manufacturers of receiving sets. In order to avoid such interference, Radio-Television Manufacturers Association has adopted as standard an I.F. of 41.25 mc in the VHF and UHF bands. No oscillator radiation problems are involved for these VHF receivers so far as television stations operating in the VHF is concerned. Because of the large number of television receivers now in use employing the 21 mc I.F., efforts have been made to minimize such interference without reducing the number of VHF assignments in the proposed table.

(b) UHF. There was general agreement at the above hearings that oscillator radiation is likely to be more severe in the UHF band than in the VHF band, due to the difficulty in suppressing such radiation in the higher frequencies. Further, because of the wide span of the UHF band it is not possible to place the oscillator outside the band and still employ an I.F. which is practical in the present state of the art.

Evidence was offered concerning a method of dealing with the oscillator radiation problem based on the "fold in" principle. It was proposed to divide the UHF band into four equal parts; to employ the lower and upper quarters for most assignments; to confine all oscillator radiation within the two center quarters; and to employ an I.F. of 111 mc. The Commission believes that the use of an I.F. of 111 mc. in television receivers is not feasible at this time. Existing tubes and those available in the foreseeable future will not permit adequate amplification with a reasonable number of I.F. stages. The use of the proposed I.F. will reduce adjacent channel selectivity. Further, setting up one-half of the UHF band as a repository for oscillator radiation would provide little incentive for receiver manufacturers to reduce such radiation. Accordingly, the "fold in" principle has not been adopted in preparing the proposed Table.

Although the Commission expects that continued improvements may eliminate the problem of oscillator radiation in the future, it does not appear practicable to expect such receivers in the near future.[70] Hence, the UHF table has taken into account the standard I.F. of 41.25 mc. adopted by the RTMA. Thus, stations in the UHF which are 7 channels apart are required to have their transmitters separated by a minimum of 60 miles. This separation affords substantially the same protection as does the co-channel separation provided for above.

[70] This same observation is also applicable to intermodulation, image interference and I.F. beat problems discussed below.

170. Communications Measurements Laboratories, Inc., proponent of the fold-in principle described above, objected to the proposal made in the Third Notice. In its objection, CML reiterates its position with regard to the "fold-in" principle. Upon full consideration of the record and the objections of CML, the Commission is still of the opinion that the views of CML are not sufficiently substantiated, either theoretically or by test, to provide assurance that an intermediate frequency in the 111 mc. range is currently practical. For this reason and for the reasons set out in the Third Notice, it is concluded that the Table of UHF Assignments should not be based on the "fold-in" principle. It is concluded further that there is inadequate evidence to support the establishment of an assignment Table on the basis of an intermediate frequency other than 41.25 mc. Accordingly, the proposals with respect to oscillator radiation made in the Third Notice are now finalized and stations in the UHF which are 7 channels apart are required to be separated by 60 miles. In view of the nature of the interference, different spacings are not necessary in the different Zones which have been established in connection with co-channel assignment spacings. A similar observation pertains to intermodulation, image interference and I.F. beat problems discussed below.[42]

171. The separations established herein to protect against oscillator radiation are based on the principle of non-overlapping Grade A service areas of stations 7 channels apart, so that receivers within the Grade A service area of one such station would not normally be tuned to receive service from the other station which would not be as good in qaulity. This arrangement reduces the probability of local oscillator interference within the Grade A areas of the respective stations. Since this protection is not absolute and is confined primarily to the Grade A service areas, it remains of utmost importance that continuing efforts be made to reduce the magnitude of local oscillator radiation in UHF receivers. It should also be emphasized that the success of separation requirements which recognize oscillator radiation and spurious responses depends on general industry adherence to the basic premises i.e. use of the standard I.F. of 41.25 mc. and fundamental oscillator operation. It would appear that the manufacturing industry has a direct responsibility to the set-purchasing public to avoid the harmful consequences of deviation from this protective standard. It would be unfortunate if the manufacturing industry or an appreciable portion thereof were to use different standards without adequate suppression measures. In this event, the Commission will of necessity be faced with the need for a re-examination of the problem to determine what more effective measures may be necessary to avoid the harmful consequences to the public.

Image Interference

172. The Third Notice of Further Proposed Rule Making stated:

Image interference (picture and sound). Image interference has raised no problems in the VHF band since a signal from another television station removed from the desired channel by twice the I.F. does not normally fall in another television channel. In the UHF band, however, where there is a large number of contiguous channels, image interference is expected to present interference problems. No allowance was made for this factor in the Commission's proposed table of July 11, 1949. The record indicates that image rejection of 30 to 40 db can be provided by UHF receivers of reasonably good design which employ a 41.25 I.F. There was general agreement that image interference should be avoided in making channel assignments. Accordingly, a minimum separation of 75 miles is provided between transmitters where UHF stations are separated by 15 channels to provide against picture image interference, and a minimum separation of 60 miles between transmitters where UHF stations are separated by 14 channels to provide protection against sound image interference. This separation provides substantially the same protection to the picture of a desired station as does the co-channel separation provided for above. A slightly smaller separation is provided for in the case of the sound image than the picture image because of the lesser interfering effect of the former.

173. There were no oppositions to the Commission's proposal in this regard, with the exception of Communications Measurements Laboratories, whose counterproposal has been previously discussed and rejected. Since the separation to minimize image interference is based on the intermediate frequency of 41.25 mc. and since the CML comments on image interference are based on a 111 mc. I.F., which has previously been rejected, the CML comment with respect to image interference need not be given further consideration. For the reasons set out above the proposal with respect to image interference is adopted and a minimum spacing of 75 miles is maintained between UHF stations separated by 15 channels to provide against picture image interference and a minimum separation of 60 miles is maintained between UHF stations separated by 14 channels to provide against sound image interference.

I.F. Beat

174. The Third Notice of Further Proposed Rule Making stated:

I.F. Beat. It is recognized that when two stations in a city are separated by an I.F. it is possible that the two signals will combine to provide a beat signal which will be picked up by the I.F. Amplifier. Where a 41.25 mc. I.F. is in use, such signals may exist in channels which are separated by seven or eight channels from the desired station. The effect is similar to that of intermodulation. As indicated above the seven channel separation is taken care of by the separation which is used to avoid oscillator interference. Accordingly, stations in the UHF band which are separated by eight channels are required to have a minimum separation of 20 miles between transmitters.

There were no oppositions to this proposal. For the reasons set out above, the proposal with respect to I.F. beat is adopted, and UHF stations separated by 8 channels are required to be separated by 20 miles.

Intermodulation

175. The Third Notice of Further Proposed Rule Making stated:

Intermodulation. The Commission's proposed table of July 11, 1949, did not take into consideration the effects of intermodulation. Although interference resulting from intermodulation has not been a problem in the VHF band, it is generally agreed that intermodulation is likely to be a more serious problem in the UHF band. Various arrangements have been proposed for reducing intermodulation such as a staggered arrangement of channels, or by wide frequency separation. Testimony in the record indicates that a three or four channel separation would serve an adequate protection against intermodulation. The Commission has concluded that the best method of avoiding problems of intermodulation is to use a normal minimum separation of six channels in a city, thus allowing for a desirable safety factor. There is general agreement that a distance separation of 15 to 20 miles is sufficient to provide protection against intermodulation since sufficiently high field intensities from two to more stations would not normally exist at any point between stations so separated. Accordingly, in preparing the UHF assignments in the attached Table, stations closer than 20 miles have not been assigned channels less than six channels apart.

176. With regard to intermodulation, DuMont filed a comment which stated:

> The Commission's finding that "the best method of avoiding problems of intermodulation is to use a normal separation of six channels in a city, thus allowing for a desirable safety factor" applicable to UHF allocation would appear to be incorrect. Intermodulation results from the assignment of three stations to a city with an even two-channel jump between stations (Tr. 13449-13451). For example, the assignment of Channels 14, 16 and 18 to the same city would cause intermodulation, but 14, 16 and 19 would not result in interference (Tr. 13449).
>
> Recommendation. A separation of 20 miles between channels which cause intermodulation interference is recommended. The restriction of assignment of frequencies less than six channels apart which do not cause interference should be eliminated as wasteful of spectrum.

177. DuMont is in error in confining its consideration of intermodulation to three stations. It is easily shown, from the testimony in the record, that third order intermodulation produced by the combination of only *two* signals

[42] It should be pointed out that the separation requirements imposed to protect against oscillator radiation, intermodulation, images and I.F. beats do not provide for protection against interference of the above character which is caused by radio services operating outside the television band.

can occur in the UHF TV band. This type of intermodulation produces spurious signals on frequencies (fx) which can be computed as follows:

$$fx = 2fa - fb$$

where fa is the frequency of one station and fb is the frequency of the other station. This formula produces two values of fx, as each station is represented by fa and fb, respectively. These spurious signals could cause harmful interference to reception of stations even outside the 20 miles protection separation.

178. DuMont erroneously confines its consideration of intermodulation to stations assigned with a "two-channel jump." Although, other factors being equal, the intensity of the spurious signals produced by intermodulation tends to decrease as the frequency separation between stations is increased, intermodulation does not abruptly disappear at any particular value of frequency separation. DuMont therefore errs in stating that Channels 14, 16 and 19, assigned in the same city, would not result in interference. As is shown in the following example, the sound carrier of Channel 16 and the picture carrier of Channel 14 can produce a spurious signal due to intermodulation which falls within Channel 19 and cause interference. Similarly, the picture carrier of Channel 19 and the sound carrier of Channel 16 can combine to produce a spurious signal due to intermodulation which can cause interference to Channel 14.

Example:

Channel 14: 470-476 mc.; Channel 16: 482-488 mc.; Channel 19; 500-506 mc. Let the sound carrier of Channel 16, 487.75 mc., be f_a and the picture carrier of Channel 14; 471.25 be f_b. Then from the formula above ($f_x = 2f_a - f_b$):

$f_x = 2(487.75) - 471.25 = 504.25$ mc.,

which falls within and can cause interference to Channel 19.

Similarly if f_a be the sound carrier of Channel 16, 487.75 mc., and f_b be the picture carrier of Channel 19, 501.25 mc.,

$f_x = 2(487.75) - 501.25 = 474.25$ mc.,

which falls within and can cause interference to Channel 14.

It is also apparent from the foregoing example that it is necessary to take into account the channel spread of each spurious signal due to intermodulation. Each third order intermodulation combination produced by television signals having a 6 mc. channel width results in a potential spurious signal covering a channel width three times as great, or 18 mc. Thus, when stations are assigned Channels 14 and 16, intermodulation produces spurious signals on Channels 17, 18 and 19—not merely on Channel 18 as assumed by DuMont.

179. Except for the DuMont comments, there was no opposition to the Commission's proposal with regard to intermodulation. In view of the foregoing, it is concluded that the Commission's proposal concerning intermodulation should not be changed and that UHF stations separated by less than six channels should be separated by at least 20 miles.

Multiple Interference

180. The Third Notice stated with respect to multiple interference:

> In preparing the Table of Assignments, a study was made of several cases of multiple interference involving relatively uniform co-channel station separations in congested areas. This study based on information and data presently available, indicates that the grade A service areas obtained with the maximum powers as specified above are not infringed by combined interference from more than one signal when non-directional receiving antennas are assumed to be used. Moreover, if receiving antennas are assumed to have 6 db rejection in the directions of the undesired stations, the multiple interference under these conditions is not expected to exceed the single station case where no receiving antenna directivity is assumed. Thus, it appears that interference from more than one station may be accounted for satisfactorily by plotting a composite interference-limited contour on the basis of the most severe limitation in each direction due to any single interfering station. This approximation appears to be sufficiently accurate for the purpose of determining station separations and power limitations. Accordingly, it is proposed that interference from each station will be determined on an individual basis and that calculation of the effects of multiple interference will not be required.

181. No objections to this proposal have been received. Accordingly, the proposal has been followed in this proceeding.

Facilities Spacing

182. We have above discussed the difference between assignment spacing requirements and facilities spacing requirements and have also described the manner in which such spacings will be measured. In the Third Notice it was provided that minimum facilities spacings would be 10 miles less than minimum assignment spacings. A number of parties[49] have objected to the fact that the minimum assignment requirements proposed in the Third Notice were higher than the minimum facilities spacings requirements. We believe upon consideration of the whole record and comments in this proceeding that minimum facilities spacing requirements should be the same as minimum assignment spacing requirements. The reason stated in the Third Notice for lower minimum facilities spacings was to provide flexibility in the location of transmitters and in order to give communities within 15 miles of a city an opportunity to take advantage of the 15 mile rule. Upon reconsideration of this matter we believe that the advantages of such flexibility are more than counter balanced by the inconsistencies which would arise from having rules under which minimum facilities spacing requirements would be lower than minimum assignment spacing requirements. For under such rules, a petitioner seeking an assignment, in a rule making proceeding, could not secure an assignment where by proper measurement to an existing transmitter the proposal satisfied the lower facilities spacing requirements but did not satisfy the higher assignment spacing requirements. Accordingly, in the Rules adopted herein we have made all minimum facilities spacing requirements identical with minimum assignment spacing requirements.

[49] See footnote 22 above.

Offset Carrier

183. In the Third Notice the Commission stated with respect to offset carrier:

> The Commission's proposals of July 11, 1949, did not provide for the use of offset carrier operation either in the VHF or UHF band. Testimony presented at the hearing on the General Issues in the proceedings herein substantially favored offset operation and tests have indicated that such operation resulted in an improvement of approximately 17 db over non-offset carrier operation. A survey conducted by the Joint Technical Advisory Committee of stations engaged in offset carrier operations indicates practically unanimous support therefor. Although a question has been raised concerning possible frequency stability of transmitters used in these operations, it appears that this problem is not serious and that frequency stability can be provided which will insure adequate and proper offset carrier operations. Accordingly, the Commission has concluded that separations should be based upon stations employing offset carrier operation. When these rules are adopted as final, the Commission will specify the exact frequency to be utilized by each station for offset carrier operation. In the VHF band, stations will be offset from each other by plus or minus 10 kc and 1 kc tolerance will be specified. Similar requirements will be applied to UHF stations, but the specific values will be determined at a later date.

184. James C. McNary has filed a comment which states the following:

> The operation of offset carrier transmitters in the UHF portion of the spectrum, in particular, will require development of new frequency control apparatus, and will probably require continual monitoring of this apparatus from a central frequency standard, such as WWV, to maintain satisfactory operation. The continual monitoring believed to be required may be facilitated by appropriate choice of channel frequencies. For example, specifying the video carrier frequency to be an integral multiple of 1 megacycle may assist materially in simplifying the frequency control equipment. If the video carrier frequency is so specified, the sound carrier frequency and the frequencies defining the limits of the channel would have to be shifted from what would otherwise be their normal operation, if the established channel characteristics are to be maintained. The recommendation is therefore respectfully made that the specification of UHF channel frequencies be deferred until after an informal engineering conference to determine best system procedure. No specific page or exhibit in the transcript relates to this item.

185. We recognize that the adoption at this time of the Table of Assignments on the basis that all channels start on frequencies with integral numbers creates a situation whereby the video carrier of each UHF, as well as each VHF channel, is placed on a fractional number. We feel, however, that there is no evidence in the record to support Mr. McNary's position that it is more difficult to achieve satisfactory stability of monitoring equipment when operating with video carriers whose frequencies are fractional numbers than when the frequencies are integral numbers. No evidence was received in the record on this point from either Mr. McNary or any other person. Further, exact integral frequency operation could not be conducted in the majority of cases in any event since two of every three stations operating with offset carrier would have to operate on frequencies with fractional numbers. Despite the fact that many manufacturers were parties to this proceeding, Mr. McNary's problem was not raised at all. In addition it would appear that little, if any, additional equipment is required to maintain satisfactory stability of monitoring equipment when operating with quarter megacycle as compared with integral megacycle steps. Further, the evidence expressly established that equipment will be available for operation with offset carrier in the UHF. For this reason we are finalizing our proposal for the use of offset carrier in the UHF without further proceedings.

186. With the exception of James C. McNary's comments, no objections were filed to the use of offset carrier as proposed. RCA-NBC in its comment has supported the Commission's proposal.

187. In the Third Notice the Commission set specific tolerances for the use of offset carrier in the VHF and stated that similar requirements will be applied to UHF stations. The Third Notice, however, did not provide specific values in the case of UHF stations. Upon examination of the record we have determined that the tolerances with respect to the use of offset carrier should be the same both in the UHF and VHF. Accordingly, in the UHF band stations will be offset from each other by plus or minus 10 kc and 1 kc tolerance will be specified. With this addition the Commission's proposal with respect to offset carrier operation is being finalized.

188. Inasmuch as a considerable period of time will be required to work out offset frequencies for the assignment plan, such designations are not being made at this time but will be forthcoming at an early date. The licenses of existing stations will be modified in accordance with the designations that will be made and a transition period will be provided for in which existing stations may commence operation with offset carrier. A delay with respect to the establishment of specifications should have no effect on applications that may be filed by licensees or new applicants since the exact carrier frequencies for any particular channel do not become important until shortly before commencement of operation with offset carrier.

Intermixture of VHF and UHF Channels

189. In the Third Notice, the Commission said with respect to the intermixture of VHF and UHF Channels:

> The Commission's proposed table of July 11, 1949, was based to a considerable degree on the assignment of VHF and UHF channels in the same city. During the hearing on the General Issues, it was urged by some witnesses that the elimination of intermixture would simplify receiver problems and would minimize the broadcasters' competitive problems. It was argued that intermixture would tend to deter the construction of UHF stations and that until a large number of VHF-UHF receivers were distributed, such UHF stations as were constructed would have difficulty in surviving. On the other hand, many witnesses favored intermixture on the ground that it was impracticable to avoid it; that UHF stations would be constructed in cities located within the service areas of VHF stations and television viewers would expect their sets to receive both signals; and that receiver manufacturers would be obliged to build combination VHF-UHF receivers for such areas.
>
> It is reasonable to assume that economic problems will be faced by UHF broadcasters in areas where VHF broadcasting exists. Similar problems confronted the VHF broadcasters prior to increased receiver distribution in their respective areas. It is reasonable to assume that if the entire UHF band is allocated for regular television broadcasting, television receivers will be built to receive VHF and UHF signals. If intermixture were avoided, it would be necessary to limit many areas to one or two VHF stations even though UHF assignments were available for those areas and additional stations could be supported financially. Moreover, VHF stations are capable of providing a greater coverage than UHF stations. Hence, a more extensive television service is made available where some VHF assignments are made in as many communities as possible than where only VHF assignments are made in some communities and only UHF assignments are made in other communities. The Commission has concluded that the adoption of an assignment table based on non-intermixture constitutes a short-term view of the problem and is inadvisable. Accordingly, the proposed table attached herein has been prepared on the basis of intermixture of VHF and UHF channels.

190. Pursuant to Paragraph 12 of the Third Notice several of the parties object to or raise questions with respect to the intermixture of VHF and UHF channels in individual cities. These objections and questions are treated in the city-by-city portion of this Report. Mercer Broadcasting Company, Trenton, New Jersey, Lehigh Valley Television, Inc., Allentown, Pennsylvania, Radio Wisconsin, Inc., Madison, Wisconsin and Presque Isle Broadcasting Company, Erie, Pennsylvania, filed comments in which they contend that the intermixture of UHF and VHF is contrary to the public interest because they are not and may never be truly competitive services. Based on this allegation, these parties propose that all commercial television stations should be assigned to the UHF. This proposal has been considered in another portion of this Report. In so far as the comments of Mercer and Lehigh Valley relate to the application of Section 307(b) of the Communications Act they are treated below in further detail.

191. DuMont Laboratories, Inc., filed a comment which objects to the manner in which the Commission has applied the intermixture principle in its Assignment Table. It is to be noted in this regard that DuMont's own alternative assignment plan went very far in accepting intermixture in practice. The basis of DuMont's objection to the use of the intermixture principle in the Commission's Assignment Table is the effect that wide dispersal of VHF channels has on the number of VHF channels available to the large cities. Accordingly, DuMont's objection to the application of the intermixture principle in the Commission's assignment plan relates basically to matters that have been considered above in connection with the discussion of the DuMont nationwide assignment plan.

192. On the basis of the comments that have been received pursuant to Paragraphs 11 and 12 of the Third Notice, the Commission is not persuaded that its decision with respect to intermixture of VHF and UHF channels set out in the Third Notice was in error. With particular reference to the comments of DuMont, the Commission cannot subscribe to an assignment plan which in order to assign 4 VHF channels to as many large cities as possible disregards other important objectives. We have above considered the merits of DuMont's objections to the basic principles underlying the Commission's assignment plan. Our dismissal of these objections foreclose the adoption of DuMont's approach to the intermixture problem.

193. Related to the intermixture problem are objections to the Commission's proposed Table, on the ground that it did not provide for a separate and distinct assignment of VHF and UHF channels. These parties[44] contend that because of distinctions which exist between channels in the VHF and UHF band, the Commission is required to assign VHF and UHF channels separately, in order to satisfy the requirements of Section 307(b) of the Communications Act, which provides:

> In considering applications for licenses, and modifications and renewals thereof, when and in so far as there is demand for the same, the Commission shall make such distribution of licenses, frequencies, hours of operation, and of power among the several States and communities as to provide a fair, efficient and equitable distribution of radio service to each of the same.

194. At the outset it should be stated that we agree with the contention of the parties in so far as they claim that the Commission should disperse both VHF and UHF widely among states and communities. The Assignment Table proposed in the Third Notice and the Assignment Table adopted herein make a wide dispersal of both VHF and UHF channels among the states and communities. We must, however, reject the contention of the parties that Section 307(b) requires the Commission to treat VHF channels as completely different from UHF channels in making an Assignment Table. We think it clear that the fair, efficient and equitable distribution required by the Communications Act has reference to over-all distribution within any given radio service and not with respect to every *type* of station within a service. *Federal Radio Commission* v. *Nelson Brothers Bond and Mortgage Company*, 289 U.S. 266, at 281. In the case of television, stations operating in the UHF and VHF bands, although marked by distinguishing characteristics, will together constitute an integrated television service. We have concluded, therefore, that the requirements of the Act can best be met by an over-all Table of Assignments, which includes within its scope all channels which will be utilized in the television service.[45]

195. In arguing that Section 307(b) of the Communications Act requires the Commission to make separate and distinct assignments of VHF and UHF channels, the parties lay particular stress on the decision of the Court of Appeals in *Easton Publishing Company* v. *Federal Communications Commission*, 85 U.S. App. D.C. 33, 175 F. 2d 344. They contend that since there are admitted differences between VHF and UHF television facilities, as in the case of FM and AM, the holding in the *Easton* case must be construed as requiring the Commission to assign the VHF and UHF facilities independently.

196. The parties' reliance on the Easton decision is misplaced. The Easton decision clearly confirms that the Commission is not bound by a hard and fast rule in achieving the "fair, efficient and equitable distribution of radio service" required by Section 307(b). And the *Easton* case emphasized that the Commission must decide, in the light of the situation before it, what principles of allocation and assignment will achieve the prescribed statutory goal, and that Congress has conferred broad discretion on the Commission to reach that goal, so long as its discretion is exercised within the standards imposed by the statute. See *Federal Communications Commission* v. *Pottsville Broadcasting Co.*, 309 U.S. 134; *Ward* v. *Federal Communications Commission*, 108 F. 2d 486, 491 *Cf. National Broadcasting Company* v. *United States*, 319 U.S. 190, 224; *Radio Corporation of America* v. *United States*, 341 U.S. 412.

197. Because television is in a stage of early development and the additional consideration that the limited number of VHF channels will prevent a nationwide competitive television service from developing wholly within the VHF band, we are convinced that the UHF band will be fully utilized and that UHF stations will eventually compete on a favorable basis with stations in the VHF. The UHF is not faced, as was FM, with a fully matured competing service. In many cases UHF will carry the complete burden of providing television service, while in other areas it will be essential for providing competitive service. In view of these circumstances, we are convinced that stations in the UHF band will constitute an integral part of a single, nationwide television service.

198. With respect to the propagation characteristics of the UHF band, as compared to the VHF, we believe that such differences as exist will prove analogous to those formerly existing between the higher and lower portions of the VHF television band.[46] We are persuaded that the differences in propagation characteristics will not prevent UHF stations from becoming an integral part of a single service.

199. It is alleged that equipment for employing higher power in the UHF band is not available and that it is not known when such equipment will be available. This contention is not supported by the record. There is evidence that it will be possible to operate stations in the UHF band with 400 kw. radiated power by the time that authorizations are issued for such stations. Further, there is no reason to believe that American science will not produce the equipment necessary for the fullest development of the UHF.

200. In any event, it is clear that in formulating an assignment table which will be the basis for the over-all development of television broadcasting in this country, the public interest requires the Commission to take a long-range view of the future of television. Present equipment[47] and economic problems may temporarily handicap operations in the new UHF band and place certain communities at a disadvantage. Such immediate considerations, however, cannot be allowed to obscure the long-range goal of a nationwide competitive television service, in which stations in both the UHF and VHF bands will constitute integral parts. We find that one over-all table of assignments for the television service is best calculated to achieve that goal.

Changes in the Assignment Table

201. In the Third Notice the

[44] These parties are: Easton Publishing Co., licensee of FM Station WBBX, Easton, Pennsylvania, and, on a share-time basis with Lehigh Valley Television Inc., applicant for Channel 8 to serve the Allentown-Bethlehem-Easton metropolitan area; Travelers Broadcasting Service Corp., license of Stations WTIC and WTIC-FM, Hartford, Conn.; and Mercer Broadcasting Co., licensee of FM Station WTCA, Trenton, N. J. Other contentions with respect to the illegality of this Table made by these parties have been discussed in the Commission's Opinion of July 13, 1951 and the contentions made by the parties are rejected for the reasons set out in that Opinion (FCC 51-709).

[45] It is to be noted that some of these parties have not made any specific proposal as to how the channel assignments proposed in the Third Notice should be modified. These same parties have not appeared in the city-by-city portion of the hearing or offered evidence in that portion of the proceeding. In the absence of a specific proposal and evidence relating thereto the Commission is not able to afford them any specific relief.

[46] See the Commission's decision in the Washington television case, Bamberger Broadcasting Service, Inc., 11 FCC 211.

[47] The record before us contains abundant evidence as to the feasibility of adapting existing receivers or building new ones which will be capable of receiving signals on all television channels.

Commission provided that with certain described exceptions no application for a television station in a community specified in the Commission's Table would be accepted for filing if said application requested a channel which was not contained in the Table. Persons desiring to apply for a channel not specified in the Table would first be required to secure an amendment thereof through appropriate rule making proceedings. Upon consideration of the comments and evidence before it the Commission has decided that it is in the public interest to adhere to this principle.[48] See *Yankee Network, Inc.*, 12 FCC 751, 1043.

202. We find that the rule we have adopted is necessary to the proper conduct of our business. With the backlog of applications which will be on file for a period of time to come, the joinder of petitions to amend the Table with individual applications inconsistent with the Table would make unduly complex, if not impossible, the determination of issues presented with respect to the distribution of facilities among the states and cities. As we have described above, the current demand for television facilities which would present conflicting applications in different cities and communities in a multitude of cases can only be decided efficiently and appropriately in a rule making proceeding such as the instant one.

203. Moreover, it should be pointed out that similar procedural rules are in effect not only in the AM radio service but also in many other radio services. For example, the Commission does not permit persons to join a petition to change the AM rules with respect to maximum power or the classification of a channel with an application for facilities with more than the maximum permitted power or for facilities on channels on which such facilities are not permitted to operate pursuant to the Rules or Standards. See *FCC* v. *WJR, The Goodwill Station, Inc.*, 337 U.S. 265, 272; *Pittsburgh Radio Supply House* v. *Federal Communications Commission*, 98 F. 2d 303.

204. In view of the foregoing, we find the public interest requires the establishment of a Rule providing that the Commission will not accept applications for television stations if the channel requested is not specifically provided for in the Table of Assignments.[49]

205. The Third Notice provided that petitioners proposing changes in the Table would be required to show the extent to which the changes conformed to the priorities listed in the Third Notice. We have above discussed the basic principles which have been adhered to in establishing the Table of Assignments. Upon reconsideration, we have decided to omit any requirement that petitions for changes in the Table show the extent to which the changes conform to specific priorities. Each request for a change in the Rules or Table will merely be required to set out with clarity the reasons for the proposed change.

206. Earle C. Anthony, Inc., has requested that petitions requesting changes in the Table be required to establish that such changes comply with minimum separations and other requirements and that the proposed assignment would protect the Grade A service of assignments in the Table based either on the maximum power at 500 feet for such assignments or the actual power and antenna height employed whichever is greater. Clearly, petitions for changes in the Table would have to indicate whether or not they have met the minimum assignment spacing requirements set out in the Rules and if they do not they would have to indicate the reasons for a change in these requirements. We do not, however, believe that the Commission should impose any requirement that persons seeking changes in the Table of Assignments shall have to establish that the proposed change would protect the Grade A service of assignments already made. We have above made clear that the Commission is not basing the Table of Assignments on any theory of protected contours.[50] In establishing the Table we have not provided for any protection to specific contours of existing stations in connection with the grant of individual applications. We have determined that the service areas of television stations and the degree of protection from interference will be determined by the minimum spacing requirements established herein.

207. The Houston Post Company has suggested that "in proposing changes in the Commission's Table of Assignments those areas which receive adjacent channel interference should be given the same consideration with respect to protection from co-channel interference as though the adjacent channel interference did not exist." This proposal must be rejected for the same reason set out above in connection with the disposition of the Earle C. Anthony proposal. Since the Commission has recognized no protected contours, it cannot include in its Rules the provisions proposed by the Houston Post Company.

208. The Tribune Company of Tampa, Florida, and Capital Broadcasting Company of Nashville, Tennessee, have both objected to the requirement that changes in the Table be preceded by rule making. Both of these parties based their objection on the allegation that the Assignment Table is based upon fragmentary propagation data and therefore ought to be as flexible as possible. We have in another part of this Report considered the nature of the propagation data upon which the Assignment Table is established. We recognize the extent to which additional propagation data is desirable. We cannot agree, however, that persons should be permitted to join petitions for rule making, which would propose in effect to change the propagation curves, as a result of propagation theory or data relating to specific areas, with applications for television stations in those areas. We believe the public interest requires that in such cases the parties be required to seek to amend the Rules in appropriate rule making proceedings before the Commission accepts for filing applications for channels.

Time Limitations on Changes in the Assignment Table

209. The Third Notice of Further Proposed Rule Making provided that:

> Upon adoption in the instant proceedings of the Table of Assignments, said Table shall not be subject to amendment on petition for a period of one year from the effective date of the Commission's final order amending said Table. Upon the expiration of said one year period the Commission will consider petitions filed during said period requesting changes in the Table.

210. The provisions that the Table of Assignments shall not be subject to amendment on petition for a period of one year from the effective date of the final order serves a two-fold purpose. First, it will permit the utilization of the Commission's limited personnel for the consideration and processing of the hundreds of applications for television stations which will be on file when processing of such applications commences. Prompt action upon these applications is clearly necessary and desirable in view of the duration of this proceeding since 1948 and the consequent freeze on the establishment of new stations. The second end to be served by this provision is that the the experience gained in the ensuing year in the consideration and processing of applications for new stations will be extremely valuable in the re-evaluation and reconsideration of the Table of Assignments adopted herein and in the disposition of such petitions requesting an amendment of the Table as will be considered after this period.

211. We believe, however, that some exceptions to this rule are appropriate. We will, during the one year period, accept petitions to amend the Table where they request the assignment of a channel to a community without any assignment in the Table and not eligible for an assignment under the 15 mile rule, the assignment of a noncommercial educational channel in any community to which no such assignment is available under the Table or where they request the assignment of a commercial channel to any community listed in the Table to which no commercial assignment has been made. No petition will, however, be entertained within the one year period where the petition proposes a change of any channel, whether by deletion, addition, or substitution or where the minimum assignment separations provided in the Rules would not be met by the proposed assignment. We find that no further rules concerning time limitations with respect to amendment of the Table need be established at this time.

212. Various objections have been made to time limitations on the filing of petitions for amendment of the Table of Assignments. We believe, however, that the time limitations herein adopted are reasonable exercise of the authority given to the Commission by Section 4(j) of the Communications Act to "conduct its proceedings in such manner as will best conduce to the proper dispatch of business and to the ends of justice." *WJR* v. *Federal Communications Commission*, 337 U.S. 265; *Pulitzer Pub. Co.* v. *Federal Communications Commission*, 94 F. 2d 249; *Ward* v. *Federal Communications Commission*, 108 F. 2d 486; *United Detroit Theatres Corp.* v. *Federal Communications Commission*, 178 F. 2d 700. Compare also Sections 1.363(a) and 1.387(b)(3) of the Commission's Rules and Regulations.

213. The Fort Industry Company in its comments has requested that the Commission review any educational reservations made in the Table of Assignments at intervals not in excess of six months and that the Commission require the filing by interested educational organizations of information concerning their progress in establishing non-commercial educational stations in the respective communities in which reservations have been made. As we pointed out earlier, the need for reservation of channels for educational purposes is predicated upon the fact that educational institutions require more time than commercial interests to formulate and implement plans and proposals for the establishment of television stations. Accordingly, a requirement that educational institutions within six months of the final decision and at six month intervals thereafter report their progress in attempting to establish a station is neither desirable nor necessary.

214. The setting aside of channels for non-commercial educational use is precisely the same type of reservation of channels as that provided by the Assignment Table for commercial stations in the various communities, and the two should be governed by the same rules. With respect to changes in the Table the Commission has provided for amendment of the Assignment Table by appropriate rule making proceedings in the Rules herein adopted. Such proceedings will be required for changing the assignment of a channel from one community to another and for changing the status of a channel reserved for non-commercial educational stations to a channel available for commercial applicants.[51]

---

[48] The exceptions referred to in the Third Notice deal first with respect to applications which may be made for Channels 66-83. The principles which will govern the use of these channels have been discussed above. The other exception provided that a channel assigned to a community in the Table of Assignments shall be available, without the necessity of rule making proceedings, to any other community located within 15 miles of the assigned community provided minimum separations are maintained and there is no assignment in the Table for the community concerned. We have finalized this proposal.

[49] WTAG, Inc., Worcester, Mass. has proposed that amendments to the Table be permitted without rule making to make a channel assigned in the Table for a community available to another community which has no comparable assignment provided the minimum separations are maintained. The proposal is made apparently to make it possible for Worcester to receive a VHF assignment. The counterproposal of WTAG, Inc., seeking such an assignment for Worcester in this proceeding has been considered in another part of the Report. The instant proposal must be denied since it is inconsistent with the basic functions and purpose of the Assignment Table.

[50] The Third Notice did propose to limit the antenna heights of stations based on protection of Grade A service of other stations operating at 500 feet with maximum power. We have, however, herein deleted this limitation on the use of high antenna heights.

[51] Before a non-commercial educational station operating on a channel reserved for non-commercial use may apply for a license to permit it to operate commercially, it would by appropriate rule making proceedings be required to petition for a change in the character of the channel assignment involved. It will then have to file an application for a new license, in competition with any others who may seek the channel.

DIRECTIONAL ANTENNAS

215. In the Third Notice the Commission said with respect to Directional Antennas:[52]

There are two aspects to the questions which have been raised concerning the use of directional antennas. In the first place the Commission's rules, regulations and standards do not prohibit the use of directional antennas as such. If a channel is available in any particular community in the Commission's table, a directional antenna may be authorized upon an appropriate showing. Such authorizations have been granted in the past. It should be pointed out, however, that at the time of such grant a channel was available in the existing Assignment Table. The second aspect to the problem concerning directional antennas arises when a request is made that another channel be added in a community by means of a directional antenna. This situation differs from the first one because in this instance no channel assignment is possible unless a directional antenna is employed, that is, the use of a directional antenna is compulsory as a matter of channel assignment. This question was considered by the Commission in 1945 when the first Assignment Table was adopted. At that time the use of directional antennas as a basis for making assignments in the table was rejected by the Commission when a proposal to that effect was offered by the Television Broadcasters Association. In its report of November 21, 1945, the Commission stated, among other things:

"An examination of the T.B.A. proposal reveals that there are several disadvantages in attempting to accomplish this objective by the use of directional antennas. In the first place, the Commission desires to avoid as much as possible the resort to directional antennas for television. With the great increase in civil aviation as a result of the war, it is going to be increasingly difficult to find suitable antenna sites that do not constitute a hazard to air navigation. If directional antennas are used, there is much less flexibility in choosing antenna sites, thus increasing the possibility of conflict with air navigation requirements. Moreover, directional antennas will have to be located away from cities with the result that problems of shadows and multi-path distortion in rendering service to cities will be much greater than where the antenna is located in the city itself—in most instances antennas can be located in the city itself where no directional antenna is required.

"In the second place, the directional Antenna patterns proposed by T. B. A. result in many instances in highly artificial service areas with a good part of the station's signal strength being directed out to sea. Moreover, the service area of the stations using directional antennas would be no larger than that of a community station but such stations would be as expensive to construct and operate as metropolitan stations."

The Commission's proposed table of July 11, 1949, made no provision for the use of directional antennas except with respect to two existing stations. It was pointed out however, that directional transmitting antennas may be useful in certain situations in order that a particular site may be utilized or overall service improved. It was then concluded that directional transmitting antennas would be permitted in appropriate cases for use on channels contained in the Assignment Table, provided that this did not excuse compliance with the service area requirements or permit reduction of basic service areas. It was also indicated that nulls greater than —10 db (compared to the maximum value of radiation) may not be practicable because of reflections. During the hearings on the general issues, limited testimony was presented generally favoring the use of directional antennas principally for the purpose of improving service rather than reducing station separations. Some testimony was offered in favor of the use of directional antennas with nulls greater than —15 db.

The Commission is not satisfied that in the present state of the art, directional antennas are practicable with nulls greater than —10 db; the policy set forth in the Notice of July 11, 1949, is adhered to. If the future available data indicate that the performance of directional transmitting antennas can be properly predicted, particularly in areas where reflections occur, their use of interference protection can be given further consideration.

As indicated, directional antennas may be employed for improving service or for the purpose of using a particular site; they may not be used for the purpose of reducing the minimum station separations set forth in paragraphs II E and G. Where a directional antenna is proposed, the effective radiated power in any direction shall be contained in the range permitted in paragraphs II D (1) and (2), provided that the difference between maximum and minimum radiations shall not exceed 10 db.

216. The Pennsylvania Broadcasting Company objects to the above proposal because it prevents the assignment of Channel 12 to Philadelphia. They request that an exception be made in this one instance to permit the utilization of a directional antenna at Lancaster with a maximum suppression in excess of 10 db, thus providing protection to New York and Washington on Channel 4 and releasing Channel 12 for assignment to Philadelphia. In support of the Philadelphia Broadcasting Company's proposal, E. C. Page filed an engineering statement proposing that in general directional antennas should be allowed in congested areas whereby their use additional VHF channels could be assigned. The Easton Publishing Company also objects to the proposal. They cite previous testimony in the record to support a conclusion that a maximum suppression in excess of 10 db was feasible and that directional antennas were practical for interference protection. Radio Kentucky Inc. objects to the restrictions imposed on the use of VHF directional antennas because it restricts the use of the VHF. A. Earl Cullum Jr., states that previous testimony has proved that a 10 db suppression limitation is unrealistic and will stifle development of directional antennas. He contends that there is no reason why basic antenna patterns should be prohibited regardless of maximum-to-minimum suppression ratio. The Travelers Broadcasting Company advocates changing the Commission's proposal to authorize the assignment of television channels based upon the use of directional antennas in cities where the public interest, convenience and necessity will be served by the utilization of directional antennas. In a supporting engineering statement A. D. Ring & Company showed how a VHF channel could be assigned to Hartford utilizing a suppression ratio of only 2 db at Montpelier which is 172 miles from Hartford.

217. These comments to the Commission's proposal and the evidence in these proceedings raise the following questions: (1) Can directional antennas be constructed with suppression ratios greater than 10 db? (2) Are directional antennas with greater than 10 db suppression impractical in the field due to reflections? (3) Should directional antennas be used for assignment purposes to increase the number of VHF channels? (4) Should directional antennas be used to improve service only where an assignment has already been made in the Table?

218. On the basis of the testimony and the comments outlined above it appears that the record clearly supports the use of directional antennas where such use would result in improved coverage by a station whose assignments was not based upon the use of a directional antenna. But with regard to the use of directional antennas for decreasing mileage spacing to permit assignment of additional channels in the Table of Assignments there were mixed opinions.

219. On the question of the suppression ratio of directionals there seemed to be no doubt that directionals with greater than 10 db suppression could and had been designed and tested. But a main problem centered around the question of whether reflections would destroy the pattern of the directional antenna. All of the testimony relative to reflections was based upon scale model experiments or upon theoretical designs. Two witnesses indicated the possibility of the horizontal pattern being affected by tropospheric propagation which would be a function in part of the vertical directivity pattern. The scale model measurements took no account of this tropospheric reflection. It might appear from Mr. Alfred's and Mr. Godley's testimony that in any particular situation a particular type of antenna could be erected at a particular location to provide a given protection to a given area. There remained unanswered on the basis of the whole record the question of what would happen to the pattern with a given set of tropospheric conditions or by the erection of additional reflecting structures in the vicinity of the antenna. Testimony from expert witnesses recommended caution in establishing standards for directional antennas.

220. In view of the testimony in the whole record the Commission is unable to conclude that even under the most favorable circumstances where reflection tests were made in the field at the proposed antenna site, there would not still remain the problem of reflections from buildings and mountainous terrain. Furthermore such tests would necessarily have to be conducted over a long period of time to determine the tropospheric propagation under all conditions. Where directionals are proposed on the basis of theoretical design or field tests of scale models only, both the horizontal and vertical plane reflections remain unpredictable and in the opinion of the Commission render such proposals too uncertain for decreasing mileage separations so as to permit the assignment of additional channels based upon operation with a directional antenna.

221. Where the use of a directional antenna is solely to increase service the Commission is willing at this time to accept the 10 db ratio as a basis for such a directional antenna. It is clear that reducing the radiation below minus 10 db in the directions of minimum radiation would not appreciably increase the field strength or service range in the directions of maximum radiation. If a directional antenna is not able to operate as proposed, service to the city or community can continue on the basis of non-directional operation. As for suppression ratios in excess of 10 db it is clear that as the nulls become deeper the direct signal in the null direction becomes weaker with reference to ghost signals from reflecting sources which are not exactly in the null direction. Consequently if excessively deep nulls are used, the quality of service may be degraded due to ghost images in addition to the accompanying reduction of service range in the null direction. Until we are assured that these problems will not exist, the Commission is of the opinion that directional antennas with more than 10 db ratio should not be permitted even for the purpose of improving service in a community where an assignment has been made in the Table of Assignments, based on non-directional operation.

222. The Federal Broadcasting System Inc. proposed that the Commission provide for the assignment of "satellite" or "booster" stations by means of the use of directional antennas. The purpose of the proposal would be to allow parties not financially interested in the dominant station to erect and operate a low power television rebroadcast station at a high point

[52] In the Third Notice a directional antenna was defined as one having 3 db or more difference in effective radiated power in the azimuthal directions of minimum and maximum radiation. Upon further consideration of the matter the Commission has determined that, pending the acquisition of additional data on the subject, the Commission will consider television antennas designed to have a nominally circular azimuthal radiation pattern to be non-directional unless the pattern is deliberately altered to produce a non-circular radiation pattern. Antennas designed or altered to have a non-circular radiation pattern will be considered directional antennas.

above communities situated in valleys otherwise out of range of the dominant station.

223. The assignment plan contemplates the use of stations so removed from each other as to serve the greatest number of areas and persons and to keep the areas of interference between stations to a minimum. The indiscriminate use of "booster" or "satellite" stations in cities other than shown in the assignment Table would defeat the aims of the plan. The Commission is of the opinion, however, that there may exist special cases where the carefully controlled utilization of such stations may be beneficial to the plan. However, in view of the absence of adequate data in this record, the Federal Broadcasting System proposal must be denied.

224. In view of the foregoing considerations and the considerations discussed in the Third Notice, it is our conclusion that:

(1) Directional antennas may not be used for the purpose of reducing the minimum mileage separation requirements.
(2) Directional antennas with a ratio of minimum to maximum radiation in the horizontal plane of more than 10 decibels will not be permitted.
(3) The minimum effective radiated power in any horizontal direction shall meet the minimum power requirements of the Commission's Rules.
(4) The effective radiated power in any horizontal or vertical direction may not exceed the maximum values permitted by the Commission's Rules.
(5) The maximum effective radiated power in any direction above the horizon shall be as low as the state of the art permits and may not exceed the effective radiated power in the horizontal direction in the same vertical plane.

STRATOVISION OR POLYCASTING

225. The Third Notice stated with respect to stratovision:

> The Commission's proposed table of July 11, 1949 did not provide channels for stations operating in accordance with the stratovision method of television broadcasting utilizing airborne transmitters. The Commission afforded interested persons an opportunity of presenting evidence on this point. Only one party presented evidence in support of stratovision. From the evidence offered it appears that five UHF channels would supply about 81 percent of the area of the United States with one signal. Two of the five channels would be used as guard bands. Consequently, in order to supply all areas of the United States with 4 services about 20 channels would be required. This figure does not include the channels which would have to be added in order to provide proper protection between stratovision stations and ground stations in the light of the separations required to avoid oscillator radiation image interference, or I. F. beats. The studies presented at the hearing did not include these factors.
>
> The Commission appreciates that stratovision, if feasible, would be a most useful instrument in providing service to the sparsely settled areas of the country. Indeed, many areas of the country can undoubtedly receive service only from wide area coverage stations, such as stratovision would provide. The Commission, however, does not believe that channels should be assigned to stratovision at this time. As can be seen from an examination of Appendix C, it is not possible to assign television channels to many important communities and other communities have an inadequate number of assignments. This situation occurs when relatively close separations are utilized based upon ground-located transmitters. With the much wider separations that air-borne transmitters would require, the problem of providing a fair, efficient, and equitable allocation of television facilities to the various communities would be aggravated. The demands for television service require that all available channels be assigned for proven ground-station operations, particularly when no substantial demand was shown for air-borne transmitters. However, as indicated above proposed Channels 66 through 83 have not been assigned to particular communities but are flexibility channels, which may be used for various purposes, including further stratovision experimentation. The door remains open for further consideration of this proposal by the Commission if it can be shown that stratovision can operate successfully within the above flexibility channels, without causing interference to ground-based stations operating on Channels 14 through 65.

226. The Third Notice stated with respect to Polycasting:

> Evidence in support of this proposal was presented by one witness who advocated the principle of using a number of low-power transmitters on one or more channels in the UHF band instead of attempting to cover a large area with a centrally located high-power transmitter. He expressed the belief that his proposed system would result in improved service at lower cost and was the only feasible method whereby stations in the UHF band could serve large areas. It was contemplated, for example, that four transmitters could be located in as many directions to give service to a large city with the north and south transmitters operating on one frequency and east and west transmitters operating on another frequency; by using directional receiving antennas and taking advantage of the wide variations in signal intensity over a small area there would be adequate rejection of the undersired co-channel signal. The use of FM was favored for polycasting to improve the ability to reject the undesired signal.
>
> No evidence was presented concerning previous or existing operations carried on in accordance with the above proposals and the Commission has no information that such operations have been conducted. It appears that the proposed system has never been field tested and hence an adequate determination as to its feasibility cannot be reached at the present time. To devise an assignment table at this time which would provide for polycasting in many areas would be impractical and unwarranted since such an undertaking would require prior knowledge of the number, location and power of the various stations in a city. Further, it would involve consideration of possible interference such as oscillator radiation, image interference and intermodulation not only between stations in a city but between stations in adjacent areas. Accordingly, the attached proposed table does not contain assignments of channels for stations to operate under the polycasting system on a commercial basis. Further experimentation concerning polycasting can be carried on in the flexibility channels.

227. No specific comments directed to the subject of polycasting or stratovision were received in response to the Third Notice. Accordingly, the Commission's proposal not to make an allocation or assignment for stratovision or polycasting is now made final.

228. The Commission stated in the Third Notice that experimentation could be carried on with respect to stratovision and polycasting in the 782-890 Mc. band. We have in another portion of this Report considered the use of the channels in this band. It appears that the demand for these channels will be very great and that the extent to which they may be used in any one area is severely limited considering the demand that probably will exist. The Commission will consider requests for experimentation with respect to stratovision or polycasting in the 782-890 Mc. band. It seems clear, however, that in certain areas of the country, for example, the New England area, it will be impossible to establish a regular stratovision or polycasting service in this band. According, all persons interested in stratovision or polycasting are urged to give consideration to the demand for these television channels in making plans for further experimentation with these forms of broadcasting.

INTERNATIONAL CONSIDERATIONS

229. In establishing a Table of Assignments for the United States, consideration must be given to the patent fact that television signals do not respect international boundaries. Accordingly, neither the United States, Canada, nor Mexico can assign television channels as if these countries are isolated entities. If each country were to exercise its sovereign authority to assign television channels from the radio spectrum without regard to the interests of its neighboring countries, all the countries would suffer. For, while viewers in certain sectors of each country would not be directly affected by such action, those residing in the border areas might, as a consequence of the unrestricted interference that would doubtless ensue, be totally deprived of television service. The urgent necessity for an understanding between the United States and Canada, and the United States and Mexico, relating to the employment of television channels along our mutual borders is therefore manifest. Such agreements provide the only means for the effectuation of a fair, efficient and equitable distribution of television channels among the United States, Canada and Mexico.

230. In recognition of the foregoing, the Commission set forth in Appendix D of the Third Notice certain assignments for Canada and Mexico which might be made on the same basis as the overall Table if the borders between the countries did not exist.[53] It was pointed out that a series of conferences had been held with representatives of the Canadian and Mexican Governments, but that formal agreements had not at that time been entered into. It was noted, however, that views were being exchanged and that it was expected satisfactory understandings would be reached.[54]

231. In assigning television channels, Canada, Mexico and the United States, all employ somewhat different assignment policies in order to satisfy the viewpoints and interests of the respective countries. It is apparent, therefore, that in effectuating international agreements, the assignment policies employed in relation to domestic assignments could not be utilized in all instances. For example, Mexico, as a matter of allocation policy, is not employing channels in the UHF portion of the spectrum for television. Similarly, assignment separations must be maintained between some cities in the United States and Canada, and the United States and Mexico, above the minimum separation requirements for the pertinent zones in the United States. However, these across the border separations are necessary in order to comply with the internal requirements of Canada and Mexico and in light of the necessity for reaching an understanding with Canada and Mexico. Accordingly, while in some instances assignments proposed by the parties could have been accomplished in conformity with minimum separations for the appropriate United States zone, such proposals have not been adopted herein where they were deemed insufficient by Canada and Mexico and an agreement with respect to the proposed assignments could not therefore be reached. It

---

[53] Appendix D contained both VHF and UHF assignments for Canada but only VHF assignments for Mexico. Since Mexico does not in the foreseeable future contemplate employing channels in the UHF portion of the spectrum for television, rapport with respect to the assignment of UHF channels along the Mexican-United States border is not necessary at this time.

[54] The Third Notice also proposed to change the frequency assignments of the following existing stations in an effort to arrive at an equitable distribution of television channels between the United States and Canada:

Station	City	Present Channel	Proposed Channel
WXEL	Cleveland, Ohio	9	8
WHAM-TV	Rochester, N.Y.	6	5
WSYR-TV	Syracuse, N.Y.	5	3

As is explained more fully elsewhere in this Report, no objections to these proposed channel shifts have been raised by the stations involved.

should be pointed out that Canada, as a matter of domestic policy, desires service created by large station separations and desires to protect fringe area service to achieve maximum service from each operating station.

232. Comments filed in this proceeding with respect to specific city-by-city channel assignments were submitted in light of the international considerations described in the Third Notice. After the filing of such comments, further conferences and negotiations were conducted with Canada and Mexico. Each comment affected by international considerations[55] has been carefully considered by the Commission. Furthermore, each such comment which in the judgment of the Commission should not be denied for purely domestic reasons has been taken into account in the conferences and negotiations with Canada and Mexico held since the issuance of the Third Notice. As a result of such further conferences and negotiations, an Agreement has been entered into with Mexico concerning, among other things, the channel assignments for communities in the border areas of the respective countries.[56] With Canada, complete agreement has been arrived at between the administrative authorities concerned though formal confirmation by governments has not yet been given.

233. The channel assignments worked out in negotiations with Canada and Mexico with respect to communities in the border areas have been reflected in the Assignment Table adopted herein. The conferences and negotiations with Canada and Mexico have been carried on over a period of years. Such conferences and negotiations were conducted under the auspices of the State Department with the continued technical advice and assistance of this Commission. Moreover, as noted above, the comments filed in this proceeding have been taken into account in the course of these conferences and negotiations. We believe that the channel assignments prescribed in the Mexican Agreement and those which will be prescribed in the proposed agreement with Canada reflect the best assignments for the border areas that may be established in light of the problems presented. Accordingly, we believe that the distribution of assignments made thereunder should be followed pursuant to our duty to distribute service to the people of the United States in accordance with the public interest.

CANADIAN-UNITED STATES TELEVISION ASSIGNMENTS

234. As pointed out above, the administrative authorities of the United States and Canada have agreed on the channel assignments to be prescribed for communities within 250 miles of the Canadian-United States border.

235. In the conferences and negotiations conducted with Canada, agreement for the assignment of all channels requested by counterproposals filed in this proceeding could not be reached for the reasons set forth above. We have made no assignments herein requested in any counterproposal where such assignments would be inconsistent with and in violation of the terms which have been agreed upon for inclusion in the proposed agreement with Canada. Following is a list of those counterproposals which are denied in light of the proposed agreement. Certain of these counterproposals, as is noted elsewhere in this Report, must also be denied for domestic reasons:

Party	Counterproposal	Separations and assignments concerning which agreement with Canada could not be reached
The Brockway Co., Watertown, N. Y. (1)	Add Channel 11 to Watertown, N. Y. by substituting Channel 5 for Channel 11 in Ottawa-Hull, Ont., Canada.	Channel 11 at Watertown would be 174 miles from the co-channel assignment at Toronto; and Channel 5 at Ottawa-Hull would be 179 miles from the co-channel assignment at Rochester.
The Brockway Company, Watertown, N. Y. (2)	Add Channel 11 to Watertown, N. Y. by substituting Channel 7 for Channel 11 in Ottawa-Hull, Ont., Canada; Channel 8 for Channel 7 in Montreal-Verdun, Que., Canada; Channel 11 for Channel 13 in Hamilton, Ont., Canada; and Channel 13 for Channel 11 in Toronto, Ont., Canada.	Channel 8 in Montreal-Verdun would be 195 miles from the co-channel assignment in Lewiston, Maine. Channel 8 in Montreal-Verdun would also create an oscillator radiation problem since Channel 12 is assigned to that community. Channel 13 at Toronto would be 187 miles from the co-channel assignment at Pembroke, Ont. Channel 13 at Toronto would also create an oscillator radiation problem since Channel 9 is assigned to that community. Channel 11 at Hamilton would be 72 miles from the adjacent channel assignment (10) in London, Ont.
WAGE, Inc., Syracuse, N. Y.	Add Channel 11 to Syracuse, N. Y. and Channel 11 to Pembroke, Ont., Canada, by substituting Channel 11 for Channel 13 in Hamilton, Ont., Canada; Channel 13 for Channel 11 in Toronto, Ont., Canada; and Channel 5 for Channel 11 in Ottawa-Hull, Ont., Canada.	Channel 11 at Syracuse would be 188 miles from the co-channel assignment suggested for Hamilton, Ont., Canada. Channel 11 at Hamilton, as suggested, would be 72 miles from the adjacent channel assignment (10) at London, Ont., Canada. Channel 13 at Toronto would be 187 miles from the co-channel assignment at Pembroke, Ont., Canada. Channel 13 at Toronto would also create an oscillator radiation problem since Channel 9 is assigned to that community. Channel 5 in Ottawa-Hull as suggested would be 183 miles from the co-channel assignment in Rochester, N. Y., Channel 11 at Pembroke would be 187 miles from the co-channel assignment in Toronto.
Corning Leader, Inc., Corning, New York	Assign Channel 9 to Corning, N. Y.	Channel 9 at Corning would be 159 miles from the co-channel assignment at Toronto.
Buffalo Courier Express, Inc., WGR Broadcasting Corp., and WKBW, Inc., Buffalo, New York	Add Channel 9 to Buffalo, N. Y. by substituting Channel 8 for Channel 9 in Toronto, Ont., Canada; Channel 3 for Channel 8 in Owen Sound, Ont., Canada; and Channel 12 for Channel 3 in Orillia, Ont., Canada.	Channel 8 in Toronto would be 169 miles from the co-channel assignment at Syracuse, N. Y. Channel 8 in Toronto would be 59 miles from the adjacent channel assignment (9) as suggested for Buffalo. Channel 12 in Orillia would be 177 miles from that assignment listed in the Third Notice for Erie, Pa. Channel 12 in Orillia would be 65 miles from the adjacent channel assignment (11) in Toronto.
WBVP, Inc. Beaver Falls, Pa.	Add Channel 16 to Beaver Falls, Pa.	Channel 16 at Beaver Falls would be 168 miles from the co-channel assignment at Brantford, Ont., Canada.
The Trebit Corporation, Flint, Mich.	Add Channel 10 to Flint, Mich. by substituting UHF Channels 43 and 65 for VHF Channel 10 in London, Ont., Canada.	Deletion of VHF Channel 10 from London. Channel 10 at Flint would be 61 miles from the adjacent channel assignment (Channel 9) in Windsor, Ont. Channel 43 at New London would be 163 miles from the co-channel assignment at Butler, Pa.
Michigan State College, East Lansing, Mich.	Add Channel 10 to East Lansing, Mich.	Channel 10 at East Lansing would be 164 miles from the co-channel assignment listed in the Third Notice for London, Ont., Canada.
Booth Radio and Television Stations, Inc., Detroit, Mich.	(In part) Add Channel 9 to Detroit, Mich. by substituting UHF Channel 50 for VHF Channel 9 in Windsor, Ont., Canada, and deleting Channel 50 from Detroit.	Deletion of VHF Channel 9 from Windsor, Ont., Canada.
WJR, Inc., Detroit, Mich. (1)	Add Channel 6 to Detroit, Mich., by substituting Channel 10 in Lansing, Mich., for Channel 6.	Channel 10 in Lansing would be 169 miles from the co-channel assignment in London, Ont., Canada. Channel 6 at Detroit would be 205 miles from the co-channel assignment at Toronto, Ont., Canada.
(2)	Add Channel 22 to Detroit, Mich., by substituting Channel 18 for Channel 60 in East Lansing, Mich.; Channel 46 for Channel 22 in Flint, Mich.; Channel 60 for Channel 18 in Ludington, Mich.; and Channel 37 for Channel 45 in Cadillac, Mich.	Channel 18 in East Lansing, Mich., would be 164 miles from the co-channel assignment in London, Ont., Canada. Channel 46 at Flint would be 61 miles from the assignment of Channel 32 at Windsor, Ont., Canada.
Central Willamette Broadcasting Company, Albany, Oregon.	Add Channel 4 to Albany, Ore.; Channel 11 to Eugene, Ore.; Channel 3 to Longview Wash.; Channel 12 to Bellingham, Wash.; and Channels 2 and 6 to Seattle, Wash., by deleting channel 5 from Seattle and Channel 12 from Chilliwack, B. C., Canada, and by substituting Channel 8 for Channel 4 in Medford, Ore., Channel 10 for Channel 11 in Yreka, Calif.; Channel 2 for Channel 3 in Salem, Ore., Channel 5 for Channel 6 in Portland, Ore.; Channel 5 for Channel 2 in Victoria, B. C., Canada; and Channel 3 for Channel 6 in Vancouver, B. C. Canada. Central Willamette suggested that Channel 12 could be replaced in Chilliwack by assigning Channel 3 to that community in place of Vancouver, or by assigning an additional UHF channel to Chilliwack.	Channel 5 in Victoria would be 200 miles from the suggested co-channel assignment in Portland. Channel 3 at Vancouver would be 212 miles from the co-channel assignment suggested for Longview. Channel 5 at Victoria would be 75 miles from the suggested adjacent channel assignment (6) at Seattle. Deletion of Channel 12 from Chilliwack.

[55] Domestic assignments are considered to be affected by Mexican or Canadian assignments when they are 250 miles from the border. Similarly, Mexican and Canadian assignments are deemed to be affected by United States assignments when they are 250 miles from the United States.

[56] An exchange of diplomatic notes between Mexico and the United States was announced by the State Department on Oct. 26, 1951. On November 7, 1951, the Commission issued a Notice in this proceeding (FCC 51-1109) pointing out that it would accept new comments and evidence from parties who had theretofore filed comments if such new proposals were made solely as a result of the changes brought about by the Agreement with Mexico and if such new counterproposals were consistent with the Agreement. In light of such further comments and evidence together with all the other comments and evidence in the record, further negotiations were conducted with Mexico resulting in certain additions and modifications to the Agreement, but not inconsistent with the basic provisions of the Agreement. These additions and modifications were agreed to on Feb. 4, 1952, and will be formalized by an exchange of diplomatic notes.

Party	Counterproposal	Separations and assignments concerning which agreement with Canada could not be reached
Twin City Broadcasting Corp., Longview, Wash. (1)	Add Channel 2 to Longview, Wash.	Channel 2 at Longview would be 158 miles from the co-channel assignment at Victoria, B. C., Canada.
(2)	Add Channel 2 to Longview, Wash., by substituting Channel 6, 8 or 10 in Victoria, B. C., Canada; for Channel 2; and Channel 2 in Vancouver-New Westminster, B. C., Canada for Channel 6, 8 or 10.	The conflicting counterproposal of KVOS, Inc., assigning Channel 12 to Bellingham, Wash., is being granted. This counterproposal assigns Channel 3 to Chilliwack, B. C., in place of Channel 12. Channel 3 in Chilliwack would be 47 miles from New Westminster and 58 miles from Vancouver where adjacent Channel 2 is proposed by Twin City.
Fisher's Blend Stations, Inc., Seattle, Wash. (1) and Totem Broadcasters, Inc., Seattle, Wash.	Add Channel 2 to Seattle, Wash., by substituting Channel 3 for Channel 2 in Victoria, B. C. Can.	The conflicting counterproposal of KVOS, Inc., assigning Channel 12 to Bellingham, Wash., is being granted. This counterproposal assigns Channel 3 to Chilliwack, B. C., in place of Channel 12. Channel 3 in Chilliwack would be 81 miles from Victoria, B. C., where Fisher's Blend Stations, Inc., and Totem Broadcasters, Inc., would assign Channel 3.
Fisher's Blend Stations, Inc., (2)	Add Channel 2 to Seattle, Wash., by substituting Channel 12 for Channel 2 in Victoria, B. C., Can.; and Channel 3 for Channel 12 in Chilliwack, B. C., Canada.	The conflicting counterproposal of KVOS, Inc., assigning Channel 12 to Bellingham, Wash., is being granted. Channel 12 at Bellingham would be 48 miles from Channel 12 in Victoria as proposed by Fisher's Blend.
Allen B. DuMont Laboratories, Inc.	Nationwide Allocation Plan.	The DuMont plan differs in numerous aspects from the assignments prescribed in the tentative agreement.

236. The following list sets forth those counterproposals requesting changes in channel assignments for cities within 250 miles of Canada which, pursuant to the negotiations with Canada, were tentatively agreed upon by Canada and are being granted herein. The channel assignments sought in these counterproposals are reflected in the proposed agreement:

Party	City	Counterproposal
Dartmouth College	Hanover, N. H.	Add Channel 21 to Hanover, N. H., to be reserved for noncommercial educational use, by substituting Channel 51 in Rochester, N. H.
Hartford Times, Inc. and Travelers Broadcasting Service Corp.	Hartford, Conn.	(As modified) Add Channel 3 to Hartford, by substituting Channel 81 in New London for Channel 3.
Connecticut State Board of Education	Norwich, Storrs, Bridgeport and New London, Conn.	(As modified) Add Channel 63 to Norwich and Channel 71 to Bridgeport, both to be reserved for non-commercial educational use, by deleting Channel 26 from Storrs, deleting Channel 63 from New London, and assigning Channel 26 to New London.
Troy Broadcasting Co. Inc., and Meredith Champlain Television Corp.	Troy, New York Schenectady, N. Y.	(As modified) Add Channel 41 to Albany-Schenectady-Troy, N. Y.; add Channel 35 to Schenectady; substitute Channel 48 for Channel 35 in Watertown, N. Y.; and substitute Channel 62 for Channel 48 in Oneonta, New York.
Kingston Broadcasting Corporation	Kingston, N. Y.	Add Channel 66 to Kingston.
Board of Regents of the University of the State of New York	Malone, New York Poughkeepsie, N. Y.	Add Channel 66 to Malone, and Channel 83 to Poughkeepsie, N.Y., both to be reserved for non-commercial educational use.
Gable Broadcasting Company	Altoona, Pa.	(As modified) Add Channel 10 to Altoona, Pa.
Lock Haven Broadcasting Corporation	Lock Haven, Pa.	Add Channel 32 to Lock Haven, Pennsylvania.
Vindicator Printing Company	Youngstown, Ohio	Add Channel 73 to Youngstown, Ohio.
Cleveland Broadcasting Co., Inc. *et al.*	Cleveland, Ohio	(In part) Add Channel 65 to Cleveland, Ohio, by substituting Channel 42 for Channel 59 in Sandusky, Ohio.
WSTV, Inc.	Steubenville, Ohio	(As modified) Assign Channels 7, 9 and 51 to Wheeling, West Virginia-Steubenville, Ohio, instead of Channel 51 to Steubenville and Channels 7 and 9 to Wheeling. (Channel *57 remains assigned to Wheeling.)
WSAZ, Inc.	Huntington, W. Va.	Substitute Channel 3 for Channel 8 in Huntington and Channel 8 for Channel 3 in Charleston, West Virginia.
Shenandoah Valley Broadcasting Corp.	Harrisonburg, Virginia	Add Channel 3 to Harrisonburg, Va., by substituting Channel 12 for Channel 3 in Richmond, Va.; Channel 3 for Channel 12 in Norfolk-Portsmouth-Newport News, Va.; Channel 8 for Channel 3 in Charleston, W. Va.; and Channel 3 for Channel 8 in Huntington, W. Va.
Copper Broadcast Company	Butte, Montana	Add Channel 15 to Butte, Montana.
Green Bay Newspaper Co.	Green Bay, Wisconsin	Add Channel 2 to Green Bay, Wisconsin.
Radio Indianapolis, Inc.	Indianapolis, Indiana	Add Channel 67 to Indianapolis, Indiana.
Ball State Teachers College	Muncie, Indiana	Add Channel 71 in Muncie, Ind. to be reserved for non-commercial educational use.
Board of School Trustees of Gary, Indiana	Gary, Indiana	Add Channel 66 in Gary, Ind., to be reserved for non-commercial educational use.
Twin Valley Broadcasters, Inc.	Coldwater, Michigan	(In part) Add Channel 24 to Coldwater, Michigan.
Bay Broadcasting Company	Bay City, Michigan	Add Channel 5 to Bay City, Mich., by substituting Channel 7 for Channel 5 in Traverse City, Michigan.
Board of Education of Bay City, Michigan	Bay City, Michigan	Add Channel 73 to Bay City, Michigan, to be reserved for non-commercial educational use.
Delta Broadcasting Company	Escanaba, Michigan	(As modified) Substitute Channel 3 for Channel 13 in Escanaba, Mich.; add Channel 13 to both Calumet and Cadillac, Mich.; add Channel 2 to Green Bay, Wisc.; substitute Channel 10 for Channel 5 in Hancock, Michigan; Channel 5 for Channel 3 in Marquette, Mich.; and Channel 7 for Channel 5 in Traverse City.
Wisconsin State Radio Council	(Wisconsin)	Add Channel 30 to Shell Lake, Wisc.; Channel 18 to Park Falls, Wisc.; Channel 46 to Wausau, Wisc.; Channel 58 to Adams, Wisc.; Channel 24 to Chilton, Wisc.; and Channel 66 to Richland Center, Wisc.; all to be reserved for non-commercial educational use.
Buffalo Courier Express, Inc., WGR Broadcasting Corp. and WKBW Inc.	Buffalo, N. Y.	(As modified) Assign Channels 2, 4, 7, and 59 to Buffalo-Niagara Falls, instead of Channel 2 to Niagara Falls and Channels 4 and 7 to Buffalo. (Channels 17 and *23 remain assigned to Buffalo).
New Jersey Board of Education	Montclair, N. J. Andover, N. J.	Add Channel 77 to Montclair, N. J. and Channel 69 to Andover, N. J., to be reserved for non-commercial educational use.
State Superintendent of Public Instruction for the State of Wash.	(Washington State)	Add Channel 65 to Ellensburg, Wash.; Channel 41 to Kenniwick - Richland - Pasco, Wash.; Channel 35 to Omak-Okanogan, Wash.; Channel 22 to Walla Walla, Wash.; Channel 45 to Wenatchee, Wash.; and Channel 47 to Yakima, Wash., all to be reserved for non-commercial educational use.
KVOS, Inc.	Bellingham, Wash.	Add Channel 12 to Bellingham, Wash., by substituting Channel 3 for Channel 12 in Chilliwack, B. C., Canada.
Presque Isle Broadcasting Company	Erie, Pa.	(In part) Add Channel 66
Patriot News Company	Harrisburg, Pa.	Add Channel 71.
The Scranton Times	Scranton, Pa.	Add Channel 73.
The following additional assignments to cities within 250 miles of the Canadian-United States border have been made:	Cincinnati, Ohio	Add Channel 74.
	Pittsburgh, Pa.	Add Channel 16.
	Bad Axe, Mich.	Substitute Channel 15 for Channel 46.

MEXICAN-UNITED STATES TELEVISION ASSIGNMENTS

237. As pointed out above, an Agreement has been entered into with Mexico prescribing the channel assignments for communities within 250 miles of the Mexican-United States border.

238. The following list sets forth those counterproposals originally filed in this proceeding requesting changes in VHF channel assignments within 250 miles of the Mexican border and therefore affected by the Mexican-United States Television Agreement, announced October 26, 1951:

Party	City	VHF Counterproposals Affecting Mexico
Bell Broadcasting Company	Temple, Texas	Add Channel 6 to Temple, Texas.
Harbenito Broadcasting Co., Inc.	Harlingen, Texas	Move Channel 4 from Brownsville, to Harlingen, Texas.
McAllen Television Corporation	McAllen, Texas	Move Channel 5 from Brownsville to McAllen, Tex. and substitute Channel 12 in Brownsville.
Taylor Radio & Television Corporation	Weslaco, Texas	Move Channel 4 and 5 from Brownsville to Weslaco-Harlingen, Texas.
Plains Radio Corp.	Lubbock, Texas	Move Channel 5 from Amarillo, Texas to Lubbock, Texas and substitute Channel 9 in Monahans, Tex. for Channel 5.
Lack's Stores, Inc.	Victoria, Texas	Move Channel 12 from San Antonio, to Victoria, Tex.
New Mexico State Dept. of Education	Silver City, New Mexico	(As modified) Add Channel 10.
Airfan Radio Corp., Ltd.	San Diego, California	Add either Channel 6 or 12 to San Diego, California by deleting Channel 6 or 12 from Tijuana, Mexico.
Charles E. Salik	San Diego, California	Add Channel 6 or 12 to San Diego, California by deleting Channel 6 or 12 from Tijuana.
Radio KIST, Inc.	San Diego, California	Add Channel 8 to Santa Barbara, California.
Paul R. Bartlett and Gene DeYoung	Bakersfield, Calif.	Add Channel 8 to Bakersfield, California.
McClatchy Broadcasting Co.	Bakersfield, Calif.	Add Channel 8 to Bakersfield, California.
McClatchy Broadcasting Co.	Fresno, Calif.	Add Channels 5, 7 and 9 to Fresno by substituting Channel 12 for 13 in Las Vegas, Nevada, and other changes.
American Broadcasting Co., Inc.	Yuma, Arizona	Substitute Channel 12 in Mexicali, Mexico for Channels 7 and 9 and substitute Channels 9 and 47 in Yuma, Arizona for Channels 11 and 13.
Allen B. DuMont Laboratories, Inc.		Nationwide Plan.

239. Subsequent to the filing of the above counterproposals, further conferences and negotiations were conducted with Mexico. Each of the above counterproposals which did not require denial for purely domestic reasons was taken into account in these discussions with Mexico. Thereafter, the Department of State announced on October 26, 1951, that an Agreement had been concluded by an exchange of diplomatic notes between Mexico and the United States formalizing the assignment of VHF channels to communities within 250 miles of the Mexican-United States border. The assignments prescribed by that Agreement were identical with those listed in Appendices C and D of the Third Notice with several express exceptions set out below. The total number of VHF channels assigned to each community involved remained the same with the exception that an additional channel was provided for Tucson, Ariz. and one less channel for San Diego, California[57] in the United States, and an additional channel was provided for Reynosa and Hermosillo and one less channel for Mexicali and Monterrey, in Mexico. The changes in VHF assignments from those expressed in the Third Notice were as follows:

City	Third Notice	Mexican Agreement Announced Oct. 26, 1951
Flagstaff, Arizona	9,11	9,13
Phoenix, Arizona	4,5,8,10	3,5,8,10
Tucson, Arizona	2,6,7	4,6,9,13
San Diego, Calif.	3,8,10	8,10
El Paso, Texas	2,4,5,7	4,7,9,13
Laredo, Texas	3,8	8,13
Mexicali, Mexico	7,9	3
Nogales, Mexico	9,11,13	2,7,11
Hermosillo, Mexico	2,4,6	6,8,10,12
Ciudad Juarez, Mexico	9,11,13	2,5,11
Monterrey, Mexico	2,6,10,12	2,6,10
Nuevo Laredo, Mexico	11,13	3,11
Reynosa, Mexico	9	9,12

[57] It should be understood that the number of VHF channels available for assignment in the San Diego area is governed to a considerable degree by the number of assignments in Los Angeles. Since there are only 12 VHF channels, the assignment of 7 VHF channels to Los Angeles, where 7 stations are now operating, leaves only 5 remaining channels for the border area in southern California, which includes San Diego in the United States and Mexicali in Mexico. The 7 VHF channels employed in Los Angeles cannot also be assigned to San Diego, Mexicali, or Tijuana without undesirably limiting the coverage of United States as well as Mexican stations. The Los Angeles assignments must, therefore, be considered in connection with the United States assignments in the border area. Seven VHF channels are assigned to Los Angeles, 2 VHF channels to San Diego, 2 VHF channels to Tijuana, and 1 VHF channel to Mexicali. Thus, it will be seen that of the 12 VHF channels available for assignment in the border area, 9 are assigned to communities in the United States and 3 to Mexican cities.

240. Since the channel assignments prescribed in the Mexican Agreement announced October 26, 1951, differed in some instances from the Third Notice, the Commission, on November 7, 1951, issued a Notice (FCC 51-1109) stating that it would accept new comments and evidence from parties who had theretofore filed proper comments in the proceedings if such new comments and evidence were submitted solely as a result of the changes brought about by the Mexican Agreement and were consistent with the Agreement.

241. Pursuant to the above Notice, Plains Radio Broadcasting Company, Lubbock, Texas; Lack's Stores, Inc., Victoria, Texas; Taylor Radio and Television Corporation, Weslaco, Texas; and McClatchy Broadcasting Company, Bakersfield and Fresno, California, filed statements contending that their counterproposals filed in this proceeding seeking additional VHF channels for their respective communities were consistent with the Mexican Agreement. Charles E. Salik and Airfan Radio Corporation, Ltd., both of San Diego, California, filed statements advising that further pleadings in light of the Mexican Agreement would not be submitted. Finally, Allen B. DuMont Laboratories, Inc., filed a modification to its nationwide assignment plan suggesting, among other things, that Channels 2 and 5 be assigned to Mexicali, Mexico in place of Channel 3, and that Channel 3 be assigned as an additional channel to San Diego.

242. On December 11, 1951, Radio KIST, Inc., Santa Barbara, California, filed a petition for leave to file further comments and evidence in the proceeding requesting, as an alternative to its previous counterproposal, that Channel 3 be assigned to Santa Barbara. The Commission granted this petition by Order (FCC 52-28) of January 9, 1952, and accepted the new Radio KIST, Inc. counterproposal in this proceeding. This new counterproposal requested the following:

City	Third Notice VHF Channel No.	Third Notice UHF Channel No.	Proposed Changes VHF Channel No.	Proposed Changes UHF Channel No.
Santa Barbara, Calif.		20,26	3+[58]	20, 26
Visalia, Calif.	3		†	43†,49†

[58] A proposal for the deletion, substitution, or addition of a channel is indicated in the Report by (†).

243. The following list sets forth those counterproposals which, although affected by the Mexican Agreement, must be denied for purely domestic reasons, as is set out elsewhere in this Report:

Bell Broadcasting Company, Temple, Texas
Lack's Stores, Inc., Victoria, Texas
Radio KIST, Inc., Santa Barbara, California (Channel 8)
McClatchy Broadcasting Company, Bakersfield and Fresno, Calif.
Paul R. Bartlett and Gene DeYoung, Bakersfield, California; Harbenito Broadcasting Co. Inc., Harlingen, Texas; Taylor Radio & Television Corp., Weslaco, Texas (counterproposals granted in part only).

244. All of the counterproposals affected by the Mexican-United States Agreement which in the Commission's judgment should not be denied for domestic reasons alone, including those counterproposals filed pursuant to the Notice of November 7, 1951, were taken into consideration in connection with further negotiations with Mexico. As a result of such negotiations, certain additions and modifications in the Mexican-United States Television Agreement were agreed to on February 4, 1952. These additions and changes made possible the granting of several counterproposals.

245. The following list sets forth those counterproposals affected by the Mexican Agreement which are being granted herein, and the channel assignments requested thereby are reflected in the Agreement, as modified:

Plains Radio & Television Corporation, Lubbock, Texas
Radio KIST, Inc., Santa Barbara, Calif. (Channel 3)
Harbenito Broadcasting Co., Inc., Harlingen, Texas; Taylor Radio & Television Corporation, Weslaco, Tex. (Granted in Part)
New Mexico State Dept. of Education, Silver City, N. Mexico (As modified)

246. The following list sets forth those counterproposals which must be denied in light of the Mexican-United States Agreement and subsequent conferences and negotiations conducted with Mexico. The assignment of channels requested in these counterproposals would be inconsistent with and in violation of the Mexican Agreement as modified. As is pointed out elsewhere in this Report, two of the counterproposals discussed below must also be denied for domestic reasons:

Airfan Radio Corporation, Ltd., San Diego, Calif.
Charles E. Salik, San Diego, Calif.
American Broadcasting Company, Inc., Yuma, Arizona
McAllen Television Corporation, McAllen, Texas
Allen B. DuMont Laboratories, Inc., Nationwide plan

247. **Discussion of counterproposals denied on the basis of the Mexican Agreement.**

(a) **Charles E. Salik and Airfan Radio Corporation, Ltd.** Charles E. Salik and Airfan Radio Corporation, Ltd. filed counterproposals requesting that Channel 6 or 12 be added to San Diego, California. This assignment would necessitate the deletion of Channel 6 or 12 from Tijuana, Mexico as listed in the Third Notice. It was suggested that UHF channels could replace the VHF channels in Tijuana. However, in the negotiations on this matter conducted with Mexico, agreement could not be reached on any assignment necessitating the deletion of Channel 6 or 12 from Tijuana. Furthermore, Mexico would not accept the suggestion that UHF channels are available to replace Channel 6 or 12 in Tijuana. Accordingly, the Mexican Agreement assigns Channels 6 and 12 to Tijuana. Since the Charles E. Salik and Airfan Radio Corporation, Ltd. counterproposals are inconsistent with this Agreement, they must be denied.

(b) **McAllen Television Corporation.** McAllen Television Corporation filed a counterproposal requesting that Channel 5 be deleted from Brownsville, Texas and assigned to McAllen, Texas. Channel 12 was suggested as a substitute in Brownsville. As a result of our negotiations with Mexico, Channel 12 is assigned by the

Mexican Agreement to Reynosa, Temaulipas, Mexico at a distance of only 52 miles from Brownsville. Mexico would not agree to any assignment precluding the use of Channel 12 in Reynosa. Accordingly, the McAllen Television Corporation counterproposal must be denied. As noted elsewhere in this Report, this counterproposal must also be denied for domestic reasons.

(c) **American Broadcasting Company, Inc.** The Third Notice proposed Channels 7 and 9 for Mexicali, Baja California, Mexico, duplicating channels proposed for Los Angeles, California. The American Broadcasting Company, Inc., licensee of Station KECA-TV operating on Channel 7 in Los Angeles, filed a counterproposal requesting that VHF Channels 7 and 9 be deleted from Mexicali. In order to accomplish its request, ABC suggested, among other things, that Channels 9 and 47 be substituted in Yuma, Arizona for Channels 11 and 13. However, subsequent to the filing of the ABC counterproposal, the Mexican Agreement assigned Channel 3 to Mexicali in the place of Channels 7 and 9. ABC filed a statement supporting the Mexican Agreement insofar as it makes the above changes from the Third Notice. The ABC counterproposal for Yuma is therefore moot.

(d) **Allen B. DuMont Laboratories Inc.** Allen B. DuMont Laboratories, Inc. filed a proposed "National Television Allocation Plan." After the Notice of November 7, 1951, issued pursuant to the Mexican Television Agreement, DuMont amended its plan suggesting several changes in the assignments prescribed by the Mexican Agreement. The DuMont plan thus modified would assign Channels 2 and 5 to Mexicali, Baja California, Mexico, in place of Channel 3 assigned by the Mexican Agreement, and would thereby add Channel 3 to San Diego, California. The assignment of Channels 2 and 5 in Mexicali would duplicate assignments proposed for Los Angeles, California. In further negotiations with Mexico, agreement for any assignment utilizing co-channel assignments for Mexicali and Los Angeles could not be reached. Accordingly, the DuMont plan is inconsistent with the Mexican Agreement. As noted elsewhere in this Report, however, the DuMont plan must also be denied for other reasons.

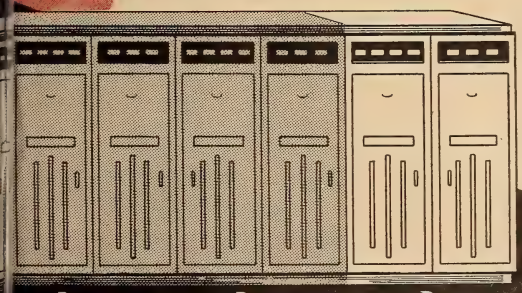
BROADCASTING TELECASTING

Grow up to a —

high powered future
IN TELEVISION

When the time comes for you to consider high power, whether you are on the air now and wish to increase your power, or whether you are making application, it will pay you well to consider Du Mont. An investment in Du Mont — a Du Mont high-power transmitter is *your* investment in the same long-term operational advantages... the same low costs... the same reliability that has been proved by the Du Mont Acorn 500W and the Du Mont Oak 5KW transmitters.



Du Mont offers two outstanding high-power transmitters — the Series 9000, 20KW low-band — the Series 12000, 40KW high-band.

Either of these transmitters driving a high-gain antenna will easily meet the maximum FCC allowed ERP of 100KW for the low-band and 200KW for the high-band.

The Series 9000 low-band transmitter employs intermediate-level modulation for most economical utilization of available tubes and features the time-proved Oak Transmitter driving a single power output tube in each of the Aural and Visual Transmitters.

The Series 12000 high-band transmitter contains the Oak Transmitter driver but utilizes a single r.f. power output tube in the Aural Transmitter and a pair in the Visual Transmitter.

No matter what power you require, consider Du Mont first for a long range, economically-sound investment. Du Mont protects your investment through minimum obsolescence.

THE TABLE OF ASSIGNMENTS

248. In the Third Notice, the Commission, in addition to proposing revised Rules and standards for the television broadcasting service, also proposed a Table of Assignments indicating the specific cities and communities in which it proposed to assign particular channels. Further, the proposed Table indicated the specific cities and communities in which it was proposed to reserve particular assignments for use by non-commercial educational stations. Parties were afforded an opportunity to support or to object to these proposed assignments and educational reservations. Further, they were afforded an opportunity to make counterproposals of their own. The following portion of this Report deals with the individual filings in this proceeding in support of or in opposition to the assignments and reservations proposed in the Third Notice; further, it deals with the individual counterproposals that have been made. No comments have been received with respect to the large majority of the assignments proposed. Except where we have found reason to re-examine proposed assignments, such assignments have not been discussed herein.

PORTLAND AND BANGOR, MAINE: EDUCATIONAL RESERVATIONS

249. (a) **Proposed Reservations.** In the Third Notice the Commission proposed the reservation of UHF Channel 16 in Bangor and UHF Channel 47 in Portland for non-commercial educational use.

(b) The Joint Committee on Educational Television[59] supported the reservation of Channel 47 in Portland and Channel 16 in Bangor for non-commercial educational use. No oppositions to these reservations were filed.

Conclusions

250. In view of the foregoing, the reservation of UHF Channel 47 in Portland and UHF Channel 16 in Bangor for non-commercial educational use are finalized.

ORONO, MAINE AND BURLINGTON, VERMONT: EDUCATIONAL RESERVATIONS

251. (a) **Proposed Reservations.** In the Third Notice the Commission proposed the reservation of VHF Channel 12 in Orono and UHF Channel 16 in Burlington for non-commercial educational use.

(b) **The Orono Educational Reservation.** The University of Maine supported the reservation of VHF Channel 12 for non-commercial educational use in Orono. The University stated that its long-range plans included the use of television; and that it anticipated that the Department of Education of the State of Maine would use the Orono channel for its television programs. No oppositions to this reservation were filed.

(c) **The Burlington Educational Reservation.** The University of Vermont and State Agricultural College supported the reservation of Channel 16 in Burlington for non-commercial educational use.

[59] Referred to hereinafter as JCET.

The University stated that its President had been instructed to consider means for making facilities available for non-commercial educational television. The University submitted a copy of a resolution adopted by the Board of Trustees supporting the reservation. No oppositions to this reservation were filed.

Conclusions

252. On the basis of the foregoing, the proposed reservations of Channel 12 in Orono and Channel 16 in Burlington for non-commercial educational use are finalized.

DURHAM, NEW HAMPSHIRE BOSTON, BROCKTON, SPRINGFIELD-HOLYOKE, PITTSFIELD, WORCESTER, MASSACHUSETTS PROVIDENCE, RHODE ISLAND BRIDGEPORT, HARTFORD, NEW LONDON, NORWICH, NEW HAVEN, STORRS, WATERBURY, CONNECTICUT

253. (a) **Proposed Assignments and Reservations.**

City	VHF Channel No.	UHF Channel No.
Durham	*11 [60]	
Boston	*2, 4, 5, 7	44, 50, 56
Brockton		62
Pittsfield		64
Springfield-Holyoke		55, 61
Worcester		14, 20
Hartford		18, 24
Storrs		*26
Providence	10, 12	16, *22
Bridgeport		43, 49
New London	3	63
Norwich		57
Waterbury		53
New Haven	8	59

(b) **Counterproposals.** Various parties in this proceeding filed counterproposals seeking (1) the additional assignment of a VHF channel to Boston, Brockton, Springfield-Holyoke, Worcester and Hartford; (2) the additional assignment of 2 UHF channels to Hartford; (3) the assignment of UHF channels to Bridgeport, Hartford, Norwich and Waterbury to be reserved for non-commercial educational use; and (4) the assignment of a UHF channel to Hanover, New Hampshire, to be reserved for non-commercial educational use.

Durham

254. **The Durham Educational Reservation.** The University of New Hampshire supported the reservation of Channel 11 in Durham for non-commercial educational use. The University stated that it considered the reservation necessary and that it is exploring sources of financial assistance which it will require to establish and maintain a non-commercial educational television station. The exploration was expected to take time and the reservation was supported so that the channel would be available for educational use whenever it becomes feasible for the University to erect and maintain such a station.[61]

New London

255. (a) **Census Data.** The City of New London has a population of 31,000.

(b) **Statement of Thames Broadcasting Company Supporting Proposed Assignment.** Thames Broadcasting Company supported the proposed assignment of Channels 3 and 63 to New London and opposed all requests seeking the deletion of VHF Channel 3 from New London. Thames Broadcasting Company stated that the utilization of Channel 3 in New London would better serve the Commission's priorities set forth in the Third Notice than any of the counterproposals seeking the assignment of that channel to another community, that New London is saturated with VHF receivers; and that the assignments in the State of Connecticut should not be reduced.

Boston

256. (a) **Census Data.** The standard metropolitan area of Boston has a population of 2,370,000 and the City of Boston has a population of 801,000.[62]

(b) **Existing Stations.** Westinghouse Radio Stations, Inc., has a construction permit for Station WBZ-TV on Channel 4. Thomas S. Lee Enterprises, Inc., is licensed for the operation of Station WNAC-TV on Channel 7.

(c) **Counterproposal of Columbia Broadcasting System, Inc.** Columbia Broadcasting System, Inc., proposed 3 alternative plans for the additional assignment of Channel 9 to Boston.[63] Plan 1 would delete Channel 10 from Providence, and Plane 2 and 3 would delete Channel 11 from Durham by making the following changes in the assignments proposed in the Third Notice:

[60] An asterisk is used in this Report to designate channels reserved for non-commercial educational use.

[61] Columbia Broadcasting System, Inc., filed a counterproposal containing 3 alternative plans for the additional assignment of a VHF channel to Boston; Plans 2 and 3 would substitute a UHF channel in Durham for Channel 11. This counterproposal is set forth in detail below.

[62] Census data in this Report is based on 1950 U.S. Census of population and is reported to the nearest thousand.

[63] In addition, CBS opposed the reservation of VHF Channel 2 in Boston for non-commercial educational use. The educational reservation in Boston is considered below.

City	Third Notice VHF Channel No.	Third Notice UHF Channel No.	Plan #1 VHF Channel No.	Plan #1 UHF Channel No.	Plan #2 VHF Channel No.	Plan #2 UHF Channel No.	Plan #3 VHF Channel No.	Plan #3 UFH Channel No.
Augusta, Maine	10	29	12†	29	13†	29	13†	29
Calais, Maine	7	20	3†	20				
Lewiston, Maine	8	17	10†	17				
Orono, Maine	*12		*4†		*11†		*11†	
Portland, Maine	6, 13	*47, 53	6, 8†	*47, 53	6, 10†	*47, 53	6, 10†	*47, 53
Boston, Mass.	*2, 4, 5, 7	44, 50, 56	2, 4, 5, 7, 9†	*44, 50, 56	2, 4, 5, 7, 9†	*44, 50, †	2, 4, 5, 7, 9†	*44, 50, 56

St. John, Canada	4, 6	17, 23	6, 7†	17, 23				

Note: A proposal for the deletion, addition, or substitution of a channel is indicated in the Report by (†); a blank space opposite a city indicates that under that plan no changes in channel assignments were requested for that city.

(d) **Statement in Support of CBS Counterproposals.** CBS stated that ". . . a major objective of the Commission is the reasonable assurance of the possibility of a nationwide competitive television service" and that CBS is genuinely concerned that very real dangers of monopoly inhere in the Commission's proposal allocation. CBS stated that "the Commission itself has reorganized that for a considerable period perhaps 5 years, perhaps more, a commercial UHF station cannot compete on anything like an equal basis with a commercial VHF station in the same community. . . ." CBS urged that "it must be obvious that during the not inconsiderable growth period of UHF, network A with UHF outlets in Chicago, San Francisco and Boston would be under a crippling competitive disadvantage *via a vis* network B with VHF outlets in these three cities." Thus CBS argued "It is quite possible that the Commission's allocation plan will as a matter of practical necessity permit the development during the critical formative years of only 2 full nationwide competing television networks," and that this situation ". . . accentuates the danger of the proposed allocations for . . . Boston —although the danger is clearly present even if we assume the continued existence of 4 such networks. The need for additional VHF channels in these cities in order to assure network competition is readily demonstrable even if four television networks are assumed." CBS stated that Boston is of vital importance to nationwide television networking and that a network which owns no station in Boston or comparable city is at an enormous or fatal competitive disadvantage. CBS pointed out that with only one Boston VHF commercial channel unassigned under the Commission's plan ". . . there is no assurance that a network could acquire a construction permit via the application route in these cities." CBS stated further ". . . it is a fact of television network economics and operations that a full complement of network owned stations is a condition precedent to successful networking on a fully competitive basis." Were a network not to own stations in key markets such as Boston, it was claimed the problem of clearance could become a major factor in obtaining or losing a network advertiser. It was also asserted that ". . . another factor which makes it advantageous competitively for a

etwork to own a station [in a city uch as Boston] is that which re- ates to the problem of origination . . because the cost of television acilities and of the operating or- anizations are high it is far more fficient, and economical to inte- rate network and local operation ather than to have only network acilities in a city."

(e) **Counterproposal of Matheson adio Company, Inc.** Matheson adio Company, Inc., requested the dditional assignment of Channel to Boston by substituting UHF hannels for VHF channels in both rovidence, Rhode Island, and Man- hester, New Hampshire, and by naking the following changes in he assignments proposed in the hird Notice:

City	Third Notice VHF Channel No.	Third Notice UHF Channel No.	Proposed Changes VHF Channel No.	Proposed Changes UHF Channel No.
Hartford, Conn.		18, 24		24, 55†
Storrs, Conn.		*26		*18†
Barnstable, Mass.		52		62†
Boston, Mass.	*2,4,5,7	44, 50, 56	*2,4,5,7,9†	†, 50, 56
Brockton, Mass.		62		44†
Fall River Mass.		40, 46		46, 52†
New Bedford, Mass.		28, 34		34, 40†
Springfield-Holyoke, Mass.		55, 61	10†	†, 61
Worcester, Mass.		14, 20		20, 26†
Berlin, N. H.		26		64†
Manchester, N. H.	9	48	†	14†, 48
Rochester, N. H.		21		51†
Providence, R. I.	10,12	16, *22	†, 12	16, *22,28†

(f) **Statement in Support of Matheson Radio Company, Inc., Counterproposal:** Matheson stated that its proposal would make possible a first VHF channel for Springfield, and that Boston is now saturated with VHF receivers and, accordingly, the UHF assignments will not be used there in the foreseeable future. It was urged that the assignments proposed by the Commission would deprive Boston of some network programs, and that even if UHF assignments were utilized in Boston, the coverage of any such UHF station would be inadequate for the Boston trading area. Since Manchester and Providence have smaller trading areas than Boston, Matheson argued that UHF assignments in these cities would be satisfactory.

(g) **Oppositions and Conflicting Counterproposals to the CBS and Matheson Radio Company, Inc., Counterproposals.** Grandview, Inc., and Radio Voice of New Hampshire both of Manchester, opposed the Matheson Radio Company, Inc., counterproposal in so far as it would delete a VHF channel from Manchester. Cherry & Webb Broadcasting Company and the Outlet Company, both of Providence, opposed the CBS and the Matheson Radio Company, Inc., counterproposals. Regional TV Corp., Hampden-Hampshire Corp., Travelers Broadcasting Service Corp.[84] and WTAG, Inc., opposed the counterproposals of CBS and Matheson Radio Company, Inc., in so far as these counterproposals were mutually exclusive with counterproposals for additional VHF channels in Springfield-Holyoke, Hartford and Worcester, respectively. In addition, an opposition to CBS Plans 2 and 3 was filed by WPIX, Inc., presently operating Station WPIX on Channel 11 at New York. WPIX alleged that interference would result to the Grade B service areas of WPIX and WJAR-TV at Providence due to the 154 mile spacing of these assignments under CBS proposals 2 and 3. In a similar manner it was alleged there would be mutual interference on Channel 13 between a Providence station and WATV at Newark, New Jersey. The CBS proposal, WPIX asserted, would add a fifth VHF channel to Boston and a second VHF channel to Albany, and in each case these new assignments would substantially duplicate the VHF coverage of other stations. Finally, Radio Voice of New Hampshire opposed the CBS Plans in so far as they would assign Channels 11 or 12 to Manchester in lieu of Channel 9 proposed in the Third Notice.

(h) **The Boston Educational Reservation.** The members of the Lowell Institute Cooperative Broadcasting Council of Boston, consisting of Boston College, Boston University, Harvard University, Lowell Institute, Massachusetts Institute of Technology, Northeastern University, Tufts College, and Boston Symphony Orchestra, supported the proposed reservation of VHF Channel 2 in Boston for noncommercial educational use. The members of the Council and other parties, including the City of Boston, the Commonwealth of Massachusetts, Senators Henry Cabot Lodge, Jr., and Leverett Saltonstall, Congressman Christian A. Herter and Richard B. Wigglesworth, various private and parochial schools, the American Academy of Arts and Sciences and various museums, all indicated their belief that the Lowell Institute Cooperative Broadcasting Council, licensee of educational FM Station WGBH, is the proper agency for coordinating the joint effort to secure the funds necessary to construct and operate a noncommercial educational television station in Boston. The Council stated that it has had extensive experience in the fields of radio and television and is prepared to meet the responsibilities of television broadcasting; that it is seeking the funds for constructing and operating the station; and that it "is more than reasonably confident that they can be secured if VHF Channel 2 is reserved in Boston for non-commercial educational broadcasting." Emerson College in a separate statement also supported the reservation of VHF Channel 2 in Boston.

(i) **Opposition to the Boston Educational Reservation.** CBS opposed the reservation of VHF Channel 2 for non-commercial educational use in Boston urging the same grounds advanced by it in support of its counterproposal for an additional VHF assignment in Boston. CBS contended that while ultimately UHF and VHF would be competitive, during a considerable interim period of perhaps 5 years or more, a commercial UHF station cannot compete successfully with a commercial VHF station in the same community; but that the short-run competitive disadvantages of a UHF assignment are much less significant for non-commercial educational broadcasters since (1) educational broadcasters are not as critically affected by the anticipated reduced coverage of UHF, (2) the educational interests generally are not ready to proceed with construction of a television facility immediately, and (3) the educators will be seeking a minority audience rather than "mass circulation" and therefore the loss of circulation involved in UHF, as against VHF, is comparatively insignificant. CBS further alleged that the comments of the Lowell Institute "provide no basis whatever for a finding by the Commission that there is any assurance that the Lowell Institute will in fact utilize Channel 2 in Boston in the ascertainable future or that a UHF channel will not serve equally as well." In reply to CBS, the JCET asserted that shifting the reservation to a UHF channel would greatly handicap educators in obtaining funds if mass distribution of UHF receivers is as far distant as indicated by CBS. The JCET further contended that CBS, in light of its financial resources, is in a much better position to shoulder the burden of developing UHF in Boston than are the educators.

[84] In rebuttal to these oppositions CBS pointed out that Channel 10 which would under its counterproposal be assigned to Albany could alternatively be assigned to Springfield or Hartford.

Brockton

257. (a) **Census Data.** The standard metropolitan area of Brockton has a population of 130,000, and the City of Brockton has a population of 63,000.

(b) **Counterproposal of Enterprise Publishing Company.** Enterprise Publishing Company requested the deletion of VHF Channel 5 from Boston and the assignment of this channel to Brockton.

(c) **Statement in Support of Enterprise Publishing Company Counterprosopal.** Enterprise Publishing Company stated that Brockton is one of the few large population centers for which only one assignment has been proposed. It was urged that a first VHF channel for Brockton should receive preference over a fourth VHF channel for Boston.

(d) **Opposition to Counterproposal of Enterprise Publishing Company.** Oppositions to the Enterprise Publishing Company counterproposal were filed by Matheson Radio Co., Inc., CBS, and Cowles Broadcasting Co. In the oppositions it was asserted that Brockton is situated less than 20 miles from Boston and would receive Grade A service from the operation of a VHF station in Boston.

Springfield-Holyoke

258. (a) **Census Data.** The standard metropolitan area of Springfield-Holyoke has a population of 407,000; the City of Springfield has a population of 162,000 and the City of Holyoke has a population of 55,000.

(b) **Counterproposals of Hampden-Hampshire Corporation and Regional TV Corporation.** Hampden-Hampshire Corporation, Holyoke, Massachusetts, requested the assignment to Springfield of either Channel 3 or Channel 10 by deleting from New London or Providence, respectively, and by making the following changes in the assignments proposed in the Third Notice:

City	Third Notice VHF Channel No.	Third Notice UHF Channel No.	Proposal 1 VHF Channel No.	Proposal 1 UHF Channel No.
New London, Conn.	3	63	†	63 plus UHF†
Lewiston, Maine	8	17	3†	17
Springfield-Holyoke, Mass.		55, 61	3†	55, 61
Montpelier, Vt.	3	40	8†	40
			Proposal 2	
Springfield-Holyoke, Mass.		55, 61	10†	55, 61
Providence, R. I.	10, 12	16, *22	†, 12	16, *22 plus UHF†

Assignment of the Providence Channel 10 to Springfield would require WJAR-TV in Providence to operate on Channel 12 rather than Channel 10 as proposed in the Third Notice. Regional TV Corporation requested the assignment of Channel 3 to Springfield-Holyoke by deleting that channel from New London.

(c) **Statements in Support of Hampden-Hampshire and Regional TV Corporation Counterproposals.** It was stated that Springfield should receive a VHF assignment because it is the third largest city in New England; that UHF is not desirable for the area because of the rough terrain; and that 14 of the 20 VHF assignments in the New England area are proposed for cities of lesser importance than Springfield.

(d) **Oppositions to the Hampden-Hampshire and Regional TV Corporation Counterproposals.** Travelers Broadcasting Service Corp., The

Hartford Times, Inc., Greylock Broadcasting Service Corp., CBS, Inc., and WTAG, Inc., opposed the foregoing counterproposals since they were mutually exclusive with the counterproposals for additional VHF channels in Hartford, Pittsfield, Boston and Worcester. The Thames Broadcasting Corporation opposed the foregoing counterproposals in so far as they would delete VHF Channel 3 from New London. The Outlet Co., and Cherry & Webb Broadcasting Company opposed the counterproposal of Hampden-Hampshire in so far as it would delete VHF Channel 10 from Providence. Lewiston-Auburn Broadcasting Corp. opposed the counterproposal of Regional TV Corporation in so far as it would change the assignment of Lewiston, Maine, from Channel 8 to Channel 3.

Worcester

259. (a) **Census Data.** The standard metropolitan area of Worcester has a population of 274,000 and the City of Worcester has a population of 203,000.

(b) **Counterproposal of WTAG, Inc.** WTAG, Inc., requested the assignment of Channel 12 to Worcester by deleting that channel from Providence.

(c) **Statement in Support of WTAG, Inc., Counterproposals.** WTAG asserted that Worcester ranks 29th among the nation's markets on the basis of the area's economic potential; that it ranks second only to Boston in the State of Massachusetts; and that it is the third most important market in New England.

(d) **Oppositions to WTAG, Inc., Counterproposal.** Cherry & Webb Broadcasting Company and The Outlet Company opposed the deletion of VHF Channel 10 from Providence. Travelers Broadcasting Service Corporation, Hampden-Hampshire Corporation, and CBS opposed the foregoing counterproposal since it was mutually exclusive with counterproposals for the additional assignment of VHF channels to Hartford, Springfield-Holyoke and Boston.

Pittsfield

260. (a) **Census Data.** The standard metropolitan area of Pittsfield has a population of 66,000 and the city of Pittsfield has a population of 53,000.

(b) **Counterproposal of Greylock Broadcasting Company.** Greylock Broadcasting Company requested the assignment of VHF Channel 3 to Pittsfield by deleting that channel from New London and by making the following changes in the assignments proposed in the Third Notice:

	Third Notice		Proposed Changes	
City	VHF Channel No.	UHF Channel No.	VHF Channel No.	UHF Channel No.
Pittsfield, Mass.		64	3†	64
Syracuse, N. Y.	3,8	*43	5†,8	*43
Rochester, N. Y.	5,10	15,*21,27	3†,10	15,*21,27
Montpelier, Vt.	3	40	8†	40
Lewiston, Maine	8	17	3†	17
Hamilton, Ontario	13	51,57	6†	51,57
Toronto, Ontario	6,9,11	19,25	9,11,13†	19,25
Orillia, Ontario	3	30	5†	30
Sudbury, Ontario	5,7	17,23	3†, 7	17,23
New London, Conn.	3	63	†	63

(c) **Statement in Support of Greylock Broadcasting Company Counterproposal.** Greylock Broadcasting Company argued that the operation of Channel 3 at Mt. Greylock in Pittsfield would result in more extensive coverage than the operation of that channel in New London or other New England cities for which the channel was requested. In view of the size of this alleged service area, Greylock contended that Pittsfield should be considered as the second Massachusetts city for assignment purposes. Greylock argued that a second city in the more populous state of Massachusetts should receive a VHF channel in preference to a second city in the smaller and less populous state of Connecticut. Finally, Greylock asserted that the use of Channel 3 at Pittsfield would better implement the priorities than would the use of this channel at either Hartford or Springfield-Holyoke.

(d) **Oppositions to the Greylock Broadcasting Company Counterproposal.** Thames Broadcasting Company opposed the deletion of Channel 3 from New London. Lewiston - Auburn Broadcasting Corporation opposed the substitution of Channel 3 for Channel 8 at Lewiston. Springfield Regional Television, Hampden - Hampshire, Hartfort Times, Travelers Broadcasting Service., CBS, WAGE, Inc., the Buffalo Courier Express, *et al.*, opposed the counterproposal of Greylock Broadcasting Co., since it was mutually exclusive with the counterproposals for additional VHF channels in Springfield, Hartford, Boston, Syracuse, and Buffalo. Stromberg-Carlson Co., Licensee of WHAM-TV, Rochester,[65] New York, opposed the Greylock Broadcasting Company proposal in so far as it would result in the assignment of Channel 3 to Rochester in lieu of Channel 5.

Providence

261. (a) **Census Data.** The standard metropolitan area of Providence has a population of 737,000 and the city of Providence has a population of 249,000.

(b) **Existing Stations.** The Outlet Company is licensed for the operation of Station WJAR-TV, Providence, on Channel 11. The Commission ordered the Outlet Company to show cause why the license of WJAR-TV should not be modified to specify operation on Channel 10, in lieu of Channel 11.

(c) **Statements of The Outlet Company and Cherry & Webb Company Supporting the Proposed Assignments.** The Outlet Company, licensee of WJAR-TV, supported the Commission's assignments for Providence and agreed to the proposed channel change for WJAR-TV. Cherry & Webb Broadcasting Company also supported the assignments for Providence and stated that the Providence assignments provided the minimum necessary to meet the needs of the area; and that the deletion of one of the two VHF assignments proposed for Providence would result in an inequitable distribution of facilities.[66]

(d) **Providence Educational Reservation.** The JCET, Brown University, Providence College, University of Rhode Island, the Rhode Island College of Education, and the Providence School Department supported the reservation of Channel 22 for non-commercial educational use. The JCET stated that the Catholic Schools of the Archdiocese of Providence also supported the reservation. Brown University stated that a state-wide meeting had been held for the purpose of discussing the utilization of educational television, and that as a result of this meeting, an educational television committee was established under the chairmanship of the State Director of Education. No opposition to this reservation was filed.

Hartford

262. (a) **Census Data.** The metropolitan area of Hartford has a population of 356,000 and the city of Hartford has a population of 177,000.

(b) **Counterproposal of The Hartford Times, Inc.** The Hartford Times, Inc., proposed 3 alternative plans for the assignment of VHF Channel 3 to Hartford which would delete that channel from New London and make the following alternative changes in the assignments proposed in the Third Notice:

	Third Notice		Plan 1	
City	VHF Channel No.	UHF Channel No.	VHF Channel No.	UHF Channel No.
Hartford, Conn.		18,24	3†	18,24,59†,81
New Haven, Conn.	8	59	8	75†
New London, Conn.	3	63	†	47†,63

	Third Notice		Plan 2	
	VHF Channel No.	UHF Channel No.	VHF Channel No.	UHF Channel No.
Hartford, Conn.		18,24	3†	18,24,59†,81
New Haven, Conn.	8	59	8	75†
New London, Conn.	3	63	†	47†,63
Montpelier, Vt.	3	40	8†	40
Lewiston, Maine	8	17	3†	17

	Third Notice		Plan 3	
	VHF Channel No.	UHF Channel No.	VHF Channel No.	UHF Channel No.
Hartford, Conn.		18,24	3†	18,24,59†,81
New Haven, Conn.	8	59	8	75†
New London, Conn.	3	63	†	63,83†
Montpelier, Vt.	3	40	8†	40
Lewiston, Maine	8	17	3†	17

(c) **Statement in Support of The Hartford Times Counterproposal.** The Hartford Times argued that the Hartford area should be considered in terms of the Hartford-New Britain metropolitan district with a population of 501,000, making it the third largest in the New England area and vastly more important as a population and economic center than New London. It was also urged that 78% of the service area of a VHF station operating on Channel 3 at Hartford would overlap the service area of a VHF station operating on Channel 3 at New London. With respect to its proposal to utilize Channel 47 at New London, Hartford Times recognized that such assignment would result in a violation of the UHF assignment limitation requiring 60-mile separation to prevent interference due to oscillator radiation but asserted that the interference would be at a minimum.

(d) **Oppositions and Conflicting Counterproposals to The Hartford Times Counterproposals.** Thames Broadcasting Corp., opposed the deletion of VHF Channel 3 from New London. CBS, Matheson Radio Company, Greylock Broadcasting Company, Regional TV Corporation and Hampden-Hampshire opposed the counterproposal of Hartford Times since it was mutually exclusive with counterproposals for the assignment of VHF channels to Boston, Pittsfield, and Springfield. Lewiston - Auburn Broadcasting Corp., opposed the substitution of Channel 3 for Channel 8 in Lewiston.

(e) **Counterproposal of Travel**

[65] WHAM-TV is presently operating on Channel 6. In the Third Notice the Commission has ordered the license to show cause why the license of WHAM-TV should not be modified to specify Channel 5.

[66] Matheson Radio Company, Inc., objected to all statistics in the Cherry & Webb statement based on Chamber of Commerce or trade area publications and requested that such data be stricken from the record. We believe, however, that such data is admissible in this proceeding.

ers Broadcasting Service Corp. Travelers Broadcasting Service Corp. proposed 2 alternative plans for the assignment of a first VHF channel and a third UHF channel to Hartford. Plan 1 would delete Channel 3 from New London and Plan 2 would delete Channel 10 from Providence by making the following changes in the assignments proposed by the Commission in the Third Notice:

	Third Notice		Plan 1	
City	VHF Channel No.	UHF Channel No.	VHF Channel No.	UHF Channel No.
Hartford, Conn.		18, 24	3†	18, 24, 81† or 83†
New London, Conn.	3	63	†	63, plus 22† or 81† or 83†
Montpelier, Vt.	3	40	8†	40
Lewiston, Maine	8	17	3†	17
Providence, R. I.	10, 12	16, *22	10, 12	16 plus 22† if 81 or 83 is assigned to New London

	Third Notice		Plan 2	
City	VHF Channel No.	UHF Channel No.	VHF Channel No.	UHF Channel No.
Hartford, Conn.		18, 24	10†	18, 24, 81† or 83†
Providence, R. I.	10, 12	16, *22	†, 12	16, *22

(f) Statement in Support of Travelers Broadcasting Service Corp. Counterproposal. In support of its request to delete Channel 3 from New London, Travelers asserted that the population of the Hartford area is 356,000 compared to New London's 30,367; that Channel 3 at Hartford would serve more persons and area than a similar operation at New London; that the use of Channel 3 at New London would be wasteful since approximately half of the signal would be lost over water; and that UHF would not be suitable to the terrain in the Hartford area. With respect to its proposal to assign Providence's Channel 10 to Hartford, Travelers stated that the use of this channel at Hartford would bring a first VHF service to a large population center in addition to providing a second VHF service to an even greater population; while the use of this channel at Providence would merely duplicate the service area of an existing VHF station in that city.

(g) Oppositions and Conflicting Counterproposals to Travelers Broadcasting Service Corporation. Oppositions to the above counterproposal have been filed by Thames Broadcasting Corporation, Cherry & Webb Broadcasting Company and the Outlet Company, WTAG, Inc., Regional TV Corporation, Greylock Broadcasting Company, CBS, Matheson Radio Company, Lewiston-Auburn Broadcasting Corporation and Hampden-Hampshire Corporation.

New Haven

263. (a) **Census Data.** The metropolitan area of New Haven has a population of 263,000 and the city of New Haven has a population of 164,000.

(b) **Existing Station.** Elm City Broadcasting Corporation is licensed for the operation of Station WNHC-TV, New Haven, on Channel 6. This station is presently operating as a community station with 2 kw power at 510 feet antenna height. The Commission ordered the licensee to show cause why the license of WNHC-TV should not be modified to specify operation on Channel 8 in lieu of Channel 6. The Third Notice proposed to remove the community classification of this station and would permit the station to operate with full power and antenna height.

(c) Answer of Elm City Broadcasting Corp. to Show Cause Order. Elm City Broadcasting Corporation acceded to the Commission's proposed change in assignment for WNHC-TV but limited its acceptance of the change on the condition that the proposals set forth in Appendices A and B of the Third Notice be finalized without substantial change prejudicial to Elm City and that the frequency assignments proposed in Appendix C of the Third Notice for communities in Connecticut be adopted. The Commission indicated in the Third Notice that antenna heights above 500 feet would not be authorized where the effect of the utilization of such heights would cause adjacent channel interference to the Grade A service area of another station assuming operation by such station with maximum power and an antenna height of 500 feet. Adjacent channel interference was to be calculated on the basis of O db ratio. The American Broadcasting Company, Inc., licensee of Station WJZ-TV operating on Channel 7 in New York City, and General Teleradio Inc., licensee of Station WOR-TV operating on Channel 9 in New York City, both opposed the assignment of WNHC-TV on Channel 8. These parties stated, however, that they would have no objection to the use of this channel in New Haven if the conditions with respect to the use of antenna height above 500 feet were modified to permit the use of such heights without regard to adjacent channel interference or in the alternative, if the provisions of this section were waived for Stations WJZ-TV and WOR-TV.

Educational Reservations in the State of Connecticut

264. (a) **The Storrs Educational Reservation.** The University of Connecticut supported the reservation of UHF Channel 26 in Storrs for non-commercial educational use. The University stated, however, that "definite action based upon adequate financial support from State public monies stands little chance of becoming an immediate reality"; and that unless an educational channel was reserved for at least a decade their plans for an educational television station could not be realized.

(b) **Counterproposal of Connecticut State Board of Education.** The Connecticut State Board of Education requested the reservation for non-commercial educational use of the following UHF channels: Bridgeport, Channel 43; Hartford, Channel 18; Norwich, Channel 57; and Waterbury, Channel 53.[67] As an alternative to the request for the above listed channels, the Connecticut State Board of Education requested a revision of the Commission's proposed policy with respect to UHF flexibility channels. Specifically, the State Board of Education requested that the Commission permit an educational institution to apply for such a channel in any community in which no television channel had been reserved for non-commercial educational use. The State Board of Education also requested that "the Commission propose a plan which will allow coverage of eastern Connecticut for non-commercial education without entirely eliminating the possibility of a commercial station in that large area." The Board submitted a statement by the Acting Governor of Connecticut declaring that it was the intention of the state administration to introduce before the State General Assembly a bill proposing the authorization to the State Board of Education of $1,200,000 for the construction and operation of an educational broadcast service to serve the entire State of Connecticut. The bill in question, if approved, would be effective during the budgetary period, fiscal 1953-1955.

[67] By Memorandum Opinion and Order dated October 31, 1951, the Commission stated it would not consider the requests of the Board for a reservation of Channels 57 in Norwich and 53 in Waterbury.

Conclusions: Boston and Durham

265. The counterproposal of CBS, in so far as it requests the assignment of VHF Channel 9 in Boston by the substitution of UHF Channel 56 or a flexibility channel in Durham for VHF Channel 11 (Plans 2 and 3) must be denied for the reason that it would result in two violations of the minimum co-channel assignment separations.

266. The CBS counterproposal (Plans 2 and 3) would require co-channel operation of Channel 11 in New York and Providence. WJAR-TV is now operating on Channel 11 in Providence and WPIX is operating on this frequency in New York City. The distance between the transmitters of these stations is 160 miles. It was to improve this low co-channel separation that the Commission issued a show cause order in this proceeding which would require WJAR-TV to move to Channel 10. Under the Commission's plan, the nearest co-channel station to WJAR-TV would be located in Augusta, Maine, at a distance of approximately 185 miles. The CBS counterproposal (Plans 2 and 3) would also require co-channel operation of Channel 13 at Providence and Station WATV at Newark, New Jersey. WATV is presently operating on Channel 13 at Newark and its transmitter is 165 miles from Providence. The Commission's assignment plan would not involve such co-channel operation but would place the second Providence VHF assignment on Channel 12. The nearest co-channel assignment to Providence on Channel 12 is Binghamton, New York, at a separation of about 235 miles. Further, we find that a reduction in the number of VHF assignments in New Hampshire to one is not warranted in order to make another VHF assignment for the City of Boston and the State of Massachusetts.

267. In view of the fact that the CBS counterproposal (Plans 2 and 3) would in two instances reduce the co-channel separations proposed by the Commission below the minimum separations adopted herein and would reduce the number of VHF assignments in New Hampshire to one, the CBS proposal, in so far as it requests the deletion of VHF Channel 11 from Durham (Plans 2 and 3) is denied. On the basis of the record, the reservation of Channel 11 in Durham for non-commercial educational use is finalized.

Conclusions: Boston, Hartford, Springfield, Holyoke, Worcester, Providence

268. The counterproposals of CBS (Plan 1) and Matheson Radio Co., requested the deletion of Channel 10 from Providence in order to assign a VHF channel to Boston. In addition, the counterproposal of Matheson Radio Co. would delete Channel 9 from Manchester, New Hampshire, a city of 83,000 people. The counterproposals of Hampden-Hampshire and Travelers Broadcasting Service Corporation (Plan 2) also requested the deletion of Channel 10 from Providence in order to assign a VHF channel to Springfield-Holyoke and Hartford, respectively. The counterproposal of WTAG, Inc., requested the deletion of Channel 12 from Providence in order to assign that channel to Worcester.

269. All of the foregoing counterproposals seek the deletion of a VHF channel from Providence. Upon careful consideration of all the evidence, we believe that these counterproposals must be denied. The entire State of Rhode Island, with a population of 792,000, has but two VHF assignments; and both of these are located in the City of Providence, which ranks 19th among the nation's metropolitan areas and is the second largest city in the New England area with a metropolitan area population of 737,000. The Matheson Radio Company counterproposal would, in addition, delete the only VHF commercial assignment from the State of New Hampshire. It is our view, under the circumstances presented, that the reduction of the VHF assignments in Rhode Island to one would result in an unfair and inequitable distribution of assignments among the states and that the record does not support the deletion of a VHF channel from Providence. Moreover, with respect to the counterproposals of CBS and Matheson, we do not believe the record warrants the deletion of an assignment from a city as large and as important as Providence in order to create another assignment for Boston. Accordingly, the counterproposals of CBS, Hampden-Hampshire Corporation, Travelers Broadcasting Service Corporation, and WTAG, Inc., are denied in so far as they request the deletion of a VHF channel from Providence; and the counterproposal of Matheson Radio Company requesting the substitution of UHF channels for VHF channels in

Providence and Manchester is also denied.

Conclusions: Show Cause Order (WJAR-TV)

270. An appropriate authorization will be issued to the Outlet Company to specify operation of WJAR-TV on Channel 10.

Conclusions: Providence Educational Reservation

271. On the basis of the record the reservation of UHF Channel 22 in Providence for non-commercial educational use is finalized.

Conclusions: The Boston Educational Reservation

272. The educational organizations in Boston have demonstrated their interest in establishing a non-commercial educational television station in the Boston area. They have supported this interest with concrete plans to establish such a station by banding together in an association, the Lowell Institute Cooperative Council of Boston. They have mobilized their resources and, further, have already established a non-commercial educational FM station.

273. As set out above, CBS opposed the reservation of Channel 2 in Boston for non-commercial educational use and requested the assignment of that channel for commercial use. We recognize that competition in broadcasting, both at the national and local level, should be maintained and stimulated. However, the reservation of channels for non-commercial educational use of necessity results in a reduction of potential commercial competition by providing fewer channels to the commercial service. But the demands of commercial interests and educational interests for the assignment of channels to their respective services require an evaluation of the ends to be served by both classes of stations. We can find no justification on the record for the conclusion that the alleged demands of economic competition outweigh the benefits to be derived from non-commercial educational television so as to require us to deviate from our general policy with respect to the designation of educational reservations and place the Boston reservation in the UHF.

274. We reject CBS's contention that the availability to it of a commercial channel in Boston is an appropriate matter for our consideration at this time. In this rule making proceeding we are concerned with the assignments of channels to meet the needs and interests of states and communities for non-commercial educational and commercial television. The qualifications or particular circumstances of individual applicants are matters that can and should be fully determined in licensing proceedings.

275. In view of the foregoing, the CBS counterproposal is denied in so far as it requests a shift of the reservation to a UHF channel and the reservation of Channel 2 in Boston for non-commercial educational use is finalized.

Conclusions: Boston and Brockton

276. The counterproposal of Enterprise Publishing Company seeks the assignment to Brockton of a VHF channel proposed in the Third Notice for Boston. Brockton will receive Grade A service from the operation of VHF stations in Boston since it is located less than 20 miles from that city. It is our view that where a community seeks a first VHF assignment by the deletion of a VHF assignment from one of the very largest cities of the United States, the deletion is not warranted where the smaller city receives Grade A VHF service from stations located in the larger city. It is our view, therefore, that the deletion of a VHF assignment from a city as large and as important as Boston to create one for Brockton is not warranted.

Conclusions: Springfield-Holyoke, Hartford, Pittsfield, New London

277. Parties in three cities, Springfield, Hartford and Pittsfield, seek the assignment of Channel 3 for their respective cities by deleting that channel from New London. The counterproposals of Regional TV Corporation and Hampden-Hampshire Corporation requested the deletion of Channel 3 from New London and the assignment of that channel to Springfield. The counterproposal of Greylock Broadcasting Corporation requested the deletion of Channel 3 from New London and the assignment of that channel to Pittsfield. The counterproposals of Hartford Times, Inc., and Travelers Broadcasting Service Corporation requested the deletion of Channel 3 from New London and the assignment of that channel to Hartford.

278. We stated above in connection with the discussion of requests for the deletion of a VHF channel from Providence that the reduction of VHF assignments in Rhode Island to one would, in our view, result in an unfair and inequitable distribution of assignments among the states. We are of the same view with respect to requests for the deletion of a VHF channel from New London in order to assign a channel to Pittsfield or to Springfield-Holyoke. We do not believe, under the circumstances presented, that the second VHF channel proposed to be assigned to Connecticut should be deleted in order to assign a fifth VHF channel to the State of Massachusetts.

279. It is our view, however, that the requests for the deletion of Channel 3 from New London in order to assign that channel to Hartford are meritorious and should be granted. The proposed assignment of Channel 3 to New London was predicated primarily on the Commission's desire for maintaining optimum co-channel spacings wherever possible. The Commission has reconsidered the need for such wider spacings in this area. In light of the record, we have determined that closer spacings can be utilized in an area such as New England where high population centers lie in very close proximity. The population of Hartford is more than 5 times the population of New London, and Hartford is presently without any VHF assignment. Moreover, the New London area would receive VHF service from stations located in Providence and New Haven; and if Hartford is assigned a VHF channel, New London would receive Grade A service from a station in Hartford. It is our view, therefore, that Channel 3 should be deleted from New London and assigned to Hartford.

280. Accordingly, the counterproposals of Regional TV Corporation, Hampden-Hampshire Corporation and Greylock Broadcasting Corporation are denied, and the counterproposals of the Hartford Times, Inc., and Travelers Broadcasting Service Corporation are granted, in so far as they requested the deletion of Channel 3 from New London and the assignment of that channel to Hartford.

Conclusions: Requests for UHF Assignments in Connecticut

281. Counterproposals have been filed by three parties requesting the assignment of additional UHF channels in Connecticut. The Hartford Times, Inc., requested the assignment to New London of Channel 47 to replace Channel 3. It also requested that two additional UHF channels, Channel 59 proposed for New Haven and flexibility Channel 81, be also assigned to Hartford. The Connecticut State Board of Education requested the reservation for non-commercial use of several UHF channels in Connecticut. Finally, there is the request of Travelers Broadcasting Service Corporation for the assignment of UHF Channel 81 or 83 to Hartford and the assignment of a UHF channel to New London to replace Channel 3.

282. Since we have deleted VHF Channel 3 from New London, it is our view that a UHF channel should be assigned to that community in substitution for the deleted channel. Channel 47 can not be assigned to New London as proposed by Hartford Times, Inc., since such assignment would be in violation of the minimum separation requirement established herein. Accordingly, UHF Channel 81 is assigned to New London.

283. There remains for our consideration the conflicting UHF demands of the Connecticut State Board of Education and the Hartford commercial interests.[68] It is our view that on the basis of the record the request of the Connecticut State Board of Education is entitled to the highest consideration. The Board of Education has requested educational reservations in Hartford and Bridgeport, and in addition that the Commission propose a plan which would allow coverage of eastern Connecticut without entirely eliminating the possibility of a commercial station in that area. It is impossible because of the scarcity of channels in this area to satisfy the whole request of the Connecticut State Board of Education. We feel, however, that it is possible to grant the counterproposal to the following extent: We have set aside Channel 24 in Hartford to be reserved for use by a non-commercial educational station. Likewise, we have reserved Channel 71 in Bridgeport and Channel 63 in Norwich for a non-commercial educational television station. To accomplish this we have, however, deleted the assignment to Storrs, and substituted Channel 26 in New London for Channel 63. In doing so, we have considered the fact that a Hartford station can serve Storrs. We have also considered that there is a greater likelihood, on the basis of the record, that an educational station will be built in Norwich than in Storrs. In addition it may be pointed out that a Hartford station would also provide service to Waterbury.

[68] No request was made by the State Board for a VHF reservation in Hartford for non-commercial educational use.

284. In view of the total spectrum space available for use in the State of Connecticut, the Commission is not in a position to grant any further assignments to Hartford for commercial purposes. The assignments we have made permit practically no further assignments in this area in either the VHF or the UHF. Under these circumstances, further assignments to Hartford are not warranted and the requests of the Hartford Times, Inc., and Travelers Broadcasting Service Corporation for additional UHF assignments in Hartford must be denied.

Conclusions: New Haven (WNHC-TV) Show Cause Order

285. We have in another portion of this Report discussed the problem of whether the Commission, in effecting an assignment Table and in establishing Rules and standards for the assignment of television stations, should permit the use of antenna heights above 500 feet without regard to possible adjacent channel interference that might be caused as a result of such operation. We have there reached the decision that in view of the great gain in service areas at the expense of minor interference, and for other reasons there set out, the Commission will permit the use of antenna heights above 500 feet without regard to adjacent channel intereference so long as specified minimum mileage separations are maintained.

286. The situation presented with respect to adjacent channel operation in New York and New Haven illustrates the soundness of the Commission's decision on this matter. The record indicates that if WJZ-TV operates with 200 kw at its present site on the Empire State Building, that station would increase its total Grade A land area coverage from 3,670 to 5,430 square miles, an increase of 48%. On the other hand, the interference area that would be caused to WNHC-TV operating on Channel 8 with 200 kw at 510 feet would be only 75 square miles, or at the most, 88 square miles as contended by Elm City. The remaining Grade A service area of WNHC-TV would be approximately 2400 square miles. Under our decision with respect to power and height in Zone I, the interference to WNHC-TV would be slightly increased over the 88 square mile figure. However, the total Grade A remaining service area of WNHC-TV would be considerably increased. We are of the opinion that this small amount of interference should not negate the great gain in coverage that would be derived from the operation of WJZ-TV at its present antenna height with full power. Similarly, WOR-TV operating on Channel 9 in New York would gain extended coverage with the use of full power at its present antenna height while the interference to WNHC-TV would be slight. We do not believe as is contended here, that Section 307(b) of the Communications Act requires us to prohibit such operation of WJZ-TV and WOR-TV. On the contrary, we are of the view that the mandate of the Communications Act that the Commission shall provide an efficient distribution of radio service requires that the small amount of adjacent channel interference should not

preclude the large gain in service area. In any event, adjacent channel interference is not a loss of service to the public since in the "interference area" the viewer would always have at least one service, and in some areas both services.

287. In view of the foregoing, the Commission is finalizing the assignment of Channel 8 to New Haven. An appropriate authorization to Elm City Broadcasting Corporation will be issued to specify operation of WNHC-TV on Channel 8.

Final Assignments and Reservations

288. The following assignments and reservations are adopted:

City	VHF Channel No.	UHF Channel No.
Durham	*11	
Boston	*2, 4, 5, 7	44, 50, 56
Brockton		62
Pittsfield		64
Springfield-Holyoke		55, 61
Worcester		14, 20
Hartford	3	18, *24
New Haven	8	59
New London		26, 81
Bridgeport		43, 49, *71
Norwich		57, *63
Providence	10, 12	16, *22
Waterbury		53

HANOVER, NEW HAMPSHIRE: EDUCATIONAL RESERVATION

289. **(a) Proposed Reservation.** In the Third Notice no channel assignment was proposed for Hanover.

(b) Counterproposal of Dartmouth College. Dartmouth College filed a counterproposal requesting that UHF Channel 21 be assigned to Hanover to be reserved for noncommercial educational use. This assignment would be accomplished by substituting Channel 51 in Rochester, New Hampshire, for Channel 21.

(c) Statement in Support of Dartmouth College Counterproposal. Dartmouth College stated that it had investigated the financing required for the construction of UHF television transmitting facilities and that the Board of Trustees was prepared to seek funds for this purpose. Dartmouth College's total operating budget for the fiscal year ending June 30, 1951 was in excess of $5,400,000. Dartmouth's total assets as of June 30, 1951 were in excess of $38,000,000.

(d) Opposition to Dartmouth College Counterproposal. Mid-Hudson Broadcasters, Inc., Poughkeepsie, New York, opposed Dartmouth College's counterproposal on the grounds that in the Third Notice, Channel 21 was assigned to Poughkeepsie, and that "the mileage separation between Poughkeepsie, New York, and Hanover, New Hampshire, is 158 miles." Mid-Hudson pointed out that this would violate the minimum UHF co-channel spacing (165 miles) prescribed by the Commission in its Third Notice. Both Poughkeepsie and Hanover are situated in Zone I.

CONCLUSIONS

290. We have above reconsidered the matter of co-channel spacings and have reduced the minimum UHF co-channel assignment spacing in Zone I to 155 miles. On the basis of this revised minimum mileage separations requirement, and in view of the foregoing, it is concluded that UHF Channel 21 should be assigned to Hanover and reserved for non-commercial educational use. Channel 51 will, therefore, be substituted in Rochester, New Hampshire in place of Channel 21.

Final Assignments and Reservations

291. The following assignments and reservation are adopted:

City	UHF Channel No.
Rochester, N. H.	51
Hanover, N. H.	*21

STATE OF NEW YORK: EDUCATIONAL RESERVATIONS

292. **(a) Proposed Reservations.** In the Third Notice the Commission proposed the following reservations for non-commercial educational use in New York State:

City	UHF Channel No.
Albany-Schenectady-Troy	*17
Binghamton	*46
Buffalo	*23
Ithaca	*14
New York City	*25
Rochester	*21
Syracuse	*43
Utica-Rome	*25

(b) Support of the Educational Reservations: The Board of Regents of the University of the State of New York supported the foregoing reservations for non-commercial educational use in the state of New York. The Board stated that it proposes to utilize the resources of more than 8,000 state educational and cultural institutions to afford educational opportunities to more than 91% of the population of the state. Sample program schedules, detailed as to content and objectives, were submitted by the Board. The Board proposes to construct a non-commercial educational television network at an estimated cost of $3,855,540 with an annual technical operating cost of $2,273,941 based on 16 hours of operation Monday through Friday and 12 hours Saturday and Sunday. Programming would be apportioned among the public and private institutions under its supervision and costs will be borne by participating institutions supplemented by state aid. Statements were also filed by the following institutions in support of the reservations of channels for non-commercial educational use in their respective communities and in support of the State Board's plan for a state-wide network: The City College of the City of New York, the Board of Education of the City of New York, Fordham University, The College of Forestry of the State of New York, Syracuse University, the Brooklyn Public Library, the New York State College for Teachers at Buffalo, the University of Rochester, the Rochester Institute of Technology, Rochester Board of Education and the University of Buffalo. No oppositions were filed with respect to the educational reservations proposed in the Third Notice.

(c) Counterproposal of Board of Regents of the University of the State of New York. The Board of Regents requested the additional reservation of a channel for non-commercial educational use in New York City, Malone and Poughkeepsie.

(d) Statement in Support of Board of Regents Counterproposal. With respect to New York City, the Board requested that either UHF Channel 19 or 31, which the Commission proposed to assign for commercial use, be reserved instead for non-commercial educational use. The Board urged that one educational station in New York City is inadequate to meet the needs of a state-wide program and the special educational needs of the city itself. No oppositions were filed to this counterproposal. With respect to Malone, the Board requested that UHF Channel 20, which the Commission proposed to assign for commercial use, be reserved instead for non-commercial educational use. In the alternative, the Board requested the assignment and reservation of an additional channel for non-commercial education use. No oppositions were filed to this counterproposal. With respect to Poughkeepsie, the Board requested that UHF Channel 21, which the Commission proposed to assign for commercial use, be reserved instead for non-commercial educational use. The Mid-Hudson Broadcasters, Inc., of Poughkeepsie opposed this request on the grounds that it would be in violation of the Commission's announced method employed in the making of non-commercial educational station reservations. In the alternative, the Board requested the assignment and reservation of an additional channel for non-commercial educational use. No oppositions were filed to this alternative request.

CONCLUSIONS

293. We believe the record supports the assignment and reservation of channels in Malone and Poughkeepsie for non-commercial educational use. Since we have assigned only one channel to these cities for commercial purposes, we are assigning Channel 66 to Malone and Channel 83 to Poughkeepsie and we are reserving these channels for use by non-commercial educational stations.[69]

294. In view of the total spectrum space available for use in this area, we do not believe the Board of Regents' request for the reservation of a second channel for non-commercial educational use in New York City is warranted. The assignments we have made herein permit practically no further assignments in this area in either the VHF or the UHF. This portion of the request of the Board of Regents is therefore denied.

295. On the basis of the foregoing, the reservations of channels for non-commercial educational use in Albany-Schenectady-Troy, Binghamton, Buffalo, Ithaca, New York City, Rochester, Syracuse and Utica-Rome are finalized.

FINAL RESERVATIONS

296. The following reservations for non-commercial educational use are adopted:

City	UHF Channel No.
Albany-Schenectady-Troy	*17
Binghamton	*46
Buffalo	*23
Ithaca	*14
Malone	*66
New York City	*25
Poughkeepsie	*83
Rochester	*21
Syracuse	*43
Utica-Rome	*25

Binghamton, New York

297. **(a) Proposed Assignments and Reservations.** In the Third Notice the Commission proposed the assignment of VHF Channel 12 and UHF Channels 40 and 46 for Binghamton, with Channel 46 reserved for non-commercial educational use.

(b) Census Data. The standard metropolitan area of Binghamton has a population of 184,000 and the City of Binghamton has a population of 81,000.

(c) Existing Stations. Clark Associates, Inc., is licensed for the operation of Station WNBF-TV on Channel 12.

(d) Counterproposal of Binghamton Broadcasters, Inc. Binghamton Broadcasters, Inc., proposed the additional assignment of Channel 7 to Binghamton. No other changes in the assignments proposed by the Commission in the Third Notice were requested.

(e) Statement in Support of Binghamton Broadcasters, Inc. Counterproposal. Binghamton Broadcasters, Inc., urged that the additional assignment of Channel 7 to Binghamton is necessary to achieve a fair and equitable distribution of television service. It was recognized by Binghampton Broadcasters, Inc., that a grant of its counterproposal would result in a co-channel assignment separation of 136 and 160 miles, respectively, to WJZ-TV, New York and Buffalo.

(f) Oppositions. The American Broadcasting Company, Inc., New York, licensee of Station WJZ-TV, the Buffalo Courier Express, Inc., of Buffalo and Meredith Syracuse Television Corporation, licensee of Station WHEN at Syracuse, New York, opposed the Binghamton counterproposal.

Conclusions

298. The counterproposal of Binghamton Broadcasters, Inc., must be denied for the reason that it would result in co-channel assignment separations between Binghamton and WJZ-TV, New York and between Binghamton and Buffalo below the minimum provided by our decision herein for Zone I.

Final Assignments and Reservations

299. The following assignments and reservation are adopted:

City	VHF Channel No.	UHF Channel No.
Binghamton	12	40, *46

BUFFALO, NIAGARA FALLS, ITHACA, NEW YORK

300. **Proposed Assignments and Reservations.** In the Third Notice the Commission proposed the following assignments and reservations:

City	VHF Channel No.	UHF Channel No.
Buffalo	4, 7	17, *23
Niagra Falls	2	
Ithaca		*14, 20

Buffalo-Niagara Falls

301. **(a) Census Data.** The standard metropolitan area of Buffalo has a population of 1,089,000. The city of Buffalo has a population of 577,000. The city of Niagara Falls has a population of 91,000.

(b) Existing Stations. WBEN, Inc., is licensed for the operation of Station WBEN-TV on Channel 4 at Buffalo.

(c) Joint Counterproposal of Buffalo Courier Express, Inc., WGR Broadcasting Corporation and WKBW, Inc. Buffalo Courier Express, Inc., WGR Broadcasting Corporation and WKBW, Inc., have filed joint counterproposals requesting the assignment of Channels 2 and 9 by making the following changes in the assignments proposed by the Commission in the Third Notice:

[69] The Board of Regents also suggested that provision be made for share time operation as between non-commercial educational and other television services if no "reasonable solution to the problem" presented in Malone and Poughkeepsie could be found. In view of the fact that channels have now been reserved in these cities for use by non-commercial educational stations, this suggestion has been given no further consideration.

City	Third Notice VHF Channel No.	Third Notice UHF Channel No.	Counterproposal VHF Channel No.	Counterproposal UHF Channel No.
Buffalo	4,7	17,*23	2†,4,7,9†	17,*23
Niagara Falls	2		†	59† or 62†
Toronto, Ontario	6,9,11	19,25	6,8†,11	19,25
Owen Sound, Ontario	8	26	3†	26
Orillia, Ontario	3	30	12†	30

(d) Statement in Support of Buffalo Joint Counterproposal. In support of the request to delete Channel 2 from Niagara Falls and assign that channel to Buffalo it was contended that the assignment of Channel 2 to Niagara is in accordance with the Commission's proposals in other areas to assign VHF channels to the principal cities of metropolitan area rather than to the smaller cities within the metropolitan area. The proposal to assign Channel 9 to Buffalo would result in a co-channel separation of 169 miles between Toronto and Syracuse and an adjacent channel separation of 59 miles between Toronto and Buffalo.

(e) Opposition to the Joint Counterproposal of Buffalo Courier Express, Inc., WGR Broadcasting Corporation and WKBW, Inc. The Niagara Falls Gazette Publishing Company, Niagara Falls, New York, supported the proposed assignment of Channel 2 to Niagara Falls and opposed the Buffalo counterproposals to delete Channel 2 and substitute a UHF channel therefor.

Ithaca

302. **(a) Census Data.** The city of Ithaca has a population of 29,000.

(b) Counterproposal of Cornell University. Cornell University requested the assignment of Channel 3 to Ithaca by making the following changes in the assignments proposed by the Commission in the Third Notice:

City	Third Notice VHF Channel No.	Third Notice UHF Channel No.	Proposed Changes VHF Channel No.	Proposed Changes UHF Channel No.
Ithaca		*14, 20	3†	*14, 20
Niagara Falls	2		†	62†
Buffalo	4, 7	17, *23	2†, 7	17, *23
Rochester	5, 10	15, *21, 27	4†, 10	15, *21, 27
Syracuse	3, 8	*43	5†, 8	*43

(c) Statement in Support of Cornell Counterproposal. Cornell contended that priorities 1, 2 and 3 are effectuated by its proposal and that UHF is not feasible in the irregular terrain in Ithaca.

(d) Opposition to Cornell Counterproposal. WBEN, Inc., (WBEN-TV), Buffalo, New York, WAGE, Inc., Syracuse, New York, the Brockway Company, Watertown, New York, the Buffalo Courier Express, Inc., and the Niagara Falls Publishing Company opposed the Cornell counterproposal. Gable Broadcasting Company, Altoona, Pa., filed a conflicting counterproposal.

Conclusions

303. The foregoing counterproposals consist of requests for the assignment of additional channels to Buffalo and to Ithaca, respectively, by the deletion of Channel 2 from Niagara Falls and by making the other changes in the assignments proposed in the Third Notice, set forth above.

304. The joint counterproposal of the Buffalo parties requesting the assignment of Channel 9 to that city would result in a co-channel separation of 169 miles between Toronto and Syracuse and an adjacent separation of 59 miles between Toronto and Buffalo. This counterproposal is denied for the reasons set forth above in the discussion of Canadian-United States assignments.

305. With respect to the assignments proposed for Buffalo and for Niagara Falls it is our view based on the record that Buffalo and Niagara Falls should be considered as a single entity for assignment purposes in view of the proximity and strong identity of interests of these cities. Niagara Falls is situated 17 miles from Buffalo. In the 1940 census these cities were included in the "Buffalo-Niagara Falls metropolitan district"; and in the 1950 census Niagara Falls was included within the Buffalo metropolitan area. Further, we believe that the assignment of an additional UHF channel to Buffalo-Niagara Falls is warranted. Accordingly, Channel 59 is assigned to these cities. Channel 23, reserved for educational use, and Channel 17 are only available for assignment in Buffalo because of the effect of use of these channels in Niagara Falls upon Canadian assignments.

306. With respect to the counterproposal of Cornell University, we do not believe the record warrants the deletion of a VHF channel from Niagara Falls and Buffalo, cities with a combined population of over 600,000, in order to create a VHF assignment for Ithaca, a city of 29,000.

307. In view of the foregoing, the counterproposal of Cornell University is denied and the joint counterproposal of Buffalo Courier Express, Inc., WGR Broadcasting Corporation, Inc., and WKBW, Inc., is granted in part and denied in part.

Final Assignments and Reservations

308. The following assignments and reservations are adopted:

City	VHF Channel No.	UHF Channel No.
Buffalo-Niagara Falls	2, 4, 7	59
Buffalo		17, *23
Ithaca		*14, 20

WATERTOWN AND SYRACUSE, NEW YORK

309 **(a) Proposed Assignments and Reservations.** In the Third Notice the Commission proposed the following assignments and reservations:

City	VHF Channel No.	UHF Channel No.
Watertown		35
Syracuse	3, 8	*43

(b) Census Data. The city of Watertown has a population of 34,000. The standard metropolitan area of Syracuse has a population of 342,000. The City of Syracuse has a population of 221,000.

(c) Existing Stations. Central New York Broadcasting Corp., is licensed for operation of WSYR-TV, Syracuse, on Channel 5. The Commission ordered the licensee to show cause why the license of WSYR-TV should not be modified to specify operation on Channel 3 in lieu of Channel 5. Central New York Broadcasting Corp. stated it had no objection to modification of its license. Meridith Syracuse Television Corporation has a construction permit for station WHEN on Channel 8 in Syracuse, and is operating under special temporary authorization.

Watertown

310. **(a) Counterproposal of The Brockway Company.** The Brockway Company requested the additional assignment of VHF Channel 11 to Watertown by making the following changes in the assignments proposed bf the Commission in the Third Notice:

City	Third Notice VHF Channel No.	Third Notice UHF Channel No.	Plan 1 VHF Channel No.	Plan 1 UHF Channel No.	Plan 2 VHF Channel No.	Plan 2 UHF Channel No.
Watertown		35	11†	35	11†	35
Ottawa-Hull, Ontario	4, 9, 11	30, 40	4, 5†, 9	30, 40	4, 7†, 9	30, 40
Montreal-Verdun, Quebec	2, 6, 7, 10, 12	15, 44			2, 6, 8†, 10, 12	15, 44
Hamilton, Ontario	13	51, 57			11†	51, 57
Toronto, Ontario	6, 9, 11	19, 25			6, 9, 13†	19, 25

(b) Statement in Support of the Brockway Company Counterproposal. Brockway Company urged that its counterproposal would provide a first VHF assignment to the area of New York State commonly known as the "North Country." Plan 1 would result in a co-channel separation on Channel 11 of 174 miles between Watertown and Toronto and a co-channel separation of 179 miles on Channel 5 between Ottawa-Hull and Rochester. Plan 2 would result in the co-channel separation of 230 miles between Buffalo and Ottawa-Hull on Channel 7 and 195 miles on Channel 8 between Lewiston and Montreal-Verdun and 187 miles between Pembroke and Toronto on Channel 13. In addition Plan 2 would result in an adjacent channel separation of 72 miles between London on Channel 10 and Hamilton on Channel 11.

(c) Oppositions and Conflicting Counterproposals to the Brockway Counterproposal. The following parties filed oppositions and conflicting counterproposals: Travelers Broadcasting Service Corporation, Hartford, Connecticut; Hartford Times, Inc., Hartford, Connecticut; Greylock Broadcasting Company, Pittsfield, Massachusetts; Hampden-Hampshire Corp., Holyoke, Massachusetts; Regional TV Corporation, Springfield, Massachusetts and WAGE, Inc., Syracuse, New York.

Syracuse

311. **(a) Counterproposal of WAGE, Inc.** WAGE, Inc. requested the additional assignment of VHF Channel 11 to Syracuse by making the following changes in the assignments proposed in the Third Notice:

City	Third Notice VHF Channel No.	Third Notice UHF Channel No.	Counterproposal VHF Channel No.	Counterproposal UHF Channel No.
Syracuse, N. Y.	3, 8	*43	3, 8, 11†	*43
Hamilton, Ont.	13	51, 57	11†	51, 57
Toronto, Ont.	6, 9, 11	19, 25	6, 9, 13†	19, 25
Ottawa-Hull, Ont.	4, 9, 11	30, 40	4, 5†, 9	30, 40
Pembroke, Ont.	13	32	11†, 13	32

(b) Counterproposal of WAGE would result in a co-channel assignment separation of 188 miles between Hamilton and Syracuse on Channel 11, 187 miles between Pembroke and Toronto on Channel 13, 183 miles between Rochester and Ottawa-Hull on Channel 5 and 187 miles between Toronto and Pembroke on Channel 11. In addition it would result in an adjacent channel assignment separation of 72 miles between London and Hamilton.

(c) Oppositions and Conflicting Counterproposals to the WAGE Counterproposal. The following parties submitted oppositions and conflicting counterproposals to the counterproposal of WAGE, Inc.: Clark Associates, Inc. (WNBF-TV), Binghamton, New York, and the Brockway Company, Watertown, New York.

Conclusions

312. The foregoing counterproposals must be rejected for the reasons set forth above in the discussion of Canadian-United States assignments. Accordingly, the counterproposal of the Brockway Company and WAGE, Inc., must be denied.

313. An appropriate authorization to Central New York Broadcasting Corporation will be issued to specify operation on WSYR-TV on Channel 3.

Final Assignments and Reservations

314. The following assignments and reservation are adopted:

City	VHF Channel No.	UHF Channel No.
Watertown		48 [79]
Syracuse	3, 8	*43

[79] Channel 48 has been assigned to Watertown in view of our action below granting the joint alternative counterproposal of Meredith Champlain Television Corp., and Troy Broadcasting Co., Inc., which requested in part the substitution of UHF Channel 48 for UHF Channel 35 in Watertown.

CORNING, NEW YORK

315. **(a) Proposed Assignments.** In the Third Notice no assignments were proposed for Corning.

(b) Census Data. The city of Corning has a population of 18,000.

(c) Counterproposal of Corning Leader, Inc. Corning Leader, Inc., requested the assignment of VHF Channel 9 to Corning. This assignment would require no other changes in the assignments proposed by the Commission in the Third Notice.

(d) Statement in Support of Corning Leader Counterproposal. Corning Leader urged that its counterproposal would meet the Commission's standards, with the exception of a separation of 159

miles between Corning and Toronto on Channel 9.

(e) **Oppositions and Conflicting Counterproposal to the Corning Leader Counterproposal.** The following parties filed oppositions and conflicting counterproposals to the counterproposal of Corning Leader: Buffalo Courier Express, Inc.; WGR Broadcasting Corporation and WKBW, Inc., all of Buffalo.

Conclusion

316. The foregoing counterproposal of Corning Leader is denied for the reasons set forth in the discussion of Canadian-United States assignments.

ROCHESTER, NEW YORK

317. **Existing Station.** Stromberg-Carlson is licensed for the operation of Station WHAM-TV, Rochester, on Channel 6. The licensee was ordered to show cause why the license of WHAM-TV should not be modified to specify Channel 5 in lieu of Channel 6. The licensee has filed no objection to the show cause order.

Conclusion

318. In view of the foregoing, an appropriate authorization to Stromberg-Carlson will be issued to specify operation of WHAM-TV on Channel 5.

ALBANY-SCHENECTADY-TROY, NEW YORK

319. (a) **Proposed Assignments and Reservation.** In the Third Notice the Commission proposed three channels to Albany-Schnectady-Troy: VHF Channel 6 and UHF Channels *17 and 23.

(b) **Census Data.** The standard metropolitan area of Albany-Schenectady-Troy has a population of 514,000 and the cities of Albany, Schnectady and Troy have populations of 135,000, 92,000 and 72,000, respectively.

(c) **Existing Stations.** General Electric Co. is licensed to operate Station WRGB, Schnectady, on Channel 4. The Commission ordered the licensee to show cause why the license of WRGB should not be modified to specify operation on Channel 6 in lieu of Channel 4. General Electric has not filed any objection to the order.

(d) **Counterproposals of Meredith Champlain Television Corp. and Troy Broadcasting Co., Inc.** Meridith Champlain Television Corp., and Troy Broadcasting Co., Inc. requested the additional assignment of one or more UHF channels to Albany-Schnectady-Troy by making the following alternative changes in the assignments proposed by the Commission in the Third Notice:

	Third Notice		Troy Counterproposal	
City	VHF Channel No.	UHF Channel No.	VHF Channel No.	UHF Channel No.
Albany-Schenectady-Troy	6	*17,23	6	*17,23,41†
Oneonta		48		62†

	Third Notice		Meredith Counterproposal	
City	VHF Channel No.	UHF Channel No.	VHF Channel No.	UHF Channel No.
Albany-Schenectady-Troy	6	*17,23	6	*17,23
Schenectady				35†,41†
Watertown		35		62†

	Third Notice		Alternate Joint Counterproposal	
City	VHF Channel No.	UHF Channel No.	VHF Channel No.	UHF Channel No.
Albany-Schenectady-Troy	6	*17,23	6	*17,23,
Oneonta		48		35†, 41†
Watertown		35		62†
				48†

Conclusion

320. With the exception of UHF Channel 35, the rearrangement of the channels requested in the joint alternative counterproposal can be accomplished without prejudice to the assignments proposed for any other city. Channel 35, under the separation standards adopted herein for the UHF, can be assigned only to Schenectady. In view of the size and importance of the tri-city area we believe the assignment of 2 additional UHF channels to Albany-Schenectady-Troy is warranted. An appropriate authorization will be issued to General Electric Company to specify operation of WRGB on Channel 6.

Final Assignments and Reservation

321. The following assignments and reservation are adopted.

City	VHF Channel No.	UHF Channel No.
Albany-Schenectady-Troy	6	*17,23,41
Schenectady		35
Watertown		48
Oneonta		62

KINGSTON, NEW YORK

322. (a) **Proposed Assignments.** In the Third Notice the Commission did not propose any assignments to the city of Kingston.

(b) **Census Data.** The city of Kingston has a population of 29,000.

(c) **Counterproposal of Kingston Broadcasting Corporation.** Kingston Broadcasting Corporation requests that Channel 66 be assigned to Kingston.

(d) **Statement in Support of the Kingston Broadcasting Corp. Counterproposal.** Kingston Broadcasting Corp. stated that other less populated communities in the states of New York, Massachusetts and Connecticut have been assigned one or more channels.

Conclusion

323. The Commission believes that the record supports the assignment of a channel to Kingston, New York. Accordingly, the counterproposal of Kingston Broadcasting Corp. is granted.

Final Assignment

324. The following assignment is adopted:

City	UHF Channel No.
Kingston	66

NEWARK, NEW JERSEY AND NEW YORK, NEW YORK

325. (a) **Proposed Assignments and Reservation.** In the Third Notice the Commission proposed the following assignments and reservation.

City	VHF Channel No.	UHF Channel No.
Newark New York City	13 2,4,5,7,9,11	19,*25,31

(b) **Census Data.** The standard metropolitan area of New York-Northeastern New Jersey has a population of 12,912,000. The cities of Newark and New York have populations of 439,000 and 7,892,000, respectively.

(c) **Existing Stations.** Bremer Broadcasting Corporation has a construction permit for Station WATV, Newark, on Channel 13, and is operating under special temporary authorization; Allen B. DuMont Laboratories, Inc., is licensed for Station WABD, New York City, on Channel 5; Columbia Broadcasting System, Inc., is licensed for Station WCBS-TV, New York City, on Channel 2; American Broadcasting Co., Inc., has a construction permit for Station WJZ-TV, on Channel 7 in New York City, and is operating under special temporary authorization; National Broadcasting Company is licensed for Station WNBT, New York City, on Channel 4; Don Lee Broadcasting System is licensed for Station WOR-TV, New York City, on Channel 9; WPIX, Inc. has a construction permit for Station WPIX, New York City, on Channel 11 and is operating under special temporary authorization.

(d) **Counterproposal of Bremer Broadcasting Corporation.** Bremer Broadcasting Corporation requested that instead of separate assignments for Newark and New York City, the Commission retain the area designation contained in the existing rules and regulations and assign all the channels to the New York-Northeastern New Jersey area.

(e) **Statement in Support of the Bremer Counterproposal.** It was asserted that inasmuch as the 1950 census records list New York and Northeastern New Jersey as one metropolitan area, separate assignments of channels in such an undivided metropolitan area is unreasonable and would not constitute a fair, efficient and equitable distribution of radio facilities. Bremer contended that there is no inconsistency in its being licensed to serve the New Jersey area in particular, while at the same time it serves the whole New York-Northeastern New Jersey metropolitan area; and that assigning Channel 13 to New York-Northeastern New Jersey metropolitan area would be "without diminution of [its] obligation to render an adequate electrical and acceptable program service to Newark and Northeastern New Jersey."

(f) **Opposition.** WPIX, Inc. opposed the Bremer counterproposal and supported the Commission's assignments for Newark and New York City. WPIX asserted that WATV was licensed as a Newark station and that Channel 13 should be classified as a channel assigned to Newark.

Conclusions

326. We do not believe that any basis has been established in this record for the assignment of channels to the New York-Northeastern New Jersey area. Prior to the amendment of the Table of Assignments in this proceeding. Section 3.606 of the Commission's Rules provided for the assignment of channels to metropolitan districts as defined in the 1940 census. The assignments proposed in the Third Notice, however, and the final assignments adopted herein, have been made to particular cities only, and our Rules have been predicated upon assignments to cities and not to areas. Further, upon the basis of the record we are not convinced that such common interests exist between New York City, New York and Newark, New Jersey so as to warrant the treatment of these cities as one community for assignment purposes. Accordingly, Channel 13 has been assigned to Newark and not to the New York-Northeastern New Jersey area or to New York City and Newark jointly.

FINAL ASSIGNMENTS AND RESERVATIONS[71]

327. The following assignments and reservation are adopted:

City	VHF Channel No.	UHF Channel No.
New York, N. Y.	2,4,5,7,9,11	*25, 31
Newark, N. J.	13	

STATE OF NEW JERSEY EDUCATIONAL RESERVATIONS

328. (a) **Proposed Reservations.** In the Third Notice the Commission did not propose the reservation of any channels in New Jersey communities for non-commercial educational use.

(b) **Counterproposal of State of New Jersey.** The Commissioner of Education, State of New Jersey, requested that UHF channels be assigned to Andover, New Brunswick, Montclair, Hammonton, Freehold and Camden. The request was based upon a survey made by DuMont, RCA and General Electric engineers indicating that six UHF stations would be needed to give complete non-commercial educational coverage to the state. It was represented that the State of New Jersey intends to commence immediately the construction of a station on the campus of Rutgers University, New Brunswick, and to proceed with other construction as rapidly as feasible. The cost of construction and operation for one year of one station was estimated at $500,000. It was noted that the State believes this amount can be raised, pointing to the 1950-1951 public school budget of $130,825,000.00 as an indication of financial resources of the State. The Commission was advised that the Board of Trustees of Rutgers University, the State University of New Jersey, adopted a resolution on June 8, 1951, indicating its desire to locate an educational television station on the campus, offering to make land available, without charge, and promising the full support of its faculty. Rutgers also submitted as part of the State's presentation, a suggested list and description of programs suitable for presentation over a station located on the campus. No objection was filed to these proposals.

Conclusions

329. On the basis of the showing made by the State of New Jersey, the Commission has reserved the following channels for use by non-commercial educational television stations: New Brunswick, Channel 19, Hammonton, Channel 70, Montclair, Channel 77, Camden,

[71] With respect to UHF Channel 19, see the discussion of the New Jersey educational reservations below.

Channel 80, Freehold, Channel 74, and Andover, Channel 69. The assignment of UHF Channel 19 to New Brunswick, N. J. for educational purposes is made possible by the deletion of that channel from use in New York City as was proposed in the Third Notice. It is believed that the remaining channels in New York City are as many as should appropriately be assigned there, considering the needs of adjoining communites.

Final Assignments and Reservations

330. The following assignments and reservations are adopted:

City	UHF Channel No.
New Brunswick, N. J.[72]	*19,47
Hammonton, N. J.	*70
Montclair, N. J.	*77
Camden, N. J.	*80
Freehold, N. J.	*74
Andover, N. J.	*69

BALTIMORE, MD. AND WASHINGTON, D. C. EDUCATIONAL RESERVATIONS

331. **Proposed Reservations.** In the Third Notice the Commission proposed the reservation of Channel 24 in Baltimore and Channel 26 in Washington. Statements in support of the reservation of Channel 24 in Baltimore and Channel 26 in Washington for non-commercial educational use were filed by educational, civic and religious institutions of Baltimore, and Washington, respectively. No objections to the reservations were filed.

Conclusions

332. On the basis of the foregoing, the reservation of Channels 24 in Baltimore and 26 in Washington for non-commercial educational use are finalized.

SCRANTON AND HARRISBURG PENNSYLVANIA

333. (a) **Proposed Assignments.** In the Third Notice the Commission proposed the following assignments:

City	VHF Channel No.	UHF Channel No.
Scranton		16,22
Harrisburg		27,33

(b) **Census Data.** The standard metropolitan area of Scranton has a population of 257,000 and the city of Scranton has a population of 126,000. The standard metropolitan area of Harrisburg has a population of 292,000 and the city of Harrisburg has population of 90,000.

(c) **Counterproposal of The Patriot News Company.** The Patriot News Company requested that one or more channels in the 782 to 890 Mc. band be assigned to Harrisburg. It appears that UHF channels below 66 cannot be used because of other assignments in the area.

(d) **Statement in Support of The Patriot News Company.** The Patriot News Company contended that the Harrisburg metropolitan area is the 57th largest metropolitan area in the United States; that Harrisburg presently supports three AM and two FM stations; that the metropolitan area supports five AM and two FM stations; that there are presently on file two applications for television facilities in Harrisburg; and that The Patriot News also proposes to file an application for a television station in that city.

(e) **Counterproposal of The Scranton Times.** The Scranton Times requested that one or more channels in the 782-890 Mc. band be assigned to Scranton. It appears that UHF channels below 66 cannot be used because of other assignments in the area.

(f) **Statement in Support of The Scranton Times Counterproposal.** The Scranton Times contended that Scranton is the fourth largest city in Pennsylvania; that it is the 73rd largest metropolitan area in the United States; that it now supports four AM and two FM stations; and that the metropolitan area now supports five AM and three FM stations.

Conclusions

334. On the basis of the record, we believe the additional assignment of a UHF Channel to Harrisburg and Scranton is warranted. Accordingly the counterproposals of The Patriot News Company and The Scranton Times are granted and we are assigning UHF Channel 71 to Harrisburg and UHF Channel 73 to Scranton.

Final Assignments

335. The following assignments are adopted:[73]

City	UHF Channel No.
Harrisburg	16, 22,71
Scranton	27, 33, 73

READING AND LEBANON, PA.

336. (a) **Proposed Assignments.** In the Third Notice the Commission proposed the assignment of two channels to Reading: UHF Channels 55 and 61, and one channel to Lebanon: UHF Channel 15.

(b) **Census Data.** The standard metropolitan area of Reading has a population of 256,000 and the City of Reading has a population of 109,000. The City of Lebanon has a population of 28,000.

(c) **Counterproposal of Eastern Radio Corporation of Reading.** Eastern Radio Corporation requested the assignment of UHF Channel 15 in Reading in substitution for UHF Channel 55 to be accomplished by the substitution of UHF Channel 55 in Lebanon for UHF Channel 15. It was urged that a better and greater coverage would result from the operation of Channel 15 at Reading rather than that on Channel 55.

(d) **Oppositions to Eastern Radio Counterproposal.** The Lebanon Broadcasting Company, Lebanon, Pennsylvania, and Scranton Times, Scranton, Pennsylvania, opposed the counterproposal of Eastern Radio Corporation.

Conclusions

337. The record contains no basis for distinguishing between channels in the UHF band for the purpose of establishing a Table of Assignments. Accordingly, the counterproposal of Eastern Radio Corporation is denied.

Final Assignments

338. The following assignments are adopted:

City	UHF Channel No.
Reading	55, 61
Lebanon	15

PHILADELPHIA, LANCASTER, PENNSYLVANIA; WILMINGTON, DELAWARE

339. (a) **Proposed Assignments and Reservations.** In the Third Notice the Commission proposed the following assignments and reservations:

City	VHF Channel No.	UHF Channel No.
Philadelphia, Pa.	3, 6, 10	17, 23, 29, *35
Lancaster, Pa.	8	21
Wilmington, Del.	12	53, *59

(b) **Census Data.** The standard metropolitan areas of Philadelphia, Lancaster, and Wilmington have populations of 3,671,000, 235,000 and 268,000, respectively. The cities of Philadelphia, Lancaster and Wilmington have populations of 2,072,000, 64,000 and 110,000, respectively.

(c) **Existing Stations.** WCAU, Inc. is licensed for station WCAU-TV, Philadelphia, on Channel 10; Triangle Publications, Inc. is licensed for Station WFIL-TV, Philadelphia, on Channel 6; Philco Television Broadcasting Corp. is licensed for Station WPTZ, Philadelphia, on Channel 3; WGAL, Inc. is licensed for Station WGAL-TV, Lancaster, on Channel 4; WDEL, Inc. is licensed for Station WDEL-TV, Wilmington, on Channel 7.

(d) WGAL, Inc. was ordered to show cause why the license of Station WGAL-TV should not be modified to specify Channel 8 in lieu of Channel 4 and WDEL, Inc. was ordered to show cause why the license of Station WDEL-TV should not be modified to specify Channel 12 in lieu of Channel 7.

(e) **Counterproposal of the Pennsylvania Broadcasting Company, Daily News Television Company, The City of Philadelphia, and Philadelphia Chamber of Commerce.** The counterproposal of the Pennsylvania Broadcasting Company requested the additional assignment of Channel 12 to Philadelphia to be accomplished by substituting Channel 4 in Lancaster for Channel 8, and making other changes in the assignments proposed by the Commission in the Third Notice. The counterproposal requested that Station WGAL-TV, now operating on Channel 4 in Lancaster be continued on that channel with low power, or with directional antenna in the event that an increase of power is authorized. Daily News Television Company requested the additional assignment of Channel 8 or 12 to Philadelphia. Following are the changes that would be made in the assignments proposed by the Commission in the Third Notice:

City	Third Notice VHF Channel No.	Third Notice UHF Channel No.	Pennsylvania Broadcasting Co. Counterproposal VHF Channel No.	Pennsylvania Broadcasting Co. Counterproposal UHF Channel No.
Philadelphia, Pa.	3, 6, 10	17, 23, 29, *35	3, 6, 10, 12†	17, 23, 29, *35
Lancaster, Pa.	8	21	4†	21
Wilmington, Del.	12	53, *59	8†	53, *59

City	Daily News[74] Plan 1 VHF Channel No.	Daily News Plan 1 UHF Channel No.	Daily News Plan 2 VHF Channel No.	Daily News Plan 2 UHF Channel No.
Philadelphia, Pa.	3, 6, 10, 12†	17, 23, 29, *35	3, 6, 8†, 10	17, 23, 29, *35
Lancaster, Pa.	8	21	4	21 (plus UHF†)
Wilmington, Del.	†	53, *59 plus UHF†)	12	53, *59

The city of Philadelphia and the Philadelphia Chamber of Commerce[75] supported the counterproposals seeking the addition of VHF Channels 8 or 12 for Philadelphia and adopted the engineering proposals of Daily News Television Company and Pennsylvania Broadcasting Company.

(f) **Statements in Support of Philadelphia Counterproposals.**[76] The Philadelphia parties asserted that the size, wealth and industry of the city required an additional VHF channel; that an additional

[72] In the Third Notice the Commission proposed one channel, UHF Channel 47, for New Brunswick, N. J.

[73] No request was made on the record for an educational reservation in either Scranton or Harrisburg.

[74] Daily News proposed two additional plans for the assignment of Channel 12 in Philadelphia. One plan required the substitution of Channel 8 in Wilmington for Channel 12 and the other plan required the substitution of Channel 7 in Wilmington for Channel 12. Daily News admitted, however, that its proposal for the assignment of Channel 12 to Philadelphia by the assignment of Channel 7 to Wilmington was not technically feasible and did not urge the proposal further. No consideration has, therefore, been given this proposal in this Report.

The request for the assignment of Channel 12 to Philadelphia by the assignment of Channel 8 to Wilmington was made by Daily News for the first time in its sworn statement. WGAL, Inc., WDEL, Inc., and Elm City Broadcasting Corporation filed Motions to Strike those portions of the sworn statement of the Daily News Television Company which introduced this new proposal. Paragraphs 5(b), 6, and 7 of the Order of Hearing Procedure issued in this proceeding on July 25, 1951, make clear that upon proper objection, the Commission cannot consider evidence presented in sworn statements, filed pursuant to Paragraph 5(b) of the Order of Hearing Procedure, which does not fall within the scope of the issues raised by the pleadings in response to Paragraph 12 of the Third Notice. The Motions to Strike testimony with respect to the assignment of Channel 8 in Wilmington are GRANTED. Accordingly, no further consideration has been given this request. Since the original proposal of Daily News requested the assignment of Channel 8 in Philadelphia, in so far as the Motions to Strike are addressed to this part of the counterproposal, they are DENIED.

[75] WGAL, Inc., and WDEL, Inc., on September 25, 1951, filed with the Commission identical Motions to Strike certains portions of the testimony in the sworn statement of Albert M. Greenfield, President of the Chamber of Commerce of Greater Philadelphia. The Commission is of the opinion that the objections go to the weight to be given to the evidence and not to its admissibility, materiality or competency. The Motions to Strike are DENIED.

[76] WGAL, Inc., and WDEL, Inc., on September 25, 1951, filed with the Commission Motions to Strike directed against all of the evidence contained in the sworn statement of Edward D. Barker and Arthur Borowsky, filed with the Commission on behalf of Daily News Television Company. These Motions to Strike go to the weight to be given to the evidence and not to its admissibility, materiality or competency. For this reason, the Motions to Strike are DENIED.

WGAL, Inc., and WDEL, Inc., filed substantially identical Motions to Strike testimony from the affidavit of Benedict Gimbel, Jr., President of Pennsylvania Broadcasting Company, and certain testimony and exhibits from the affidavit of Virginia R. Erwin, engineering affiant of Pennsylvania Broadcasting Company. The Motions to Strike Mr. Gimbel's testimony go only to the weight to be given to the evidence and not to its admissibility, materiality and competency. The Motion to Strike portions of Erwin's sworn statement is made on the ground that since the Pennsylvania Broadcasting Company did not file a proper proposal to change Paragraph D-1, Appendix A of the Third Notice it cannot under Paragraph 7 of the Order of Hearing Procedure now introduce evidence which is inconsistent with Appendix A. We find, however, that the original proposal of May 7, 1951 was in conflict with Paragraph D-1, Appendix A and that the statement of affiant Virginia Erwin is consistent with previous pleadings since it merely elaborates upon the original proposal. The Motions to Strike are DENIED.

VHF channel would provide Philadelphia outlets for the four existing networks; and that a fourth VHF channel would better serve the demands of advertisers for sufficient broadcast time. In support of these contentions, there has been submitted economic data concerning population, income, industry and number of television receivers in use, with particular emphasis on comparison with the Wilmington and Lancaster markets.

(g) The counterproposal of Pennsylvania Broadcasting Company for the additional assignment of Channel 12 to Philadelphia would retain WGAL-TV on Channel 4 in lieu of Channel 8 as proposed by the Commission. This would result in a co-channel assignment separation of 132 miles between WGAL-TV and WNBT, New York City, and 86 miles between WGAL-TV and WNBW, Washington. The counterproposal of Daily News Television Company for the additional assignment of Channel 8 to Philadelphia would result in a co-channel separation of 152 miles between Philadelphia and WNHC-TV, New Haven, Connecticut.

(h) **Oppositions to Philadelphia Counterproposals.** Binghamton Broadcasters, Inc. and Clark Associates, Inc., (WNBF-TV) both of Binghamton, opposed the requests to assign Channel 12 to Philadelphia. The Elm City Broadcasting Corp. (WNHC-TV), New Haven, and Peoples Broadcasting Corp., Lancaster, opposed the requests to assign Channel 8 to Wilmington. NBC, Inc., opposed the request to assign Channel 4 to Lancaster. WDEL, Inc., and WGAL, Inc., opposed all the Philadelphia counterproposals. Hearst Radio, Inc., opposed the assignment of Channel 12 to Wilmington for the reason that a co-channel separation of 156.3 miles would be created between WDEL-TV and WNBF-TV, Binghamton and an adjacent channel separation of 68.8 miles between Baltimore and Wilmington.

(i) **Answers to Show Cause Orders.** WGAL, Inc., and WDEL, Inc., supported the Commission's proposed assignments for Lancaster and Wilmington, respectively, and agreed to the modifications of the licenses of their respective stations specified in the Commission's show cause orders.

(j) **The Philadelphia Educational Reservation.** The Philadelphia Board of Education supported the reservation of Channel 35 for noncommercial educational use, although it stated that VHF would have been preferred. The Board declared that it has been a leader in educational television and maintains a full-time professional staff devoted to producing radio and television programs on existing commercial stations. The Executive Committee on Educational Television supported the Board of Education in its proposal for the mutual utilization of television facilities. No objections have been filed to the proposed reservation.

(k) **The Wilmington Educational Reservation.** The Wilmington Board of Public Education supported the proposed reservation of Channel 59 in Wilmington for noncommercial educational use. The Board filed copies of letters from leading educational institutions and civic organizations supporting the proposed reservation. The Board declared that the financing of the station would be shared by all participating educational agencies; that steps have already been taken to determine the cost of constructing and operating a television station; and that it has produced a number of educational programs over the local commercial television station and feels that it has the experience and resources to operate its own station. No objections have been filed to this proposed reservation.

Conclusions: The Educational Reservations

340. On the basis of the record, the reservations of Channel 35 in Philadelphia and Channel 59 in Wilmington for non-commercial educational use are finalized.

Conclusions: Requests for VHF Channels 8 and 12 in Philadelphia

341. The counterproposals of Pennsylvania Broadcasting Company and Daily News Television Company, and the supporting counterproposals of the City of Philadelphia and the Philadelphia Chamber of Commerce would assign VHF Channel 8 or 12 to Philadelphia by either (a) retaining a VHF assignment in Lancaster on Channel 4 with low power, or with a directional antenna in the event increased power is authorized; or (b) shifting the Wilmington or Lancaster VHF assignment to a UHF channel. No specific UHF channel is proposed but it is indicated that a channel in the 782-890 Mc band would have to be used.

342. We do not believe that a grant of any of the foregoing counterproposals is warranted. We recognize the size and importance of the City of Philadelphia and the need for the encouragement of economic competition; nevertheless, it is our view that under the circumstances presented the assignment of a fourth VHF channel to Philadelphia would not justify the deletion of the sole VHF channel from cities as large and as important as Lancaster or Wilmington.

343. Moreover, in the case of Lancaster, the public would lose its only available local VHF service, and in the case of Wilmington, the state of Delaware would lose its only local VHF service; existing set owners would be required to convert to continue to get their local service. While the effect of assignment changes on existing sets is not a determinative factor here, the Commission is unable to find the deletion of such existing local service is warranted in order to provide a fourth VHF assignment to the City of Philadelphia.

344. There remains for consideration the use of directional antennas or operation of a low powered station in Lancaster in order to provide a fourth VHF channel to the City of Philadelphia. We have held in another part of this Report that all stations provided for in the Assignment Table must be able to operate with maximum power. Indeed, operation in Lancaster with the power proposed by Pennsylvania Broadcasting Company at the existing antenna height would not satisfy the minimum power requirements provided for in the Rules. We have also held, for the reasons stated elsewhere in this Report, that assignments must be based on operation without directional antennas. For these reasons, the Commission cannot provide an assignment at Lancaster based on use of a directional antenna or low power.

345. In view of the foregoing, the counterproposals of Pennsylvania Broadcasting Company, Daily News Television Company, The City of Philadelphia and the Philadelphia Chamber of Commerce are denied.

346. An appropriate authorization to WDEL, Inc., will be issued to specify operation of WDEL-TV on Channel 12. The pleadings filed by Peoples Broadcasting Co. with respect to the WGAL, Inc. show cause order have been considered elsewhere.

Final Assignments and Reservations

347. The following assignments and reservations are adopted:

City	VHF Channel No.	UHF Channel No.
Philadelphia, Pa.	3, 6, 10	17, 23, 29, *35
Lancaster, Pa.	8	21
Wilmington, Del.	12	53, *59

City	Third Notice		Proposed Changes	
	VHF Channel No.	UHF Channel No.	VHF Channel No.	UHF Channel No.
Pittsburgh, Pa.	2, 11, *13	47, 53	2, 4†, 9†, 11, *13	47, 53
Wheeling, W. Va.	7, 9	*57	7, †	*57

PITTSBURGH, BRADDOCK, McKEESPORT, WASHINGTON, PENNSYLVANIA; WHEELING, WEST VIRGINIA; STEUBENVILLE, OHIO

348. (a) **Proposed Assignments and Reservations.** In the Third Notice the Commission proposed the following assignments and reservations:

City	VHF Channel No.	UHF Channel No.
Pittsburgh, Pa.	2, 11, *13	47, 53
Washington, Pa.		63
Wheeling, W. Va.	7, 9	*57
Steubenville, Ohio		51

No channels were proposed to be assigned to Braddock, or McKeesport.

(b) **Counterproposals.** Counterproposals have been filed by various parties in these proceedings seeking the assignment of one or more additional VHF channels to Pittsburgh and a first VHF channel to Braddock, McKeesport, Washington and Steubenville.

Pittsburgh

349. (a) **Census Data.** The standard metropolitan area of Pittsburgh has a population of 2,213,000 and the city of Pittsburgh has a population of 677,000.

(b) **Existing Station.** Allen B. DuMont Laboratories is licensed for the operation of Station WDTV, Pittsburgh on Channel 3. The Commission ordered the licensee to show cause why the license of WDTV should not be modified to specify operation on Channel 2, in lieu of Channel 3. DuMont has not objected to this modification of the license of WDTV.

(c) **Counterproposal of WWSW, Inc.** WWSW, Inc. requested the additional assignment of Channel 4 to Pittsburgh. No other changes of the assignments proposed by the Commission in the Third Notice would be required.

(d) **Statement in Support of Counterproposal of WWSW, Inc.** WWSW, Inc., stated that adequate competition should be established in Pittsburgh as soon as possible; that there are more than 300,000 VHF receivers in use in Pittsburgh; and that UHF stations can be established only after considerable delays. Finally, it was urged that the irregular terrain of the Pittsburgh area is such that considerable experimentation would be required prior to the utilization of the UHF band.

(e) **Counterproposal of Westinghouse Radio Stations, Inc.** Westinghouse Radio Stations, Inc., requested the additional assignment of Channel 4 and Channel 9 to Pittsburgh. The assignment of Channel 4 would require no other changes and the assignment of Channel 9 would be accomplished by making the following changes in the assignments proposed by the Commission in the Third Notice:

City	Third Notice		Proposed Changes	
	VHF Channel No.	UHF Channel No.	VHF Channel No.	UHF Channel No.
Pittsburgh, Pa.	2, 11, *13	47, 53	2, 4†, 9†, 11, *13	47, 53
Wheeling, W. Va.	7, 9	*57	7, †	*57

(f) **Statement in Support of Counterproposal of Westinghouse Radio Stations, Inc.** Westinghouse Radio Stations, Inc., stated that, "The 8th ranking city of the United States [Pittsburgh] needs and demands television service from more than 4 commercial stations. The diversified economic and cultural interest of a population mass of this size will not only support, but actually demand, service from at least 6 television stations."

(g) **Counterproposal of Allegheny Broadcasting Corporation.** Allegheny Broadcasting Corporation requested the additional assignment of Channel 4 and Channel 9 to Pittsburgh, and a change in the educational reservation for Pittsburgh from VHF Channel 13 to UHF Channel 47 or 53. The assignment of Channel 4 would require no other changes; and the assignment of Channel 9 would be accomplished by making the following changes in the assignments proposed by the Commission in the Third Notice:

City	Third Notice		Proposed Changes	
	VHF Channel No.	UHF Channel No.	VHF Channel No.	UHF Channel No.
Pittsburgh, Pa.	2, 11, *13	47, 53	2, 4†, 9†, 11, 13	47, *53 (or *47, 53)
Wheeling, W. Va.	7, 9	*57	7, †	*57

(h) **Statement in Support of Counterproposal of Allegheny Broadcasting Corporation.** Allegheny Broadcasting Corporation asserted that its "proposals are reasonable and the adoption of either or all will provide more and better television service than will the plan proposed by the Commission" and that "Section 307(b) of the Communications Act of 1934, as amended, requires the adoption of one or all of the proposals made by Allegheny." In support of its

request to shift the Pittsburgh educational reservation from VHF Channel 13 to UHF Channel 47 or 53, Allegheny Broadcasting Company stated that Pennsylvania, and Pittsburgh in particular, had not received a fair and equitable share of television channels; that the reservation resulted in an injustice to applicants for commercial stations; that Pittsburgh was being "penalized" in having one of the four educational reservations in the VHF band made in the entire northeast quadrant of the United States, including 14 states and the District of Columbia, whereas such cities as New York and Philadelphia escaped a VHF educational reservation; and that the educators and the people of Pittsburgh would be better served if the reservation were in the UHF band rather than in the VHF, in view of the fact that the educators would not utilize the VHF assignment as rapidly as commercial interests.

(i) **Counterproposal of Pittsburgh Radio Supply House, Inc.** Pittsburgh Radio Supply House, Inc., requested the additional assignment of Channel 4 and Channel 9 to Pittsburgh. The assignment of Channel 4 would require no other changes; and the assignment of Channel 9 would be accomplished by the substitution of a UHF channel for Channel 9 in Wheeling, West Virginia, as follows:

City	Third Notice		Proposed Changes	
	VHF Channel No.	UHF Channel No.	VHF Channel No.	UHF Channel No.
Pittsburgh, Pa.	2, 11, *13	47, 53	2, 4†, 9†, 11, *13	47, 53
Wheeling, W. Va.	7, 9	*57	7, †	16†, *57

(j) **Statement in Support of Counterproposal of Pittsburgh Radio Supply House, Inc.** Pittsburgh Radio Supply House, Inc., stated that other cities ranking lower in population than the city of Pittsburgh have been assigned more channels for commercial television operation and that a fair, efficient and equitable allocation of television channels would require that additional channels be assigned to the Pittsburgh area.

(k) **Counterproposal of WCAE, Inc.,** WCAE requested the additional assignment of Channel 9 to Pittsburgh by substituting UHF Channel 63 in Wheeling, West Virginia, for Channel 9, and by making the following changes in the assignments proposed in the Third Notice:

City	Third Notice		Proposed Changes	
	VHF Channel No.	UHF Channel No.	VHF Channel No.	UHF Channel No.
Pittsburgh, Pa.	2, 11, *13	47, 53	2, 9†, 11, *13	47, 53
Anderson, Ind.		61		49†
Muncie, Ind.		49, 55		55, 61†
Bellefontaine, O.		63		65†
Hamilton-Middletown, Ohio		65		64†
Washington, Pa.		63		16†
Wheeling, W. Va.	7, 9	*57	7, †	*57, 63†

(l) **Statement in Support of Counterproposal of WCAE, Inc.** WCAE, Inc., stated that the competitive situation in Pittsburgh would be improved by the assignment of additional commercial VHF channels to augment the two proposed; and that assignments of UHF channels would not alleviate this condition.

(m) **Opposition and Conflicting Counterproposals.** Opposition and conflicting counterproposals to the above Pittsburgh counterproposals to assign Channel 4 to Pittsburgh have been filed by WBEN, Inc., Buffalo, New York, and Crosley Broadcasting Corporation, Columbus, Ohio, and Matta Broadcasting Company, Braddock, Pennsylvania. Oppositions and conflicting counterproposals to the requested assignment of Channel 9 at Pittsburgh have been filed by Washington Broadcasting Company, Washington, Pennsylvania, WSTV, Inc., Steubenville, Ohio, WBVP, Inc., Beaver Falls, Pennsylvania, The Fort Industry Company, Tri-City Broadcasting Company and Community Broadcasting, Inc., all of Wheeling, West Virginia, and by Cleveland Broadcasting, Inc., United Broadcasting Company, The WGAR Broadcasting Company and WJW, Inc., all of Cleveland, Ohio.

(n) The assignment of Channel 4 to Pittsburgh would result in a co-channel assignment separation of 162.5 miles between Pittsburgh and the existing transmitter site of WLWC in Columbus, Ohio. The minimum co-channel assignment separation in this zone, Zone I, is 170 miles.

(o) **The Pittsburgh Educational Reservation.**[77] The Standing Committee of Educators for an Educational Television Channel and Duquesne University in Pittsburgh supported the reservation of Channel 13 in Pittsburgh for non-commercial educational use. The Standing Committee includes the following educational institutions and organizations: Carnegie Institute of Technology, University of Pittsburgh, Duquesne University, Pennsylvania College for Women, Mt. Mercy College, Pittsburgh Council P.T.A., Pittsburgh Board of Education, Pittsburgh Catholic Schools, Allegheny County Schools, Geneva College, Washington and Jefferson College, California State Teachers College, Seton Hill College, Mrs. James Elkus Community Representative and David L. Lawrence, Mayor, City of Pittsburgh. Also supporting the reservation of Channel 13 in Pittsburgh were State Teachers College, Edinboro, Pennsylvania, St. Vincent College, Latrobe, Pennsylvania, Waynesburg College, Waynesburg, Pennsylvania, and State Teachers College, Slippery Rock, Pennsylvania. The Standing Committee has held six meetings to discuss the financing and programming of an educational television station. A bill has been introduced in the State Legislature providing for the establishment of a state television network for non-commercial educational television to be financed by an appropriation of $2 million. The bill also would authorize the sum of $50,000, or so much as may be necessary for a survey by qualified personnel for guidance on the purchase of necessary sites and equipment for the construction of a master station and subsidiary stations. A sub-committee has been appointed by the Standing Committee to survey the possibility of financial assistance from sources other than the Commonwealth of Pennsylvania. The Standing Committee stated that there was strong indication that substantial financial support for an educational station could be obtained from foundations and charitable trusts in the area. Some of the heavily endowed private educational institutions have indicated, according to the Standing Committee, that if the education program on television were sufficiently comprehensive, it could be used advantageously in these institutions and could be supported from school grants. Duquesne University has made some exploratory investigation into necessary television equipment, including type and cost of apparatus, studio location, sources of program material and talent, and the training of personnel.[78]

[77] WWSW, Inc., Pittsburgh, Pennsylvania, claimed that the reservation of VHF Channel 13 for non-commercial educational television was, apparently as a matter of law, beyond the power and discretion delegated to the Commission by the Communications Act of 1934. We believe that our decision of July 13, 1951, with respect to this matter disposed of these contentions.

[78] The counterproposal of Allegheny Broadcasting Corporation requesting the reservation of a UHF channel in Pittsburgh in lieu of VHF Channel 13 has been set forth above, and the request of Tri-City Broadcasting Company for the deletion of Channel 13 from Pittsburgh is discussed below.

McKeesport

350. (a) **Census Data.** The city of McKeesport has a population of 52,000.

(b) **Counterproposal of Tri-City Broadcasting Company.** Tri-City Broadcasting Company requested that McKeesport be assigned VHF Channel 13 for "commercial-educational" use in lieu of the assignment of that channel to Pittsburgh for non-commercial educational television use.

(c) **Statement in Support of Tri-City Broadcasting Company Counterproposal.** Tri-City Broadcasting Company urged that although McKeesport is approximately 10 air miles southeast of downtown Pittsburgh and is listed by the Census Bureau as part of the Pittsburgh metropolitan area, it is not a "Pittsburgh suburb" but rather a major city of Pennsylvania; that Pittsburgh educators could not adequately finance an educational television station; and that to provide an opportunity for the presentation of non-commercial educational programs by colleges and universities in the area, Tri-City Broadcasting Company would make available to educational institutions 50% of the broadcast hours on its television station if VHF Channel 13 were assigned to McKeesport and a Tri-City application for this channel were granted.[79]

(d) McKeesport is within 15 miles of Pittsburgh and eligible to apply for the Pittsburgh channels.

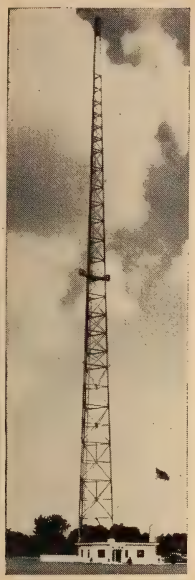
(e) **Oppositions and Conflicting Counterproposals to the Tri-City Counterproposal.** Oppositions and conflicting counterproposals to the counterproposal of Tri-City Broadcasting Company have been filed by the following Pittsburgh parties: Pittsburgh Radio Supply House, Inc., Westinghouse Radio Stations, Inc., Allegheny Broadcasting Corporation, WWSW, Inc., WCAE, Inc., and the Standing Committee of Educators for an Educational Channel in Pittsburgh.

Braddock

351. (a) **Census Data.** The city of Braddock has a population of 16,000.

(b) **Counterproposal of Matta Broadcasting Company.** Matta Broadcasting Company requested the assignment of Channel 4 at Braddock. The assignment of Channel 4 would require no other changes.

(c) **Statement in Support of Matta Broadcasting Company Counterproposal.** Matta stated that a VHF television station located at Braddock would serve a substantially larger audience than would be served by a VHF television station located at numerous other places proposed to be assigned channels in the Third Notice.[80]



(d) The assignment of Channel 4 at Braddock would result in a co-channel assignment separation of 169.39 miles between Braddock and the existing transmitter site of WLWC in Columbus, Ohio. The minimum co-channel separation in this zone, Zone I, is 170 miles.

(e) **Oppositions and Conflicting**

[79] A counterproposal urging the principle that commercial station be required to allot prescribed time for non-commercial educational use in lieu of reservation of channels has been denied in another part of this Report. Allegheny Broadcasting Corporation filed Motions to Strike portions of the sworn statements of Edward J. Hirschberg, Wilkes E. Hurley and Ben Farkas filed on behalf of Tri-City Broadcasting Company. The Motion was directed against the statement of Edward J. Hirschberg on the grounds that statements of economic and statistical data did not indicate their source, are generally unsupported conclusions and personal opinions, are without proper foundation in fact, and are irrelevant and immaterial. The Motion was directed against the statements of Wilkes E. Hurley and Ben Farkas on the grounds the testimony related to engineering matters and that no showing was made that affiants were qualified as expert engineers in the field of television. Tri-City Broadcasting Company replied to the Motion to Strike. The Motions to Strike go to the weight of the evidence and not to the admissibility and are DENIED.

[80] Allegheny Broadcasting Corporation filed Motions to Strike portions of the document filed on behalf of Matta Broadcasting Company in support of its Comments. Matta Broadcasting Company filed a reply to these Motions. The Motion to Strike directed against the affidavit of William G. Matta is GRANTED on the grounds that his statement that to the best of his knowledge and belief the statements of the counsel were true and correct when in face such statement was sworn to at a later date and may not have been in existence at the time it was said to be true and correct. The Motion to Strike directed against a statement of Mr. Matta on the grounds that it was not sworn to is GRANTED. The Motion to Strike directed against Section II of a document entitled "Economic Data for Braddock Area" is DENIED as it goes only to the weight of the evidence and not to its admissibility.

Counterproposals. Oppositions and conflicting counterproposals to the counterproposal of Matta Broadcasting Corporation were filed by WBEN, Inc., Buffalo, New York, Crosley Broadcasting Corporation, Columbus, Ohio, and by Pittsburgh Radio Supply House, Inc., Westinghouse Radio Stations, Inc., Allegheny Broadcasting Corporation, and WWSW, Inc., of Pittsburgh, Pennsylvania.

Washington

352. (a) **Census Data.** The city of Washington has a population of 26,000.

(b) **Counterproposal of Washington Broadcasting Company.** Washington Broadcasting Company proposed alternative plans for assignment of Channel 7 or 9 to Washington by making the following changes in the assignments proposed by the Commission in the Third Notice:

City	Third Notice	Plan 1		Plan 2	
	VHF Channel No.	UHF Channel No.	VHF Channel No.	UHF Channel No.	VHF Channel No.	UHF Channel No.
Washington, Pa.		63	7†	†	9†	†
Wheeling, W. Va.	7, 9	*57	†, 9	*57, 63†	7, †	*57, 63†

(c) **Statement in Support of Washington Broadcasting Company Counterproposal.** Washington Broadcasting Company urged that the assignment of a VHF channel to Washington in lieu of a UHF channel would make more effective use of the receivers presently in the hands of the persons residing in the Washington area.[81]

(d) **Oppositions and Conflicting Counterproposals to the Washington Broadcasting Company Counterproposal.** Oppositions and conflicting counterproposals to the counterproposal of Washington Broadcasting Company have been filed by Pittsburgh Radio Supply House, Inc., Westinghouse Radio Stations, Inc., Allegheny Broadcasting Corporation, WWSW, Inc., and WCAE, Inc., of Pittsburgh; Fort Industry Company, Tri-City Broadcasting Company, and Community Broadcasting, Inc., of Wheeling; and WSTV, Inc., of Steubenville.

Wheeling-Steubenville

353. (a) **Census Data.** The Wheeling-Steubenville standard metropolitan area has a population of 354,000. The city of Wheeling has a population of 59,000 and the city of Steubenville has a population of 36,000.

(b) **Counterproposal of WSTV, Inc.** WSTV, Inc., requested that the Commission delete either Channel 7 or Channel 9 from Wheeling for assignment to Steubenville and substitute Channel 51 in Wheeling.[82]

(c) **Statement in Support of WSTV, Inc., Counterproposal.** WSTV stated that Jefferson County, in which Steubenville is situated, has a population of 95,963 persons as compared with a population of 71,253 in Ohio County, in which Wheeling is located. It was noted that the state of Ohio has 183,393 persons in the Wheeling-Steubenville standard metropolitan area as compared with 169,531 for West Virginia within the metropolitan area. It was also contended that a VHF channel in Steubenville would more effectively cover the area since Steubenville is located in the eastern portion of Ohio where a station would provide the only VHF service to large sections of Ohio. It was pointed out that the assignment of a second VHF channel to Wheeling would merely result in duplication of service whereas the assignment of a VHF channel to Steubenville would afford a first VHF service. It was also asserted that the rough terrain in and near Steubenville necessitates a VHF facility for adequate television coverage in the area.[83]

(d) **Oppositions and Conflicting Counterproposals to the WSTV, Inc., Counterproposal.** Oppositions and conflicting counterproposals to to the counterproposal of WSTV, Inc., have been filed by The Fort Industry Company[84], Tri-City Broadcasting Company and Community Broadcasting, Inc., Wheeling; Allegheny Broadcasting Corp., Pittsburgh Radio Supply House, WCAE, Inc., and Westinghohuse Radio Stations, Inc., Pittsburgh; and Washington Broadcasting Company, Washington.

(e) **The Wheeling Educational Reservation.** A request to accept a late filing by the JCET in support of the reservation of UHF Channel 57 for non-commercial educational use in Wheeling, West Virginia, was denied by the Commission on October 17, 1951. No objection has been filed to the proposed reservation of Channel 57 for noncommercial educational use in Wheeling.

(f) The assignment of Channel 57 to Wheeling would be in accordance with our Rules and Standards adopted herein. However, the assignment of Channel 57 in Steubenville would result in a violation of the separation requirements to protect against sound image separation since Steubenville and Butler, Pennsylvania are only 52 miles apart.

Conclusions: The Pittsburgh Educational Reservation

354. The educational organizations in Pittsburgh have demonstrated their interest in establishing a non-commercial educational television station in the Pittsburgh area. They have supported this interest with concrete plans to establish such a station by banding together in an association, the Standing Committee of Educators for an Educational Television Channel in the Pittsburgh area. Further, a bill has been introduced in the State Legislature providing for the establishment of a state television network to be financed by an appropriation of two million dollars. It is our view, in light of the record, that the reasons for the reservation of a VHF channel for educational purposes are particularly applicable in the Pittsburgh area.

355. We reject the contention of Allegheny Broadcasting Company that the effect of the proposed reservation on applicants for commercial stations in Pittsburgh requires the deletion of that reservation from the VHF.[85] We also reject the argument that the educators and the people of Pittsburgh would be better served if the reservation were in the UHF band rather than in the VHF; we find no adequate basis on the record for such a conclusion. Moreover, with respect to the counterproposal of Tri-City Broadcasting Company, McKeesport is situated less than 15 miles from Pittsburgh, and will receive Grade A service from Pittsburgh. Further, applicants from McKeesport are eligible to apply for the channels assigned to Pittsburgh in accordance with the rules adopted herein. For this reason we find no basis in the record to delete an assignment from Pittsburgh in order to create one for McKeesport.[86]

356. In view of the foregoing, we believe that the record requires that the proposed reservation of Channel 13 in Pittsburgh for noncommercial educational use be finalized.

Conclusions: Pittsburgh and Braddock (Channel 4)

357. Four parties, Pittsburgh Radio Supply House, Inc., Allegheny Broadcasting Company, Westinghouse Radio Stations, Inc., and WWSW, Inc. requested the additional assignment of VHF Channel 4 to Pittsburgh; and Matta Broadcasting Company requested the assigment of Channel 4 to Braddock. It is our view that these counterproposals must, on the basis of the record, be denied. The assignment of Channel 4 to Pittsburgh or to Braddock would involve co-channel assignment separations of 162.5 miles or 169.39 miles, respectively, to Station WLWC in Columbus, Ohio. The minimum separation in Zone I, which is applicable here, is 170 miles. Since a grant of either counterproposal would result in a separation less than the required minimum, these counterproposals can not be granted. Accordingly, the counterproposals of Pittsburgh Radio Supply House, Inc., Allegheny Broadcasting Company, Westinghouse Radio Stations, Inc., WWSW, Inc., and Matta Broadcasting Company are denied in so far as they request the assignment of Channel 4 to Pittsburgh and Braddock, respectively.

Conclusions: Pittsburgh, Washington, Wheeling-Steubenville (Channels 7 and 9)

358. Four parties, Pittsburgh Radio Supply House, Inc., Allegheny Broadcasting Company, Westinghouse Radio Stations, Inc., and WCAE, Inc., requested the additional assignment of Channel 9 to Pittsburgh and the deletion of this channel from Wheeling. Washington Broadcasting Company requested the additional assignment of either Channel 7 or Channel 9 to Washington by deleting a channel from Wheeling. WSTV, Inc. requested the additional assignment of either Channel 7 or Channel 9 to Steubenville by deleting a

[81] Allegheny Broadcasting Corporation on October 1, 1951 filed with the Commission Motions to Strike certain portions of the sworn statement of William S. Yard, President of Washington Broadcasting Company, filed on behalf of Washington Broadcasting Company, in which he incorporated by reference the Comments of the Company on the grounds that the statements are conclusions of the witness without factual basis and that the witness had not been qualified as an engineer to give expert testimony with respect to grades of service rendered by a station, gains of population, and to make comparison between a UHF station and a VHF station. Washington Broadcasting Company answered and opposed the Motions to Strike. The Motions to Strike are DENIED since they go to the weight to be given to the evidence and not to its admissibility as evidence in this proceeding.

[82] On December 6, 1951, WSTV, Inc., filed a request for acceptance of amendment it is proposed as an alternative that the assignment of television channels to Wheeling and Steubenville be combined so as to assign Channels 7, 9, 51 and 57 to the Wheeling-Steubenville standard meropolitan area. Fort Industry opposed the acceptance of this amendment on the grounds that it was filed too late and that good cause for its acceptance was not shown. WSTV argued that the evidence adduced in the hearing would support the alternative counterproposal and cited the position taken by Fort Industry with respect to Pittsburgh's request for deletion of a Wheeling channel as establishing that Fort Industry recognized the homogeneity of the area. It is our view that acceptance of this amendment is not necessary since we believe the possibility of assigning all the channels in Wheeling and Steubenville to these cities jointly is of necessity in issue in this proceeding, especially in view of the evidence adduced.

[83] Allegheny Broadcasting Corporation filed Motions to Strike certain portions of the sworn statements of John J. Laux, Executive Vice President of WSTV, Inc., and Julius Cohen, engineering affiant of WSTV, Inc., filed with the Commission on behalf of WSTV, Inc. The reasons advanced for the Motion to Strike the statement of Mr. Laux are that he attempted to give legal and engineering testimony when he had not been qualified as an expert and the statement of Mr. Cohen for the reason that in the last paragraph of his statement he attempted to set forth conclusions of law. The Motions to Strike are DENIED since they go to the weight to be given to the evidence and not to its admissibility as evidence in this proceeding.

[84] Allegheny Broadcasting Corporation filed Motions to Strike certain portions of the sworn statement of William E. Rine, Vice President of the Fort Industry Company, filed in support of the Commission's proposed assignment for Wheeling. The Motion to Strike was directed against Mr. Rine's sworn statement on the grounds that the affiant offered engineering and legal conclusions when he had not been qualified. Motions to Strike were also directed against statements of seven individuals prominent in business and civic life in Wheeling, which were filed in support of the Fort Industry Company comment of September 10, 1951. The Motions to Strike were directed against these seven sworn statements on the grounds that they are hearsay, that they are statements of personal belief, and that the affiants have not been qualified as expert engineers and as attorneys. Fort Industry Company filed an answer to the Motions to Strike. The Motions to Strike are DENIED since they go only to the weight to be given to the evidence and not to its admissibility as evidence in this proceeding. Allegheny Broadcasting Corp. filed a Motion to Strike the statement of Irvin Stewart, President of West Virginia University, on the grounds that the statement has not been sworn to. The Motion to Strike is GRANTED. In Paragraph 5(d) of the Order of Hearing Procedure of July 25, 1951, the Commission provided that statements not sworn to will not receive any consideration.

[85] See our decision with respect to the educational reservation in Boston.

[86] See also our decision with respect to Boston and Brockton.

channel from Wheeling.

359. We believe, in view of the common identity and economic interest of Wheeling and Steubenville, that these cities should be considered as a single entity for assignment purposes. The 1950 Census of Population Report includes Wheeling and Steubenville in one standard metropolitan area defined as Wheeling-Steubenville, with a population of 354,092 persons. The parties in this proceeding have explicitly recognized that the needs of the entire area for television service should be considered rather than the needs of the cities within it separately. For example, Fort Industry in its statement of September 10, 1951 in opposition to the request for deletion of a VHF channel from Wheeling to be assigned to Pittsburgh stated:

> The allocation of two VHF channels to the Wheeling-Steubenville metropolitan area is necessary to provide a choice of local expression and to promote a healthy competitive situation.

In its brief, WCAE, Inc., posed the conflicting requests of Pittsburgh, Wheeling-Steubenville as follows:

> Moreover, in the last analysis the comparative needs of the Pittsburgh metropolitan area must be weighed against the corresponding needs of the Wheeling-Steubenville metropolitan area taken together and not as two separate areas.

360. Accordingly, the assignments made to Wheeling and to Steubenville will be revised to provide assignments to Wheeling-Steubenville rather than to the respective cities.

361. In view of our decision, the requests of the Pittsburgh parties for the assignment of Channel 9, and of the Washington party for the assignment of either Channel 7 or Channel 9, must be considered as requests to delete that channel from Wheeling-Steubenville. We do not believe that the record justifies the deletion of a channel from Wheeling-Steubenville in order to assign that channel to Pittsburgh. As indicated above, the Commission in the Third Notice proposed the assignment of three VHF and two UHF channels to Pittsburgh. A grant of the Pittsburgh requests for the assignment of Channel 9 would add a fourth VHF channel to the Pittsburgh area. We do not believe the record justifies the deletion of the second VHF channel assigned to Wheeling-Steubenville for this purpose. We reach the same conclusion with respect to the request for the deletion of a VHF channel from Wheeling and the assignment thereof to Washington. Washington is located 23 miles from Pittsburgh and in a suburban part of the Pittsburgh standard metropolitan area. Moreover, Washington would receive VHF Grade A service from the stations assigned to Pittsburgh in addition to VHF Grade A service from the operation of a station in Wheeling.

362. Accordingly, the counterparts of Pittsburgh Radio Supply House, Inc., Allegheny Broadcasting Company, Westinghouse Radio Stations, Inc., and WCAE, Inc., are denied in so far as they request the assignment of Channel 9 to Pittsburgh; the counterproposal of Washington Broadcasting Company is denied and the counterproposal of WSTV, Inc., is denied in so far as they request the assignment of either Channel 7 or 9 to Steubenville only.

Conclusions: Additional Channel for Pittsburgh

363. We believe that the assignment of an additional channel in Pittsburgh warranted on the basis of the record. It was above pointed out that, in establishing the Table of Assignments, we have given consideration to the factor of population; thus, cities with a population from 250,000 to 1,000,000 have been provided from 4 to 6 assignments. We believe, further, that a city with a population of 400,000 or more, the top 25 cities in the country, should have a total of at least 6 channels, including both VHF and UHF, where such assignments are technically feasible. It was above noted, however, that the counterproposals requesting adlitional VHF channels for Pittsburgh could not be granted. UHF Channel 16 in Pittsburgh would meet the required mileage spacings for channel assignments in Zone I. Accordingly, Channel 16 will be assigned to Pittsburgh.

Conclusions: The Wheeling Educational Reservation

364. As indicated above, the assignment of Channel 57 to Wheeling is in accordance with our standards, but the assignment of this channel to Steubenville would result in a sound image separation below the required minimum 60 miles. In view of the fact that no objections to the reservation were filed, the reservation of Channel 57 in Wheeling for non-commercial educational use is finalized.

Conclusions: Show Cause Order

365. Allen B. DuMont Laboratories, Inc., has not objected to the proposed modification of the license of Station WDTV to specify operation on Channel 2 rather than Channel 3. Accordingly, an appropriate authorization to Allen B. DuMont Laboratories, Inc., will be issued to specify operation of Station WDTV on Channel 2.

Final Assignments and Reservations

366. The following assignments and reservations are adopted:

City	VHF Channel No.	UHF Channel No.
Pittsburgh, Pa.	2, 11, *13	16, 47, 53
Washington, Pa.		63
Wheeling, W. Va.		*57
Wheeling, W. Va.-Steubenville, O.	7, 9	51

ALTOONA, PENNSYLVANIA, HARRISONBURG, VIRGINIA

367. **Proposed Assignments.** In the Third Notice the Commission proposed the following assignments:

City	Third Notice VHF Channel No.	Third Notice UHF Channel No.	Proposed Changes VHF Channel No.	Proposed Changes UHF Channel No.
Harrisonburg, Va.	†	34	3†	34
Norfolk-Portsmouth, Va.	10, 12	15, *21, 27	3†, 10	15, *21, 27
Richmond, Va.	3, 6	*23, 29	6, 12†	*23, 29
Huntington, W. Va.	8, 13	*53	3†, 13	*53
Charleston, W. Va.	3	*43, 49	8†	*43, 49

Altoona

368. (a) **Census Data.** The standard metropolitan area of Altoona has a population of 140,000 and the city of Altoona has a population of 77,000.

(b) **Counterproposal of Gable Broadcasting Company.** Gable Broadcasting Company requested the assignment of VHF Channel 3 to Altoona. No other changes would be required in the assignments proposed by the Commission in the Third Notice.

(c) **Statement in Support of Gable Broadcasting Company Counterproposal.** Gable Broadcasting Company stated that a VHF channel located in Altoona would serve substantial portions of the population of surrounding counties which would receive some VHF service only from one proposed assignment in Johnstown, Pennsylvania, and noted that there are presently 10,000 receivers in Altoona and surrounding areas.

(d) **Oppositions and Conflicting Counterproposals to Counterproposal of Gable Broadcasting Company.** Cornell University filed a mutually exclusive counterproposal for the addition of Channel 3 to Ithaca. The addition of Channel 3 to Ithaca has been denied for the reasons set forth in the discussion of that counterproposal. Shenandoah Valley Broadcasting Corporation, Harrisonburg, Virginia, filed a mutually exclusive counterproposal for the addition of Channel 3 to Harrisonburg.

(e) In the Third Notice it was proposed to assign Channel 10 to Philadelphia, Pennsylvania, Rochester, New York, and Columbus, Ohio. The distances from Altoona to Philadelphia, Rochester and Columbus are 176, 187, and 246 miles, respectively. The Third Notice proposed the assignment of adjacent Channel 9 to Wheeling, West Virginia, at a distance of 126 miles from Altoona, and Channel 11 to Pittsburgh, Pennsylvania, at a distance of 84 miles from Altoona.

Harrisonburg

369. (a) **Census Data.** The city of Harrisonburg has a population of 11,000.

(b) **Counterproposal of Shenandoah Valley Broadcasting Corp.** Shenandoah Valley Broadcasting Corp., requested the addition of a VHF channel to Harrisonburg. This request is made contingent by Shenandoah Valley Broadcasting Corp. on the grant of other counterproposals and would add either Channel 3, or Channel 12, to Harrisonburg. The requested addition of Channel 12 to Harrisonburg is made contingent upon our adoption of the counterproposal of Southeastern Ohio Broadcasting Company, Inc., Zanesville, Ohio, to assign Channel 12 to Zanesville. We have in another part of this Report denied the counterproposal of Southeastern Ohio Broadcasting Company, Inc., to assign Channel 12 to Zanesville, and accordingly, the request for assignment of Channel 12 at Harrisonburg will not be discussed further.

(c) The requested addition of Channel 3 to Harrisonburg is made contingent upon our adoption of the counterproposal of WTAR Radio Corporation, Norfolk, Virginia, to assign Channel 3 at Norfolk and the counterproposal of WSAZ, Inc., Huntington, West Virginia, to assign Channel 3 at Huntington.[87] The assignment of Channel 3 would be accomplished by making the following changes in the assignments proposed by the Commission in the Third Notice:

City	VHF Channel No.	UHF Channel No.
Altoona, Pa.		19, 25
Harrisonburg, Va.		34

(d) **Statement in Support of Shenandoah Valley Broadcasting Corp. Counterproposal.** Shenandoah Valley Broadcasting Corp., stated that its proposal would improve the over-all assignment plan of television stations in the United States on the basis of the priorities set forth in the Third Notice.

(e) Channel 3 at Harrisonburg as proposed by Shenandoah Valley would be 179 miles from the closest co-channel station at Norfolk, Virginia,[88] and 105 miles from the closest adjacent channel (4) at Washington, D. C. These distances meet the minimum separations adopted in the Report for this Zone.

(f) **Oppositions and Conflicting Counterproposals to Shenandoah Valley Broadcasting Corp.** The counterproposal of Shenandoah Valley Broadcasting Corp., is mutually exclusive with the counterproposal of Gable Broadcasting Company and Hampton Roads Broadcasting Corp., Newport News, Virginia.[89] Richmond Newspapers, Inc., Richmond, Virginia, opposed the counterproposal of Shenandoah Valley for the assignment of Channel 3 to Harrisonburg, if it could be achieved only by the deletion of a VHF channel from Richmond. In light of our action granting the counterproposal of WTAR, Inc., which substitutes Channel 12 in Richmond for Channel 3, Channel 3 can be assigned to Harrisonburg without deleting a Richmond channel and therefore meets the Richmond Newspapers, Inc., objection. Larus & Brother, Inc., Richmond, Virginia, opposed the counterproposal of Shenandoah Broadcasting Corporation seeking the assignment of Channel 3 in Harrisonburg since this would preclude the utilization of Channel 3 in Richmond. For this reason Larus & Brother also opposed the counterproposal of WTAR, Inc., to assign Channel 3 to Norfolk in place of Richmond. Our action elsewhere in this Report granting the WTAR, Inc., counterproposal is determinative of the opposition of Larus & Brother with respect

[87] We have elsewhere in this Report granted the counterproposals of WTAR Radio Corporation to assign Channel 3 at Norfolk and of WSAZ, Inc., to assign Channel 3 at Huntington. The WSAZ, Inc., counterproposal also substitutes Channel 8 for Channel 3 in Charleston, W. Va.

[88] We have in another part of this Report determined that the license of Station WTAR-TV, Norfolk, Virginia, will be modified to specify Channel 3.

[89] Elsewhere in this Report we have denied the counterproposal of Hampton Broadcasting Corp. for the reasons there stated.

to the utilization of Channel 3 in Richmond.

Conclusion

370. The foregoing counterproposals of Gable Broadcasting Company and Shenandoah Broadcasting Company seeking the assignment of Channel 3 to Altoona and Harrisonburg, respectively, are mutually exclusive. As indicated above, however, the assignment of Channel 10 to Altoona would be in accordance with our standards adopted herein. It is our view that the record supports the basis for the additional assignment of a VHF channel to both Altoona and Harrisonburg. The conflict between these communities can be resolved by the assignment of Channel 10 to Altoona and Channel 3 to Harrisonburg. Accordingly, the counterproposal of Gable Broadcasting Company is denied in so far as it requests Channel 3 in Altoona, and Channel 10 is assigned to Altoona; and the counterproposal of Shenandoah Broadcasting Corp. is granted in so far as it requests the assignment of Channel 3 in Harrisonburg.

Final Assignments

371. The following assignments for Altoona and Harrisonburg are adopted: [80]

City	VHF Channel No.	UHF Channel No.
Altoona, Pa.	10	19, 25
Harrisonburg, Va.	3	34

STATE COLLEGE, PENNSYLVANIA EDUCATIONAL RESERVATION

372. **(a) Proposed Reservation.** In the Third Notice the Commission proposed the reservation of Channel 44 for non-commercial educational use at State College.

373. (b) The JCET supported the reservation of Channel 44 in State College, the site of Pennsylvania State College. No objections to the proposed reservation were filed.

Conclusions

On the basis of the record, the reservation of Channel 44 for noncommercial educational use in State College is finalized.

JOHNSTOWN, PENNSYLVANIA

374. (a) **Proposed Assignments.** In the Third Notice the Commission proposed the assignment of VHF Channel 6 and UHF Channel 56 to Johnstown.

(b) **Existing Stations.** WJAC, Inc., is licensed for the operation of WJAC-TV, Johnstown, on Channel 13. The Commission ordered the licensee to show cause why the license of WJAC-TV should not be modified to specify operation on Channel 6 in lieu of Channel 13.

(c) **Answer of WJAC, Inc. to Show Cause Order.** WJAC, Inc. stated that it did not object to the proposed modification of the WJAC-TV license.

Conclusion

375. In view of the foregoing, an appropriate authorization to WJAC, Inc., will be issued to specify operation of WJAC-TV on Channel 6.

ERIE, PENNSYLVANIA

376. (a) **Proposed Assignments and Reservation.** In the Third Notice, the Commission proposed the assignment of VHF Channel 12 and UHF Channels 35 and 41 to Erie, with Channel 41 reserved for non-commercial educational use.

(b) **Census Data.** The metropolitan area of Erie has a population of 219,000 and the City of Erie has a population of 131,000.

(c) **Existing Stations.** Dispatch, Inc., is licensed for the operation of Station WICU on Channel 12 in Erie.

(d) **Counterproposal of Erie Television Corporation.** Erie Television Corporation requested the additional assignment of Channel 64 to Erie by making the following changes in the assignments proposed in the Third Notice:

City	Third Notice		Proposed Changes	
	VHF Channel No.	UHF Channel No.	VHF Channel No.	UHF Channel No.
Erie	12	35, *41	12	35, *41, 64†
Oil City		64		62†

(e) **Statement in Support of Erie Television Corporation Counterproposal.** Erie Television Corporation stated that a grant of its counterproposal would be in accordance with the Commission's rules, with the exception that Channel 47 proposed for Pittsburgh, Pennsylvania, is at a distance of 71 miles from Oil City. The required mileage separation to protect against image interference between Channel 47 and Channel 62 is 75 miles. The Erie Television Corp. asserted however, that the terrain between Pittsburgh and Oil City is extremely rugged and that it is not expected that image interference would result from utilizing Channel 47 at Pittsburgh and Channel 62 at Oil City; that it would be possible to locate transmitters in Pittsburgh and Oil City so that the required 75 miles spacing could be met; and that because of expected improvements in receiver design, the operation of stations on Channel 47 in Pittsburgh and on Channel 62 in Oil City woul not result in objectionable image interference.

(f) **Oppositions and Conflicting Counterproposals to the Erie Television Corporation Counterproposal.** A conflicting counterproposal was filed jointly by Buffalo Courier Express, Inc., WGR Broadcasting Corporation and WBKW, Inc., all of Buffalo, New York, requesting, in part, that either Channel 59 or Channel 62 be assigned to Niagara Falls, New York. This counterproposal of the Buffalo parties has been discussed above and denied for the reasons there stated.

(g) **Counterproposal of Presque Isle Broadcasting Company.** Presque Isle Broadcasting Company filed a counterproposal requesting the assignment of all commercial television at Erie to the UHF band and the shift of the educational reservation from UHF Channel 41 to VHF Channel 12 so that the two UHF channels would be available for commercial use. Alternatively, it was requested by Presque Isle that UHF Channel 58 be assigned to Erie and deleted from Jamestown, New York; or that a flexibility channel be added to Erie. The alternative counterproposals of Presque Isle are as follows:

City	Third Notice		Proposed Changes	
	VHF Channel No.	UHF Channel No.	VHF Channel No.	UHF Channel No.
Plan 1				
Erie, Pa.	12	35, *41	*12†	35, 41†
Plan 2				
Erie, Pa.	12	35, *41	12	34, *41, 58†
Jamestown, N. Y.		58		†
Plan 3				
Erie, Pa.	12	35, *41	12	35, *41, plus Flex. Channel

(h) **Statement in Support of Presque Isle Broadcasting Company Counterproposal.** Presque Isle asserted that intermixture of commercial VHF and UHF television channels in Erie, should be eliminated in order to equalize competition between UHF and VHF commercial stations. It was asserted that the inequality of competition, resulting from intermixture would discourage applications for the only UHF commercial television channel and, consequently, would delay a competitive service to Erie. Presque Isle contended that there need be no injury to the existing licensee operation on Channel 12, or to the owners of VHF television receivers in the Erie area, since a reasonable period of time could be provided the existing VHF station to convert to UHF. In support of its alternative request that an additional UHF channel be assigned to Erie, Presque Isle asserted that while this alternative proposal would not meet the objections to intermixture, an additional UHF commercial channel in Erie would provide an incentive to the public purchase VHF-UHF receivers or UHF converters more promptly and in greater number than if only 1 UHF station were competing with the VHF station.

(i) **Opposition to the Presque Isle Broadcasting Company Counterproposal.** Dispatch, Inc. opposed the counterproposal of Presque Isle to move existing Station WICU to the UHF band and to move the educational reservation to VHF Channel 12. Dispatch, Inc. asserted that converting the existing VHF television station to the UHF would be expensive, both to the licensee and the public. Moreover, it was asserted that if the existing station were required to change to the UHF, 11,735 persons would lose their only commercial television service.

(j) **The Erie Educational Reservation.** The JCET supported the reservation of Channel 41 in Erie for non-commercial educational use. No objection was filed to the reservation of this channel.

Conclusion: Channel 64

377. With respect to the Erie Television Corporation counterproposal, we have discussed above the necessity for maintaining 75 mile separation between channels in the UHF band spaced 15 channels apart. It is our view that the request must be denied for the reasons set out in our discussion of minimum separation in the UHF.

Conclusion: Channels 12 and *41

378. It is our view that Presque Isle's counterproposal requesting that all commercial television in Erie be assigned to the UHF band and the educational reservation shifted from UHF Channel 41 to VHF Channel 12 should be denied. We do not believe that the arguments advanced by Presque Isle outweigh such other important factors as wide VHF coverage which have led to the adoption of our general policy concerning the reservation of VHF channels for non-commercial educational stations. We have proposed the assignment of only one VHF channel to Erie; and in light of the fact that the educational interests in that community have not requested the reservation of that VHF channel for non-commercial educational use and have made no showing with respect to the utilization of a VHF channel, we do not believe the record supports the shifting of the educational reservation to the only VHF channel in Erie. Furthermore, since station WICU is presently operating on this VHF channel, a grant of the Presque Isle request would necessitate a disruption of television service in Erie.

Conclusions: Channel 58 and Flexibility Channel

379. It is our view that the alternative request of Presque Isle Broadcasting Company that UHF Channel 58 be deleted from Jamestown, New York, and assigned to Erie must also be denied. No basis has been established in the record for the deletion of the only channel assigned to Jamestown in order to provide a fourth channel for Erie. However, the Commission believes that, on the basis of the record, the addition of a UHF assignment to Erie is warranted. Accordingly, the counterproposal of Presque Isle Broadcasting Company, insofar as it requests the assignment to Erie of a channel from the 782-890 Mc. band, is warranted and we are assigning Channel 66 to Erie.

Conclusion: The Educational Reservation

380. It is our view on the basis of the record that the proposed reservation of UHF Channel 41 for non-commercial educational use in Erie should be finalized.

Final Assignment and Reservation

381. The following assignments and reservation are adopted:

City	VHF Channel No.	UHF Channel No.
Erie	12	35, *41, 66

LOCK HAVEN, PENNSYLVANIA

382. (a) **Proposed Assignments.** In the Third Notice the Commission did not propose the assignment of any channels to Lock Haven.

(b) **Census Data.** The City of Lock Haven has a population of 11,000.

(c) **Counterproposal of Lock Haven Broadcasting Corporation.** Lock Haven Broadcasting Corporation requested the assignment of UHF Channel 32 to Lock Haven.

(d) **Statement in Support of Counterproposal of Lock Haven Broadcasting Corporation.** In support of its counterproposal, Lock Haven Broadcasting Corporation

[80] No request was made on the record for an educational reservation in Altoona.

urged that the assignment of Channel 32 to Lock Haven, Pennsylvania, would afford the first television station to Lock Haven and a first television service to a small area in the vicinity of Lock Haven and Wililamsport, Pennsylvania. It was also urged that the grant of the counterproposal would afford the second television service in other areas.

Conclusion

383. It is our view that the assignment of a UHF channel to Lock Haven is warranted. Accordingly, the counterproposal of Lock Haven Broadcasting Corporation is granted and the assignment of UHF Channel 32 for Lock Haven is adopted.

BEAVER FALLS, PENNSYLVANIA

384. (a) **Proposed Assignments.** In the Third Notice the Commission did not propose the assignment of any channels to Beaver Falls.

(b) **Census Data.** The City of Beaver Falls has a population of 17,000.

(c) **Counterproposal of WBVP, Inc.** WBVP, Inc. requests the assignment of UHF Channel 16 to Beaver Falls. No other changes in the assignments proposed in the Third Notice were requested.

(d) **Statement in Support of WBVP, Inc. Counterproposal.** In support of the WBVP, Inc. counterproposal it was stated that the nearest cities to Beaver Falls for which the Commission proposed channel assignments are Pittsburgh, at a ditsance of 31 miles, Youngstown, Ohio, at a distance of 28 miles, Butler, Pennsylvania, at a distance of 21 miles, and New Castle, Pennsylvania, at a distance of 16 miles. The WBVP counterproposal would result in a cochannel separation of 165 miles between Beaver Falls, Pennsylvania, and Brantford, Ontario.

(e) **Conflicting Counterproposals and Oppositions to the WBVP, Inc. Counterproposal.** The WBVP, Inc. counterproposal is opposed by, and is mutually exclusive with counterproposals filed by the following parties: Joint proposal filed by the Cleveland Broadcasting Company, United Broadcasting Company, WGAR Broadcasting Company, and WJW, Inc., all of Cleveland, Ohio; WCAF, Inc., Pittsburgh, Pennsylvania; and Pittsburgh Radio Supply House, Pittsburgh, Pennsylvania.

Conclusions

385. The WBVP, Inc. counterproposal for the assignment of Channel 16 to Beaver Falls, Pennsylvania, would result in a cochannel separation of 165 miles between Beaver Falls and Brantford, Ontario. The counterproposal is denied for the reasons set forth in our discussion of Canadian-United States assignments.

TOLEDO, OHIO EDUCATIONAL RESERVATION

386. (a) **Proposed Reservation.** In the Third Notice the Commission proposed the reservation of UHF Channel 30 for Toledo.

(b) The Board of Education of the City School District of Toledo and the University of Toledo supported the reservation of Channel 30 in Toledo for non-commercial educational use. No objections were filed to the proposed reservation.

Conclusions

387. In view of the foregoing, the reservation of Channel 30 in Toledo for non-commercial educational use is finalized.

OXFORD, OHIO EDUCATIONAL RESERVATION

388. (a) **Proposed Reservation.** In the Third Notice the Commission proposed the reservation of UHF Channel 14 for Oxford.

(b) The Miami University supported the reservation of Channel 14 in Oxford for non-commercial educational use. No objection was filed to the proposed reservation.

Conclusions

389. In view of the foregoing, the reservation of Channel 14 in Oxford for non-commercial educational use is finalized.

AKRON, AND WOOSTER, OHIO

390. (a) **Proposed Assignments and Reservation.** In the Third Notice the Commission proposed the following assignments and reservation:

City	VHF Channel No.	UHF Channel No.
Akron, Ohio		49, *55, 61

No assignments were proposed for Wooster.

(b) **Census Data.** The population of Akron is 275,000. The population of Wooster is 14,000.

Akron

391. **The Akron Educational Reservation.** The Board of Education of Akron School District and the Kent State University supported the reservation of Channel 55 in Akron for non-commercial educational use. The Board of Education stated that it was cooperating with Kent State University and the University of Akron in a preliminary study of the problems involved in setting up an educational television station in Akron; that such a study would take considerable time and consequently the reservation was necessary to permit its completion; that a joint committee representing the three institutions held meetings to discuss the problems of construction and operation of an educational television station; that research is being conducted into the possibility of an educational network for the State of Ohio and that various programs produced by the Radio Department of the Akron public schools could be used for educational television.

Wooster

392. (a) **Counterproposal of Wooster Republican Printing Company.** Wooster Republican Printing Company requested the deletion of Channel 55 from Akron and its assignment to Wooster. No other changes were requested in the assignments proposed in the Third Notice.

(b) **Statement in Support of Wooster Republican Printing Company Counterproposal.** Wooster Republican Printing Company stated that its proposed assignment of a channel to Wooster would better meet the assignment principles of the Third Notice than would the proposed assignment.

(c) **Opposition to the Wooster Counterproposal.** The Board of Education of Akron School District, and the Summit Radio Corporation, Akron, Ohio, opposed the Wooster Republican Printing Company counterproposal.

Conclusions

393. It is our view that the record supports the proposed assignment and reservation for non-commercial educational use of Channel 55 in Akron. The City of Akron has a population of 275,000 as compared to the City of Wooster with a population of 14,000. In view of the relative sizes of these communities and in the absence of a showing that no other channel is available for assignment to Wooster, we do not believe that the deletion of Channel 55 from Akron to assign that channel to Wooster is warranted. Accordingly, the counterproposal of Wooster Republican Printing Company is denied and the proposed reservation of Channel 55 in Akron for non-commercial educational use is finalized.

Final Assignments and Reservation

394. The following assignments and reservation are adopted:

City	VHF Channel No.	UHF Channel No.
Akron, Ohio		49, *55, 61

DAYTON, OHIO

395. (a) **Proposed Assignments and Reservation.** In the Third Notice the Commission proposed the assignment of VHF Channels 2 and 7 and UHF Channels 16 and 22 for Dayton, with Channel 16 reserved for non-commercial educational use.

(b) **Existing Stations.** Crosley Broadcasting Corporation is licensed for the operation of Station WLWD on Channel 5. The Commission ordered the licensee to show cause why its license should not be modified to specify operation on Channel 2 in lieu of Channel 5. Miami Valley Broadcasting Corporation is licensed for the operation of Station WHIO-TV on Channel 13. The Commission ordered the licensee to show cause why its license should not be modified to specify operation on Channel 7 in lieu of Channel 13.

(c) **Answers to Orders to Show Cause.** The Crosley Broadcasting Corporation did not object to the proposed modification of the WLWD license. Miami Valley Broadcasting Corporation stated that operation of Station WHIO-TV on Channel 7 in lieu of Channel 13 would constitute an improvement in channel assignments and that it had no objection to the proposed change.

(d) **The Dayton Educational Reservation.** The JCET supported the reservation of Channel 16 in Dayton for non-commercial educational use. No objection was filed to the reservation of this channel.

Conclusions: Orders to Show Cause

396. In view of the foregoing, an appropriate authorization will be issued to Crosley Broadcasting Corporation to specify operation of WLWD on Channel 2; and an appropriate authorization to Miami Valley Broadcasting Corporation will be issued to specify operation of Station WHIO-TV on Channel 7.

Conclusions: Dayton Educational Reservation

397. On the basis of the record the reservation of Channel 16 in Dayton for non-commercial educational use is finalized.

Final Assignments and Reservation

398. The following assignments and reservation are adopted:

City	VHF Channel No.	UHF Channel No.
Dayton, Ohio	2, 7	*16, 22

WARREN, OHIO

399. (a) **Proposed Assignment.** In the Third Notice the Commission proposed the assignment of UHF Channel 21 to Warren.

(b) The Warren Tribune Radio Station, Inc., supported the proposed assignment of Channel 21 to Warren. No objection was filed to the assignment of this channel.

Conclusions

400. In view of the foregoing the proposed assignment of Channel 21 for Warren is adopted.

YOUNGSTOWN, OHIO

401. (a) **Proposed Assignments.** In the Third Notice the Commission proposed the assignment of UHF Channel 27 and 33 to Youngstown.

(b) **Census Data.** The standard metropolitan area of Youngstown has a population of 528,000 and the City of Youngstown has a population of 168,000.

(c) **Counterproposal of Vindicator Printing Company.** Vindicator Printing Company requested the additional assignment to Youngstown of one or more channels in the 782-890 Mc. band.

(d) **Statement in Support of Vindicator Printing Company Counterproposal.** Vindicator Printing Company stated that Youngstown is the only one of the first 30 metropolitan areas of the United States which has not been assigned at least 2 VHF channels for commercial use, and is also one of three of the first 30 metropolitan areas which has not been assigned at least five channels; that Youngstown is the only principal city of the first 30 metropolitan areas which does not have at least three television channels assigned to it for commercial use; and that the City of Youngstown supports three AM and two FM broadcast stations. No opposition was filed to the counterproposal.

(e) Channel 73 can be assigned to Youngstown in accordance with the standards adopted herein.

Conclusions

402. It is our view based on the record that the assignment of an additional channel to Youngstown is warranted. Accordingly, the counterproposal of Vindicator Printing Company is granted, and Channel 73 is assigned to Youngstown.

Final Assignments [91]

403. The following assignments are adopted:

City	VHF Channel No.	UHF Channel No.
Youngstown, Ohio		27, 33, 73

CINCINNATI, OHIO

404. (a) **Proposed Assignments and Reservation.** In the Third Notice the Commission proposed the assignment to Cincinnati of VHF Channels 5, 9 and 12 and UHF Channels 48 and 54, with Channel 48 reserved for non-commercial educational use.

(b) **Census Data.** The standard metropolitan area of Cincinnati has a population of 904,000 and the City of Cincinnati has a population of 504,000.

(c) **Existing Stations.** Crosley Broadcasting Corporation is licensed for the operation of Station WLWT on Channel 4. The Commission ordered the licensee to show cause why its license should not be modified to specify operation on Channel 5 in lieu of Channel 4. Radio Cincinnati, Inc., is licensed for the operation of Station WKRC-TV on Channel 11. The Commission ordered the licensee to show cause why its license should not be

[91] No request was made on the record for an educational reservation in Youngstown.

modified to specify operation on Channel 12 in lieu of Channel 11. Scripps-Howard Radio, Inc., is licensed for the operation of Station WCPO-TV on Channel 7. The Commission ordered the licensee to show cause why its license should not be modified to specify operation on Channel 9 in lieu of Channel 7.

(d) **Answers to Orders to Show Cause.** The Crosley Broadcasting Corporation did not object to the proposed modification of license of WLWT. Radio Cincinnati, Inc., supported the proposed modification of license of WKRC-TV. Scripps-Howard Radio, Inc., did not object to the proposed modification of license of WCPO-TV.

(e) **Counterproposal of L. B. Wilson, Inc.** L. B. Wilson, Inc. requested the assignment of an additional VHF channel to Cincinnati by making the following changes in the assignments proposed in the Third Notice:

City	Third Notice	Plan 1		Plan 2		Plan 3		Plan 4	
	VHF Channel No.	UHF Channel No.	VHF Channel No.	UHF Channel No.	VHF Channel No.	UHF Channel No.	VHF Channel No.	UHF Channel No.	VHF Channel No.	UHF Channel No.
Cincinnati, O.	5, 9, 12	*48, 54	5, 9, 11†, 13†	*48, 54	5, 9, 11†, 13†	*48, 54	5,9,11†,13	*48,54	5,9,11†,13	*48,54
Indianapolis, Ind	6, 8, *13	20, 26	4†, 8, *12	20, 26	4†, 8, *12	20, 55†	6,8,*10†	20,26	6,8,*10†	20,55†

(f) **Statement in Support of L. B. Wilson, Inc. Counterproposal.** L. B. Wilson, Inc., stated that Cincinnati is one of the outstanding cities of the Ohio Valley and the mid-west; that it is recognized as one of the outstanding wholesale markets and manufacturing centers; and that the need and interest for an additional television channel is evidenced by the 258,000 television receiving sets presently in the hands of consumers in the area.

(g) The counterproposals of L. B. Wilson, Inc. would result in the following co-channel separations below 170 miles in Zone I:

Channel	Cities	Plan	Separation
13	Terre Haute-Cincinnati	1	157 miles
5	Clarksburg-Cleveland (Station WEWS)	1	162 miles
4[92]	Indianapolis-Columbus (Station WLWC)	1	167.4 miles
4	Indianapolis-Columbus (Station WLWC)	2	167.4 miles
5	Clarksburg-Cleveland (Station WEWS)	3	162 miles
10	Indianapolis-Columbus (WBNS-TV)	3	167.5 miles
10	Indianapolis-Columbus (WBNS-TV)	4	167.5 miles

(h) The L. B. Wilson counterproposal would also result in oscillator radiation interference. Such interference would be encountered (1) in the Cincinnati area by the assignment of Channels 9 and 13 to that community (proposed by Plans 1, 2, 3 and 4), (2) in areas served jointly by a station in Dayton on Channel 7 and a station in Cincinnati on Channel 11 (proposed by Plans 1, 2, 3 and 4), (3) in the Indianapolis area by the assignment of Channels 8 and 12 in Indianapolis (proposed by Plans 1 and 2), and (4) by the assignment of Channels 8 and 12 in Huntington, West Virginia (Plans 1, 2, 3 and 4), and (5) by the assignment of Channels 9 and 13 in Chicago (proposed by Plans 3 and 4).

(i) **Oppositions and Conflicting Counterproposals to the L. B. Wilson, Inc. Counterproposal.** Oppositions to the counterproposal of L. B. Wilson, Inc., to add an additional channel at Cincinnati, Ohio, or counterproposals which conflict therewith have been filed by the following parties: Champaign News-Gazette, Champaign, Illinois; University of Illinois, Urbana, Illinois; Indianapolis Broadcasting, Inc., Indianapolis, Indiana; Universal Broadcasting Company, Indianapolis, Indiana; West Central Broadcasting Company, Inc., Peoria, Illinois; Ohio State University, Columbus, Ohio; Ashland Broadcasting Company, Ashland, Kentucky; Southern Illinois University, Carbondale, Illinois; William H. Block Company, Indianapolis, Indiana; Cedar Rapids Gazette, Cedar Rapids, Iowa; Mid-America Broadcasting Corporation, Louisville, Kentucky; WHAS, Inc., Louisville, Kentucky; Radio Cincinnati, Inc. (WKRC-TV) Cincinnati, Ohio; Quad-City Broadcasting Corporation, Moline, Illinois; Peoria Broadcasting Company, Peoria, Illinois; WCAE, Inc., Pittsburgh, Pennsylvania; WFBM, Inc., Indianapolis, Indiana; Wabash Valley Broadcasting Corporation, Terre Haute, Indiana; Crosley Broadcasting Corporation (WLWC), Columbus, Ohio; Dispatch Printing Company (WBNS-TV) Columbus, Ohio; Scripps-Howard Radio, Inc. (WEWS), Cleveland, Ohio; Rockford Broadcasters, Inc., Rockford, Illinois; joint opposition filed by Cleveland Broadcasting Company, Inc.; United Broadcasting Company; the WGAR Broadcasting Company and WJW, Inc., all of Cleveland, Ohio; WIBC, Inc., Indianapolis Indiana; Southeastern Ohio Broadcasting Company, Inc., Zanesville, Ohio; Radio Indianapolis, Inc., Indianapolis, Indiana; Hirsch Broadcasting Company, Cape Girardeau, Missouri; and Columbia Broadcasting System, Inc., Chicago, Illinois.

(j) **The Cincinnati Educational Reservation.** Civic, religious, and educational institutions supported the reservation of Channel 48 in Cincinnati for non-commercial educational use. No objection was filed to the reservation.

Conclusions: Request for Additional VHF Channel in Cincinnati

405. It is our view that the counterproposal of L. B. Wilson, Inc., requesting the assignment of a fourth VHF channel to Cincinnati must be denied. Following are the co-channel separations below 170 miles in Zone I which would result under the four alternative plans submitted by L. B. Wilson, Inc.:

Channel	Cities	Plan	Separation
13	Terre Haute-Cincinnati	1	157 miles
5	Clarksburg-Cleveland (Station WEWS)	1	162 miles
4	Indianapolis-Columbus (Station WLWC)	1	167.4 miles
4	Indianapolis-Columbus (Station WLWC)	2	167.4 miles
5	Clarksburg-Cleveland (Station WEWS)	3	162 miles
10	Indianapolis-Columbus (WBNS-TV)	3	167.5 miles
10	Indianapolis-Columbus (WBNS-TV)	4	167.5 miles

Since the foregoing separations are below the minimum of 170 miles provided for Zone I the alternative plans of L. B. Wilson cannot be adopted.

406. In addition alternative Plans 2 and 4 would substitute UHF channels for VHF channels proposed in the Third Notice for other cities and Plan 3 deletes VHF channels with no replacements therefor. The Commission, in the Third Notice, proposed the assignment of one VHF channel for Terre Haute, one VHF channel for Rockford, and one VHF channel for Clarksburg. Plan 2 would delete the only VHF channels proposed to be assigned at Terre Haute and Clarksburg. Plan 3 would delete the only VHF channels proposed to be assigned to Terre Haute and Rockford. Plan 4 would delete the only VHF channels proposed for Terre Haute, Clarksburg and Rockford. Under the foregoing plans, the number of possible VHF assignments would be decreased since the number of VHF assignments required to be deleted under each plan would exceed the number of VHF assignments which would be added. It is our view that the deletion of the only VHF channel assigned to these communities in order to assign a fourth VHF channel to Cincinnati is not warranted. In addition to the foregoing, each of L. B. Wilson's plans would result in oscillator radiation interference. In view of the foregoing, the counterproposal of L. B. Wilson, Inc., to assign an addtional VHF channel to Cincinnati is denied.

Conclusions: Additional Channel for Cincinnati

407. We are of the view that the assignment of an additional channel in Cincinnati is warranted on the basis of the record.[93] It was above noted that the counterproposal requesting an additional VHF channel for Cincinnati could not be granted. UHF Channel 74 in Cincinnati would meet the required mileage spacings for channel assignments in this zone. Accordingly, Channel 74 will be added to Cincinnati.

Conclusions: Show Cause Order

408. An appropriate authorization will be issued to Crosley Broadcasting Corp., to specify operation of Station WLWT on Channel 5. An appropriate authorization will be issued to Scripps-Howard Radio, Inc., to specify operation of WCPO on Channel 9. An appropriate authorization will be issued to Radio Cincinnati, Inc., to specify operation of WKRC-TV on Channel 12.

Conclusions: Cincinnati Educational Reservation

409. On the basis of the record the reservation of Channel 48 for non-commercial educational use in Cincinnati is finalized.

Final Assignments and Reservation

410. The following assignments and reservation are adopted:

City	VHF Channel No.	UHF Channel No.
Cincinnati, Ohio	5, 9, 12	*48, 54, 74

CLEVELAND AND SANDUSKY, OHIO

411. (a) **Proposed Assignments and Reservation.** In the Third Notice the Commission proposed the assignment to Cleveland of VHF Channels 3, 5, and 8, and UHF Channels 19 and 25 with Channel 25 to be reserved for non-commercial educational use, and the assignment to Sandusky of UHF Channel 59.

(b) **Census Data.** The Cleveland standard metropolitan area has a population of 1,466,000 and the City of Cleveland has a population of 915,000. The City of Sandusky has a population of 29,000.

(c) **Existing Stations.** The National Broadcasting Company, Inc. is licensed for the operation of Station WNBK Cleveland, on Channel 4. The Commission ordered the licensee to show cause why its license should not be modified to specify operation on Channel 3 in lieu of Channel 4. Empire Coil Co. Inc., is licensed for the operation of Station WXEL on Channel 9 in Cleveland. The Commission ordered the licensee to show cause why its license should not be modified to

[92] Station WTVN and WFBM-TV are licensed to operate on Channel 6 at Columbus and Indianapolis, respectively. The Third Notice proposed to continue the assignment of Channel 6 to both cities. Plans 1 and 2 of the L. B. Wilson, Inc., counterproposal would substitute Channel 4 for Channel 6 at Indianapolis thereby requiring modification of the WFBM-TV license.

[93] See also our discussion above in connection with the addition of a UHF channel to Pittsburgh.

specify operation on Channel 8 in lieu of Channel 9. Scripps-Howard Radio, Inc., is licensed for the operation of Station WEWS on Channel 5 in Cleveland.

(d) **Answers to Orders to Show Cause.** The National Broadcasting Company, Inc., supported the proposed modification of the WNBK license, and Empire Coil, Inc., supported the proposed modification of the WXEL license.

Cleveland

412. (a) **Joint Counterproposal of Cleveland Broadcasting Company, Inc., United Broadcasting Company; the WGAR Broadcasting Company; and WWJ, Inc.** The above named parties filed a joint counterproposal which would add UHF Channels 31, 59 and 65 to Cleveland and change the educational reservation from Channel 25 to Channel 65. Channel 65 would be added without making other changes in the channels proposed to be assigned in the Third Notice; Channel 59 would be added by substituting Channel 42 for Channel 59 at Sandusky, Ohio; and Channel 31 would be added by making the following other changes in the channel assignments proposed in the Third Notice:

City	Third Notice		Proposed Changes	
	VHF Channel No.	UHF Channel No.	VHF Channel No.	UHF Channel No.
Cleveland, Ohio	3, 5, 8	19, *25	3, 5, 8	19, 25, 31†
Detroit, Mich.	2, 4, 7	50, *56, 62	2, 4, 7	38†, *56, 62
DuBois, Pa.		31		60†
Findlay, Ohio		53		24†
Gallipolis, Ohio		18		33†
Lexington, Ky.		27, 33		18†, 27
Lorain, Ohio		31		23†
Marion, Ohio		17		18†
Massillon, Ohio		23		53†
Pittsburgh, Pa.	2, 11, *13	47, 53	2, 11, *13	16†, 47
Windsor, Ont.	9	32, 38	9	32, 50†

(b) **Statement in Support of the Joint Counterproposal.** The parties stated in support of the joint counterproposal that the four commercial channels proposed by the Third Notice are inadequate to meet the needs of Cleveland; that Cleveland is Ohio's largest city and the seventh largest city in population in the United States; that there is a strong demand in the area for additional television service; and that there are approximately 500,000 television receivers in the Cleveland area.

(c) **Opposition and Conflicting Counterproposals.** The request to add Channel 65 to Cleveland is mutually exclusive with the counterproposal of WCAE, Inc., at Pittsburgh, Pennsylvania, and the counterproposal of the Trebit Corporation at Flint, Michigan. The counterproposals of both WCAE, Inc., and the Trebit Corporation have been denied elsewhere in this Report for the reason there stated. The request to assign Channel 59 to Cleveland by substituting Channel 42 in Sandusky, Ohio for Channel 59 is not in conflict with any other counterproposals nor have oppositions been filed thereto. Oppositions or conflicting counterproposals to the counterproposal to assign Channel 31 to Cleveland have been filed by Pittsburgh Radio Supply House, Pittsburgh, Pennsylvania; WVBP, Beaver Falls, Pennsylvania; and Tri-County Broadcasting Company, DuBois, Pennsylvania.

(d) **The Cleveland Educational Reservation.** The Board of Education and the Superintendent of Schools supported the reservation of Channel 25 in Cleveland for noncommercial educational use. No objection was filed to the reservation of a channel, however, the joint counterproposal of Cleveland Broadcasting Company, et al, which requests that UHF Channel 65 be added to Cleveland also requests that Channel 65 be reserved in lieu of Channel 25.

Conclusions: Additional UHF Channels

413. It is our view that the record warrants the additional assignment of a UHF channel to Cleveland, Ohio' largest city and the seventh largest city in population in the United States. We are not of the opinion, however, that the record supports the addition of more than one UHF channel to Cleveland. We believe that the assignment of one additional channel making a total of 6 channels to a community the size of Cleveland compares favorably with the number assigned to communities of similar size. Moreover, the availability of additional channels, for assignment in the area, particularly in the 782-890 Mc. band, is extremely limited and the assignment of a greater number of channels to Cleveland would decrease the availability of such channels to other cities and communities in the area. There remains for decision which of the three channels requested by the joint counterproposal should be assigned as an additional channel for Cleveland and what other changes, if any, should be adopted. It is our view that the most efficient assignment plan for the area is created if Channel 65 is added to Cleveland and Channel 42 is substituted for Channel 59 in Sandusky. Channel 59 will remain unassigned in the area and thus will be available for assignment later in accordance with the procedures adopted herein. It is our view that other changes in channel assignments which were requested by the counterproposal, should not be adopted.

Conclusions: The Educational Reservation

414. It is our view that the record supports the proposed reservation of Channel 25 in Cleveland for non-commercial educational use. The Commission does not recognize differences in UHF channels for assignment purposes. We see no merit, therefore, in the request of the Cleveland parties that the educational reservation be shifted from Channel 25 to Channel 65 and this request is denied.

Conclusions: Show Cause Orders

415. An approprite authorization will be issued to National Broadcasting Company, Inc., to specify operation of WNBK on Channel 3. An appropriate authorization will be issued to Empire Coil Company, Inc. to specify operation of WXEL on Channel 8.

Final Assignments and Reservation

416. The following assignments and reservation are adopted:

City	VHF Channel No.	UHF Channel No.
Cleveland, Ohio	3, 5, 8	19, *25, 65
Sandusky, Ohio		42

COLUMBUS, OHIO

(a) **Proposed Assignments and Reservation.** In the Third Notice the Commission proposed the assignment to Columbus of VHF Channels 4, 6 and 10, and UHF Channels 34 and 40 with Channel 34 to be reserved for non-commercial educational use.

(b) **Census Data.** The Columbus standard metropolitan area has a population of 503,000 and the City of Columbus has a population of 389,000.

(c) **Existing Stations.** Crosley Broadcasting Corporation is licensed for the operation of Station WLWC on Channel 3. The Commission has ordered the licensee to show cause why its license should not be modified to specify operation on Channel 4 in lieu of Channel 5. The Dispatch Printing Company is licensed for the operation of Station WBNS-TV on Channel 10. Picture Waves, Inc., is licensed for the operation of Station WTVN on Channel 6.

(d) **Answer to Order to Show Cause.** The Crosley Broadcasting Corporation has not objected to the proposed modification of the WLWC license.

(e) **Counterproposal of Ohio State University.** Ohio State University requested the additional assignment of VHF Channel 12 to Columbus and the reservation of that channel for non-commercial educational use by making the following changes in the assignments proposed in the Third Notice:

City	Third Notice		Proposed Changes	
	VHF Channel No.	UHF Channel No.	VHF Channel No.	UHF Channel No.
Columbus, Ohio	4, 6, 10	*34, 40	4, 6, 10, *12†	*34, 40
Cincinnati, Ohio	5, 9, 12	*48, 54	5, 9, 13†	*48, 54
Clarksburg, W. Va.	12		†	22
Cumberland, Md.		17	12†	17
Indianapolis, Ind.	6, 8, *13	20, 26	6, 8, †	20, 26 [94]
Huntington, W. Va.	8, 13	*53	8, †	*53

(f) **Statement in Support of Ohio State University Counterproposal.** In support of its counterproposal Ohio State University stated that it is the largest institution of higher education in Ohio; that it expects to construct a VHF educational station immediately if Channel 12 is assigned to Columbus and reserved for non-commercial educational use; that adequate funds are available for the construction and operation of a station; that it began broadcasting educational programs in 1922; that it broadcasts programs direct to classroom receivers in Ohio schools; and that the annual budget for the operation of its stations is over $150,000. With respect to the requested substitution of a UHF channel for the VHF channel proposed for Clarksburg in the Third Notice, it was asserted that Clarksburg, West Virginia, could best be served by UHF channels exclusively: that the use of UHF in Clarksburg and Huntington, West Virginia would be practical; that the deletion of VHF Channel 12 from Clarksburg and the addition of that channel to Cumberland, Maryland, would provide VHF service to a larger community; that the deletion of VHF Channel *13 from Indianapolis would not deprive Indianapolis of a commercial VHF service; that if a UHF channel were reserved for educational use in Indianapolis a strong incentive would be furnished present set owners to buy adapters to receive UHF signals; that a VHF channel in Columbus could provide educational television service in the immediate future to 55 percent of the homes in the Columbus area now equipped with VHF sets (229,000 sets as of October 1, 1951) and that the operation of a UHF station in Columbus is a commercial impossibility and an educational impracticability. The Ohio State University counterproposals would result in oscillator radiation interference in the Cincinnati area by the assignment of Channels 9 and 13 to that community.

(g) The Columbus Public Schools supported the reservation of Channel 34 in Columbus for non-commercial educational use. Aside from the position taken by Ohio State University no objection was filed to the reservation of this channel.

(h) **Oppositions and Conflicting Counterproposals to the Counterproposal of Ohio State University.** Oppositions and conflicting counterproposals were filed by: Radio Cincinnati, Inc., Cincinnati, Ohio; Clarksburg Broadcasting Corp., and Ohio Valley Broadcasting Corp., both of Clarksburg, West Va.; Universal Broadcasting Company, Inc., Crosley Broadcasting Corporation, WIBC, Inc., William H. Block Company, and Indianapolis Broadcasting Company, all of Indianapolis, Indiana; Huntington Radio Corporation, Huntington, West Va., and Ashland Broadcasting Company, Ashland, Kentucky.

Conclusions: Columbus Educational Reservation

418. It is our view that the counterproposal of Ohio State University should be denied since it would result in an inefficient utilization of the available frequencies. The counterpsoposal would delete VHF channels from three other cities of large size and importance and would assign VHF channels to only two cities in order to secure an additional assignment for Columbus.

We do not believe that the record supports the basis for this reduction in the total number of assignments proposed in the Third Notice. Further, the counterproposal would delete the only VHF assignment at Clarksburg, West Virginia, with a population of 32,000; reduce the VHF assignments at Huntington, West Virginia, with a population of 86,000 and a metropolitan area population of 246,000 from two to one; and reduce from three to two the VHF assignments pro-

[94] The counterproposal did not specify the channel to be reserved for noncommercial educational use in Indianapolis.

posed for Indianapolis, with a population of 427,000 and a metropolitan area population of 552,000. We do not believe this reduction in service is justified by the additional assignment of one VHF channel to Cumberland with a population of 38,000 (where no request for such assignment has been made by any Cumberland party); and the increase in the VHF assignments of Columbus from three to four. The counterproposal would also result in oscillator radiation interference. Accordingly, the counterproposal of Ohio State University for the additional assignment of VHF Channel 12 to Columbus and its reservation for non-commercial educational use is denied; and the proposed reservation of Channel 34 for non-commercial educational use in Columbus is finalized.

Conclusions: Show Cause Order

419. An appropriate authorization to Crosley Broadcasting Corporation will be issued to specify operation of Station WLWC on Channel 4.

Final Assignments and Reservation

420. The following assignments and reservation are adopted:

City	VHF Channel No.	UHF Channel No.
Columbus, Ohio	4, 6, 10	*34, 40

HUNTINGTON AND CHARLESTON, WEST VIRGINIA

421. (a) **Proposed Assignments and Reservations.** In the Third Notice the Commission proposed the following assignments and reservations:

City	VHF Channel No.	UHF Channel No.
Huntington, W. Va.	8, 13	*53
Charleston, W. Va.	3	*43, 49

(b) **Census Data.** The standard metropolitan area of Huntington has a population of 246,000 and the City of Huntington has a population of 86,000. The metropolitan area of Charleston has a population of 322,000 and the city of Charleston has a population of 74,000.

(c) **Existing Stations.** WSAZ, Inc. is licensed for the operation of Station WSAZ-TV on Channel 5 in Huntington. The Commission has ordered the licensee to show cause why its license should not be modified to specify operation on Channel 8 in lieu of Channel 5.

Huntington

422. (a) **Answer to Order to Show Cause and Counterproposal of WSAZ, Inc.** WSAZ, Inc. opposed the Commission's proposal that it move its existing station to Channel 8, and has made a counterproposal requesting that the license of WSAZ-TV be modified to specify operation on Channel 3. This change could be accomplished by substituting the assignment of Channel 3 for Channel 8 in Huntington and substituting the assignment of Channel 8 for Channel 3 in Charleston, West Virginia.

(b) **Statement in Support of Counterproposal of WSAZ, Inc.** WSAZ, Inc. asserted that the cost of conversion from Channel 5 to Channel 8 would be substantially greater than the cost of conversion from Channel 5 to Channel 3; that changing to Channel 8 would require existing set owners to change their antennas which would not be necessary if the change were to Channel 3.

(c) **Oppositions and Conflicting Counterproposals to Counterproposals of WSAZ, Inc.** No oppositions or conflicting counterproposals were filed to the counterproposal of WSAZ, Inc., to assign Channel 3 to Huntington in exchange for Channel 8 and for modification of the WSAZ-TV license to specify operation on Channel 3.

(d) **The Huntington Educational Reservation.** The JCET, Marshall College, and the Board of Education supported the reservation of Channel 53 in Huntington for non-commercial educational use. No objection was filed to the reservation of this channel.

Charleston

423. **The Charleston Educational Reservation.** The JCET, Morris Harvey College and the Kanawha County Schools supported the reservation of Channel 43 in Charleston for non-commercial educational use. No opposition was filed to the reservation of this channel.

Conclusions: Educational Reservations

424. In view of the foregoing, the reservations of Channel 53 in Huntington and Channel 43 in Charleston for non-commercial educational use are finalized.

Conclusions: Show Cause Order

425. It is our view that the counterproposal of WSAZ, Inc. is meritorious, and it is therefore granted. An appropriate authorization to WSAZ, Inc. will be issued to specify operation of WSAZ-TV on Channel 3.

Final Assignments and Reservations

426. The following assignments and reservations are adopted:

City	VHF Channel No.	UHF Channel No.
Huntington, W. Va.	3, 13	*53
Charleston, W. Va.	8	*43, 49

ZANESVILLE, OHIO, AND CLARKSBURG, WEST VIRGINIA

427. (a) **Proposed Assignments.** In the Third Notice the Commission proposed the following assignments:

City	VHF Channel No.	UHF Channel No.
Zanesville, Ohio		50
Clarksburg, W. Va.	12	22

(b) **Census Data.** The population of Zanesville is 41,000. The population of Clarksburg is 32,000.

(c) **Counterproposal of Southeastern Ohio Broadcasting System, Inc.** Southeastern Ohio Broadcasting System, Inc., requested the deletion of Channel 12 from Clarksburg and its assignment to Zanesville by making the following changes in the assignments proposed in the Third Notice:

City	Third Notice VHF Channel No.	Third Notice UHF Channel No.	Proposed Changes VHF Channel No.	Proposed Changes UHF Channel No.
Zanesville, Ohio		50	12†	50
Clarksburg, W. Va.	12	22	†	22, 65†
Cincinnati, Ohio	5, 9, 12	*48, 54	5, 9, 11†	*48, 54
Louisville, Ky.	3, 11	*15, 21	3, 12†	*15, 21

(d) **Statement in Support of Southeastern Ohio Broadcasting System, Inc. Counterproposal.** Southeastern Ohio Broadcasting System urged that its proposal would result in the assignment of an additional channel to Zanesville, without reducing the number of channels for any community; that the assignment of Channel 12 to Zanesville, instead of to Clarksburg, would result in a more efficient utilization of channels, and that the assignment of the VHF channel in Zanesville would provide service in an area where there are many VHF receivers.

City	VHF Channel No.	UHF Channel No.
Zanesville, Ohio		50
Clarksburg, W. Va.	12	22

(e) **Oppositions and Conflicting Counterproposals to the Southeastern Ohio Broadcasting System, Inc. Counterproposal.** Oppositions and conflicting counterproposals have been filed by Ohio Valley Broadcasting Company, Clarksburg, West Virginia; Radio Cincinnati, Inc., Cincinnati, Ohio; L. B. Wilson, Inc., Cincinnati, Ohio; and Ohio State University, Columbus, Ohio.

(f) The Southeastern Ohio Broadcasting System, Inc. counterproposal would result in oscillator radiation interference in areas served by a station operating on Channel 11 in Cincinnati and a station operating on Channel 7 in Dayton, Ohio. Such interferences would be within the Grade A service areas of these stations.

Conclusions

428. We are of the opinion in view of the foregoing that the record does not support the deletion of the only VHF channel for Clarksburg, West Virginia. As we pointed out in the Third Notice, efforts have been made to minimize oscillator radiation interfernce without reducing the number of VHF assignments in the proposed table. The Southeastern proposal would result in no additional VHF assignment and in addition would create oscillator radiation interference from the operation of Channel 11 in Cincinnati and Channel 7 in Dayton. Accordingly, we believe that the assignment of Channel 11 in Cincinnati in view of the assignment of Channel 7 in Dayton, Ohio, is not as engineeringly sound as the assignment of Channel 12 in Cincinnati. In view of the foregoing, the counterproposal of Southeastern Ohio Broadcasting System, Inc. is denied.

Final Assignments

429. The following assignments are adopted:

City	VHF Channel No.	UHF Channel No.
Zanesville, Ohio		50
Clarksburg, W. Va.	12	22

INDIANAPOLIS, INDIANA

430. (a) **Proposed Assignments and Reservations.** In the Third Notice the Commission proposed the following assignments and reservation:

City	VHF Channel No.	UHF Channel No.
Indianapolis	6, 8, *13	20, 26

(b) **Census Data.** The standard metropolitan area of Indianapolis has a population of 552,000 and the city of Indianapolis has a population of 427,000.

(c) **Existing Stations.** WFBM, Inc., is licensed for the operation of Station WFBM-TV on Channel 6.

(d) **Counterproposal of WIBC, Inc.** WIBC, Inc., requested the additional assignment of Channel 4 to Indianapolis by substituting UHF Channel 51 in Terre Haute, Indiana for VHF Channel 10, and by making the following changes in the assignments proposed in the Third Notice: [85]

City	Third Notice VHF Channel No.	Third Notice UHF Channel No.	Proposed Changes VHF Channel No.	Proposed Changes UHF Channel No.
Indianapolis, Ind.	6, 8, *13	20, 26	4†, 6, 8, 13	*20, 26
Terre Haute, Ind.	10	*57, 63	†	51†, *57, 63
Bloomington, Ind.	4	*30, 36	10†	*30, 36
Logansport, Ind.		51		53†
Vincennes, Ind.		44		16†
Lincoln, Ill.		53		55†
Olney, Ill.		16		44†
Findlay, Ohio		53		39†

(e) **Statement in Support of WIBC, Inc. Counterproposal.** WIBC, Inc., urged that the public interest requires the grant of an additional assignment to Indianapolis where this can be achieved without reducing the number of channels assigned to any community. WIBC, Inc., contended that its counterproposal would result in a gain of Grade B service and that the size and economic importance of the Indianapolis area necessitate the assignment of an additional VHF channel for that community. WIBC, Inc., argued that since Terre Haute presently has no "reliable" VHF service and few VHF receivers outstanding, this community could utilize a UHF channel instead of a VHF channel without rendering any sizable public investment obsolete. WIBC, Inc., submitted that its counterproposal would encourage the popularity and growth of UHF and would foster competition in Terre Haute.

(f) The assignment of Channel 4 in Indianapolis would result in a 168 mile co-channel assignment separation between Indianapolis and Columbus, Ohio. The minimum co-channel assignment separation for this zone is 170 miles. The WIBC, Inc., counterproposal would also assign UHF Channel 51 to

[85] WIBC, Inc., also requested that the educational reservation in Indianapolis be moved to a UHF channel.

Terre Haute at a distance of only 49 miles from Bloomington where UHF Channel 36 is assigned by the Commission. Channels 36 and 51 must be 75 miles apart in order to satisfy the mileage separation required to prevent picture image interference.

(g) **Conflicting Counterproposals and Oppositions to the WIBC, Inc. Counterproposal.** The WIBC, Inc., counterproposal is mutually exclusive with the following other counterproposals: Joint counterproposal of Cleveland Broadcasting Company, Inc., United Broadcasting Company, WGAR Broadcasting Company, and WWJ, Inc.; Ohio State University; Columbia Broadcasting System, Inc.; Radio Indianapolis, Inc.; Logansport Broadcasting Corporation and Owensboro On The Air, Inc.; Radio Kentucky, Inc.; Southern Illinois University; Champaign News Gazette; and Evansville Chamber of Commerce. In addition, oppositions to the WIBC, Inc., counterproposal were filed by the following parties: Crosley Broadcasting Corporation, Columbus, Ohio; Wabash Valley Broadcasting Company; Columbia Broadcasting System, Inc., and Logansport Broadcasting Corporation and Owensboro On The Air, Inc.

(h) **Counterproposal of William H. Block Company.** William H. Block Company requested the additional assignment of VHF Channel 10 to Indianapolis by substituting UHF Channel 41 in Terre Haute for Channel 10, as follows:

City	Third Notice		Proposed Changes	
	VHF Channel No.	UHF Channel No.	VHF Channel No.	UHF Channel No.
Indianapolis, Ind.	6, 8, *13	20, 26	6, 8, 10†, *13	20, 26
Terre Haute, Ind.	10	*57, 63	†	41†, *57, 63

(i) **Statement in Support of William H. Block Company Counterproposal.** William H. Block Company urged that the assignment of Channel 10 in Indianapolis would provide a new television service to a greater number of persons as compared with the utilization of Channel 10 in Terre Haute. While the assignment of Channel 10 to Indianapolis would result in a 168 mile separation between that city and Station WBNS-TV presently operating on Channel 10 in Columbus, Ohio, William H. Block Company contended that a transmitter site could be selected in Indianapolis to provide 170 mile co-channel spacing. It was also urged that even with a 168 mile separation, interference would not be substantial. The William H. Block Company counterproposal would assign UHF Channel 41 to Terre Haute, 70 miles from Indianapolis where UHF Channel 26 is assigned by the Commission. Channels that are thus spaced 15 apart are required to have a separation of 75 miles in order to prevent picture image interference. William H. Block Company contended that a separation of 75 miles between transmitters could be achieved and that no objectionable interference would result.

(j) **Conflicting Counterproposals and Oppositions to the William H. Block Company Counterproposal.** The counterproposal of William H. Block Company is mutually exclusive with the following other counterproposals: Logansport Broadcasting Corporation and Owensboro On the Air, Inc.; Ohio State University; Columbia Broadcasting System, Inc., Chicago, Illinois; L. B. Wilson, Inc.; and Mid-American Broadcasting Corporation. In addition, oppositions to the counterproposal of William H. Block Company were filed by the following parties: Dispatch Printing Company; Columbia Broadcasting System, Inc., Chicago, Illinois; Mid-American Broadcasting Corporation; Wabash Valley Broadcasting Company and Logansport Broadcasting Corporation and Owensboro On The Air, Inc.

(k) **Counterproposal of Radio Indianapolis, Inc.** Radio Indianapolis, Inc., requested the additional assignment of UHF Channel 38, or a channel in the 782-890 Mc. band to Indianapolis by making the following changes in the assignments proposed in the Third Notice:[96]

City	Third Notice		Proposed Changes	
	VHF Channel No.	UHF Channel No.	VHF Channel No.	UHF Channel No.
Indianapolis, Ind.	6, 8, *13	20, 26	6, 8, 13	*20, 26, 38† (or flex. chan.)[97]
Connersville, Ind.		38		45†
Kokomo, Ind.		31		29†
Marion, Ind.		29		31†

(l) **Statement in Support of Radio Indianapolis, Inc. Counterproposal.** Radio Indianapolis, Inc. contended that the assignment of UHF Channel 38 in Indianapolis could be accomplished in compliance with the minimum separation requirements with the exception that Channel 45 at Connersville, Indiana, would be only 53 miles from Indianapolis. Channels 38 and 45, being 7 channels apart, must be separated by at least 60 miles to prevent interference due to oscillator radiation.

(m) **Oppositions and Conflicting Counterproposals to the Radio Indianapolis, Inc. Counterproposal.** Conflicting counterprosals and oppositions to the counterproposal of Radio Indianapolis, Inc., for Channel 38 have been filed by WIBC, Inc., Indianapolis, Indiana and Columbia Broadcasting System, Inc., Chicago, Illinois. In addition, the Radio Indianapolis, Inc. counterproposal conflicts with the counterproposal of L. B. Wilson, Inc. for Cincinnati, Ohio.

(n) **The Indianapolis Educational Reservation.** Indianapolis Broadcasting, Inc.; Universal Broadcasting Company; WIBC, Inc.; and Radio Indianapolis, Inc., all of Indianapolis, filed counterproposals requesting that the educational reservation in Indianapolis be removed from VHF Channel 13 and shifted to a UHF channel. In support of its counterproposal, Indianapolis Broadcasting, Inc. submitted letters from Indiana University, Butler University, DePauw University, Wabash College, Jordan College of Music, Franklin College, Purdue University, Indianapolis Public Schools, and the Superintendent of Schools of the Archdiocese of Indianapolis, stating that these institutions did not intend to utilize VHF Channel 13 in Indianapolis for non-commercial educational purposes and indicating that the reservation of a UHF channel would satisfy their requirements. No sworn statements were filed by educators in Indianapolis supporting the reservation of Channel 13. The JCET submitted a sworn statement supporting the reservation of UHF Channel 20 for non-commercial educational use in Indianapolis based on the stated preference of the educational institutions in the Indianapolis area for a UHF reservation rather than VHF Channel 13.

Conclusions: Indianapolis Educational Reservation

431. Both commercial and educational interests in Indianapolis have requested that the educational reservation be shifted from VHF Channel 13 to a UHF channel, and the JCET has urged the reservation of UHF Channel 20 in Indianapolis for non-commercial educational purposes. The evidence indicates, therefore, that the educators in Indianapolis do not intend to utilize VHF Channel 13 for non-commercial educational purposes and that the reservation of a UHF channel would satisfy the needs of the educators in this community.

City	
Indianapolis	

On this basis the JCET supported the reservation of UHF Channel 20 in Indianapolis. In light of the above, we believe the record requires the shifting of the educational reservation from VHF Channel 13 to UHF Channel 20. Accordingly, the counterproposals of Indianapolis Broadcasting, Inc.; Universal Broadcasting Company; WIBC, Inc.; and Radio Indianapolis, Inc., in so far as they request the shifting of the educational reservation in Indianapolis to a UHF channel, are granted. UHF Channel 20 will be reserved in Indianapolis for non-commercial educational use.

Conclusions: Additional UHF Assignment in Indianapolis

432. The additional assignment in Indianapolis of Channel 4, as requested by WIBC, Inc., or of an additional VHF channel to Indianapolis at the expense of the only VHF channel in Terre Haute, a community of 64,000, is warranted. Moreover, the assignment of Channel 4 or Channel 10 in Indianapolis would result in co-channel assignment separations between Indianapolis and Columbus below 170 miles, the minimum assignment separation for this zone; and the assignment of UHF Channel 51 to Terre Haute as proposed by WIBC, Inc., and of UHF Channel 41 to Terre Haute as proposed by William H. Block Company, would also result in separation below the minimum. In light of the foregoing, the counterproposals of WIBC, Inc. and William H. Block Company for the assignment of an additional VHF channel in Indianapolis are denied.

Conclusions: Additional UHF Assignment in Indianapolis

433. We believe that the record supports the addition of a UHF channel in Indianapolis. However, the counterproposal of Radio Indianapolis, Inc. to assign Channel 38 to that community cannot be granted since it would result in assignment separations below the minimum. However, the alternative request of Radio Indianapolis, Inc. seeking a channel in the 782-890 Mc band for Indianapolis can be granted since Channel 67 can be utilized in that city. Accordingly, the counterproposal of Radio Indianapolis, Inc. in so far as it requests the assignment of a channel in the 782-890 MC band in Indianapolis, is granted.

Final Assignments and Reservation

434. The following assignments and reservation are adopted:

VHF Channel No.	UHF Channel No.
6, 8, 13	*20, 26, 67

LOGANSPORT, INDIANA AND OWENSBORO, KENTUCKY

435. (a) **Proposed Assignments.** In the Third Notice the Commission proposed the following aslowing assignments for Logansport, Indiana and Owensboro, Kentucky:

City	VHF Channel No.	UHF Channel No.
Logansport, Ind.		51
Owensboro, Ky.		14

(b) **Census Data.** The population of Logansport is 21,000 and the population of Owensboro is 34,000.

(c) **Counterproposal of Logansport Broadcasting Corporation and Owensboro On The Air, Inc.** A joint counterproposal was filed by Logansport Broadcasting Corporation, Logansport, Indiana, and Owensboro On The Air, Inc., Owensboro, Kentucky, requesting the additional assignment of Channel 10 to both Logansport and Owensboro to be accomplished by shifting Terre Haute, Indiana, from VHF Channel 10 to a UHF channel as follows:

City	Third Notice		Proposed Changes	
	VHF Channel No.	UHF Channel No.	VHF Channel No.	UHF Channel No.
Owensboro, Ky.		14	10†	14
Logansport, Ind.		51	10†	51
Terre Haute, Ind.	10	*57, 63	†	34†, *57, 63

(d) **Statement in Support of Counterproposal of Logansport Broadcasting Corporation and Owensboro On The Air, Inc.** Logansport Broadcasting Corporation and Owensboro On The Air, Inc., Channel 10, as requested by William H. Block Company, can be accomplished only by substituting a UHF channel for the only VHF assignment in Terre Haute. We do not believe that the assignment of

[96] Radio Indianapolis, Inc. also requested that the educational reservation in Indianapolis be shifted to a UHF channel.

[97] No changes would be required to assign a channel in the 782-890 Mc. band to Indianapolis.

contended that the assignment of Channel 10 to both Logansport and Owensboro would provide service to a greater area and number of persons as compared with the assignment of Channel 10 in Terre Haute. Logansport Broadcasting Corporation and Owensboro On The Air, Inc., suggested UHF Channel 34 as a replacement for VHF Channel 10 in Terre Haute. It was recognized, however, that Channel 34 at Terre Haute, being only 152 miles from the co-channel assignment at Carbondale, Illinois, would not meet the minimum separation for co-channel UHF assignments in this area. It was also suggested that UHF Channel 51, as proposed by WIBC, Inc., or UHF Channel 41 as proposed by William H. Block Company, in connection with their counterproposal for Indianapolis, be assigned in Terre Haute to replace VHF Channel 10.[68]

(e) Conflicting Counterproposals and Oppositions to the Logansport Broadcasting Corporation and Owensboro On The Air, Inc. Counterproposal. The Logansport-Owensboro counterproposal conflicts with the following other counterproposals: William H. Block Company, Indianapolis, Indiana; WIBC, Inc., Indianapolis, Indiana; L. B. Wilson, Inc., Cincinnati, Ohio; Twin Valley Broadcasters, Inc., Coldwater, Michigan; Quad-City Broadcasting Corp., Moline, Illinois; Michigan State College, East Lansing, Michigan; WJR, The Goodwill Station, Inc., Detroit, Michigan; and University of Southern Illinois, Carbondale, Illinois. In addition, oppositions to the Logansport-Owensboro counterproposal were filed by the following parties: Wabash Valley Broadcasting Company, Terre Haute, Indiana; WIBC, Inc., Indianapolis, Indiana; William H. Block Company, Indianapolis, Indiana; and WJR, The Goodwill Station, Inc., Detroit, Michigan.

Conclusions

436. The counterproposal of Logansport Broadcasting Corporation and Owensboro On The Air, Inc., would assign Channel 10 in both Logansport and Owensboro by deleting the only VHF channel from Terre Haute, a community of 64,000 in a metropolitan area of 105,000. However, the combined population of both Logansport and Owensboro is less than the population of Terre Haute. In view of the size and importance of Terre Haute, we do not believe that Channel 10 should be deleted from Terre Haute to provide a VHF channel for Logansport and Owensboro. In light of the foregoing, the counterproposal of Logansport Broadcasting Corporation and Owensboro On The Air, Inc., is denied.

Final Assignments

437. The following assignments are adopted:

City	UHF Channel No.
Logansport, Ind.	51
Owensboro, Ky.	14

FORT WAYNE, INDIANA

438. (a) **Proposed Assignments and Reservations.** In the Third Notice the Commission proposed the assignment of three UHF channels to Fort Wayne, Indiana: Channels 21, 27 and 33, with Channel 27 reserved for non-commercial educational use.

(b) **Census Data.** The Fort Wayne standard metropolitan area has a population of 184,000 and the City of Fort Wayne has a population of 134,000.

(c) **Counterproposal of Indiana Technical College.** Indiana Technical College of Fort Wayne filed a counterproposal requesting the additional assignment of VHF Channel 5 to Fort Wayne, with power limited to 14 kw, to be reserved for non-commercial educational use in lieu of UHF Channel 27.

(d) **Statement in support of Indiana Technical College Counterproposal.** Indiana Technical College stated that the assignment of a VHF channel in Fort Wayne would make possible the immediate initiation of a non-commercial educational television service. Indiana Technical College stated that it had received as donations much of the equipment necessary for the construction of a VHF station. None of this equipment would be adaptable for use in the UHF band. Accordingly, the Indiana Technical College stated that if a VHF channel is not assigned to Fort Wayne for non-commercial educational use, "it seems very doubtful at the present time that the necessary funds and community interest to support a non-commercial educational UHF outlet in Fort Wayne could be found for several, perhaps many, years to come." The Mayor of Fort Wayne stated that the city has appropriations set aside for such purposes and that as much financial assistance as possible would be given, along with full assistance in connection with programming. The Paterson-Fletcher Company, Rea Magnet Wire Company and other business organizations pledged their full cooperation in helping to finance the construction and operation of a non-commercial educational station in Fort Wayne. The following organizations in Fort Wayne stated their intention of assisting in the programming of the proposed educational station: Fort Wayne-Allen County Chapter of the Red Cross, Superintendent of Schools, Concordia College, St. Francis College, Fort Wayne Bible College, Public Library, Fort Wayne Art School and Museum, Fort Wayne Civic Theatre, Fort Wayne Musical Society, Chamber of Commerce. The film library of WOI-TV in Ames, Iowa, has been placed at the disposal of Indiana Technical College for use on the proposed educational station. Galbreath Pictures Production, Inc., has made available to the College its film library for use on the proposed station and has offered to lend assistance in any television production problems. The Capehart - Farnsworth Corporation has given the support of its organization and engineering personnel to the television activities of the College. The Indiana Technical College stated that the Fort Wayne community enthusiastically supported the establishment of an educational television station in Fort Wayne.

(e) Channel 5 in Fort Wayne would be 143 miles from existing television Station WNBQ in Chicago and 139 miles from existing Station WLWT in Cincinnati, both operating on Channel 5. However, Indiana Technical College stated that no limitation on the operation of Stations WNBQ and WLWT would be necessary if a maximum of 14 kw power at an antenna height of 500 feet would be specified in the use of Channel 5 at Fort Wayne. By limiting power to 14 kw at Fort Wayne, Indiana Technical College asserted that interference to the Grade A service areas of WNBQ and WLWT would be avoided entirely and that less interference would be caused to the Grade B service areas of these stations than would result from the assignment of a station employing 100 kw power at a separation of 180 miles. In was also contended that all of the Grade B area loss due to the operation of a station in Fort Wayne on Channel 5 as proposed would receive service from other stations. Indiana Technical College stated that a station operating on Channel 5 in Fort Wayne as proposed would have an interference-free Grade A service radius of 17.3 miles and a Grade B interference-free service radius varying from a minimum of 25.1 to a maximum of 34 miles.

(f) Indiana Technical College argued that precedent exists for affording assistance to non-commercial educational television broadcasting, including the operation with low power. In addition to the reservation policy adopted by the Commission, Indiana Technical College pointed to the concessions made to non-commercial FM stations including permission to operate with powers of 10 watts and less. In connection with AM broadcasting, the College submitted that the Commission granted many exceptions to its general rules, including permission for educational licensees to discontinue broadcasts during the summer months. Accordingly, Indiana Technical College requested the assignment of Channel 5 in Fort Wayne to be utilized with low power.

(g) **Opposition to the Indiana Technical College Counterproposal.** Crosley Broadcasting Corporation, licensee of Station WLWT, Cincinnati, Ohio, and National Broadcasting Company, Inc., licensee of Station WNBQ, Chicago, Illinois, filed oppositions to the Indiana Technical College counterproposal. As noted above, Channel 5 in Fort Wayne would be 143 miles from Station WNBQ in Chicago and 139 miles from Station WLWT, in Cincinnati. The oppositions of Crosley and NBC are based on the interference which allegedly would be caused by the operation of a station in Fort Wayne on Channel 5.

Conclusions

439. The assignment of Channel 5 in Fort Wayne would not meet the minimum co-channel assignment separations for Zone I. While Indiana Technical College recognizes this deviation, it requested that operation be permitted with power limited to 14 kw. We have in another portion of this Report discussed low power operation and we have there concluded that the public interest would not be served by such operation where an assignment is made in violation of the minimum separation requirements. We find no reason to deviate from our rules with respect to the operation of low power stations. The Commission recognizes that it has made special rules with respect to power and time of operation for educational stations in other services. The engineering considerations that are involved in the establishment of low power stations in television make it impossible, however, to permit low power operation in the non-commercial educational television service. In light of the foregoing, the counterproposal of Indiana Technical College is denied. We believe, however, that the record supports the reservation of UHF Channel 27 in Fort Wayne as proposed in the Third Notice and the reservation of Channel 27 in Fort Wayne, is finalized.

Final Assignments

440. The following assignments are adopted:

City	UHF Channel No.
Fort Wayne, Indiana	21, *27, 33

BLOOMINGTON, INDIANA

441. (a) **Proposed Assignments and Reservation.** In the Third Notice the Commission proposed the following assignments and reservation to Bloomington, Indiana:

City	VHF Channel No.	UHF Channel No.
Bloomington, Ind.	4	*30, 36

[68] Wabash Valley Broadcasting Corporation filed a Motion to Strike paragraph 22 of the "Written Presentation in Lieu of Hearing" filed by WSAL and WVJS (Logansport Broadcasting Corporation and Owensboro On the Air, Inc.) on September 10, 1951 for the reason that the joint counterproposal of WSAL and WVJS filed on May 7, 1951 proposed the deletion of Channel 10 from Terre Haute, Indiana, and the substitution of Channel 34 therefor; that in paragraph 22 of the September 10, 1951 statement they admitted the impracticability of assigning Channel 34 to Terre Haute and abandoned that portion of their counterproposal; that in the same document of September 10, 1951, WSAL and WVJS proposed for the first time that Channel 41 or 51, or a flexibility channel, or one of the "unused channels in the area" be assigned to Terre Haute. WSAL and WVJS filed an opposition to the abovementioned Motion to Strike admitting that such material objected to did not appear in prior presentations made by them but said that such material has been properly submitted as evidence by other parties to this proceeding (by William H. Block Co.; WIBC, Inc.; L. B. Wilson, Inc.) and therefore may be properly recited and relied upon by WSAL and WVJS. The Motion to Strike is GRANTED but the Commission has considered all the evidence which has been offered by other parties to this proceeding with respect to the possible assignment to Terre Haute.

WSAL and WVJS filed with the Commission a "Motion to Strike and For Other Relief and Opposition to Motion to Strike" and a "Reply to Brief of Wabash Valley Broadcasting Corporation." The Motion to Strike is directed against certain portions of the testimony in the sworn statements of Wabash Valley Broadcasting Corporation filed with the Commission on September 8, 1951 and October 8, 1951. The Opposition to Motion to Strike is directed against the Motion to Strike filed by Wabash Valley Broadcasting Corporation on October 22, 1951. On November 26, 1951 Wabash Valley Broadcasting Corporation filed with the Commission "A Motion to Strike Physically Documents Filed Late by Logansport Broadcasting Corporation and Owensboro On The Air." Wabash Valley Broadcasting Corporation moves to strike for the reason that the Commission's Order on Hearing Procedure provides that all pleadings and briefs affecting Groups N through R should be filed by October 22, 1951 and that the above-named parties filed their documents one week late.

The Motion to Strike is GRANTED in so far as it pertains to the "Reply to Brief of Wabash Valley Broadcasting Corporation" and "Motion to Strike" certain portions of the testimony of Wabash Valley Broadcasting Corporation, both filed on October 29, 1951, since these documents have been filed one week later than the deadline for their group. The Motion to Strike is DENIED in so far as it pertains to the "Opposition to Motion to Strike" filed by WSAL and WVJS on October 29, 1951 for the Motion to Strike was not filed until October 22, 1951, the deadline date for the group, and WSAL and WVJS must be allowed the opportunity to file an opposition to the motion to strike.

(b) **Existing Stations.** Sarkes Tarzian, Inc. has a construction permit for Station WTTV in Bloomington on Channel 10, is operating under special temporary authorization and has been directed to show cause why its authorization should not be modified to specify operation on Channel 4 in lieu of Channel 10.

(c) **Answer of Sarkes Tarzian, Inc., to Show Cause Order.** Sarkes Tarzian, Inc., stated that it had no objection to the Commission's proposal to move Station WTTV from Channel 10 to Channel 4.

(d) **Educational Reservation in Bloomington.** Indiana University supported the reservation of Channel 30 in Bloomington, stating that it hopes to make use of the reservation in cooperation with other educational institutions in the area. No oppositions to the reservation were filed.

Conclusions: Show Cause Order

442. An authorization will be issued to Sarkes Tarzian, Inc., to specify operation of Station WTTV on Channel 4 in lieu of Channel 10.

Conclusions: Educational Reservation

443. In view of the foregoing, the reservation of Channel 30 in Bloomington for non-commercial educational use is finalized.

Final Assignments and Reservation

444. The following assignments and reservation are adopted:

City	VHF Channel No.	UHF Channel No.
Bloomington, Ind.	4	*30, 36

EVANSVILLE, INDIANA

445. (a) **Proposed Assignments and Reservation.** In the Third Notice the Commission proposed the assignment of 4 channels to Evansville, Indiana: VHF Channel 7 and UHF Channels 50, 56 and 62, with Channel 56 reserved for non-commercial educational purposes.

(b) **Census Data.** The standard metropolitan area of Evansville has a population of 160,000 and the City of Evansville has a population of 129,000.

(c) **Statement in Support of Proposed Assignments.** South Central Broadcasting Corporation, Evansville, Indiana, and the Evansville Chamber of Commerce filed statements supporting the proposed assignments for Evansville.

(d) **Counterproposal of Evansville Chamber of Commerce.** In addition to supporting the proposed assignments for Evansville, the Evansville Chamber of Commerce requested that the Commission "keep Evansville in mind for another VHF or UHF channel should circumstances make such further allocation possible." It was suggested that Channel 29 should be assigned to that community.

(e) The assignment of Channel 29 to Evansville would not meet the required 75 mile spacing necessary to prevent picture image interference in light of the assignment of Channel 14 in Ownesboro, Kentucky, and Channel 44 in Vincennes, Indiana, both within 75 miles of Evansville.

(f) **Educational Reservation.** Evansville College supported the reservation of UHF Channel 56 in Evansville for non-commercial educational use. Incorporated in this statement were letters of support of the reservation by the Evansville Chamber of Commerce, Evansville Public Schools, and the Evansville Public Museum. Evansville College stated that there is interest among the educational institutions in the area in working cooperatively for the construction and use of an educational television station. The President of the College, stated that there is "every expectation that some time in the foreseeable future as adjustments are made, equipment becomes available in the UHF field, and the probable cost of equipment and production are reduced this community will wish to make television as part of the total educational facility which it uses."

(g) The South Central Broadcasting Corporation, Evansville, Indiana, supported the reservation of Channel 56 for non-commercial educational use provided the time of reservation is not unduly prolonged, and suggested that a time limitation of one year be placed on the reservation.

Conclusions: Additional Assignments

446. We believe that the record does not support the assignment of additional channels to Evansville. The assignment of Channel 29 proposed by the Evansville Chamber of Commerce would not meet the required 75-mile spacing necessary to prevent picture image interference. In light of the foregoing, the counterproposal of the Evansville Chamber of Commerce requesting the additional assignment of Channel 29 is denied.

Conclusions: Educational Reservation

447. We believe, on the basis of the record, that the reservation of Channel 56 for non-commercial educational use in Evansville should be finalized. We do not believe that a time limitation on the reservation of one year as suggested by the South Central Broadcasting Corporation is warranted. We see no reason for deviating in this instance from the rules adopted herein with respect to the amendments of the Table. In the light of the foregoing, the reservation of Channel 56 for non-commercial use in Evansville is finalized.

TERRE HAUTE, INDIANA: EDUCATIONAL RESERVATION

448. (a) **Proposed Reservation.** In the Third Notice the Commission proposed the reservation of Channel 57 for non-commercial educational use.

(b) Indiana State Teacher's College filed a statement supporting the reservation of Channel 57 in Terre Haute for non-commercial educational use. It was stated that local educational institutions including Indiana State Teachers College, Rose Polytechnic Institute, and St. Mary-of-the-Woods College, and the public schools of Terre Haute, were studying the legal and technical aspects of the establishment of an educational television station. No oppositions were filed to the proposed reservation.

Conclusions

449. In view of the foregoing the reservation of Channel 57 for non-commercial educational use in Terre Haute is finalized.

SOUTH BEND, INDIANA: EDUCATIONAL RESERVATION

450. (a) **Proposed Reservation.** In the Third Notice the Commission proposed the reservation of Channel 40 in South Bend for non-commercial educational use.

(b) The University of Notre Dame supported the reservation of Channel 40 for non-commercial educational use. The President of the University stated that it was studying the financial, programming, legal and engineering requirements necessary to establishing an educational television station. No oppositions to the proposed reservation were filed.

Conclusions

451. In view of the foregoing the reservation of Channel 40 for non-commercial educational use in South Bend is finalized.

MICHIGAN CITY, INDIANA

452. (a) **Proposed Assignments.** In the Third Notice the Commission proposed the assignment of one channel, UHF Channel 62 to Michigan City, Indiana.

(b) **Census Data.** Michigan City has a population of 28,000.

(c) **Statement in Support of Proposed Assignment.** William C. Higgins filed a statement supporting the proposed assignment of UHF Channel 62 for Michigan City. It was urged that this assignment would be in the public interest, convenience and necessity, and that such assignment is required by the priorities. No oppositions to the assignment of Channel 62 in Michigan City were filed.

Conclusions

453. In view of the foregoing, the assignment of Channel 62 in Michigan City is adopted.

MUNCIE, INDIANA

454. (a) **Proposed Assignments.** In the Third Notice the Commission proposed the assignment of 2 channels to Muncie, Indiana; UHF Channels 49 and 55.

(b) **Census Data.** The Muncie standard metropolitan area has a population of 90,000 and the City of Muncie has a population of 58,000.

(c) **Counterproposal of Ball State Teachers College.** Ball State Teachers College, Muncie, Indiana, requested that Channel 55 be designated as an educational reservation or that a channel in the 782-890 mc. band be assigned to Muncie to be reserved for non-commercial educational use. No oppositions were filed to the counterproposal.

(d) **Statement in Support of Ball State Teachers College Counterproposal.** Ball State Teachers College stated that it is the only state institution of higher learning in Indiana which would not have a television assignment reserved in its area for non-commercial educational use. The Director of Radio of the College noted that both radio and television courses are now being conducted in the school and that the television courses would be expanded when an educational television station commenced operation. Support for the counterproposal of Ball State Teachers College was also expressed by the Mayor of Muncie, the Principal of Burris School in Muncie, and the School City of Muncie.

Conclusions

455. In view of the foregoing the counterproposal of Ball State Teachers College insofar as it requested the assignment of a channel in Muncie to be reserved for non-commercial educational use is granted. Accordingly, Channel 71 is assigned to Muncie and is reserved for non-commercial educational use.

Final Assignments and Reservation

456. The following assignments and reservation are adopted:

City	UHF Channel No.
Muncie	49,55,*71

LAFAYETTE, INDIANA: EDUCATIONAL RESERVATION

457. (a) **Proposed Reservation.** In the Third Notice the Commission proposed the reservation of Channel 47 to Lafayette, Indiana, for non-commercial educational use.

(b) Purdue University, Lafayette, Indiana, supported the reservation of Channel 47 in Lafayette for non-commercial educational use. No oppositions to the proposed reservation in Lafayette were filed.

Conclusions

458. In view of the foregoing, the reservation of Channel 47 in Lafayette, Indiana, for non-commercial educational use is finalized.

GARY, INDIANA

459. (a) **Proposed Assignment.** In the Third Notice, the Commission proposed the assignment of one channel for Gary, Indiana, UHF Channel 50.

(b) **Census Data.** The population of Gary is 134,000. Gary lies within the Chicago metropolitan area.

(c) **Counterproposal of the Board of School Trustees of the School City of Gary.** The Board of School Trustees of the School City of Gary requested in the alternative (1) that Channel 50 proposed for Gary in the Third Notice be reserved for non-commercial educational use; or (2) that Channel 44 be deleted from Chicago, assigned to Gary, and reserved for non-commercial educational use; or (3) that a channel in the 782-890 Mc. band be assigned to Gary and reserved for non-commercial educational use.

(d) **Statement in Support of Board of School Trustees Counterproposal.** The Board of School Trustees urged, that adequate coverage for the Gary area from an educational television station in Chicago would not be achieved, and that the Audio-Visual Educational Department of the Gary Public Schools was in a position to aid educational television. The Superintendent of Schools stated that the Board was "aware of the cost of establishing a television broadcasting station and of the cost of the operation of such a station" and represented that the Board would do its best "to finance this area in an adequate manner."

(e) **Opposition to the Board of School Trustees Counterproposal.** Johnson-Kennedy Radio Corporation filed an opposition to the Board of School Trustees counterproposal only insofar as it requested the deletion of Channel 44 from Chicago.

(f) **Counterproposal of the Lake Broadcasting Company.** Lake Broadcasting Company, Gary, Indiana, filed a counterproposal requesting that VHF Channel 11 be deleted from Chicago, where it is reserved for non-commercial educational use, and be assigned to Gary, with the reservation in

Chicago shifted to UHF Channel 20, as follows:

City	Third Notice VHF Channel No.	Third Notice UHF Channel No.	Counterproposal VHF Channel No.	Counterproposal UHF Channel No.
Chicago, Illinois	2,5,7,9,*11	20,26,32, 38,44	2,5,7,9, †	*20,26,32, 38,44
Gary, Indiana		50	11†	50†

(g) Statement in Support of Lake Broadcasting Company Counterproposal. The Lake Broadcasting Company urged that Gary was entitled to an additional assignment in accordance with priorities 3 and 4 and in light of the mandate of Section 307(b) requiring an equal distribution of frequencies between states and cities. It was further contended that educational television in Chicago would not be adversely affected by shifting the reservation for non-commercial educational use to a UHF channel.

(h) Opposition to the Lake Broadcasting Company Counterproposal. The Johnson-Kennedy Radio Corporation, Chicago, Illinois, filed an opposition to the counterproposal of the Lake Broadcasting Company contending that the shifting of Channel 11 from Chicago to Gary would substantially reduce the number of persons that would receive service from this assignment. While the Johnson-Kennedy Radio Corporation neither supported nor opposed the reservation of Channel 11 in Chicago for non-commercial educational use, it was urged that Channel 11 should not be deleted from that community. The Lake Broadcasting Company counterproposal also conflicts with the support of the JCET and educational institutions for the reservation of Channel 11 in Chicago.

Conclusions: Assignment of VHF Channel 11 to Gary

460. We do not believe that a VHF channel should be deleted from Chicago to provide a VHF channel for Gary. Chicago has a metropolitan area population of 5,495,000 and a city population of 3,621,000. Gary is in the metropolitan area of Chicago and is located 24 miles from the City of Chicago. Gary will receive Grade A service from the operation of VHF stations in Chicago. We do not believe that the deletion of a VHF assignment from one of the major cities of the United States is warranted where the smaller city is located within the metropolitan area of the major city and will receive Grade A VHF service from stations located in the larger city. It is our view that the deletion of a VHF assignment from a city as large and as important as Chicago to create one for Gary is not warranted. The counterproposal of Lake Broadcasting Company is therefore denied.[99]

Conclusions: Educational Reservation in Gary

461. We are of the view that the record supports the reservation of a channel at Gary for non-commercial educational use. However, we do not believe such a reservation is warranted at the expense of the only commercial assignment in Gary or of the deletion of a UHF channel from Chicago. Accordingly, Channel 66 is assigned to Gary and reserved for non-commercial educational use.

Final Assignment and Reservation

462. In view of the foregoing, the following assignments and reservation for Gary are adopted:

City	UHF Channel No.
Gary, Indiana	50,*66

LOUISVILLE, KENTUCKY

463. (a) **Proposed Assignments and Reservation.** In the Third Notice the Commission proposed the assignment of four channels to Louisville, Kentucky: VHF Channels 3 and 11 and UHF Channels 15 and 21, with Channel 15 reserved for non-commercial educational use.

(b) **Census Data.** The Louisville standard metropolitan area has a population of 577,000. The City of Louisville has a population of 369,000.

(c) **Existing Stations.** WAVE, Inc., is licensed for the operation of Station WAVE-TV on Channel 5, and WHAS, Inc., is licensed for the operation of Station WHAS-TV on Channel 9. The above licensees have been directed to show cause in this proceeding why the licenses of WAVE-TV and WHAS-TV should not be modified to specify operation on Channels 3 and 11, respectively, in lieu of Channels 5 and 9.

(d) **Answers to Orders to Show Cause.** WHAS, Inc., stated that it agreed to the proposed modifications of its license to specify operation of WHAS-TV on Channel 11 in lieu of Channel 9. WHAS, Inc., pointed out that the assignment of Channel 11 in Louisville would be 227 miles from the co-channel assignment at Johnson City, Tennessee, and 241 miles from the co-channel assignment at St. Louis, Missouri, the closest co-channel assignments, and that accordingly, the assignment of Channel 11 in Louisville would meet the minimum separation requirement. WAVE, Inc., has not filed an objection to the proposed modification of its license to specify operation on Channel 3 in lieu of Channel 5.

(e) **Counterproposals of Mid-America Broadcasting Corporation and Radio Kentucky, Inc.** Mid-America Broadcasting Corporation, Louisville, Kentucky, filed a counterproposal requesting the additional assignment of UHF Channel 41 to Louisville "as well as all other additional channels which can be allocated." Radio Kentucky, Inc. filed a counterproposal requesting the additional assignment of UHF Channel 51 to Louisville.[99] The counterproposals would make the following changes:

City	Third Notice VHF Channel No.	Third Notice UHF Channel No.	Proposed Changes VHF Channel No.	Proposed Changes UHF Channel No.
Louisville, Kentucky	3,11	*15,21	3,11	15,21,41†,51†

(f) Statements in Support of Counterproposals of Mid-America Broadcasting Corporation and Radio Kentucky, Inc. It was urged by Mid-America Broadcasting Corporation that Louisville, which ranks 25th among the nation's metropolitan areas, has fewer proposed assignments than many lesser metropolitan areas. It was pointed out, for example, that the Commission in the Third Notice proposed the assignment of 5 channels to Denver, the 26th ranking metropolitan area, and 5 channels to Indianapolis, the 28th metropolitan area. It was further urged that the assignment of Channel 41 in Louisville would not require the deletion of channels from any other community and would meet the required assignment separations. Radio Kentucky, Inc. contended, in support of its request, that UHF Channel 51 can be assigned to Louisville without affecting any other assignments and would meet the minimum assignment separations. No oppositions were filed to the counterproposals of Mid-America Broadcasting Corporation or Radio Kentucky, Inc.

(g) Educational Reservation in Louisville. The Louisville Free Public Library, the Board of Education of Louisville, the Lutheran Baptist Theological Seminary, and Nazareth College supported the reservation of Channel 15 for non-commercial educational use in Louisville. Radio Kentucky, Inc. opposed the reservation of Channel 15 in Louisville contending that educational institutions would be adequately served by commercial stations; that educational institutions would secure a maximum audience through the utilization of commercial television; that educational institutions would best be served by participating in the regular programming of commercial stations; and that educational institutions in Louisville lacked the necessary finances to establish a non-commercial educational television station. In reply, the Louisville Public Library and the Board of Education of Louisville argued that television could become a real tool of instruction only if the stations are owned and controlled by the educational institutions. It was also urged that since commercial interests could move more rapidly than educational institutions in making plans and securing necessary funds, the reservation of channels for non-commercial educational use are necessary.

Conclusions: Additional UHF Assignments

464. We are of the view that the record supports the assignment of additional UHF assignments to Louisville. Since Channels 41 and 51 can be assigned without affecting any other assignments and in conformity with minimum separation requirements these channels are assigned to Louisville.

Conclusions: Educational Reservation

465. We believe that the record supports the reservation of UHF Channel 15 for non-commercial educational use in Louisville. Accordingly, we are finalizing the reservation of UHF Channel 15 in Louisville for non-commercial educational use.

Conclusions: Show Cause Orders

466. Appropriate authorizations will be issued to WAVE, Inc., and WHAS, Inc., to specify operation of WAVE-TV and WHAS-TV on Channels 3 and 11, respectively.

Final Assignments and Reservation

467. The following assignments and reservation are adopted:

City	VHF Channel No.	UHF Channel No.
Louisville	3,11	*15,21,41,51

COLDWATER, MICHIGAN

468. (a) **Proposed Assignments.** In the Third Notice the Commission proposed no assignments for Coldwater, Michigan.

(b) **Census Data.** Coldwater has a population of 9,000.

(c) **Counterproposal of Twin Valley Broadcasters, Inc.** A counterproposal has been filed by Twin Valley Broadcasters, Inc., Coldwater, Michigan, requesting the assignment of VHF Channel 10 to Coldwater, or that a UHF channel be assigned to that community in the event that a VHF channel is not assigned. No other changes in channel assignments were suggested to accomplish this counterproposal.

(d) **Statement in Support of Twin Valley Broadcasters, Inc. Counterproposal.** Twin Valley Broadcasters, Inc., submitted that under the assignments proposed in the Third Notice, Coldwater would receive only fringe area reception. It was pointed out that Coldwater presently supports an AM and FM station, and it was urged that a television channel, either VHF or UHF, should be assigned to this community. Channel 10 at Coldwater would be 168 miles from the co-channel assignment at Milwaukee, Wisconsin, and 172 miles from the co-channel assignment at Columbus, Ohio.

(e) **Conflicting Counterproposals and Oppositions to the Twin Valley Broadcasters, Inc. Counterproposal.** The counterproposal of Twin Valley Broadcasters, Inc., insofar as it requests the assignment of Channel 10 in Coldwater, is mutually exclusive with the counterproposals of the following other parties: The Trebit Corporation, Flint, Michigan; Michigan State College, East Lansing, Michigan; Logansport Broadcasting Corp., Logansport, Indiana; and Owensboro On The Air, Inc., Owensboro, Kentucky; WJR, The Goodwill Station, Inc., Detroit, Michigan; William H. Block Company, Indianapolis, Indiana; L. B. Wilson, Inc., Cincinnati, Ohio; and Quad City Broadcasting Corp., Moline, Illinois. In addition, oppositions were filed by the following parties: Michigan State College; Dispatch Printing Company, Inc., Columbus, Ohio; The Trebit Corporation; WJR, The Goodwill Station, Inc., and Logansport Broadcasting Corp.; and Owensboro On The Air, Inc.

Conclusions

469. We are of the view that the record supports the assignment of a television channel in Coldwater, Michigan. However, the assignment of VHF Channel 10 in that community would result in a deviation from the 170 mile minimum assignment separation for co-channel stations in this zone. The Twin Valley Broadcasters, Inc. counterproposal is therefore denied insofar as it requests the assignment of VHF Channel 10 to Coldwater. However, UHF Channel 24 which meets the required mileage separations will be assigned to Coldwater.

Final Assignment

470. The following assignment is adopted:

City	VHF Channel No.	UHF Channel No.
Coldwater, Michigan	..	24

[99] See our decision in Boston and Brockton.

[99] Radio Kentucky, Inc., also opposed the reservation of Channel 15 in Louisville for non-commercial educational use.

FLINT, MICHIGAN

471. (a) **Proposed Assignments and Reservation.** In the Third Notice the Commission proposed the assignment of four channels to Flint, Michigan: VHF Channel 12 and UHF Channels 16, 22 and 28, with Channel 22 reserved for non-commercial educational use.

(b) **Census Data.** The Flint standard metropolitan area has a population of 271,000 and the City of Flint has a population of 163,000.

(c) **Educational Reservation in Flint.** The JCET and School District of Flint filed statements supporting the reservation of UHF Channel 22 in Flint for non-commercial educational use. The School District stated that funds were available and that it was prepared to proceed with its plans for the construction of a station if the reservation of a channel in Flint is finalized. No oppositions to the reservation of Channel 22 in Flint were filed.

(d) **Counterproposal of the Trebit Corporation.** The Trebit Corporation, Flint, Michigan, filed a counterproposal requesting the assignment of VHF Channel 10 in Flint to be accomplished by deleting Channel 10 from London, Ontario, in Canada, and by substituting UHF Channels 43 and 65 in London, as follows:

City	Third Notice		Proposed Changes	
	VHF Channel No.	UHF Channel No.	VHF Channel No.	UHF Channel No.
Flint, Michigan	12	16,*22,28	10,*12	16,*22,28
London, Ontario	10	18	†	18,43†,65†

(e) **Statement in Support of The Trebit Corporation Counterproposal.** The Trebit Corporation urged that an additional VHF Channel was required to provide adequate service to Flint, and that UHF service in that area would be difficult to establish. It was urged that, on the other hand, UHF would be adequate to provide service for the London, Ontario area, and that non-intermixture of VHF and UHF would be to the best interest of that community. The assignment of Channel 10 at Flint would be 61 miles from the adjacent channel assignment of Channel 9 at Windsor, Ontario. Channel 43 proposed by the Trebit Corporation for London would be 163 miles from the co-channel assignment at Butler, Pennsylvania.

(f) **Conflicting Counterproposals and Oppositions to The Trebit Corporation Counterproposal.** The Trebit Corporation counterproposal conflicts with the following other counterproposals: WJR, The Goodwill Station, Inc., Detroit, Michigan; Michigan State College, East Lansing, Michigan; and Booth Radio and Television Stations, Inc., Detroit, Michigan. Oppositions to The Trebit Corporation counterproposal were filed by Michigan State College and WJR, The Goodwill Station, Inc.

Conclusions: The Educational Reservation

472. In view of the foregoing, the reservation of UHF Channel 22 in Flint, Michigan for non-commercial educational use is finalized.

Conclusions: Request for Additional VHF Channel

473. The Trebit Corporation would assign VHF Channel 10 to Flint by deleting this assignment from London, Ontario and substituting therefore UHF Channels 43 and 65: Channel 10 at Flint would be 61 miles from the adjacent channel assignment of Channel 9 at Windsor, Ontario, and Channel 43 at London would be 163 miles from the co-channel assignment at Butler, Pennsylvania. The counterproposal of The Trebit Corporation is denied for the reasons set forth above in the discussion of the Canadian-United States assignments.

Final Assignments and Reservation

474. The final assignments and reservation are adopted:

City	VHF Channel No.	UHF Channel No.
Flint, Michigan	12	16,*22,28

LANSING AND EAST LANSING, MICHIGAN

475. (a) **Proposed Assignments.** In the Third Notice the Commission proposed the assignments of two channels to Lansing, Michigan: VHF Channel 6 and UHF Channel 54. One channel was proposed for East Lansing, Michigan, UHF Channel 60.

(b) **Census Data.** The Lansing standard metropolitan area has a population of 173,000 and the city has a population of 92,000. East Lansing, which lies within 15 miles of Lansing, has a population of 20,000.

(c) **Existing Station.** One station is presently operating in Lansing. WJIM, Inc. is licensed for the operation of Station WJIM-TV.

(d) **Counterproposal of Michigan State College.** A counterproposal has been filed by Michigan State College requesting the assignment of VHF Channel 10 to East Lansing. No other changes in the assignments proposed in the Third Notice were requested.[100]

(e) **Statement in Support of Michigan State Counterproposal.** The assignment of Channel 10 at East Lansing would be 164 miles from the assignment of this channel in London, Ontario, in Canada. However, in support of its counterproposal, Michigan State College urged that the operation of Channel 10 at East Lansing would cause no objectionable interference within the Grade A or B service areas of any co-channel stations since it contemplated that maximum effective radiated powers of 110 kw at 500 feet above average terrain would be employed.

(f) **Conflicting Counterproposals and Oppositions to the Michigan State Counterproposal.** The Michigan State College counterproposal conflicts with the counterproposals of the following parties: Logansport Broadcasting Corp., Logansport, Indiana; and Owensboro On The Air, Inc., Owensboro, Kentucky; Twin Valley Broadcasters, Inc., Coldwater, Michigan; The Trebit Corporation, Flint, Michigan; WJR, The Goodwill Station, Inc., Detroit, Michigan; and Quad-City Broadcasting Corp., Moline, Illinois.

[100]On May 7, 1951, Michigan State College filed a comment in this proceeding urging the assignment of VHF Channel 10 to East Lansing, Michigan, for non-commercial educational purposes. However, on September 6, 1951, Michigan State petitioned the Commission for leave to amend its prior proposal to request that Channel 10 be assigned to East Lansing as a commercial channel. This petition was granted by the Commission on September 12, 1951.

Conclusions

476. The counterproposal of Michigan State College would result in a co-channel spacing of only 164 miles between East Lansing and London, Ontario. Michigan State recognizes that this separation is in violation of the minimum mileage separation requirements. It requests, however, that an assignment be permitted at reduced power. We have considered the question whether low power assignments should be permitted in cases such as this. We see no reason to deviate in this instance from our decision that such assignments will not be permitted. We must therefore deny the Michigan State counterproposal. Moreover, the Michigan State proposal must also be rejected for reasons set forth above in the discussion of Canadian-United States assignments.

Final Assignments

477. In view of the foregoing, the following assignments are adopted:

City	VHF Channel No.	UHF Channel No.
Lansing, Mich.	6	54
East Lansing, Mich.		60

DETROIT, MICHIGAN

478. (a) **Proposed Assignments and Reservation.** In the Third Notice the Commission proposed the assignment of six channels to Detroit, Michigan: VHF Channels 2, 4. and 7 and UHF Channels 50, 56, and 62, with Channel 56 reserved for non-commercial educational use.

(b) **Census Data.** The Detroit standard metropolitan area has a population of 3,016,000 and the City of Detroit has a population of 1,850,000.

(c) **Existing Stations.** Three stations are presently in operation in Detroit. Fort Industry Company is licensed for the operation of Station WJBK-TV on Channel 2; Evening News Association is licensed for the operation of Station WWJ-TV on Channel 4; and WXYZ, Inc., is licensed for the operation of Station WXYZ-TV on Channel 7.

(d) **Counterproposal of the Board of Education of the City of Detroit.** The Board of Education of the City of Detroit filed a counterproposal requesting the assignment of VHF Channel 11 to Detroit to be reserved for non-commercial educational use. Wayne University, Detroit, Michigan, joined in this counterproposal. This would be accomplished by deleting VHF Channel 11 from Toledo, Ohio, and shifting VHF Channel 12 from Flint, Michigan, to Bay City-Saginaw, Michigan, as follows:[101]

City	Third Notice		Proposed Changes	
	VHF Channel No.	UHF Channel No.	VHF Channel No.	UHF Channel No.
Detroit, Michigan	2,4,7	50,*56,62	2,4,7,*11†	50,56,62
Toledo, Ohio	11,13	*30	†,13	*30
Flint, Michigan	12	16,*22,28	†	16,*22,28
Bay City, Michigan		63		63
Saginaw, Michigan		51,57		51,57
Bay City-Saginaw, Michigan			12†	

(e) **Statement in Support of Board of Education Counterproposal.** The Board of Education of the City of Detroit pointed out that three television stations were presently in operation in Detroit, and that none of the half million sets in use in the Detroit area can receive UHF transmissions. It was urged that since most network programs are generally available to Detroit viewers, it is unlikely that the existing receivers will be converted to receive UHF, and that consequently, any UHF audience in the Detroit area will be a limited one. The Board contended that since only one station is presently in operation in Toledo, existing VHF sets would be converted at a faster rate in comparison with Detroit. It was noted that the Detroit metropolitan area had a population of 2,973,000 as compared to 393,000 for the Toledo metropolitan area. With respect to the removal of Channel 12 from Flint to Bay City-Saginaw it was submitted that such assignment would afford a first VHF channel to the Bay City-Saginaw area, with a population of 241,000. The population of the Flint metropolitan area was listed as 270,000. Mercy College, Detroit, Michigan, and the JCET supported the Board of Education's counterproposal. No substitutions are suggested for Toledo or Flint to replace the VHF channels to be deleted.

(f) As noted above, in the Third Notice, UHF Channel 56 was reserved in Detroit for non-commercial educational use. The Board of Education of the City of Detroit stated that if its request for VHF Channel 11 in Detroit is denied, it desired that Channel 56 be reserved in Detroit for non-commercial educational use. No oppositions to the reservations of UHF Channel 56 were filed.

(g) **Oppositions to the Board of Education Counterproposal.** The following parties filed oppositions to the counterproposal of the Board of Education of the City of Detroit: Adrian Broadcasting Company in opposition to the proposal to shift Channel 11 from Toledo to Detroit and Channel 12 from Flint to Bay City-Saginaw; Booth Radio and Television Stations, Inc., in opposition to the proposal to shift Channel 12 from Flint to Bay City-Saginaw; Crosley Broadcasting Corporation, in opposition to the proposal to shift Channel 11 from Toledo to Detroit; Community Broadcasting Company, in opposition to the proposal to shift Channel 11 from Toledo to Detroit; Maumee Valley Broadcasting Company, in opposition to the proposal to shift Channel 11 from Toledo to Detroit and Channel 12 from Flint to Bay City-Saginaw; and The Trebit Corporation, in opposition to the proposal to shift Channel 11 from Toledo to Detroit and Channel 12 from Flint to Bay City-Saginaw.

(h) **Counterproposal of Booth Radio and Television Stations, Inc.** Booth Radio and Television Stations, Inc., requested the additional assignments of VHF Channels 6 and 9 to Detroit. Channel 9 would be assigned to Detroit by substituting UHF Channel 50 in Windsor, Ontario, for VHF Channel 9. Channel 6 would be assigned to Detroit by substituting Channel 5 in Lansing, Michigan, for Channel 6;

[101]The Bay City Public Schools filed a counterproposal requesting the assignment of VHF Channel 12 to Bay City-Saginaw to be reserved for non-commercial educational use.

substituting Channel 11 in Alpena, Michigan, for Channel 9; substituting Channel 8 in Iron Mountain, Michigan, for Channel 9, and substituting Channel 9 in Traverse City, Michigan, for Channel 5. Station WJIM-TV is presently operating on Channel 6 in Lansing, Michigan. The Booth Radio and Television Stations, Inc., counterproposal would make the following changes in the assignments proposed in the Third Notice:

City	Third Notice		Proposed Changes	
	VHF Channel No.	UHF Channel No.	VHF Channel No.	UHF Channel No.
Detroit, Mich.	2,4,7	50,*56,62	2,4,6†,7,9†	†,*56,62
Windsor, Ontario	9	32,38	†	32,38,50†
Lansing, Mich.	6	54	5†	54
Iron Mountain, Mich.	9	27	8†	27
Alpena, Mich.	9	30	11†	30
Traverse City, Mich.	5	20,*26	9†	20,*26

(i) **Statement in Support of Booth Radio and Television Stations, Inc.** Booth Radio and Television Stations, Inc., urged that the assignment of VHF Channels 6 and 9 to Detroit would afford Grade A and B service to a substantial population and area. It was contended that such assignments are needed since Detroit is the fastest growing metropolitan area among the five largest cities in the nation; and that additional television facilities are required for the large foreign speaking population in the Detroit area.

(j) Channel 6 at Detroit would be 163 miles from the co-channel assignment at Columbus, Ohio. Channel 5 at Lansing, as proposed by Booth, would place Station WJIM-TV 170 miles from existing Station WNBQ operating on Channel 5 in Chicago.

(k) **Conflicting Counterproposal and Oppositions to the Booth Radio and Television Stations, Inc. Counterproposal.** Oppositions to the Booth counterproposal have been filed by Picture Waves, Inc., Columbus, Ohio; WJIM, Inc., Lansing, Michigan; Indiana Technical College, Fort Wayne, Indiana; National Broadcasting Company, Inc., Chicago, Illinois;[102] and Trebit Corporation, Flint, Michigan. The Booth counterproposal is also mutually exclusive with the counterproposal of Music Broadcasting Company, Grand Rapids, Michigan, and Bay Broadcasting Company, Bay City, Michigan.

(l) **Counterproposal of WJR, The Goodwill Station, Inc.** A counterproposal has been filed by The Goodwill Station, Inc., requesting the additional assignments of VHF Channel 6 and UHF Channel 22 to Detroit. In order to assign Channel 6 to Detroit, Channel 10 would be substituted in Lansing, Michigan, for Channel 6. WJIM-TV is presently operating in Lansing on Channel 6. In order to assign Channel 22 to Detroit, Channel 18 would be substituted in East Lansing, Michigan for Channel 60, Channel 46 substituted in Flint, Michigan, for Channel 22, Channel 60 substituted in Ludington, Michigan, for Channel 18, and Channel 37 substituted in Cadillac, Michigan for Channel 45. The WJR counterproposal would make the following changes in the assignments proposed in the Third Notice:

City	Third Notice		Proposed Changes	
	VHF Channel No.	UHF Channel No.	VHF Channel No.	UHF Channel No.
Detroit, Mich.	2,4,7	50,*56,62	2,4,6†,7	22†,50,*56,62
Lansing, Mich	6	54	10†	54
East Lansing, Mich.		60		18†
Flint, Mich.	12	16,*22,28	12	16,28,*46†
Ludington, Mich.		18		60†
Cadillac, Mich.		45		37†

(m) **Statement in Support of WJR, The Goodwill Station, Inc. Counterproposal.** WJR, The Goodwill Station, Inc., urged that the Commission's proposal assigning three VHF channels and three UHF channels to Detroit, the fifth largest metropolitan area in the United States, violates Section 307(b) of the Communications Act. It was contended that Detroit would receive no more channels than would be received by metropolitan areas which are smaller than Detroit; and that in some instances, Detroit would receive fewer channels than several smaller metropolitan areas. It was also urged that the Commission's assignments in Detroit are unlawful since under the currently effective assignment Table, 4 VHF channels are assigned to Detroit, and the Commission's proposal in the Third Notice assigning only 3 VHF channels was made after a consolidated hearing on the competing applications of WJR and the United Detroit Theatres Corporation for the one remaining unassigned VHF channel in Detroit.

(n) Channel 18 at East Lansing, as proposed by WJR, The Goodwill Station, Inc., would be 164 miles from the co-channel assignment at London, Ontario. In addition, Channel 46 in Flint, as suggested by WJR, would be 61 miles from the assignment of Channel 32 at Windsor, Ontario, Canada. Channel 6 at Detroit, as proposed by WJR, would be 163 miles from the co-channel assignment at Columbus, Ohio, Channel 10 at Lansing, as proposed by WJR would be 169 miles from the co-channel assignment at London, Ontario, and 171 miles from the co-channel assignment at Milwaukee, Wisconsin.[103]

(o) **Conflicting Counterproposals and Oppositions to the Counterproposal of WJR, The Goodwill Station, Inc.** Oppositions and conflicting proposals were filed by the following parties: Music Broadcasting Company, Grand Rapids, Michigan; Michigan State College, East Lansing, Michigan; The Trebit Corporation, Flint, Michigan; WJIM, Inc., Lansing, Michigan; Picture Waves, Inc., Columbus, Ohio; Quad-City Broadcasting Company, Moline, Illinois; Logansport Broadcasting Corp., Logansport, Indiana, and Owensboro On The Air, Inc., Owensboro, Kentucky; Twin Valley Broadcasting Company, Coldwater, Michigan; and Saginaw Broadcasting Co., Saginaw, Michigan.

Conclusions: The Educational Reservation in Detroit

479. The Board of Education of the City of Detroit has requested the assignment of VHF Channel 11 to be reserved in Detroit for non-commercial educational use. However, in order to accomplish this assignment, VHF Channel 11 must be deleted from Toledo, and VHF Channel 12 shifted from Flint to Bay City-Saginaw. We do not believe that these proposed changes are warranted in order to provide a fourth VHF channel to Detroit. Toledo is a metropolitan area with a population of 396,000 and has a city population of 304,000. Flint has a metropolitan area population of 271,000 and a city population of 163,000. Under the Third Notice two VHF and one UHF channels were proposed for Toledo, with the UHF channel reserved for non-commercial educational use, and one VHF and three UHF channels for Flint, with one of the UHF channels reserved for non-commercial educational use. The Board of Education counterproposal would, deprive Flint of its only VHF channel and would leave Toledo with only one VHF assignment. In view of the foregoing, the counterproposal of the Board of Education of the City of Detroit is denied. However, the reservation of UHF Channel 56 in Detroit for non-commercial educational use is finalized.

Conclusions: Additional Assignment of UHF Channel 22

480. In order to assign UHF Channel 22 to Detroit, WJR, The Goodwill Station, Inc., suggested, among other changes, that UHF Channel 18 be assigned to East Lansing at a distance of 164 miles from the co-channel assignment at London, Ontario. In addition, Channel 46 at Flint would be 60 miles from the assignment of Channel 32 at Windsor, Ontario. The request to assign Channel 22 to Detroit must be denied for the reasons set forth above in the discussion of United States-Canadian assignments.

Conclusions: Additional VHF Assignments

481. Booth Radio and Television Stations, Inc., requested the assignment of VHF Channel 9 in Detroit to be accomplished by shifting this channel from Windsor, Ontario, and substituting a UHF channel in the Canadian city. The Booth request for Channel 9 must be denied for the reasons set forth above in the discussion of United States-Canadian assignments.

482. With respect to VHF Channel 6, this channel at Detroit would be only 163 miles from the co-channel assignment at Columbus, Ohio, where Station WTVN is operating. The assignment of Channel 6 to Detroit would therefore be in violation of the minimum separation requirements adopted herein and for this reason the WJR request must be denied. In addition, the assignment of Channel 10 at Lansing as suggested by WJR. The Goodwill Station, Inc., in order to assign Channel 6 to Detroit, would be 170 miles from the co-channel assignment at London, Ontario. The WJR request must be denied for the reasons stated in the discussion of United States-Canadian assignments. Booth Radio and Television Stations, Inc., counterproposal conflicts with the counterproposal of Bay Broadcasting Company which requested the assignment of Channel 5 to Bay City, Michigan, since Channel 5 can not be employed in both Lansing and Bay City. We believe that the Bay Broadcasting Company counterproposal which would assign a first VHF channel to Bay City, a city with a population of 53,000, is more meritorious than a counterproposal seeking a fourth VHF channel for Detroit. In view of the foregoing, the counter-proposals of Booth Radio and Television Stations, Inc., and WJR, The Goodwill Station, Inc., requesting the assignment of VHF Channels 6 and 9 to Detroit are denied.

483. The television assignments adopted in 1945 assigned four VHF channels to Detroit, and three of these channels are presently in use. A comparative hearing was held for the remaining unassigned channel. We cannot agree that the denial of the above counterpropos-

[102] Booth Radio and Television Stations, Inc., filed a Motion to Strike testimony filed on behalf of National Broadcasting Company, Inc. In its sworn statement opposing the Booth counterproposal filed with the Commission on September 19, 1951, NBC had stated that its Station WNBQ is licensed to operate on Channel 5 in Chicago. NBC stated that it, therefore, opposed the Booth counterproposal which would require moving WJIM-TV in Lansing, Michigan, from its present operation on Channel 6 to Channel 5. NBC urged that the operation of Channel 5 in Lansing would cause interference to Channel 5 in Chicago, and that such counterproposal violates the minimum co-channel assignment spacings.

Booth moved to strike this opposition, contending that NBC did not file an opposition to the May 7, 1951, Comment of Booth advancing the counterproposal and that, therefore, under the terms of the Order of Hearing Procedure, issued in this proceeding, NBC is precluded from now offering such an opposition. In the alternative, Booth has filed a rebuttal to the NBC statement.

On October 22, 1951, NBC filed an opposition to the Motion to Strike of Booth, noting that NBC had filed Comments on May 7, 1951, supporting the Commission's proposed assignments listed in the Third Notice. Further, NBC argued that since this was in conflict with the counter-proposal of Booth, it was not necessary to file an opposition to insure the right to cross-examine Booth.

Paragraph 5 of the Order of Hearing Procedure, issued on July 25, 1951, in this proceeding states that . . . "parties whose comment filed in these proceedings on May 7, 1951, were by their terms in conflict with other comments, will be entitled to file sworn statements or exhibits in accordance with subparagraph 5c above, even though specific oppositions directed to such other comments have not been filed."

In view of the foregoing, the Motion to Strike is DENIED. However, the rebuttal of Booth is accepted and has been considered by the Commission in the proceeding.

[103] On February 27, 1952, WJR, The Goodwill Station, Inc., filed a petition for leave to file a late supplemental sworn statement "for the purpose of submitting newly discovered evidence." It was noted that in its comments and prior sworn statement filed in this proceeding, WJR had contended that a transmitter site could be found in Detroit that would provide a 170-mile transmitter - to - transmitter separation between Detroit and Columbus, Ohio, so as to permit the operation of Channel 6 in both cities. In its petition WJR asserts that it "has only recently located [such] a site," and therefore requests leave to file a supplemental statement concerning the details of this site. Oppositions to the WJR petition have been filed by the Twin Valley Broadcasters, Inc., Coldwater, Michigan; Picture Waves, Inc., Columbus, Ohio; Michigan State College, East Lansing, Michigan; Bay Broadcasting Company, Bay City, Michigan; Saginaw Broadcasting Company, Saginaw, Michigan, and WJIM, Inc., Lansing, Michigan. The time for filing sworn statements by WJR, as specified in the Order of Hearing Procedure issued in this proceeding, has expired. Furthermore, we are of the view that evidence concerning specific transmitter sites is irrelevant and immaterial in this proceeding for the purposes offered by WJR. Accordingly, the petition of WJR, The Goodwill Station, Inc., is DENIED.

als seeking additional VHF channels for Detroit is contrary to law as urged by WJR, The Goodwill Station, Inc., because the reduction in the number of VHF assignments in Detroit from four to three was made after this comparative hearing was commenced.

We believe the opinion of the Commission, FCC 51-1216, issued on December 12, 1951 in connection with the requests for oral hearing of Daily News Television Co., et al makes clear that the Commission, in a proceeding such as this, may change the assignment of VHF channels to Detroit under the circumstances presented.

484. The following assignments and reservation are adopted:

City	VHF Channel No.	UHF Channel No.
Detroit	2,4,7	50,*56,62

GRAND RAPIDS, MICHIGAN

485. (a) **Proposed Assignments.** In the Third Notice the Commission proposed the assignment of three channels to Grand Rapids, Michigan: VHF Channel 8 and UHF Channels 17 and 23, with Channel 17 reserved for noncommercial educational use.

(b) **Census Data.** The Grand Rapids standard metropolitan area has a population of 288,000 and the City of Grand Rapids has a population of 177,000.

(c) **Existing Station.** Grandwood Broadcasting Company is licensed to operate Station WOOD-TV in Grand Rapids on Channel 7.[104] The licensee has been directed to show cause why the license of the existing station in Grand Rapids should not be modified to specify operation on Channel 8 in lieu of Channel 7.

(d) **Answer to Order to Show Cause.** No opposition to the proposed modification of the license of Station WOOD-TV to specify operation on Channel 8 in lieu of Channel 7 has been filed.

(e) **Educational Reservation in Grand Rapids.** The Board of Education of the Grand Rapids Public Schools filed a statement supporting the reservation of UHF Channel 17 in Grand Rapids for noncommercial educational use. The Board of Education stated that while it had no actual experience in educational television, it was prepared to undertake the establishment of an educational television station in Grand Rapids as soon as television service in the UHF is available. No oppositions to the reservation were filed.

(f) **Counterproposal of Music Broadcasting Company.** Music Broadcasting Company, Grand Rapids, Michigan, requested the additional assignment of VHF Channel 6 in Grand Rapids. In order to accomplish this assignment, the following changes would be made:

City	Third Notice		Proposed Changes	
	VHF Channel No.	UHF Channel No.	VHF Channel No.	UHF Channel No.
Grand Rapids, Mich.	8	*17,23	6†,8	*17,23
Lansing, Mich.	6	54	5†	54
Traverse City, Mich.	5	20,*26	7†	20,*26
Green Bay, Wis.	6		2†	
Clintonville, Shawano, New London, or Waupaca, Wis.			6†	

Station WJIM-TV is presently operating in Lansing, Michigan, on Channel 6, and the Music Broadcasting Company counterproposal would require the shifting of this station to Channel 5.

(g) **Statement in Support of Music Broadcasting Company Counterproposal.** Music Broadcasting Company urged that the assignments proposed for Grand Rapids are inadequate to meet the needs of that community. Music Broadcasting Company pointed out that Grand Rapids is the second largest city in Michigan and contended that the importance of that city is evidenced by schools, churches, manufacturing plants, amount of retail sales, the number of wholesale establishments and banking institutions, etc., and that such data supports the need for an additional VHF assignment in that community. It was further urged that there is need for the immediate establishment of additional television facilities in Grand Rapids for the reason that there are at the present time 114,557 television receivers in the Grand Rapids-Kalamazoo area despite the fact that there is only one local station in that area. It was further contended by Music Broadcasting Company that the assignment of Channel 6 could be made in Grand Rapids and could also be assigned to any one of four Wisconsin communities.

(h) **Conflicting Counterproposals and Oppositions to the Music Broadcasting Company Counterproposal.** The counterproposal of Music Broadcasting Company is in conflict with the counterproposals of the following other parties: Indiana Technical College, Fort Wayne, Ind.; Bay City Broadcasting Company, Bay City, Michigan; Delta Broadcasting Company, Escanaba, Michigan; Green Bay Newspaper Company, Green Bay, Wisconsin; WJR, The Goodwill Station, Inc., Detroit, Michigan; Booth Radio and Television Stations, Inc., Detroit, Michigan; Milwaukee Broadcasting Company, Milwaukee, Wisconsin; Hearst Radio, Inc., Milwaukee, Wisconsin; Quad-City Broadcasting Corporation, Moline, Illinois. In addition oppositions to the Music Broadcasting Company counterproposal were filed by WJIM, Inc., Lansing, Michigan; Scripps-Howard Radio, Inc., Cleveland, Ohio, and National Broadcasting Company, Inc., Chicago, Illinois.

Conclusions: Show Cause Order

486. In view of the foregoing, an appropriate authorization will be issued to Grandwood Broadcasting Company to specify operation of Station WOOD-TV on Channel 8.

Conclusions: Educational Reservation

487. In view of the foregoing, the reservation of Channel 17 in Grand Rapids for non-commercial educational use is finalized.

Conclusions: Request for Additional VHF Assignment

488. We believe that the record does not support the assignment of VHF Channel 6 to Grand Rapids. As noted above, the Music Broadcasting Company counterproposal conflicts with the counterproposal of Bay Broadcasting Company requesting the assignment of VHF Channel 5 to Bay City, Michigan. These counterproposals are mutually exclusive since Music Broadcasting Company would assign Channel 5 to Lansing[105] and Bay Broadcasting Company would assign Channel 5 to Bay City at a distance of only 69 miles. We are of the view that the counterproposal of Bay Broadcasting Company seeking a first VHF assignment for Bay City is more meritorious than that of Music Broadcasting Company seeking a second VHF assignment for Grand Rapids. Bay City has a population of 53,000 and is one of the nation's 168 metropolitan areas with a population of 88,000. Furthermore, the Music Broadcasting Company counterproposal also conflicts with the counterproposal of Green Bay Newspaper Company which requests the assignment of VHF Channel 2 to Green Bay, Wisconsin. The Music counterproposal would assign Channel 2 to Green Bay but would delete Channel 6 proposed in the Third Notice. Green Bay is a city with a population of 53,000 and has a metropolitan area population of 98,000. In light of the above, a denial of the Music Broadcasting Company counterproposal would permit the assignment of a first VHF channel to Bay City and a second VHF channel to Green Bay. In view of the foregoing, the Music Broadcasting Company counterproposal is denied.

Final Assignments and Reservation

489. The following assignments and reservation are adopted:

City	Third Notice		Proposed Changes	
	VHF Channel No.	UHF Channel No.	VHF Channel No.	UHF Channel No.
Bay City, Mich.		63	5†	63
Traverse City, Mich.	5	20,*26	7†	20,*26

City	VHF Channel No.	UHF Channel No.
Traverse City Mich.	8	*17,23

BAY CITY, MICHIGAN

490. (a) **Proposed Assignment.** In the Third Notice the Commission proposed the assignment of one channel, UHF Channel 63 to Bay City, Michigan.

(b) **Census Data.** The Bay City standard metropolitan area has a population of 88,000 and the city has a population of 53,000.

(c) **Counterproposal of the Board of Education of Bay City.** The Board of Education in Bay City requested the assignment of VHF Channel 12 to Bay City for non-commercial educational use to be accomplished by deleting this channel from Flint, Michigan, as follows:

City	Third Notice		Proposed Changes	
	VHF Channel No.	UHF Channel No.	VHF Channel No.	UHF Channel No.
Bay City, Mich.		63	*12†	63
Flint, Mich.	12	16,*22,28	†	16,*22,28

As an alternative the Board of Education requested that a UHF channel be reserved in Bay City for non-commercial educational use.

(d) **Statement in Support of Board of Education Counterproposal.** The Board of Education of Bay City asserted that if Channel 12 were assigned to Bay City, a working agreement with educational institutions in the adjoining Saginaw County would be effected in utilizing this frequency for educational television. The Board noted that Central Michigan College was interested in educational television. The Board stated that considerable progress in relation to the joint sponsorship and financing of the construction and operation of an educational station is being made and represented that should Channel 12 be reserved in Bay City it would be utilized within a reasonable period of time. As an alternative, the Board of Education requested that a UHF channel be reserved in Bay City for non-commercial educational use.

(e) **Conflicting Counterproposals and Oppositions to the Board of Education Counterproposal.** Conflicting counterproposals or oppositions to the Board of Education counterproposal were filed by Booth Radio and Television Stations, Inc., The Trebit Corporation, and Adrian Broadcasting Company. The oppositions point out that the population of the Flint area exceeds that of Bay City and Saginaw combined.

(f) **Counterproposal of Bay Broadcasting Company.** Bay Broadcasting Company requested the assignment of VHF Channel 5 to Bay City. This assignment would be accomplished by substituting Channel 7 in Traverse City, Michigan for Channel 5, as follows:

(g) **Statement in Support of Bay Broadcasting Company Counterproposal.** Bay Broadcasting Company urged that a substantial portion of the north central area of lower Michigan would receive its first VHF Grade A and Grade B service from the operation of Channel 5 in Bay City. It was pointed out that Bay City, with a population of over 50,000 ranks 8th in the State of Michigan but is assigned only one UHF channel in the Third Notice. It was further contended that nine cities in Michigan with lesser populations than Bay City are assigned two or more channels, and that twenty-five cities with less than one-half the population of Bay City are assigned an equal or greater number of channels than Bay City.

(h) **Conflicting Counterproposals and Oppositions to the Bay Broadcasting Company Counterproposal.** The counterproposal of Bay Broadcasting Company is in conflict with that of Booth Radio and Television Stations, Inc., Detroit, Michigan; and Music Broadcasting Company, Grand Rapids, Michigan. Oppositions to the counterproposal of Bay Broadcasting Company have been filed by the above two parties and by Scripps-Howard Radio, Inc., Cleveland, Ohio, and WJIM, Inc., Lansing, Michigan. Channel 5 in Bay City would be 183 miles from Cleve-

[104] On September 19, 1951, the Commission approved the transfer of this station from Leonard A. Versluis to the present licensee. The call letters of this station were formerly WLAV-TV.

[105] Although Music Broadcasting Company suggested that under its counterproposal Channel 6 could be added to Clintonville, Shawano, New London or Waupaca, Wisconsin, no counterproposals requesting assignments for these communities were filed in this proceeding. The population of these communities is as follows: Clintonville—5,000; Shawano—6,000; New London—5,000; and Waupaca—4,000.

land, Ohio, where Station WEWS is operating on Channel 5. Scripps-Howard, Inc., licensee of Station WEWS, opposed the Bay Broadcasting Company counterproposal urging that the possibility of interference due to tropospheric transmissions over Lake Erie requires greater separation. It should be noted, however, that the distance between Bay City and the WEWS transmitter site in Cleveland is 189 miles. The assignment of Channel 5 at Bay City would be 69 miles from the adjacent channel assignment of Channel 6 in Lansing, Michigan, where Station WJIM-TV is presently operating. WJIM, Inc., licensee of Station WJIM-TV, opposed the Bay Broadcasting Company counterproposal since it did not meet the 70 mile city-to-city adjacent channel spacing required by the Third Notice. However, we have elsewhere in this Report reduced the required adjacent channel assignment spacing for VHF channels to 60 miles.

Conclusions: VHF Assignment

491. We believe the record supports the basis for the assignment of VHF Channel 5 to Bay City. This assignment will provide a first VHF channel to a community of 53,000 people situated in a metropolitan area with a population of 88,000. As noted above, the Bay Broadcasting Company counterproposal conflicts with the counterproposal of Music Broadcasting Company requesting a second VHF channel for Grand Rapids, and the counterproposal of Booth Radio and Television Stations, Inc., requesting a fourth VHF channel for Detroit. We have pointed out in connection with our discussion of the above counterproposals that we believe the request for a first VHF channel for Bay City is to be preferred to a second VHF channel for Grand Rapids or a fourth for Detroit. The 69 mile spacing between Bay City and Lansing where adjacent Channel 6 is being utilized by Station WJIM-TV meets the requirements for adjacent channel station separation. We believe, also, that the spacing of 189 miles between Bay City and Station WEWS, Cleveland, operating on Channel 5 will be adequate to prevent undue interference due to tropospheric propagation. The assignment of Channel 7 in Traverse City rather than Channel 5 will meet all required mileage spacings. Accordingly, VHF Channel 5 will be assigned to Bay City.

Conclusions: Educational Reservation

492. We are of the view that the assignment of VHF Channel 12 in Bay City to be reserved for noncommercial educational use is not warranted since it can be accomplished only by deleting Channel 12 the only VHF assignment in Flint, a city with a population of 163,000 within a metropolitan area with a population of 271,000. Accordingly, the Board of Education counterproposal requesting the reservation of VHF Channel 12 in Bay City is denied. While we have assigned Chanel 5 to Bay City, we do not believe that this channel should be reserved for use by noncommercial educational stations. The Board of Education did not request the reservation of Channel 5 and in accordance with our policy with respect to the reservation of VHF channels, Channel 5 should not be so reserved since three VHF assignments have not been made to Bay City. However, we believe that the record supports the basis for granting the Board of Education's alternative request that a UHF channel be reserved in Bay City for non-commercial educational use. Channel 73 will, therefore, be assigned to Bay City and will be reserved for non-commercial educational use.

Final Assignments and Reservation

493. The following assignments and reservation are adopted:

City	VHF Channel No.	UHF Channel No.
Bay City, Mich.	5	63,*73

TRAVERSE CITY, MICHIGAN: EDUCATIONAL RESERVATION

494. (a) **Proposed Assignments and Reservation.** In the Third Notice the Commission proposed the assignment of three channels to Traverse City: VHF Channel 5 and UHF Channels 20 and 26, with Channel 26 reserved for non-commercial educational use.

(b) The JCET supported the reservation of Channel 26 in Traverse City for non-commercial educational use and submitted a statement of the Superintendent of Public Instruction of the State of Michigan supporting the reservation. No oppositions to the proposed reservation were filed.

Conclusions: Educational Reservation

495. In view of the foregoing, the reservation of Channel 26 in Traverse City for non-commercial educational use is finalized.

Final Assignments and Reservation

496. As noted above in connection with the discussion of Bay City, Channel 7 was substituted for Channel 5 in Traverse City. Accordingly, the following assignments and reservation are adopted:

City	VHF Channel No.	UHF Channel No.
Traverse City, Mich.	7	20,*26

SAGINAW, MICHIGAN

497. (a) **Proposed Assignments.** In the Third Notice the Commission proposed the assignment of 2 channels to Saginaw, Michigan, UHF Channels 51 and 57.

(b) **Census Data.** The standard metropolitan area of Saginaw has a population of 154,000 and the City of Saginaw a population of 93,000.

(c) **Counterproposal of Saginaw Broadcasting Company.** Saginaw Broadcasting Company requested that Channel 19 be deleted from Midland and assigned to Saginaw and that Channel 51 be deleted from Saginaw and substituted in Midland. Saginaw Broadcasting Company also requested the additional assignment of UHF Channel 28 to Saginaw, to be accomplished by deleting this channel from Flint, Michigan and by making the following changes in the assignments proposed in the Third Notice:

City	Third Notice		Proposed Changes	
	VHF Channel No.	UHF Channel No.	VHF Channel No.	UHF Channel No.
Saginaw, Michigan		51,57		19†,28†,57
Midland, Michigan		19		51†
Flint, Michigan	12	16,*22,28		12,16*22,†

(d) **Statement in Support of Saginaw Broadcasting Company Counterproposal.** Saginaw Broadcasting Company urged that Saginaw is considerably larger than Midland and that Channel 19 would provide a better service to the larger community, while Channel 51 would amply serve the needs of Midland. With respect to Channel 28, it was noted that four channels are proposed for Flint, Michigan, including one VHF channel, and it was, therefore, contended that a fair, efficient and equitable distribution of facilities would require the removal of Channel 28 from Flint to Saginaw. The population of Flint is 163,000.

(e) **Conflicting Counterproposals and Oppositions to the Saginaw Broadcasting Company Counterproposal.** Conflicting counterproposals and oppositions to the Saginaw Broadcasting Company counterproposal were filed by Booth Radio and Television Stations, Inc. and WJR, The Goodwill Station, Inc., both of Detroit, Michigan.

Conclusions

498. We do not believe that the record supports the basis for assigning UHF Channel 19 to Saginaw by moving Channel 51 from Saginaw to Midland. The Commission does not recognize differences in UHF channels for assignment purposes; accordingly, we see no basis for the deletion of Channel 28 from Flint, Michigan in order to make possible its assignment to Saginaw. It should be pointed out that Saginaw lies only 12 miles from Bay City where the Commission is assigning one VHF and two UHF channels, with one UHF channel reserved for noncommercial educational use. Under these circumstances we do not believe that a channel should be deleted from a city the size of Flint in order to afford an additional channel to Saginaw. Accordingly, the counterproposal of Saginaw Broadcasting Company is denied.

Final Assignments

499. In view of the foregoing, the following assignments are adopted:

City	UHF Channel No.
Saginaw	51,57

ESCANABA, CALUMET, AND CADILLAC, MICHIGAN

500. (a) **Proposed Assignments.** In the Third Notice one channel, VHF Channel 13, was assigned to Escanaba, Michigan, and one channel, UHF Channel 45, to Cadillac, Michigan. No channels were assigned in the Third Notice to Calumet, Michigan.

(b) **Census Data.** Escanaba has a population of 15,000, Cadillac a population of 10,000 and Calumet a population of 1,200.

(c) **Counterproposal of Delta Broadcasting Company.** Delta Broadcasting Company requested that VHF Channel 3 be substituted in Escanaba for VHF Channel 13. In order to accomplish this assignment, Channel 7 would be substituted in Traverse City for Channel 5;[100] Channel 10 would be substituted in Hancock, Michigan for Channel 5; and Channel 5 substituted in Marquette, Michigan, for Channel 3. In addition, it was asserted that with the above proposed frequency changes Channel 13 could be assigned to both Cadillac and Calumet, Michigan, that Channel 5 could be assigned to Essexville, Michigan, and Channel 2 assigned to Green Bay, Wisconsin. Following are the changes in the assignments proposed in the Third Notice requested by Delta Broadcasting Company:

City	Third Notice		Proposed Changes	
	VHF Channel No.	UHF Channel No.	VHF Channel No.	UHF Channel No.
Escanaba, Michigan	13		3†	
Hancock, Michigan	5		10†	
Traverse City, Mich.	5	20,*26	7†	20,*26
Marquette, Michigan	3	17	5†	17
Cadillac, Michigan		45	13†	45
Calumet, Michigan			13†	
Essexville, Mich.			5†	
Green Bay, Wisconsin	6		2†,6	

(d) **Statement in Support of Delta Broadcasting Company Counterproposal.** Delta Broadcasting Company urged that Channel 3 at Escanaba would better serve the hilly terrain surrounding that community. It was contended that Channel 3 would provide wider coverage than would Channel 13; that the use of Channel 3 in Escanaba as proposed would make possible additional VHF assignments in Cadillac, Calumet, and Essexville, Michigan and Green Bay, Wisconsin; and that, accordingly, the Delta Broadcasting Company counterproposal would accomplish an appreciable advance in fulfilling the Commission's priorities.

(e) **Conflicting Counterproposal to the Delta Broadcasting Company Counterproposal.** The Delta Broadcasting Company counterproposal conflicts with the counterproposal of Music Broadcasting Company, Grand Rapids, Michigan since Music Broadcasting Company would assign Channel 5 in Lansing while Delta Broadcasting Company would assign this channel in Essexville 75 miles from Lansing. However, the Music Broadcasting Company counterproposal has been denied for the reasons stated in the discussion of Grand Rapids above.

Conclusions

501. The Commission, for assignment purposes, does not recognize differences in VHF channels. However, as was pointed out by Delta Broadcasting Company a grant of its counterproposal would make possible additional VHF assignments in other communities. Channel 13 could be assigned to both Cadillac and Calumet, Michigan. Delta Broadcasting Company also suggested that Channel 5 could be assigned to Essexville, Michigan and Channel 2 to Green Bay, Wisconsin. The Commission has granted the counterproposal of Bay City Broadcasting Company to assign Channel 5 to Bay City, Michigan, which is less than 3 miles from Essexville. Accordingly, Channel 5 could not be assigned to Essexville. With respect to the assignment of Channel 2 in Green Bay, the Commission is below granting the counterproposal of the Green Bay Broadcasting Company which requests the assignment of Channel 2 to Green Bay, and this change is not dependent on the Delta counterproposal. In summary, therefore, the channel changes suggested by Delta Broadcasting Company would make pos-

[100] The Commission has below substituted Channel 7 in Traverse City for Channel 5 in connection with the counterproposal of Bay Broadcasting Company of Bay City, Michigan.

sible the assignment of a VHF channel in Cadillac and Calumet. We believe, therefore, that the substitution of Channel 3 in Escanaba for Channel 13 will effect a more efficient use of the VHF channels. All of the suggested assignments except the one to Essexville meet the required minimum spacings. As noted above, the Delta Broadcasting Company counterproposal conflicts with the counterproposal of Music Broadcasting Company, Grand Rapids, Michigan. However, we have above denied this counterproposal for the reasons stated in the discussion of Grand Rapids.

Final Assignments

502. The following assignments are adopted:

City	VHF Channel No.	UHF Channel No.
Escanaba, Michigan	3	
Cadillac, Michigan	13	45
Calumet, Michigan	13	
Hancock, Michigan	10	
Marquette, Michigan	5	17

SAULT STE. MARIE, MICHIGAN EDUCATIONAL RESERVATION

503. (a) **Proposed Reservation.** In the Third Notice the Commission proposed the reservation of UHF Channel 34 in Sault Ste. Marie for non-commercial educational use.

(b) The JCET supported the reservation of Channel 34 in Sault Ste. Marie for non-commercial educational use and submitted a statement of the Sault Ste. Marie Public Schools supporting the reservation. No objections were filed to the proposed reservation.

Conclusions

504. In view of the foregoing, the reservation of Channel 34 in Sault Ste. Marie for non-commercial educational use is finalized.

ANN ARBOR, MICHIGAN EDUCATIONAL RESERVATION

505. (a) **Proposed Reservation.** In the Third Notice the Commission proposed the reservation of UHF Channel 26 in Ann Arbor for non-commercial educational use.

(b) The Regents of the University of Michigan at Ann Arbor filed a statement supporting the reservation of Channel 26 in Ann Arbor for non-commercial educational use. It was stated that a Faculty-Administration Television Committee had for some time been studying the advisability of the University's owning and operating a television station and had recommended to the Board of Regents that an application should be filed when channels are available. No oppositions to the reservation were filed.

Conclusions

506. In view of the foregoing, the reservation of Channel 26 in Ann Arbor for non-commercial educational use is finalized.

CHICAGO, ILLINOIS

507. (a) **Proposed Assignments and Reservation.** In the Third Notice 10 channels were assigned to Chicago: VHF Channels 2, 5, 7, 9 and 11 and UHF Channels 20, 26, 32, 38 and 44, with Channel 11 reserved for non-commercial educational use.

(b) **Census Data.** The Chicago standard metropolitan area has a population of 5,495,000 and the City of Chicago has a population of 3,621,000.

(c) **Existing Stations.** Four stations are presently in operation in Chicago on Channels 4, 5, 7 and 9. Balaban and Katz Corporation is authorized to operate Station WBKB on Channel 4. Balaban and Katz has been ordered to show cause why the authorization of Station WBKB should not be modified to specify operation on Channel 2 in lieu of Channel 4. National Broadcasting Company, Inc., is licensed to operate Station WNBQ on Channel 5. American Broadcasting Company, Inc., is licensed to operate Station WENR-TV on Channel 7. WGN, Inc. is licensed to operate Station WGN-TV on Channel 9.

(d) **Answer to Show Cause Order.** Balaban and Katz Corporation advised the Commission that it had no objection to the proposed modification of its authorization for Station WBKB to specify operation on Channel 2 in lieu of Channel 4. The application of Balaban and Katz for the renewal of license of WBKB has been designated for hearing. (Docket No. 10038.)

(e) **Counterproposal of Columbia Broadcasting System, Inc.** Columbia Broadcasting System, Inc. requested the assignment of VHF Channel 13 to Chicago.[107] This would be accomplished by the following changes: VHF Channel 13 would be deleted from Rockford, Illinois and UHF Channel 51 would be substituted in that community; UHF Channel 64 would be substituted in Indianapolis, Indiana for VHF Channel 13; UHF Channel 23 would be substituted in Muncie, Indiana for UHF Channel 49; UHF Channel 45 would be substituted in Connersville, Indiana for UHF Channel 38, and UHF Channel 57 would be substituted for Channel 44 at Piqua, Ohio. As an alternative, CBS requested that the educational reservation in Chicago be shifted to a UHF channel. In tabular form, the CBS counterproposal requested the following changes:

City	Third Notice		Proposed Changes	
	VHF Channel No.	UHF Channel No.	VHF Channel No.	UHF Channel No.
Chicago, Illinois	2,5,7,9, *11	20,26,32, 38,44	2,5,7,9, *11,13†	20,26,32, 38,44
Rockford, Illinois	13	39,*45	†	39,*45,51†
Connersville, Ind.		38		45†
Indianapolis, Ind.	6,8,*13	20,26	6,8,†	20,26,*64†
Muncie, Indiana		49,55		23†,55
Piqua, Ohio		44		57
or, in the alternative:				
Chicago	2,5,7,9, *11	20,26,32, 38,44	2,5,7,9, 11	*20,26,32, 38,44

(f) **Statement in Support of CBS Counterproposal.** In support of its counterproposal requesting the assignment of VHF Channel 13 to Chicago, CBS urged that an additional VHF Channel is needed in that city. The basic premise upon which CBS's counterproposal rests is the need for insuring the possibility of a nationwide competitive commercial television service. CBS contended that though UHF woud ultimately be reasonably competitive, there would be a substantial period of time during which commercial broadcasters in the UHF could not effectively compete with VHF broadcasters. CBS also pointed out that a network owning no station in Chicago would be at an enormous competitive disadvantage.[108] The arguments urged by CBS for the addition of a VHF channel in Chicago were also offered in connection with its counterproposal seeking the addition of a VHF channel in Boston, Massachusetts. We have in connection with our discussion of the Boston counterproposal considered these arguments.

(g) **Conflicting Counterproposals and Oppositions to the CBS Counterproposal.** Oppositions and conflicting counterproposals to the CBS counterproposal urging the assignment of VHF Channel 13 for Chicago have been filed by the following parties: William H. Block Company, Indianapolis, Indiana; Radio Indianapolis, Inc., Indianapolis, Indiana; Booth Radio and Television Stations, Inc., Detroit, Michigan; Crosley Broadcasting Corp.; Lake Broadcasting Company, Gary, Indiana; Indianapolis Broadcasting, Inc., Indianapolis, Indiana; Milwaukee Broadcasting Company, Milwaukee, Wisconsin; and WIBC, Inc., Indianapolis, Indiana.

(h) **Educational Reservation in Chicago.** The Illinois Institute of Technology filed a statement supporting the reservation of VHF Channel 11 in Chicago for non-commercial educational use. It was noted that a "Working Committee for Developing the Use of Channel 11 for Education in Chicago" had been formed on May 9, 1951 and included the following members: Loyola University, University of Illinois (Chicago Professional Colleges); Chicago Public Schools, University of Illinois (Navy Pier Branch), DePaul University, Illinois Institute of Technology, Arts Institute of Chicago, Roosevelt College, University of Chicago, Chicago Historical Society, Museum of Science and Industry and Northwestern University. The Illinois Institute of Technology submitted letters from each of the other members of the Working Committee expressing support for the reservation. The JCET also filed a statement supporting the reservation and indicating the support of Columbia College and George Williams College. It was stated that the Working Committee is conducting studies of financing, programming and operation of an educational television station on a cooperative basis. Seven institutions indicated they could contribute to the programming of such a station. It was contended that an educational television station on Channel 11 in Chicago would serve at least 60% of the population of Illinois. It was pointed out that the Board of Education of the City of Chicago has organized the "General Superintendent's Committee on Television" to consider the educational implications of television and the part that the Chicago school system would play in the joint operation of Channel 11.

(i) **Opposition to the Educational Reservation.** CBS, as an alternative to its counterproposal discussed above, requested that the educational reservation in Chicago be shifted to a UHF channel. CBS contended that it would be at a competitive disadvantage if it did not own a VHF station in Chicago. CBS argued that the statement of the Illinois Institute of Technology did not indicate any assurance that Channel 11 would be utilized or that a UHF channel would not serve equally as well. CBS contended that the educators offered no indication of the source of its funds, when an educational station might commence operation, or how they were prepared to translate program suggestions into actual programs. In reply to CBS, the JCET argued that educators will be dependent upon set circulation for their effect and that to shift the reservation to a UHF channel would greatly handicap the educators in obtaining funds. The JCET also urged that in view of CBS's financial resources, it was in a much better position to shoulder the burden of developing UHF in Chicago than would be the educational interests.

Conclusions: Show Cause Order

508. In view of the foregoing and the pendency of the hearing on the renewal of license of WBKB (Docket No. 10033) an appropriate temporary authorization will be issued to the licensee of Station WBKB in order to permit operation on Channel 2 in lieu of Channel 4.

Conclusions: Additional Commercial VHF Assignment

509. We are of the view that the record does not support the assignment of VHF Channel 13 to Chicago. This assignment could be achieved only by deleting VHF channels in Rockford, Illinois, and Indianapolis, Indiana. Rockford is a metropolitan area with a population of 152,000 and has a city population of 93,000. Indianapolis has a metropolitan area population of 552,000 and a city population of 427,000. We do not believe that the assignment of a 6th VHF channel to Chicago is warranted at the expense of deleting the only VHF channel from Rockford and one of three VHF channels from Indianapolis. Moreover, the CBS counterproposal would necessitate a reduction in the number of VHF assignments and would, therefore, constitute an inefficient use of the spectrum. Accordingly, the CBS counterproposal requesting the assignment of VHF Channel 13 in Chicago is denied. The CBS alternative request for the shifting of the educational reservation in Chicago to a UHF channel is made on the same basis as its request in Boston. We have, in connection with our discussion of Boston, considered the CBS contentions and for the reasons there stated rejected them. We are of the view in the instant case that the record requires the finalization of the educational reservation and that the educational reservation should not be shifted to the UHF. In the Third Notice we stated that a VHF channel would be reserved in all communities with three or more VHF channels where all such VHF

---

[107] CBS's original counterproposal consisted of 3 alternative plans for Chicago. CBS has since withdrawn plans B and C leaving only plan A for consideration. Accordingly, plans B and C and all comments and oppositions relating thereto will not be discussed in this Report.

[108] CBS has contracted with Balaban and Katz, operating Station WBKB in Chicago, to acquire control of that station. Application for consent of assignment to CBS has been filed by Balaban and Katz and Columbia. Final action on this application has not yet been taken by the Commission. CBS pointed out that all VHF assignments for commercial assignments in the Chicago area are already in operation, leaving no VHF channels for which application could be made by a network or other commercial broadcaster.

assignments were not in operation. We can see no reason for deviating from this decision in Chicago.[109] We believe that the record justifies the reservation of VHF Channel 11. Accordingly, the CBS request is denied and the reservation of Channel 11 in Chicago for non-commercial educational use is finalized.

Final Assignments and Reservations

510. The following assignments and reservation are adopted:

City	VHF Channel No.	UHF Channel No.
Chicago	2,5,7,9,*11	20,26,32,38,44

ROCKFORD, ILLINOIS: EDUCATIONAL RESERVATION

511. (a) **Proposed Reservation.** In the Third Notice the Commission proposed the reservation of Channel 45 in Rockford for non-commercial educational use.

(b) The City of Rockford, Rockford Public Schools, and Rockford College filed statements supporting the reservation of Channel 45 in Rockford for non-commercial educational use. Resolutions of the City Council, Board of Education, and the Board of Trustees of Rockford College were submitted supporting the reservation. No oppositions to the reservation were filed.

Conclusions

512. In view of the foregoing, the reservation of Channel 45 in Rockford for non-commercial educational use is finalized.

SPRINGFIED, ILLINOIS EDUCATIONAL RESERVATION

513. (a) **Proposed Reservation.** In the Third Notice the Commission proposed the reservation of UHF Channel 26 in Springfield for non-commercial educational use.

(b) The Board of Education of School District No. 186, Springfield, Illinois filed a statement supporting the reservation of Channel 26 in Springfield. The Board of Education stated that it is surveying the matter of costs of construction and operation of an educational television station and the possibilities of joint operation of a station by educational interests in the area. It was contended that the reservation is required in order to permit the Board to complete the survey. No oppositions to the reservation were filed.

Conclusions

514. In view of the foregoing, the reservation of Channel 26 in Springfield, Illinois for non-commercial educational use is finalized.

DEKALB, ILLINOIS

515. (a) **Proposed Assignments.** In the Third Notice no channels were assigned to DeKalb, Illinois.

(b) **Census Data.** DeKalb has a population of 12,000.

(c) **Counterproposal of Northern Illinois State Teachers College.** The Northern Illinois State Teachers College requested the assignment of UHF Channel 67 in DeKalb to be reserved for non-commercial educational use. No other changes in the assignments proposed by the Commission in the Third Notice were requested. No oppositions or conflicting counterproposals were filed.

(d) **Statement in Support of Illinois State Teacher College Counterproposal.** Illinois State Teachers College represented that it is very interested in constructing and operating a non-commercial educational television station. It stated that the College is presently constructing a new library containing a theatre-television studio. The College listed various types of educational programs it proposed to utilize including cooperative, general adult education, extension, laboratory, sports, entertainment, and special events programs. The college stated that its next budget to be presented to the State Teachers College Board and the State Legislature would include funds for the construction of an educational television station at DeKalb.

Conclusions

516. We believe the record supports the assignment of UHF Channel 67 to DeKalb and the reservation of that channel for non-commercial educational use. Accordingly, Channel 67 is assigned to DeKalb and reserved for non-commercial educational use.

Final Assignment and Reservation

517. The following assignment is adopted:

City	UHF Channel No.
DeKalb, Illinois	*67

CARBONDALE, ILLINOIS

518. (a) **Proposed Assignments.** In the Third Notice one channel, UHF Channel 34, was assigned to Carbondale, Illinois.

(b) **Census Data.** The population of Carbondale is 11,000.

(c) **Counterproposal of Southern Illinois University.** Southern Illinois University requested the assignment of VHF Channel 10 to Carbondale to be reserved for non-commercial educational use by making the following changes in the assignments proposed in the Third Notice:

City	Third Notice		Proposed Changes	
	VHF Channel No.	UHF Channel No.	VHF Channel No.	UHF Channel No.
Carbondale, Illinois		34	*10†	34
Bloomington, Indiana	4	*30,36	11†	*30,36
Indianapolis, Indiana	6,8,*13	20,26	4†,8,*13	20,26
Terre Haute, Indiana	10	*57,63	6†	*57,63
Louisville, Kentucky	3,11	*15,21	3,10†	*15,21
Paducah, Kentucky	6	43	12†	43
Cape Girardeau, Mo.	12	18	6†	18

(d) **Statement in Support of Southern Illinois University Counterproposal.** Southern Illinois University urged that the assignment of Channel 10 in Carbondale would serve the southernmost third of Illinois, one of the most underdeveloped areas in the United States with high unemployment and a low living standard. The University stated that the development of new trades and skills and the raising of the educational and cultural level in Southern Illinois is of major concern to the University and urged that educational television could be instrumental in assisting development in this area. It was contended that a VHF channel is necessary to serve the large but dispersed population in the area. The University submitted a proposed weekly programming schedule which was designed to aid in the education and rehabilitation of the area. The University stated that it was fully cognizant of the costs of the proposed operation and stated that construction and operating costs would come from University budget funds appropriated each biennium by the State Legislature. It was stated that the University administration is authorized to distribute these funds in a manner deemed by the University to be most advantageous, and that since the University considers television to be of major importance in education, it would be in a position to allocate funds for the proposed television operation.

(e) The Southern Illinois University counterproposal would substitute Channel 10 for Channel 11 in Louisville, Kentucky, Channel 11 for Channel 4 in Bloomington, Indiana, and Channel 4 for Channel 6 in Indianapolis, Indiana. Station WHAS-TV is presently operating in Louisville on Channel 9 but has been ordered to show cause in this proceeding why its authorization should not be modified to specify operation on Channel 11. The Southern Illinois University counterproposal would necessitate shifting Station WHAS-TV to Channel 10 rather than Channel 11. Station WTTV is presently operating in Bloomington, Indiana, on Channel 10 but has been ordered to show cause in this proceeding why its authorization should not be modified to specify operation on Channel 4. The Southern Illinois University counterproposal would necessitate shifting Station WTTV to Channel 11 rather than Channel 4. Station WFBM-TV is presently operating in Indianapolis, Indiana, on Channel 6. The Southern Illinois University counterproposals would require shifting Station WFBM-TV to Channel 4. The Southern Illinois University counterproposal would assign Channel 4 at Indianapolis. This channel will also be utilized in Columbus, Ohio, where Station WLWC, licensed to Crosley Broadcasting Corporation, will operate. The distance between the transmitter sites of WLWC in Columbus and WFBM-TV in Indianapolis would be 166.2 miles. Under the Third Notice the distance between WFBM-TV on Channel 6 in Indianapolis and Station WTVN in Columbus also on Channel 6, is 167.8 miles. The Southern Illinois University counterproposal would assign Channel 10 at Louisville 188 miles from the co-channel assignment at Knoxville, Tennessee. Both Louisville and Knoxville are situated in Zone II; and, therefore, this separation would be below the 190 mile minimum co-channel assignment separation in this zone.

(f) **Conflicting Counterproposals and Oppositions to the Southern Illinois University Counterproposals.** WHAS, Inc., Louisville, Kentucky; WFBM, Inc., Indianapolis, Indiana; and Crosley Broadcasting Corporation, Columbus, Ohio, all filed oppositions to the Southern Illinois University counterproposal. Conflicting counterproposals and oppositions have been filed by WIBC, Inc., Indianapolis, Indiana; Lake Broadcasting Company, Gary, Indiana; L. B. Wilson Company, Cincinnati, Ohio; and Logansport Broadcasting Company, Logansport, Indiana, and Owensboro On The Air, Inc., Owensboro, Kentucky. All of the above conflicting counterproposals have been denied for other reasons.

Conclusions

519. We are of the view that the Southern Illinois University counterproposal in so far as it requests the assignment of VHF Channel 10 at Carbondale must be denied. This assignment would necessitate deviating from the required minimum assignment spacings. The University in order to assign Channel 10 to Carbondale proposes that Channel 10 be assigned at Louisville. Station WHAS-TV operating on Channel 10 at Louisville would be only 188 miles from the co-channel assignment at Knoxville. Since both these cities are situated within Zone II, this spacing would not meet the 190 mile minimum assignment separation. In view of the foregoing, the counterproposal of Southern Illinois University in so far as it requests the assignment of VHF Channel 10 in Carbondale is denied. We believe, however, that the record supports the basis for assigning a channel to Carbondale to be reserved for non-commercial educational use. Accordingly, Channel 61 will be assigned to Carbondale for this purpose.

Final Assignments and Reservation

520. The following assignments and reservation are adopted:

City	UHF Channel No.
Carbondale, Illinois	34, *61

DAVENPORT, IOWA-ROCK ISLAND-MOLINE, ILLINOIS

521. (a) **Proposed Assignments and Reservation.** In the Third Notice the Commission proposed the following assignments and reservation:

City	VHF Channel No.	UHF Channel No.
Davenport, Iowa,-Rock Island-Moline, Ill.	4,6	*30, 36, 4

(b) **Census Data.** The standard metropolitan area of Davenport-Rock Island-Moline has a population of 234,000. The population of Davenport is 75,000. The population of Rock Island is 49,000. The population of Moline is 37,000.

(c) **Existing Stations.** Central Broadcasting Company is licensed for the operation of WOC-TV, Davenport, Iowa, on Channel 5. The licensee was ordered to show cause why the license of WOC-TV should not be modified to specify Channel 6 in lieu of Channel 5. Rock Island Broadcasting Company is licensed for operation of WHBF-TV, Rock Island, on Channel 4.

(d) **Counterproposal of Quad City Broadcasting Corp.** Quad-City Broadcasting Corp. requested the additional assignment of Channel 10 to Davenport-Rock Island-Moline-East Moline[110] by making the following changes in the assignments proposed in the Third Notice:

[109] See also our decision with respect to the Boston educational reservation.

[110] Davenport Broadcasting Corp, Inc., Davenport, requested the assignment of Channel 2 to Atalissa, Iowa, at a distance of 50 miles from Davenport. This assignment would be accomplished by the deletion of Channel *11 from Des Moines. This request has been considered in connection with the Des Moines educational reservation.

City	Third Notice		Counterproposal

Wausau, Wis.	7	16	10†	16

(e) **Statement in Support of Quad City Counterproposal.** Quad City Broadcasting Corporation urged that there are approximately 54,000 VHF receivers in the area; and that a long period would elapse before the existing receivers could be converted or new receivers obtained capable of receiving ultra high frequencies; that the Commission's assignments in the Third Notice would limit the area to the programs of two networks thus preserving the existing monopolistic situation; and that the two VHF frequencies proposed for Davenport-Rock Island-Moline are already in operation by existing stations and that there is demand for additional frequencies.

(f) **Oppositions and Conflicting Counterproposals to Quad City Broadcasting Corp. Counterproposal.** Oppositions and conflicting counterproposals to the counterproposal of Quad City Broadcasting Corporation were filed by the following parties: Evansville Television, Inc., Evansville, Indiana; KFEQ, Inc., St. Joseph, Missouri; The Journal Company (WTMJ-TV), Milwaukee, Wisconsin; Badger Broadcasting Company, Madison, Wisconsin; Cedar Valley Broadcasting Company, Inc., Austin, Minnesota; Milwaukee Broadcasting Company and Hearst Radio, Inc., Milwaukee, Wisconsin; the Gazette Company, Cedar Rapids, Iowa; Davenport Broadcasting Company, Davenport, Iowa; The Black Hawk Broadcasting Company, Waterloo, Iowa; the Northwest Broadcasting Company, Fort Dodge, Iowa; Midland Broadcasting Company, Kansas City, Missouri; University of Illinois, Urbana, Illinois; Michigan State College, East Lansing, Michigan; The Trebit Corporation, Flint, Michigan; WJR, The Goodwill Station, Inc., Detroit, Michigan; Milton J. Hinlein, Sedalia, Missouri; Pulitzer Publishing Company (KSD-TV), St. Louis, Missouri, KNUJ, Inc., New Ulm, Minnesota; Champaign News Gazette, Inc., Champaign, Illinois; Peoria Broadcasting Company and West Central Broadcasting Company, Peoria, Illinois.

(g) The counterproposal of Quad City Broadcasting Company would result in the following co-channel separations below 190 miles in Zone II:

Channel 9—Waterloo, Iowa—Minneapolis, Minn. 180 mi.
Channel 12—Pittsburg, Kansas—Hutchinson, Kan., 181 miles.
Channel 10—Austin, Minn.—Wausau, Wis., 187 miles.
Channel 6—Rochester, Minn.—Superior, Wis., 187 miles.
Channel 11—Kansas City, Mo.—Des Moines, Iowa, 180 mi.
Channel 7—La Crosse, Wis.—St. Cloud, Minn., 189 miles.

(h) **Answer of Central Broadcasting Co., to Show Cause Order.** Central Broadcasting Company, licensee of WOC-TV, stated that it did not object to the proposal to change its assignment to Channel 6.

(i) **The Davenport-Rock Island-Moline Educational Reservation.** The Independent School District, Davenport, Iowa, supported the reservation of UHF Channel 30 at Davenport-Rock Island-Moline, for non-commercial educational use. The Independent School District stated that at a meeeting of representatives of colleges and secondary schools of the area the unanimous opinion was voiced that an educational television channel should be assigned to the Davenport-Rock Island-Moline area. The JCET also supported the reservation of UHF Channel 30 in the Davenport-Rock Island-Moline area. No objection was filed to the proposed reservation.

Conclusions: Show Cause Order

522. In view of the foregoing, an appropriate authorization will be issued to Central Broadcasting Company to specify operation of WOC-TV on Channel 6.

Conclusion: Educational Reservation

523. In view of the foregoing the reservation of Channel 30 in Davenport-Rock Island-Moline for non-commercial educational use is finalized.

Conclusions: Request for Additional Commercial VHF Assignment.

524. It is our view that the counterproposal of Quad City Broadcasting Corp. seeking the assignment of Channel 10 to Davenport-Rock Island-Moline must be denied. As indicated above the changes in the proposed Table of Assignments requested by Quad City Broadcasting Corp. would result in six separations below the minimum provided herein for co-channel assignments in Zone II. Accordingly, the counterproposal of Quad City Broadcasting Corp. is denied.

Final Assignments and Reservation

525. The following assignments and reservation are adopted:

City	VHF Channel No.	UHF Channel No.
Davenport-Rock Island-Moline	4,6	*30, 36, 42

CHAMPAIGN, URBANA, PEORIA, ILLINOIS; NEW ULM, MANKATO, MINNESOTA; WATERLOO, CEDAR RAPIDS, IOWA

526. (a) **Proposed Assignments and Reservations.** In the Third Notice the Commission proposed the following assignments and reservations:

City	VHF Channel No.	UHF Channel No.
Champaign, Illinois		21
Urbana, Illinois	*12	27,33
Peoria, Illinois	8	*37,43
New Ulm, Minnesota		43
Mankato, Minnesota		15
Waterloo, Iowa	7	16,*22
Cedar Rapids, Iowa	9	20,*26

(b) **Counterproposals.** Various parties in this proceeding filed conflicting counterproposals seeking the assignment of a VHF channel to Champaign, Peoria, New Ulm, Mankato, Waterloo and Cedar Rapids.

Champaign

527. (a) **Census Data.** The population of the City of Champaign is 40,000.

(b) **Counterproposal of Champaign News-Gazette.** Champaign News-Gazette requested the assignment of Channel 3 to Champaign by substituting a UHF channel in Centralia, Illinois, for VHF Channel 2 and making the following changes in the assignments proposed by the Commission in the Third Notice:

City	Third Notice		Proposed Changes	
	VHF Channel No.	UHF Channel No.	VHF Channel No.	UHF Channel No.
Centralia, Illinois	2	32	7†	32,59†
Champaign, Illinois		21	3†	21
Springfield, Illinois	3	20,*26	2†	20,*26
Cedar Rapids, Iowa	9	20,*26	2†,9	20,*26
Iowa City, Iowa	*2	24	*12†	24
Mason City, Iowa	12	35	3†	35
Kirksville, Missouri	12		3†	18

(c) **Statement in Support of Champaign News-Gazette Counterproposal.** Champaign News-Gazette contended that the cities of Champaign and Urbana, Illinois, are in reality "twin cities" separated only by a boundary street. (The population of Urbana is 23,000.) It was urged that since the Commission proposed the assignment of three channels in the Third Notice for Urbana, VHF Channel 12 and UHF Channels 27 and 33, with Channel 12 reserved for educational purposes, the Champaign counterproposal would assign a first VHF for commercial purposes to the Champaign-Urbana area.

(d) **Oppositions and Conflicting Counterproposals to Champaign News-Gazette Counterproposal.** Oppositions and conflicting counterproposals to the counterproposal of Champaign News-Gazette were filed by the following parties: Quad City Broadcasting Corporation, Moline, Illinois; WIBC, Inc., Indianapolis, Indiana; Davenport, Broadcasting Company, Davenport, Iowa; Black Hawk Broadcasting Company, Waterloo, Iowa; West Central Broadcasting Company, Peoria, Illinois; Northwest Broadcasting Company, Fort Dodge, Iowa,[11] and Peoria Broadcasting Company, Peoria, Illinois. In addition oppositions to the Champaign News-Gazette counterproposal have been filed by WCNT, Inc., Centralia, Illinois; the Balaban and Katz Corporation, Chicago, Illinois; and Sangamon Valley Television Corporation, Springfield, Illinois.

(e) WCNT opposed the Champaign counterproposal to delete VHF Channel 2 from Centralia and to replace it with UHF Channel 59. WCNT argued that the Champaign counterproposal would remove the only VHF channel from the southern part of Illinois whereas operation of Channel 3 at Champaign, it was argued, would merely duplicate that of Channel 12 proposed by the Commission at Urbana. The population of Centralia is 14,000.

(f) Balaban and Katz Corporation of Chicago and Sangamon Valley Television Corporation of Springfield, Illinois, opposed the Champaign counterproposal since it would mean a separation between Springfield and Chicago on Channel 2 of 178 miles. The Commission has revised its rules and standards in this Report to require a minimum co-channel mileage spacing of 170 miles in Zone 1.

Urbana

528. (a) **The Urbana Educational Reservation.** Urbana is one of the communities designated in the record as a "primarily educational center." The University of Illinois, Urbana, supported the reservation of VHF Channel 12 in Urbana for non-commercial educational use and reaffirmed its intention of constructing and operating a television station. The University stated that the General Assembly of the State of Illinois, in May 1951, as part of the biennial budget of the University of Illinois authorized funds specifically for the operation of a television program-producing unit; that the University's fiscal budget for 1952-1953 was in excess of $47,000,000; and that the University's Board of Trustees had accepted a gift of a television transmitter from the General Electric Company for use by the University at such time and place as may be approved by the Commission; that it has successfully engaged in radio broadcasting for about thirty years; and that it has owned and operated Station WILL since 1922 and Station WIUC (FM) since 1941. The University also stated that it has originated hundreds of radio programs for commercial stations and networks and that it had cooperated with commercial stations in originating television programs both from the Urbana-Champaign campus and in Chicago.

(b) **Oppositions and Conflicting Counterproposals to Urbana Re-**

[11] Elsewhere in this report, we have denied the counterproposals of Davenport Broadcasting Corporation, Northwest Broadcasting Company, West Central Broadcasting Corporation and WIBC, Inc., for the reasons therein stated.

servation. Sworn statements were filed opposing the reservation of Channel 12 in Urbana, Illinois, for non-commercial educational use by Columbus Broadcasting System; L. B. Wilson, Inc. (WCKY), Cincinnati, Ohio; and the Peoria Broadcasting Company (WMBD), Peoria, Illinois. In a subsequent sworn statement CBS withdrew certain of its proposals which eliminated the conflict between the University of Illinois and CBS. The proposals of L. B. Wilson and Peoria Broadcasting Company have been considered and denied in another portion of this Report.

(c) **Counterproposal of West Central Broadcasting Company.** West Central Broadcasting Company Broadcasting Company opposed the reservation of VHF Channel 12 in Urbana and requested the assignment of that channel to Peoria by making the following changes in the assignments proposed by the Commission in the Third Notice:

City	Third Notice		Proposed Changes	
	VHF Channel No.	UHF Channel No.	VHF Channel No.	UHF Channel No.
Peoria, Illinois	8	*37,43	8,12†	*37,43
Urbana, Illinois	*12	27,33	†	*27†,33
Brookfield, Missouri			12†	
Kirksville, Missouri	12	18	†	18

(d) **Statement in Support of West Central Broadcasting Company Counterproposal.** West Central stated that there are four times as many people in the Peoria metropolitan area than there are in Champaign and Urbana; that there are four full time and two daytime standard broadcast stations in the Peoria metropolitan area and only one full time and two daytime standard broadcast stations in the Peoria metropolitan area and only one full time and two daytime AM stations in Champaign and Urbana. West Central also stated that the proposal affords Brookfield, Missouri, its first television assignment. The population of Brookfield is 6,000. The population of Kirksville is 11,000.

Peoria

529. (a) **Census Data.** The standard metropolitan area of Peoria has a population of 251,000. The City of Peoria has a population of 112,000.

(b) **Counterproposal of Peoria Broadcasting Company.**[12] Peoria Broadcasting Company requested the assignment of Channel 12 to Peoria by making the following changes in the assignments in the Third Notice:

City	Third Notice		Proposed Changes	
	VHF Channel No.	UHF Channel No.	VHF Channel No.	UHF Channel No.
Centralia, Illinois	2	32	†	32
Peoria, Illinois	8	*37,43	8,12†	*37,43
Springfield, Illinois	3	20,*26	2†	20,*26
Urbana, Illinois	*12	27,33	*3†	27,33
Cedar Rapids, Iowa	9	20,*26	2†	20,*26
Iowa City, Iowa	*2	24	*9†	24
Kirksville, Missouri	12	18	†	18,63†

(c) **Statement in Support of Peoria Broadcasting Company Counterproposal.** Peoria Broadcasting Company urged that a city the size of Peoria required an additional VHF assignment; that neither Kirksville, Missouri, nor Centralia, Illinois, could support a television station and accordingly the deletion of the proposed VHF assignment from those communities would not result in any actual loss; and that neither Centralia nor Kirksville required the additional coverage that could be obtained from a VHF channel and that UHF was adequate for these communities.

(d) **Oppositions and Conflicting Counterproposals to Peoria Broadcasting Company Counterproposal.** Oppositions and conflicting counterproposals to the counterproposal of Peoria Broadcasting Company were filed by the following parties: WCNT, Inc., Centralia, Illinois; Sangamon Valley Television Corporation, Springfield, Illinois; Balaban and Katz Corp., Chicago, Illinois; Davenport Broadcasting Company, Inc., Davenport, Iowa; Champaign News-Gazette, Champaign, Illinois; The Gazette Company, Cedar Rapids, Iowa; and Quad City Broadcasting Corp., Moline, Illinois.

(e) **The Peoria Educational Reservation.** Illinois State Normal University, Normal, Illinois, supported the reservation of UHF Channel 37 for non-commercial educational use at Peoria. No objections were raised to the reservation. The University stated that it was interested in cooperating with other universities and school systems of the region in a television broadcasting program for the benefit of schools in the region; that it was "financially able to sponsor and participate in educational television"; that it has broadcast educational programs over commercial radio Station WJBC for many years, and that it plans to install a closed-circuit television system for demonstration teaching purposes, educational film distribution, and for training teachers in the effective use of the medium.

New Ulm

530. (a) **Census Data.** The population of the City of New Ulm is 9,000.

(b) **Counterproposal of KNUJ, Inc.** KNUJ, Inc., requested the assignment of Channel 3 to New Ulm by making the following changes in the assignments proposed by the Commission in the Third Notice:

City	Third Notice		Proposed Changes	
	VHF Channel No.	UHF Channel No.	VHF Channel No.	UHF Channel No.
New Ulm, Minnesota		43	3†	43
Pierre, South Dakota	6,10	*22	6,11†	*22
Watertown, South Dakota	3	35	10†	35

(c) **Statement in Support of KNUJ, Inc. Counterproposal.** KNUJ, Inc. urged that the assignments requested by it would serve the Commission's priorities of assignment and would also comply with the minimum mileage separations. The counterproposal of KNUJ, Inc. would result in a co-channel separation of 189 miles in Zone II on Channel 11 between Pierre and Sioux Falls, South Dakota.

(d) **Oppositions and Conflicting Counterproposals to KNUJ, Inc. Counterproposal.** Oppositions and conflicting counterproposals to the counterproposal of KNUJ, Inc., were filed by the Gazette Company, Cedar Rapids, the Southern Minnesota Supply Company, Mankato, Minnesota, and the Black Hawk Broadcasting Company, Waterloo, Iowa.

Mankato

531. (a) **Census Data.** The City of Mankato has a population of 19,000.

(b) **Counterproposal of Southern Minnesota Supply Company.** Southern Minnesota Supply Company requested the assignment of Channel 12 to Mankato by making the following changes in the assignments proposed in the Third Notice:

City	Third Notice		Proposed Changes	
	VHF Channel No.	UHF Channel No.	VHF Channel No.	UHF Channel No.
Mason City, Iowa	12	35	3†	35
Brainerd, Minnesota	12		10†	
Hibbing, Minnesota	10		12†	
Mankato, Minnesota		15	12†	15
Grand Forks, North Dakota	*2,10		*2,12†	

(c) **Statement in Support of Southern Minnesota Supply Company.** Southern Minnesota Supply Company urged that the assignments requested by it would serve the Commissions's priorities and would also comply with the minimum mileage separations. The counterproposal would result in a co-channel separation of 182 miles in Zone II on Channel 10 between Brainerd and Rochester, Minnesota.

(d) **Oppositions and Conflicting Counterproposals to Southern Minnesota Supply Company Counterproposal.** The Independent Broadcasting Company, Minneapolis, and the Northwest Broadcasting Company, Ford Dodge opposed the counterproposal of Southern Minnesota Supply Company on the grounds of adjacent channel spacing of 67 and 69 miles. No conflict, however, arises under the minimum mileage separations adopted herein. Black Hawk Broadcasting Company, Waterloo, filed a conflicting counterproposal.

Waterloo

532. (a) **Census Data.** The standard metropolitan area of Waterloo has a population of 100,000 and the City of Waterloo has a population of 65,000.

(b) **Counterproposal of Black Hawk Broadcasting Company.** Black Hawk Broadcasting Company requested the assignment of Channel 12 to Waterloo by making the following changes in the assignments proposed in the Third Notice:

City	Third Notice		Proposed Changes	
	VHF Channel No.	UHF Channel No.	VHF Channel No.	UHF Channel No.
Mason City, Iowa	12	35	3†	35
Waterloo, Iowa	7	16,*22	7,12†	16,*22
Brookfield, Missouri			12†	
Kirksville, Missouri	12	18	†	18

(c) **Statement in Support of Black Hawk Counterproposal.** It was urged that Waterloo is a rapidly growing city in the center of a rich agricultural area; and that the importance of the city and its need for an additional television channel is evidence by the increasing economic importance of Waterloo.

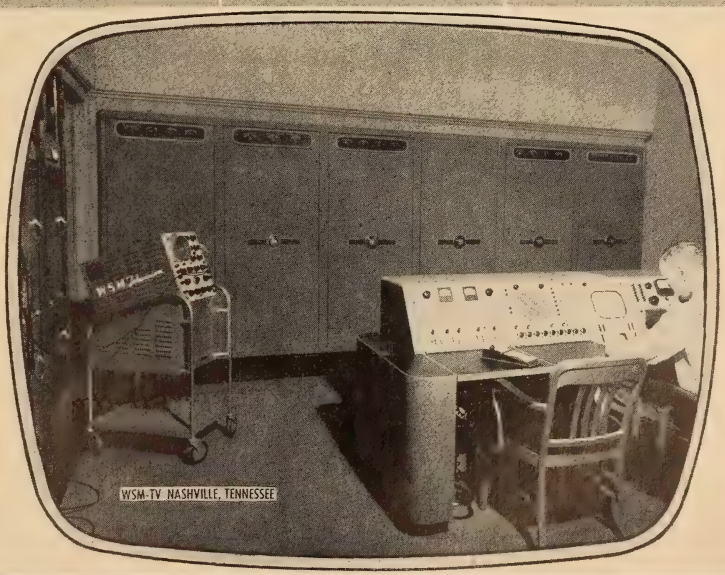
(d) **Oppositions and Conflicting Counterproposals to Black Hawk Counterproposal.** Oppositions to the counterproposal of Black Hawk Broadcasting Company were filed by the Gazette Company, Cedar Rapids, Iowa, and the Southern Minnesota Supply Company, Mankato, Minnesota.

(e) **The Waterloo Educational Reservation.** The Iowa State Teachers College, Cedar Falls, and the JCET supported the reservation of UHF Channel 22 for non-commercial educational use in Waterloo. The college stated it was the only educational institution in Iowa exclusively concerned with teacher education and therefore it had a special interest in educational television, particularly in the use of television programs directed to the classrooms of the public schools. The college stated that it has prepared a weekly film for telecasting over WOI-TV, Ames, Iowa. The college stated that it was prepared to cooperate with other educational institutions. The College further stated that the assignment of a reserved channel for Waterloo, eight miles from Cedar Falls, would give it the best chance to participate in educational television.

Cedar Rapids

533. (a) **Census Data.** The standard metropolitan area of Cedar Rapids has a population of 104,000. The City of Cedar Rapids has a population of 72,000.

(b) **Counterproposal of The Gazette Company.** The Gazette Company, Cedar Rapids, Iowa, proposed that Channel 12 be assigned to Cedar Rapids by making the following changes in the assign-



[12]The counterproposal of West Central Broadcasting Co., seeking the assignment of a VHF Channel to Peoria by the deletion of VHF Channel 12 in Urbana proposed to be reserved for non-commercial educational use has been considered above in connection with the discussion of the Urbana educational reservation.

Trenton, Missouri				47†
Reedsburg, Wisconsin				46†

(c) **Statement in Support of Gazette Company Counterproposal.** It was urged that Cedar Rapids is a substantial market with a population which has increased by 16.4% in the 10 year period from 1940, that none of the minimum station separations proposed in the Third Notice would be violated and that a net gain in service would result from a grant of the counterproposal.

(d) **Oppositions and Conflicting Counterproposals to The Gazette Company Counterproposal.** Oppositions to the Cedar Rapids proposal have been filed by the following parties who also filed mutually exclusive proposals: Davenport Broadcasting Company, Davenport, Iowa; KNUJ, Inc., New Ulm, Minnesota; Black Hawk Broadcasting Company, Waterloo, Iowa, and Peoria Broadcasting Company and West Central Broadcasting Company.

(e) **The Cedar Rapids Educational Reservation.** The JCET supported the reservation of Channel 26 in Cedar Rapids for noncommercial educational use. No objections were filed to the proposed reservation.[113]

Conclusions

534. The foregoing counterproposals consist of requests for the assignment of a first VHF channel in Champaign, Mankato and New Ulm, respectively; and a second VHF assignment in Waterloo, Peoria and Cedar Rapids, respectively. The counterproposal of Black Hawk Broadcasting Company (Waterloo), KNUJ, Inc. (New Ulm) and The Gazette Company (Cedar Rapids) are mutually exclusive and are also mutually exclusive with the counterproposals of Champaign News-Gazette (Champaign) and Southern Minnesota Supply Company (Mankato). In addition the counterproposal of Peoria Broadcasting Company (Peoria) is mutually exclusive with the counterproposals of Champaign News-Gazette and The Gazette Company.

535. It is our view, based on the record, that Champaign and Urbana should be considered as a single entity for assignment purposes in view of the proximity and strong identity of interests of these cities. In view of the proposed reservation of Channel 12 in Urbana for non-commercial educational use the counterproposal of Champaign News-Gazette will, accordingly, be considered as a request for the assignment of the second VHF channel to Champaign-Urbana.

Conclusions: Mankato, Peoria, Waterloo, New Ulm, Champaign-Urbana, Cedar Rapids.

536. The counterproposal of Southern Minnesota Supply Company, seeking the assignment of a VHF channel to Mankato must be denied. As indicated below, this counterproposal would result in a co-channel separation of 182 miles in Zone II on Channel 10 between Brainerd and Rochester, Minnesota. This separation is below the minimum of 190 miles for the assignment of co-channel stations in Zone II.

537. With respect to the remaining counterproposals, it is our view that the counterproposal of Champaign News-Gazette is meritorious and, for the reasons set forth below, is to be preferred to the conflicting counterproposals seeking assignment of a VHF channel to Peoria, Waterloo or New Ulm. The cities of Champaign and Urbana have a combined population of 63,000, and in the Third Notice the Commission proposed the assignment of one VHF channel for the city of Urbana and no VHF channels for Champaign. The counterproposal of Champaign News-Gazette would result in the assignment of a second VHF channel to Champaign-Urbana and would, in addition, make possible the assignment of a second VHF channel to Cedar Rapids with a population of 72,000. These assignments would be accomplished by deleting VHF Channel 2 from Centralia which has a population of 14,000. It is our view that the assignment of VHF channels to both Champaign-Urbana and Cedar Rapids warrants this deletion of a VHF channel from Centralia. Accordingly, we are assigning VHF Channels 3 and 12 to Champaign-Urbana and VHF Channels 2 and 9 to Cedar Rapids. In substitution for Channel 2 in Centralia we are assigning Channel 59.

538. It is our view that the assignment of a second VHF channel to both Champaign-Urbana and Cedar Rapids is to be preferred to the assignment of a second VHF channel to Peoria. West Central Broadcasting Co. has requested the assignment of Channel 12 to Peoria by the deletion of Channel 12 from Urbana where it was proposed to be reserved for non-commercial educational use. We believe, however, that the record requires the reservation of a VHF channel for non-commercial educational use in Urbana, a primarily educational center. The record establishes that the University has had considerable experience in broadcasting as the licensee of both an AM and an FM station and that it now intends to establish a non-commercial educational television station in the Urbana area. The University has received a gift of a television transmitter and the General Assembly of the State of Illinois has specifically authorized funds for the operation of a television program broadcasting unit. As indicated above, West Central Broadcast Co. did not propose the substitution of a VHF channel in Urbana for Channel 12 which it requested be deleted from that community. It is our view, on the basis of the record, that a VHF channel should be retained in Urbana for non-commercial educational use. Accordingly, the counterproposal of West Central Broadcasting Co. is denied. We have by our decision herein added the assignment of VHF Channel 3 to Champaign-Urbana. It should be pointed out that if Channel 3 were reserved in Champaign-Urbana for non-commercial educational use in lieu of Channel 12 as proposed and Channel 12 were assigned to Peoria, the assignment of an additional VHF channel to Cedar Rapids would be precluded. As noted above, we have preferred the assignment of a VHF channel to Champaign-Urbana and Cedar Rapids over the assignment of a VHF channel to Peoria.

539. The counterproposal of Peoria Broadcasting Company seeking the assignment of a second VHF channel in Peoria would be accomplished by the deletion of the VHF channels assigned to Kirksville and Centralia. This plan would also assign a VHF channel to Brookfield. It is our view, however, that the assignment of a second VHF channel to both Champaign-Urbana and Cedar Rapids, at the expense of deleting only one channel from Centralia, is to be preferred to the assignment of a second VHF channel to Peoria and a first VHF channel to Brookfield which would be accomplished by deleting VHF channels from both Centralia and Kirksville. It is to be pointed out that Brookfield has a population of only 6,000 persons and no request has been filed by any party from that community for the assignment of a channel.

540. It is also our view that the counterproposal of Champaign News-Gazette is to be preferred to the counterproposal of Black Hawk Broadcasting Company. Although Black Hawk Broadcasting Company would, in addition to assigning a second VHF channel to Waterloo, assign a first VHF channel to Brookfield, this would be accomplished by deleting the sole VHF channel assigned to Kirksville. It is our view that the assignment of a second VHF channel to both Champaign-Urbana and Cedar Rapids is to be preferred to the assignment of a second VHF channel to Waterloo and a first VHF channel to Brookfield, a city of 6,000.

541. It is also our view that the counterproposal of Champaign News-Gazette is to be preferred to the counterproposal of KNUJ, Inc., seeking the assignment of a VHF channel to New Ulm with a population of approximately 9,000 persons. As indicated above the counterproposal of KNUJ, Inc., would result in a co-channel separation of 189 miles in Zone II on Channel 11 between Pierre and Sioux Falls, South Dakota. This separation is below the minimum of 190 miles for the assignment of co-channel station in Zone II. Moreover, it is our view that the assignment of a second channel to both Champaign-Urbana and Cedar Rapids is to be preferred to the assignment of a first channel to New Ulm, especially in view of the relative sizes of these communities.

542. The Gazette Company counterproposal requested the assignment of a second VHF channel, Channel 12, to Cedar Rapids. This counterproposal, however, is in conflict with the counterproposal of Champaign News-Gazette. However, our decision herein provides for the additional assignment of VHF Channel 2 to Cedar Rapids. Accordingly, the Gazette Company counterproposal need not be considered further.

543. In view of the foregoing, the counterproposals of Black Hawk Broadcasting Company, KNUJ, Inc., The Gazette Company, Southern Minnesota Supply Company, West Central Broadcasting Co. and Peoria Broadcasting Company are denied; and the counterproposal of Champaign News-Gazette is granted.

544. We are of the view, however, that the assignment of an additional UHF channel to Peoria is warranted. Channel 19 in Peoria would meet all required mileage separations for assignments in this zone. Accordingly, Channel 19 will be assigned to Peoria as an additional assignment.

Conclusions: The Peoria, Waterloo, Cedar Rapids Educational Reservations

545. On the basis of the record, the reservation of UHF Channels *37, *22, and *26 in Peoria, Waterloo and Cedar Rapids, respectively, are finalized.

Final Assignments and Reservations

546. The following assignments and reservations are adopted:[114]

City	VHF Channel No.	UHF Channel No.
Centralia, Illinois		32,59
Champaign-Urbana, Illinois	3,*12	21,27,33
Peoria, Illinois	8	19,*37,43
Springfield, Illinois	2	20,*26
Cedar Rapids, Iowa	2,9	20,*26
Iowa City, Iowa	*12	24
Mason City, Iowa	3	35
Waterloo, Iowa	7	16,*22
Mankato, Minnesota		15
New Ulm, Minn.		43
Kirksville, Missouri	3	18

AMES, FORT DODGE, AND DES MOINES, IOWA

547. (a) **Proposed Assignments and Reservations.** In the Third Notice the Commission proposed the following assignments and reservation:

City	VHF Channel No.	UHF Channel No.
Ames	5	25
Des Moines	8,*11,13	17,23
Fort Dodge		21

(b) **Census Data.** The standard metropolitan area of Des Moines has a population of 226,000 and the city of Des Moines has a population of 178,000. The City of Fort Dodge has a population of 25,000. The City of Ames has a population of 23,000.

(c) **Existing Stations.** The Iowa State College of Agriculture and Mechanical Arts is licensed for the operation of Station WOI-TV at Ames on Channel 4. The licensee was ordered to show cause why the license of WOI-TV should not be modified to specify operation on Channel 5. Iowa State stated it had no objection to the move from Channel 4 to Channel 5.

(d) **Counterproposal of Northwest Broadcasting Company.** The Northwest Broadcasting Company proposed the additional assignment of Channel 4 to Fort Dodge by making the following changes in

[113] Coe College, Cedar Rapids, in its comment on June 6, 1951, requested the reservation of VHF Channel 9 for non-commercial educational use; thereafter the college advised the JCET that it was withdrawing its request in favor of the reservation of a UHF channel for possible future educational use by the college.

[114] The educational reservations for Springfield, Illinois, and Iowa City, Iowa, are discussed elsewhere.

the assignments proposed in the Third Notice:

City	Third Notice		Proposed Changes	
	VHF Channel No.	UHF Channel No.	VHF Channel No.	UHF Channel No.
Fort Dodge, Iowa		21	4†	21
Sioux City, Iowa	4,9	*30,36	2†,9	*30,36
Mitchell, South Dakota	5	20	4†	20
Vermillion, South Dakota	*2	41	*5†	41

(e) Statement in Support of Northwest Broadcasting Company Counterproposal. The Northwest Broadcasting Company urged that the geographical location and importance of Fort Dodge as the dominant city in a large area justified the assignment of two channels, one VHF and one UHF to that city. It was also urged that the Commission's proposed assignments did not provide an equitable distribution of television facilities since cities of comparable size were assigned more channels than were assigned to Dodge.

(f) The Northwest Broadcasting Company counterproposal would result in the following co-channel separation in Zone II:

Channel	Cities	Mileage
5	Vermillion, S. D.-Hastings, Nebr.	170
5	Vermillion, S. D.-Ames, Ia. (WOI-TV)	175
4	Fort Dodge, Ia.-Minneapolis, Minn.	176

(g) Opposition and Conflicting Counterproposals to the Northwest Broadcasting Company Counterproposal. Oppositions and conflicting counterproposals were filed by the following parties: Gazette Company, Cedar Rapids; Black Hawk Broadcasting Company, Waterloo, Iowa; Champaign News-Gazette, Inc., Champaign, Ill.; Southern Minnesota Supply Company, Mankato, Minnesota; Quad City Broadcasting Company, Moline, Ill., Independent Broadcasting Company, DesMoines, Ia.; Mid-Continent Radio Television, Inc., Minneapolis, Minn.; and Iowa State College, Ames, Iowa.

(h) The Des Moines Educational Reservation. The Independent School District of Des Moines and Drake University supported the reservation of VHF Channel 11 at Des Moines for non-commercial educational use. The City Council of Des Moines, Iowa, and other civic and educational parties also supported the reservation. The Independent School District urged that a reservation was necessary in order that educational institutions and other interested organizations have sufficient time to develop a program for non-commercial educational use of television in the area.

(i) Counterproposals of Cowles Broadcasting Company, Central Broadcasting Company, and Murphy Broadcasting Company. Cowles Broadcasting Company, Central Broadcasting Company, and the Murphy Broadcasting Company,[115] proposed to increase the number of commercial VHF channel assignments in Des Moines, by removing the reservation of VHF Channel 11 for non-commercial educational use and by proposing that VHF Channel 5 at Ames, Iowa, be assigned to WOI-TV and be classified as a channel reserved for non-commercial educational use instead of for commercial use as follows:

City	Third Notice		Proposed Changes	
	VHF Channel No.	UHF Channel No.	VHF Channel No.	UHF Channel No.
Ames, Iowa	5	25	*5	25
Des Moines, Iowa	8,*11,13	17,23	8,11†,13	17,23

(j) Statement in Support of Cowles Broadcasting Company, Central Broadcasting Company and Murphy Broadcasting Company Counterproposals. Cowles, Central and Murphy Broadcasting Companies urged that WOI-TV provide educational service to the Des Moines area; that the proposed changes in classification of WOI-TV to an educational non-commercial station would meet the needs of Des Moines for non-commercial educational television; that WOI-TV in securing its license represented it would be a non-commercial station; and that "it would be a waste of television channels to assign two channels for use in the operation of educational television stations, one at Des Moines, Iowa, and the other at Ames, Iowa."

(k) Oppositions to Cowles, Central and Murphy Counterproposals. Iowa State College,[116] and Davenport Broadcasting Company opposed the counterproposals of Cowles, Central and Murphy.

(l) Counterproposal of the Davenport Broadcasting Company, Inc., Davenport, Iowa. The Davenport Broadcasting Company, Inc., proposed the additional assignment of a VHF channel to Atalissa,[117] by deleting Channel *11 at Des Moines and by making the following changes in the assignments proposed in the Third Notice:

City	Third Notice		Counterproposal	
	VHF Channel No.	UHF Channel No.	VHF Channel No.	UHF Channel No.
Atalissa, Iowa			2†	
Des Moines, Iowa	8,*11,13	17,23	8, †, 13	17,23
Iowa City, Iowa	*2	24	*11†	24

(m) Statement in Support of Davenport Broadcasting Company Counterproposal. The Davenport Broadcasting Company urged that the size, population, and economic importance of Davenport-Rock Island-Moline warranted an additional VHF assignment and that the deletion of reserved Channel 11 from Des Moines, "would eliminate wasteful overlap between educational service now being rendered by Iowa State College of Agriculture and Mechanical Arts, (WOI-TV), Ames, Iowa, and the proposed assignment of Channel 11 in Des Moines for educational use."

(n) Oppositions to the Davenport Broadcasting Company Counterproposal. Cowles, Central, Independent, Murphy, and Iowa State College opposed the Davenport Broadcasting counterproposal.

(o) Counterproposal of Independent Broadcasting Company. The Independent Broadcasting Company proposed the additional assignment of Channel 4 to Des Moines by making the following changes in the assignments proposed in the Third Notice:

City	Third Notice		Proposed Changes	
	VHF Channel No.	UHF Channel No.	VHF Channel No.	UHF Channel No.
Des Moines, Iowa	8,*11,13	17,23	4†,8,11,13	*17†,23 (or 23*)
Sioux City, Iowa	4,9	*30,36	2†,9	*30,36
Vermillion, South Dakota	*2	41	*4†	41

(p) Statement in Support of Independent Broadcasting Company Counterproposal. Independent Broadcasting Company urged that Channel 4 could be assigned to Des Moines without adversely affecting any existing TV broadcasting station or any assignment proposed by the Commission; that the Commission's priorities would not be affected with the exception of priority 5; and that an additional VHF service would be provided to a substantial area and population.

(q) The counterproposal of Independent Broadcasting Company would result in the following co-channel separation in Zones I and II:

Channel	City	Mileage	Zone
4	DesMoines-Rock Island, Ia. (WHBF-TV)	158	I
4	Des Moines-Kansas City, Mo.	180	II
4	Des Moines-Vermillion, S. D.	182	II

(r) Oppositions and Conflicting Counterproposals to Independent Broadcasting Company Counterproposal. Rock Island Broadcasting Company opposed Independent counterproposal, and urged that the counterproposal should be denied for the reason that it would create the interference which the Commission has attempted to eliminate in the Third Notice. It was pointed out that WHBF-TV, Rock Island and WOI-TV, Ames, Iowa, now operate on Channel 4. Because of the close spacings of these stations and the resultant interference the Commission in the Third Notice ordered WOI-TV to show cause why its assignment should not be changed to Channel 5. It was urged that since Ames and Des Moines are the same distance from Rock Island, the assignment of Channel 4 to Des Moines would result in the same interference situation which the Commission's Order to Show Cause to WOI-TV was designated to eliminate. The counterproposals of Northwest Broadcasting Company and Davenport Broadcasting Company are mutually exclusive with that of Independent Broadcasting Company.

Conclusions: Des Moines Educational Reservation

548. We believe on the basis of the record that we must deny the request to remove the educational reservation in Des Moines from Channel 11. In light of the evidence introduced by the educational interests in Des Moines, we believe that the educational reservation in that city should be finalized.

549. The request that we change the character of the Ames assignment can not, on the basis of the record, be granted. Iowa State College in securing a license did not secure a non-commercial license requiring it to broadcast non-commercial programs but secured a license giving it the responsibility to determine the commercial or non-commercial character of its programs.[118] We do not believe, on the basis of this record, that we should issue a show cause order which would require WOI-TV to change its classification and become a non-commercial station. In the absence of compelling reasons, we do not believe that educational institutions who secure commercial licenses should be required to change the character of their operation. To adopt a contrary policy would be to discourage educational institutions which do not prefer to operate a fully non-commercial station from entering the television field. Accordingly, we must deny the request to change the classification of the Ames assignment.

550. Moreover, from the record it appears that Des Moines and its immediate surrounding vicinity is the major economic, cultural and social center of the State of Iowa. The fact that different educational programs may be simultaneously available in the same area from WOI-TV and a non-commercial educational television station in Des Moines is not necessarily undesirable since it increases the number of program choices as does the presence of several stations in a given city. In addition, it is shown in the engineering statement in the Central Broadcasting filing that Station WOI-TV operating with the maximum power

[115] The Independent Broadcasting Company, as part of a counterproposal to assign an additional VHF channel to Des Moines, also urged the change in reservation from VHF Channel 11 to a UHF channel in Des Moines.

[116] Central Broadcasting Company filed a Motion to Strike the statement of Iowa State College of Agriculture and Mechanical Arts on the grounds that the statement signed by counsel was not sworn to. The Iowa State College of Agriculture and Mechanic Arts filed an opposition to the Motion to Strike saying that the document was intended as a brief under the meaning of Paragraph 5(f) of the Order of Hearing Procedure of July 25, 1951; that it was filed early on September 24, 1951, rather than on October 29, 1951, the last filing date; that the brief is in support of an engineering statement which has been sworn to and that, therefore, since it is a brief under the meaning of Paragraph 5(f) it need not be sworn to. Attached to their opposition to the Motion to Strike, the attorneys for the Iowa State College of Agriculture and Mechanical Arts filed an amendment to "Statement on Behalf of Iowa State College of Agriculture and Mechanical Arts in Support of Commission Allocation Plan" to delete the word "Statement" where it appears in the caption of said brief and wherever it appears capitalized in the body of said brief and substitute in lieu thereof the word "Brief." In view of the amendment submitted by the College the Motion to Strike is DENIED. The "Statement" objected to has been considered only as a Brief.

[117] Atalissa, a community of 240 persons, is 50 miles from Davenport. The counterproposal proposed a transmitter site at Durant, approximately 30 miles from Davenport.

contemplated by the Commission's proposal and operating with its presently licensed antenna height could provide Grade A service to but 45% of the City of Des Moines.

551. In view of the foregoing, the counterproposals of Cowles Broadcasting Company, Central Broadcasting Company, Murphy Broadcasting Company, and Davenport Broadcasting Company, are denied. Furthermore, with respect to the counterproposal of Davenport Broadcasting Company, we do not believe the assignment of a VHF channel to the city of Atalissa by the deletion of a VHF assignment in Des Moines, a much larger city, is warranted.

Conclusions: Additional VHF Assignment in Fort Dodge and Des Moines

552. The Northwest Broadcasting Company counterproposal would result in three co-channel separations below the 190 mile minimum for Zone II. Channel 5 would be asigned at Vermillion, 170 miles from Hastings and 175 miles from Station WOI-TV at Ames; and Channel 4 would be assigned to Fort Dodge, 176 miles from Minneapolis. Accordingly, the Northwest Broadcasting Company counterproposal is denied.

553. The Independent Broadcasting Company counterproposal would result in one co-channel separation below the 170-mile minimum for assignments in Zone I and two co-channel separations below the 190-mile minimum for Zone II. Channel 4 would be assigned to Des Moines, 158 miles from Station WHBF-TV in Rock Island in Zone 1 and 180 and 182 miles, respectively, from Kansas City, Missouri and Vermillion, both in Zone II. Accordingly, the Independent Broadcasting Company counterproposal is denied.

Conclusions: Show Cause Order

554. In view of the foregoing, an appropriate authorization will be issued to Iowa State College to specify operation of WOI-TV on Channel 5.

Final Assignments and Reservation

555. The following assignments and reservation are adopted:

City	VHF Channel No.	UHF Channel No.
Ames	5	25
Des Moines	8,*11,13	17,23
Fort Dodge		21

KEOKUK, IOWA; QUINCY, ILLINOIS; AND HANNIBAL, MISSOURI

556. (a) **Proposed Assignments.** In the Third Notice the Commission proposed the following assignments:

City	VHF Channel No.	UHF Channel No.
Keokuk, Iowa		44
Quincy, Illinois	10	21
Hannibal, Missouri	7	27

(b) **Census Data.** The population of Keokuk, Iowa, is 16,000. The population of Quincy, Illinois, is 41,000. The population of Hannibal, Missouri, is 21,000.

(c) **Counterproposal of Keokuk Broadcasting Company.** Keokuk Broadcasting Company requested that Channel 10 be assigned to Keokuk. The assignment of Channel 10 to Keokuk would be accomplished by the deletion of Channel 10 from Quincy, Illinois, the substitution of Channel 7 in Quincy and the deletion of Channel 7 from Hannibal, Mo., as follows:

City	Third Notice		Proposed Changes	
	VHF Channel No.	UHF Channel No.	VHF Channel No.	UHF Channel No.
Keokuk, Iowa		44	10†	44
Quincy, Illinois	10	21	7†	21
Hannibal, Mo.	7	27	†	27

(d) **Statement in Support of Keokuk Broadcasting Company Counterproposal.** Keokuk Broadcasting Company urged that the deletion of Channel 7 from Hannibal would not deprive that city of television service because of the assignment of UHF Channel 27 to Hannibal. It was also asserted that Hannibal would receive Grade A service from the VHF assignment at Quincy, 15 miles from Hannibal. Further, it is urged that the assignment of Channel 10 to Keokuk would provide a substantial number of persons with a first VHF service. It was also contended that the assignment of Channel 10 to Keokuk and the assignment of Channel 7 to Quincy comply in all respects with the standards adopted herein. Finally, it was urged that a more extensive coverage would be rendered by a station located in Keokuk on Channel 10 than would be rendered by Channel 7 at either Quincy or Hannibal.

(e) **Opposition to Keokuk Broadcasting Company Counterproposal.** The Courier Post Publishing Company, Hannibal, Missouri, opposed the Keokuk counterproposal urging that Hannibal, a city of 20,540 persons is a separate competitive market from Quincy which has a population of 41,402 persons, and that a grant of the counterproposal would deprive Hannibal of its only VHF assignment. Further, it was pointed out that Hannibal and Quincy are located in separate Counties and States and each is also considered the principal city of separate retail trading areas. It was also urged that under the Commission's proposed assignments the City of Keokuk would receive two Grade A services from Keokuk and Fort Madison and that 70% of the City of Keokuk would receive a third service from Channel 10 proposed for Quincy.

Conclusions

557. It is our view that, on the basis of the record, the counterproposal of Keokuk Broadcasting Company should be denied. A grant of this counterproposal would deprive the City of Hannibal, a larger city than Keokuk, of its sole VHF channel in order to add a first VHF channel to Keokuk and a second assignment to that city. Accordingly, the counterproposal of Keokuk Broadcasting Company is denied.

Final Assignments

558. The following assignments are adopted:

City	VHF Channel No.	UHF Channel No.
Keokuk, Iowa		44
Quincy, Illinois	10	21
Hannibal, Missouri	7	27

DUBUQUE, IOWA

559. (a) **Proposed Assignments.** In the Third Notice the Commission proposed the following assignments to Dubuque: UHF Channels 56 and 62.

(b) **Census Data.** The City of Dubuque has a population of 50,000.

(c) **Counterproposal of The Telegraph Herald.** The Telegraph Herald, Dubuque, Iowa, proposed that VHF Channels 5 and 11 be assigned to Dubuque with less than maximum power to protect other co-channel and adjacent channel stations. This counterproposal would require no other changes in the proposed assignments in the Third Notice.

(d) **Statement in Support of Telegraph Herald Counterproposal.** The Telegraph Herald urged that the operation of UHF stations in Dubuque would present serious economic obstacles. It was urged that operation on Channels 5 and 11 with powers below that proposed in the Third Notice would afford protection to co-channel stations to the same extent as stations with maximum facilities operating at the required minimum spacings. Specifically, it was urged that powers of 46.7 kw on Channel 5 and 87 kw on Channel 11 be authorized for stations in Dubuque. It was further urged that a grant of the counterproposal would provide a first VHF service to a substantial area.

(e) The counterproposal would result in the following co-channel separations in Zone I below the 170-mile minimum:

Channel 5 Dubuque, Ia.-Chicago (WNBQ), 162 miles.
Channel 11 Dubuque, Ia.-Chicago, 161 miles.

The counterproposal, in addition, would result in the following co-channel separations in Zone II below the 190-mile minimum:

Channel 5 Dubuque, Ia.-Ames, Ia. (WOI-TV), 159 miles.
Channel 11 Dubuque, Ia.-Des Moines, Ia., 164 miles.

(f) **Oppositions and Conflicting Counterproposals to Telegraph Herald Counterproposal.** Oppositions and conflicting counterproposals to the counterproposal of The Telegraph Herald were filed by the following parties: Central Broadcasting Co., Davenport, Iowa, The National Broadcasting Company, Chicago, Illinois, the Johnson-Kennedy Radio Corporation, Chicago, Illinois; Iowa State College, Ames, Iowa; and the Davenport Broadcasting Company, Davenport, Iowa.

Conclusions

560. Elsewhere in this Report the Commission has set forth the basis for its decision not to create a special class of stations authorized to operate with reduced power at reduced separations. In view of that decision and for the reasons therein stated the request of The Telegraph Herald is denied.

Final Assignments

561. The assignment of UHF Channels 56 and 62 in Dubuque, Iowa, are adopted.

SIOUX CITY, IOWA EDUCATIONAL RESERVATION

562. **Proposed Reservation.** In the Third Notice the Commission proposed the reservation of Channel 30 in Sioux City for non-commercial educational use.

563. The JCET, the Mayor of Sioux City, the City Council and other local educational groups, supported the reservation of Channel 30 in Sioux City. No party objected to the reservation.

Conclusions

564. In view of the foregoing, the reservation of Channel 30 in Sioux City for non-commercial educational use is finalized.

IOWA CITY, IOWA EDUCATIONAL RESERVATION

565. (a) **Proposed Reservation.** In the Third Notice the Commission proposed the reservation of Channel 2 in Iowa City for non-commercial educational use.

(b) The State University of Iowa supported the reservation of VHF Channel 2 in Iowa City for non-commercial educational television use. The University stated that it has engaged in non-commercial broadcasting since 1919; that a separate building has been constructed for radio broadcasting and the annual operation budget for its broadcast activities was $50,000. The University stated that from 1932 to 1938 the University regularly scheduled television programs from an experimentally licensed transmitter and that it has, for the past two years, organized and presented weekly programs from Station WOC-TV, Davenport, Iowa. The University further stated that television facilities are available and that it has begun construction of a Communications Center and that it has a completely outfitted motion picture production laboratory including ten motion picture cameras. The University submitted a detailed listing of suggested program material for use on the proposed educational television station. No one has objected to the reservation of VHF Channel 2.

(c) Quad - City Broadcasting Corp., Moline, Illinois, Davenport Broadcasting Company,[119] Davenport, Iowa, and Champaign News-Gazette, Inc., Champaign, Illinois, proposed the reservation of a VHF channel other than VHF Channel 2 for Iowa City in connection with counterproposals for additional VHF assignments in their respective cities.[120] The Commission elsewhere in this Report granted the request made by Campaign News-Gazette, Inc., which proposed as part of its over-all plan the reservation of VHF Channel 12 in lieu of the proposed reservation of VHF Channel 2 in Iowa City.

Conclusions

566. On the basis of the foregoing and the record, the reservation of Channel 12 in Iowa City for non-commercial use is finalized.

[119]Elsewhere in this Report the Commission denied the counterproposals of Quad-City Broadcasting Corp. and Davenport Broadcasting Company.

[120]The State University of Iowa on October 8, 1951, filed with the Commission a Motion to Strike portions of the statements of Hugh R. Norman and Walter F. Kean filed on behalf of Davenport Broadcasting Company, Incorporated. In these statements, the affiants introduce as a new proposal the use of a UHF channel for educational use at Iowa City whereas the initial counterproposal of May 7, 1951, did not contain this proposal. Paragraphs 5(b) and 6 of the Order of Hearing Procedure of July 25, 1951, clearly indicate that the Commission will not consider any sworn statements which are not in support of the initial pleadings. The Motion to Strike is therefore GRANTED. With respect to the sworn statements filed on behalf of Davenport Broadcasting Company, Incorporated, the Commission has not considered for the reasons given above, as evidence properly before it, the evidence relating to this new proposal. The Commission has, however, considered such evidence contained therein which is in support of its counterproposal in this proceeding.

[119]The allegations concerning the representations with respect to its programming are irrelevant to these proceedings.

ST. JOSEPH, ST. LOUIS AND SPRINGFIELD, MISSOURI: EDUCATIONAL RESERVATION

567. (a) **Proposed Reservations.** In the Third Notice the Commission proposed the following reservations for non-commercial use:

City	VHF Channel No.	UHF Channel No.
St. Joseph, Missouri		*36
St. Louis, Missouri	*9	
Springfield, Missouri		*26

(b) **St. Joseph Educational Reservation.** The School District of St. Joseph supported the reservation of Channel 36 in St. Joseph and submitted a resolution of the Board of Education requesting that a television channel be reserved for this city. The JCET, Northeast Missouri State College, Maryville, and St. Benedict's College, Atchison, Kansas, also supported the reservation. No objections to the reservation were filed.

(c) **St. Louis Educational Reservation.** The Mayor's Committee on Educational Television and the Board of Education of the City of St. Louis and JCET supported the reservation of Channel 9 to St. Louis. No objections to the reservation were filed.

(d) **Springfield Educational Reservation.** The Board of Education of the Springfield, Missouri Public Schools, Reorganized Green County District No. 12, Drury College, and Southwest Missouri State College and JCET supported the reservation of Channel 26 to Springfield. No objections to the reservation were filed.

Conclusions

568. In view of the record, the reservations of the foregoing channels for non-commercial educational use are finalized.

Final Reservations

569. The following reservations are adopted:

City	VHF Channel No.	UHF Channel No.
St. Joseph, Missouri		*36
St. Louis, Missouri	*9	
Springfield, Missouri		*26

MINNEAPOLIS-ST. PAUL, MINNESOTA: EDUCATIONAL RESERVATION

570. (a) **Proposed Reservations.** In the Third Notice the Commission proposed the reservation of VHF Channel 2 in Minneapolis-St. Paul for non-commercial educational use.

(b) **Minneapolis-St. Paul Educational Reservation.** The University of Minnesota, the Minneapolis Public Schools, the College of St. Catherine, the City of St. Paul, the Saint Paul Public Library and the JCET supported the reservation. These institutions expressed their willingness to cooperate with other educational institutions in the area with respect to non-commercial educational television. No objections were filed to the proposed reservation.

Conclusions

571. On the basis of the record, the reservation of Channel 2 in Minneapolis-St. Paul for non-commercial educational use is finalized.

GREEN BAY AND MILWAUKEE, WISCONSIN

572. (a) **Proposed Assignments and Reservation.** In the Third Notice the Commission proposed the following assignments and reservation:

City	VHF Channel No.	UHF Channel No.
Green Bay	6	
Milwaukee	4,*10,12	19,25,31

(b) **Census Data.** The standard metropolitan area of Milwaukee has a population of 871,000. The City of Milwaukee has a population of 637,000. The standard metropolitan area of Green Bay has a population of 98,000. The City of Green Bay has a population of 53,000.

(c) **Existing Station.** The Journal Company is licensed for the operation of Station WTMJ-TV in Milwaukee on Channel 3. The licensee was ordered to show cause why the license of WTMJ-TV should not be modified to specify Channel 4 in lieu of Channel 3. The licensee did not file any opposition to the show cause order.

(d) **Counterproposal of Green Bay Newspaper Company.** The Green Bay Newspaper Company requested the additional assignment of VHF Channel 2 to Green Bay. No other changes in the assignments proposed in the Third Notice were requested.

(e) **Statement in Support of Green Bay Newspaper Company Counterproposal.** Green Bay Newspaper Company urged that assignment of Channel 2 to Green Bay would provide a fair, efficient and equitable distribution of television facilities; that the assignment of Channel 2 to Green Bay conforms fully with the Commission's standards and serves the priorities set forth in the Third Notice; and that the additional assignment of Channel 2 could be obtained without depriving any city of a proposed assignment under the Commission's Third Notice. Further, it was asserted that there are no cities or metropolitan areas to the west, north or east of Green Bay within approximately 200 miles which have a population greater than Green Bay; that the nearest city larger than Green Bay is Milwaukee, approximately 100 miles to the south; and that the Green Bay community is the second largest distribution and jobbing outlet and the third largest retail center in Wisconsin. The distance between Green Bay and Chicago, the nearest city where Channel 2 is proposed to be assigned, is 182 miles. The nearest adjacent channel assignment proposed is Channel 3 to Madison, Wisconsin, 121 miles from Green Bay.

(f) **Joint Counterproposal of the Wisconsin Broadcasting System, Inc. and Hearst Radio, Inc. and the Counterproposal of Milwaukee Broadcasting Company.** The Wisconsin Broadcasting System, Inc., and Hearst Radio, Inc., filed a joint counterproposal and the Milwaukee Broadcasting Company filed an identical counterproposal requesting the assignment of Channel 6 to Milwaukee by deleting it from Green Bay and substituting Channel 2 to replace Channel 6 in Green Bay as follows:

City	Third Notice VHF Channel No.	Third Notice UHF Channel No.	Proposed Changes VHF Channel No.	Proposed Changes UHF Channel No.
Green Bay	6		2†	
Milwaukee	4,*10,12	19,25,31	4,6†,10,12	*,†,121,19,25,31

(g) The assignment of Channel 6 in Milwaukee would result in a 167 mile co-channel separation between Milwaukee and Station WOC-TV at Davenport, Iowa in Zone I.

(h) **Statement in Support of Wisconsin Broadcasting System, Inc. and Hearst Radio, Inc. and Milwaukee Broadcasting Company Counterproposals.** It was urged that Section 3.606 of the Commission's Rules assign Channels 3, 6, 8 and 10 to Milwaukee; that under the Third Notice, however, the Commission proposed to assign VHF Channels 4, 10 and 12 to Milwaukee with Channel 10 reserved for non-commercial educational use; and that the result under the Commission's proposed assignments is to leave available for applicants only Channels 12, 19, 25 and 31.[123] It was urged that the restoration of Channel 6 in Milwaukee and the assignment of Channel 2 to Green Bay would satisfy the requirements of the Commission's rules and standards in relation to the assignments proposed for other communities under the Third Notice. It was also contended that the assignments proposed in the Third Notice are inadequate to meet the pressing and immediate needs for competitive commercial television service; and that the assignment to Milwaukee of only two VHF channels for commercial use will extend for an additional and considerable period of time the adverse effects upon competition which presently exist in Milwaukee. Further, it was stated that there are 258,000 VHF receivers in the hands of the public in Milwaukee. Finally, it was urged that because of the population, size and economic importance of Milwaukee, it is one of the key economic links in every chain of television broadcast stations for network service.

(i) **Opposition to Wisconsin Broadcasting System, Inc. and Hearst Radio, Inc. and Milwaukee Broadcasting Company counterproposals.** Oppositions to the Milwaukee counterproposal[122] have been filed by WJIM, Inc., Lansing, Michigan, and Central Broadcasting Company, Davenport, Iowa, on the grounds of interference to existing Stations WJIM-TV and WOC-TV, respectively. It was urged that the assignment of Channel 6 to Milwaukee would result in interference to these existing stations.

(j) Station WOC-TV is presently operating on Channel 5 in Davenport and the Commission has proposed that WOC-TV be shifted to Channel 6. WJIM-TV is licensed to operate on Channel 6 in Lansing, Michigan, and the Commission has proposed no change in the licensed frequency of that station. The separations between the City of Milwaukee and the cities of Lansing and Davenport are 171 and 170 miles respectively. The separations between the City of Milwaukee and the present transmitter sites of WOC-TV and WJIM-TV are 167 and 173 miles, respectively. It was asserted by the Milwaukee parties that it would be possible to locate a station in Milwaukee on Channel 6 which would meet the minimum required co-channel separation between transmitters of 170 miles. It was claimed by Central Broadcasting Company that although the Commission proposed to move WOC-TV from Channel 5 to Channel 6 in order to eliminate interference, the counterproposal of the Milwaukee parties would result in the interference situation which the Commission's proposal would avoid.

(k) **The Milwaukee Educational Reservation.** The Milwaukee Educator's Committee on Television and the Milwaukee Vocational and Adult Schools supported the reservation of VHF Channel 10 at Milwaukee, Wisconsin. The Milwaukee Educator's Committee on Television comprises the Mayor, City of Milwaukee, Wisconsin State College, University of Wisconsin (Milwaukee Extension Division), Milwaukee Public Schools and Milwaukee Vocational and Adult Schools. Numerous civic, religious, labor and business organizations and the State Radio Council of Wisconsin also supported the reservation. The Board of Vocational and Adult Education of Milwaukee passed a resolution supporting the reservation and instructed the director of the Milwaukee Vocational and Adult Schools to file a statement with the Commission which contained the following points: (1) The Board was prepared to cooperate in developing local educational television programs; (2) the Director was authorized to make a survey of all pertinent facts which relate to the proposed television station; (3) the Board was prepared on the basis of favorable and conclusive findings to assume the responsibility for the construction of such a station, provided that it was assured by the cooperating bodies, or by the city, that costs of operation would be equitably shared according to a formula to be agreed upon before construction was ordered. Pending the outcome of the survey the Board stated that it "will very probably earmark a sum sufficiently large to begin such work as can be undertaken and completed in the next fiscal year, provided the Federal Communications Commission thinks well of the proposal of the Board to build a station on its property in Milwaukee and will reserve the use of VHF Channel 10 for the proposed station." The Milwaukee Educator's Committee on Television submitted a detailed listing of proposed television programs designed for class room use and adult education. The Milwaukee Vocational and Adult Schools stated it could "legally raise all the funds needed to build a television station."

(l) **Oppositions to the Educational Reservation.** Wisconsin Broadcasting System, Inc., and Hearst Radio, Inc. proposed to increase the number of commercial VHF channels in Milwaukee from two to four by proposing to add

[121] Channel not specified.

[122] At the "freeze" date, one VHF channel had been assigned (WTMJ-TV) and Wisconsin Broadcasting, Hearst Radio, and Milwaukee Broadcasting Company (WEMP), were in hearing and had petitioned the Commission for immediate grant of their non-competing applications for the remaining three VHF channels.

[123] Music Broadcasting Company, Grand Rapids, Michigan, opposed the Milwaukee counterproposal since it conflicted with its counterproposal. Elsewhere in this decision we have denied the counterproposal of Music Broadcasting Company for the reasons there stated.

VHF Channel 6 and by proposing to shift the proposed reservation to the UHF. The parties stated that substantial public interest in having immediate and effective competition among local and network services required the recommended changes. Hearst Radio stated the Board of Vocational and Adult Education was not in a position, financially or otherwise, to construct and operate an educational television station. Hearst Radio stated further that if Channel 10 were reserved there was no prospect of any additional VHF service in Milwaukee for an indefinite, and in any event a considerable period of time. It was contended that competition for the one remaining VHF channel would prevent the possibility of an additional VHF station for some time to come. Hearst Radio stated that the educators did not claim they would be unduly prejudiced by reason of the fact that there are no UHF receivers in the Milwaukee area. It was claimed that the Board of Vocational and Adult Education would not have to pioneer in the UHF field since a commercial applicant has applied for a UHF channel, and by the time the Board was ready to build and operate an educational station, there would be a substantial number of UHF receivers in the area.

Conclusions: Milwaukee Educational Reservation

573. We do not believe, on the basis of the record, that the reservation of VHF Channel 10 should be changed. The educational interests in Milwaukee have shown a strong interest in establishing a non-commercial educational station and they have presented a concrete plan for the establishment of such a station. The Milwaukee Vocational and Adult Schools are confident that the taxes reserved to them by state law will enable them to raise the funds necessary for the construction of a station. The Milwaukee Educators' Committee on Television demonstrated that the educators are working together to solve the problems that must be faced in the establishment of a non-commercial educational station. The educators have made it clear that the finalization of the reservation of VHF Channel 10 is one of the steps required before the educators can proceed with their plans for the establishment of an educational station. The reservation of VHF Channel 10 would still leave available for commercial interests one VHF and three UHF channels which have not yet been assigned.[124] No legal right or preference to a commercial VHF channel inures to Hearst Radio and Wisconsin Broadcasting by reason of their past participation in a hearing for assignment of VHF channels in Milwaukee which was not carried to completion due to the "freeze." We believe the opinion of the Commission issued on December 12, 1951, in connection with the requests for oral hearing of Daily News Television Company, et al., makes clear that the Commission, in a proceeding such as this, may change the assignment of VHF channels in Milwaukee under the circumstances presented. Accordingly, on the basis of the record, the counterproposal of the Wisconsin Broadcasting System, Inc., and Hearst Radio, Inc., to change the reservation from VHF Channel 10 to a UHF channel, is denied; and the reservation of VHF Channel 10 for non-commercial educational television use in Milwaukee, Wisconsin is finalized.

Conclusions: Green Bay and Milwaukee

574. The counterproposal to add VHF Channel 2 to Green Bay in addition to VHF Channel 6 is mutually exclusive with those of the Milwaukee parties to add VHF Channel 6 to Milwaukee by deleting it from Green Bay. It is our view that the record does not support the addition of a 4th channel to Milwaukee in preference to a second VHF channel for Green Bay. The City of Green Bay is a large commercial center with diversified businesses and industries and the record supports the need of this area for a second assignment.

575. In addition, the assignment of VHF Channels 2 and 6 to Green Bay are in accordance with our standards adopted herein. On the other hand, the counterproposal of the Milwaukee parties would require a deviation from our rules and standards. Elsewhere in this decision we have determined that for purposes of creating new assignments the minimum separation between a city and an existing authorized transmitter shall be 170 miles. The distance between WOC-TV and Milwaukee, however, is only 167 miles.

576. In view of the foregoing, the counterproposals of the Milwaukee Broadcasting Company and the joint counterproposal of the Wisconsin Broadcasting Company, Inc. and the Hearst Radio, Inc., are denied, and the counterproposal of the Green Bay Broadcasting Company is granted.

Conclusions: WTMJ Show Cause Order

577. An appropriate authorization will be issued to the Journal Company to specify operation of WTMJ-TV on Channel 4 in Milwaukee.

Final Assignment and Reservations

578. The following assignments and reservations are adopted:

City	VHF Channel	UHF Channel
Green Bay, Wis.	2, 6	
Milwaukee, Wis.	4, *10, 12	19, 25, 31

WISCONSIN EDUCATIONAL RESERVATIONS

579. (a) **Proposed Reservations.** In the Third Notice the Commission proposed the following educational reservations in the State of Wisconsin:

City	Channel No.
Eau Claire	*19
La Crosse	*32
Madison	*21
Marinette	*38
Milwaukee[125]	*10
Duluth, Minn.-Superior	*8

(b) **Eau Claire.** Wisconsin State College, Eau Claire, and the JCET supported the reservation of UHF Channel 19. Wisconsin State College stated it was prepared to cooperate in any state-wide program of television service which the people of Wisconsin might establish. No objections were made to the proposed reservation.

(c) **La Crosse.** La Crosse State College and JCET supported the reservation of UHF Channel 32. The College stated that it has supported the development of radio as an educational tool; that it has encouraged the establishment of the state radio FM network; and that it has worked for the effective use of radio in the schools of the La Crosse area. The College stated it was ready to cooperate in any state-wide program of television service which the people of Wisconsin might decide to establish. No objections were made to the proposed reservation.

(d) **Madison.** The University of Wisconsin supported the reservation of Channel 21 for Madison. The University stated that it had taken steps to design a system of educational television transmission throughout the state and to incorporate television program study in its courses.

(e) **Counterproposal of Radio Wisconsin, Inc.** Radio Wisconsin, Inc., proposed that the educational reservation in Madison be shifted from UHF Channel 21 to VHF Channel 3. In the Third Notice the Commission had proposed to assign VHF Channel 3 and UHF Channels 27 and 33 for commercial television and to reserve UHF Channel 21 for non-commercial educational television. Radio Wisconsin urged that the public is best served when several broadcasting stations with equal transmission facilities are compelled to compete for their audiences on the basis of the quality of the programs they broadcast; that such equality promotes the financial health of all the broadcasters and eliminates the probability of marginal operation (financially and programwise) which would exist if one station had superior facilities compared with the other stations in the same community; and that such equality for commercial broadcasters could be brought about in Madison by placing the three commercial assignments in the UHF band and shifting the reservation to VHF Channel 3.

(f) **Oppositions to Radio Wisconsin Counterproposal.** This proposal of Radio Wisconsin was opposed by Monona Broadcasting Company, and Badger Broadcasting Company. These parties contended that commercial interests were in a position to make use of the VHF channel immediately while its reservation would result at best in substantial delay in its use; and that better use of the channel would be made programwise by commercial interests. It was further stated that intermixture of VHF and UHF was supported by the Commission. Monona Broadcasting stated that Wisconsin Broadcasting's principle, if valid, would have to be applied generally and a broad revision of the assignment plan would be required.

(g) **Marinette.** The Wisconsin State Radio Council supported the reservation for non-commercial use of Channel 38 for Marinette. No objections were made to the proposed reservation.

(h) **Duluth, Minn. — Superior, Wis.** The JCET supported the reservation of Channel 8 for Duluth-Superior. The JCET pointed out that the following educational institutions would be served by an educational television station in the area: College of Saint Scholastica, Duluth; Ely Junior College, Eveleth Junior College, Hibbing Junior College, Itasca Junior College, Virginia Junior College, Ashland County Normal School, Northland College, and State College, Superior, Wisconsin. No objections were made to the proposed reservation.

(i) **Racine.** The Racine Public Library filed a sworn statement requesting the reservation of a channel for non-commercial educational television use at Racine, Wisconsin. The Public Library stated that the reservation of a channel at Milwaukee did not provide for effective community participation in the Racine-Kenosha area. It was contended that the needs of the area would be better met by the reservation of a UHF channel at Racine. No specific channel was requested. Incorporated in the statement filed by the Library were letters from various educational and labor organizations. No objections were filed to this proposal.

(j) **Support and Counterproposal of Wisconsin State Radio Council.** The Wisconsin State Radio Council supported the Commission's proposal to reserve six channels for non-commercial educational television use in the State of Wisconsin. While supporting the Commission's proposal the State Radio Council stated that the six channels proposed for reservation were inadequate to provide a state-wide non-commercial educational television service. Accordingly, the Radio Council requested six additional channel reservations to meet the educational needs of the State. The University of Wisconsin at Madison, Wisconsin, supported the State Radio Council in its request that six additional channels be reserved for non-commercial educational television use. An engineering study conducted by the Radio Council indicated that a network of twelve stations would be needed to provide at least Class B service throughout Wisconsin. These could be interconnected and operated simultaneously through the establishment of twelve microwave relay stations. The Radio Council estimated that the proposed twelve station network could be constructed for less than $3,000,000 and stated that this sum is but a fraction of the total amount invested in educational plant and equipment in the State. The Wisconsin State Radio Council at Madison, Wisconsin, is a policy-making, administrative and executive board created by the 1945 State legislature to "plan, construct, and develop a state system of radio broadcasting for the presentation of educational, informational and public service programs." The Governor of Wisconsin has designated the Council as the appropriate agency to "take action to acquaint the Commission with the desire of the State of Wisconsin to have channels reserved for educational use." The Council, as an indication of its interest in educational broadcasting, pointed to its operation of an educational network of two AM stations and six FM stations with two additional FM stations under construction. No objections were made to the proposed additional six reservations.

Conclusions: Eau Claire, La Crosse, Marinette, Duluth, Minn.— Superior, Wisconsin

580. On the basis of the record the proposed reservation of the following channels for non-commercial educational use are finalized:

City	Channel No.
Eau Claire	*19
La Crosse	*32
Marinette	*38
Duluth, Minn.-Superior, Wis.	*8

[124] See also the discussion of the educational reservation in Boston.

[125] The Milwaukee educational reservation is discussed above.

Conclusions: Madison

581. It is our view that the counterproposal of Radio Wisconsin, Inc., requesting that the educational reservation in Madison be shifted from UHF Channel 21 to VHF Channel 3 should be denied. We do not believe that the arguments advanced by Radio Wisconsin, Inc., for the assignment of all commercial stations in the UHF outweigh such other important factors, as wide VHF coverage, which have led to the adoption of our general policy concerning the reservation of VHF channels for non-commercial educational stations. We have proposed the assignment of only one VHF channel to Madison; and in light of the fact that the educational interests in that community have not requested the reservation of that VHF channel for non-commercial educational use and have made no showing with respect to the utilization of a VHF channel we do not believe the record supports the shifting of the educational reservation to the only VHF channel in Madison. Accordingly, the counterproposal of Radio Wisconsin, Inc., is denied, and the reservation of Channel 21 in Madison for noncommercial educational use is finalized.

Conclusions: Additional Reservations in Wisconsin

582. On the basis of the record we believe the Wisconsin State Radio Council's counterproposal should be granted. Accordingly, the following additional reservations of channels for use by noncommercial educational stations have been made in the State of Wisconsin:

City	UHF Channel No.
Shell Lake	*30
Park Falls	*18
Wausau	*46
Adams	*58
Chilton	*24
Richland Center	*66

Conclusions: Racine

583. In light of the action taken above finalizing the reservation of six channels proposed for non-commercial educational use in the Third Notice (including VHF Channel 8 at Milwaukee, approximately 20 miles from Racine) and making available six additional assignments for such use, the Commission believes that adequate provision has been made for non-commercial educational television in Wisconsin. Accordingly, the request from the Racine Public Library is denied.

Final Reservations

584. The following reservations are finalized in Wisconsin:

City	Channel VHF No.	Channel UHF No.
Eau Clair		*19
La Crosse		*32
Madison		*21
Marinette		*38
Milwaukee	*10	
Duluth, Minn.-Superior, Wis.	*8	
Shell Lake		*30
Park Falls		*18
Wausau		*46
Adams		*58
Chilton		*24
Richland Center		*66

COLUMBIA, MISSOURI: EDUCATIONAL RESERVATION

585. (a) **Proposed Assignments and Reservation.** In the Third Notice the Commission proposed 3 channels.. for Columbia: VHF Channel 8 and UHF Channels 16 and 22. Columbia was designated as a "primarily educational center" and the Commission proposed the reservation of Channel 8 for non-commercial educational use.

(b) **Counterproposal of University of Missouri.** The University of Missouri requested that the Commission authorize "commercial operation on the channels reserved for educational institutions to an amount equal to 50% of the broadcast day." The sworn statement of the University again requested partial commercialization of the channel but made no reference to the degree of commercialization desired.

(c) **Statements in Support of University of Missouri Counterproposal.** The University stated that funds for the construction of a station would be available but that funds for the maintenance and operation of the station would not be available for an indefinite period. The Radio Committee of the University, after conferences with state officials, was convinced the State Legislature would not authorize the operation of the television station at State expense and that funds from commercial programs must be used for the television operation. The University stated that unless the Commission permits partial commercialization for non-profit operation it would have no alternative but to apply for a commercial station. The University stated that it did not desire to operate a commercial station for profit but preferred rather to operate a partially commercial non-profit station. The University stated that if the station were permitted to commercialize partially so that it could telecast programs originated by one of the major networks the station would have a sufficient variety of programs to make it attractive to the viewers and thus be able to hold an audience against competing commercial stations. The University also stated that if partial commercialization were permitted it would intersperse commercial programs between educational programs; that it proposed to inaugurate a series of educational programs in agriculture, domestic science, farm management, animal husbandry, horticulture, music, music appreciation, the dramatic arts, sciences, and other programs of an educational nature which might from time to time be desirable; and that in order to make the educational programs of the station most effective and to cover the various phases of education, high schools and nearby colleges would be solicited to prepare and present educational programs if the proposed station should become a reality.

(d) Stephens College, Columbia, supported the proposal of the University of Missouri. The College stated that although it did not intend to operate a television station it was interested in a television station from the point of view of using it as a significant teaching aid.

(e) No party affirmatively supported the proposed reservation of Channel 8 for non-commercial educational use.

(f) **Opposition of KFRU, Inc., Columbia, Missouri.** KFRU opposed the request of the University for partial commercial operation on VHF Channel 8 on the grounds that such an operation would give the University unfair competitive advantages over a commercial licensee, and stated it had no objection to the reservation of Channel 8 for non-commercial educational use.[126]

Conclusions

586. We have above in another portion of this Report denied the request of the University of Missouri that the Commission authorize partial or limited commercial operation on channels reserved for use by educational stations. There is no evidence or support in the record for the reservation of a channel in Columbia for use by a non-commercial educational station. On the contrary, the University of Missouri stated that it wishes to operate on Channel 8 as a commercial station if it cannot operate in a partial or limited commercial manner. The University cannot under these circumstances be given any preferential treatment by way of a reservation but will be required to compete equally with applicants for commercial channels. Accordingly, the counterproposal of the University of Missouri is denied, and, in view of the foregoing, the educational reservation is deleted and Channel 8 is assigned to Columbia for commercial use.

Final Assignments

587. The following assignments are adopted:

City	VHF Channel No.	UHF Channel No.
Columbia	8	16,22

KANSAS CITY, MISSOURI AND LAWRENCE, KANSAS

588. (a) **Proposed Assignments and Reservations.** In the Third Notice the Commission proposed the following assignments and reservations:

City	VHF Channel No.	UHF Channel No.
Lawrence, Kansas	*11	17
Kansas City, Mo.	4,5,*9	19,25

(b) **Census Data.** The Kansas City standard metropolitan area has a population of 814,000 and the City of Kansas City has a population of 457,000. The City of Lawrence has a population of 23,000.

(c) **Existing Stations.** Kansas City Star Company is licensed for the operation of Station WDAF-TV, Kansas City, on Channel 4.

(d) **The Lawrence Educational Reservation.** The University of Kansas, Lawrence, supported the reservation of VHF Channel 11 in Lawrence for non-commercial educational use. The University stated it was resolved to provide an educational television service. It stated that it had made careful analysis of cost, personnel, programming, equipment, opportunities for educational service, and financial resources; that it had pioneered in the use of closed-circuit television in its Medical Center; and that the sources which it could draw upon included eleven schools, sixty-eight departments, ten divisions, a thousand teachers, and a supporting staff of an additional thousand. The University also stated that its Bureau of Lectures and Concert Artists furnished during the year over three thousand programs to four hundred communities, and that its Bureau of Visual Instruction, as one of the great film libraries of America, has furnished more than twenty thousand educational film programs in response to requests from all over the nation. As further evidence of its interest in educational broadcasting, the University stated that it has operated radio station KFKU since 1924 and that the University's FM station KANU was scheduled to go on the air in January 1952 as a full time 10,000 watt station. It was also stated that in June 1951 a new division, University of Kansas Radio, was formed, a full-time Director of Radio appointed and the full-time staff for radio doubled. Plans were also approved for two new studios in addition to those already used for broadcasting. The University stated that its resources make it possible for television to be properly financed; and that in the fiscal year of 1951-1952 it was operating on a budget of $13,000,000 with additional funds of $10,000,000 recently allocated for the construction of new buildings. While the University acknowledged that the 1951 Legislature did not appropriate specific funds for an educational television station, evidence was submitted indicating that the University had other sources of funds, such as gifts and endowments, which in 1950 were more than $1,000,000. It was also stated that the Kansas State Board of Regents, the governing body of the University, on April 20, 1951, authorized the University to apply for a license to operate a television station. The University said that engineering surveys have been prepared, that a University Committee on Television has been formed, and that "plans are going forward swiftly for the establishment of a television station soon after approval is granted by the F.C.C."

[126]The Board of Curators of the University of Missouri filed with the Commission Motions to Strike the entire affidavit of H. J. Waters, Jr., filed on behalf of KFRU, Inc., for the reason that it is hearsay; if the Commission does not strike the entire affidavit, the Board moved that certain portions of the affidavit be stricken for the reasons that it is opinion testimony not supported by any facts, that the statements are conclusions of the affiant, and that the statements are irrelevant and immaterial to the issues in this proceeding. A Motion to Strike is directed against the entire affidavit of A. D. McLarty filed on behalf of KFRU, Inc., for the reason that the statements are immaterial and irrelevant to the issues in this proceeding. KFRU, Inc., filed with the Commission a Reply to the Motions to Strike negativing the objections raised by the Board of Curators. The Motions to Strike are DENIED since they go only to the weight to be given to the evidence and not to its admissibility, materiality, and competency as evidence in this proceeding. KFRU, Inc., on October 15, 1951, filed with the Commission a Motion to Strike all or certain parts of the affidavit of Lester E. Cox, Member of the Board of Curators of the University of Missouri, and of the verified letter of Homer P. Rainey, filed on behalf of the University of Missouri on the grounds that they are irrelevant, immaterial and unsupported conclusions. Further objection is made to the affidavits of Mr. Cox and Mr. Rainey for the reason that the sworn statements deal with a proposal for limited commercial operation by educational stations, a matter relating to Appendix A of the Third Notice, while University of Missouri in its initial Comments did not direct its statements to Appendix A. On October 29, 1951, the Board of Curators filed a reply to the Motion to Strike. The Board of Curators of the University of Missouri on July 16, 1951, filed with the Commission a request to amend its comments of May 7, 1951, to also refer to Appendix A of the Third Notice. Further, the sworn statements of Mr. Cox and Mr. Rainey of September 24, 1951, are consistent with the initial comments of the Board of Curators. The other objections to the statements involved go only to the weight of the evidence and not to its admissibility. The Motion to Strike is therefore DENIED.

The University stated that a UHF channel would not be desirable as a substitute for the proposed VHF assignment since it believed that UHF at the present time could not provide the desired service coverage required by the needs of the area; that of the hundreds of thousands of sets in use in the area few, if any, were equipped for UHF reception; that since the citizens of Kansas City, Missouri, also claim the University of Kansas as their University it was its intent to use its proposed television station to provide service not only to a large portion of the population of Kansas, but also to metropolitan Kansas City, Missouri. The University submitted a detailed list of suggested television programs under the categories of Medicine and Public Health, Science, Education, Home Economics and Miscellaneous. The University's statement included letters of support for its proposed educational television station from civic, educational and religious groups. (Lawrence, Kansas was designated as a "primarily educational center".)

(e) **Counterproposal of the Midland Broadcasting Company, KCMO Broadcasting Company and WHB Broadcasting Co.** The Midland Broadcasting Company, KCMO Broadcasting Company and WHB Broadcasting Company filed an opposition to the reservation of VHF Channel 11 for educational purposes at Lawrence and a joint counterproposal for the assignment of that channel to Kansas City by making the following changes in the assignments proposed by the Commission in the Third Notice:

City	Third Notice VHF Channel No.	Third Notice UHF Channel No.	Proposed Changes VHF Channel No.	Proposed Changes UHF Channel No.
Lawrence, Kansas	*11	17	†	*17,64†
Kansas City, Mo.	4,5,*9	19,25	4,5,9,11†	*19,25

Midland individually proposed the assignment of Channel 11 to Kansas City by its deletion at Lawrence and the interchange of Channels 2 and 9 between St. Joseph and Kansas City, as follows:

City	Third Notice VHF Channel No.	Third Notice UHF Channel No.	Counterproposal VHF Channel No.	Counterproposal UHF Channel No.
Lawrence, Kansas	*11	17	†	*17,64†
Kansas City, Mo.	4,5,*9	19,25	2†,4,5,11†	*19,25
St. Joseph, Mo..	2	30,*36	9†	30,*36

(f) The assignment of Channel 11 to Kansas City would result in a co-channel separation in Zone II between Kansas City and Des Moines, Iowa, of 180 miles. The minimum separation for co-channel assignments in this zone is 190 miles.

(g) **Statement in Support of Midland Broadcasting Company, et al., Counterproposal.** It was asserted that VHF Channel 11 could not be successfully used now by the University of Kansas, primarily for the reason that it has no public funds for acquiring and maintaining a television station; and stated that the only educational bodies or institutions which could apply for and use VHF Channel 11 were the public school system of Lawrence or the University of Kansas. It was submitted that the revenues of the public school system of Kansas were inadequate to permit that body to incur the large expense necessary to construct and operate a non-commercial educational television station in Lawrence. As regards the University of Kansas, the petitioners stated that the University is a State institution supported by biennial appropriations made by the Legislature of the state of Kansas whose appropriations for the University for 1951 and 1952 contain no provisions for funds that could legally be used for the construction and operation of a non-commercial educational station. It was stated that the next regular session of the legislature of Kansas at which appropriations for the University of Kansas would be made will not convene until January 1953. Accordingly, it was contended the reservation of VHF Channel 11 for non-commercial educational use in Lawrence, Kansas, will inevitably result in non-use of said channel in the foreseeable future. It was stated that UHF Channel 17 now assigned for commercial use in Lawrence, Kansas, could not now be successfully used for commercial telecasting since no dealer or distributor of television receiving equipment in this area has available converters or other equipment necessary to adapt existing television sets to receive a UHF television broadcast service. It was stated that by the time the University of Kansas, or any other educational body in Lawrence, Kansas, could obtain funds with which to build and operate a television station, a sufficient number of receivers equipped to receive UHF telecasts would then be in this area thus making the utilization of this channel feasible and practical for non-commercial educational television use.[127]

[127]Midland Broadcasting Company, WHB Broadcasting Company and KCMO Broadcasting Company filed with the Commission a joint Motion to Strike certain portions of the evidence of the University of Kansas filed with the Commission on October 15, 1951, in support of the proposal to reserve Channel 11 for non-commercial educational use in Lawrence, Kansas.

The Motion to Strike is directed against material written by and derived from third parties, including all of Page 12 and Page 13, and Exhibit E in its entirety, on the ground that such material does not comply with paragraphs 5 and 6 of the Order of Hearing Procedure and is hearsay. The Motion to Strike is DENIED. The material is admitted for the limited purpose of establishing the resources of the University for television.

The Motion to Strike is directed also against such portions of Exhibit B, Page 11 of the brochure, that refer to authorization of Deane W. Malcott, as Chancellor of the University of Kansas, to make application for a TV radio license, on the ground that it appears from the brochure that Deane W. Malcott has been succeeded by Franklin D. Murphy as Chancellor of said University, and it does not appear that Deane W. Malcott is now authorized to act as Chancellor of said University. The Motion to Strike is DENIED. The material objected to is admissible for the purpose of establishing the intention of the University at the time of preparation of the brochure.

The Motion to Strike is also directed against certain other portions of the brochure on the grounds that the statements are irrelevant, immaterial and conclusionary matter unsupported by facts. The Motion to Strike is DENIED. The objection goes only to the weight to be given to the evidence in this proceeding and not to its admissibility.

On October 30, 1951, KCMO Broadcasting Company filed with the Commission a Motion to Strike Exhibit No. 1, a sworn statement of Arthur B. Church, President of Midland Broadcasting Company, contained in the "Written Testimony in Support of Supplemental Petition of Midland Broadcasting Company" filed with the Commission on September 17, 1951. Exhibit No. 1 is devoted to the television application plans of Midland Broadcasting Company. The reason advanced for the Motion to Strike is that Exhibit No. 1 is wholly inappropriate to these proceedings in that it is an unfair attempt to aggrandize and build up a private and special position for the petitioner in the minds of the Commissioners and the Commission staff. The Motion to Strike is DENIED. There is nothing in the Third Notice of Further Proposed Rule Making or in the Order of Hearing Procedure of July 25, 1951, which precludes the offering of testimony such as is given in Exhibit No. 1. The Motion to Strike goes only to the weight to be given to the evidence and not to its admissibility.

(h) **Alternate Counterproposal of the Midland Broadcasting Company and WHB Broadcasting Company.** The Midland Broadcasting Company and WHB Broadcasting Company requested the assignment of a fourth VHF assignment to Kansas City, Mo., by making the following changes in the assignments proposed by the Commission in the Third Notice:

City	Third Notice VHF Channel No.	Third Notice UHF Channel No.	Counterproposal VHF Channel No.	Counterproposal UHF Channel No.
Pittsburg, Kansas	7	38	12†	38
Joplin, Missouri	12	30	9†	30
Kansas City, Missouri	4,5,*9	19,25	2†,4,5,7†	*19†,25
St. Joseph, Mo.	2	30,*36	9†	30,*36

(i) The foregoing changes in the assignments proposed in the Third Notice would result in the following co-channel separations in Zone II.

Channel 12 Pittsburg, Kan.-Hutchison, Kan., 181 miles.

Channel 9 Joplin, Mo.-St. Joseph, Mo., 185 miles.

Channel 7 Kansas City-Omaha, Nebr., 166 miles.

Channel 7 Kansas City-Hannibal, Mo., 178.5 miles.

(j) **Statement in Support of Alternate Midland and WHB Counterproposal.** It was urged that because of its size and importance Kansas City should be assigned at least four VHF assignments; that the counterproposal has no effect on the Commission's priorities of allocation except priority 5; and that no community loses an assignment as a result of the counterproposal. It was recognized that the counterproposal would result in the assignment of VHF Channel 7 to Kansas City at a distance of 166 miles from Omaha, Nebraska and 178.5 miles to Hannibal. It was urged, however, that Channel 7 could be assigned to a community in the Kansas City metropolitan area such as Grandview, Missouri, which is 180 miles from Omaha and Hannibal. Grandview, Missouri, has a population of 1,556 and is 14.5 miles south of Kansas City, Missouri, and within that metropolitan area. It was contended that the assignment of Channel 7 to Grandview, Missouri, would serve the Kansas City area with signal strength values equal to or greater than those proposed in Appendices A and B for urban service.

(k) **Oppositions to the Midland and WHB Alternate Counterproposal.** Oppositions to the alternate joint counterproposal were filed by KFEQ, Inc., St. Joseph, Missouri; the Courier Post Publishing Company, Hannibal, Missouri; Four States Broadcasters, Inc., Joplin, Missouri; KFAB Broadcasting Company, Omaha, Nebraska, and Pittsburg Broadcasting Company, Inc., Pittsburg, Kansas. The counterproposal also conflicts with the counterproposal of WKY Radiophone Company, Oklahoma City, Oklahoma.

(l) **The Kansas City Educational Reservation.** Midland, *et al*, proposed that UHF Channel 19 be reserved for non-commercial educational use in lieu of VHF Channel 9. The JCET made the same proposal. The JCET proposal was based on the statements of the University of Kansas City, Missouri, and the Board of Education of the School District of Kansas City, Missouri, requesting that "the Commission release for commercial use in Kansas City VHF Channel 9 in the final allocation table of the Commission, and that one of the UHF channels to be allocated to Kansas City be reserved for educational use. . . ."

Conclusions: Lawrence, Kansas Educational Reservation

589. On the basis of the record, the Commission finds that the University of Kansas has demonstrated its interest in establishing a non-commercial educational television station in Lawrence, which has been designated as a "primarily educational center." We are not able, on the basis of the record, to find that the University will not have the funds necessary to construct and operate a non-commercial educational television station. In view of the record, the Commission believes that strong encouragement should be given to the efforts of the University to construct an educational facility at the earliest date. The Commission in its Third Notice recognized the fact that educational institutions of necessity needed a longer period of time to prepare for television than did commercial interests. It was for this reason that the reservation principle was adopted. The Commission believes that the reasons for the reservation of a channel for education purposes are particularly applicable here. Moreover, a grant of the Midland, *et al.* counterproposal would result in a co-channel station separation between Kansas City and Des Moines on Channel 11 of 180 miles in Zone II for which a minimum of 190 miles was established.

590. Accordingly, the joint petition of the Midland Broadcasting Company, KCMO Broadcasting Company, and WHB Broadcasting Company, and the individual request of Midland are denied; and the reservation of VHF Channel 11 at Lawrence, Kansas, for non-

commercial educational television use is finalized.

Conclusions: Kansas City Educational Reservation

591. On the basis of the record, the Commission accepts the proposal of the parties that UHF Channel 19 be reserved for non-commercial educational television use and that VHF Channel 9 be assigned for commercial use at Kansas City, Missouri.

Conclusions: Additional VHF Assignment in Kansas City

592. It is our view that the record does not warrant a grant of the joint counterproposal of Midland Broadcasting Company and WHB Broadcasting Company for the assignment of a fourth VHF channel in Kansas City. As a result of our decision herein, Channel 19 has been reserved for non-commercial educational use in lieu of Channel 9 and Channel 9 has been retained in Kansas City as a commercial VHF station. Accordingly, our decision assigns 3 commercial VHF channels to Kansas City with a UHF channel reserved for non-commercial educational use and two UHF channels assigned for commercial use. A grant of the request for the assignment of a fourth VHF channel to Kansas City would require a deviation from the minimum mileage separations adopted herein since it would result in co-channel separations of 166 miles between Kansas City and Omaha on Channel 7, 178.5 miles between Kansas City and Hannibal on Channel 7, 181 miles between Pittsburg, Kansas, and Hutchison, Kansas, on Channel 12, and 185 miles between Joplin, Mo., and St. Joseph, Mo., on Channel 9. The minimum assignment separation in this Zone is 190 miles.

593. The request to assign Channel 7 to Grandview constitutes, in effect, a request that the Commission measure the assignment mileage spacings from a specific proposed transmitter site in order to find compliance with our minimum assignment spacing requirements. We have above rejected this manner of measuring the mileage spacings for purposes of making new assignments in the Table. Moreover, the assignment of Channel 7 to Grandview would result in the same number of violations of the minimum co-channel separation requirements in Zone II, as are set forth in paragraph 592 above.

594. In view of the foregoing, the counterproposal of the Midland Broadcasting Company and the WHB Broadcasting Company is granted in so far as it requests that Channel 19 be reserved for non-commercial educational use in lieu of Channel 9 in Kansas City, and is denied in all other respects.

Conclusions: Additional Channel for Kansas City

595. We are of the view that the assignment of an additional channel in Kansas City is warranted on the basis of the record.[128] It was above noted that the counterproposals requesting additional VHF channels for Kansas City could not be granted. UHF Channel 65 in Kansas City would meet the required mileage spacings for channel assignments in this Zone. Accordingly, Channel 65 will be added to Kansas City, Mo.

[128]See also our discussion above in connection with the addition of a UHF channel to Pittsburg.

Final Assignments and Reservations

596. The following assignments and reservations are adopted:

City	VHF Channel No.	UHF Channel No.
Lawrence, Kansas	*11	17
Kansas City, Mo.	4,5,9	*19,25,65

MANHATTAN, KANSAS EDUCATIONAL RESERVATION

597. (a) **Proposed Reservation.** In the Third Notice the Commission proposed the reservation of VHF Channel 8 for non-commercial educational use in Manhattan.

(b) Kansas State College of Agriculture and Applied Science at Manhattan supported the reservation asserting that it proposed to utilize Channel 8 for non-commercial educational television station as far as conditions made such a step possible. It stated that an application would be filed if the rules governing non-commercial educational stations as adopted by the Commission permit construction within the College's budget and present facilities. The College stated that it had available most of the equipment, facilities, and finances for such a station, noting that it has held an experimental television station license since 1932. The Office of Education of the Diocese of Salina, Belleville, Kansas, and the JCET also supported the reservation. No oppositions to the proposed reservation were filed.

Conclusions

598. In view of the foregoing the reservation of Channel 8 for non-commercial educational use at Manhattan is finalized.

TOPEKA, KANSAS, EDUCATIONAL RESERVATION

599. (a) **Proposed Reservation.** In the Third Notice the Commission proposed to reserve UHF Channel 48 in Topeka, Kansas for non-commercial educational use.

(b) Washburn Municipal University of Topeka supported the reservation of UHF Channel 48 in Topeka for non-commercial educational use, and submitted a resolution of its Board of Regents stating they were deeply interested in the use of television as an educational medium. The University stated that it would make the necessary arrangements for the establishment of an educational station when UHF is perfected for practical use; if costs are not excessive. No oppositions to the proposed reservation were filed.

Conclusions

600. In view of the foregoing the reservation of UHF Channel 48 for non-commercial educational use in Topeka is finalized.

WICHITA, KANSAS

601. (a) **Proposed Assignments and Reservation.** In the Third Notice the Commission proposed the assignment of 4 channels to Wichita, Kansas: VHF Channels 3 and 10 and UHF Channels 16 and 22, with Channel 22 reserved for non-commercial educational use.

(b) **Census Data.** The Wichita standard metropolitan area has a population of 222,000 and the City of Wichita has a population of 168,000.

(c) **Counterproposals of KFBI, Inc., and Taylor Television & Radio Corporation.** KFBI, Inc. and Taylor Television & Radio Corporation, both of Wichita, filed counterproposals seeking to add VHF Channel 6 to Wichita, Kansas. This assignment was proposed to be accomplished by changing channels in Dodge City, Kansas; Tulsa, Oklahoma; Lawton, Oklahoma; and Wichita Falls, Texas. Oppositions were filed to this counterproposal by Cameron Television, Inc., Tulsa, Oklahoma, and Wichtex Radio & Television Company, Wichita Falls, Texas. However, on July 11, 1951, KFBI, Inc. and Taylor Radio & Television Corporation withdrew their request for the VHF Channel 6 in Wichita, and it will not be discussed further in this Report.

(d) **Counterproposal of Wichita Beacon Broadcasting Company.** Wichita Beacon Broadcasting Company, Wichita, Kansas, requested the additional assignment of UHF Channels 45 and 53 to Wichita.

(e) **Statement in Support of Wichita Beacon Broadcasting Company Counterproposal.** Wichita Beacon Broadcasting Company asserted that the City of Wichita has a population of over 166,000; that six broadcasting stations are presently operating in that community; and that the demand for commercial television frequencies in Wichita will exceed the assignments proposed by the Commission. The addition of two more channels in Wichita, it was submitted, would carry out priority 5 in a rapidly growing area where the demand of frequencies will exceed those proposed by the Commission.

(f) UHF Channels 45 and 53 cannot be utilized in the same community. Since these channels are spaced 8 apart in the spectrum, they must be at least 20 miles apart to prevent I.F. beat interference. UHF Channel 45 at Wichita would be 173 miles from the co-channel assignment at Muskogee, Oklahoma. Both Wichita and Muskogee are situated in Zone II. Consequently, the assignment of UHF Channel 45 in Muskogee would not meet the required 175 mile minimum assignment separation for UHF channels in Zone II. With respect to UHF Channel 53, this assignment in Wichita would be only 166 miles from the co-channel assignment at Shawnee, Oklahoma, which is also located in Zone II. Accordingly, UHF Channel 53 in Wichita also would not meet the required 175 mile minimum assignment separation for UHF channels in Zone II.

(g) **Conflicting Counterproposals and Oppositions to the Wichita Beacon Broadcasting Company Counterproposal.** No oppositions nor conflicting counterproposals to the counterproposal of Wichita Beacon Broadcasting Company have been filed.

(h) **Educational Reservation.** The University of Wichita filed a statement supporting the reservation of UHF Channel 22 in Wichita for non-commercial educational use asserting that it had made preliminary plans for the establishment and operation of a non-commercial educational station. The Department of Education of the Catholic Diocese of Wichita also supported the reservation stating that it expected to work out an arrangement with the University of Wichita, the public school system of Wichita, the county school system and other private schools in the area. The JCET also filed a statement in support of the reservation. No oppositions to the reservation of UHF Channel 22 in Wichita were filed.

Conclusions: Educational Reservation

602. In view of the foregoing, the reservation of UHF Channel 22 in Wichita for non-commercial educational use is finalized.

Conclusions: Additional UHF Channels

603. Wichita Beacon Broadcasting Company has requested that UHF Channels 45 and 53 be added to Wichita. UHF Channels 45 and 53 cannot be employed in the same community since they must be, under the requirements adopted herein, at least 20 miles apart to avoid I.F. Beat interference. Moreover, neither Channel 45 nor Channel 53 would meet the required 175-mile minimum co-channel assignment spacing for UHF channels in Zone II. UHF Channel 45 would be only 173 miles from the co-channel assignment in Muskogee, and UHF Channel 53 would be only 166 miles from the co-channel assignment at Shawnee. The counterproposal of Wichita Beacon Broadcasting Company must therefore be denied.

Final Assignment and Reservation

604. The following assignments and reservation are adopted:

City	VHF Channel No.	UHF Channel No.
Wichita, Kansas	3,10	16,*22

NORTH DAKOTA EDUCATIONAL RESERVATIONS

605. (a) **Proposed Reservations.** In the Third Notice the Commission proposed the following reservations for non-commercial educational use in North Dakota:

City	Channel No.
Bismarck	*24
Dickinson	*17
Fargo	*34
Grand Forks	*2
Minot	*6
Williston	*34

(b) **Bismarck.** The Board of Education of the City of Bismarck and JCET supported the reservation of UHF Channel 24 at Bismarck. The Board of Education asked that the channel be reserved for educational use until such time as the Bismarck Public Schools, either alone or in cooperation with other educational institutions, were able to establish and maintain an educational television station. No objections to the reservation were filed.

(c) **Dickinson.** The Dickinson State Teachers College, the Board of Education, Dickinson and JCET supported the reservation of Channel 17 at Dickinson. Dickinson State Teachers College stated that it was prepared to cooperate in the utilization of this channel with all the educational institutions in the area. The Board of Education in its sworn statement requested the reservation of the channel in anticipation of its use at some future date for educational television by the Board alone, or in cooperation with the other educational institutions in the area. No objections to the reservation were filed.

(d) **Fargo.** The JCET supported the reservation of Channel 34 and asked that the reservation be made final. The Board of Education of the City of Fargo requested that an educational channel be reserved until the Board of Education either alone or in cooperation with other educational institutions, is able to establish and maintain an educational television station for the people of the state.

Concordia College, Moorehead, Minnesota, which is located close to Fargo, stated it was in favor of reserving a generous number of channels for non-commercial educational use and stated that it hoped to be in a position to engage in television. No objections to the reservation were filed.

(e) **Grand Forks.** The University of North Dakota filed a sworn statement in support of the reservation of Channel 2 at Grand Forks. The University stated that it was the intent of the University to apply for a license to operate a station. The University stated it intended to initiate appropriate steps to secure the necessary appropriation to provide for the construction of an educational television station. No objections to the reservation were filed.

(f) **Minot.** The JCET supported the reservation of Channel 6 at Minot and asked that it be finalized. No objections to the reservation were filed.

(g) **Williston.** Williston School District No. 1 and JCET supported the reservation. The School District stated that there was a likelihood that the Williston area would increase greatly in population as a result of recent oil exploitations. This factor was expected to develop a greater need for educational television in the area. The School District further stated it wanted to be in a position to make use of television as a valuable teaching device and as a means of reaching scattered school buildings. No objections to the reservation were filed.

Conclusions

606. On the basis of the record, the reservation of the following assignments for non-commercial educational use are finalized:

City	Channel No.
Bismarck	*24
Dickinson	*17
Fargo	*34
Grand Forks	*2
Minot	*6
Williston	*34

SOUTH DAKOTA EDUCATIONAL RESERVATIONS

607. (a) **Proposed Reservations.** In the Third Notice the Commission proposed the following reservations for non-commercial educational use in South Dakota:

City	Channel No.
Brookings	*8
Pierre	*22
Sioux Falls	*44
Vermillion	*2

(b) **Brookings.** The Board of Education Brookings City Schools supported the reservation of Channel 8 in Brookings. No objections to the reservation were filed.

(c) **Pierre.** The Pierre Independent School District supported the reservation of Channel 22. No objections to the reservation were filed.

(d) **Sioux Falls.** Augustana College supported the reservation of a channel in Sioux Falls, but requested that VHF Channel 11 or 13, assigned to Sioux Falls for commercial use, be reserved for education instead of a UHF channel. The College stated that since all operating television stations were now in the VHF band the utilization of the UHF band appeared to be entirely in the experimental stage.

(e) **Opposition of Midcontinent Broadcasting Company.** The Midcontinent Broadcasting Company, Sioux Falls, South Dakota, supported the Commission's assignments for Sioux Falls and objected to the proposal of Augustana College to shift the reservation to a VHF channel. Midcontinent stated that Augustana College's proposal was apparently predicated upon a mistaken belief that UHF channels were merely in an experimental stage at the present time, and that it might be some time before operation in the UHF became technically feasible. It was urged that the plans of this College of some 800 students for utilization of television as an educational facility were so indefinite and far in the future that a UHF television facility would be more appropriate for such operation.

(f) **Vermillion.** The University of South Dakota and JCET supported the reservation of VHF Channel 2. The University stated that it was investigating the possibility of the cooperative ownership and operation of a television station together with other educational institutions. The University stated it would take steps to utilize the channel as soon as it deemed it advisable and as soon as money was available. No objection to the reservation were filed.[129]

Conclusions

608. On the basis of the record, the proposed reservation of the foregoing assignments for non-commercial educational use are finalized. The Commission is not persuaded on the basis of the record that the educational reservation in Sioux Falls should be made in the VHF rather than in the UHF as proposed in the Third Notice. We find no reason in the record to depart from our general policy with respect to the reservation of VHF channels for use by non-commercial educational stations.

Final Reservations

609. The following reservations are finalized:

City	Channel No.
Brookings	*8
Pierre	*22
Sioux Falls	*44
Vermillion	*2

OMAHA AND LINCOLN, NEBRASKA

610. (a) **Proposed Assignments and Reservations.** In the Third Notice the Commission proposed the following assignments and reservations:

City	VHF Channel No.	UHF Channel No.
Lincoln	10,12	*18,24
Omaha	3,6,*7	16,22,28

(b) **Census Data.** The standard metropolitan area of Omaha has a population of 366,000 and the City of Omaha has a population of 251,000. The standard metropolitan area of Lincoln has a population of 120,000 and the City of Lincoln has a population of 99,000.

(c) **Existing Stations.** May Broadcasting Company is licensed for operation of station KMTV, Omaha, on Channel 3. Radio Station WOW, Inc., is licensed for operation of station WOW-TV, Omaha, on Channel 6.

(d) **The Omaha Educational Reservation.** The JCET supported the reservation of VHF Channel 7. The School District of Omaha, Nebraska, in a comment dated April 19, 1951, stated that it supported the reservation of VHF Channel 7. However, it filed no evidence in support of its comment.

(e) **Opposition of KFAB Broadcasting Company to VHF Reservation.** KFAB Broadcasting Company, Omaha, requested that the educational reservation be moved from VHF Channel 7 to the UHF. KFAB submitted letters from officials of educational institutions concerning the intentions of these institutions with respect to the construction and operation of a television station in the event the Commission reserved VHF Channel 7. In these letters the following statements were made: The University of Omaha stated through its President that it did not plan to file an application for VHF Channel 7 because the required expenditure was beyond its means and recommended that VHF Channel 7 be released for commercial operation. The University further stated that its needs would be satisfied by one of the UHF channels if at some future time it could render an effective full-time educational television service. A letter dated May 18, 1951, from the School District of Omaha to the KOWH Broadcasting Company, Omaha, Nebraska, said in part: "We are practical enough to know that the schools in this community can never support a television station nor a broadcasting station of their own." The School District said further: "We have taken the position that we are interested in non-commercial television service. We doubt whether this will ever be available for our use." The School District also stated that their comment to the Commission of April 19, 1951, was "merely to protect our rights in being able to appear before the Federal Communications Commission on matters of telecasting."

(f) **The Lincoln Educational Reservation.** The University of Nebraska and the JCET supported the reservation of UHF Channel 18 in Lincoln for use by a non-commercial educational station. The Board of Regents of the University stated it was investigating the possibilities of the use of this channel for educational televising. No objection was filed to the reservation.

(g) **Counterproposal of KFAB Broadcasting Company.** KFAB Broadcasting Company requested that VHF Channel 12 be assigned to Omaha by deleting it from Lincoln as follows:

City	Third Notice		Counterproposal	
	VHF Channel No.	UHF Channel No.	VHF Channel No.	UHF Channel No.
Omaha, Nebraska	3,6,*7	16,22,28	3,6,7†,12†	16,22,28
Lincoln, Nebraska	10,12	*18,24	10,†	*18,24,44†

(h) **Statement in Support of KFAB Counterproposal.** KFAB Broadcasting Company urged that its counterproposal would result in service to more people; that it would be consistent with the priorities, and that it would meet the required co-channel station separations. It was further urged that the area which would lose service as a result of the operation of Channel 44 in Lincoln in lieu of Channel 12 would receive other service from Channel 10 in Lincoln and that parts of this area would receive from 3 to 12 other UHF and VHF services.

(i) **Oppositions to KFAB Counterproposal.** The Lincoln Broadcasting Corporation and the Inland Broadcasting Company, both of Lincoln, supported the proposed assignments for Lincoln and opposed the KFAB Broadcasting Company counterproposal for the deletion of Channel 12 from Lincoln and the replacement thereof with a UHF channel. The opposition to the counterproposal urged the need for a second VHF channel in Lincoln. It was stated that Lincoln is the capital city and the second largest city in the State of Nebraska; that the Grade B coverage of a UHF channel would be substantially less than that of a VHF channel; and that the area is largely rural and needs the wide coverage of a VHF channel. It was also pointed out in the opposition that the grant of the KFAB counterproposal would result in the assignment of only one VHF channel in Lincoln which would give the licensee of that station a dominant position in the Lincoln area and could create a monopoly situation. Further it was pointed out that a grant of the KFAB counterproposal would result in the assignment to Omaha of four times as many VHF channels as Lincoln, although the population of Omaha is only 2½ times the population of Lincoln.

Conclusions: The Omaha Educational Reservation

611. On the basis of the record we cannot conclude that the reservation of a VHF channel in Omaha for non-commercial educational use is warranted. No local educational interest offered evidence in support of the reservation of a VHF channel in Omaha for non-commercial educational use. The only evidence of record indicated that the educational interests in Omaha do not intend to use a VHF channel for a non-commercial educational station. On the other hand, commercial interests have made clear their intention of proceeding with the construction and operation of a station in the event that VHF Channel 7 is made available for commercial use. We are, however, in light of the evidence indicating the interest of the educational institutions in Omaha in using a UHF channel for educational purposes, of the view that the record warrants the reservation of a UHF channel in Omaha. Accordingly, VHF Channel 7 is assigned to Omaha for commercial use, and UHF Channel 16 is assigned to Omaha and reserved for non-commercial educational use.

Conclusions: The Lincoln Educational Reservation

612. On the basis of the record, the reservation of UHF Channel 18 for non-commercial educational use in Lincoln is finalized.

Conclusions: Additional VHF Assignments in Omaha

613. We do not believe that the addition of a fourth VHF channel to Omaha at the expense of delet-

[129] The Northwest Broadcasting Company, Fort Dodge, Iowa, proposed to substitute VHF Channel No. 5 for VHF Channel 2 at Vermillion as part of its proposal to add VHF Channel 5 to Fort Dodge, Iowa. The Independent Broadcasting Company, Des Moines, Iowa, proposed to substitute VHF Channel 4 for VHF Channel 2 at Vermillion, as part of its proposal to add VHF Channel 4 to Des Moines. Elsewhere in this Report the Northwest Broadcasting Company and Independent Broadcasting Company counterproposals have been denied.

ing the second VHF channel from Lincoln is warranted. This is especially true in view of our action making available a third commercial VHF channel to Omaha. Accordingly, the request of KFAB[130] for the assignment of Channel 12 to Omaha is denied.

Final Assignments and Reservations

614. The following assignments and reservations are adopted:

City	VHF Channel No.	UHF Channel No.
Lincoln, Nebraska	10,12	*18,24
Omaha, Nebraska	3,6,7	*16,22,28

FORT SMITH AND LITTLE ROCK, ARKANSAS

615. (a) **Proposed Assignments and Reservations.** In the Third Notice the Commission proposed the following assignments and reservations:

City	VHF Channel No.	UHF Channel No.
Fort Smith, Ark.	5	*16,22
Little Rock, Ark.	*2,4,11	17,23

(b) **Census Data.** Fort Smith has a population of 48,000.

(c) **Counterproposal of Southwestern Publishing Company.** Southwestern Publishing Company requested the additional assignment of VHF Channel 8 to Fort Smith, by making the following changes in the assignments proposed in the Third Notice:

City	Third Notice VHF Channel No.	Third Notice UHF Channel No.	Counterproposal VHF Channel No.	Counterproposal UHF Channel No.
Fort Smith, Arkansas	5	*16,22	5,8†	*16,22
Muskogee, Oklahoma	8	39,*45	11†	39,*45

(d) **Statement in Support of Southwestern Publishing Co. Counterproposal.** Southwestern Publishing Company stated that its counterproposal complies with the Commission's standards; that a grant of the counterproposal would not result in a loss of service elsewhere; and that a station operating on Channel 8 at Fort Smith would provide an additional commercial television VHF service in Arkansas and Oklahoma. It was also urged that Arkansas with a population of 1,909,511 as compared to 2,233,351 in Oklahoma has been assigned only 38 channels as compared to 54 channels which have been assigned to Oklahoma.

(e) The counterproposal of Southwestern Publishing Company would result in the following co-channel assignment separations in Zone II:

Channel	Cities	Mileage
11	Muskogee, Okla.-Lawton, Okla.	188
11	Muskogee, Okla.-Little Rock, Ark.	188

(f) **Conflicting Counterproposals to the Southwestern Publishing Company Counterproposal.** The counterproposal of Southwestern Publishing Company is mutually exclusive with the counterproposals of All Oklahoma Broadcasting Company and Southwestern Sales Corp., Tulsa, and KTOK, Inc., Oklahoma City.

(g) **Fort Smith Educational Reservation.** The Fort Smith Public Schools, the Arkansas State Department of Education and the JCET supported the reservation of UHF Channel 16 at Fort Smith for non-commercial educational use. No objection was filed to the reservation.

(h) **Little Rock Educational Reservation.** The JCET, Arkansas State Teachers College, Conway, Arkansas, and the Arkansas State Department of Education supported the reservation of VHF Channel 2 at Little Rock. No objection was made to the reservation.

Conclusions: Educational Reservations

616. In view of the foregoing the proposed reservations for Fort Smith and Little Rock are finalized.

Conclusions: Additional VHF Assignment to Fort Smith

617. A grant of the Southwestern Publishing Company counterproposal would result in a co-channel assignment separation of 188 miles between Muskogee and Little Rock. This separation would be in violation of the minimum co-channel assignment separation requirements in Zone II. The counterproposal must therefore be DENIED.[131]

Final Assignments and Reservations

618. The following assignments and reservations are adopted:

City	VHF Channel No.	UHF Channel No.
Fort Smith, Ark.	5	*16,22
Little Rock, Ark.	*2,4,11	17,23

FAYETTEVILLE, ARKANSAS, EDUCATIONAL RESERVATION

619. **Proposed Reservation.** In the Third Notice the Commission proposed the reservation of Channel 13 in Fayetteville for non-commercial educational use as a primarily educational center. The JCET supported the reservation and stated that the University of Arkansas at Fayetteville was studying the financial, programming, legal, and engineering requirements necessary for the establishment and operation of a television station in cooperation with other educational institutions in the area. The Arkansas State Department of Education also supported the reservation stating that it would cooperate with these educational institutions that would operate a non-commercial educational station in Fayetteville. No oppositions to the proposed reservations were filed.

Conclusions

620. In view of the foregoing, the reservation of Channel 13 in Fayetteville for non-commercial educational use is finalized.

NORMAN, MUSKOGEE, ENID AND STILLWATER, OKLAHOMA, EDUCATIONAL RESERVATIONS

621. (a) **Proposed Assignments and Reservations.** In the Third Notice the Commission proposed the following reservations for non-commercial educational use:

City	Channel
Norman, Oklahoma	*37
Muskogee, Oklahoma	*45
Enid, Oklahoma	*27

No channel was proposed to be reserved in Stillwater for non-commercial educational use.

(b) **Norman.** The University of Oklahoma, Norman, and the Oklahoma Baptist University, Shawnee, Oklahoma, and the JCET supported the reservation of UHF Channel 37 at Norman. The University of Oklahoma stated that it was a pioneer in the field of educational radio broadcasting; and that "a considerable lapse of time must pass before we are fully prepared not only to file for an educational television station but also plan for the installation and operation of such a station on a scale comparable with better commercial operations in this field." While desirous of a reserved VHF channel, the University requested that the reservation of UHF Channel 37 for Norman, Oklahoma, be made final. No objection was filed to the reservation of UHF Channel 37.

(c) **Muskogee.** Northeastern State College, Tahlequah, Oklahoma, and JCET supported the reservation of UHF Channel 45 at Muskogee, Oklahoma. No objection was filed to the proposed reservation.

(d) **Enid.** The JCET supported the reservation of UHF Channel 27 at Enid. No objection was filed to the proposed reservation.

(e) **Stillwater.** Stillwater is the site of the Oklahoma Agricultural and Mechanical College.

(f) In connection with the foregoing proposed reservation of assignments for non-commercial educational use and requests for such reservations, the JCET submitted a resolution of the State Legislature of Oklahoma urging the Commission to reserve such channels in the VHF and UHF as will adequately serve the needs of the State.

Conclusions

622. With respect to the request of the University of Oklahoma for the assignment of a VHF channel to Norman, we have examined the assignments in the area and find that it is impossible to grant the request consistent with the Table of Assignments adopted herein. We must, therefore, deny the request of the University of Oklahoma for the assignment and reservation of a VHF channel for non-commercial educational use in Norman. Accordingly, we are finalizing the reservation of UHF Channel 37 in Norman for non-commercial educational use. With respect to Stillwater, it is our view that an assignment should be made to that city for non-commercial educational use and we are assigning UHF Channel 69 to Stillwater for that purpose. Further, on the basis of the record, we are finalizing the reservations proposed for Muskogee and Enid.

Final Reservations

623. The following reservations are adopted:

City	UHF Channel No.
Norman, Oklahoma	*37
Muskogee, Oklahoma	*45
Enid, Oklahoma	*27
Stillwater, Oklahoma	*69

OKLAHOMA CITY, TULSA AND LAWTON, OKLAHOMA

624. (a) **Proposed Assignments and Reservations.** In the Third Notice the Commission proposed the following assignments and reservations:

City	VHF Channel No.	UHF Channel No.
Oklahoma City, Oklahoma	7,9,*13	19,25
Tulsa, Oklahoma	2,*4,6	17,23
Lawton, Oklahoma	11	*28,34

(b) **Census Data.** The standard metropolitan area of Oklahoma City has a population of 325,000 and the City of Oklahoma City has a population of 244,000. The standard metropolitan area of Tulsa has a population of 252,000 and the City of Tulsa has a population of 183,000. Lawton has a population of 35,000.

(c) **Existing Stations.** WKY Radiophone Company is licensed for the operation of Station WKY-TV on Channel 4 in Oklahoma City. WKY Radiophone Company was ordered to show cause why the license of Station WKY-TV should not be changed to specify Channel 7 in lieu of Channel 4.[132] Cameron Television, Inc., is licensed for the operation of Station KOTV on Channel 6 in Tulsa.

Oklahoma City

625. (a) **Counterproposal of WKY Radiophone Company and Answer to Show Cause Order.** WKY filed an opposition to the Commission's Order to Show Cause and a counterproposal which would permit it to continue operating on Channel 4. The counterproposal of WKY would require the following changes in assignments proposed in the Third Notice:

City	Third Notice VHF Channel No.	Third Notice UHF Channel No.	Counterproposal VHF Channel No.	Counterproposal UHF Channel No.
Muskogee, Oklahoma	8	39,*45	11†	39,*45
Oklahoma City, Okla.	7,9,*13	19,25	4†,7,*13	19,25
Tulsa, Oklahoma	2,*4,6	17,23	2,6,*9†	17,23

(b) **Statement in Support of WKY Counterproposal.** WKY Radiophone Company in its answer to the Commission's Order to Show Cause, and in support of its request, urged that its counterproposal meets the minimum mileage separations for both co-channel and adjacent channel operation with a minimum co-channel separation of 188 miles. It was further stated that there are approximately 92,000 VHF receivers in the WKY-TV service area at the present time, and it was contended

[130] KFAB has claimed the Commission is without power to reserve for educational use channels regularly allocated for general television service. It is not clear whether this objection was directed solely to the proposed reservation of Channel 7 or whether it was directed to the reservation of any channel at all. Insofar as it related to the latter, we have disposed of the contention for the reasons stated in the Commission's decision of July 13, 1951 (FCC 51-709).

[131] It would also create a 188-mile assignment separation between Muskogee and Lawton. This separation would be eliminated by our decision herein shifting Channel 11 from Lawton to Tulsa. In its place, however, would be a 44-mile separation between Tulsa and Muskogee on Channel 11.

[132] On June 25, 1951, WKY filed a petition requesting that the order to show cause be severed from this proceeding and that a formal hearing be held thereon. This petition was dismissed without prejudice as premature by Commission Order (FCC 51-696) of July 11, 1951. In its statement filed in this proceeding on October 15, 1951, WKY stated that if in light of the evidence submitted therein the Commission is not satisfied that the operation of Station WKY-TV should remain on Channel 4, it "renews its Petition heretofore filed and requests the full, complete and fair hearing upon specified issues, to which it is entitled by law and the Commission's Rules and Regulations, prior to the final adoption of any rule or regulation which would preclude the continued operation of WKY-TV on Channel 4."

that if WKY-TV were required to shift to Channel 7, a large number of persons would be compelled to install either new or modified antennas in order to continue to receive service from WKY-TV and that the proposed shift to Channel 7 would result in a disruption of service to the public during the period of conversion. It was also asserted that the cost to the licensee for effecting the change proposed by the Commission would exceed $138,000.

(c) The counterproposal of WKY would result in the following co-channel assignment separations in Zone II:

Channel	Cities	Mileage
11	Muskogee, Okla.-Lawton, Okla.	188
11	Muskogee, Okla.-Little Rock, Ark.	188

(d) Conflicting Counterproposals. The counterproposal of WKY is mutually exclusive with that of KTOK, Inc., Oklahoma City, and All Oklahoma Broadcasting Company, and Southwestern Sales Corp., both of Tulsa.

(e) Counterproposal of KTOK, Inc., Oklahoma City. KTOK, Inc., requested the assignment of Channel 11 to Oklahoma City by making the following changes in proposed assignments:

City	Third Notice VHF Channel No.	Third Notice UHF Channel No.	Counterproposal VHF Channel No.	Counterproposal UHF Channel No.
Dodge City, Kansas	6	23	4†	23
Elk City, Oklahoma	12	15	8†	15
Lawton, Oklahoma	11	*28,34	12†	*28,34
Oklahoma City, Okla.	7,9,*13	19,25	7,9,11†,*13	19,25
Woodward, Oklahoma	8		6†	

(f) Statement in Support of KTOK Counterproposal. KTOK, Inc., stated that Oklahoma City is the capital and largest city of Oklahoma and is centrally located in the state. It was urged that the addition of a VHF channel to Oklahoma City would provide additional television service to 514,470 persons in Central Oklahoma and would provide a net gain of additional television service to substantial number of persons. It was also urged that the co-channel and adjacent channel spacings resulting from a grant of its counterproposal would meet the minimum separations, and that the size and economic importance of Oklahoma City require the assignment of an additional VHF channel.

(g) The KTOK counterproposal would create a 183-mile co-channel separation in Zone II between Woodward, Oklahoma, and Wichita Falls, Texas, on Channel 6. The minimum co-channel station separation for this zone is 190 miles.

(h) Conflicting Counterproposals to the KTOK Counterproposal. The counterproposal of KTOK, Inc., is mutually exclusive with the counterproposal of WKY Radiophone Company and the Southwestern Publishing Company, Fort Smith, Arkansas;[132] Southwestern Sales Company and All Oklahoma Broadcasting Company, both of Tulsa.

(i) The Oklahoma City Educational Reservation. The Oklahoma Agricultural and Mechanical College, Stillwater, Oklahoma, and JCET supported the reservation of VHF Channel 13 at Oklahoma City. The JCET submitted a resolution of the Legislature of the State of Oklahoma urging the reservation of such channels in the VHF and the UHF as will adequately serve the needs of education. No objection was filed to this proposed reservation.

[132] The counterproposal of the Southwestern Publishing Company at Fort Smith, Arkansas, is denied elsewhere in this Report for the reasons there stated.

(b) Statement in Support of All Oklahoma Counterproposal. All Oklahoma Broadcasting Company urged that Tulsa is a large metropolitan area which serves as the trade, service, entertainment and cultural center for eastern Oklahoma and adjoining areas of Kansas, Missouri, and Arkansas; that Tulsa has experienced the largest growth of any city in Oklahoma in the 10 year period since the 1940 census; that the assignment of Channel 11 to Muskogee and Channel 8 to Tulsa would meet the Commission's requirements; and that under the counterproposal, an additional channel and service would be provided to Tulsa with no reduction in the service which would be afforded under the Third Notice. It was urged that the grant of the counterproposal would provide a more fair, efficient and equitable distribution of television facilities than does the Commission's plan.

(c) The All Oklahoma counterproposal would create the following co-channel separations in Zone II below 190 miles:

Channel	Cities	Mileage
11	Muskogee, Okla.-Lawton, Okla.	188
11	Muskogee, Okla.-Little Rock, Ark.	188

(d) Conflicting Counterproposal to All Oklahoma Broadcasting Company Counterproposal. The counterproposal of All Oklahoma Broadcasting Company is mutually exclusive with that of WKY Radiophone Company, and KTOK, Inc., Oklahoma City; Southwestern Sales Company, Tulsa; and Southwestern Publishing Company, Fort Smith, Arkansas.

(e) Counterproposal of Southwestern Sales Corporation. Southwestern Sales Corporation has requested the assignment of Channel 11 to Tulsa by making the following changes in the proposed assignments:

City	Third Notice VHF Channel No.	Third Notice UHF Channel No.	Counterproposal VHF Channel No.	Counterproposal UHF Channel No.
Muskogee, Oklahoma	8	39, *45	†11	39, *45
Tulsa, Oklahoma	2, *4, 6	17, 23	2, *4, 6, †8	17, 23

(f) Statement in Support of Southwestern Sales Counterproposal. Southwestern Sales Corp., Tulsa, Oklahoma, urged that the size, industrial development and strategic location of Tulsa evidenced the need of that community for an additional VHF channel. It was also urged that the additional VHF channel may be assigned to Tulsa without violating the Commission's minimum mileage separation requirements.

(g) The counterproposal of Southwestern Sales would create a 187 mile co-channel separation on Channel 11 between Elk City, Oklahoma, and Lubbock, Texas, in Zone II.

(h) Conflicting Counterproposals to Southwestern Sales Corp. Counterproposal. The counterproposal of Southwestern Sales Corp. is mutually exclusive with the counterproposals of WKY Radiophone Company; Southwestern Publishing Company, Fort Smith, Arkansas;[134] KTOK, Inc., Oklahoma City and All Oklahoma Broadcasting Company, Tulsa.

(i) The Tulsa Educational Reservation. The JCET supported the reservation and submitted a resolution of the Legislature of the State of Oklahoma urging the Commission to reserve such channels in the VHF and the UHF as will adequately serve the needs of education. No objection was made to the proposed reservation.

(j) The Lawton Educational Reservation. The JCET and the State Department of Public Instruction supported the reservation of Channel 28 in Lawton for non-commercial educational use. No oppositions to this reservation were filed.

Conclusions: Additional Assignment to Oklahoma City, Tulsa, and the WKY Counterproposal

627. The foregoing conflicting counterproposals consist of (1) a request by WKY Radiophone Company to retain Channel 4 presently licensed to WKY-TV, (2) requests by various parties seeking the addition of a fourth VHF assignment to Tulsa, and (3) a request seeking a fourth VHF assignment to Oklahoma City.

628. The WKY counterproposal would create a co-channel assignment separation below the adopted 190 mile minimum for Zone II. The distance between Muskogee and Little Rock is 188 miles.[135] The KTOK counterproposal would create one co-channel assignment separation below the minimum on Channel 6 between Woodward, Oklahoma and Wichita Falls, Texas. The distance between these communities is 183 miles. The All Oklahoma counterproposal would create the same separation below the minimum as would the WKY counterproposal.[135] The Southwestern Sales Corp. counterprosal would create one co-channel assignment separation below the minimum between Elk City, Oklahoma and Lubbock, Texas, on Channel 11 of 187 miles. Since the counterproposals of the All Oklahoma Broadcasting Company; KTOK Inc.; Southwestern Sales Corporation; and WKY Radiophone Company would result in co-channel separations below the minimum provided by our decision herein, they are denied.

Conclusions: WKY Show Cause Order

629. Although we are unable to grant the WKY counterproposal, the question remains whether the authorization for WKY-TV should be changed to specify operation on Channel 7 as proposed in the Third Notice. The Order to Show Cause was issued to WKY in an effort to "reduce interference, make available a reasonable number of channels and to effect the maximum utilization of VHF television channels." It was believed that the assignment of Channel 4 in Tulsa instead of Oklahoma City would effect a more desirable utilization of the spectrum. It is true, however, that the assignment of Channel 4 in Oklahoma City would meet all required mileage spacings for Zone II. For example, the closest co-channel assignment separation to WKY-TV on Channel 4 would be Station KRLD-TV operating in Dallas, Texas, at a distance of 196 miles.

630. We have in this proceeding followed the principle that we would not compel an existing licensee to change frequencies except for compelling considerations such as the removal of a very low mileage separation. In view of the circumstances discussed above, and upon reconsideration of the whole record, we do not believe that WKY should be required to change frequencies. Accordingly, we have assigned Channel 4 to Oklahoma City, and are withdrawing the Show Cause Order to WKY. If the assignment of Channel 4 is maintained in Oklahoma City, the assignment of Channel 4 in Tulsa must be deleted, since Tulsa and Oklahoma City are only 98 miles apart. However, Channel 4 can be replaced in Tulsa

[134] WREC Broadcasting Service and WMPS, Inc., both of Memphis, Tenn., have requested the assignment of a fourth VHF channel to Memphis, in alternate counterproposals. The first counterproposal requested the deletion of Channel 3 from Blytheville, Arkansas, and the assignment of that channel to Memphis. The second alternative counterproposal requested 19 VHF changed assignments in 14 cities and 5 states. This second alternative counterproposal is in conflict with the counterproposals of the Tulsa, Oklahoma City and Fort Smith parties. In view of our decision elsewhere in this Report to grant the first alternative request to delete Channel 3 from Blytheville and the assignment of that channel to Memphis, we will not discuss the second alternative counterproposal of WREC and WMPS further in this connection. In addition, the counterproposal of Sherman Television Company, Sherman, Texas, is in conflict with the counterproposal of Southwestern Sales Corporation. In view of our decision elsewhere in this Report to deny the counterproposal of Sherman Television Company, that counterproposal will not be discussed further in this connection.

City	Third Notice VHF Channel No.	Third Notice UHF Channel No.	Counterproposal VHF Channel No.	Counterproposal UHF Channel No.
Elk City, Oklahoma	12	15	†11	15
Lawton, Oklahoma	11	*28, 34	†12	*28, 34
Tulsa, Oklahoma	2, *4, 6	17, 23	2, *4, 6, †11	17, 23

[135] It would also create a 188 mile assignment separation between Muskogee and Lawton. This separation would be eliminated by our decision herein shifting Channel 11 from Lawton to Tulsa. In its place, however, would be a 44 mile separation between Tulsa and Muskogee on Channel 11.

by shifting Channel 11 from Lawton to Tulsa. In turn, Channel 11 in Lawton can be replaced by shifting Channel 7 from Oklahoma City to Lawton. The assignment of Channel 7 in Lawton and Channel 11 in Tulsa would meet the required minimum assignment separations for Zone II. Accordingly, Channel 4 will be deleted from Tulsa and assigned to Oklahoma City; Channel 11 will be deleted from Lawton and assigned to Tulsa; and Channel 7 will be deleted from Oklahoma City and assigned to Lawton.

Conclusions: Educational Reservation in Tulsa

631. We are of the view that the record supports the basis for reserving a channel in Tulsa for noncommercial educational use in Tulsa. In the Third Notice the Commission proposed that Channel 4 be so reserved. However, as noted above, Channel 4 must be deleted from Tulsa in light of our decision to withdraw the order to show cause to WKY. It was also noted above that VHF Channel 11 is being assigned in Tulsa to replace Channel 4. Accordingly, VHF Channel 11 will be reserved for non-commercial educational use in Tulsa.

Conclusions: Educational Reservation in Oklahoma City and Lawton

632. On the basis of the record the reservations of Channel 13 in Oklahoma City and Channel 28 in Lawton for non-commercial educational use are finalized.

Final Assignments and Reservations

633. The following assignments and reservations are adopted:

City	VHF Channel No.	UHF Channel No.
Oklahoma City, Okla.	4, 9, *13	19, 25
Tulsa, Okla.	2, 6, *11	17, 23
Lawton, Okla.	7	*28, 34

MEMPHIS, TENNESSEE, AND BLYTHEVILLE, ARKANSAS

634. (a) **Proposed Assignments and Reservation.** In the Third Notice the Commission proposed the following assignments and reservation:

City	VHF Channel No.	UHF Channel No.
Blytheville, Arkansas	3	64
Memphis, Tennessee	5, *10, 13	42, 48

(b) **Census Data.** The standard metropolitan area of Memphis has a population of 482,000 and the City of Memphis has a population of 396,000. The City of Blytheville has a population of 16,000.

(c) **Existing Stations.** Memphis Publishing Company is licensed for the operation of Station WMCT at Memphis on Channel 4. The Commission ordered the Memphis Publishing Company to show cause why the license of WMCT should not be modified to specify operation on Channel 5 in lieu of Channel 4. No opposition to the Commission's Show Cause Order was filed by Memphis Publishing Company.

(d) **Alternative Counterproposal of Hoyt B. Wooten d/b as WREC Broadcasting Service and WMPS, Inc.** WREC Broadcasting Service and WMPS, Inc., requested the additional assignment of a VHF channel to Memphis in two alternative counterproposals. In the first alternative counterproposal it was requested that VHF Channel 3 be deleted from Blytheville and assigned to Memphis, and that UHF Channels 17 and 23 be assigned to Blytheville in place of Channel 3 as follows:

	Third Notice		Counterproposal I	
City	VHF Channel No.	UHF Channel No.	VHF Channel No.	UHF Channel No.
Blytheville, Ark	3	64	†	†17, †23, 64
Memphis, Tenn.	5, *10, 13	42, 48	†3, 5, *10, 13	42, 48

(e) **Statement in Support of WREC and WMPS Counterproposal I.** WREC and WMPS urged that the size, population and economic importance of Memphis warranted the addition of a VHF channel and that Channel 3 could be assigned to Memphis without violating any of the Commission's standards for minimum separation of co-channel or adjacent channel assignments. It was pointed out that the nearest assignment of Channel 3 would be at Jackson, Mississippi, a distance of 197 miles from Memphis; that more than half the population that would be served by the operation of Channel 3 at Blytheville resides in the State of Tennessee in areas which have no common identity of interest with Blytheville; that Memphis is a vastly more important economic market than Blytheville and that the rural population surrounding Blytheville are more dependent on Memphis than upon Blytheville; and that it was unlikely that the assignment of Channel 3 in Blytheville would result in the operation of that facility with maximum power. Finally, it was asserted that the operation of the UHF channel in Blytheville would be adequate to serve the needs of that community for television service.

(f) **Opposition to WREC and WMPS Counterproposal I.** Harold L. Sudbury, Blytheville, Arkansas, supported the assignments proposed by the Commission for Blytheville and opposed the Memphis counterproposal. In the opposition it was stated that Blytheville is situated in a large farming and rural area and would be best served by a lower VHF channel; that because of the rural area, extensive coverage was required in order to reach several hundred thousand persons; that no showing had been made by the Memphis parties of a need for the specific use of Channel 3 at Memphis; and that the assignments proposed by the Commission would result in a fair and equitable distribution of the available frequencies.

(g) **Alternative Counterproposal 2 of WREC and WMPS.** In alternative counterproposal 2 WREC Broadcasting Service and WMPS, Inc. requested the addition of a VHF channel to Memphis by making the following changes in the assignments proposed in the Third Notice:

	Third Notice		Counterproposal 2	
City	VHF Channel No.	UHF Channel No.	VHF Channel No.	UHF Channel No.
Blytheville, Ark.	3	64	†13	64
El Dorado, Ark.	10	26	†7	26
Fort Smith, Ark.	5	*16, 22	†11	*16, 22
Hot Springs, Ark.	9	52	†12	52
Jonesboro, Ark.	8	39	†4	39
Little Rock, Ark.	*2, 4, 11	17, 23	†*3, †5, †8	17, 23
Pine Bluff, Ark.	7	36	†10	36
Alexandria, La.	11, 13		†8, 13	
Monroe, La.	8	43	†4	43
Shreveport, La.	3, 12		†2, †11	
State College, Miss.	*2		†*4	
Jackson, Tenn.	5	16	†10	16
Memphis, Tenn.	5, *10, 13	42, 48	†2, †7, †*9, †11	42, 48
Tyler, Texas	7	19	†12	19

The alternative counterproposal of WREC and WMPS would result in the following co-channel separations in Zone II:

Channel	Cities	Mileage
3	Little Rock, Ark.-Springfield, Mo.	180
8	Little Rock, Ark.-Muskogee, Okla.	188
10	Jackson, Tenn.-Birmingham, Ala.	184

(h) **Oppositions and Conflicting Counterproposals to WREC and WMPS Alternative Counterproposal 2.** Oppositions and mutually exclusive counterproposals to the alternative counterproposals of WREC Broadcasting Service and WMPS, Inc., were filed by the following parties: Southwestern Publishing Co., Fort Smith, Arkansas; Voice of Longview, Longview, Texas; Memphis Publishing Company, Memphis, Tennessee; WKY Radiophone Co., Oklahoma City, Oklahoma; Harold L. Sudbury, Blytheville, Arkansas; KTOK, Inc., Oklahoma City, Oklahoma; All Oklahoma Broadcasting Co., Tulsa, Oklahoma; and Southwestern Sales Corporation, Tulsa, Oklahoma.

(i) **The Memphis Educational Reservation.** The Board of Education of the Memphis City Schools, The Memphis Chamber of Commerce, Shelby County Department of Education, Southwestern University and the JCET supported the reservation of VHF Channel 10 in Memphis for use by a noncommercial educational station. The JCET stated that an educational television committee had been formed in Memphis and the Mayor of Memphis had appointed the President of the Board of Education of the Memphis City Schools as its Chairman in April, 1951. The Board of Education of the Memphis City Schools stated that it was using television to some extent in the schools and that the necessary finances would become available in the near future. No objection was filed to the proposed reservation.

Conclusions: Memphis Education Reservation

635. On the basis of the record the reservation of Channel 10 in Memphis for non-commercial educational use is finalized.

Conclusions: Additional Assignment to Memphis

636. It is our view that the record supports the basis for the assignment of a third commercial VHF channel to the Memphis area. We believe that the size, population and economic importance of the City of Memphis warrant this additional assignment. It has been proposed that this be accomplished by the deletion of VHF Channel 3 from Blytheville, a community of approximately 16,000 persons and the substitution of a UHF channel in that community. In view of the relative size, population and economic importance and resources of the City of Memphis as compared with the City of Blytheville, we believe the record supports the basis for the deletion of Channel 3 from Blytheville and the assignment of that channel to Memphis. The second alternative counterproposal would result in three co-channel separations below the minimum adopted for Zone II and must be denied.

637. WREC and WMPS suggested the assignment of UHF Channels 17 and 23, in addition to Channel 64 proposed for Blytheville in the Third Notice, to Blytheville to replace VHF Channel 3. It is our view, however, that 2 UHF channels are adequate to meet the needs of the Blytheville community. Further, since the assignment of either Channel 17 or 23 would result in a co-channel assignment spacing below the minimum for Zone II we are making UHF Channel 74 available to Blytheville.

638. Accordingly, the first alternative counterproposal of Hoyt B. Wooten d/b as WREC Broadcasting Service and WMPS, Inc. is granted, insofar as it requests the assignment of Channel 3 to Memphis and the second alternative counterproposal is denied.

Conclusions: Show Cause Order

639. An appropriate authorization will be issued to Memphis Publishing Company to specify operation of WMCT on Channel 5.

Final Assignments and Reservation

640. The following assignments and reservation are adopted:

City	VHF Channel No.	UHF Channel No.
Blytheville, Ark.		64, 74
Memphis, Tenn.	3, 5, *10, 13	42, 48

TEMPLE, TEXAS

641. (a) **Proposed Assignments.** In the Third Notice the Commission proposed the assignment of two channels to Temple: UHF Channels 16 and 22.

(b) **Census Data.** The population of Temple is 25,000.

(c) **Counterproposal of Bell Broadcasting Company.** Bell Broadcasting Company, Temple, Texas, requested the additional assignment of Channel 6 to Temple. No other changes in the assignments proposed in the Third Notice were requested.

(d) **Statement in Support of Bell Broadcasting Company Counterproposal.** Bell Broadcasting Company contended that since the closest cities to Temple having VHF assignments under the Third Notice are Waco, 30 miles to the north, and Austin, 61 miles to the south, Temple would not receive reliable VHF service. It was pointed out that Fort Hood, containing approximately 35,000 military personnel, was located in the western portion of Bell County, 25 miles from Temple and that Temple contains several large private hospitals, in addition to a large veterans hospital. It was also con-

tended that a UHF channel would not be adequate to cover the entire Temple trading area and that a VHF facility was, therefore, necessary.

(e) Channel 6 at Temple would be 183 miles from the co-channel assignment at San Angelo, Texas. Both Temple and San Angelo are situated in Zone II.

(f) **Conflicting Counterproposals and Oppositions to the Bell Broadcasting Company Counterproposal.** The Bell Broadcasting Company counterproposal does not conflict with any other counterproposal nor have any oppositions been filed thereto.

Conclusions

642. The counterproposal of Bell Broadcasting Company would assign Channel 6 to Temple, at a distance of only 183 miles from the assignment of Channel 6 at San Angelo. Since both Temple and San Angelo are located within Zone II, the counterproposal does not meet the 190 mile minimum assignment separation. Accordingly, the counterproposal of Bell Broadcasting Company is denied.

Final Assignments

643. The following assignments are adopted:

City	UHF Channel No.
Temple	16, 22

BRECKENRIDGE, TEXAS

644. (a) **Proposed Assignments.** In the Third Notice the Commission proposed the assignment of one channel, UHF Channel 14, to Breckenridge.

(b) **Census Data.** The population of Breckenridge is 7,000.

(c) **Counterproposal of Stephens County Broadcasting Company.** Stephens County Broadcasting Company, Breckenridge, requested the additional assignment of Channel 7 to Breckenridge. This counterproposal conflicted with the counterproposal of Trinity Broadcasting Corporation, Dallas, Texas, and an opposition thereto was filed by the Trinity Broadcasting Corporation. Sworn evidence in support of the Stephens County Broadcasting Company, which in accordance with Paragraph 10 of the Order of Hearing Procedure (FCC 51-739) issued in the proceeding was due on October 15, 1951, was not timely filed. On February 1, 1952, Stephens County Broadcasting Company filed a "petition for leave to file late statement and exhibit" in support of its counterproposal. It was alleged therein that "Due to a misunderstanding of the procedure adopted by the Commission in its Order of July 25, 1951, [its] consultant did not prepare the necessary supporting data until a very recent date." It was urged that the filing of sworn evidence at this late date would not unduly retard the instant proceeding nor prejudice any parties thereto.

Conclusions

645. We are of the view that the aforesaid petition does not make the requisite showing of good cause for the acceptance of sworn evidence filed more than three months late. The petition for late filing is therefore denied and the sworn evidence in support of the Stephens County Broadcasting Company is not accepted in this proceeding. In light of our above action, no sworn evidence in support of the counterproposal is before us and, accordingly, this counterproposal and the opposition relating thereto will not be considered further in this Report.

Final Assignments

646. The following assignment is adopted:

City	UHF Channel No.
Breckenridge, Texas	14

SHERMAN, DENISON AND DENTON, TEXAS

647. (a) **Proposed Assignments and Reservation.** In the Third Notice the Commission proposed the following assignments and reservation:

City	VHF Channel No.	UHF Channel No.
Sherman		46
Denison		52
Denton	*2	17

(b) **Census Data.** The population of Sherman is 20,000, the population of Denison is 18,000 and the population of Denton is 21,000.

Sherman

648. (a) **Counterproposal of Sherman Television Company.** Sherman Television Company, Sherman, requested the additional assignment of VHF Channel 12 to Sherman. No other changes in the assignments proposed in the Third Notice were requested.

(b) **Statement in Support of Counterproposal of Sherman Television Company.** Sherman Television Company contended that the Sherman area would probably not receive VHF service under the Third Notice since it is not located near any city to which the Commission has proposed the assignment of VHF channels. It was alleged that the proposed VHF facility in Sherman would serve "well over 100,000 people," and that during the summer vacation period this number would be materially increased.

(c) Under the Sherman counterproposal, Channel 12 at Sherman would be 183 miles from Shreveport, Louisiana. Both Sherman and Shreveport are situated within Zone II.

(d) **Conflicting Counterproposals and Oppositions to the Sherman Television Company Counterproposal.** The Sherman Television Company counterproposal conflicts with the counterproposals of KTOK, Inc., Oklahoma City, Oklahoma, and Voice of Longview, Longview, Texas. In addition, an opposition to the Sherman Television Company counterproposal was filed by KTOK, Inc.

Denison

649. (a) **Counterproposals of Red River Valley Broadcasting Corporation and Red River Publishing Company.** Counterproposals were filed by Red River Valley Broadcasting Corporation and Red River Valley Publishing Company, both of Sherman, requesting the additional assignment of VHF Channel 10 to Sherman-Denison, to be accomplished by substituting a UHF channel for VHF Channel 2 in Denton and by making the following other changes from the assignments proposed in the Third Notice:

	Third Notice		Proposed Changes	
City	VHF Channel No.	UHF Channel No.	VHF Channel No.	UHF Channel No.
Sherman, Texas		46		†
Denison, Texas		52		†
Denton, Texas	*2	17	†	†*46, †52
Sherman-Denison, Texas			†10	†17
Fort Worth, Texas	5, 10	20, *26	†2, 5	20, *26
Waxahachie, Texas		45		†63
Hillsboro, Texas		63		†45
Weatherford, Texas		51		†54

(b) **Statement in support of the Red River Valley Broadcasting Corporation and the Red River Valley Publishing Company Counterproposals.** Red River Valley Broadcasting Corporation and Red River Valley Publishing Company noted that Denison, Texas, is located approximately eight miles from Sherman and contended that Sherman and Denison are situated so closely together they should be considered as one area. It was submitted that Sherman-Denison contains the largest concentration of population in northern Texas, and that with the exception of Dallas, located about 60 miles to the south, and Fort Worth farther to the southwest, there are no major population centers within 125 miles of Sherman-Denison. It was urged that the assignment of a VHF channel rather than a UHF channel to Sherman-Denison would result in service to a larger portion of the trade area. It was alleged that a UHF station would serve 100% of the Denton trade area as compared with only 81.2% of the Sherman-Denison trade area, while a VHF assignment would serve 94.8% of the Sherman-Dension area.

(c) The assignment of Channel 10 to Sherman-Denison would be accomplished by substituting UHF Channel 46 in Denton for VHF Channel 2, where it is reserved for non-commercial educational use, and by substituting Channel 2 in Fort Worth for Channel 10; Channel 63 in Waxahachie for Channel 45; and Channel 45 in Hillsboro for Channel 63. It was noted by Red River Valley that these changes would result in two UHF channels widely spaced in the spectrum, Channels 17 and 46, being assigned to Denton. It was suggested that instead Channels 46 and 52 could be assigned to Denton by substituting Channel 52 in Denton for Channel 17; Channel 17 in Sherman-Denison for Channel 52; and Channel 54 in Weatherford, Texas, for Channel 51.

(d) Denison is 172 miles from Tulsa, Oklahoma, where Channel 17 is assigned. Weatherford is 169 miles from Bryan, Texas, where Channel 54 is assigned. Denison and Weatherford are situated within Zone II, and Bryan is situated within Zone III.

(e) **Conflicting Counterproposals and Oppositions to the Red River Valley Broadcasting Corporation and the Red River Valley Publishing Company Counterproposals.** The Red River Valley counterproposals conflict with the Trinity Broadcasting Corporation counterproposals for Dallas, Texas; and oppositions thereto have been filed by the Trinity Broadcasting Corporation and the Houston Post Company, Houston, Texas.

Denton

650. **The Denton Educational Reservation.** VHF Channel 2 was reserved by the Third Notice for non-commercial educational use in Denton as a "primarily educational center." North State Texas College of Denton filed a statement supporting the above reservation noting that the College was interested in television as a medium for general public instruction and that the Board of Regents had pledged its support in this endeavor. The JCET also filed a statement supporting the reservation including within its presentation a statement of the Texas State College for Women at Denton indicating that it would support and participate in the establishment of a non-commercial educational station at Denton.

Conclusions: Additional Assignment of Channel 12 in Sherman

651. The Sherman Television Company counterproposal would assign Channel 12 to Sherman at a distance of only 183 miles from Shreveport, Louisiana. Since both Sherman and Denison are situated within Zone II, this assignment would violate the required 190 mile minimum assignment separation for this zone. Accordingly, the Sherman Television Company counter proposal is denied.

Conclusions: The Denton Educational Reservation and Channel 10 in Sherman-Denison

652. In order to accomplish the assignment of Channel 10 in Sherman-Denison, the Red River Valley Broadcasting Company and Red River Valley Publishing Company counterproposals would substitute UHF Channel 46 in Denton for VHF Channel 2 reserved for non-commercial educational use. VHF Channel 2 was assigned and reserved in Denton as a "primarily educational center." As noted elsewhere in this Report, we have as an assignment principle, assigned VHF channels to primarily educational centers where VHF channels were available. We see no reason, on the basis of the record in this proceeding, for deviating from this principle in order to make possible the assignment of a VHF channel in Sherman-Denison. We are of the view, therefore, that Channel 2 should not be deleted from Denton. Furthermore, the suggested changes in order to assign UHF Channels 46 and 52 to Denton instead of UHF Channels 17 and 46 would require violations of minimum assignment separation requirements. In order to make the above assignments, Channel 54 would be assigned to Weatherford and Channel 17 to Sherman-Denison. Weatherford is only 169 miles from Bryan where Channel 54 is also assigned and Denison is only 172 miles from Tulsa where Channel 17 is also assigned. All of the above communities are situated in Zone II and accordingly the proposed assignments would not meet the 175 mile minimum separation required for UHF co-channel assignments in this Zone. The counterproposals of Red River Valley Broadcasting Corporation and Red River Valley Publishing Company are therefore denied.

Final Assignments and Reservation

653. The following assignments and reservation are adopted:

City	VHF Channel No.	UHF Channel No.
Sherman, Texas		46
Denison, Texas		52
Denton, Texas	*2	17

LONGVIEW, TEXAS

654. (a) **Proposed Assignments.** In the Third Notice the Commission proposed the assignment of two UHF channels to Longview, Texas: Channels 32 and 38.

(b) **Census Data.** The population of Longview is 25,000.

(c) **Counterproposal of Voice of Longview.** Voice of Longview, Longview, Texas, requested the assignment of VHF Channel 12 to Longview, by substituting Channel 10 in Shreveport, Louisiana, for Channel 12, Channel 5 in El Dorado, Arkansas, for Channel 10, as follows:

	Third Notice		Proposed Changes	
	VHF Channel	UHF Channel	VHF Channel	UHF Channel
City	No.	No.	No.	No.
Longview, Texas		32, 38	+12	32, 38
Shreveport, La.	3, 12		3, †10	
El Dorado, Ark.	10	26	†5	26

(d) **Statement in Support of Voice of Longview Counterproposal.** Voice of Longview urged that the assignment of Channel 12 to Longview could be accomplished without depriving any other community of a television assignment. It was suggested that as an alternative to assigning Channel 12 to Longview, Channel 32 or 38, presently proposed for Longview in the Third Notice, could be assigned to either Gilmer or Tatum, Texas, communities near Longview. Voice of Longview contended that wherever possible at least one VHF channel should be assigned to each community.

(e) The Voice of Longview counterproposal would assign Channel 5 to El Dorado, Arkansas, 182 miles from the co-channel assignment of Channel 5 at Fort Smith, Arkansas. Both El Dorado and Fort Smith are situated within Zone II.

(f) **Conflicting Counterproposals and Oppositions to the Voice of Longview Counterproposal.** Conflicting counterproposals and oppositions to the Voice of Longview counterproposal were filed by East Texas Television Company, Longview, Texas; Lamar Life Insurance Company, Jackson, Mississippi; and Sherman Television Company, Sherman, Texas.

(g) In its opposition, East Texas Television Company opposed any removal of UHF Channel 32 or 38 from Longview for assignment to Tatum or Gilmer. It was noted that the town of Tatum has a population of 599 persons; that it has less than 10 retail stores; and that Tatum cannot support a television station. The Gilmer population was alleged to be 4,114, and it was urged that this community also does not possess the economy necessary to maintain a television facility. It was also noted that neither Tatum nor Gilmer has an AM or FM outlet. In addition to the foregoing, International Broadcasting Corporation, Shreveport, Louisiana, supported the proposed assignments for Shreveport, including the assignment of Channel 12 but has not specifically opposed the Voice of Longview's request to substitute Channel 10 in Shreveport.

(h) **Counterproposal of East Texas Television Company.** East Texas Television Company requested the additional assignment of Channel 9 to Longview by substituting Channel 10 in Lufkin for Channel 9 as follows:

	Third Notice		Proposed Changes	
	VHF Channel	UHF Channel	VHF Channel	UHF Channel
City	No.	No.	No.	No.
Longview, Texas		32, 38	+9	32, 38
Lufkin, Texas	9	46	†10	46

(i) **Statement in Support of East Texas Television Company Counterproposal.** East Texas Television Company stated that within an area of 25 miles of Longview is a population of 121, 492 and 38,985 housing units, and that Lufkin, on a comparable basis, has a population of 55,447 and 17,041 housing units. It was contended that Longview, and its trade area, is able economically to support a VHF television broadcast facility while there is "serious and grave doubts that the Lufkin area could so support one." It was urged that a VHF television station in Longview would reach a large population in East Texas which would not receive such service from any other station proposed in the Third Notice. East Texas submitted that the public interest, convenience and necessity requires the assignment of a VHF television assignment in this area. It was urged that Channel 10 in Lufkin would be adequate to provide service to that community.

(j) The East Texas Television Company would utilize Channel 9 in Longview co-channel with Hot Springs, Arkansas. East Texas Television Company alleged that the distance between these cities was 176 miles but gave no indication as to how this measurement was obtained and it appears to be in error. Forest Capital Broadcasting Company, in its opposition, alleged that the distance between Longview and Hot Springs is 168 miles. We find the distance to be approximately 170 miles. Channel 10 at Lufkin would be 176 miles from the co-channel assignment of Channel 10 at El Dorado, Arkansas, and 180 miles from the co-channel assignment of Channel 10 at Fort Worth, Texas. All of the above cities are in Zone II with the exception of Lufkin, which is in Zone III.

(k) **Conflicting Counterproposals and Oppositions to the East Texas Television Company Counterproposal.** The counterproposal of East Texas Television Company conflicts with the counterproposal of Trinity Broadcasting Corporation, Dallas, Texas. Oppositions to the East Texas Television counterproposal have been filed by Trinity Broadcasting Corporation; Julius M. Gordon & Associates, Inc., Lufkin, Texas; and Forest Capital Broadcasting Co., Lufkin, Texas.

Conclusions: Voice of Longview Counterproposal

655. The Voice of Longview counterproposal in assigning Channel 12 to Longview would assign Channel 5 at El Dorado, Arkansas, only 182 miles from the co-channel assignment at Fort Smith, Arkansas. Since both El Dorado and Fort Smith are situated in Zone II, this assignment would not meet the required 190 mile minimum separation for co-channel assignments in this Zone. Accordingly, the Voice of Longview counterproposal is denied.

Conclusions: East Texas Television Company Counterproposal

656. The East Texas Television Company counterproposal would assign Channel 9 in Longview at a distance of only 170 miles from Hot Springs, Arkansas, where this channel is assigned. This distance is well below the required 190 mile minimum separation for co-channel assignments in Zone II where these communities are situated. In addition, in achieving the assignment of Channel 9 in Longview, East Texas Television Company would assign Channel 10 in Lufkin at a distance of only 176 miles from the co-channel assignment at El Dorado, Arkansas, and 180 miles from the co-channel assignment at Fort Worth, Texas. Lufkin is situated in Zone III and Fort Worth and El Dorado in Zone II. Accordingly, the counterproposal does not meet the 190 mile minimum co-channel assignment separation. In light of the above violations of the minimum separation requirements, the East Texas Television Company counterproposal is denied.

Final Assignments

657. The following assignments are adopted:

City	UHF Channel No.
Longview, Texas	32, 38

SAN ANTONIO AND VICTORIA TEXAS

658. (a) **Proposed Assignments and Reservations.** In the Third Notice the Commission proposed the following assignments and reservations:

City	VHF Channel No.	UHF Channel No.
San Antonio, Texas	4, 5, *9, 12	35, 41
Victoria, Texas		19

(b) **Census Data.** The population of the San Antonio standard metropolitan area is 500,000 and of the City of San Antonio, 408,000. The population of Victoria is 16,000.

(c) **Existing Stations.** San Antonio Television Company is licensed for the operation of Station KEYL on Channel 5 and Southland Industries, Inc., is licensed for the operation of Station WOAI-TV on Channel 4, both in San Antonio, Texas.

(d) **Counterproposal of Lack's Stores, Inc.** Lack's Stores, Inc. requested the additional assignment of VHF Channel 12 to Victoria by substituting UHF Channel 23 in San Antonio for Channel 12, as follows:

	Third Notice		Counterproposal	
	VHF Channel	UHF Channel	VHF Channel	UHF Channel
City	No.	No.	No.	No.
San Antonio, Texas	4, 5, *9, 12	35, 41	4, 5, *9, †	†23, 35, 41
Victoria, Texas		19	†12	19

(e) **Statement in Support of Lack's Stores, Inc. Counterproposal.** Lack's Stores, Inc. alleged that the nearest VHF assignments under the Commission's plan were proposed for Corpus Christi, San Antonio, Galveston and Houston, all at least 75 miles from Victoria. It was noted that these cities form a triangle, with Victoria roughly in the center; and, accordingly, it was submitted that large areas surrounding Victoria would not receive reliable VHF service under the Commission's plan. It was urged that UHF would not be adequate, and that a UHF facility would not be utilized in Victoria in the foreseeable future. It was contended, accordingly, that a maximum need for VHF service exists in Victoria. It was noted that the removal of one of the channels from San Antonio would still leave this city and its surrounding area with three VHF services.

(f) **Conflicting Counterproposals and Oppositions to Lack's Stores, Inc., Counterproposal.** No conflicting counterproposals have been filed. Oppositions to the counterproposal of Lack's Stores, Inc., have been filed by Texas State Network, Inc.,[138] and the Walmac Company, both of San Antonio.

(g) **Educational Reservation in San Antonio.** St. Mary's University of San Antonio filed a statement in support of the reservation of Channel 9 in San Antonio for non-commercial educational use. The University stated that it was presently cooperating with the two commercial stations in San Antonio in providing programs of an educational nature. It was noted that while the University had no definite solution for the problem of financing, it proposed to work with other educational groups to find a means of establishing an educational television station. Additional support for the reservation was submitted by Our Lady of the Lake College at San Antonio. No oppositions to the proposed reservation were filed.

Conclusions: Additional VHF Assignment for Victoria

659. We are of the view that the record does not support the basis for assigning VHF Channel 12 to Victoria at the expense of deleting a VHF channel from San Antonio. In light of the wide disparity in population between San Antonio and Victoria, a community of 16,000, we do not believe such an assignment would be warranted. Accordingly, the counterproposal of Lack's Stores, Inc., is denied.

Conclusions: Educational Reservation in San Antonio

660. On the basis of the record the reservation of Channel 9 in San Antonio for non-commercial educational use is finalized.

Final Assignments and Reservation

661. The following assignments

[138] On November 6, 1951, Texas State Network, Inc., Fort Worth, Texas, filed a Motion to Strike the statement of Lack's Stores, Inc., filed October 15, 1951, in support of its May 7, 1951 comments, alleging that the October 15, 1951 statement constituted a new proposal departing from the May 7, 1951 comment and therefore not in conformity with Paragraph 5(b) of the Order of Hearing Procedure of July 25, 1951. The May 7, 1951 Comment of Lack's Stores, Inc., proposed the assignment of VHF Channel 12 in Victoria, Texas, rather than to San Antonio, Texas, and the engineering affidavit attached thereto stated "it is anticipated that an additional UHF facility can be made available to San Antonio to replace the VHF facility removed." In its sworn statement of October 15, 1951, Lack's Stores, Inc., proposed the assignment of VHF Channel 12 to Victoria instead of San Antonio with UHF Channel 23 to replace the deletion of Channel 12 at San Antonio. The engineering affidavit attached thereto supports this assignment. On November 13, 1951, Lack's Stores, Inc., filed an opposition to the Motion to Strike. We believe that the October 15, 1951 sworn statement of Lack's Stores, Inc., is consistent with its Comment of May 7, 1951. Accordingly, the Motion to Strike is DENIED and the Lack's Stores, Inc., statement is being considered in this proceeding.

and reservations are adopted:

City	VHF Channel No.	UHF Channel No.
San Antonio, Texas	4, 5, *9, 12	35, 41
Victoria, Texas		19

DALLAS, TEXAS

662. (a) **Proposed Assignments and Reservation.** In the Third Notice the Commission proposed the assignment of five channels to Dallas, Texas; VHF Channels 4, 8, and 13 and UHF Channels 23 and 29, with Channel 13 reserved for non-commercial educational use.

(b) **Census Data.** The Dallas standard metropolitan area has a population of 615,000 and the City of Dallas has a population of 434,000.

(c) **Existing Stations.** A. H. Belo Corporation is licensed for the operation of Station WFAA-TV on Channel 8 and KRLD Radio Corporation is licensed for the operation of Station KRLD-TV on Channel 4, both in Dallas.

(d) **Statement in Support of Proposed Assignments.** A. H. Belo Corporation, Dallas, Texas, supported the proposed assignments for Dallas. It was noted that the nearest co-channel assignment to Channel 8 in Dallas would be at Muskogee, Oklahoma, a distance of 220 miles, and the nearest adjacent channel assignment would be Channel 7 at Tyler, Texas, a distance of 92 miles.

(e) **Counterproposal of Trinity Broadcasting Corporation.** Trinity Broadcasting Corporation, Dallas, requested the assignment of an additional VHF channel to Dallas by deleting Channel 8 from Dallas and substituting therefor Channels 7 and 9, and making other changes as set forth below:

	Third Notice		Proposed Changes	
City	VHF Channel No.	UHF Channel No.	VHF Channel No.	UHF Channel No.
Dallas, Texas	4, 8, *13	23, 29	4, †7, †9, *13	23, 29
Tyler, Texas	7	19	†8	19
Lufkin, Texas	9	46	†5	46
Fort Worth, Texas	5, 10	20, *26	5, †11	20, *26
Waco, Texas	11	*28, 34	†10	*28, 34
Lawton, Oklahoma	11	*28, 34	†10	*28, 34

(f) **Statement in Support of Counterproposal of Trinity Broadcasting Corporation.** Trinity Broadcasting Corporation pointed out that of the three VHF channels proposed for Dallas in the Third Notice, two are presently in use and the last, Channel 13, is proposed to be reserved for non-commercial educational use. Accordingly, it was noted that under the proposed assignments, no VHF channels would be available for new commercial applicants in Dallas. In view of the size of Dallas, its rapid growth, and its large and prosperous trading area, Trinity Broadcasting Corporation urged that the maximum number of "wide coverage television facilities" should be assigned. Trinity Broadcasting Corporation submitted that assigning only two VHF channels in Dallas for commercial purposes would create "monopolistic problems of two dominant television networks in a large and prosperous area where competition should obviously be encouraged rather than limited." It was argued that it would be possible to reassign VHF channels to five communities in Texas and one community in Oklahoma in such a way as not to reduce the number of VHF channels proposed by the Commission for any of these communities while at the same time achieving an additional VHF channel in Dallas. Since Station WFAA-TV is operating on Channel 8, which Trinity Broadcasting Corporation would delete, this station would have to move from Channel 8 to Channel 7. Trinity Broadcasting Corporation urged that this "minor move within the upper half of the VHF band is an extremely simple one technically and involves relatively little cost."

(g) The assignment of Channel 7 at Dallas would result in a 182 mile co-channel separation between Dallas and Austin, Texas, where Channel 7 is assigned. The assignment of Channel 9 at Dallas would result in a 173 mile co-channel separation between Dallas and Abilene, Texas, where Channel 9 is assigned. The assignment of Channel 8 at Tyler would result in a 179 mile co-channel separation between Tyler and Houston where Channel 8 is assigned. The assignment of Channel 5 at Lufkin would result in a 180 mile co-channel separation between Lufkin and Fort Worth, Texas, where Channel 5 is assigned. Dallas, Fort Worth, Abilene and Tyler are all situated in Zone II. Houston, Lufkin and Austin are situated in Zone III.

(h) **Conflicting Counterproposals and Oppositions to the Trinity Broadcasting Corporation Counterproposal.** The Trinity Broadcasting Corporation's counterproposal conflicts with the counterproposal of KTRH Broadcasting Company and Shamrock Broadcasting Company, Houston, Texas; South Texas Television Company, Houston, Texas; Red River Valley Broadcasting Corporation and Red River Valley Publishing Company, Sherman, Texas; East Texas Television Company, Longview, Texas; and Stephens County Broadcasting Company, Breckenridge, Texas.[137] In addition, oppositions to the Trinity Broadcasting Corporation counterproposal were filed by A. H. Belo Corporation, Dallas, Texas; Julius M. Gordon & Associates, Inc., Lufkin, Texas; KTRH Broadcasting Company and Shamrock Broadcasting Company, Houston, Texas; Lucille Ross Buford, licensee of Station KGKB, Tyler, Texas, and Oil Belt Television Company, Breckenridge, Texas.[138]

(i) **Educational Reservation.** The JCET filed a statement supporting the reservation of Channel 13 in Dallas for non-commercial educational use. It was urged that Dallas was a great metropolitan area with many schools and colleges and that it was important that Channel 13 be reserved. No oppositions to the proposed reservation have been filed.

[137] No sworn evidence in support of the Breckenridge counterproposal was accepted for filing, and, accordingly, this comment will not be considered in this Report.

[138] Although Oil Belt Television Company filed a comment in opposition to the counterproposal of Trinity Broadcasting Corporation on June 11, 1951, no sworn evidence was submitted in support of its oppositions; and, accordingly, the opposition will not be considered further in this Report.

Conclusions: Additional Commercial VHF Assignments

663. The Trinity Broadcasting Company counterproposal would assign an additional VHF channel to Dallas only by deviating from the required minimum mileage separations. Channel 7 at Dallas would be only 182 miles from the co-channel assignment at Austin; Channel 9 at Dallas would be only 173 miles from the co-channel assignment at Abilene; Channel 8 at Tyler would be only 179 miles from the co-channel assignment at Houston; and finally, Channel 5 at Lufkin would be only 180 miles from the co-channel assignment at Fort Worth. Since all of these measurements are between cities in Zone II, or between cities in Zone II and Zone III, they do not meet the required 190 mile minimum separation for co-channel assignments. Accordingly, the counterproposal of Trinity Broadcasting Corporation is denied.

Conclusions: Educational Reservation

664. On the basis of the record, the reservation of VHF Channel 13 in Dallas for non-commercial educational use is finalized.

Conclusions: Additional Channel for Dallas

665. We are of the view that the assignment of an additional channel in Dallas is warranted on the basis of the record.[139] It was above noted that the counterproposal requesting additional VHF channels for Dallas could not be granted. UHF Channel 73 in Dallas would meet the required mileage spacings for channel assignments in this zone. Accordingly, Channel 73 will be added to Dallas.

Final Assignments and Reservation

666. The following assignments and reservation are adopted:

City	VHF Channel No.	UHF Channel No.
Dallas, Texas	4, 8, *13	23, 29, 73

AMARILLO, LUBBOCK AND MONAHANS, TEXAS

667. (a) **Proposed Assignments and Reservations.** In the Third Notice the Commission proposed the following assignments and reservations:

City	VHF Channel No.	UHF Channel No.
Amarillo	*2, 4, 5, 7, 10	
Lubbock	11, 13	*20, 26
Monahans	5	

(b) **Census Data.** The standard metropolitan area of Lubbock has a population of 101,000 with the City of Lubbock having a population of 72,000. The Amarillo standard metropolitan area has a population of 87,000 and the City of Amarillo, a population of 74,000. The population of Monahans is 6,000.

Lubbock

668. (a) **Counterproposal of Plains Radio Broadcasting Company.** Plains Radio Broadcasting Company, Lubbock, Texas, requested the additional assignment of Channel 5 to Lubbock by deleting this channel from Amarillo, Texas, and by making the following changes in the assignments proposed in the Third Notice:

	Third Notice		Proposed Changes	
City	VHF Channel No.	UHF Channel No.	VHF Channel No.	UHF Channel No.
Amarillo	*2, 4, 5, 7, 10		*2, 4, † 7, 10	
Lubbock	11, 13	*20, 26	†5, 11, 13	*20, 26
Monahans	5		†9	

(b) **Statement in Support of Plains Radio Broadcasting Company Counterproposal.** Plains Radio Broadcasting Company pointed out that the assignment of Channel 5 to Lubbock, rather than to Amarillo, would provide three VHF channels to Lubbock, and four VHF channels to Amarillo. It was noted that the population of Amarillo and the population of Lubbock are practically equal. Accordingly, it was urged that the assignment of Channel 5 to Lubbock rather than to Amarillo would effect a more equitable distribution of television facilities. It was argued that there is no valid reason why Amarillo should be assigned five VHF channels, with Lubbock only two.

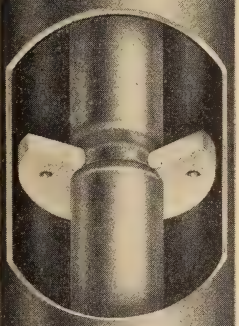
(c) It was pointed out that although in 1940 Amarillo had a substantially larger population than did Lubbock, during the past ten years Lubbock has grown 124% in population. It is also noted that the 1950 population figures for the metropolitan area of Lubbock are substantially greater than those for Amarillo. It was submitted that because of the comparable size of the two cities, and the comparable amount of business done in each city, a fair and equitable distribution of television facilities requires that a comparable number of VHF channels be assigned to each of the cities. The closest co-channel assignment to Channel 5 at Lubbock would be 268 miles, while the closest adjacent channel assignment would be 161 miles. Channel 9 at Monahans would be 205 miles from the closest co-channel assignment, and 150 miles from the closest adjacent channel assignment.

(d) **Conflicting Counterproposals and Oppositions to the Plains Radio Broadcasting Company Counterproposal.** No oppositions nor conflicting counterproposals to the Plains Radio Broadcasting Company counterproposal have been filed.

(e) **The Lubbock Educational Reservation.** The JCET supported the reservation of UHF Channel 20 in Lubbock for non-commercial educational use and submitted statements by Texas Technological College and the Lubbock Independent School District supporting the reservation. No oppositions to the proposed reservation were filed.

Amarillo

669. **The Amarillo Educational Reservation.** The JCET and Amarillo Public Schools supported the reservation of VHF Channel 2 for non-commercial educational use in Amarillo. The JCET submitted a statement by West Texas College, Canyon, Texas, supporting the reservation. No oppositions to the proposed reservation were filed.



Conclusions: Additional VHF Assignment in Lubbock

670. We are of the view, that the record supports the basis for the assignment of VHF Channel 5 in Lubbock. In light of the compar-

[139] See also our discussion above in connection with the addition of a UHF channel to Pittsburgh.

TRANSMISSION LINES FOR AM-FM-TV-MICROWAVE • ANTENNAS • DIRECTIONAL ANTENNA EQUIPMENT • ANTENNA TUNING UNITS • TOWER LIGHTING EQUIPMENT

able size and importance of Lubbock and Amarillo, we believe that the assignment of a third VHF channel to Lubbock would effect a more equitable distribution of television facilities than the assignment of a fifth channel to Amarillo. Accordingly, the counterproposal of Plains Radio Broadcasting Company is granted. As noted above, the Mexican-United States Television Agreement has been modified to reflect the substitution of VHF Channel 9 to Monahans for Channel 5.

Conclusions: Lubbock and Amarillo Educational Reservations

671. In view of the foregoing, the reservation of Channel 20 in Lubbock and Channel 2 in Amarillo for non-commercial educational use are finalized.[140]

Final Assignments and Reservations

672. The following assignments and reservations are adopted:

City	VHF Channel No.	UHF Channel No.
Lubbock, Texas	5, 11, 13	*20, 26
Amarillo, Texas	*2, 4, 7, 10	
Monahans, Texas	9	

McALLEN, BROWNSVILLE, HARLINGEN AND WESLACO, TEXAS

673. (a) **Proposed Assignments.** In the Third Notice the Commission proposed the following assignments:

City	VHF Channel No.	UHF Channel No.
McAllen		20
Brownsville	4, 5	
Harlingen		23

No assignments were proposed for Weslaco.

(b) **Census Data.** The City of Brownsville has a population of 36,000; the City of Harlingen a population of 23,000; the City of McAllen a population of 20,000; and Weslaco a population of 8,000.

McAllen

674. (a) **Counterproposal of McAllen Television Company.** McAllen Television Company, McAllen, Texas, requested the additional assignment of VHF Channel 5 to McAllen by moving Channel 5 from Brownsville to McAllen and assigning Channel 12 to Brownsville in place of Channel 5, as follows:

	Third Notice		Proposed Changes	
City	VHF Channel No.	UHF Channel No.	VHF Channel No.	UHF Channel No.
McAllen, Texas		20	†5	20
Brownsville, Texas	4, 5		4, †12	

(b) **Statement in Support of McAllen Television Company Counterproposal.** McAllen Television Company argued that two channels would not be utilized in Brownsville; that there is a widespread interest in McAllen and Hidalgo County for VHF television service; and that the removal of Channel 5 from Brownsville and its assignment at McAllen would not deprive the Brownsville population of VHF service, since Channel 4 would remain in Brownsville. It was also suggested that Channel 12 could be utilized in Brownsville should additional television service be required in that community.

(c) As noted above, Channel 12 is assigned to Reynosa, Mexico, by the Mexican-United States Television Agreement. Reynosa is only 52 miles from Brownsville where Channel 12 is proposed as a substitute for Channel 5.

(d) **Conflicting Counterproposals and Oppositions to the McAllen Television Company Counterproposal.** A conflicting counterproposal to the McAllen Television Company counterproposal has been filed by Taylor Radio and Television Corporation, Weslaco, Texas. Oppositions to the McAllen Television Company counterproposal were filed by Brownsville Broadcasting Company, Brownsville, Texas, and Taylor Radio and Television Corporation, Weslaco.

Harlingen

675. (a) **Counterproposal of Harbenito Broadcasting Company, Inc.** Harbenito Broadcasting Company, Inc., Harlingen, Texas, requested the additional assignment of Channel 4 to Harlingen, Texas. This assignment would be accomplished by deleting the Channel 4 assignment from Brownsville, Texas, and substituting UHF Channel 36 in Brownsville, as follows:

	Third Notice		Proposed Changes	
City	VHF Channel No.	UHF Channel No.	VHF Channel No.	UHF Channel No.
Harlingen, Texas		23	†4	23
Brownsville, Texas	4, 5		†, 5	†36

(b) **Statement in Support of Harbenito Broadcasting Company, Inc., Counterproposal.** Harbenito Broadcasting Company contended that its counterproposal would effect a fair, efficient and equitable distribution of television facilities. It was urged that the assignment of a VHF channel at Harlingen would make available a second station to that community, and would provide service to a substantially greater population than that which would receive service from a station located in Brownsville. It was submitted that the use of Channel 4 at Brownsville would result in a dissipation of the signal since a substantial amount of the service area would fall within the Gulf of Mexico, and since a greater portion of the service area would fall in Mexico than would be the case if Channel 4 were assigned to Harlingen. It was also noted that under the Harbenito counterproposal, the number of stations available to Brownsville would not be reduced since UHF Channel 36 would be provided as a substitute for that community and that the assignment of Channel 4 at Harlingen would still provide Grade A service to Brownsville. Harbenito Broadcasting Company noted that Harlingen is more centrally located in the Rio Grande Valley than Brownsville; that the maximum population density occurs several miles west of Brownsville; and that, accordingly, a significant increase in population could be served by the assignment of Channel 4 to a community farther west than Brownsville. Harbenito Broadcasting Company, Inc., also asserted that a combination of the Harlingen and San Benito populations, San Benito being less than 4 miles from Harlingen, is slightly in excess of that of Brownsville.

(c) The closest co-channel assignment to Channel 4 at Harlingen would be the assignment in the Mexican-United States Television Agreement for Saltillo, Coahuila, Mexico, at a distance of 214 miles, while the closest adjacent channel assignment would be Channel 3 at Laredo, Texas, at a distance of 143 miles. The nearest co-channel assignment to Channel 36 in Brownsville would be at Jacksonville, Texas, at a distance of 437 miles, and the nearest adjacent channel assignment would be Channel 35 at San Antonio, 248 miles distant.

(d) **Conflicting Counterproposals and Oppositions to the Harbenito Broadcasting Company, Inc., Counterproposal.** Oppositions to the Harbenito Broadcasting Company, Inc., counterproposal were filed by Brownsville Broadcasting Company, Brownsville, Texas, and the Houston Post Company, Houston, Texas. Taylor Radio and Television Corporation, Weslaco, Texas, filed a counterproposal conflicting in part with the Harbenito Broadcasting Company, Inc. counterproposal. In its opposition, the Brownsville Broadcasting Company supported the Commission's proposed assignments of VHF Channels 4 and 5 in Brownsville. It was urged that Harlingen had a population of only 23,000 as compared with 36,000 for Brownsville; that the assignment of one VHF and one UHF channel to Brownsville would create a serious economic situation for the UHF broadcaster, while the problem of intermixture would not arise under the Commission's proposal and that UHF Channel 54 or 60 could be assigned to Harlingen if added assignments were necessary in that community. In its opposition, the Houston Post objected to the use of Channel 4 in Harlingen since it would be assigned only 228 miles from the co-channel assignment at San Antonio. The Houston Post Company urged a minimum spacing of 240 miles for assignments in this area on Channels 2 through 6.

Weslaco-Harlingen

676. (a) **Counterproposal of Taylor Radio and Television Corporation.** Taylor Radio and Television Corporation of Weslaco, Texas, requested the additional assignments of Channels 4 and 5 to Weslaco-Harlingen by deleting Channels 4 and 5 from Brownsville, and by making the following changes in the assignments proposed in the Third Notice:[141]

	Third Notice		Proposed Changes	
City	VHF Channel No.	UHF Channel No.	VHF Channel No.	UHF Channel No.
Brownsville, Texas	4, 5		†, †	
Weslaco-Harlingen, Texas			†4, †5	
Harlingen, Texas		23		23

(b) **Statement in Support of Taylor Radio and Television Corporation Counterproposal.** Taylor Radio and Television Corporation contended that a large portion of the service areas of Channels 4 and 5 at Brownsville would extend eastward into the Gulf of Mexico. It was urged that the assignment of these channels in the Weslaco-Harlingen area would provide Grade A television service to a substantially larger number of residents in the Lower Rio Grande Valley Area. Taylor Radio and Television Corporation pointed out that Brownsville is but one city of an isolated compact group of cities, with the population of Brownsville being only 21% of the total population of the 15 cities situated in the Lower Rio Grande Valley. It was noted that Brownsville lies at the extreme eastern end of the Lower Rio Grande Valley, almost on the Gulf of Mexico, and that Harlingen, on the other hand, is located much nearer to the geographic center of the Valley. It was stated that Weslaco is 37.2 miles west of Brownsville and 19 miles west of Harlingen. Weslaco is 21.8 miles east of Mission, Texas, the westernmost heavily populated town in the Valley Area.

(c) Channel 4 at Weslaco-Harlingen would be 205 miles from the closest co-channel assignment at Saltillo, Coahuila, Mexico, and 137 miles from the closest adjacent channel assignment. Channel 5 at Weslaco-Harlingen would be 228 miles from the closest co-channel assignment at San Antonio, Texas, and 114 miles from the closest adjacent channel assignment.

(d) **Conflicting Counterproposals and Oppositions to the Taylor Radio and Television Corporation Counterproposal.** Oppositions to the Taylor Radio and Television Corporation counterproposal were filed by Brownsville Broadcasting Company, Brownsville, Texas; Houston Post Company, Houston, Texas; and McAllen Television Company, McAllen, Texas. McAllen Television Company filed a conflicting counterproposal and Harbenito Broadcasting Company, Inc., filed a counterproposal conflicting in part. In its opposition to the Taylor Radio and Television Corporation counterproposal, the Houston Post Company urged that tropospheric propagation in this area requires greater separations than those that would result under the Taylor counterproposal. In the opposition of the Brownsville Broadcasting Company to the counterproposal of Taylor Radio and Television Corporation, the same objections were raised as those in its opposition to the Harbenito Broadcasting Company, Inc., counterproposal discussed above. In the opposition of McAllen Television Company to the Taylor Radio and Television Corporation counterproposal, it was noted that Weslaco is a very small town. The removal of two channels from Brownsville, and their assignment in Weslaco, it was urged, would monopolize all of the VHF channels in the Lower Rio Grande Valley in this small inland town. It was submitted that it would be more appropriate and in the public interest to assign Channel 5 to McAllen, Texas, as proposed by McAllen Television Company.

Conclusions: VHF Assignments

677. As was noted above, the uti-

[140] No request was made in the record for a VHF educational reservation in Lubbock.

[141] Taylor Radio and Television Corporation also proposed to add Channel 2 to Weslaco by deleting that channel from Monterrey, Nuevo Leon, Mexico, and adding it as well to Saltillo, Coahuila, Mexico. In light of the conflict between the Mexican-United States Television Agreement and the Taylor Radio and Television Corporation's counterproposal seeking to shift Channel 2 from Monterrey to Saltillo in order to make available Channel 2 for Weslaco, Taylor Radio and Television Corporation abandoned its proposal to assign Channel 2 in Weslaco. Accordingly, it will not be discussed further in this Report.

lization of VHF Channels 4 and 5 in Brownsville would result in a large portion of the service areas of these stations falling over the Gulf of Mexico and within the Mexican border. The assignment of these channels in a city more centrally located in the Lower Rio Grande would provide a greater population and greater area with Grade A and B service. Moreover, these assignments would not necessarily deprive Brownsville of Grade A service. Accordingly, we are of the view that the VHF assignments for Brownsville should be assigned instead to Brownsville-Harlingen-Weslaco, rather than to Brownsville alone. Channels 4 and 5, therefore, will be assigned to Brownsville-Harlingen-Weslaco. These assignments may be utilized in any community lying within the triangle formed by Browsville, Harlingen and Weslaco. However, we do not believe that McAllen should be added to Brownsville-Harlingen-Weslaco thereby making Channels 4 and 5 available for assignment in that community. McAllen is located at a considerable distance to the west of Brownsville. A station in McAllen, for example, would not afford Grade A service to Brownsville. We are of the view that the request for the assignments of an additional channel to McAllen, Texas, must be denied. We do not believe that a VHF channel should be deleted from Brownsville-Harlingen-Weslaco in order to make an additional assignment available to McAllen. Furthermore, in light of the Mexico-United States television agreement, Channel 12 could not be assigned to Brownsville in order to replace Channel 5 in that community; Channel 12 in Brownsville would be only 52 miles from Reynosa, Tamaulipas, Mexico, where this channel is assigned by the Mexico-United States Television Agreement.

Conclusions: UHF Assignments

678. Channel 23 proposed for Harlingen cannot be utilized in all of Brownsville-Harlingen-Weslaco because of the required mileage spacings for UHF assignments. Accordingly, Channel 23 will remain assigned to Harlingen. Channel 36 proposed for Brownsville by Harbenito Broadcasting Company, Inc., similarly cannot be utilized in all of Brownsville-Harlingen-Weslaco. We believe, however, that the record supports the basis for assigning Channel 36 to Brownsville and it will be assigned to Brownsville.

Final Assignments

679. The following assignments are adopted:

City	VHF Channel No.	UHF Channel No.
Brownsville-Harlingen-Weslaco, Texas[142]	4, 5	
Brownsville, Texas		36
Harlingen, Texas		23
McAllen, Texas		20

HOUSTON, TEXAS

680. (a) **Proposed Assignments and Reservation.** In the Third Notice the Commission proposed assignment of five channels to Houston: VHF Channels 2, 8 and 13 and UHF Channels 23 and 29, with VHF Channel 8 reserved for non-commercial educational use.

(b) **Census Data.** The Houston standard metropolitan area has a population of 807,000 and the city has a population of 596,000.

(c) **Existing Stations.** The Houston Post Company is licensed for the operation of Station KPRC-TV on Channel 2.

(d) **Counterproposal of South Texas Television Company.** South Texas Television Company requested the additional assignment of Channels 5 and 10 to Houston, and that Channel 8, which is proposed to be reserved for non-commercial educational use, be made available instead for commercial purposes. These assignments would be achieved by the following changes in the assignments proposed in the Third Notice:

City	Third Notice VHF Channel No.	Third Notice UHF Channel No.	Proposed Changes VHF Channel No.	Proposed Changes UHF Channel No.
Houston, Texas	2, *8, 13	23, 29	2, †5, *8, †10, 13	23, 29
Beaumont-Port Arthur, Texas	4, 6	31, *37	†, †	31, *37
Galveston, Texas	11	35, 41, *47	†4	35, 41, *47
Karnes City, Texas				†43
Port Arthur, Texas			†12	
Beaumont, Texas			†6	

(e) **Statement in Support of South Texas Television Company Counterproposal.** South Texas Television Company urged that Channels 5 and 10 could be employed in Houston without causing or receiving undue interference, and that such assignments would result in substantial gains in service. It was stated that the closest co-channel assignment to Channel 5 at Houston would be at San Antonio, a distance of 189 miles. Channel 5 would also be 204 miles from Alexandria, Louisiana, where Channel 5 is assigned as a result of our decision herein. All of the above communities are situated in Zone III. Channel 10 at Houston would be 183 miles from Corpus Cristi, Texas, where this channel is assigned. Port Arthur, Texas, on Channel 12 as proposed would be 182 miles from the co-channel assignment at Shreveport, Louisiana. Corpus Christi and Port Arthur are situated in Zone III and Shreveport in Zone II.

(f) With respect to the request that Channel 8 be made available for commercial use, South Texas Television Company asserted that there is no "evidence of a demand for purely educational television facilities at Houston." South Texas Television Company also contended that the Commission did not have the authority to reserve channels for a particular "class" of applicants.[143]

(g) **Conflicting Counterproposals and Oppositions to the South Texas Television Company Counterproposal.** The South Texas Television Company counterproposal conflicts with counterproposals of Trinity Broadcasting Company, Dallas, Texas; and East Texas Television Company, Longview, Texas. In addition, oppositions to the South Texas Television Company counterproposal were filed by the following parties: Lufkin Amusement Company, Beaumont, Texas; Houston Post Company, Houston, Texas; Radio station KTBS, Inc.[144] Shreveport, Louisiana; and Trinity Broadcasting Company, Dallas, Texas.

(h) **Counterproposal of KTRH Broadcasting Company and Shamrock Broadcasting Company.** A joint counterproposal was filed by KTRH Broadcasting Company and Shamrock Broadcasting Company, both of Houston, Texas, also requesting the additional assignment of Channels 5 and 10 to Houston by making the following changes in the assignments proposed in the Third Notice:

City	Third Notice VHF Channel No.	Third Notice UHF Channel No.	Proposed Changes VHF Channel No.	Proposed Changes UHF Channel No.
Houston, Texas	2, *8, 13	23, 29	2, †5, 8, †10, 13	23, 29
Beaumont-Port Arthur, Tex.	4, 6	31, *37	†6	31, *37
Port Arthur, Tex.			†12	

(i) **Statement in Support of Counterproposal of KTRH Broadcasting Company and Shamrock Broadcasting Company.** KTRH Broadcasting Company and Shamrock Broadcasting Company alleged that all minimum requirements for channel spacings as proposed in the Third Notice would be met. It was further urged that Houston ranks 14th in the United States in population and that, among the first twenty cities in the United States, Houston shows the fastest rate of increase in population. It was submitted that with the exception of Pittsburgh and Cleveland where five channels are proposed in the Third Notice, all cities ranking above Houston have anywhere from six to ten assignments. It was contended that, while the possibility of increased tropospheric propagation may cause interference over that expected on the basis of propagation curves, a balance must be sought between the number of assignments which can be added to cities and such interference. It was contended that the assignment of one VHF channel to Beaumont and one to Port Arthur, as it proposed, was a more reasonable approach than assigning the channels to Beaumont-Port Arthur.

(j) Channel 5 at Houston would be 189 miles from the co-channel assignment at San Antonio, and 204 miles from the co-channel assignment at Alexandria, Louisiana. Houston, San Antonio, and Alexandria are all situated in Zone III. Channel 10 at Houston would be 183 miles from the co-channel assignment at Corpus Christi, which is also located in Zone III. Channel 12 in Port Arthur would be 182 miles from the co-channel assigned at Shreveport, Louisiana. Port Arthur lies in Zone III and Shreveport in Zone II.

(k) **Conflicting Counterproposals and Oppositions to the KTRH Broadcasting Company and Shamrock Broadcasting Company Counterproposals.** The above counterproposal conflicts with the counterproposals of Trinity Broadcasting Company and East Texas Television Company, Longview, Texas. In addition, oppositions to the joint counterproposal of KTRH Broadcasting Company and Shamrock Broadcasting Company were filed by Lufkin Amusement Company, Beaumont, Texas; Houston Post Company, Houston, Texas; Radio Station KTBS, Inc., Shreveport, Louisiana[145]; and Trinity Broadcasting Corporation, Dallas, Texas. Lufkin Amusement Company opposed the Houston counterproposals in so far as they requested the assignment of Channel 12 to Port Arthur instead of to Beaumont-Port Arthur. Lufkin also opposed the assignment of Channel 4 at Galveston in place of Channel 11 and of Channel 5 to Houston. It was submitted that the Commission's plan was to be preferred and that the service area of at least five proposed assignments would be degraded under the Houston plans. It was urged that both co-channel and adjacent channel station separations would be substantially decreased in an area recognized as being subject to abnormally high tropospheric propagation characteristics. It was stated that under the Commission's plan the nearest co-channel assignment to Channel 4 at Beaumont-Port Arthur would be at New Orleans, a distance of 242 miles from Beaumont and the nearest adjacent channel assignment at College Station, Texas, more than 130 miles from Beaumont. It was alleged that under the Houston counterproposals, Channel 12 at Port Arthur would be 180 miles from Shreveport where the same channel is assigned, and 79 miles from Houston where adjacent Channel 13 is proposed under the Third Notice. It was urged that the Houston counterproposals would aggravate this condition since the Port Arthur transmitter site would be closer to the gulf in order to maintain the required separation between Port Arthur and Shreveport. It was noted that the center of Port Arthur is only 15 miles from the gulf, while the center of Beaumont is 29 miles from the coast. It was pointed out that the assignment of Channel 4 instead of Channel 11 at Galveston would mean a co-channel spacing of only 223 miles from San Antonio as opposed to 267 miles between Beaumont and San Antonio under the Commission's plan. Lufkin submitted that while tropospheric propagation along the Gulf Coast would have little effect under the Third Notice assignments in this area, tropospheric propagation

[142] These assignments may be used in any community lying within the triangle formed by Brownsville-Harlingen-Weslaco.

[143] The contention that the Commission does not have authority to provide for educational reservations in the Table of Assignments has been disposed of in the Memorandum Opinion of July 13, 1951.

[144] Although Radio Station KTBS, Inc. of Shreveport filed a comment in opposition to the South Texas counterproposal, no evidence in support of its opposition was filed. Accordingly, the KTBS opposition will not be considered in this Report.

[145] This counterproposal originally also urged that UHF Channel 27 be assigned to Fredericksburg, Texas. This request, however, was withdrawn.

[146] No sworn evidence in support of its opposition was filed by KTBS and, accordingly, the opposition will not be considered in this Report.

would be a factor under the Houston counter-proposals and service would be seriously degraded. It was contended that the proposed assignments for Houston and the surrounding area in the Third Notice are adequate to provide service to that community, and that there would appear to be no justification for additional assignments. In its opposition to the Houston counterproposals the Houston Post Company supported the Commission's proposal to employ wider spacing between stations in Gulf Coast area. It was contended that the station separations proposed by the Houston counterproposals were insufficient for this area.

(l) **The Educational Reservation.** The University of Houston submitted a statement supporting the reservation of VHF Channel 8 in Houston, Texas. The University stated that there was extensive support for the reservation from numerous organizations including educational institutions, the Chamber of Commerce, legislators, and the City Council. The University stated that it was "prepared to submit immediately an application for permit to construct an educational television station." It represented that the educational interests in Houston are prepared to operate this station initially not less than six hours a day with ultimate plans for twelve hour day operation. It was noted that the University is presently operating an FM station and is proposing to expend an additional $250,000 for television equipment. The University stated that one source of funds is a special royalty annual income of approximately $250,000, which will be available if needed for the establishment of the television station. The University stated that it is prepared to finance construction on its own, or in cooperation with the Houston Independent School District, and that all educational interests in the area have been assured that in uniting they will have the privilege of using the facility of the educational television station. It was stated that a committee representing various interests will be set up to allocate time on an equitable basis. The JCET also supported the reservation of VHF Channel 8 in Houston. As a part of its presentation, JCET submitted a statement of the Houston Independent School District requesting the reservation. The Superintendent indicated that a committee had formulated various program suggestions. Detailed statistics were submitted to show that the Houston School District has the financial resources necessary for television. It was noted that the 1950 actual budget was almost $19 million and that enrollment in the schools totaled 95,757. In addition, it was pointed out that the School District has an extensive adult education program for the entire community and that during 1950-1951 over 15,000 adults were enrolled in the various activities and course offerings of the adult education department.

Conclusions: Additional VHF Commercial Channels

681. We are of the view that the record does not support the basis for assigning VHF Channels 5 and 10 to Houston. These assignments can be achieved only at the expense of deviating from the required 220 mile minimum assignment spacing for Zone III and 190 mile minimum spacing for Zone II in several instances. These counterproposals would also require the deletion of a VHF channel from Beaumont, Texas, since under the Commission's plan channels are assigned to Beaumont-Port Arthur while the Houston counterproposals would assign VHF channels separately to Beaumont and Port Arthur. As we have noted above, we believe that in this Gulf Coast area, separations greater than the minimum for other parts of the country must be maintained in order to prevent interference caused by tropospheric propagation that could result in a severe degradation of television service in that area. To illustrate the defects in the Houston counterproposals, in order to assign Channel 5 to Houston, this channel would be employed 189 miles from San Antonio, and 204 miles from Alexandria, Louisiana. In order to achieve the assignment of Channel 10 in Houston, a co-channel spacing of 183 miles between Houston and Corpus Christi, Texas, must be employed. It should be pointed out that Corpus Christi and Houston both lie along the Gulf Coast. The above separations are well below the 220 mile minimum for Zone III. Channel 12 at Port Arthur would be only 182 miles from Shreveport, below the 190 mile minimum for Zone II in which Shreveport lies. Accordingly, the counterproposals of South Texas Television Company and KTRH Broadcasting Company and Shamrock Broadcasting Company, in so far as they request the assignment of additional VHF channels, are denied.

Conclusions: Educational Reservation

682. It is our view that the record warrants the reservation of VHF Channel 8 in Houston for non-commercial educational use. The evidence indicates an early utilization of this frequency for use in Houston. We see no merit, therefore, in the South Texas Television Company's contention that no evidence of a demand for "purely educational facilities" exists. We are of the view that no basis exists for deviating in this instance from the principle of making available for educational purposes a VHF channel in those communities with three or more VHF assignments where all such VHF assignments are not in operation. Accordingly, the reservation of Channel 8 in Houston for non-commercial educational use is finalized.

Conclusions: Additional Channel for Houston

683. We are of the view that the assignment of an additional channel in Houston is warranted on the basis of the record.[147] It was above noted that the counterproposals requesting additional VHF channels for Houston could not be granted. UHF Channel 39 in Houston would meet the required mileage spacings for channel assignments in this zone. Accordingly, Channel 39 will be added to Houston.

Final Assignments and Reservation

684. The following assignments and reservation are adopted:

City	VHF Channel No.	UHF Channel No.
Houston, Texas	2, *8, 13	23, 29, 39

[147] See also our discussion above in connection with the addition of a UHF channel to Pittsburgh.

BEAUMONT-PORT ARTHUR, TEXAS

685. (a) **Proposed Assignments and Reservation.** In the Third Notice the Commission proposed the assignment of four channels to Beaumont-Port Arthur, Texas: VHF Channels 4 and 6 and UHF Channels 31 and 37, with Channel 37 reserved for non-commercial educational use.

(b) **Census Data.** The standard metropolitan area of Beaumont-Port Arthur has a population of 195,000; the City of Beaumont has a population of 94,000; and the City of Port Arthur has a population of 58,000.

(c) **Statement in Support of Proposed Assignments.** Beaumont Broadcasting Corporation, Beaumont, Texas, filed a statement supporting the proposed assignments for Beaumont-Port Arthur.[148]

(d) **Educational Reservation.** The JCET filed a statement supporting the reservation of Channel 37 for non-commercial educational use in Beaumont-Port Arthur and submitted a statement by Lamar State College of Technology in support of the reservation. No oppositions to the proposed reservation were filed.

Conclusions: Educational Reservation

686. In view of the foregoing, the reservation of Channel 37 for non-commercial educational use in Beaumont-Port Arthur is finalized.

Final Assignments and Reservation

687. The following assignments and reservation are adopted:

City	VHF Channel No.	UHF Channel No.
Beaumont-Port Arthur, Tex.	4, 6	31, *37

WACO, TEXAS

688. (a) **Proposed Assignments and Reservation.** In the Third Notice the Commission proposed the assignment of three channels to Waco, Texas: VHF Channel 11 and UHF Channels 28 and 34, with Channel 28 reserved for non-commercial educational use.

(b) **Census Data.** The Waco standard metropolitan area has a population of 130,000 and the City of Waco has a population of 85,000.

(c) **Statement in Support of Proposed Assignments.** KWTX Broadcasting Company, Waco, Texas, filed a statement supporting the Commission's proposed assignments for Waco. It was pointed out that Channel 11 in Waco would be 209 miles from the closest co-channel assignment, and 83 miles from the closest adjacent channel assignment.[149]

(d) **Educational Reservation.** Baylor University, the Waco Independent School District, and the JCET supported the reservation of Channel 28 in Waco for non-commercial educational use. No oppositions to the proposed reservation have been filed.

Conclusions: Educational Reservation

689. In view of the foregoing, the reservation of Channel 28 in Waco for non-commercial educational use is finalized.

Final Assignments and Reservation

690. The following assignments and reservation are adopted:

City	VHF Channel No.	UHF Channel No.
Waco, Texas	11	*28, 34

WICHITA FALLS, TEXAS

691. (a) **Proposed Assignments and Reservation.** In the Third Notice the Commission proposed the assignment of four channels to Wichita Falls, Texas; VHF Channels 3 and 6 and UHF Channels 16 and 22, with Channel 16 reserved for non-commercial educational use.

(b) **Census Data.** Wichita Falls has a standard metropolitan area population of 98,000, and the City has a population of 68,000.

(c) **Statement in Support of Proposed Assignments.** Rowley-Brown Broadcasting Company, Wichita Falls, Texas, supported the proposed assignments for Wichita Falls. It was pointed out that the assignment of Channel 3 at Wichita Falls would be 255 miles from the closest co-channel assignment, and 91 miles from the closest adjacent channel assignment, and that Channel 6 at Wichita Falls would be 203 miles from the closest co-channel assignment, and 104 miles from the closest adjacent channel assignment. It was urged that there is a need for these assignments in Wichita Falls.

(d) **Educational Reservation.** The JCET supported the reservation of Channel 16 in Wichita Falls for non-commercial educational use and submitted a statement of the Dean of Administration of Midwestern University, Wichita Falls, that the University is anxious to utilize television as soon as developments in UHF make it feasible to do so. No oppositions to the proposed reservation were filed.

Conclusions: Educational Reservation

692. In view of the foregoing, the reservation of Channel 16 in Wichita Falls for non-commercial educational use is finalized.

Final Assignments and Reservation

693. The following assignments and reservation are adopted:

City	VHF Channel No.	UHF Channel No.
Wichita Falls, Texas	3, 6	*16, 22

COLLEGE STATION, TEXAS: EDUCATIONAL RESERVATION

694. (a) **Proposed Reservation.** In the Third Notice the Commission proposed the reservation of VHF Channel 3 in College Station, Texas, for non-commercial educational use.

(b) The JCET filed a statement supporting the reservation of Channel 3 in College Station for non-commercial educational use. No oppositions to the proposal reservation were filed.

Conclusions

695. In view of the foregoing, the reservation of Channel 3 for non-commercial educational use in College Station, Texas, is finalized.

[148] The counterproposals of South Texas Television Company, and KTRH Broadcasting Company and Shamrock Broadcasting Company, requested that Channels 12 and 6 be assigned to Beaumont and Port Arthur separately, rather than to Beaumont-Port Arthur. The Commission has denied these counterproposals elsewhere in this Report.

[149] Trinity Broadcasting Corporation, Dallas, Texas, filed a counterproposal which, among other things, would change the VHF assignment in Waco to Channel 10. However, the Trinity counterproposal has been denied elsewhere in this Report.

LAREDO, TEXAS: EDUCATIONAL RESERVATION

696. (a) **Proposed Reservation.** In the Third Notice the Commission proposed the reservation of Channel 15 in Laredo, Texas, for non-commercial educational use.

(b) **Statement in Support of Reservation.** The JCET filed a statement supporting the reservation of Channel 15 in Laredo, Texas, for non-commercial educational purposes and submitted a statement of the Superintendent of Catholic Schools at Beeville, supporting the reservation. No opposition to the proposed reservation has been filed.

Conclusions

697. In view of the foregoing, the reservation of Channel 15 for non-commercial educational use in Laredo is finalized.

SAN ANGELO, TEXAS: EDUCATIONAL RESERVATION

698. (a) **Proposed Reservation.** In the Third Notice the Commission proposed the reservation of Channel 23 in San Angelo, Texas, for non-commercial educational use.

(b) The City Manager of San Angelo supported the reservation of Channel 23 in San Angelo for non-commercial educational use stating that the City Commission had pledged cooperation in sharing the costs of construction of a television station. The JCET submitted a statement in support of the reservation, including statements of the San Angelo Public Schools and San Angelo College. No oppositions to the proposed reservation have been filed.

Conclusions

699. In view of the foregoing, the reservation of Channel 23 for non-commercial educational use in San Angelo is finalized.

TEXARKANA, TEXAS: EDUCATIONAL RESERVATION

700. (a) **Proposed Reservation.** In the Third Notice the Commission proposed the reservation of Channel 18 in Texarkana, Texas, for non-commercial educational use.

(b) The JCET supported the reservation of Channel 18 in Texarkana for non-commercial educational use and submitted a statement of the Superintendent of Texarkana Public Schools expressing an interest in and need for the reservation. No oppositions to the proposed reservation have been filed.

Conclusions

701. In view of the foregoing, the reservation of Channel 18 for non-commercial educational use in Texarkana is finalized.

EL PASO, TEXAS: EDUCATIONAL RESERVATION

702. (a) **Proposed Reservation.** In the Third Notice, the Commission proposed the reservation of Channel 7 in El Paso, Texas, for non-commercial educational use.

(b) Texas Western College of El Paso supported the reservation of Channel 7 in El Paso for non-commercial educational use. No oppositions to the proposed reservation have been filed.

Conclusions

703. In view of the foregoing, the reservation of Channel 7 for non-commercial educational use at El Paso is finalized.

FORT WORTH, TEXAS: EDUCATIONAL RESERVATION

704. (a) **Proposed Reservation.** In the Third Notice, the Commission proposed the reservation of Channel 26 in Fort Worth, Texas, for non-commercial educational use.

(b) The JCET filed a statement supporting the reservation of Channel 26 in Fort Worth for non-commercial educational use and submitted a statement of the Director of the Fort Worth Association supporting the reservation. No oppositions to the proposed reservation have been filed.

Conclusions

705. In view of the foregoing, the reservation of Channel 26 for non-commercial educational use in Fort Worth is finalized.

GALVESTON, TEXAS: EDUCATIONAL RESERVATION

706. (a) **Proposed Reservation.** In the Third Notice the Commission proposed the reservation of Channel 47 for non-commercial educational use in Galveston, Texas.

(b) The JCET filed a statement supporting the reservation of Channel 47 in Galveston for non-commercial educational use and submitted a statement of the Acting Superintendent of Galveston Independent Schools indicating an interest in the reservation. No oppositions to the proposed reservation have been filed.

Conclusions

707. In view of the foregoing, the reservation of Channel 47 for non-commercial educational use in Galveston, Texas, is finalized.

CORPUS CHRISTI, TEXAS, EDUCATIONAL RESERVATION

708. (a) **Proposed Reservation.** In the Third Notice the Commission proposed the reservation of Channel 16 in Corpus Christi, Texas, for non-commercial educational use.

(b) The Superintendent of the Corpus Christi Independent School District suported the reservation of Channel 16 in Corpus Christi for non-commercial educational use. The JCET also filed a statement supporting the reservation including testimony of the Dean and Acting President of the University of Corpus Christi expressing the interest of the University in the reservation. The JCET also submitted a statement of the Superintendent of Catholic Schools at Beeville, Texas, supporting the reservation and promising cooperation with other educational institutions in the area. No oppositions to the proposed reservation have been filed.

Conclusions

709. In view of the foregoing, the reservation of Channel 16 for non-commercial educational use in Corpus Christi is finalized.

AUSTIN, TEXAS: EDUCATIONAL RESERVATION

710. (a) **Proposed Reservation.** In the Third Notice the Commission proposed to reserve Channel 30 in Austin, Texas, for non-commercial educational use.

(b) The University of Texas supported the reservation of Channel 30 in Austin for non-commercial educational use, stating that the Board of Regents had instructed the Chancellor and officials of the University to continue the development of plans for the establishment of a non-commercial educational television station. No oppositions to the proposed reservation were filed.

Conclusions

711. In view of the foregoing, the reservation of Channel 30 for non-commercial educational use in Austin is finalized.

MORGANTOWN, WEST VIRGINIA: EDUCATIONAL RESERVATION

712. (a) **Proposed Reservation.** In the Third Notice the Commission proposed the reservation of Channel 24 for Morgantown.

(b) West Virginia University supported the reservation of Channel 24 in Morgantown for non-commercial educational use. No objection was filed to the proposed reservation.

Conclusions

713. In view of the foregoing the reservation of Channel 24 in Morgantown for non-commercial educational use is finalized.

CHARLOTTE, HIGH POINT, WINSTON-SALEM, NORTH CAROLINA; PRINCETON, BECKLEY, WEST VIRGINIA

714. (a) **Proposed Assignments and Reservations.** In the Third Notice the Commission proposed the following assignments and reservations:

City	VHF Channel No.	UHF Channel No.
Greensboro, N. C.	2	*51, 57
Charlotte, N. C.	3, 9	36, *42
High Point, N. C.		15
Winston-Salem, N. C.	12	26, *32
Princeton, West Va.		
Beckley, W. Va.		21

(b) **Census Data.** The standard metropolitan area of Charlotte has a population of 197,000 and the City of Charlotte has a population of 134,000. The Greensboro-High Point standard metropolitan area has a population of 191,000 and the City of High Point has a population of 40,000. The City of Greensboro has a population of 74,000. The standard metropolitan area of Winston-Salem has a population of 146,000 and the City of Winston-Salem has a population of 88,000. The City of Princeton has a population of 8,000. The City of Beckley has a population of 19,000.

(c) **Existing Stations.** Jefferson Standard Broadcasting Company is licensed for the operation of Station WBTV, Charlotte, on Channel 3. Greensboro News Company is licensed for the operation of Station WFMY-TV, Greensboro, on Channel 2.

Charlotte

715. (a) **Joint Counterproposal of The Broadcasting Company of the South and Inter-City Advertising Company, Charlotte, North Carolina.** In a joint counterproposal The Broadcasting Company of the South and Inter-City Advertising Company requested the additional assignment of Channel 6 to Charlotte, by making the following changes in the assignments proposed in the Third Notice:

City	Third Notice VHF Channel No.	Third Notice UHF Channel No.	Proposed Changes VHF Channel No.	Proposed Changes UHF Channel No.
Augusta, Georgia	6, 12		†7, 12	
Charlotte, N. C.	3, 9	36, *42	3, †6, 9	36, *42
Wilmington, N. C.	6	29, *35	†12	29, *35
Charleston, S. C.	2, 5, *13		2, †4, *13	
Columbia, S. C.	7, 10	*19, 25	†5. 10	*19. 25

(b) **Statement in Support of Broadcasting Company of the South and Inter-City Advertising Company Counterproposal.** It was urged that the adoption of the counterproposal would not result in the reduction of the number of assignments proposed by the Commission and that the size and economic importance of Charlotte warranted the assignment of a third VHF channel to that community.

(c) The closest co-channel assignment separations resulting from the requested changes in assignments would be at a distance of 183 miles on Channel 5 between Raleigh, North Carolina, and Columbia, South Carolina; a distance of 183 miles on Channel 12 between Winston-Salem, North Carolina, and Wilmington, North Carolina; and a distance of 180 miles on Channel 6 between Knoxville, Tennessee, and Charlotte, North Carolina.

(d) **Oppositions and Conflicting Counterproposals to Broadcasting Company of the South and Inter-City Advertising Company.** Oppositions and conflicting counterproposals were filed by High Point Enterprises, Inc., High Point, North Carolina; Piedmont Publishing Company and Winston-Salem Broadcasting Company, Winston-Salem, North Carolina; Daily Telegraph Printing Company, Bluefield, West Virginia; Radio Augusta, Inc., Augusta, Georgia; Southeastern Broadcasting Company and Middle Georgia Broadcasting Company, Macon, Georgia, and Joe L. Smith, Jr., Inc., Beckley, West Virginia.

(e) **The Charlotte Educational Reservation.** Davidson College, Davidson, North Carolina, and JCET supported the reservation of Channel 42 at Charlotte. The JCET submitted a resolution of the Charlotte Board of School Commissioners suporting the reservation. No objection was filed to this proposed reservation.

High Point

716. (a) **Counterproposal of High Point Enterprises, Inc., High Point, North Carolina.** High Point Enterprises, Inc., requested the additional assignment of VHF Channel 6 to High Point, North Carolina, without making any other changes in the assignments proposed in the Third Notice.

(b) **Statement in Support of High Point Enterprises, Inc., Counterproposal.** It was recognized by High Point Enterprises, Inc., that the operation of Channel 6 at High Point would result in the co-channel operation of that channel at Richmond, Virginia, and Wilmington, North Carolina, at distances of 178 and 166 miles, respectively, from High Point. It was urged, however, that there would be no difficulty in meeting the 170 mile required separation between transmitters; and, moreover, that a separation of 134.5 miles was all that was required to protect Grade A service and that the separations proposed by High Point Enterprises, Inc., on Channel 6 would exceed that distance.

(c) **Oppositions and Conflicting Counterproposals to High Point Enterprises, Inc., Counterproposal.** Conflicting counterproposals were filed by Broadcasting Company of the South and Inter-City Advertising Company, Charlotte, N. C.;

Piedmont Publishing Company and Winston-Salem Broadcasting Company, Winston-Salem, N. C.; Daily Telegraph Printing Company, Bluefield, West Virginia, and Joe L. Smith, Jr. Inc., Beckley, West Virginia. Havens & Martin opposed the High Point counterproposal.

Winston-Salem

717. (a) **Counterproposal of Piedmont Publishing Company and Winston-Salem Broadcasting Company.** In identical counterproposals Piedmont Publishing Company and Winston-Salem Broadcasting Company requested the additional assignment of VHF Channel 6 to Winston-Salem, without making any other changes in the assignments proposed by the Commission in the Third Notice.

(b) **Statement in Support of the Piedmont Publishing Company and Winston-Salem Broadcasting Company Counterproposal.** It was urged that the assignment of Channel 6 to Winston-Salem would comply with the Commission's requirement for minimum co-channel and adjacent channel separation; that the nearest co-channel assignment would be at Richmond, at a distance of 185 miles. It was further urged that the size and economic importance and population of the area justified the assignment of a third VHF channel to that community; and that the resources of the community were adequate to support a third VHF channel.

(c) The counterproposal would in addition result in a co-channel assignment separation of 183 miles on Channel 6 between Winston-Salem and Wilmington, North Carolina.

(d) **Oppositions and Conflicting Counterproposals to Piedmont and Winston-Salem Counterproposals.** Conflicting counterproprosals were filed by Broadcasting Company of the South and Inter-City Advertising Company, High Point Enterprises, Inc., Daily Telegraph Printing Company, Joe L. Smith, Jr. Inc., Beckley, West Virginia. Havens and Martin, Inc., Richmond, Virginia, opposed the foregoing counterproposals.

(e) **The Winston-Salem Educational Reservation.** The Winston-Salem Teachers College supported the reservation of Channel 32 at Winston-Salem for non-commercial educational use. No opposition to the reservation was filed.

Princeton

718. (a) **Counterproposal of Daily Telegraph Printing Company, Bluefield, West Virginia.** In a counterproposal to the Commission's Third Notice the Daily Telegraph Printing Company requested the assignment of VHF Channel 6 to Princeton, West Virginia, without any other changes in the assignments proposed in the Third Notice.

(b) **Statement in Support of Daily Telegraph Counterproposal.** Daily Telegraph urged that a grant of the counterproposal would not adversely affect any assignment proposed by the Commission in the Third Notice. It was urged that the counterproposal complies with the priorities outlined in the Commission's Third Notice; that there are no co-channel or adjacent channel assignments within 180 or 170 miles, respectively, from Princeton, West Virginia; and that a grant of the counterproposal would constitute the only Grade A VHF television service to a substantial number of people. In further support of the counterproposal it was urged that UHF is not satisfactory for the area in view of the rugged and mountainous terrain surrounding Princeton.

(c) The counterproposal would result in a 185 mile co-channel assignment separation between Princeton and Knoxville, Tennessee on Channel 6 in Zone II.

(d) **Opposition and Conflicting Counterproposals to Daily Telegraph Counterproposal.** Oppositions and conflicting counterproposals were filed by Broadcasting Company of the South and Inter-City Advertising Company, High Point Enterprises, Inc., Piedmont Publishing Co., Winston-Salem Broadcasting Company, and Joe L. Smith, Jr., Inc., Beckley, West Virginia.

Beckley

719. (a) **Counterproposal of Joe L. Smith, Jr. Inc.,** Joe L. Smith, Jr. Inc., requested the additional assignment of Channel 6 to Beckley without making any other changes in the channels proposed in the Third Notice.

(b) **Statement in Support of Joe L. Smith, Jr. Inc., Counterproposal.** Joe L. Smith, Jr. Inc., stated that the assignment of Channel 6 at Beckley would be in accordance with the assignments proposed by the Commission in the Third Notice. The assignment of Channel 6 at Beckley complies with the minimum spacings adopted herein.

(c) **Oppositions and Conflicting Counterproposals to Joe L. Smith, Jr. Inc., Counterproposal.** Oppositions and conflicting counterproposals were filed by Winston-Salem Broadcasting Company and Piedmont Publishing Company, both of Winston-Salem, North Carolina; Daily Telegraph Printing Company, Bluefield, West Virginia; Broadcasting Company of the South and Inter-City Advertising Company, both of Charlotte, North Carolina; and High Point Enterprises, Inc., High Point, North Carolina. Winston-Salem Broadcasting Company suggested that Channel 9 could be utilized in Beckley in lieu of Channel 6; and WSAZ, Inc., suggested that Channel 4 could be utilized in Beckley in lieu of Channel 6.

(d) The assignment of Channel 9 in Beckley would not comply with the minimum separations adopted in this Report. The assignment of Channel 9 in Beckley would create co-channel assignment separations of 160 miles from Beckley to Wheeling, West Virginia, and 177 miles from Beckley to Charlotte, North Carolina.

(e) The assignment of Channel 4 in Beckley would likewise not comply with the minimum co-channel assignment separations adopted in this Report. The assignment of Channel 4 in Beckley would create a co-channel assignment separation between Beckley and Chapel Hill, North Carolina, on Channel 4 of 176 miles under Plan 1, and between Chapel Hill and Bristol, Tennessee, on Channel 5 of 178 miles under Plan 2, both separations being in Zone II.

Conclusion: The Educational Reservations in Charlotte and Winston-Salem

720. On the basis of the record the reservation of Channel 42 in Charlotte and Channel 32 in Winston-Salem for non-commercial educational use are finalized.

Conclusions: Requests for VHF Assignments

721. The counterproposals seeking the additional assignment of a VHF channel to Charlotte, High Point, Winston-Salem and Princeton would result in the following co-channel assignment separations below 190 miles in Zone II:

Counterproposal	Channel
Broadcasting Co. of the South and Inter-City Adv. Co.	(5 (12 (6 (
High Point Enterprises, Inc.	6
Winston-Salem Broadcasting Co. and Piedmont Publishing Co.	6
Daily Telegraph Printing Co.	6

722. Since these separations in Zone II are below the minimum for this area, the counterproposals must be denied. Accordingly, the counterproposals of Broadcasting Company of the South and Inter-City Advertising Company, High Point Enterprises, Inc., Piedmont Publishing Company, Winston-Salem Broadcasting Company and Daily Telegraph Printing Company are denied.

723. With respect to the addition of a VHF assignment to Beckley, the suggested assignment of Channel 4 and 9 to this city would result in the following co-channel assignment separations below 170 miles in Zone I and 190 miles in Zone II:

Party	Channel
Winston-Salem Broadcasting Co.	9
WSAZ, Inc. Plan 1	4
WSAZ, Inc. Plan 2	5

724. Since these separations in Zones I and II are below the minimum for these areas the counterproposals must be denied. Accordingly, the counterproposals of WSAZ, Inc., and Winston-Salem Broadcasting Company are denied in so far as they request the assignment of VHF Channel 4 or VHF Channel 9.

725. The assignment of Channel 6 to Beckley would comply with the minimum separations adopted and in our view should be made. Accordingly, the counterproposal of Joe L. Smith, Jr., Inc. is granted.

Final Assignments

726. The following assignments and reservations are adopted:

City	VHF Channel No.	UHF Channel No.
Greensboro, N. C.	2	*51, 57
Charlotte, N. C.	3, 9	36, *42
High Point, N. C.		15
Winston-Salem, N. C.	12	26, *32
Beckley, W. Va.	6	21

NORFOLK-PORTSMOUTH, AND NEWPORT NEWS, VIRGINIA

727. (a) **Proposed Assignments and Reservations:** In the Third Notice the Commission proposed the following assignments and reservations:

City	VHF Channel No.	UHF Channel No.
Newport News		33
Norfolk-Portsmouth	10, 12	15, *21, 27

(b) **Census Data.** The standard metropolitan area of Norfolk-Portsmouth has a population of 446,000. The City of Norfolk has a population of 214,000. The city of Portsmouth has a population of 80,000. The City of Newport News has a population of 42,000.

(c) **Existing Station:** The WTAR Radio Corporation is licensed to operate station WTAR-TV on Channel 4 at Norfolk. The licensee has been ordered to show cause why the license of WTAR-TV should not be modified to specify Channel 10 in lieu of Channel 4.

Cities	Mileage
Raleigh, N.C.-Columbia, S.C.	183
Winston-Salem, N.C.-Wilmington, N.C.	183
Knoxville, Tenn.-Charlotte, N.C.	180
Wilmington, N.C.-High Point N.C.	166
Winston-Salem, N.C.-Wilmington, N.C.	183
Princeton, W. Va.-Knoxville, Tenn.	185

Norfolk-Portsmouth

728. (a) **First Alternative Counterproposal and Answer to Order to Show Cause of WTAR Radio Corporation.** In a counterproposal to the Commission's Third Notice and in its Answer to the Commission's Order to Show Cause, WTAR objected to the proposal to modify the license of WTAR-TV to specify Channel 10 in lieu of Channel 4. In its counter-proposal to the assignments proposed in the Third Notice, WTAR Radio Corporation requested the assignment of Channel 3 to Norfolk-Portsmouth for the operation of WTAR-TV by the following changes in the assignments proposed in the Third Notice:

Cities	Zone	Mileage
Beckley-Wheeling	I	160
Beckley-Charlotte	II	177
Beckley-Chapel Hill	II	176
Chapel Hill-Bristol	II	178

City	Third Notice		Counterproposal I	
	VHF Channel No.	UHF Channel No.	VHF Channel No.	UHF Channel No.
Norfolk-Portsmouth, Va.	10, 12	15, *21, 27	3†, 10	15, *21, 27
Richmond, Va.	3, 6	*23, 29	6, 12†	*23, 29

(b) **Statement in Support of WTAR Counterproposal I.** In support of its first alternative counterproposal and in opposition to the Commission's Order to Show Cause, WTAR Radio Corporation argued that WTAR-TV has been in operation since April 2, 1950, on Channel 4; that the shift to Channel 10 would involve costs to the licensee in the amount of $56,000; that additional revenue would be lost as a result of the three to four week period of conversion; and that the public would be deprived of its only available television service during this period. It was further urged that the assignment of Channel 3 to Norfolk and Channel 12 to Richmond were technically feasible and would comply with the Commission's standards for minimum separation of co-channel and adjacent
